POSTAL AND TELEGRAPH CONFERENCE, 1898.

REPORT OF THE DELEGATES TO THE INTERCOLONIAL POSTAL AND TELEGRAPHIC CONFERENCE HELD IN HOBART DURING MARCH AND APRIL, 1898.

PRESIDENT: THE HON. SIR PHILIP FYSH, K.C.M.G., M.H.A., OF TASMANIA.

- I. The following Colonies were represented :—New South Wales, Victoria, South Australia, Queensland, and Tasmania.
- II. The Conference sat on the 28th, 29th, 30th, and 31st March, and 1st, 2nd, and 4th April.

The following were the principal Resolutions adopted ; viz. :—

RELATING TO POSTAL SERVICE.

1. That in the opinion of this Conference it would be inadvisable to make any further reduction of the over-sea postage rate until the way is clear for a reduction in the present large subsidies paid for the carriage of such mails, and the present inland and intercolonial rates.
2. That this Conference is of opinion that the word “specimen” be placed across all stamps issued to collectors. That all Postage Stamps issued to the Berne Postal Bureau or between Post Offices shall bear an obliteration with the date-stamp.
3. That an inset or a hand-bill should not be regarded as coming within the definition of a Newspaper Supplement under the Post Office Acts.
4. That representations be made from this Conference to the Post Office authorities at Queensland, pointing out that the high rates charged on newspapers coming from other Colonies is an unjustifiable restriction on the Australian press.
5. That this Conference hereby records its appreciation of the zealous and able manner in which the Hon. J. Gavan Duffy, Postmaster-General of Victoria, discharged the duty of representing Australasia at the Washington Postal Convention.

6. That this Conference recommend to the Governments of Australasia the ratification of the Treaty entered into at Washington at the last Universal Postal Congress.

7. That this Conference recommends to the Governments of Australasia that no alteration in International Postal Rates be made without the Colony proposing to make such alterations advising the other Colonies and endeavouring to arrange for uniformity of action.

8. That the various Agents-General Delegates to the Postal Conference in London be instructed to oppose the proposal to reduce the rate of postage to all parts of the British Empire from $2\frac{1}{2}d.$ per $\frac{1}{2}$ oz. to $2d.$, and also the Canadian proposal to reduce her outgoing rate from 5 cents. per $\frac{1}{2}$ oz. to 3 cents. per oz., for the following reasons:—

1. The present rate is not an unreasonably high one, having in view the large cost to the Colonies involved in the maintenance of the present means of Postal communication with the various portions of the Empire.
2. Because of the anomaly which would be created by carrying letters 14,000 miles for the same rate as now charged for delivery within the limits of the Town where posted.

Regarding the proposal of Canada to reduce her outgoing postage, this Conference is strongly of opinion that no reduction should take place which would be a departure from the present uniform rate, for the following reason, *inter alia*, at present a charge of $2d.$ per half-ounce is made in Australia for the carriage of letters to however small a distance, while the Canadian proposal would involve the carrying of letters over the same routes at a greatly reduced cost. This would, in the opinion of the Conference, lead to confusion and dissatisfaction.

TELEGRAPHIC—ALTERATION IN RATES.

9. That this Conference recommends to the Governments of Australasia that no alteration in International Telegraphic Rates be made without the Colony proposing to make such alterations advising the other Colonies, and endeavouring to arrange for uniformity of action.

10. That this Conference regrets that, owing to the financial loss involved, the question of a general reduction in the prices of Intercolonial Telegrams must stand over for the present, and make no suggestion on the question of the limitation of addresses; but it is suggested that the Governments of New South Wales and Queensland arrange between themselves as to rates and limitations of words in addresses.

The following proposal by the Representative of Queensland, which was not agreed to, was ordered to be recorded:—"That any re-arrangement of charges should be on the basis of either charging for every word, whether in addresses or text, such being the International principle, or, of allowing the address and signature to the number of twelve words to be sent free."

SHARE-DEALING BY OPERATORS.

11. That, in the opinion of this Conference, telegraphic employees should be absolutely prevented from speculating in shares.

12. That, in the absence of any satisfactory proposal from the Eastern Extension Telegraph Company, and of any proposal at all, except on the basis of an alternative cable *viâ* Africa, this Conference is unable to make any fresh arrangement with that Company.

13. That this Conference re-affirms the opinion that in the interests of Australasia the Pacific Cable project should be consummated as speedily as practicable, and that the Governments of the various Australasian Colonies be requested to represent to the Imperial and Dominion Governments the foregoing opinion, together with the proposal of the Premiers as agreed to at their recent Conference held in Melbourne, viz. :— That if Great Britain and Canada would each contribute one-third of the cost, the Colonies would be prepared to contribute the remaining one-third.

14. That the question in reference to the Overland Telegraph Lines between South Australia and Queensland be referred to the Governments of those Colonies.

15. That this Conference has heard with satisfaction from the representative of South Australia of the intention of the Government to take immediate steps for the improvement of the Overland Telegraph Line, and urges him to impress upon his Government to lose no time in effecting the improvements suggested, and hopes the Western Australian Government will take similar steps with regard to their overland line.

GENERAL.

The Reports of the Heads of Departments on subjects of detail connected with Postal and Telegraphic matters were received and adopted.

Other matters were considered and withdrawn, for which see Minutes of Proceedings.

Appended to this Report will be found :—

1. Minutes of Proceedings.
2. Amendments of Postal Union Convention, and detailed Regulations, Washington Congress, 1897.
3. Papers laid before the Conference.
4. Report of Heads of Departments.
5. Report of the Debates.

POSTAL AND TELEGRAPH CONFERENCE,
HOBART, 1898.

MINUTES OF THE PROCEEDINGS.

LEGISLATIVE COUNCIL CHAMBER, HOBART.

MONDAY, 28TH MARCH, 1898.

The Conference met at 11 A.M., when the under-mentioned gentlemen, representing the Colonies herein named, were present:—

- New South Wales* : The Hon. JOSEPH COOK, M.P., Postmaster-General.
S. H. LAMBTON, Esq., Deputy Postmaster-General.
P. B. WALKER, Esq., M. Inst. C.E., M.I.E.E., Chief Electrician and
Engineer-in-Chief Telegraph Department.
- Victoria* : The Hon. JOHN GAVAN DUFFY, M.L.A., Postmaster-General.
F. L. OUTTRIM, Esq., Deputy Postmaster-General, Secretary to
Postal Department, and Superintendent of Telegraphs.
- South Australia* : Sir CHARLES TODD, K.C.M.G., Postmaster-General.
- Queensland* : The Hon. J. R. DICKSON, C.M.G., M.L.A., Home Secretary and
Postmaster-General.
JOHN M'DONNELL, Esq., Under Secretary to the Post and Telegraph
Department and Superintendent of Electric Telegraphs.
JOHN HESKETH, Esq., Electrical Engineer.
- Tasmania* : The Hon. Sir PHILIP FYSH, M.H.A., Treasurer and Postmaster-
General.
H. V. BAYLY, Esq., Secretary to the Post Office.

ELECTION OF PRESIDENT.

The Honorable JOSEPH COOK moved, and the Honorable J. R. DICKSON seconded,—
“That the Honorable Sir Philip Fysh, K.C.M.G., be appointed President of the
Conference.”

Sir Philip Fysh acknowledged the honor, and took the Chair.

SECRETARY.

The Honorable JOHN GAVAN DUFFY moved, and the Honorable JOSEPH COOK
seconded,—

“That Mr. THOMAS COOK JUST be appointed Secretary to the Conference.”

Carried.

ADMISSION OF THE PRESS.

The Hon. JOHN GAVAN DUFFY moved, and the Hon. JOSEPH COOK seconded,—

“That the representatives of the Press be admitted to the deliberations of the Conference,
but not when in Committee.”

Carried.

COMMISSIONS.

The Hon. JNO. GAVAN DUFFY, the Hon. JOSEPH COOK, and the Hon. J. R. DICKSON
presented their Commissions as Representatives of Victoria, New South Wales, and Queensland
to the Conference.

REPRESENTATION OF SOUTH AUSTRALIA.

The Hon. JOHN GAVAN DUFFY reported that the Ministerial Representative of South
Australia, the Hon. J. G. Jenkins, had intimated to him that he would arrive in Hobart on
Wednesday evening next.

PAPERS.

The following Papers were tabled :—

The Hon. JOSEPH COOK : Report on Palmrya and Fanning Islands, as to their suitability and capabilities as submarine cable stations, by Capt. A. M. Field, R.N., H.M.S. *Penguin*, 1897.

Sir CHARLES TODD : Table showing contribution of the several Colonies to guarantees and subsidies, not including the duplicate cable subsidy ; also Return of International Telegraphic Traffic, 1889 to 1897.

The Hon. JOSEPH COOK : Statistical Return of Telegraphs, New South Wales, for 1897.

PRINTING COMMITTEE.

Hon. JNO. GAVAN DUFFY moved,—

“That the Hon. the President and the Hon. Joseph Cook be appointed a Printing Committee.

Hon. J. R. DICKSON seconded.

Carried.

TIME OF MEETING.

Hon. J. R. DICKSON moved,—

“That this Conference meet for the despatch of business daily (Sundays excepted) from 10:30 A.M. to 1 P.M., and from 2 to 5 P.M.

Hon. JNO. GAVAN DUFFY seconded.

Carried.

WESTERN AUSTRALIA AND NEW ZEALAND.

The Hon. JNO. GAVAN DUFFY expressed regret that the Colonies of Western Australia and New Zealand were not represented at the Conference by special Delegates, but trusted that the interests of Western Australia would be delegated to the South Australian Representatives. The Right Hon. MR. SEDDON, the Premier of New Zealand, had sent him a telegram expressing sympathy with the objects of the Conference, and requesting to be kept informed by telegram as to the proceedings.

The PRESIDENT instructed the Secretary to comply with the request.

ORDER OF BUSINESS.

The following Paper was tabled and read by the Secretary :—

MEMORANDUM of Subjects proposed to be discussed.

Postal.

1. Proposed reduction from 2½d. to 2d. per ½oz. of postage on letters passing in both directions between the United Kingdom and other parts of the British Empire. (N.S.W. 1), (Vic. 2), (Q. 4).
2. Proposal of Canada to reduce Postage on Letters to all parts of the British Empire from 5 cents to 3 cents. (Vic. 3), (Q. 5).
3. Adoption of Uniform Letter Bills and furnishing Statistics of Intercolonial Correspondence. (Q. 7.)
4. Adoption of Uniform Letter Bills for mails exchanged between (a) the principal Offices of the Australasian Colonies, and (b) Border Post Offices. (N.S.W. 6.)

(a.) Merridew's Scheme.
(b.) Maury's Scheme.
7. The use of the “Paid-at” stamp on correspondence on which postage has been paid in cash. (Vic. 9.)
8. Inland Postage Rates Local Delivery. (S.A. 8.)
9. Rates of Postage levied by Fiji on Patterns and Samples, and on Newspapers. (Vic. 23.)
10. *Re* Berne Bureau questioning the rates charged by the Australasian Colonies on International (a) Patterns and Samples, and (b) Newspapers. (N.S.W. 7), (Q. 12).
11. Samples of Glass, &c. *Vide* London letter. (S.A. 13), (N.S.W. 36).
12. The Postage to be charged on obliterated stamps and spent letters. (Vic. 10.)
13. Bankers' parcels : need for strictly enforcing Regulations relating thereto. (N.S.W. 10.)
14. The Intercolonial Packet Post to be limited to articles of no commercial or saleable value. (Q. 9.)
15. Practice of taxing “Officially” or “Compulsorily” registered International correspondence supposed to contain money or other valuable enclosure. (N.S.W. 11.)
16. Proposed amendment of Article 12 of the Australasian Postal Convention so far as it relates to “Travellers'” Cards or Circulars. (N.S.W. 15.)

17. Permission to Commercial Travellers to post letters on trains without affixing late fee. (Vic. 11.)
18. Grocers' Price Lists, postage on. (S.A. 3.)
19. Proxy Forms or Notices, postage on. (S.A. 5.)
20. Circulars' postage. (S.A. 9.)
21. *Re* Queensland surcharging New Zealand postal matter prepaid at the $\frac{1}{2}d.$ per 2 oz. rate. (N.S.W. 16.)
22. Proposal to prohibit the enclosure of articles of a monetary denomination in parcels and packets. (N.S.W. 17.)
23. Rates levied by the respective Australasian Colonies on "Loose Ship Letters."
24. Transmission through the post of such publications as the "Wife's Guide and Friend." (Vic. 16.)
25. Transmission of Promissory Notes, Circulars, and other printed matter with Accounts. (Vic. 17.)
26. Printed communications as footnotes on Invoices, Accounts, &c. (Vic. 18.)
27. Redirection charges. (S.A. 1.)
28. The obliteration of stamps issued to Collectors. (Vic. 19.)
29. Question as to how Specimen Postage Stamps supplied to the public and the Berne Postal Bureau should be marked—whether "Specimen" or an obliteration of the date-stamp. (N.S.W. 19.)
30. Application of Union Patent Stationery Company *re* embossing combined sheet of note paper and envelope. (Vic. 20.)
31. Counterfeit postage stamps: compliance with Article No. 18 Vienna Convention. (S.A. 6.)
32. Newspaper Supplements, Advertisement Sheets Bills, with name, date, and publisher's name thereon. (Vic. 22.)
33. "Dempsters," postage on. (S.A. 4.)
34. Operation of "Suppression of Gambling and Indecent Advertisements Act" of Queensland, in connection with newspapers published outside Queensland and forwarded by post to that Colony. (Vic. 4.)
35. Postal Guides, uniformity. (S.A. 2.)
36. Territorial transit rates charged by one Australian Colony to another such Colony, proposed reduction. (N.S.W. 5.)
37. Accelerating of train service with English Mails from Brisbane. (Q. 12A), (N.S.W. 37).
38. Australasian Postal Convention. (Q. 3), (S.A. 11).
39. Ratification of Washington Congress, and consideration of the various Conventions entered into at Washington but not signed by the Australasian Delegate. (Vic. 1.)

Parcels Post.

40. Proposed arrangement for enabling senders of parcels for despatch per parcels post to places abroad to defray all Customs and other charges arising upon such parcels. (N.S.W. 2), (Vic. 12), (Q. 1).
41. Customs Declarations on Parcel Post packages. (Tas. 3.)
42. Proposed "Express Delivery" of parcels and postal packets exchanged between the United Kingdom and the Australasian Colonies. (N.S.W. 3), (Vic. 5).
43. France—Parcel Post Convention. (S.A. 12.)
44. Establishment of direct exchange of parcels between the Australasian Colonies and Cape Colony and other such South African States and Colonies. (N.S.W. 4), (Q. 11).
45. Revision of Parcel Post Rates to India and the East. Ceylon to act as intermediary. (Vic. 14.)
46. Proposed introduction of system of Insurance on Postal Parcels. (N.S.W. 8.)
47. Articles having a saleable value received by Packet Post to be transferred to Inland Parcel Post. (Q. 10.)
48. Adjustment of Postage on Intercolonial Parcels posted out of course and received in the Colony of destination by other than Parcel Post. (N.S.W. 9.)
49. Mode of charging and accounting for irregularly posted parcels. (Vic. 13.)
50. Discontinuance of registration of parcels in New South Wales. (N.S.W. 12.)
51. Intercolonial charges for certificates of posting of parcels. (N.S.W. 13.)
52. Apportionment of Intercolonial Parcel Postage equally between the Colony of origin and Colony of delivery. (Q. 8.)
53. Claim of London Office to be credited with 1*d.* per lb. for sea transit from Australia to England on parcels sent to Foreign Countries *via* the United Kingdom. (N.S.W. 14.)
54. Apportionment of postage on parcels exchanged with Foreign Countries through the intermediary of the United Kingdom. (Vic. 15), (Q. 2).
55. The practicability or otherwise of introducing the "Value Payable" or "Cash" on delivery of Parcels System into the Australasian Colonies. (N.S.W. 18.)

Money Orders and Postal Notes.

56. Rates of Commission on Money Orders from the Australasian Colonies to the United Kingdom, Cape Colony, &c. (N.S.W. 21.)

57. Reduction in rate of Commission to paying country on Money Orders exchanged between Australasian Colonies and Singapore. (Vic. 8.)
58. Treatment of Money Order Advices missent to other Colonies. (N.S.W. 22.)
59. Practice of forwarding Money Order Advices with and without lists between Colonies. (Tas. 1.)
60. Telegraph Money Order System between Colonies. (Tas. 2), (N.S.W. 38.)
61. Exchange of Money Orders with Japan. (Vic. 21), (S.A. 15.)
62. Suggested discontinuance of the issue of duplicate Postal Notes, and the payment of the face value of Postage Stamps affixed to Postal Notes. (Vic. 6.)
63. Duplicate Postal Notes. (S.A. 14.)
64. Exchange of Postal Notes between Australasia and the United Kingdom. (Vic. 7.)

Telegraphic.

65. Alternative Cable Route. (N.S.W. 23.)
66. Pacific Cable. (Q. 21.)
67. Overland Telegraph Line, South Australia. (Q. 13.)
68. Cable Subsidies and Guarantees: time of year closing. (Tas. 5.)
69. Berne's Circular *re* tabulated Telegraph Routes, and method of indicating such Routes. (Vic. 26.)
70. Fire Alarms. (S.A. 1.)
71. Sunday Telegraph Rates to Tasmania. (S.A. 5.)
72. Intercolonial Telegraph. (S.A. 9.)
73. Resolution of Conference Chambers of Commerce *re* Intercolonial Telegraph charges. (Vic. 27.)
74. Mode of counting and charging telegrams. Disputes with the public as to what are cipher words. (N.S.W. 24). (Orders for parts of Machinery). (Vic. 24.)
75. System of counting words in Inland and Intercolonial Ordinary Telegrams. (N.S.W. 25), (Vic. 28.)
76. Share-dealing. (S.A. 3.)
77. Share Telegrams between Stock Exchange. (S.A. 4.)
78. Counting double names in Telegrams. (Q. 16.)
79. *Re* word "care" being inserted in address of Message. (Tas. 4.)
80. Suggested abolition of additional charge on Cipher words contained in Inland and Intercolonial Telegrams. (N.S.W. 28), (Q. 18.)
81. Reduction of the New South Wales-Queensland Telegraph Rates; and alteration in mode of charging on Inland and Intercolonial Telegrams. (N.S.W. 34), (Q. 17.)
82. Intercolonial Telegraph repeats. (S.A. 2.)
83. Proposed omission of the word "to" from before addresses on Telegrams. (N.S.W. 35), (Vic. 25), (Q. 20.)
84. Charges for certified copies of Telegrams and Search Fees. (N.S.W. 26.)
85. *Re* numbers as well as words appearing in Telegrams. (Q. 15), (N.S.W. 27), (Vic. 30.)
86. Consideration of Berne's Circular Letter, August 3rd, 1897. (S.A. 10.)
87. The question of abolishing the system of "Urgent" Intercolonial Telegrams, or of overcoming the delays to which ordinary Telegrams are subjected in Colonies in which such system is in operation. (N.S.W. 29.)
88. Urgent Telegrams with West Australia. (Vic. 33.)
89. Urgent Telegrams, distinctive coloured forms. (S.A. 7.)
90. Question of issuing Vouchers with "Reply paid" Telegrams in terms of paragraph 1 Clause 51 of Buda-Pesth Telegraph Service Regulations. (N.S.W. 30), (Vic. 29.)
91. Typewriters for Telegrams. (S.A. 8.)
92. Code Vocabulary. Points submitted by Berne Telegraph Bureau for consideration. (N.S.W. 31), (Vic. 32), (Q. 19.)
93. Proposal that Australasian Telegraph Administrations undertake for a fee the "coding" of International Messages as is now done by Reuter's Agency. (N.S.W. 32.)
94. Adoption of uniform Charges and Regulations with respect to International Code Addresses. (N.S.W. 33.)
95. Surnames as Code Addresses. (S.A. 6.)
96. Code Addresses. (Vic. 31.)
97. Code Addresses, Registration of. (Q. 14.)
98. Telegraph Regulations. (S.A. 11.)
99. Telephone Regulations. (S.A. 12.)
100. Private Telephone Line. (S.A. 13.)
101. Free transmission of Telegrams on Postal Service over New Zealand and Bass Straits Cables. (S.A. 14.)
102. Establishment of Telephonic communication between the Capital cities of the Australian Continent. (N.S.W. 38.)

Miscellaneous.

103. Regulations regarding Uniform Letter Carriers and Messengers. (S.A. 1.)
104. Holidays, Christmas and Good Friday. (S.A. 2.)

13

It was resolved that the following subjects be considered by Ministers in Conference. Nos. 1, 2, 21, 24, 28, 29, 32, 34, 39, 65 to 68, 87 to 88, and 102.

DEPARTMENTAL COMMITTEE.

The Hon. JNO. GAVAN DUFFY moved, that the remaining subjects included in the business Paper be referred to a Sub-Committee of the Heads of Departments, with instructions to report to the Conference.

Hon. JOSEPH COOK seconded.

Carried.

THE WASHINGTON CONVENTION.

Hon. JOHN GAVAN DUFFY gave notice to move to-morrow :—

“That this Conference recommend to the Governments of Australasia the ratification of the recommendations entered into at Washington, at the last Universal Postal Convention.

That the Sub-Committee of Permanent Heads be requested to report to the Conference :—
1st. On the several matters left optional by the principal Treaty. 2nd. On the various subsidiary Treaties entered into by some Administrations at Washington, but not signed by the Australian Delegate.”

HON. JOHN GAVAN DUFFY stated that to enable the Conference to discuss this Motion he would now table a translation of the Amendments of the Postal Union Convention and detailed Regulations.

ADJOURNMENT.

The Conference adjourned at noon until 10:30 next day.

P. O. FYSH, President.

THOS. C. JUST, Secretary.

LEGISLATIVE COUNCIL CHAMBER, HOBART.

TUESDAY, 29TH MARCH, 1898.

The Conference met at 10:30 A.M., when the under-mentioned gentlemen, representing the Colonies herein named, were present :—

- New South Wales* : The Hon. JOSEPH COOK, M.P., Postmaster-General.
S. H. LAMBTON, Esq., Deputy Postmaster-General.
P. B. WALKER, Esq., M. Inst. C.E., M.I.E.E., Chief Electrician and
Engineer-in-Chief Telegraph Department.
- Victoria* : The Hon. JOHN GAVAN DUFFY, M.L.A., Postmaster-General.
F. L. OUTTRIM, Esq., Deputy Postmaster-General, Secretary to Postal
Department, and Superintendent of Telegraphs.
- South Australia* : Sir CHARLES TODD, K.C.M.G., Postmaster-General.
- Queensland* : The Hon. J. R. DICKSON, C.M.G., M.L.A., Home Secretary and
Postmaster-General.
JOHN M'DONNELL, Esq., Under Secretary to the Post and Telegraph
Department and Superintendent of Electric Telegraphs.
JOHN HESKETH, Esq., Electrical Engineer.
- Tasmania* : H. V. BAYLY, Esq., Secretary to the Post Office.

CHAIRMAN.

Hon. JNO. GAVAN DUFFY moved, and the Hon. J. R. DICKSON seconded—

“That, in the absence of the Hon. the President, the Hon. Joseph Cook do take the Chair.”

Carried.

ADJOURNMENT.

Hon. J. R. DICKSON moved, and the Hon. JNO. GAVAN DUFFY seconded—

“That, to enable the Departmental Heads to proceed with work in Committee, the Conference adjourn until 10:30 A.M. to-morrow.”

Carried.

The Conference adjourned accordingly.

THOS. C. JUST, Secretary.

LEGISLATIVE COUNCIL CHAMBER, HOBART.

WEDNESDAY, 30TH MARCH, 1898.

The Conference met at 10·30 A.M., when the under-mentioned gentlemen, representing the Colonies herein named, were present :—

- New South Wales* : The Hon. JOSEPH COOK, M.P., Postmaster-General.
S. H. LAMBTON, Esq., Deputy Postmaster-General.
P. B. WALKER, Esq., M. Inst. C.E., M.I.E.E., Chief Electrician and
Engineer-in-Chief Telegraph Department.
- Victoria* : The Hon. JOHN GAVAN DUFFY, M.L.A., Postmaster-General.
F. L. OUTTRIM, Esq., Deputy Postmaster-General, Secretary to Postal
Department, and Superintendent of Telegraphs.
- South Australia* : Sir CHARLES TODD, K.C.M.G., Postmaster-General.
- Queensland* : The Hon. J. R. DICKSON, C.M.G., M.L.A., Home Secretary and
Postmaster-General.
JOHN M'DONNELL, Esq., Under Secretary to the Post and Telegraph
Department and Superintendent of Electric Telegraphs.
JOHN HESKETH, Esq., Electrical Engineer.
- Tasmania* : H. V. BAYLY, Esq., Secretary to the Post Office.

CHAIRMAN.

Hon. JNO. GAVAN DUFFY moved, and the Hon. J. R. DICKSON seconded—

“That, in the absence of the Hon. the President, the Hon. Joseph Cook do take the Chair.”

Carried.

ADJOURNMENT.

Hon. J. R. DICKSON moved, and the Hon. JNO. GAVAN DUFFY seconded—

“That, to enable the Departmental Heads to proceed with work in Committee, the Conference adjourn until 10·30 A.M. to-morrow.”

Carried.

The Conference adjourned accordingly.

THOS. C. JUST, *Secretary*.

LEGISLATIVE COUNCIL CHAMBER, HOBART.

THURSDAY, 31ST MARCH, 1898.

The President, Hon. Sir Philip Fysh, K.C.M.G., took the Chair at 10·30 A.M., when the under-mentioned gentlemen, representing the Colonies herein named, were present :—

- New South Wales* : The Hon. JOSEPH COOK, M.P., Postmaster-General.
S. H. LAMBTON, Esq., Deputy Postmaster-General.
P. B. WALKER, Esq., M. Inst. C.E., M.I.E.E., Chief Electrician and
Engineer-in-Chief Telegraph Department.
- Victoria* : The Hon. JOHN GAVAN DUFFY, M.L.A., Postmaster-General.
F. L. OUTTRIM, Esq., Deputy Postmaster-General, Secretary to Postal
Department, and Superintendent of Telegraphs.
- South Australia* : Hon. J. G. JENKINS, M.P., Commissioner of Public Works.
Sir CHARLES TODD, K.C.M.G., Postmaster-General.
- Queensland* : The Hon. J. R. DICKSON, C.M.G., M.L.A., Home Secretary and
Postmaster-General.
JOHN M'DONNELL, Esq., Under Secretary to the Post and Telegraph
Department and Superintendent of Telegraphs.
JOHN HESKETH, Esq., Electrical Engineer.
- Tasmania* : The Hon. Sir PHILIP FYSH, K.C.M.G., M.H.A., Treasurer and
Postmaster-General.
H. V. BAYLY, Esq., Secretary to the Post Office.

REDUCTION OF POSTAGE.

On the proposed reduction from 2½*d.* to 2*d.* per ½*oz.* of postage on letters passing in both directions between the United Kingdom and other parts of the British Empire :

15

Hon. JOSEPH COOK moved,—

“That in the opinion of this Conference it would be inadvisable to make any further reduction of the over-sea postage rate until the way is clear for a reduction in the present large subsidies paid for the carriage of such mails, and the present inland and intercolonial rates.”

Hon. J. GAVAN DUFFY seconded.

After discussion the Motion was agreed to.

CANADIAN POSTAGE RATES.

Honorable J. GAVAN DUFFY moved,—

“That the Conference resolve into Committee of the Whole to consider the proposal of Canada to reduce Postage on Letters to all parts of the British Empire from 5 cents to 3 cents.”

The PRESIDENT left the Chair, and the Conference went into Committee accordingly.

After some time spent therein,

Honorable J. GAVAN DUFFY moved,—

“That this Conference communicate by cable with the Canadian Post Office to the effect that the various Colonies cannot agree to receive Canadian Letters with only 3 cents postage thereon, and ask that the proposal be not proceeded with.”

Honorable J. R. DICKSON seconded.

After discussion the Motion was agreed to.

The Conference resumed, and the PRESIDENT reported the Motion.

POSTAL SURCHARGES.

On the subject *re* Queensland surcharging New Zealand postal matter prepaid at the $\frac{1}{2}d.$ per 2 oz. rate :

Honorable JOSEPH COOK moved,—

“That the subject be referred to the Sub-committee of the Heads of Departments for a Report.”

Honorable J. R. DICKSON seconded.

After discussion, Honorable JOSEPH COOK withdrew his Motion, and the subject lapsed.

OBLITERATION OF STAMPS.

On the obliteration of stamps issued to Collectors :

Hon. J. GAVAN DUFFY moved,—

“That this Conference is of opinion that all stamps issued to collectors should be post-marked, so as to prevent their being used for postal purposes.”

Hon. J. R. DICKSON seconded.

Hon. J. G. JENKINS moved as an Amendment,—

“That the word ‘specimen’ be placed across all stamps issued to collectors.”

Hon. JOSEPH COOK seconded.

After discussion, the Hon. Mr. DUFFY withdrew his Motion, and, on the Amendment being put, the voting was equal.

The PRESIDENT gave his casting vote in favour of the Amendment, which was carried.

On Question as to how Specimen Postage Stamps supplied to the public and the Berne Postal Bureau should be marked—whether “Specimen” or an obliteration of the date-stamp.

Hon. JOSEPH COOK moved,—

“That all Postage Stamps issued to the Berne Postal Bureau or between Post Offices shall bear an obliteration with the date-stamp.”

Hon. J. GAVAN DUFFY seconded the Motion, which was carried.

NEWSPAPER SUPPLEMENTS, &c.

Question as to circulation of Newspaper Supplements, Advertisement Sheets Bills, with name, date, and publisher's name thereon.

Hon. JOHN GAVAN DUFFY moved,—

“That an inset or a hand-bill should not be regarded as coming within the definition of a Newspaper Supplement under the Post Office Acts.”

Hon. JOSEPH COOK seconded.

After discussion the Motion was carried.

GAMBLING AND INDECENT ADVERTISEMENTS.

On the operation of "Suppression of Gambling and Indecent Advertisements Act" of Queensland, in connection with newspapers published outside Queensland and forwarded by post to that Colony:

Hon. J. GAVAN DUFFY moved,—

"That representations be made from this Conference to the Post Office Authorities of Queensland, pointing out that the operation of the "Suppression of Gambling and Indecent Advertisements Act" and the "Post Office Act" in connection with Newspapers posted out of the Colony of Queensland, and forwarded by post to that Colony, is a restriction upon the Australian press."

Honorable JOSEPH COOK seconded, but suggested an alteration in the form of the Motion. After discussion,

Hon. J. GAVAN DUFFY asked leave to withdraw his Motion and to substitute another, viz.—

"That representations be made from this Conference to the Post Office authorities of Queensland, pointing out that the high rates charged on newspapers coming from other Colonies is an unjustifiable restriction on the Australian press."

Leave was given to withdraw the original Motion, and the substituted Motion was put to the Conference.

Hon. JOSEPH COOK seconded.

Discussion took place, in the course of which Hon. the PRESIDENT gave a brief description of the amended Gambling Act of Tasmania, stating that from experience gained as to its operation he could commend it to the attention of the Delegates from other Colonies.

The Motion was then put and carried.

The Conference adjourned until 2.30 P.M.

AFTERNOON SITTING.

The President took the Chair at 2.30 P.M.

RATIFICATION OF WASHINGTON TREATY.

The Question as to the Ratification of Washington Congress, and consideration of the various Conventions entered into at Washington but not signed by the Australasian Delegate, also Hon. Mr. DUFFY'S Notice of Motion on the same subject, were postponed until next day.

TELEGRAPHIC.

Orders of the Day 10, 11, and 12 were ordered to stand over until after No. 15.

CABLE SUBSIDIES AND GUARANTEES.

The subject as to the time of year for closing Cable Subsidies and Guarantees was called on. The Hon. the PRESIDENT suggested that this subject should be referred to the Permanent Heads of Departments to report.

Hon. J. GAVAN DUFFY moved,—

"That the subject be referred accordingly."

Hon. JOSEPH COOK seconded the Motion, which was carried.

URGENT TELEGRAMS.

On the question of abolishing the system of "Urgent" Intercolonial Telegrams, or of overcoming the delays to which ordinary Telegrams are subjected in Colonies in which such system is in operation:

Hon. JOSEPH COOK moved,—

"That the system of 'Urgent' Telegrams in operation in six Colonies of Australia be abolished."

Hon. J. GAVAN DUFFY seconded the Motion *pro forma*.

Hon. J. G. JENKINS moved as an amendment,—

"That the subject be referred to the Heads of Departments for report."

Hon. J. R. DICKSON seconded.

After discussion the Amendment was put and carried.

17

The question as to despatch of Urgent Telegrams with West Australia was also referred to the Heads of Departments for a Report.

BUSINESS POSTPONED.

The question as to alternative Cable Route, the Pacific Cable, and the Overland Telegraph Lines of South Australia, were postponed until next day.

TELEPHONIC COMMUNICATION BETWEEN COLONIES.

As to the question of the establishment of telephonic communication between the Capital cities of the Australian Continent :

Hon. JOSEPH COOK moved,—

“That the subject be referred to the Heads of Departments as to the question of cost.”

Hon. J. GAVAN DUFFY seconded.

After discussion the Motion was carried.

REPORT OF HEADS OF DEPARTMENTS.

Hon. JOSEPH COOK tabled an *Interim* Report from the Sub-Committee of Heads of Departments, and moved that it stand an Order of the Day for next day.

ADJOURNMENT.

Hon. J. GAVAN DUFFY moved,—

“That the Conference adjourn until 10.30 A.M. next day.”

Hon. JOSEPH COOK seconded the Motion, which was carried.

At 3.32 P.M. the Conference adjourned accordingly.

P. O. FYSH, *President*.

THOS. C. JUST, *Secretary*.

LEGISLATIVE COUNCIL CHAMBER, HOBART.

FRIDAY, 1ST APRIL, 1898.

The President, Hon. Sir Philip Fysh, K.C.M.G., took the Chair at 10.30 A.M., when the under-mentioned gentlemen, representing the Colonies herein named, were present :—

New South Wales : The Hon. JOSEPH COOK, M.P., Postmaster-General.
S. H. LAMBTON, Esq., Deputy Postmaster-General.
P. B. WALKER, Esq., M. Inst. C.E., M.I.E.E., Chief Electrician and
Engineer-in-Chief Telegraph Department.

Victoria : The Hon. JOHN GAVAN DUFFY, M.L.A., Postmaster-General.
F. L. OUTTRIM, Esq., Deputy Postmaster-General, Secretary to
Postal Department, and Superintendent of Telegraphs.

South Australia : Hon. J. G. JENKINS, M.P., Commissioner of Public Works.
Sir CHARLES TODD, K.C.M.G., Postmaster-General.

Queensland : The Hon. J. R. DICKSON, C.M.G., M.L.A., Home Secretary and
Postmaster-General.
JOHN M'DONNELL, Esq., Under Secretary to the Post and Telegraph
Department and Superintendent of Telegraphs.
JOHN HESKETH, Esq., Electrical Engineer.

Tasmania : The Hon. Sir PHILIP FYSH, K.C.M.G., M.H.A., Treasurer and
Postmaster-General.
H. V. BAYLY, Esq., Secretary to the Post Office.

CREDENTIALS.

The Hon. J. G. Jenkins (South Australia) and the Hon. Sir Philip Fysh (Tasmania) presented their credentials as Representatives to the Conference.

TELEGRAPHIC.

The Hon. the President tabled Telegraphic Statistics for Tasmania, 1897.

THE WASHINGTON CONGRESS.

As to the ratification of Washington Congress, and consideration of the various Conventions entered into at Washington but not signed by the Australasian Delegate :

Hon. JOHN GAVAN DUFFY moved,—

“That this Conference recommend to the Governments of Australasia the ratification of the Treaty entered into at Washington, at the last Universal Postal Congress.

“That the Sub-Committee of Permanent Heads be requested to report to the Conference :—
1st. On the several matters left optional by the principal Treaty. 2nd. On the various subsidiary Treaties entered into by some Administrations at Washington, but not signed by the Australasian Delegate.”

It was resolved that the second part of the Motion should be first considered, and the question was put from the Chair,—

“That the Sub-Committee of Permanent Heads be requested to report to the Conference :—
1st. On the several matters left optional by the principal Treaty. 2nd. On the various subsidiary Treaties entered into by some Administrations at Washington, but not signed by the Australasian Delegate.”

Hon. J. R. DICKSON seconded.

After discussion ;

Hon. J. GAVAN DUFFY asked leave to amend his Motion, by adding after the word “Conference,” in the first line, “1st. On the effect of the Australasian Colonies of the proposed reductions, (a) Territorial ; (b) Maritime.”

Leave having been given, the Amendment was agreed to, and the words inserted.

The Motion, as amended, was then put as follows :—

“That the Sub-Committee of Permanent Heads be requested to report to the Conference :—
1st. On the effect to the Australasian Colonies of the proposed reductions, (a) Territorial ; (b) Maritime. 2nd. On the several matters left optional by the principal Treaty. 3rd. On the various subsidiary Treaties entered into by some Administrations at Washington, but not signed by the Australasian Delegate.”

The Motion was agreed to.

Hon. J. GAVAN DUFFY moved,—

“That the first part of the original Motion, That this Conference recommend to the Governments of Australasia the ratification of the Treaty entered into at Washington, at the last Universal Postal Congress, stand an Order of the Day for next day.”

Hon. J. G. JENKINS seconded.

Carried.

REPRESENTATION AT WASHINGTON.

Hon. JOSEPH COOK asked leave to move a Resolution without Notice.

Leave having been given ;

Hon. JOSEPH COOK moved,—

“That this Conference hereby records its appreciation of the zealous and able manner in which the Hon. J. Gavan Duffy, Postmaster-General of Victoria, discharged the duty of representing Australasia at the Washington Postal Convention.”

Hon. J. R. DICKSON seconded.

The Motion was put and carried.

Hon. J. GAVAN DUFFY thanked the Conference for the Motion.

TELEGRAPHIC.

The following Orders were called on and discharged, being made Orders of the Day for next day :—

Subjects referred to Ministers :—

(b) (65.) Alternative Cable Route. (N.S.W. 23.)

(c) (66.) Pacific Cable. (Q. 21.)

(d) (67.) Overland Telegraph Line, South Australia. (Q. 13.)

REPORT OF SUB-COMMITTEE.

The Conference proceeded to consider the Report of the Sub-Committee of Permanent Heads of Departments on questions of detail submitted to them.

The Secretary read the following paragraphs, which were agreed to with slight Amendments. The numbers are those used in the original Memorandum of Subjects to be discussed :—

19

Nos. 3 and 4.—“Adoption of uniform Letter Bills, and furnishing Statistics of Inter-colonial Correspondence.”—“Adoption of uniform Letter Bills for Mails exchanged between (a) the Principal Offices of the Australasian Colonies, and (b) Border Post Offices.”

Recommended, That the Letter Bills as prepared by New South Wales, at the request of previous Conferences, be adopted, and that, during the months of May and November in each year, the number of letters, packets, and newspapers contained in mails be stated on Letter Bills for statistical purposes.

No. 5.—“Australian Mails Way-Bill.”

No report. Can be dealt with departmentally.

No. 6.—“Reply Postage Stamp—(a) Merridew’s Scheme ; (b) Maury’s Scheme.”

It would be impossible to introduce the universal use of the Reply Postage Stamp without interfering more or less with the postal revenue of the countries concerned, and we therefore cannot advise adoption of either scheme.

No. 7.—“The use of the ‘Paid-at’ Stamp on Correspondence on which postage has been paid in cash.”

Recommended, That cash payment be accepted for *all* classes of mail matter over the value of £1, posted at one and the same time, but that the “Paid Stamp” shall indicate the postage paid for each article. The Offices authorised to accept cash payment to be determined by each respective Administration.

No. 8.—“Inland Postage Rates, Local Delivery.”

No report. The Postmaster-General, South Australia, suggests that where 1*d.* postage is introduced it should be restricted to letters posted in a town for delivery in the same town. This system already obtains in Queensland and Tasmania.

Nos. 9 and 10.—“Rates of Postage levied by Fiji on Patterns and Samples and on Newspapers” —“*Re* Berne Bureau questioning the rates charged by the Australasian Colonies on International (a) Patterns, and Samples, and (b) Newspapers.”

As our rates of postage on patterns and samples and newspapers are in strict conformity with Article 5 of the Vienna Convention, and Fiji is charging similar rates, the objections raised by Berne to the rates of Fiji are not supported by the Convention. Should the Berne contention be upheld it would involve the rates in all the Colonies being raised, in the case of packets, from 1*d.* to 1½*d.* for two ounces.

No. 11.—“Samples of Glass, &c.—*vide* London Letter, dated 21st January, 1898.”

Hitherto it has been the practice of the Australasian Colonies to permit “Queen bees, and live but harmless entomological specimens,” as well as glassware—provided such articles be properly and securely packed—to be transmitted by sample post within the Colonies and to any other country or colony where allowed by the local regulations ; but the Colonies have refused to transmit by sample post packets of liquids, oils, fatty substances, dry powders (whether dyes or not). However, from the 1st January, 1899, the transmission of the whole of the above-mentioned articles by sample post will be obligatory between union countries under the Washington Congress.

The London Office has now written to say that the Postmaster-General is willing to allow samples of glass, liquids, greases, and colouring powders (but apparently not live bees) to pass in the mails exchanged between the Australian Colonies and the United Kingdom after the 1st March, 1898, the date from which they will be allowed to pass in the inland postal service of the United Kingdom, and that Office desires to be informed whether the Colonies will agree to such exchange.

The transmission of the articles mentioned will be governed by the provisions of the Postal Union Regulations, and the limits of size and weight will be those already applicable to samples exchanged between the Australian Colonies and the United Kingdom—*viz.*, 2 feet in length by 1 foot in width and depth, and 1 lb. in weight.

As the transmission of the articles referred to by sample post will be compulsory from the 1st January, 1899, there would not seem to be any objection to the exchange with the United Kingdom taking place from the 1st July next.

No. 12.—“The Postage to be charged on obliterated stamps and spent letters.”

Recommended, That obliterated stamps and spent letters be sent at Commercial Paper Rates within the Colonies, subject to usual packet Regulations, but this cannot be done internationally, as the Rules of the Universal Postal Union Convention require letter rate to be paid.

No. 13.—“Bankers' Parcels : need for strictly enforcing Regulations relating thereto.”

We advise that intercolonially the following existing Regulation be in future strictly adhered to :—

Bankers' packets (*i.e.*, packets sent from one bank to another), containing bank-notes, cheques, cheque-books, drafts or orders, provided they are enclosed in covers with the ends sufficiently open to admit of postal officials seeing that they contain nothing in the nature of a letter. Though not compulsory, it is strongly recommended that bank-notes should be registered. They must be registered if addressed to another Australian Colony, and cannot be forwarded at packet rates to the United Kingdom, West Australia, New Zealand, or any other country.

Bank passbooks may be sent from or to any bank at packet rates, provided they are enclosed in covers with the ends sufficiently open to admit of postal officials seeing that “passbooks” only are being transmitted. Every such packet must be endorsed “Passbook only.”

No. 14.—“The Intercolonial Packet Post to be limited to articles of no commercial or saleable value.”

We consider that the present Regulations which admit of small packets of merchandise not exceeding 1 pound in weight being exchanged with all Colonies except Queensland, at packet rate of 1*d.* per 2 ounces should be adhered to, and, if possible, be extended to Queensland ; that Colony however objects to merchandise being sent by packet post.

A discussion took place on this subject ; the Representatives of New South Wales, Victoria, and South Australia urging the Representative of Queensland to reduce the charges and fall into line with the other Colonies.

Hon. J. R. DICKSON promised to bring the subject under the notice of the Queensland Government.

No. 15.—“Practice of taxing ‘officially’ or ‘compulsorily’ registered International correspondence supposed to contain money or other valuable enclosure.”

The Postal Laws of the Colonies provide for compulsory registration of letters containing valuable enclosures. Under the Universal Postal Union, however, it is not permissible to send coin, bullion, &c., and the principle of compulsory or official registration is not recognised under the Convention. The practice of compulsorily registering letters to Great Britain containing coin or bank notes has, however, been in operation for some time past in most of the Colonies, and, until recently, accepted by the London Post Office. We consider that, in the case of letters containing valuable enclosures posted in the ordinary way, it is more desirable in every respect to send them on charged with registration fee than to send them forward unregistered. We advise that the London Office be communicated with, and invited to accept such correspondence in future as they have done in the past, and collect the registration fee on delivery.

No. 16.—“Proposed Amendment of Article 12 of the Australasian Postal Convention so far as it relates to Travellers' Cards or Circulars.”

Under Article 12 of the Australasian Postal Convention appears the following paragraph :—

“Cards, Travellers' Cards, or Circulars may be sent at Packet rates, and, if necessary, may include a catalogue or list of prices. They may also bear the date and name of the traveller.”

We recommend that the following words be added—“the date of sending and the date of intended visit of the traveller, also the time of departure of train or steamer, and name of letter by which the goods are forwarded.”

No. 17.—“Permission to Commercial Travellers to post letters on trains without affixing Late fee.”

We consider this matter should be left to each Administration to act for itself. It is in operation in Victoria and New South Wales, whilst in Tasmania no Late fees are charged.

No. 18.—“Grocers' Price Lists, Postage on.”

Two newspapers submitted by South Australia, apparently intended as “Grocers' Price Lists,” but some other matter being included in order to induce the Department to pass them as newspapers, it is recommended that one of the publications submitted, namely, “Monthly News,” is within the definition of a newspaper, and can pass through the post as such. The second, “The Household,” does not comply with the Regulations, inasmuch as the full date of publication is not given.

Referred back to the Sub-Committee to be re-formulated.

21

No. 19.—“Proxy Forms or Notices: Postage on.”

We consider that these may pass at Packet rate of postage.

No. 20.—“Circulars' Postage.”

No report.

No. 22.—“Proposal to prohibit the enclosure of articles of a monetary denomination in parcels and packets.”

We think it most undesirable that Postal Notes, Money Orders, and Cheques should be transmitted through the post as packets, or enclosed in packets or parcels, but should be sent separately at the Letter rate of postage. (This of course does not apply to the special concessions in regard to Bankers' parcels.)

No. 23.—“Rates levied by the respective Australasian Colonies on ‘Loose Ship Letters.’”

Recommended, That in the case of loose letters received in one Colony from another by sea, a late fee of 2*d.* each be levied on delivery in addition to the ordinary postage paid upon them, and double the deficiency where the ordinary postage is insufficiently prepaid.

No. 25.—“Transmission of Promissory Notes, Circulars, and other printed matter with Accounts.”

We consider that Promissory Notes signed or unsigned, Circulars, and other printed matter are entitled to be enclosed with Accounts and Packet rates levied on the whole packet.

No. 26.—“Printed communications, as footnotes on Invoices, Accounts, &c.”

We recommend the adoption of the following amended Regulations dealing with Accounts and Invoices:—“Accounts and Invoices, receipted or unreceipted, the remark, “With thanks” will be allowed, but either printed or written communications in the nature of a letter or of the character of actual or personal correspondence, by code or otherwise, are chargeable as letters. Invoices may be receipted, and may advise when or how the goods are forwarded, but may contain no other written matter, nor anything in the nature of actual or personal correspondence by code or otherwise. They may, however, bear the following trade notices, whether printed or impressed with a rubber or other stamp:—“All empties returned must be advised;” “When remitting, please return the statement to be receipted;” “Terms, cash in advance;” “Terms, 2½ per cent. discount for cash;” “This settles your account up to date;” “Cheque will oblige.” Anything, however, of a general character printed in ordinary type may be enclosed with accounts, provided it is not of the nature of a personal correspondence.”

No. 27.—“Redirection Charges.”

We report that all the Colonies, with the exception of Queensland, make no charge for redirection fee. Queensland, under Section 15, Post Office Act, 1891, charges a redirection fee, but this fee is not collected by the other Colonies.

The Representatives of New South Wales, Victoria, and South Australia urged the Representative of Queensland to abandon the fee for re-direction in that Colony, and come into uniformity with other Colonies.

Hon. J. R. DICKSON pointed out that the charge was fixed by Act of Parliament in Queensland, and an amendment of the law would be necessary to effect the desired change. He would make it his duty to represent the matter to the Government of Queensland.

No. 30.—“Applications *re* embossing combined sheet of note-paper and envelope.”

In the opinion of this Committee there is no objection to applications being granted with regard to impressing stamps on the combined sheet of note-paper and envelope, on the following conditions:—

1. Not fewer than 500 envelopes of any one size to be received at any time.
2. Coloured envelopes not to be received for stamping.
3. Envelopes which are too thin to bear the impression of the die not to be received.
4. Envelopes provided by the Post Office Department with the proper stamp thereon to be substituted for any which may be spoiled in the operation of stamping.
5. A charge of 2*s.* per 1000 to be made for stamping.

The present practice in the different Colonies is as follows:—No charge is made in New South Wales and Tasmania, 3*s.* per 1000 is charged in Queensland, 2*s.* in Victoria; South Australia not undertaking the duty at all.

No. 31.—“Counterfeit Postage Stamps—Compliance with Article No. 18, Vienna Convention.”

Under Article 18 of the Vienna Convention the contracting countries undertake to adopt or to propose to their respective Legislatures the necessary measures for punishing the fraudulent

manufacture or use of counterfeit stamps, and we think that it is desirable that the necessary legislation to enable the Colonies to give effect to this Article be obtained as early as possible by those Colonies which do not already possess it.

No. 33.—“Dempsters', Postage on.”

Publication submitted by South Australia. We are of opinion that this publication should pay Packet rate of postage, not being published in book form.

Referred back to Sub-Committee for re-consideration.

No. 35.—“Postal Guides, uniformity.”

We advise that the question be taken up later on if time permits.

No. 36.—“Territorial transit rates charged by one Australian Colony to another such Colony, proposed reduction.”

As the Postmaster-General South Australia has assured this Committee that the present payment on the homeward mails and the payment by Great Britain to South Australia on the outward mails only about covers actual expenses, taking, of course, into account the landing and embarking of mails at Largs Bay, we do not advise that any reduction be made in these rates at present. In connection with this matter, we desire to call attention to the fact that in the new contracts with the P. & O. and Orient Companies, the contractors are required to land and embark the mails at all ports, including Largs Bay; but in the interests of the Colonies it is our opinion that the Adelaide Post Office should still undertake the service of landing and embarking the mails at Largs Bay, as the incoming mails occasionally arrive at such a time as to render it necessary for using the greatest possible expedition in landing the mails, in order that they may reach Adelaide in time for Melbourne express leaving at 4.30.

No. 37.—“Accelerating of train-service with English mails from Brisbane.”

It is admitted that the present railway arrangements are extremely inconvenient to Queensland in regard to the connection of the English mails at Sydney. If any arrangement could be made by which the Commissioners of these two Colonies could arrange for a train to leave Brisbane about 1.30 P.M. on Monday to arrive at Sydney at 5 P.M. next day, this would enable the Queensland public to post up to noon on Monday, instead of the business people having practically to close their correspondence on Saturday evening.

No. 37A.—“Question of special trains in event of mail steamers reaching Largs Bay on Saturdays and Sundays.”

As bearing upon the English Mail Train Service, and considering the likelihood under the present contract of the steamers frequently reaching Largs Bay on Saturday and Sunday, we have considered the question of making some provision for forwarding these mails on to their destination by special trains, and thus avoiding the great delay which would be otherwise unavoidable. A Memorandum showing possibilities in regard to special trains is appended, and we recommend that the questions therein set forth be remitted for the favourable consideration of the Colonies concerned.

Appendix A.

No. 38.—“Australasian Postal Convention.”

We advise that this question be taken up later on if time permits.

No. 40.—“Proposed arrangement for enabling senders of parcels for despatch per Parcels Post to places abroad, to defray all Customs and other charges arising upon such parcels.”

The proposed arrangement is explained in the subjoined letter from the London Post Office, 12 March, 1897 :—

“I am directed by the Postmaster-General to enquire whether your office would be disposed to take part in an arrangement, which is under consideration here, for enabling the senders of parcels sent abroad by Parcel Post to defray all the charges arising upon them, that is to say, not merely the postage, but also the Customs and other charges, which have now to be paid by the addressees on delivery. Such an arrangement is in operation in connection with the Parcel Post between several of the countries of the Postal Union, and is said to work well. The procedure is as follows :—

“A person wishing to relieve his correspondent of all charge in respect of a parcel, endorses it ‘to be delivered free of all charge,’ signs a declaration that he will pay the amount due as soon as it is ascertained, and, if required, pays a deposit. A form, similar to the one annexed, is then made out and accompanies the parcel to the office of exchange of the country of destination, where the parcel is examined, and the charges are assessed. The amount is entered on the form, and claimed on a parcel bill, to which the form is attached as a voucher. The form is then sent back to the office of posting, where a settlement is come to with the sender. The parcel is, of course, delivered free.

“In this country it is proposed to charge for the facility a fee of 6d. per parcel.

“If your office, with the consent of the Government, is of opinion that the proposed arrangement might with advantage be adopted, you will no doubt be good enough to inform me to that effect. A date can then subsequently be fixed by mutual consent for bringing it into operation.”

We recommend that the suggestion of London should be approved, provided that the fee, in addition to the postage, instead of being 6d., be 1s., to be equally divided between the United Kingdom and the Colony interested.

No. 41.—“Customs Declarations on Parcel Post Packages.”

We recommend that the Regulation of the London Post Office, as under, with reference to valuation of Parcel Post Packets be adopted, viz. :—

CUSTOMS DECLARATION AND DESPATCH NOTE.

“Parcels are subject to Customs Regulations, and the sender of each parcel is required to make, for Customs purposes, upon a special form or forms, which can be obtained at any Post Office, an accurate statement of the nature and value of the contents and other particulars. *Undervaluing the contents, or failure to describe them fully, may result in seizure of the parcels.* The net weight or quantity of the various articles contained in a parcel should, if possible, be stated, and any other particulars which would facilitate the assessment of Customs Duty—such as, in the case of clothing, the material of which it is composed, and whether it is new or has been worn. In the case of articles returned to the country where they originated the fact should be stated.”

No. 42.—“Proposed ‘Express Delivery’ of Parcels and Postal Packets exchanged between the United Kingdom and the Australasian Colonies.”

By circular letter dated the 20th April, 1897, the London Office wrote to the respective Australasian Postal Administrations, bringing under notice the system of delivering ordinary *postal packets* by *express* messenger, stating that the system had worked well in the United Kingdom, and was about to be extended to international *parcels*.

The London Office suggests that, if the Colonies are now able to undertake express delivery, it should *apply to parcels as well as to other postal packets*, but, if the Colonies be still unable to arrange for the delivery by special messenger of postal packets received from places abroad, they may desire to give senders in the Colonies the opportunity of securing the express delivery of correspondence forwarded by them to the United Kingdom. If so, the London Office is prepared to deliver specially all ordinary postal packets as well as parcels marked “express,” received in the mails from the Colonies. The express fee on *ordinary postal packets*, at the rate of 3d. per mile, cannot be prepaid, but will be collected on delivery, while, *in the case of parcels* for “express” delivery, a special fee of 5d. each parcel should be collected from the sender, and credited to the Imperial Post Office on the parcel bill.

We consider that the requisite facilities for the establishment of the system do not exist here; there is no demand for its establishment; there are objections to its *partial* introduction (*i.e.*, that it should apply *only* to parcels from Australia); the express fees chargeable even under the favourable circumstances of a large traffic would not be remunerative; and the proposal that the Colonies should undertake the collection of fees on behalf of the United Kingdom, and undertake the task of specially treating all such parcels without any remuneration, is considered inequitable.

Under the circumstances we think it undesirable that the proposal should be acceded to.

The Conference, at 1 o'clock, adjourned until 4 o'clock.

AFTERNOON SITTING.

The President took the Chair at 4 P.M.

The Conference further considered the Report of Sub-Committee of Permanent Heads. The following recommendations were agreed to :—

No. 43.—“France—Parcel Post Convention.”

We recommend that, although Queensland is not at present prepared to join the Parcel Post Convention with France, except on certain conditions, the remaining colonies adopt it as soon as possible.

No. 44.—“Establishment of direct exchange of Parcels between the Australian Colonies and Cape Colony, and other South African States and Colonies.”

We have carefully revised the Draft Parcel Post Convention, and append the same, as altered, which we advise be forwarded to Cape Colony for approval. It is recommended that Tasmania be requested to act as intermediary in forwarding or distributing parcels passing through its office to and from the Cape without charging territorial or extra sea transit rates, the Australian Colonies being regarded as out-territory for parcel post purposes.

CONVENTION.

His Excellency the Governor of the Colony of the Cape of Good Hope, and His Excellency the Governor of the Colony of _____, being desirous of promoting greater facilities than at present exist for the exchange of parcels between the Colony of _____ and the Colony of the Cape of Good Hope, have agreed, on behalf of their respective Governments, to the following Articles:—

ARTICLE 1.

The parcel post between the Colony of _____ and the Colony of the Cape of Good Hope, shall come into operation on the First day of _____, one thousand eight hundred and ninety _____.

ARTICLE 2.

There shall be a regular exchange of parcels between the Colony of _____ and the Colony of the Cape of Good Hope, and other South African States and Colonies served through the Cape Colony, which shall be effected by means of the ordinary postal service between _____ and the Cape Colony.

ARTICLE 3.

All parcel mails shall be made up on, and forwarded direct to, such offices of exchange as may be mutually agreed upon.

ARTICLE 4.

In the event of its being necessary to provide receptacles for the exchange of parcels under this Convention, the cost of such receptacles shall be equally shared between the post offices of _____ and the Cape Colony.

ARTICLE 5.

A parcel must not exceed three feet six inches in length, nor six feet in girth and length combined.

ARTICLE 6.

The maximum weight of a parcel must not for the present exceed eleven pounds avoirdupois, and the scale of weight shall advance by even pounds, beginning with the first pound.

ARTICLE 7.

Postage for the conveyance of a parcel from the place of posting to the place of destination must be prepaid by means of postage stamps.

Parcels not fully prepaid and posted out of course, the senders of which are not known, may be forwarded, charged double the deficiency, entry to be made in "Rates prepaid" column as if fully prepaid, and the amount of tax and fine to be entered in column "Accrued charges due to country of despatch."

ARTICLE 8.

Parcels of the following description must not be accepted for transmission by parcel post:—

(a) Parcels which bear on the outside any writing or drawing of an indecent or offensive nature, or within which any contents of a like nature may be observed, and parcels containing parts of the vine, fruit, plants, cuttings, bulbs, or roots, (unless accompanied by a special declaration that no phylloxera exists or has existed in them); gunpowder, cartridges, lucifer matches, or anything explosive or liable to sudden combustion; bladders containing liquid; live animals; grossly offensive or filthy matter; and anything in a condition likely to injure other parcels or any officer of the post office, are prohibited.

Should any such parcel as is described above be tendered for posting at any post office it must be refused, or, if detected in transit, it must be detained, and the sender communicated with. If this cannot be done, the Postmaster must report the circumstance to the chief office of the Colony in which the irregularity is detected, stating the address of the parcel, the number of the Letter Bill or Parcel Bill on which it is entered, the office from which it was received, its supposed contents, and request instructions.

If, however, such a parcel should contain perishable matter which has become offensive, the Postmaster may use his own discretion if the immediate destruction of the parcel be imperative.

(b) Parcels containing game, meat, eggs, &c., or razors, scissors, needles, knives, forks, or other sharp instruments, must not be accepted unless securely packed, so as to guard against risk or injury to other parcels. Liquids, or semi-liquids, such as jellies, pickles, paint, varnish, &c., must not be accepted unless in bottles or cans securely stoppered, nor powders, unless so packed that they cannot escape in transmission. Bottles or glass in any form must be accepted only when so packed as to be secure from breakage.

If a parcel of this nature be tendered at any post office in a damaged or insecure condition, or in a condition likely to injure other parcels or any officer of the post office, it must be refused; if a parcel in such condition should be observed in transit it must, if possible, be made secure and sent forward; if it cannot be so secured it must be detained, and a report must be made to the Chief Officer of the Colony in which the irregularity is detected, as in the case of forbidden articles (paragraph 8A).

(c) No parcel containing diamonds, specie, bullion, gold (in dust or nuggets), or ostrich feathers, must under any circumstances be accepted for transmission by Parcel Post, but these articles may, as heretofore, be sent through the post at the letter rate of postage, if duly registered.

ARTICLE 9.

The postage on parcels posted in _____ and addressed to the Cape Colony, and on parcels posted in the Cape Colony and addressed to _____ shall be at the rates specified in Schedule "A" to this Convention.

ARTICLE 10.

No parcel may contain a letter or other postal packet intended for delivery to a person other than the addressee of the parcel.

If such a letter or postal packet be discovered in a parcel it must be sent forward charged with postage at the unpaid rate applicable to such letter or postal packet.

25

ARTICLE 11.

No parcel may contain other parcels intended for delivery at any address other than that borne by the parcel itself. If such enclosed parcels be detected they will be withdrawn and sent forward, charged with new and distinct Parcel Post rates.

ARTICLE 12.

Each parcel must be plainly directed, such direction setting forth the name and full address of the person for whom the parcel is intended.

ARTICLE 13.

The sender should write the words "Parcel Post" on the address side of the cover, as well as his name and address at the date of posting.

ARTICLE 14.

All parcels must be securely and substantially packed and closed by the sender, and, in those cases where seals are necessary, the wax must be of a quality to resist any heat to which it may be subjected during transit.

ARTICLE 15.

All parcels must have attached to them a Custom House Declaration form, similar to that set forth in Annexure "C" to this Convention, which must give an accurate statement of the contents and value of the parcel, the name of the place to which it is addressed, and the sender of the parcel must affix his signature and place of abode to the form, together with the date on which the parcel was posted. This form must, after being affixed to the parcel in such a manner as to be readily seen by the Custom House officers, be impressed with the dated stamp of the office at which the parcel is posted.

ARTICLE 16.

In the event of the declaration being found incorrect in any particular, the parcel will be liable to seizure by the Customs Department.

ARTICLE 17.

We advise that the form of Parcel Bill to be adopted should be similar to that in use between the Colonies and the United Kingdom.

ARTICLE 18.

All such Parcel Bills shall be made out in triplicate, and be disposed of in the following manner:— One copy to be retained by the office of exchange of the Colony of despatch, and two copies to accompany the mail to the office of exchange of the Colony of destination.

The Parcel Bills shall be numbered consecutively, commencing with No. 1, on the 1st of January in each year; and each entry in the Bill shall be numbered consecutively, commencing with No. 1. The number of the Bill and entry shall be entered on the corresponding parcel, for the purpose of identification.

ARTICLE 19.

All parcels exchanged under the provisions of this Convention shall, for the time being, be chargeable with such Custom dues as may be leviable under the laws of the Colony of destination.

ARTICLE 20.

We advise that this Article be excised, as not applicable to the Australasian Colonies.

ARTICLE 21.

The despatch of every separate parcel mail shall be advised on the ordinary Letter Bill of the mail with which the parcel mail is sent.

ARTICLE 22.

All errors which may be discovered on receipt of the mails at the office of exchange of the Colony of destination shall, after verification by a second officer, be reported to the Postmaster-General of the Colony of despatch.

ARTICLE 23.

If a parcel advised on a Parcel Bill be not received, the entry on the Parcel Bill shall, after the non-receipt has been verified by a second officer, be cancelled, and the error reported at once to the Postmaster-General of the country in which the error is discovered.

ARTICLE 24.

Should a parcel be received in a damaged or imperfect condition, full particulars must be reported, without delay, to the Postmaster-General of the Colony in which the damage is observed.

ARTICLE 25.

All errors and irregularities in connection with the exchange of parcel mails shall be reported by the one Colony to the other, on the form of Verification Certificate set forth in Annexure "E" to this Convention.

ARTICLE 26.

If no Verification Certificate be received, a Parcel mail shall be considered as duly delivered, having been found on examination correct in all respects.

ARTICLE 27.

The postage levied under Table I of the Convention shall be divided between the Colonies of origin and destination in the proportions set forth in Schedule B, Tables 1 and 2.

The despatching Colony retaining the sea rate of 2*d.* per lb.

26

ARTICLE 28.

At the close of each quarter the Postmaster-General of the Cape Colony shall prepare a general account between the two Colonies, on a form similar to that set forth in Annexure "F" to this Convention, which shall be supported, so far as the entries of parcels are concerned, by a statement on the form set forth in Annexure "G" to this Convention, of the proportions of postage to be credited to South Australia and the Cape Colony respectively on parcels exchanged, and also the proportion of postage on parcels redirected in both directions, the entries being supported by the necessary vouchers in detail.

ARTICLE 29.

Immediately on receipt of the General Account referred to in the foregoing Article, the Postmaster-General of the Cape Colony shall cause it to be examined, and shall, as soon as possible thereafter, forward to the Postmaster-General of the Cape Colony through the Agents-General for the respective Colonies in London, or otherwise as may from time to time be determined, a remittance for the amount of the balance thereof, if in favour of the Cape Colony, and in the event of the balance of the account being in favour of the Cape Colony, the Postmaster-General of the Cape Colony shall forward with the account a certificate for the amount of such balance, which shall be payable on presentation by the Agent-General of the Cape Colony in London, or shall otherwise cause an adjustment of the balance due to be effected as may be determined by mutual agreement between the two Departments: provided always that the balance to be so adjusted shall in either case exceed the sum of £100, and that a remittance on account shall be similarly effected by either Department in advance of the quarterly account, at the end of every month in which it is ascertained that the indebtedness to the other Department exceeds £100. In the event of the balance on the quarterly account not being in excess of £100, the amount thereof shall be carried forward to the next account.

ARTICLE 30.

Any parcel which may be redirected shall be subject to a redirection charge equal to the original postage, and the credits shall be apportioned in all respects as if the parcel had originated in the ordinary course in the Colony from which the parcel is redirected.

ARTICLE 31.

Parcels which may from any cause remain undelivered after the lapse of a period of six months from the date of posting shall be returned for disposal to the Superintendent of the Office of Exchange in the Colony in which they were posted; but such parcels shall give rise to no charge and to no account.

ARTICLE 32.

Parcels missent shall be returned to the Office of Exchange in the Colony of Despatch by the earliest possible opportunity.

ARTICLE 33.

Government parcels must be paid for as ordinary parcels, and will be liable to be charged for redirection, and they will be subject in all respects to the same rules, as regards dimensions, weight and contents, as ordinary parcels.

ARTICLE 34.

The Post Office Department of either of the Colonies parties to this Convention will not be responsible for the loss or damage of any parcels, and no indemnity can consequently be claimed by the sender or addressee of either Colony.

ARTICLE 35.

Except as otherwise provided in this Convention, all parcels passing between the Cape Colony and the Cape Colony shall be subject to the general Regulations of the Postal Department of those Colonies respectively.

ARTICLE 36.

Subject to the general provisions of this Convention, parcels may be exchanged through the intermediary of the Offices of Exchange of the countries parties to this Convention, between either of such countries and any other country with which a direct exchange of parcels shall have been arranged by either of the contracting countries; and there shall be paid by the country of origin to the postal administration of the country of transit the credits specified in Article 27 of this Convention, and any "Forward Postage" which may be payable for the conveyance of such parcels beyond the country of transit to the place of destination.

ARTICLE 37.

All parcels sent from the Colony of the Cape Colony to Colonies or States served in transit through the Cape Colony must be entered separately from parcels addressed to the Cape Colony on the form set forth in Annexure "D" to this Convention.

ARTICLE 38.

This Convention is entered in between the respective Governments of the Colony of the Cape of Good Hope and the Colony of the Cape Colony from the date hereinbefore mentioned, and shall remain in force until it shall be necessary to be modified in consequence of the Cape Colony subscribing to the Parcel Post Convention signed at Paris on the 3rd of November, 1880, or otherwise as may be found expedient.

27

SCHEDULE A.

TABLE I.

POSTAGE TARIFF on Parcels originating in the Colony of and addressed to the Cape Colony and other States and Colonies in South Africa served in transit through the Cape Colony.

Country of Origin.	Country of Destination.	Rate of Postage per lb. or fraction thereof.
	Cape Colony	s. d. 1 0
	British Bechuanaland	1 3
	Orange Free State	1 3
	South African Republic	1 3
	British Bechuanaland Protectorate	2 10
	Mashonaland	2 10

TABLE II.

POSTAGE TARIFF on Parcels addressed to the Colony of and originating in the Cape Colony and other States and Colonies in South Africa served in transit through the Cape Colony.

Country of Origin.	Country of Destination.	Rate of Postage per lb. or fraction thereof.
Cape Colony		s. d. 1 0
British Bechuanaland		1 3
Orange Free State		1 3
South African Republic		1 3
British Bechuanaland Protectorate		2 10
Mashonaland		2 10

No. 45.—“Revision of Parcel Post Rates to India and the East, Ceylon to act as intermediary.”

No report.

No. 46.—“Proposed introduction of System of Insurance on Postal Parcels.”

We recommend that the system of insurance on parcels be agreed to inland, intercolonially, and with the United Kingdom, and that the following be the rates charged:—

	Not exceeding £10.	Each additional £10 to £50.	Maximum Charge.
Inland	4d.	2d.	1s.
Intercolonial	5d.	2½d.	1s. 3d.
United Kingdom	6d.	3d.	1s. 6d.

But we advise that the credit to be allowed by the despatching office be the same in both directions, that is, Great Britain to credit the Colonies on the “outward” parcels with an equal amount to that credited by the Colonies on the “homeward” parcels, and the same principle should apply intercolonially. Queensland and Tasmania consent to this, so far as absolute loss is concerned, but not to insurance against damage.

No. 47.—“Articles having a saleable value received by Packet Post to be transferred to Inland Parcel Post.”

No report on this matter. It applies to Queensland only.

Nos. 48 and 49.—“Adjustment of Postage on Intercolonial Parcels posted out of course and received in the Colony of destination by other than Parcel Post.”—“Mode of charging and accounting for irregularly-posted Parcels.”

In the case of parcels sent out of course (*i.e.*, articles despatched from one colony as packets, &c. but regarded in the colony of destination as *parcels*), we advise that double the amount of deficiency at parcel rate be collected on delivery.

Nos. 50 and 51.—“Discontinuance of Registration of Parcels in New South Wales.”—“Intercolonial Charges for Certificates of posting of Parcels.”

We recommend that certificates of posting of parcels be given at a charge of 3*d.*, the one certificate to include as many parcels as the sender may choose to enter upon the list, and for an additional 2½*d.* for each parcel an acknowledgment of receipt by addressee will be obtained and forwarded to the sender by post.

No. 52.—“Apportionment of Intercolonial Parcel Postage equally between the Colony of origin and Colony of delivery.”

We recommend that the present division of postage on parcels posted intercolonially be maintained—despatching Colony 5*d.* ; receiving Colony 3*d.* : Queensland dissenting.

Nos. 53 and 54.—“Claim of London Office to be credited with 1*d.* per lb. for sea transit from Australia to England on parcels sent to Foreign Countries *viâ* the United Kingdom.”—“Apportionment of postage on parcels exchanged with Foreign Countries through the intermediary of the United Kingdom.”

In 1896, at the suggestion of the London Office, it was agreed that the postage on parcels exchanged between the United Kingdom and the Australian Colonies should be reduced *from* 1*s.* 6*d.* for the first 2 pounds or fraction, and 9*d.* for each additional pound, *to* 1*s.* for the first pound or fraction, and 6*d.* for each additional pound.

The proposal for such reduction of postage was first made in 1894, but the apportionment of postage then suggested by the London Office was considered to be unfair to the Colonies, and it was not until after the exchange of considerable correspondence on the subject between the London and Colonial Offices that the former office agreed in 1896 that the postage should be apportioned as under on parcels forwarded in both directions ; *viz.* :—

Colonial share—First pound, 7*d.* ; each additional pound, 3*d.*
Imperial „ „ „ 5*d.* ; „ „ „ 3*d.*

(NOTE.—Owing to the heavy expense incurred by the Colonies in initiating the Parcel Post System in 1886, the London Office agreed to allow them the larger share of the postage, and the Colonial share is still 2*d.* more on each parcel than that received by the United Kingdom.)

Subsequently to the above-mentioned division of postage being agreed upon, the London Office, in a circular letter dated the 30th December, 1896, suggested that the Australian Colonies should accept the *same* credit on parcels sent from Foreign Countries to Australia *viâ* England as on those sent direct from the United Kingdom to Australia, *viz.*, 7*d.* for the first pound, and 3*d.* for each additional pound, *in lieu* of the credits then received, *viz.*, 9*d.* up to two pounds, 2*s.* 3*d.* between two pounds and seven pounds, 3*s.* 9*d.* between seven pounds and eleven pounds. This suggestion, although entailing a loss on the Colonies, was adopted for the sake of uniformity.

On the 18th June, 1897, the London Post Office wrote to the Adelaide Office intimating that it would be necessary for the Australian Post Offices to credit the Imperial Post Office with 1*d.* per pound rate (for sea postage from Australia to London), in addition to the onward postage from England, on all parcels which they might send to other countries *viâ* the United Kingdom, after the 31st July, 1897. In a reply, forwarded from New South Wales to London (dated 14th September, 1897), attention was drawn to the particulars stated above, and that office was reminded that *at the present time no special payment is made to the Orient and P. & O. Companies for the sea transit of parcels* (those Companies having since the 1st February, 1896, abandoned the special charges made up to that date for such transit) ; and it was pointed out that *subsidies now allowed cover payment for the conveyance of all mail-matter (including parcels), and the Australian Colonies, as joint parties with the United Kingdom to the contracts with the Companies named, are entitled to the full benefit of the altered arrangement.* It was therefore intimated that, under the circumstances, it was thought that the demand made was unreasonable, and that the London Office was not justified in making a special levy on the Australian Colonies with respect to the sea conveyance of parcels any more than it would be in acting similarly with regard to ordinary correspondence (letters, &c.) ; and it was added, in conclusion, that as the Colonies had reduced the postages on parcels to and *viâ* the United Kingdom, on the understanding that they were to receive certain credits, it would now be necessary, in order to comply with the request made, either to submit to a loss of revenue, or to increase the postage rates on the parcels. Victoria and South Australia also objected to compliance with the request made.

The London Office, under date the 5th November, 1897, replied, expressing regret that the proposal of that office was considered by Australia to be unreasonable, and asking for a re-consideration of the matter.

It is thought that the particulars furnished the London Office sufficiently demonstrated the unreasonableness of the request made by that office. The discussion on the subject seems to have arisen because of an apparent misapprehension on the part of the London Office, which appears to think that some particular portion of the Colonial share of postage on parcels exchanged with the United Kingdom is allocated for the sea service; but such is not the case, and it must be obvious that (the Orient and P. and O. Companies having two years since abandoned their special charges for the sea transit of parcels) there is no need to allocate any portion of the postage receipts to cover charges which no longer exist.

The London Office has not made, *nor is it entitled to make, any claim for the sea transit of parcels sent from the Colonies addressed to the United Kingdom*, and, as the arrangement made is that the Colonies are to receive the *same share of postage* on parcels exchanged with foreign countries *viâ* the United Kingdom as on parcels exchanged direct with the United Kingdom, and in view of the other strong reasons herein given, it seems sufficiently clear that the London Office has no good claim to the credit asked for; *and it is still thought that the request made should not be acceded to.*

To sum up the matter, on parcels for Foreign Countries *viâ* the United Kingdom, the London Office receives *its full share of postage at the rates agreed upon, in addition to the onward postage from the United Kingdom to destination*, and it would seem clear that the London Office has no good claim for any further payment.

Were the claim of the London Office admitted, the *Colonies* would receive (after the first lb.) only 2d. per lb., whilst the United Kingdom would receive 4d. per lb., instead of each receiving as at present, 3d. per lb.

We recommend that the foregoing statement be communicated to the London Post Office, Queensland dissenting, that Colony having already made the necessary charge on parcels in order to meet London demands.

No. 55.—“The practicability or otherwise of introducing the ‘Value payable,’ or ‘Cash’ on delivery of Parcels System into the Australasian Colonies.”

It is thought that there would be strong protests from country storekeepers and others were this system introduced; indeed, when the parcel post was brought into operation there were numerous complaints that people in the country found it cheaper to obtain their goods from the city by parcel post than to (as formerly) patronise their local storekeepers, who suffered in consequence. Were the “value payable,” post inaugurated, it is obvious that the grievance would be intensified. Moreover, were the system to apply, as in India, only between Money Order Offices, it would not be available for use by people in remote districts, by whom it would be most appreciated. Under these circumstances it is thought that it would not be desirable at the present time to bring the system mentioned into operation in the Australasian Colonies.

No. 56.—“Rates of Commission on Money Orders from the Australasian Colonies to the United Kingdom, Cape Colony, &c.”

We recommend that the rates of commission charged on Money Orders for the United Kingdom, British Possessions, and Foreign Countries, in all the Colonies as in New South Wales and Queensland, be 6d. for each pound or fraction of a pound.

No. 57.—“Reduction in rate of commission to paying country on Money Orders exchanged between Australasian Colonies and Singapore.”

The rate of commission has now been reduced from one per cent. to half of one per cent. by all the Colonies.

No. 58.—“Treatment of Money Order Advices missent to other Colonies.”

We advise that in the event of Money Order Advice being inadvertently sent to the wrong Colony, that Colony should forward the Advice without delay to the Head Office of the Colony on which the Money Order was drawn, so that the payee may at once receive payment; at the same time, the issuing Colony should be informed of the action taken and requested to deduct the amount of such Advice from the next Account.

No. 59.—“Practice of forwarding Money Order Advices, with and without lists, between Colonies.”

We advise that Tasmania correspond by letter with the Colonies concerned.

No. 60.—“Telegraph Money Orders to New Zealand and Tasmania.”—“Omission of signature from Advices, and Cable Company’s charges.”

At the 1896 (Sydney) Conference, the following recommendation by Permanent Heads of Departments was adopted, viz.:—“We recommend that the proposal of New Zealand to introduce the Telegraph Money Order system between that Colony and Australia and Tasmania be agreed to. Our experience of the system which is now in force between the Australian

Colonies and Tasmania does not lead us to anticipate that any serious risk would be incurred by extending it to New Zealand. We advise that the usual Money Order Commissions be charged, plus the cost of a ten-word telegraph message to the paying office, and another to the payee."

The system was brought into operation in July, 1897, and, in the Regulations adopted, it was provided that *one* message would "be sufficient for any number of Orders from the same remitter to the same payee, provided the numbers are continuous."

However, on the 21st December, 1897, Mr. Warren, of the Eastern Extension Telegraph Company, wrote, intimating that, from the 1st January, 1898, "*only one Money Order will be accepted at the single rate, every additional Order embodied in the same message to be charged as an extra message,*" and also suggesting that a considerable reduction in the average number of words in a message would be made were the signatures to Telegraph Money Order Advices omitted. On the recommendation of the Controller, it was decided by *New South Wales* to "agree to dispense with the transmission of the Postmaster's name and designation to all telegraphic advices to *New Zealand*, as it is of no use to the paying office."

However, in the Regulations subsequently prepared on the subject, it was provided that "in advising the remittance of money by telegram to *either New Zealand or Tasmania*, the Postmaster or other official will not give his name or official designation, but simply the name of the office at which the order is issued."

The *Tasmanian Postal Authorities* apparently were not consulted respecting the above-mentioned altered arrangement, and on receipt of an unsigned telegraph money order advice from the Postmaster, Oxford-street, made enquiry in the matter. A memorandum in reply seems to have been sent from the Money Order Office, to which the *Hobart Office* replied that "*Telegraph Money Order advices unsigned will not be recognised by this Colony (Tasmania).*" Hobart was thereupon informed that "signatures of Postmasters dispensed with in accordance with arrangement with Cable Company."

A letter, dated the 16th February, 1898, has since come to hand from *Tasmania*, intimating that with regard to the signatures of telegraphic advices being abolished altogether, the question will be placed before the Honorable the Postmaster-General on his return to the Colony, and his decision made known to you.

By letter, dated the 19th February, Mr. Warren intimated that "*on and after the 1st March, 1898, the New Zealand cable rate for official Telegraph Money Order Advices will be two shillings and sixpence, instead of two shillings, as at present,*" also that "*additional orders may be included in one telegram at the minimum rate of two shillings and sixpence.*" In reply to an enquiry from the Sydney Office, Mr. Warren stated that the above rates will not apply to *Tasmanian Money Order* cable business.

The points for consideration seem to be the *adoption of a uniform practice on the part of the whole of the Australasian Colonies respecting the signing or otherwise of Telegraph Money Order Advices to New Zealand and Tasmania respectively.*

New Zealand has intimated that the Postal Department of that Colony is unable to dispense with the issuing officer's signature; whilst *Tasmania* has notified the Sydney Office that unsigned Telegraph Money Order Advices will not be recognised by that Colony.

We are of opinion that the practice of wiring the Postmaster's signature is a safeguard. We also consider that *the simplest way of adjusting the charges with the Cable Company would be to pay them their proper tariff of 2s. in the case of New Zealand, and 1s. in the case of Tasmania, for the first 10 words, and 3d. and 1d. each additional word contained in the messages transmitted over the New Zealand and Tasmanian cable lines respectively, the sender, of course, being charged the full rates as given in the Postal Guide.*

No. 61.—"Exchange of Money Orders with Japan."

The Hong Kong Office having intimated that they can no longer act as intermediary in connection with the exchange of Money Orders between Australia and Japan, we advise that a joint Convention be entered into with that country.

Nos. 62 and 63.—"Suggested discontinuance of the issue of Duplicate Postal Notes and the payment of the face value of postage stamps affixed to Postal Notes."—"Duplicate Postal Notes."

We advise that a duplicate of any postal note be not issued unless on absolute proof of the destruction of the original note, and then only after the expiration of six months from the date of issue, the extra poundage rate to be charged on such duplicate; and that the existing regulation which permits of postage stamps being affixed to postal notes to the extent of 5d. be rescinded. (Referred back to Sub-Committee for further report).

No. 64.—"Exchange of Postal Notes between Australasia and the United Kingdom."

At the 1892 (Hobart) Conference it was decided to invite the London Office "to adopt an exchange of postal notes with the Australasian Colonies on the same lines as those now existing between some of the Colonies." At the 1893 (Brisbane) Conference the Permanent Heads reported that "the London Office having absolutely refused to exchange postal notes with

31

Australia, we have no recommendation to make." At the 1894 (New Zealand) Conference the Permanent Heads reported that "as no new circumstances have arisen since the Brisbane Conference, we do not think that this matter should be reconsidered at present;" and, again, at the 1895 (Hobart) Conference it was reported that "the London Office was communicated with, but declined to exchange postal notes on account of the great risk." It appears from enquiry made by the Deputy Postmaster-General of New South Wales, when in London last year, that that office is quite firm in its opposition to the exchange of postal notes between the Australian Colonies and the United Kingdom. In the first place there is the old objection, namely, the difficulty of guarding against forgery and fraud, and of providing for the payment of these notes at the 12,000 offices in the United Kingdom, many of these being held, as in our case, by storekeepers who could not distinguish between a postal note issued at one country or another country, or whether it was a forgery. A further objection is that the balance—always an uncertain one—would be against the United Kingdom, that is to say, that more postal notes would be issued in the Colonies upon Great Britain than in Great Britain upon the Colonies.

It was suggested that the case might be met by adopting a similar course to that in the case of India, that is, let the Colonies purchase a quantity of British Postal Notes, paying of course cash for them, and also paying the commission. The London Office has no objection to our selling these notes in the Colonies, charging of course our commission in addition to the British commission. Should this be done they would agree to date the currency of the notes only from the date of our postmark, and not from the date of purchase from the London Office.

It is stated that experience has shown that there is very little demand for these notes in India. We consider that all the requirements of the public in the way of remitting small sums of money have been met in most of the Colonies by the reduction in the charge on Money Orders for sums not exceeding £1, from 1s. to 6d.

No. 69.—"Berne's Circular *re* tabulated Telegraph Routes, and method of indicating such Routes."

We consider this does not affect the Colonies to any great extent, and it is therefore recommended that no action be taken.

No. 70.—"Fire Alarms."

We have no report to make.

No. 71.—"Sunday Telegraph Rates to Tasmania."

We recommend that Tasmania adopt the Sunday rates on telegrams charged in the other Colonies.

ADJOURNMENT.

At 5.10 P.M. the Conference adjourned until 10 A.M. next day.

LEGISLATIVE COUNCIL CHAMBER, HOBART.

SATURDAY, 2ND APRIL, 1898.

The President, Hon. Sir Philip Fysh, K.C.M.G., took the Chair at 10 A.M., when the under-mentioned gentlemen, representing the Colonies herein named, were present:—

New South Wales : The Hon. JOSEPH COOK, M.P., Postmaster-General.
S. H. LAMBTON, Esq., Deputy Postmaster-General.
P. B. WALKER, Esq., M. Inst. C.E., M.I.E.E., Chief Electrician and
Engineer-in-Chief Telegraph Department.

Victoria : The Hon. JOHN GAVAN DUFFY, M.L.A., Postmaster-General.
F. L. OUTTRIM, Esq., Deputy Postmaster-General, Secretary to Postal
Department, and Superintendent of Telegraphs.

South Australia : Hon. J. G. JENKINS, M.P., Commissioner of Public Works.
Sir CHARLES TODD, K.C.M.G., Postmaster-General.

Queensland : The Hon. J. R. DICKSON, C.M.G., M.L.A., Home Secretary and
Postmaster-General.
JOHN M'DONNELL, Esq., Under Secretary to the Post and Telegraph
Department and Superintendent of Telegraphs.
JOHN HESKETH, Esq., Electrical Engineer.

Tasmania : The Hon. Sir PHILIP FYSH, K.C.M.G., M.H.A., Treasurer and
Postmaster-General.
H. V. BAYLY, Esq., Secretary to the Post Office.

PAPERS.

Hon. J. G. JENKINS tabled Postal and Telegraphic Statistics of South Australia for 1897.
 Hon. J. GAVAN DUFFY tabled Telegraphic Statistics for Victoria, 1897.

TELEGRAPHIC.

Hon. J. GAVAN DUFFY moved,—

That the following stand Orders of the Day for Monday :—

- (b) (65.) Alternative Cable Route. (N.S.W. 23.)
- (c) (66.) Pacific Cable. (Q. 21.)
- (d) (67.) Overland Telegraph Line, South Australia. (Q. 13.)

Hon. J. G. JENKINS seconded.

Carried.

NOTICE OF MOTION.

Hon. J. G. JENKINS gave notice to move on Monday, 4th April,—

“That this Conference recommends to the Governments of Australasia that no alteration in International Postal or Telegraphic Rates be made without the Colony proposing to make such alterations advising the other Colonies, and endeavouring to arrange for uniformity of action.”

REPORT OF SUB-COMMITTEE.

The Conference further considered the Report of the Sub-Committee of Permanent Heads on the subjects submitted to them :—

Nos. 72, 73, and 81.—“Intercolonial Telegraph Rates.”—“Resolution of Conference Chambers of Commerce *re* Intercolonial Telegraph Charges.”—“Reduction of the New South Wales-Queensland Telegraph Rates, and alteration in mode of charging on Inland and Intercolonial Telegrams.”

The question of reducing the rates—2s. for the first 10 words, and 2d. each additional word—on telegrams between New South Wales and Queensland, has been under consideration on several occasions.

In 1885, a proposal was made to Queensland that the rates be reduced to those then, and now, existing between New South Wales and Victoria, viz., 1s. for the first 10 words, and 2d. for each additional word. A reply was received that, having regard to the long distances over which telegrams pass in Queensland, the Government of that Colony was not then disposed to make any reduction in the charges levied. In 1887 the attention of Queensland was again drawn to the matter, but a reply was received to the effect that, for the reasons already given, the Government of that Colony was “still unable to meet the wishes of the Government of New South Wales with regard to the proposed reduction.”

At a Conference held at Adelaide in 1890, a Resolution was agreed to, of which the following is an extract, viz. :—

“That between any two contiguous Colonies, 1s. shall be the initial charge for 12 words, and 1½d. for each additional word ; names and addresses to be paid for.”

Owing to some of the Colonies not taking the necessary action, this Resolution was not given effect to, nor was a somewhat similar Resolution making the charge “between any two contiguous Colonies 1s. for 15 words, and 1½d. for each additional word, names and addresses to be paid for,” which was adopted at a Conference held at Sydney, 1891. A Resolution, similar in terms to the latter, was submitted for consideration at the 1892 (Hobart) Conference, but was rejected.

In 1896 the Chambers of Commerce in Sydney, Melbourne, and Adelaide wrote to the New South Wales, Victorian, and South Australian Post and Telegraph Administrations, asking for the reduction of the Intercolonial telegraph rates. The Sydney Chamber of Commerce asked that, after the first ten words, the charge on messages between New South Wales and Victoria be reduced from 2d. to 1d. per word. The Melbourne Chamber of Commerce made a similar request with respect to messages from Victoria to New South Wales, besides asking that consideration be given to the existing rates on messages between Victoria and South Australia. The Adelaide Chamber of Commerce also asked for a reduction.

The matter was considered at the 1896 (Sydney) Conference, when the Permanent Heads reported as follows :—

“We refrain from making any recommendation. We would, however, suggest for the consideration of Ministers that, in the event of an alteration of the rates being made, it should be *on the basis of the International principle of counting addresses and signatures*, as recommended at the Conferences held at Adelaide and Sydney in 1890 and 1891 respectively.”

In December, 1897, the Brisbane office opened up a correspondence with the Sydney office on the question of reducing the rates on telegrams to and from New South Wales and Queensland. The proposal of Queensland was to charge 1s. for 12 words, including address and signature, and 1½d. for each additional word. To this proposal New South Wales could not agree,

because of the anomaly which would be created, and owing to it being thought that the charges on messages between New South Wales and Victoria, and New South Wales and Queensland, should be as nearly uniform as possible, whereas were the Queensland proposal adopted the following would be the position :—

New South Wales to Queensland.—1s. for the first 12 words (at least six of which would be address and signature), and 1½d. for each additional word.

New South Wales to Victoria.—1s. for the first 10 words (exclusive of address and signature), and 2d. for each additional word.

Queensland was informed that if it would agree to the addresses being sent free, and to charge 1s. for the first 10 words and 2d. for each additional word, New South Wales would be prepared to consider the matter. The question still remained unsettled, but, in a letter explaining the reasons which guided Queensland in making the above-mentioned proposal, the Brisbane Office states that "*it has been recognised in all European Administrations, and confirmed by the International Bureau (see Rule 19, &c.), that the words in addresses and signatures should be counted,*" and that "*the Australian Colonies appear to be the only Administrations which do not observe this rule.*"

In a letter dated 11th August, 1897, the Adelaide Office drew attention to the fact that "a general reduction of telegraph rates, local and intercolonial, is again being urged in several of the Colonies," and stated that "our rates compare very favourably with those obtaining in Europe." That office also stated that the Queensland Postmaster-General is anxious that some re-arrangement should be arrived at, but he considered—

1. That no Colony should take separate action.
2. That any change should include the charging for addresses and signatures.
3. That the rates internally should be uniform throughout the Colonies, if this can possibly be arrived at, but in any intercolonial case rates should be uniform.

The whole subject has to be considered at the present Conference, the points for consideration being—

1. The charges on messages to and from New South Wales and Queensland.
2. The adoption of uniform rates between contiguous Colonies.
3. The adoption of uniform rates between Colonies not contiguous to one another, as between Queensland and South Australia, New South Wales and Western Australia, &c.
4. The advisability or otherwise of charging for addresses and signatures, or signatures alone.
5. The adoption of uniform charges for inland messages.

We are still of opinion that any re-arrangement of charges should be on the basis of charging for every word, whether in addresses or text. This is the International principle. We would also respectfully point out that the present rates appear very reasonable when the great distances covered, and the small population, are taken into consideration. They compare very favourably with those obtaining in Europe, as the following table will show :—

	Minimum Charge.		Rate per Word.		Distance about	
	d.		d.		Miles.	
Between London and Paris.....	10		2		287	
" " Madrid.....	10		4		1195	
" " Antwerp.....	10		2		270	
" " Berlin.....	10		2		746	
" " Vienna.....	10		3		980	
" " Hamburg.....	10		2		657	
" " St. Petersburg.....	10		5½		1774	

Names and Addresses being counted.

With a view, if possible, to effect some reduction, we suggest the following Tariff for consideration :—

	Queensland.		New South Wales.		Victoria.		South Australia.		West Australia.	
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
Queensland.....	1 6	0 2	2 3	0 3	2 3	0 3	3 0	0 4
New South Wales.....	1 6	0 2	1 0	0 2	1 6	0 2	2 3	0 3
Victoria.....	2 3	0 3	1 0	0 2	1 6	0 2	2 3	0 3
South Australia.....	2 3	0 3	1 6	0 2	1 6	0 2	1 6	0 2
West Australia.....	3 0	0 4	2 3	0 3	2 3	0 3	1 6	0 2
Tasmania.....	In proportion, plus cable rate									

The Address and Signature, to the number of twelve words, to be sent free.

In this table the first amount indicates the rate for the first ten words, exclusive of names and addresses, the second amount indicates the rate for every succeeding word.

Hon. J. R. DICKSON moved,—

“That this recommendation be considered in Committee.”

Hon. J. G. JENKINS seconded.

Carried.

The PRESIDENT left the Chair, and the Conference went into Committee accordingly.

After some time spent therein,

Hon. JOSEPH COOK moved,—

“That this Conference regrets that, owing to the financial loss involved, the question of a general reduction in the prices of Intercolonial Telegrams must stand over for the present, and make no suggestion on the question of the limitation of addresses.”

Hon. J. G. JENKINS seconded the Motion, which was agreed to.

The Conference resumed, and the PRESIDENT reported the Motion.

Hon. J. GAVAN DUFFY moved,—

“That the following words be added to the Resolution reported from the Committee of the Whole Conference—‘but it is suggested that the Governments of New South Wales and Queensland arrange between themselves as to rates and limitations of words in addresses.’”

Hon. J. G. JENKINS seconded the Motion, which was carried.

The PRESIDENT put the question,—

“That the Report of the Committee of the Whole Conference, as amended, be agreed to.”

Carried.

Hon. J. R. DICKSON moved,—

“That any re-arrangement of charges should be on the basis of either charging for every word, whether in addresses or text, such being the international principle, or, of allowing the address and signature to the number of twelve words to be sent free.”

The Motion was not seconded.

Hon. J. GAVAN DUFFY moved,—

“That it is desirable the Motion of Hon. J. R. DICKSON be recorded in the Minutes of Proceedings.”

Hon. J. G. JENKINS seconded the Motion, which was carried.

The Sub-Committee reported :—

No. 76.—“Share-dealing.”

We are unable to deal with this matter. It refers to traffic in shares by telegraph employees, and should, we respectfully suggest, be dealt with by the respective Governments.

Hon. J. GAVAN DUFFY moved,—

“That, in the opinion of this Conference, telegraphic employees should be absolutely prevented from speculating in shares.”

Hon. J. G. JENKINS seconded.

After discussion the Motion was agreed to.

The following recommendations of the Sub-Committee were agreed to without Amendment :—

No. 77.—“Share Telegrams between Stock Exchanges.

We are of opinion that telegrams giving share quotations and passing between stock exchanges should not be accepted at press rates, but be charged as ordinary telegrams.

No. 79.—“*Re* word ‘care.’ being inserted in Address of Message.”

We recommend that when an International telegram is addressed to the care of a person who has registered an abbreviated or code address, his name or registered address must be preceded by the word “care.” When such word is omitted the omission should involve a non-delivery, and the sender be obliged to correct the address by a paid service, as provided for in the International Regulations.

No. 83.—“Proposed omission of the word ‘to’ from before addresses on telegrams.”

We are of opinion that it is unnecessary to signal the word “to” before the addresses on telegrams.

No. 84.—“Charges for certified copies of telegrams and search fees.”

We recommend that a certified copy of any Inland or Intercolonial message be supplied to the sender or addressee, or their authorised representative, upon proof of identity and full particulars being furnished, together with the payment of a fee of 1s. ; but where such particulars are not supplied the fee will be 2s. 6d.

35

No. 86.—“Consideration of Berne’s Circular Letter, August 3rd, 1897.”

This letter relates to contradictory articles in the Buda-Pesth Convention pointed out by Austria. No report is thought to be necessary, as the matter can be dealt with departmentally.

No. 89.—“Urgent Telegrams, distinctive coloured forms.”

This is a matter which can be dealt with departmentally.

No. 91.—“Typewriters for Telegrams.”

This matter can be dealt with departmentally.

No. 93.—“Proposal that Australasian Telegraph Administrations undertake for a fee the ‘coding’ of International Messages, as is now done by Reuter’s Agency.”

We are of opinion that the time is not yet ripe for the consideration of this question.

Nos. 94, 95, 96, and 97.—“Adoption of Uniform Charges and Regulations with respect to International Code Addresses.”—“Surnames as Code Addresses.”—“Code Addresses, registration of.”

We recommend that the fee for registration of code addresses be 10s. 6d. for the year, or 2s. 6d. for one month, for each address registered. We also recommend that the attention of the Australasian Administrations be drawn to the Resolution passed at the Conference at Sydney in November, 1896, with the request that it be complied with in future. The following is the Resolution referred to :—“(1.) That code addresses be not adopted intercolonially, except in the case of Tasmania and New Zealand, which for this purpose are international. (2.) That in connection with International Messages, code surnames be not accepted.”

Nos. 98, 99, 100.—“Telegraph Regulations.”—“Telephone Regulations.”—“Private Telephone Line.”

No report. We advise that these questions be taken up later on if time permits.

No. 101.—“Free transmissions of Telegrams on Postal Service over New Zealand and Bass Straits Cables.”

We recommend that this matter be dealt with departmentally.

No. 103.—“Regulations regarding Uniforms of Letter Carriers and Messengers.”

We recommend that this matter be dealt with departmentally.

No. 104.—“Holidays, Christmas and Good Friday.”

We recommend that this matter be dealt with departmentally.

No. 105.—“Free transmission of instructions respecting delivery of Telegrams.”

We recommend that office instructions, such as “By post,” “Porterage paid,” or “guaranteed,” be charged for, the same as “Reply paid.”

The following Reports on subjects which had been referred back to the Sub-Committee were also agreed to :—

No. 62.—“Suggested discontinuance of the issue of Duplicate Postal Notes and the Payment of the Face Value of Postage Stamps affixed to Postal Notes.”

We advise that a Duplicate Postal Note may be issued on satisfactory evidence of the destruction of the original, or, in the case of its loss, on the expiration of six months from the date of such original note. No note shall be paid after the expiration of six months from the date of issue without reference to the Head Office of the Colony of issue, in order to ascertain whether the original has been paid.

No. 39.—“Ratification of Washington Congress, and consideration of the various Conventions entered into at Washington but not signed by the Australasian Delegate.”

We see no objection to the ratification by the Australasian Administrations of the Postal Union Convention as agreed to at Washington.

The most important question, so far as Australasia is concerned, is the reduction of the territorial and sea transits; but we find that these reductions will, if anything, be in our favour, especially as, owing to the new arrangements in connection with the P. & O. and Orient contracts, the transit rates payable by non-contracting countries and colonies will, instead of being retained by Great Britain in one direction and the Colonies in the other, be placed to the credit of the subsidy, and the balance divided between Great Britain and the Colonies in the proportion of $\frac{19}{24}$ to Great Britain and $\frac{5}{24}$ to the Colonies,

With reference to the subsidiary Treaties referred to in the Hon. Mr. Duffy's Motion, time has not permitted of a careful examination of the untranslated Book of Proceedings recently received from Washington, but we understand that these Treaties do not materially, if at all, affect the Australasian Colonies.

With regard to the *optional provisions of the Washington Principal Convention*, we report as follows :—

1. *Article 6.*—The *registration fee* is fixed at “25 centimes, ($2\frac{1}{2}d.$) at most,” but, under Article 2 of the Final Protocol, “it is agreed that the States outside Europe are authorised to maintain the maximum at 50 centimes ($5d.$).” Under these circumstances *the Colonies need not alter their present charge for registration*, which is ($3d.$), and we advise accordingly.

2. *Article 7.*—Administrations agreeing thereto may exchange *registered correspondence marked with trade charges*, up to 1000 francs (£40) to be collected on delivery ; the proceeds (less charges of collections, &c.), to be remitted to the senders of such correspondence.

The Colonies decided in 1892 not to adopt the system, and again at the present Conference.

3. *Article 8.*—This provides for the payment of an *indemnity* of 50 francs (£2) “*in case of the loss of a registered article and except in cases beyond control*,” but under Article 3 of the Final Protocol, “it is agreed, as a temporary measure, that Administrations of Countries outside Europe whose legislation is at present opposed to the principle of responsibility, retain the option of postponing the application of that principle until they shall have been able to obtain from the Legislature authority to introduce it.

We recommend the adoption of this provision, and that it be extended inland and intercolonially from 1st January next.

4. *Article 9.*—Where the legislation of a country permits, the sender of a letter or other article can have it *withdrawn from the post*, or have its address altered, so long as such article has not been delivered to the addressee.

No objection to this, it being our present practice.

5. *Article 13.*—In countries which consent to undertake the service in their reciprocal relations a system may be adopted under which, at the request of the senders, and on their paying in advance a sum of $3d.$ for each article, all classes of correspondence are sent to the addressees by a *special messenger* immediately on arrival in the country of destination.

We do not recommend this system, as it is not practicable in sparsely populated districts.

6. *Regulation 6.*—It will be necessary for the Colonies to consider whether they are in a position to make up their postage stamps in the stipulated colours :—

$2\frac{1}{2}d.$ in dark blue,
 $1d.$ in red,
 $\frac{1}{2}d.$ in green.

We see no objection.

7. *Regulation 11.*—Administrations, whose Inland Regulations do not admit of the use of *labels (R)* in connection with registered articles, may postpone their introduction, and continue to use *stamps* for the indication of registered articles.

The present practice is to mark registered letters with a blue or red cross, and impressed with the letter “R,” which we find answers every purpose, and we advise its continuance.

Nos. 74, 85.—“Mode of counting and charging Telegrams. Disputes with the public as to what are Cipher Words. (Orders for parts of Machinery).” “*Re numbers as well as words appearing in Telegrams.*”

We recommend that figures be not allowed in the text of Inland or Intercolonial messages, but that amounts or numbers be written and signalled in words only. Isolated letters or groups of letters having no connective meaning shall be charged as one word for each letter.

Nos. 75, 78.—“System of counting words in Inland and Intercolonial Ordinary Telegrams.” “Counting double names in Telegrams.”

We suggest that these matters be referred to a Sub-Committee, to consist of Sir Chas. Todd, Mr. P. B. Walker, Mr. John Hesketh, and Mr. Geo. Smibert, to be settled by correspondence.

No. 80.—“Suggested abolition of additional charge on cipher words contained in Inland and Intercolonial telegrams.”

With reference to the extra rate now levied on cipher words, we recommend that no extra rate be charged on any English Dictionary word containing not more than 15 letters. The above is intended to apply to both Inland and Intercolonial telegrams.

No. 82.—“Intercolonial Telegraph Repeats.”

It is desirable that the practice of the Colonies should be uniform in dealing with the question of repeats, and it is recommended that the Resolution, No. 43, of the Brisbane Conference, March, 1893, be adhered to. The Resolution in question is as follows :—

The receiver of a message may have the whole or part of it repeated on payment of the cost of the telegram demanding the repetition, and of the reply to the same.

The sender can also have the whole or any portion of his message repeated on payment of the cost of the telegram he forwards and of the reply.

The demand for the repetition must be made within seventy-two hours after receipt or despatch of the telegram, and should be written in the following manner :—

“Sydney from Brisbane” (these words are not charged for).

“R.P.4” (representing reply paid, four words).

“Twenty-sixth” (date of message to be repeated); “Brown” (receiver’s name);

“Repeat first, fourth, ninth” (meaning words of the text of the telegram to be repeated); or,

“Twenty-sixth”; “Brown” (repeat word or words); “after”

The reply will be worded as follows :—

“Brisbane to Sydney,” (these words are not charged for).

“Brown” (words repeated).

No. 90.—“Question of issuing vouchers with ‘Reply Paid’ telegrams in terms of paragraph 1, clause 51, of Buda-Pesth Telegraph Service Regulations.”

We advise that the voucher system be adopted, and that the New Zealand form be accepted as pattern.

No. 171A.

N.B.—Office of origin to be inserted after signature, and Telegraphed.

[ON BACK.

Stamp of Issuing Office.

REPLY VOUCHER.—A sum of having been deposited for

a reply of words (addresses included) to a telegram handed in at

timed, addressed to, this form

will be accepted within six weeks of the date of its issue at any Postal Telegraph Office in payment

or part payment, as the case may be, of a telegram.

Signature of Issuing Officer:

N.B.—If this form be not used, or if it be used for a telegram the charge for which is less than the amount deposited, the whole of the amount deposited, or the difference, as the case may be, will be returned on application being made to the Controller, G.P.O., Wellington, within six weeks of the date of issue. After that interval no application for the return of the amount will be entertained.

No. 92.—“Code Vocabulary. Points submitted by Berne Telegraph Bureau for consideration.”

We suggest that this matter be referred to a Sub-Committee, to consist of Sir Charles Todd, Mr. P. B. Walker, Mr. John Hesketh, and Mr. George Smibert, to be settled by correspondence.

The following is our Report on additional matters remitted to us by the Honorable the Ministers :—

No. 68.—“Cable Subsidies and Guarantees, time of year closing.”

We recommend that this matter be referred to the Postmaster-General, South Australia, to arrange, if possible with the Eastern Extension Telegraph Company that the year close on the 31st December.

No. 87.—“The question of abolishing the system of ‘Urgent’ Intercolonial Telegrams, or of overcoming the delays to which ordinary Telegrams are subjected in Colonies in which such system is in operation.”

We recommend that the system of urgent telegrams be discontinued with regard to International Messages.

No. 88.—“Urgent Telegrams with West Australia.”

It is suggested that this Question be withdrawn, as it is disposed of by the recommendation of No. 87.

No. 102.—“Establishment of Telephonic communication between the Capital Cities of the Australian Continent.”

In 1896 several letters were received by the Sydney Office from Mr. Jules Renard, respecting the establishment of Telephonic communication between the capital cities of the Australian Continent (Adelaide, Melbourne, Sydney, Brisbane), it being pointed out that such a system of communication existed between Brussels and Paris; Paris, Lyons, and Marseilles (537 miles); Chicago and New York (1500 miles); as well as in other places. It was represented that the line from Adelaide to Brisbane could be constructed for a sum not exceeding £40,000. The Sydney Chamber of Commerce also wrote, enclosing a copy of a letter received by that body from Mr. Renard, and suggested that the subject might be considered at the next Intercolonial Postal Conference.

NOTE.—
Chicago to
New York
1000 miles.

The matter received attention at the 1896 (Sydney) Conference, when the following Report of Permanent Heads was adopted; viz. :—

“This is a matter that requires careful consideration. The first cost would be more than double Mr. Renard’s estimates for connecting Brisbane, Sydney, Melbourne, and Adelaide, and the charge that would have to be made for conversation would be so large as to be almost prohibitory. The population of the Colonies is not sufficiently developed to enable an expensive work of this nature to be carried out so as to be remunerative at a reasonable charge to the public. The line from Sydney to Brisbane alone would cost £41,750, or, presuming that the existing poles could be used (which is impracticable), the estimate might be reduced to £24,250. Even making no allowance for maintenance of the line or for working expenses, the interest and sinking fund on a fifteen years’ purchase is 10 per cent. of the capital cost (really £9 12s. 8d. per cent.) Therefore, for a line to be justifiable, a revenue of £4175 will require to be guaranteed on the Brisbane and Sydney line alone. It must also be borne in mind that telephonic communication between the capital cities of Australia would materially interfere with the telegraph revenue. We are therefore not prepared to recommend Mr. Renard’s proposal for favourable consideration.”

Mr. Renard subsequently wrote, stating that the line from Sydney to Brisbane would not cost more than one-half the sum named in the above-quoted Report, and that, taking the largest diameter of wire for the through line from Adelaide to Brisbane (1800 miles), the total cost would not exceed £100,000, including new poles.

In June, 1897, the Sydney Chamber of Commerce forwarded to the New South Wales Postal Department a copy of the following Resolution, adopted at a Conference of Chambers of Commerce of Australasia held at Sydney in May, 1897, viz. :—

“*Long distance Telephony.*—That it is desirable that telephonic communication be established between the various Capitals and leading Towns of Australia as early as possible.”

In forwarding this Resolution, a hope was expressed that, as early as possible, enquiry would be made into the prospects of such an undertaking being a commercial success.

We are still of the opinion that there is not sufficient justification at the present time for the adoption of any scheme of Trunk Telephone Lines between the capital cities of the Australian Colonies. The reasons for our arriving at this decision are as follow :—

The present lines of poles are not able to carry the telephone wires in some cases, and, therefore, new poles would require to be erected in these places. The cost of construction would

be still further increased by the necessity for using very heavy copper wires, and of re-arranging the present wires so as to avoid interference.

Experience indicates that the use of Telephone Trunk Lines would interfere with the Telegraphic Revenue. The extent of this interference depends upon the amount and nature of the business and tariffs.

The centres of Australia are far apart and comparatively sparsely populated. We are, therefore, of the opinion that the circumstances of the Colony, its population, &c., do not justify us in recommending the adoption of any comprehensive scheme at present.

We are, however, of opinion that the steps at present being taken by the various Colonies are in a direction which will eventually lead to the desired end. In all the principal Colonies trunk lines of moderate length are being introduced. Those in New South Wales and Queensland lead in the direction of the respective borders. As experience gained on them is found to justify it, the various Colonies will doubtless still further extend these lines until at last they meet.

Meantime, we recommend that the different Colonies be desired to furnish a statement of the Telephone Trunk Lines in use or contemplated, together with particulars of the cost, effect on revenue, and any other information of interest on the subject.

After discussion the recommendations were agreed to.

POSTAL.

Ratification of Washington Congress, and consideration of the various Conventions entered into at Washington but not signed by the Australasian Delegate. (Vic. 1.)

Hon. JOHN GAVAN DUFFY moved:—

“That this Conference recommend to the Governments of Australasia the ratification of the Treaty entered into at Washington at the last Universal Postal Congress.”

Hon. J. G. JENKINS seconded the Motion, which was carried.

ADJOURNMENT.

Motion put and carried,—

“That the Conference, at its rising, adjourn until Monday, 4th April, at 10:30 A.M.”

At 11:52 the Conference adjourned accordingly.

P. O. FYSH, *President.*

THOS. C. JUST, *Secretary.*

LEGISLATIVE COUNCIL CHAMBER, HOBART.

MONDAY, 4TH APRIL, 1898.

The President, Hon. Sir Philip Fysh, K.C.M.G., took the Chair at 10 A.M., when the under-mentioned gentlemen, representing the Colonies herein named, were present:—

- New South Wales:* The Hon. JOSEPH COOK, M.P., Postmaster-General.
S. H. LAMBTON, Esq., Deputy Postmaster-General.
P. B. WALKER, Esq., M. Inst. C.E., M.I.E.E., Chief Electrician and Engineer-in-Chief Telegraph Department.
- Victoria:* The Hon. JOHN GAVAN DUFFY, M.L.A., Postmaster-General.
F. L. OUTTRIM, Esq., Deputy Postmaster-General, Secretary to Postal Department, and Superintendent of Telegraphs.
- South Australia:* Hon. J. G. JENKINS, M.P., Commissioner of Public Works.
Sir CHARLES TODD, K.C.M.G., M.A.F.R.S., Postmaster-General.
- Queensland:* The Hon. J. R. DICKSON, C.M.G., M.L.A., Home Secretary and Postmaster-General.
JOHN M'DONNELL, Esq., Under Secretary to the Post and Telegraph Department, and Superintendent of Telegraphs.
JOHN HESKETH, Esq., Electrical Engineer.
- Tasmania:* The Hon. Sir PHILIP FYSH, K.C.M.G., M.H.A., Treasurer and Postmaster-General.
H. V. BAYLY, Esq., Secretary to the Post Office.

CANADIAN POSTAGE RATES.

The PRÉSIDENT reported that he had received a telegram from the Postmaster-General of Canada in reply to a Telegram forwarded from the Conference.

Ordered to be considered at a later hour.

REPORT OF SUB-COMMITTEE.

The Conference further considered the Report of the Sub-Committee of Permanent Heads of Departments on questions submitted to them.

No. 18.—“ Grocers' Price Lists, Postage on.”

Two articles were submitted by South Australia with a view to obtaining an opinion generally as to whether those and publications of a like character should be considered as newspapers. We are of opinion that one of the articles is inadmissible as a newspaper, but only for the reason that it is not fully dated as the Regulations require, and that the second one is entitled to pass as a newspaper.

Agreed to.

No. 33.—“ Postage on certain class of Publication.”

A publication is submitted by South Australia with a view to conferring as to whether publications of that class should be treated as packets or books. We are of opinion that, not being published in book form, they should be charged at Packet rate of postage.

Agreed to.

Question put, and passed—

“ That the Report of the Sub-Committee of Permanent Heads of Departments, as amended, be now approved.”

POSTAL AND TELEGRAPHIC RATES.

Hon. J. G. JENKINS moved,—

“ That this Conference recommends to the Governments of Australasia that no alteration in International Postal or Telegraphic Rates be made without the Colony proposing to make such alterations advising the other Colonies and endeavouring to arrange for uniformity of action.”

Hon. JOHN GAVAN DUFFY seconded. Carried.

CANADIAN POSTAGE RATES.

The following Telegrams were read :—

Hobart, 1st April, 1898.

The Hon. the Postmaster-General, Ottawa, Canada.

I AM directed by the Australian Postal Conference, sitting at Hobart, to enquire if it is intended to carry out the proposed reduction of postage from 5 cents to 3 cents, and to inform you of the objection of Australia to concur in the proposition.

P. O. FYSH, *Chairman.*

Reply.

Ottawa, 2nd April, 1898.

Hon. P. O. FYSH, Chairman.

Postal Conference, Hobart.

CANADA would welcome Inter-imperial uniform reduced preferential postal rates, but if that plan not approved of, hopes she may be allowed at her own expense to reduce her outgoing letter rate to all parts of Empire, conceding like freedom of action to all other portions of Empire. Having regard to Canada's geographical and commercial position, existing postal rates constitute serious grievance. Meantime Canada has suspended all action pending approaching Postal Conference at London.

WILLIAM MULLOCH, *Postmaster-General.*

Hon. JOHN GAVAN DUFFY moved,—

“ That the Conference go into Committee of the whole, to consider the Telegram from the Hon. Postmaster-General of Canada.”

Hon. J. R. DICKSON seconded.

Carried.

The Conference went into Committee accordingly.

After some time spent therein ;

The Conference resumed, and the President reported the following Resolution :—

“ That the various Agents-General, Delegates to the Postal Conference in London, be instructed to oppose the proposal to reduce the rate of postage to all parts of the British

Empire from $2\frac{1}{2}d.$ per $\frac{1}{2}$ oz. to $2d.$, and also the Canadian proposal to reduce her outgoing rate from 5 cents. per $\frac{1}{2}$ oz. to 3 cents. per oz., for the following reasons:—

1. The present rate is not an unreasonably high one, having in view the large cost to the Colonies involved in the maintenance of the present means of Postal communication with the various portions of the Empire.
2. Because of the anomaly which would be created by carrying letters 14,000 miles for the same rate as now charged for delivery within the limits of the Town where posted.

Regarding the proposal of Canada to reduce her outgoing postage, this Conference is strongly of opinion that no reduction should take place which would be a departure from the present uniform rate, for the following reason, *inter alia*, at present a charge of $2d.$ per half-ounce is made in Australia for the carriage of letters to however small a distance, while the Canadian proposal would involve the carrying of her letters over the same routes at a greatly reduced cost. This would, in the opinion of the Conference, lead to confusion and dissatisfaction.

Hon. JOSEPH COOK moved that the Resolution be agreed to.

Hon. J. GAVAN DUFFY seconded.

Carried.

Hon. J. GAVAN DUFFY moved,—

“That the following reply be forwarded to the Hon. Postmaster-General of Canada:—

‘It is satisfactory to learn that your contemplated reduction of Postal rates is suspended pending London Conference.’”

Hon. JOSEPH COOK seconded.

Carried.

Hon. J. G. JENKINS moved,—

“That a copy of the Resolution passed by the Conference be forwarded to the Premiers of each of the Colonies.”

Hon. J. GAVAN DUFFY seconded.

Carried.

At 12.50 the Conference adjourned until afternoon.

AFTERNOON SITTING.

The President took the Chair at 4.30 o'clock.

TELEGRAPHIC.—ALTERNATIVE CABLE ROUTE.

Hon. JOSEPH COOK moved for leave to move a Motion without notice.

This being granted;

Hon. JOSEPH COOK moved,—

“That, in the absence of any satisfactory proposal from the Eastern Extension Telegraph Company, and of any proposal at all except on the basis of an alternative cable *viâ* Africa, this Conference is unable to make any fresh arrangement with that Company.”

Hon. JOHN GAVAN DUFFY seconded.

After discussion,

The Motion was agreed to.

PACIFIC CABLE.

Hon. J. R. DICKSON obtained leave to propose a Motion without Notice, and moved,—

“That this Conference re-affirms the opinion that, in the interests of Australasia the Pacific Cable project should be consummated as speedily as practicable, and that the Governments of the various Australasian Colonies be requested to represent to the Imperial and Dominion Governments the foregoing opinion, together with the proposal of the Premiers as agreed to at their recent Conference held in Melbourne, viz.,—that if Great Britain and Canada would each contribute one third of the cost, the Colonies would be prepared to contribute the remaining third.”

Hon. J. GAVAN DUFFY seconded, and the Motion was carried.

OVERLAND TELEGRAPH LINES.

Hon. J. R. DICKSON moved,—

“That the question in reference to the overland Telegraph Lines between South Australia and Queensland be referred to the Governments of those Colonies.”

Hon. J. GAVAN DUFFY seconded.

After discussion,

The Motion was carried.

Hon. JOSEPH COOK, by leave, moved,—

“That this Conference has heard with satisfaction from the Representative of South Australia of the intention of the Government to take immediate steps for the improvement of the overland Telegraph Line, and urges him to impress upon his Government to lose no time in effecting the improvements suggested, and hopes the Western Australian Government will take similar steps with regard to their overland line.”

Hon. J. GAVAN DUFFY seconded the Motion, which was carried.

THANKS.

Hon. JOSEPH COOK moved a vote of thanks to the Hon. Sir Philip Fysh for the able manner in which he had presided over the proceedings of the Conference, and for the generous hospitality and kindness which he had extended to the Delegates.

Hon. J. G. JENKINS seconded the Motion, which was supported by Hon. J. Gavan Duffy and Hon. J. R. Dickson, and unanimously carried.

Hon. the PRESIDENT returned thanks for the compliment paid him, and expressed his pleasure at the opportunity of meeting the Ministers and Heads of Departments from the other Colonies.

Hon. JOSEPH COOK moved a vote of thanks to the Secretary, Mr. T. C. Just, for the able manner in which he had performed his duties as Secretary.

Hon. J. R. DICKSON seconded, and Hon. J. Gavan Duffy supported the Motion, which was carried unanimously.

Mr. JUST acknowledged the compliment.

Hon. JOSEPH COOK proposed a vote of thanks to the representatives of the Press, for the excellent and accurate reports which they had given of the proceedings of the Conference. He also moved that thanks be given to Mr. H. V. Bayly, Head of the Postal Department of Tasmania, for his courtesy and attention to the Delegates.

Hon. J. G. JENKINS seconded, and Hons. J. Gavan Duffy and J. R. Dickson supported the Motion, which was put and carried.

At 6.10 the Conference adjourned *sine die*.

P. O. FYSH, *President*.

THOS. C. JUST, *Secretary*.

AMENDMENTS OF POSTAL UNION CONVENTION, AND DETAILED REGULATIONS.

Washington Congress, 1897.

AMENDMENTS, &c. IN THE PRINCIPAL CONVENTION.

NOTE.—The country named in the margin designates the author of the amendment.

Articles 1, 2, 3.

Nil.

Article 4.

For Sea transits—

- (a) To the territorial transit rates if the voyage does not exceed 300 nautical miles. Nevertheless, the sea transit upon a voyage not exceeding 300 nautical miles is gratuitous if the Administration interested receives already on account of mails or correspondence conveyed the remuneration applicable to the territorial transit.
- (b) To 5 francs per kilogramme of letters and post-cards, and to 50 centimes per kilogramme of other articles for the exchanges effected upon a transit exceeding 300 nautical miles between European countries, between Europe and the Ports of Africa and Asia situated upon the Mediterranean Sea and the Black Sea, or from one to other of these ports, and between Europe and North America. The same rates are applicable to the transits assured throughout the Union between two ports of one state as well as between the ports of two states connected by the same line of vessels when the sea voyage does not exceed 1500 nautical miles.
- (c) To 15 francs per kilogramme of letters and post-cards, and to 1 franc per kilogramme of other articles for all transits not included in paragraphs *a* and *b*. In the case of sea transits effected by two or more Administrations the total cost of transit may not exceed 15 francs per kilogramme of letters and post-cards, and 1 franc per kilogramme of other articles. These costs are in such cases divided between the Administrations participating in the transport in proportion to the distance traversed, without prejudice to other arrangements which may exist between the parties interested.

Sec. 3,
Sub-sec. 2.
Adopted on
the recom-
mendation
of the sub-
committee.

The transit rates specified in the present Articles do not apply to the transits effected by services dependent on Administrations foreign to the Union, nor to transits within the Union by means of extraordinary services specially established or maintained by one Administration either in the interests or upon the request of one or several Administrations. The conditions of the latter class of transits are governed by common consent between the Administrations concerned. In addition, wherever the transit, territorial as well as nautical, is at present gratuitous or subject to more advantageous conditions, the present system is maintained.

Sec. 4.

It is, nevertheless, understood—

- (1.) That the territorial transit rates will be reduced as follows :—
- By 5 per cent. during the first two years of application of the present Convention.
 „ 10 „ during the two years following.
 „ 15 „ thereafter.
- (2.) That the countries whose receipts and expenditure in connection with the territorial transits do not together exceed the sum of 5000 francs per annum, and whose expenditure exceeds their receipts for this transit, are exonerated from all payments on this account.
- (3.) That the sea transit rate of 15 francs per kilogramme of letters and post-cards provided in Sub-section (c), Clause 3 preceding, will be reduced as follows :—
- To 14 francs during the first two years of the application of the present Convention,
 To 12 francs during the two years following.
 To 10 francs thereafter.

Sec. 5.

- Sec. 6. The expenses of transit are borne by the Administration of the country of origin.
- Sec. 7. The general accounting for these charges is effected under the conditions determined by the regulation of execution provided for in Article 20 hereafter.
- Sec. 8. *The Official Correspondence mentioned in Clause 2, Article 11.*—The reply halves of double post-cards returned to country of origin ; articles re-directed or missent ; undelivered articles ; acknowledgments of delivery ; Money Orders and all other documents relating to the Postal Service, are exempt from all charges for territorial or sea transit.

Article 5.

- Sec. 1,
Sub-sec. 2. For post-cards *in the case of prepayment*—To 10 centimes for single cards, or for each of the two halves of the reply card, and *to double that amount in the contrary case.*

(NOTE.—Unpaid or insufficiently paid cards were previously treated as unpaid or insufficiently prepaid letters.)

Add the paragraph :—

- Sec. 2,
Sub-sec. 2.
France. “When the postage of the single post-card includes one or other of the surcharges authorised by the two preceding paragraphs, the same postage is applicable to each half of the reply post-cards.”

- Sec. 5.
Bosnia-Herzegovina, Great Britain, Servia, and Switzerland. Substitute 350 grammes for 250 grammes maximum weight, and strike out all words after “diameter.”

Article 6.

- Sec. 3.
France. Substitute the words “at the time of posting” for “in advance,” and add to the section, “The same fee may be applied to requests for information as to the disposal of registered articles made subsequent to the posting if the sender has not already paid the special fee to obtain an acknowledgment of delivery.”

Article 7.

Add the following paragraph :—

- Sec. 1. “The maximum amount for trade charges is fixed at 1000 francs per packet, or the equivalent of that sum in the currency of the country of destination. It is optional with each Administration to decrease the maximum to 500 francs per packet, or to the equivalent of that sum in its monetary system.”

- Sec. 2.
Sweden. In the absence of other arrangements between the countries interested, the amount collected from the addressees, &c., &c., and add the following :—“The amount of a Money Order for trade charges being unclaimed, remains at the disposal of the Administration of the country of origin of the article marked with trade charges.”

- Sec. 3.
New France. The loss of a registered article marked with trade charges entails upon the Postal Service the responsibility fixed by Article 8 for registered articles. After delivery of the article the Administration of the country of destination is responsible for the amount of the trade charges, and must, in the event of application, be able to account to the sender of the packet for the sum collected, less the commission and charges provided by Clause 2.

Article 8.

- Sec. 2.
New Russia. Countries willing to accept the risks arising from cases beyond control are authorised to levy on that account a fee not exceeding 25 centimes for each registered article.

Add the following paragraph :—

- Sec. 3.
(2. Vienna.)
Russia. “In the event of the loss of a registered article sent by another country, under circumstances beyond control, upon the territory or in the service of a country willing to accept the risks mentioned in the preceding Section, the country in which the loss occurs is responsible to the office of origin, provided the latter, on its side, accepts the risks in circumstances beyond control with regard to its senders.

- Sec. 5.
(4. Vienna.) The payment of the indemnity by the despatching office must be effected as soon as possible and, at the latest, within a year of the date of application. The office responsible is bound to refund without delay to the despatching office the amount of the indemnity paid by the latter.

- Addition.
France. The office of origin is authorised to pay the sender at the charge of the intermediary office or the office of delivery, which, having been duly advised, has allowed a year to elapse without taking steps in the matter. In the case of an office whose responsibility is duly established and which at first declines payment of the indemnity, it should be charged in addition with the costs incurred in consequence of the unjustifiable delay in making payment.”

Article 9.

Nil.

45

Article 10.

Instead of Articles 5 and 6, read "By the various Articles of the present Convention."

Article 11.

Add the following paragraph :—

"The use of postage stamps issued with a special and particular end in view by the countries of issue, such as commemoration stamps with a transitory validity, is not permitted in the International Service." Sec. 1.
Germany.

Add the following :—

"Nevertheless, reply post-cards bearing postage stamps of the country in which these cards were issued, and the newspapers or packets of newspapers not provided with postage stamps, but which bear the superscription "Abonnements Poste" (Subscription Post), and which are sent under Article 19—"Arrangements for Subscription to Newspapers"—of the present Convention, are also considered as fully prepaid." Sec. 1.
Belgium.

Official correspondence relative to the Postal Service exchanged between Postal Administrations; between Administrations and the International Bureau, and between the Post Offices of the countries of the Union, are exempted from payment in ordinary postage stamps and from all liability to charge. Sec. 2.
Netherlands.

Articles 12, 13, 14, and 15.

Nil.

Article 16.

There shall not be forwarded commercial papers, printed papers, and samples, which do not comply with the conditions required for these classes of mail matter by Article 5 of the present Convention and Regulation 20. Sec. 1.
Belgium.

If occasion arise, these articles are returned to the country of origin and, if possible, to the sender. Sec. 2.
Belgium.

Add—

"Nevertheless, explosive, inflammable, or dangerous substances are not returned to the country of origin, but are destroyed on the spot by the Administration discovering their presence." Sec. 4.
Belgium.

Article 17.

(1.) The offices of the Union having relations with countries not adhering to the Union should lend their assistance to all other offices of the Union for the transmission of correspondence "à découvert" to or from the said countries. Substitute for
Article 17,
(Vienna)
France.

(2.) With regard to the costs of transit for correspondence of all kinds and the responsibility for registered articles, such correspondence is dealt with as follows :—

For transit within the Union in accordance with the stipulations of the present Convention.

For transit to the countries situated beyond the limits of the Union in accordance with the conditions notified by the Office of the Union acting as intermediary.

Nevertheless the costs of sea transit, whether in or beyond the Union, may not exceed 20 francs per kilogramme for letters and post-cards, and 1 franc per kilogramme for other articles. These charges are divided between the offices assisting in the sea transit in proportion to the distance traversed.

The costs of transit of correspondence by sea or land, either within or beyond the limits of the Union, are ascertained in the same manner as the costs of transit of correspondence exchanged between countries of the Union.

(3.) The costs of transit of correspondence addressed to countries not adhering to the Union are charged to the office of origin which fixes the rates of postage for such correspondence. These rates may not be lower than the nominal rate of the Union.

(4.) The costs of transit for correspondence originating in countries not adhering to the Union are not charged to the country of destination. That office distributes without surcharge such correspondence as may be sent to it as fully prepaid; it taxes the unpaid correspondence with double the rate applicable in its own service to similar articles addressed to the country whence the said correspondence originates, and the insufficiently paid correspondence to double the deficiency; but the tax may not exceed that which is collected upon unpaid correspondence of the same nature, weight, and origin.

(5.) The correspondence despatched from a country of the Union to a country foreign to the Union, and *vice versa*, through the intermediary of an office of the Union, may be transmitted on either side in closed mails, if this mode of transmission be agreed to by offices of destination and origin of the mails with the consent of the intermediary office.

Articles 18, 19, and 20.

Nil.

46

Article 21.

Sec. 2. It does not restrict the rights of contracting parties to maintain and conclude treaties, as well as to establish and maintain more restricted Unions *with a view to the reduction of rates or any other improvement of postal relations.*

*Articles 22, 23, 24, 25.**Nil.**Article 26.*

Add the following :—

Sec. 1. "In order to be submitted for discussion, each proposal must be supported by at least two Administrations in addition to that from which the proposal emanates. When the International Bureau does not receive, at the same time as the proposal, the necessary number of declarations of support, no further action shall be taken."

Austria-Hungary.

Sec. 2. Amendments are not admitted.

Switzerland.

Sec. 3. 27th, 28th, and 29th Articles have been added to the list of those which may be modified on unanimity of votes.

France.

Sec. 5. Three months inserted in place of two months.

Japan

Article 27.

Re-arranged.

Final Protocol.

The British Government has ceded to the South African Colonies and Protectorates the vote allotted to the whole of the other British Colonies by Section 5, Article 27.

DETAILED REGULATIONS FOR THE EXECUTION OF THE PRINCIPAL CONVENTION.

In accordance with the suggestion of France, the articles have been re-arranged. The numbers in Roman numerals indicate the Articles in the Vienna Convention Regulations.

*Articles 1. 2. 3.**Nil.**Article 4.*

Fixing Rates of Postage, IV.

Sec. 2. The words "or of important alterations in the value of the money," have been inserted after the words above-mentioned.

Great Britain.

Great Britain and Switzerland. Section 3 of the Vienna Regulations has been struck out.

land.

Article 5.

Exceptions in the matter of weight, XXVIII.

*Nil.**Article 6.*

Postage stamps (new Article.)

Austria-Hungary. (1.) The postage stamps representing the postage rates of the Union, or their equivalent in the currency of each country, are printed as far as possible in the following colours :—

Stamps of 25 centimes ($2\frac{1}{2}d.$) in dark blue.

" " 10 " ($1d.$) in red.

" " 5 " ($\frac{1}{2}d.$) in green.

(2.) Postage stamps must bear upon their face the inscription of the value they actually represent for the payment of postage on correspondence according to the table of equivalents inserted in Article 4 preceding.

47

Article 7.

Correspondence with countries foreign to the Union, V.

The offices of the Union which have relations with countries foreign to the Union furnish France. the other offices of the Union with a list of such countries, with the following information :—

- (1.) Cost of sea or land transit applicable to the conveyance of mails beyond the limits of the Union.
- (2.) Description of correspondence admitted.
- (3.) Whether prepayment of postage be compulsory or optional.
- (4.) Limit for each class of correspondence, and validity of postage collected (to destination or to port of discharge.)
- (5.) Extent of pecuniary responsibility with regard to registered articles.
- (6.) Possibility of admitting acknowledgments of delivery.
- (7.) As far as possible the rates of postage in force in the Countries beyond the Union in comparison with the Countries of the Union.

Article 8.

Application of the Stamps, VI.

The stamping of correspondence posted on packets in the moveable boxes or in the hands of Commanders devolves, in the cases contemplated by Article II., Section 3, of the Convention, upon the Postal Agent on board, or, if there be none, upon the Post Office to which the correspondence is delivered; in the latter case the Office impresses the correspondence with its ordinary date-stamp, and adds the remark "Packet" by means of a stamp or label. Sec. 3. France.

Postage stamps not obliterated through fault or omission in the service of origin must be cancelled in the usual manner by the Office which discovers the irregularity. New Sec. (8.) Switzerland.

Article 9.

Indication of the number of Rates, VII.

The words "wholly unpaid or insufficiently prepaid" have been inserted after "correspondence." Sec. 1. Egypt.

Article 10.

Insufficient prepayment, VIII.

Nil.

Article 11.

Stipulations respecting registered articles, XV.

Add the following paragraph :—

"It is however absolutely necessary to indicate each registered article by an ordinal number. If the regulations of a re-despatching office require the indication of registered articles by a new ordinal number, that office must strike out the original number, but in such a manner that it shall not be rendered illegible." Sec. 3. Austria-Hungary.

Section 4. Vienna Regulations struck out.

After "report the case," insert the words "by verification certificate to the administration to which the office of origin is subordinate. The certificate must state, very exactly, the office of origin, the date of posting, and the number of the article." Germany, Belgium, France, and Sweden.

This condition is not applicable to registered articles which, through re-direction, become subject to increased postage. These latter articles are dealt with as required by Section 2, Article 25 of the present regulations. Sec. 4. (Washington.) Belgium.

Article 12.

Indemnity for the loss of registered article, XII.

Nil.

Article 13.

Acknowledgments of delivery of registered articles, IX.

They are accompanied by a form in conformity to Model B. annexed hereto. This form is prepared by the office of origin, or by another office designated by the despatching office, and attached by a piece of string to the article to which it relates. If it fails to reach the office of destination, the latter prepares a new acknowledgment of delivery. Sec. 2. Belgium.

Acknowledgments of delivery must be formulated in French, or bear a sublineary translation in that language.

Sec. 3.
France.

The office of destination, after having duly completed the Form B, returns it in an envelope officially registered to the office of origin.

Sec. 4.
France.

When the sender of a registered article demands an acknowledgment of delivery subsequent to the posting of such article, the office of origin reproduces upon a Form B., to which a stamp representing the fee for an acknowledgment of delivery has been affixed, an accurate description of the registered article (nature of the article, office of origin, date of posting, number, and superscription). This form is transmitted from Administration to Administration with the indication of the mail in which the article sought for has been delivered to the service of exchange from the office corresponding therewith. The office of destination completes the form and returns it to the office of origin, as prescribed by Section 3 preceding.

Sec. 5.
France.

If an acknowledgment of delivery regularly demanded by the sender at the time of posting be not delivered to the office of origin after a reasonable period has elapsed, application may be instituted for the missing acknowledgment in accordance with the rules outlined in Section 4 preceding. Nevertheless, in the latter case, instead of affixing a postage stamp to the Form B., the office of origin writes at the head of the form the inscription, "Application for acknowledgment of delivery."

Article 14.

Registered articles marked with trade charges (new).

Such articles are not accepted by Australian Administrations.

Article 15.

Post-cards, XVI.

Sec. 1.
France.

Post cards must be sent unenclosed, and must bear at the top of the address side the title *Carte Postale* clearly expressed in French, or with a sublineary translation in that language. This title is followed as far as possible by the words—

{ Union Postal Universelle	Côté réservé à l'adresse	}
{ Universal Postal Union	This side reserved for the address	}

The remainder of the face is reserved for the postage stamps, for indications relating to the Postal Service (registered, acknowledgment of delivery, &c.), and for the address, which may be written in manuscript, or be shown upon a gummed label not exceeding 2 centimetres by 5. ($\frac{3}{4}$ by 2 inches.)

When the sender uses an inland post-card for foreign service, this card is forwarded, provided it bears the printed or written title, "*Carte Postale*," or the equivalent of this title in the language of the country of origin.

In addition, the sender has the right to indicate on the face his name and address, either by means of a stamp, an autograph stamp, or other typographical process.

Switzerland.

Engravings or advertisements may be printed on the face. Nevertheless, they may in no way interfere with the clear indication of the address, as well as the affixing of stamps and notices of the Postal Service.

It is forbidden to join to or attach anything whatever to post-cards except the postage stamps and labels mentioned in the first Section and in Section 4 of the present Article.

Sec. 2.

Post-cards may not exceed the following dimensions:—Length, 14 centimetres, ($5\frac{1}{2}$ inches), width, 9 centimetres ($3\frac{1}{2}$ inches).

Sec. 3.

Reply-paid post-cards must bear on the address side of the first half the title, "*Post Card, Reply Paid*," and on the second half, "*Post Card Reply*." Each of the two halves must comply with the conditions required for the single card; they are folded one upon the other, and may not be closed by any means whatever.

Sec. 4.

The sender of a reply-paid post-card is permitted to indicate his name and address on the face of the "*reply half*," either in manuscript or by affixing a label thereon.

Sec. 5.

The prepayment of the reply half by means of the postage stamps of the country which has issued the card is valid only if the two halves of the reply-paid card are received attached from the country of origin, and if the reply half is dispatched to the destination of that country. In the contrary case it is treated as an unpaid card.

Sec. 6.

Post-cards, both single and reply paid, emanating from private industry are admitted to international circulation if agreeable to the laws of the country of origin, and provided that they fulfil the conditions imposed by the present Article for admission at the reduced tariff in the exchanges from country to country for the post-cards issued by the Postal Administrations, and that they be in conformity with the post-cards issued by the office of origin, at all events in regard to size and substance of paper.

Sec. 7.

Post-cards not fulfilling, as to prescribed indications, dimensions, external form, &c., the conditions laid down by the present article for this class of correspondence, are treated as letters.

New paragraph.
Austria.

Nevertheless, post-cards originally addressed to the inland service of the country of origin, and redirected to another country, are admitted to the benefits of the reduced rates, if they comply with the conditions laid down for the circulation of post-cards to the interior of the country of origin, and do not exceed the dimensions fixed by Section 2 preceding.

49

Article 16.

Commercial Papers, XVII.

Completed by adding :—

“The corrected exercises of students, comment on the work is forbidden.”

Sec. 1.
France.

Article 17.

Samples, XIX.

Articles made of glass, liquids, oils, fatty substances, dry powders, whether dyes or not, as well as packets containing live bees, are admitted for transmission as samples of merchandise, provided that they be packed in the following manner :—

Sec. 4,
Sub-sec. 1.
Germany.

(1.) Articles made of glass must be packed solidly in boxes of metal, wood, leather, or cardboard, in such a manner as to prevent danger to correspondence and to the employee.

Completed by adding :—

“When perforated blocks of wood, lined with absorbent substances and furnished with a lid, are used having at least a thickness of $\frac{1}{10}$ th of an inch in the weakest part, it is unnecessary that such blocks be enclosed in a second box.

Sub-sec. 2.
France.

Objects of natural history, animals, and dried or preserved plants, geological specimens, &c., not sent with a commercial end in view, and the packing of which conforms with the general conditions respecting samples of merchandise, are also admitted to the rates of postage for samples.”

Sec. 5.
Belgium and
Switzerland.

Article 18.

Printed papers of every kind, XVIII.

After “photographs,” add “albums containing photographs.”

Sec. 1.
Great Britain.

Second paragraph commences “Reproductions of type copy made in manuscript or by the typewriter when obtained by a mechanical process such as poligraphy, chromography, &c., &c., are assimilated to printed matter, but in order to pass at the reduced rate of postage they must be brought to the Post Office counter and must number at least twenty copies precisely identical.

Printed papers of which the text has been altered after printing either by hand or by a mechanical process, or bears any mark whatever capable of constituting a *Conventional Language*, cannot be sent at the reduced rate.

Sec. 3.

To add in manuscript on printed visiting cards, the address of the sender and his title, *as well as wishes, congratulations, thanks, compliments of condolence* or other forms of *politeness expressed* in five words at most or by *means of conventional initials*, (p.f. &c.)

Sec. 4,
Sub-sec. b.
Egypt.

To make prominent by means of marks and by *underlining words or passages of the text* to which it is desired to draw attention.

Sub-sec. g.
Russia.

To insert or correct, in manuscript or by mechanical process, the figures in prices current, *tenders for advertisements, stock and share lists, trade circulars and prospectuses*, as well as the name of *the traveller*, the date and the locality which he intends visiting, on traveller's cards.

Sub-sec. h.
Switzerland
and Great
Britain.

After “engravings,” insert “Christmas and New Year cards.”

Sub-sec. l.

After “requisitions,” insert “*or subscriptions relative to works of the Library*” (books, newspapers, engravings, &c.)

Sub-sec. m.

Commences “Save the exceptions explicitly authorised by the present article, additions made in manuscript, &c.”

Sec. 5.

Article 19.

Articles grouped together, XX.

Article 20.

Letter Bills, X.

(1.) Letter Bills which accompany the mails exchanged between two Administrations of the Union are prepared in accordance with Model C. annexed hereto. They are placed in coloured envelopes bearing distinctly the indications “*Feuille d'Avis*,” (Letter Bill.)

Re-drafted as
suggested by
France.

(2.) The number of bags or packages composing the mail is entered in the right-hand upper corner of the Letter Bill relating thereto, if necessary.

Excepting arrangements to the contrary in the cases of exchanges by sea, which, although periodical and regular, are not daily or on fixed days, the despatching offices must number the Letter Bills on the left-hand upper corner in an annual series for each office of origin and for each office of destination, mentioning, when possible, above the number, the name of the vessel by which the mail is conveyed.

(3.) The total number of registered articles, of packages or bags containing such articles, of loose registered articles, and of articles for express delivery, distinguishing among the latter the registered articles, if any, must be entered at the head of the Letter Bill.

(4.) The registered articles are entered separately in the first column of the Letter Bill, with the following details :—The name of the office of origin, and the registered number of that office, the name of the addressee, and the place of destination.

In the column "Observations" is added the letters AR for such articles for which acknowledgments of delivery are required. In the same column the abbreviation "Remb." followed by the indication in figures of the amount to be collected, is added against the entry of articles inscribed with trade charges. The returned acknowledgments of delivery are entered in the Table referred to, either separately or collectively, according as these acknowledgments may be more or less numerous.

(5.) When the number of registered articles despatched habitually from one office of exchange to another renders it desirable, special and detached lists must be used in place of Table I. of the Letter Bill.

The number of registered articles entered on these Lists, and the number of packages or bags enclosing such articles, must be entered on the Letter Bill.

(6.) The closed mails included in the despatches to which the Letter Bill directly relates are entered in Table 2, with the details that this Table requires.

(7.) Under the heading "Recommendations d'Office" (Official Registrations) are entered the letters on open service, the various applications or communications from the despatching office having reference to the service of exchange, *as well as the number of empty bags returned.*

(8.) When it is considered necessary in certain cases to create other tables or headings upon the Letter Bill, these may be arranged by common consent between the Administrations interested.

(9.) When an office of exchange has no correspondence to forward to an office corresponding therewith, it must at least send in the ordinary way a mail composed solely of the Letter Bill.

(10.) When closed mails are confided by one Administration to another in order to be transmitted by merchant vessels, the number or weight of the letters and other articles must be indicated on the Letter Bill, *and upon the address* of the mails, when the office charged with the embarkation of the mails demands it.

Article 21.

Transmission of registered Correspondence, XI.

Sec. 1. Registered articles, acknowledgments of delivery, articles for express delivery, and if there be any, the special lists provided by *Section 5, Article 20*, are collected *in one or more separate packages or bags, which must be suitably wrapped or enclosed and sealed in* a manner to preserve their contents. Registered articles are made up in each package following the order of their entry. When several detached lists are used each of them is inserted in the package to which it relates.

Sec. 2. The special envelope containing the letter bill is attached with string tied across and across to the outside of the package of registered articles. The package is then placed in the centre of the mail.

Article 22.

Making up Mails, XIII.

Sec. 1. Completed by the addition of the following paragraph :—

Austria. "Letters bearing traces of having been opened or damaged must be endorsed to that effect, and impressed with the date-stamp of the office which discovers the fault."

Article 23.

Verification of Mails, XIV.

Completed by adding the following paragraphs :—

Sec. 6. "At the same time a duplicate of the verification certificate is sent by the receiving office to the Administration to which the despatching office is subordinate."

Switzerland. "Upon recovery of a mail, failure of which has been reported to the office of origin, or to an intermediary office, a second verification certificate must be sent to such office advising the subsequent receipt of the mail."

France. The words "to the despatching office by the first mail after verification," have been inserted in place of "by the first mail to the despatching office a verification certificate."

Section 8. Great Britain.

Article 24.

Mails exchanged with ships of war, XXVI.

Sec. 3. When mails addressed to a naval division or to a man-of-war are despatched unenclosed, the captain of the postal packet conveying such mails holds them at the disposal of the Commander of the division or man-of-war to which they are addressed, in case that officer may demand delivery *en route.*

Completed by new paragraph. Section 7 of the Vienna Convention struck out.

Article 25.

Re-directed Correspondence, XXI.

With regard either to inland letters or packets of one country of the Union which enter, in consequence of re-direction, into the service of another country of the Union, and to letters and packets addressed from one country of the Union to another country of the Union which have adopted in their reciprocal relations a lower tariff than the ordinary Union rates, but entering, in consequence of re-direction, into the service of a third country of the Union whose rates are the ordinary Union rates, or of articles exchanged for their first transit between the localities of two neighbouring services for which a reduced tariff exists, but re-directed to other localities of these countries of the Union, or to another country of the Union, the following rules are observed:—

Sec. 2.
Denmark.

Articles unpaid or insufficiently paid for their first transmission are impressed by the delivering office with the tax applicable to articles of the same nature addressed directly from the place of origin to the new destination.

Sub-sec. 1.

Article 26.

Undelivered Correspondence, XXII.

If correspondence, posted in a country of the Union, and addressed to the interior service of that country, has for senders persons residing in another country, and which, through non-delivery, must be forwarded to another country to be returned to the senders, such articles become correspondence of International exchange. In such cases the re-directing office and the delivering office deal with the said correspondence in accordance with the stipulations of Sections 2 and 3 of Article 25 preceding.

Sec. 5
New.
France.

Correspondence for sailors and other persons addressed to the care of the Consul and returned by him to the local post office as unclaimed, must be dealt with as prescribed by Section 1 for unclaimed correspondence in general. The sums collected from the Consul for deficient postage, &c., must at the same time be refunded to him by the local post office.

Sec. 6.
New.
Great Britain.

Article 27.

Applications for ordinary articles which have failed to reach destination, XXIX.

Every Administration may demand by a notification, addressed to the International Bureau, that the applications which concern its service may be transmitted to its Central Administration or to an office specially designated by it.

Sec. 2.
Austria-
Hungary

Article 28.

Applications relative to registered articles. New Article (Austria-Hungary).

(1.) A form similar to the model E. annexed hereto is used for applications relative to registered articles. The office of origin, after having filled in the date of despatch of the article in question, transmits the form direct to the office of destination.

(2.) When the office of destination is able to furnish information as to the final disposal of the article for which application is made, it returns the form, duly filled in with the required information, to the office of origin.

(3.) When the disposal of an article which has passed à découvert through several services cannot be immediately proved in the service of the country of destination, the office of destination transmits the form to the first intermediary office, which, after filling in the particulars of transmission to the service following, forwards the application to the succeeding office, and so on, until the final disposal of the article applied for be established. The office which has effected delivery to the addressee, or, on the other hand, can neither prove delivery to the addressee nor the regular transmission to another Administration, states the fact upon the form, and returns it to the office of origin.

(4.) The form F. is drawn up in French, or bears a sublineary translation in that language. They are despatched without certificate under closed envelope, and submitted to the formality of registration. Each Administration is at liberty to demand, by a notification addressed to the International Bureau, that the applications concerning its service may be sent to its Central Administration, or to an office specially appointed, directly to the office of destination, or, if it be only interested as an intermediary office, to the office of exchange to which the article has been despatched.

(5.) The preceding stipulations do not apply to cases of robbery or loss of mails, &c., which require more extensive correspondence between the Administrations concerned.

Article 29.

Withdrawal of Correspondence and Correction of Addresses, XXX.

Recourse to the telegraph is compulsory when the sender has made use of this means of correspondence and the office of destination cannot be advised in time to be of service by post.

Article 31.

Transit Charges, XXIII.

Article amended to conform to Sec. 3, Article 4, of the principal Convention.

The statistics taken in the month of May, 1896, on account of transit charges will be maintained as the basis for such accounts until the expiration of the Convention of the 15th June, 1897, and of the present Regulations, subject to the reserves stipulated in Sections 2 and 3 following:—

- (2.) In the event of the accession to the Union of a country having important relations, the countries of the Union of which the situation may, as a result of this circumstance, find themselves modified in connection with the payment of transit charges, have the option of claiming special statistics dealing exclusively with the country which has lately entered.
- (3.) When an important alteration in the movement of correspondence arises, and provided that this alteration affects a period of at least Six months, the offices interested determine between them according to the new statistics the division of the transit charges in proportion to the part taken by the said offices in the conveyance of correspondence to which the charges relate.
- (4.) The simple storing in a port of closed mails conveyed by a packet and intended to be again conveyed by another packet does not give rise to the payment of territorial transit charges to the profit of the Post Office storing such mails.

Article 32.

NOTE.—Article 24, Vienna Convention has been divided into two parts; the present article deals with the preparation of Accounts, and the following Article (33) with the settlement of Accounts.

With a view to enforcing the stipulations of Sub-sections 1, 2, of Section 5, Article 4, of the principal Convention—

- (a) Each Administration of the Union transmits to the International Bureau, upon a form *ad hoc*, that the latter will have supplied a statement of the sums to be paid or received, calculated upon the basis of the statistics for 1896, by each of the corresponding Administrations, on account of territorial transit, excluding the extraordinary transit charges provided by Section 4, Article 4, of the Convention, and not including the reductions provided by Section 5; Sub-section 1, of the same Article 4.
- (b) In case of difference between the corresponding indications of two Administrations, the International Bureau invites them to agree, and to communicate to it the sums definitely fixed.
- (c) If one of the corresponding Administrations has not furnished the statement within the period determined by the International Bureau, the statement of the other Administration is accepted.
- (d) No objections are admitted on the part of Administrations which have not furnished the statement above required within the period determined by the International Bureau.
- (e) The International Bureau designates, upon the basis of the statistics of 1896, the countries to be exonerated from all payments on account of land transit until the expiration of the Washington Convention and of the present regulations; states the total of the sums that these countries would have to pay, and makes the proportional deduction from the total of gross credits of the other countries relating to this transit. It effects, in the second place, the reduction determined, Sect. 5, Sub-sect. 1, of Article 4 of the Convention, and transmits the actual results to all the Administrations, indicating for each of them the amount of its debit or credit with regard to each of the other Administrations interested.

(2.) The duty of preparing the accounts for sea transit, upon the basis of Articles 4 and 17 of the principal Convention, and with the reductions provided by Sub-section 3 of Sect. 5 of the first of these Articles, devolves upon the office to which payment is due, which transmits them to the indebted office. The latter office returns them accepted or with its remarks with the least possible delay. If the accounts be not returned within a period of six months they will be settled in accordance with the statements of the crediting office.

Article 33.

Settlement of Transit Charges.

(1.) The annual balance, which results from balancing the reciprocal accounts between two offices, is made in hard cash (francs) by the indebted office to the office to which payment is due by means of bills drawn upon a place in the creditor country, at the option of the indebted office. The

53

costs of payment, including the discount charges, when there happen to be any, are borne by the indebted office.

The payment of transit accounts relating to a period of service must be effected with the least possible delay, and at the latest before the expiration of the first half-year of the following period. In any case, if the office which has sent the account has not received during that period a corrected statement, the account is considered as accepted. This stipulation applies also to uncontested observations made by one office upon the accounts of another office. Sec. 2.

After the expiration of six months the amounts due by one office to another are subject to interest at the rate of 5 per cent. per annum, dating from the expiration of the period referred to.

Nevertheless, it is reserved to offices interested to make, by common consent, other arrangements than those stipulated in the present article. Sec. 3.

Article 34.

Division of Expenses of the International Bureau, XXXII.

The French Colonies and Protectorates of Indo-China have been included in the 3rd class.

The Major Republic of Central America, and the German Protectorates have been added to the 6th class.

NOTE.—Since the Washington Congress the Administration of Japan has applied to be regarded as a country of the 1st class.

Article 35.

Communications to be addressed to the International Bureau, XXXIII.

Five complete sets of their postage stamps indicating, if necessary, the date from which the postage stamps of previous issues will cease to be valid. Sec. 2,
Sub-sec. 2.

Any moderation of taxes adopted, whether by virtue of special arrangements concluded by the application of Article 21 of the Convention, or in execution of Article 20 of the Convention, with the particulars of the circumstances under which the amended taxes are applicable. Sub-sec. 4.

Sec. 6.
Japan.

Article 38.

Central office of accounting and liquidation of Accounts between the Administrations of the Union, XXXVI.

After having checked and accepted the special accounts for each nature of operations, the debiting Administrations transmit to the crediting Administrations an acknowledgment, made out in francs and centimes, of the amount of the balance of the two special accounts, indicating the object of the credit and the period to which it relates. Nevertheless, so far as the exchange of Money Orders is concerned, the acknowledgment must be transmitted by the debiting office on the settlement of its own special account, and on receipt of the special account of the corresponding office, not awaiting the result of detailed verification. Any differences subsequently found are entered in the first account to intervene. Excepting contrary arrangements, the Administration which desires to have general accounts for its interior accounts will have to prepare them itself, and submit them for the acceptance of the corresponding Administrations. Sec. 2.

The payment of sums due by one Administration to another on account of liquidation must be effected as soon as possible, at the latest fifteen days after receipt of the statement by the debiting Administration. Sec. 7.

*Post and Telegraph Department,
Hobart,
1st April, 1898.*

REPORT BY PERMANENT HEADS OF DEPARTMENTS.

Postal Conference, Hobart, 30th March, 1898.

IN pursuance of the instructions of the Honourable the Delegates assembled in Conference, we have carefully considered the questions remitted to us, and have to report as follows:—

Nos. 3 and 4.—“Adoption of uniform Letter Bills, and furnishing Statistics of Inter-colonial Correspondence.”—“Adoption of uniform Letter Bills for Mails exchanged between (a) the Principal Offices of the Australasian Colonies, and (b) Border Post Offices.”

Recommended, That the Letter Bills as prepared by New South Wales, at the request of previous Conferences, be adopted, and that, during the months of May and November in each year, the number of letters, packets, and newspapers contained in mails be stated on Letter Bills for statistical purposes.

No. 5.—“Australian Mails Way-Bill.”

No report. Can be dealt with departmentally.

No. 6.—“Reply Postage Stamp—(a) Merridew’s Scheme; (b) Maury’s Scheme.”

It would be impossible to introduce the universal use of the Reply Postage Stamp without interfering more or less with the postal revenue of the countries concerned, and we therefore cannot advise adoption of either scheme.

No. 7.—“The use of the ‘Paid-at’ Stamp on Correspondence on which postage has been paid in cash.”

Recommended, That cash payment be accepted for *all* classes of mail matter over the value of £1, posted at one and the same time, but that the “Paid Stamp” shall indicate the postage paid for each article. The Offices authorised to accept cash payment to be determined by each respective Administration.

No. 8.—“Inland Postage Rates, Local Delivery.”

No report. The Postmaster-General, South Australia, suggests that where 1*d.* postage is introduced it should be restricted to letters posted in a town for delivery in the same town. This system already obtains in Queensland and Tasmania.

Nos. 9 and 10.—“Rates of Postage levied by Fiji on Patterns and Samples and on Newspapers”—“*Re* Berne Bureau questioning the rates charged by the Australasian Colonies on International (a) Patterns, and Samples, and (b) Newspapers.”

As our rates of postage on patterns and samples and newspapers are in strict conformity with Article 5 of the Vienna Convention, and Fiji is charging similar rates, the objections raised by Berne to the rates of Fiji are not supported by the Convention. Should the Berne contention be upheld it would involve the rates in all the Colonies being raised, in the case of packets, from 1*d.* to 1½*d.* for two ounces.

No. 11.—“Samples of Glass, &c.—*vide* London Letter, dated 21st January, 1898.”

Hitherto it has been the practice of the Australasian Colonies to permit “Queen bees, and live but harmless entomological specimens,” as well as glassware—provided such articles be properly and securely packed—to be transmitted by sample post within the Colonies and to any other country or colony where allowed by the local regulations; but the Colonies have refused to transmit by sample post packets of liquids, oils, fatty substances, dry powders (whether

dyes or not). However, from the 1st January, 1899, the transmission of the whole of the above-mentioned articles by sample post will be obligatory between union countries under the Washington Congress.

The London Office has now written to say that the Postmaster-General is willing to allow samples of glass, liquids, greases, and colouring powders (but apparently not live bees) to pass in the mails exchanged between the Australian Colonies and the United Kingdom after the 1st March, 1898, the date from which they will be allowed to pass in the inland postal service of the United Kingdom, and that Office desires to be informed whether the Colonies will agree to such exchange.

The transmission of the articles mentioned will be governed by the provisions of the Postal Union Regulations, and the limits of size and weight will be those already applicable to samples exchanged between the Australian Colonies and the United Kingdom—viz., 2 feet in length by 1 foot in width and depth, and 1 lb. in weight.

As the transmission of the articles referred to by sample post will be compulsory from the 1st January, 1899, there would not seem to be any objection to the exchange with the United Kingdom taking place from the 1st July next.

No. 12.—“The Postage to be charged on obliterated stamps and spent letters.”

Recommended, That obliterated stamps and spent letters be sent at Commercial Paper Rates within the Colonies, subject to usual packet Regulations, but this cannot be done internationally, as the Rules of the Universal Postal Union Convention require letter rate to be paid.

No. 13.—“Bankers' Parcels : need for strictly enforcing Regulations relating thereto.”

We advise that intercolonially the following existing Regulation be in future strictly adhered to :—

Bankers' packets (*i.e.*, packets sent from one bank to another), containing bank-notes, cheques, cheque-books, drafts or orders, provided they are enclosed in covers with the ends sufficiently open to admit of postal officials seeing that they contain nothing in the nature of a letter. Though not compulsory, it is strongly recommended that bank-notes should be registered. They must be registered if addressed to another Australian Colony, and cannot be forwarded at packet rates to the United Kingdom, West Australia, New Zealand, or any other country.

Bank passbooks may be sent from or to any bank at packet rates, provided they are enclosed in covers with the ends sufficiently open to admit of postal officials seeing that “passbooks” only are being transmitted. Every such packet must be endorsed “Passbook only.”

No. 14.—“The Intercolonial Packet Post to be limited to articles of no commercial or saleable value.”

We consider that the present Regulations which admit of small packets of merchandise not exceeding 1 pound in weight being exchanged with all Colonies except Queensland, at packet rate of 1*d.* per 2 ounces should be adhered to, and, if possible, be extended to Queensland; that Colony however objects to merchandise being sent by packet post.

No. 15.—“Practice of taxing ‘officially’ or ‘compulsorily’ registered International correspondence supposed to contain money or other valuable enclosure.”

The Postal Laws of the Colonies provide for compulsory registration of letters containing valuable enclosures. Under the Universal Postal Union, however, it is not permissible to send coin, bullion, &c., and the principle of compulsory or official registration is not recognised under the Convention. The practice of compulsorily registering letters to Great Britain containing coin or bank notes has, however, been in operation for some time past in most of the Colonies, and, until recently, accepted by the London Post Office. We consider that, in the case of letters containing valuable enclosures posted in the ordinary way, it is more desirable in every respect to send them on charged with registration fee than to send them forward unregistered. We advise that the London Office be communicated with, and invited to accept such correspondence in future as they have done in the past, and collect the registration fee on delivery.

No. 16.—“Proposed Amendment of Article 12 of the Australasian Postal Convention so far as it relates to Travellers' Cards or Circulars.”

Under Article 12 of the Australasian Postal Convention appears the following paragraph :—

“Cards, Travellers' Cards, or Circulars may be sent at Packet rates, and, if necessary, may include a catalogue or list of prices. They may also bear the date and name of the traveller.”

We recommend that the following words be added—“the date of sending and the date of intended visit of the traveller, also the time of departure of train or steamer, and name of latter by which the goods are forwarded.”

No. 17.—“Permission to Commercial Travellers to post letters on trains without affixing Late fee.”

We consider this matter should be left to each Administration to act for itself. It is in operation in Victoria and New South Wales, whilst in Tasmania no Late fees are charged.

No. 18.—“Grocers’ Price Lists, Postage on.”

Two articles were submitted by South Australia with a view to obtaining an opinion generally as to whether those and publications of a like character should be considered as newspapers. We are of opinion that one of the articles is inadmissible as a newspaper, but only for the reason that it is not fully dated as the Regulations require, and that the second one is entitled to pass as a newspaper.

No. 19.—“Proxy Forms or Notices : Postage on.”

We consider that these may pass at Packet rate of postage.

No. 20.—“Circulars’ Postage.”

No report.

No. 22.—“Proposal to prohibit the enclosure of articles of a monetary denomination in parcels and packets.”

We think it most undesirable that Postal Notes, Money Orders, and Cheques should be transmitted through the post as packets, or enclosed in packets or parcels, but should be sent separately at the Letter rate of postage. (This of course does not apply to the special concessions in regard to Bankers’ parcels.)

No. 23.—“Rates levied by the respective Australasian Colonies on ‘Loose Ship Letters.’”

Recommended, That in the case of loose letters received in one Colony from another by sea, a late fee of 2*d.* each be levied on delivery in addition to the ordinary postage paid upon them, and double the deficiency where the ordinary postage is insufficiently prepaid.

No. 25.—“Transmission of Promissory Notes, Circulars, and other printed matter with Accounts.”

We consider that Promissory Notes signed or unsigned, Circulars, and other printed matter are entitled to be enclosed with Accounts and Packet rates levied on the whole packet.

No. 26.—“Printed communications, as footnotes on Invoices, Accounts, &c.”

We recommend the adoption of the following amended Regulations dealing with Accounts and Invoices :—“Accounts and Invoices, receipted or unreceipted, the remark, “With thanks” will be allowed, but either printed or written communications in the nature of a letter or of the character of actual or personal correspondence, by code or otherwise, are chargeable as letters. Invoices may be receipted, and may advise when or how the goods are forwarded, but may contain no other written matter, nor anything in the nature of actual or personal correspondence by code or otherwise. They may, however, bear the following trade notices, whether printed or impressed with a rubber or other stamp :—“All empties returned must be advised ;” “When remitting, please return the statement to be receipted ;” “Terms, cash in advance ;” “Terms, 2½ per cent. discount for cash ;” “This settles your account up to date ;” “Cheque will oblige.” Anything, however, of a general character printed in ordinary type may be enclosed with accounts, provided it is not of the nature of a personal correspondence.”

No. 27.—“Redirection Charges.”

We report that all the Colonies, with the exception of Queensland, make no charge for redirection fee. Queensland, under Section 15, Post Office Act, 1891, charges a redirection fee, but this fee is not collected by the other Colonies.

No. 30.—“Applications *re* embossing combined sheet of note-paper and envelope.”

In the opinion of this Committee there is no objection to applications being granted with regard to impressing stamps on the combined sheet of note-paper and envelope, on the following conditions :—

1. Not fewer than 500 envelopes of any one size to be received at any time.
2. Coloured envelopes not to be received for stamping.
3. Envelopes which are too thin to bear the impression of the die not to be received.
4. Envelopes provided by the Post Office Department with the proper stamp thereon to be substituted for any which may be spoiled in the operation of stamping.
5. A charge of 2*s.* per 1000 to be made for stamping.

The present practice in the different Colonies is as follows :—No charge is made in New South Wales and Tasmania, 3s. per 1000 is charged in Queensland, 2s. in Victoria; South Australia not undertaking the duty at all.

No. 31.—“Counterfeit Postage Stamps—Compliance with Article No. 18, Vienna Convention.”

Under Article 18 of the Vienna Convention the contracting countries undertake to adopt or to propose to their respective Legislatures the necessary measures for punishing the fraudulent manufacture or use of counterfeit stamps, and we think that it is desirable that the necessary legislation to enable the Colonies to give effect to this Article be obtained as early as possible by those Colonies which do not already possess it.

No. 33.—“Postage on certain class of publications.”

A publication was submitted by South Australia with a view to conferring as to whether publications of that class should be treated as packets or books. We are of opinion that, not being published in book form, they should be charged at Packet rate of postage.

No. 35.—“Postal Guides, uniformity.”

We advise that the question be taken up later on if time permits.

No. 36.—“Territorial transit rates charged by one Australian Colony to another such Colony, proposed reduction.”

As the Postmaster-General South Australia has assured this Committee that the present payment on the homeward mails and the payment by Great Britain to South Australia on the outward mails only about covers actual expenses, taking, of course, into account the landing and embarking of mails at Largs Bay, we do not advise that any reduction be made in these rates at present. In connection with this matter, we desire to call attention to the fact that in the new contracts with the P. & O. and Orient Companies, the contractors are required to land and embark the mails at all ports, including Largs Bay; but in the interests of the Colonies it is our opinion that the Adelaide Post Office should still undertake the service of landing and embarking the mails at Largs Bay, as the incoming mails occasionally arrive at such a time as to render it necessary for using the greatest possible expedition in landing the mails, in order that they may reach Adelaide in time for Melbourne express leaving at 4.30.

No. 37.—“Accelerating of train service with English mails from Brisbane.”

It is admitted that the present railway arrangements are extremely inconvenient to Queensland in regard to the connection of the English mails at Sydney. If any arrangement could be made by which the Commissioners of these two Colonies could arrange for a train to leave Brisbane about 1.30 P.M. on Monday to arrive at Sydney at 5 P.M. next day, this would enable the Queensland public to post up to noon on Monday, instead of the business people having practically to close their correspondence on Saturday evening.

No. 37A.—“Question of special trains in event of mail steamers reaching Largs Bay on Saturdays and Sundays.”

As bearing upon the English Mail Train Service, and considering the likelihood under the present contract of the steamers frequently reaching Largs Bay on Saturday and Sunday, we have considered the question of making some provision for forwarding these mails on to their destination by special trains, and thus avoiding the great delay which would be otherwise unavoidable. A Memorandum showing possibilities in regard to special trains is appended, and we recommend that the questions therein set forth be remitted for the favourable consideration of the Colonies concerned.

Appendix A.

No. 38.—“Australasian Postal Convention.”

We advise that this question be taken up later on if time permits.

No. 40.—“Proposed arrangement for enabling senders of parcels for despatch per Parcels Post to places abroad, to defray all Customs and other charges arising upon such parcels.”

The proposed arrangement is explained in the subjoined letter from the London Post Office, 12 March, 1897 :—

“I am directed by the Postmaster-General to enquire whether your office would be disposed to take part in an arrangement, which is under consideration here, for enabling the senders of parcels sent abroad by Parcel Post to defray all the charges arising upon them, that is to say, not merely the postage, but also the Customs and other charges, which have now to be paid by the addressees on delivery. Such an arrangement is in operation in connection with the Parcel Post between several of the countries of the Postal Union, and is said to work well. The procedure is as follows :—

“A person wishing to relieve his correspondent of all charge in respect of a parcel, endorses it ‘to be delivered free of all charge,’ signs a declaration that he will pay the amount due as soon as it is ascertained, and, if required, pays a deposit. A form, similar to the one annexed, is then made out and accompanies the parcel to the office of exchange of the country of destination, where the parcel is examined, and the charges are assessed. The amount is entered on the form, and claimed on a parcel bill, to which the form is attached as a voucher. The form is then sent back to the office of posting, where a settlement is come to with the sender. The parcel is, of course, delivered free.

“In this country it is proposed to charge for the facility a fee of 6*d.* per parcel.

“If your office, with the consent of the Government, is of opinion that the proposed arrangement might with advantage be adopted, you will no doubt be good enough to inform me to that effect. A date can then subsequently be fixed by mutual consent for bringing it into operation.”

We recommend that the suggestion of London should be approved, provided that the fee, in addition to the postage, instead of being 6*d.*, be 1*s.*, to be equally divided between the United Kingdom and the Colony interested.

No. 41.—“Customs Declarations on Parcel Post Packages.”

We recommend that the Regulation of the London Post Office, as under, with reference to valuation of Parcel Post Packets be adopted, viz. :—

CUSTOMS DECLARATION AND DESPATCH NOTE.

“Parcels are subject to Customs Regulations, and the sender of each parcel is required to make, for Customs purposes, upon a special form or forms, which can be obtained at any Post Office, an accurate statement of the nature and value of the contents and other particulars. *Undervaluing the contents, or failure to describe them fully, may result in seizure of the parcels.* The net weight or quantity of the various articles contained in a parcel should, if possible, be stated, and any other particulars which would facilitate the assessment of Customs Duty—such as, in the case of clothing, the material of which it is composed, and whether it is new or has been worn. In the case of articles returned to the country where they originated the fact should be stated.”

No. 42.—“Proposed ‘Express Delivery’ of Parcels and Postal Packets exchanged between the United Kingdom and the Australasian Colonies.”

By circular letter dated the 20th April, 1897, the London Office wrote to the respective Australasian Postal Administrations, bringing under notice the system of delivering ordinary *postal packets* by *express* messenger, stating that the system had worked well in the United Kingdom, and was about to be extended to international *parcels*.

The London Office suggests that, if the Colonies are now able to undertake express delivery, it should *apply to parcels as well as to other postal packets*, but, if the Colonies be still unable to arrange for the delivery by special messenger of postal packets received from places abroad, they may desire to give senders in the Colonies the opportunity of securing the express delivery of correspondence forwarded by them to the United Kingdom. If so, the London Office is prepared to deliver specially all ordinary postal packets as well as parcels marked “express,” received in the mails from the Colonies. The express fee on *ordinary postal packets*, at the rate of 3*d.* per mile, cannot be prepaid, but will be collected on delivery, while, *in the case of parcels* for “express” delivery, a special fee of 5*d.* each parcel should be collected from the sender, and credited to the Imperial Post Office on the parcel bill.

We consider that the requisite facilities for the establishment of the system do not exist here; there is no demand for its establishment; there are objections to its *partial* introduction (*i.e.*, that it should apply *only* to parcels *from* Australia); the express fees chargeable even under the favourable circumstances of a large traffic would not be remunerative; and the proposal that the Colonies should undertake the collection of fees on behalf of the United Kingdom, and undertake the task of specially treating all such parcels without any remuneration, is considered inequitable.

Under the circumstances we think it undesirable that the proposal should be acceded to.

No. 43.—“France—Parcel Post Convention.”

We recommend that, although Queensland is not at present prepared to join the Parcel Post Convention with France, except on certain conditions, the remaining colonies adopt it as soon as possible.

No. 44.—“Establishment of direct exchange of Parcels between the Australian Colonies and Cape Colony, and other South African States and Colonies.”

We have carefully revised the Draft Parcel Post Convention, and append the same, as altered, Appendix B, which we advise be forwarded to Cape Colony for approval. It is recommended that Tasmania be requested to act as intermediary in forwarding or distributing parcels passing through its office to and from the Cape without charging territorial or extra sea transit rates, the Australian Colonies being regarded as out-territory for parcel post purposes.

No. 45.—“Revision of Parcel Post Rates to India and the East, Ceylon to act as intermediary.”

No report.

No. 46.—“Proposed introduction of System of Insurance on Postal Parcels.”

We recommend that the system of insurance on parcels be agreed to inland, intercolonially, and with the United Kingdom, and that the following be the rates charged :—

	Not exceeding £10.	Each additional £10 to £50.	Maximum Charge.
Inland	4 <i>d.</i>	2 <i>d.</i>	1 <i>s.</i>
Intercolonial	5 <i>d.</i>	2½ <i>d.</i>	1 <i>s.</i> 3 <i>d.</i>
United Kingdom	6 <i>d.</i>	3 <i>d.</i>	1 <i>s.</i> 6 <i>d.</i>

But we advise that the credit to be allowed by the despatching office be the same in both directions, that is, Great Britain to credit the Colonies on the “outward” parcels with an equal amount to that credited by the Colonies on the “homeward” parcels, and the same principle should apply intercolonially. Queensland and Tasmania consent to this, so far as absolute loss is concerned, but not to insurance against damage.

No. 47.—“Articles having a saleable value received by Packet Post to be transferred to Inland Parcel Post.”

No report on this matter. It applies to Queensland only.

Nos. 48 and 49.—“Adjustment of Postage on Intercolonial Parcels posted out of course and received in the Colony of destination by other than Parcel Post.”—“Mode of charging and accounting for irregularly-posted Parcels.”

In the case of parcels sent out of course (*i.e.*, articles despatched from one colony as packets, &c. but regarded in the colony of destination as *parcels*), we advise that double the amount of deficiency at parcel rate be collected on delivery.

Nos. 50 and 51.—“Discontinuance of Registration of Parcels in New South Wales.”—“Intercolonial Charges for Certificates of posting of Parcels.”

We recommend that certificates of posting of parcels be given at a charge of 3*d.*, the one certificate to include as many parcels as the sender may choose to enter upon the list, and for an additional 2½*d.* for each parcel an acknowledgment of receipt by addressee will be obtained and forwarded to the sender by post.

No. 52.—“Apportionment of Intercolonial Parcel Postage equally between the Colony of origin and Colony of delivery.”

We recommend that the present division of postage on parcels posted intercolonially be maintained—despatching Colony 5*d.* ; receiving Colony 3*d.* : Queensland dissenting.

Nos. 53 and 54.—“Claim of London Office to be credited with 1*d.* per lb. for sea transit from Australia to England on parcels sent to Foreign Countries *via* the United Kingdom.”—“Apportionment of postage on parcels exchanged with Foreign Countries through the intermediary of the United Kingdom.”

In 1896, at the suggestion of the London Office, it was agreed that the postage on parcels exchanged between the United Kingdom and the Australian Colonies should be reduced *from* 1*s.* 6*d.* for the first 2 pounds or fraction, and 9*d.* for each additional pound, *to* 1*s.* for the first pound or fraction, and 6*d.* for each additional pound.

The proposal for such reduction of postage was first made in 1894, but the apportionment of postage then suggested by the London Office was considered to be unfair to the Colonies, and it was not until after the exchange of considerable correspondence on the subject between the London and Colonial Offices that the former office agreed in 1896 that the postage should be apportioned as under on parcels forwarded in both directions ; *viz.* :—

Colonial share—First pound, 7*d.* ; each additional pound, 3*d.*
Imperial „ „ „ 5*d.* ; „ „ „ 3*d.*

(NOTE.—Owing to the heavy expense incurred by the Colonies in initiating the Parcel Post System in 1886, the London Office agreed to allow them the larger share of the postage, and the Colonial share is still 2*d.* more on each parcel than that received by the United Kingdom.)

Subsequently to the above-mentioned division of postage being agreed upon, the London Office, in a circular letter dated the 30th December, 1896, suggested that the Australian Colonies should accept the *same* credit on parcels sent from Foreign Countries to Australia *viâ* England as on those sent direct from the United Kingdom to Australia, *viz.*, 7*d.* for the first pound, and 3*d.* for each additional pound, *in lieu* of the credits then received, *viz.*, 9*d.* up to two pounds, 2*s.* 3*d.* between two pounds and seven pounds, 3*s.* 9*d.* between seven pounds and eleven pounds. This suggestion, although entailing a loss on the Colonies, was adopted for the sake of uniformity.

On the 18th June, 1897, the London Post Office wrote to the Adelaide Office intimating that it would be necessary for the Australian Post Offices to credit the Imperial Post Office with 1*d.* per pound rate (for sea postage from Australia to London), in addition to the onward postage from England, on all parcels which they might send to other countries *viâ* the United Kingdom, after the 31st July, 1897. In a reply, forwarded from New South Wales to London (dated 14th September, 1897), attention was drawn to the particulars stated above, and that office was reminded that *at the present time no special payment is made to the Orient and P. & O. Companies for the sea transit of parcels* (those Companies having since the 1st February, 1896, abandoned the special charges made up to that date for such transit); and it was pointed out that *subsidies now allowed cover payment for the conveyance of all mail-matter (including parcels), and the Australian Colonies, as joint parties with the United Kingdom to the contracts with the Companies named, are entitled to the full benefit of the altered arrangement.* It was therefore intimated that, under the circumstances, it was thought that the demand made was unreasonable, and that the London Office was not justified in making a special levy on the Australian Colonies with respect to the sea conveyance of parcels any more than it would be in acting similarly with regard to ordinary correspondence (letters, &c.); and it was added, in conclusion, that as the Colonies had reduced the postages on parcels to and *viâ* the United Kingdom, on the understanding that they were to receive certain credits, it would now be necessary, in order to comply with the request made, either to submit to a loss of revenue, or to increase the postage rates on the parcels. Victoria and South Australia also objected to compliance with the request made.

The London Office, under date the 5th November, 1897, replied, expressing regret that the proposal of that office was considered by Australia to be unreasonable, and asking for a re-consideration of the matter.

It is thought that the particulars furnished the London Office sufficiently demonstrated the unreasonableness of the request made by that office. The discussion on the subject seems to have arisen because of an apparent misapprehension on the part of the London Office, which appears to think that some particular portion of the Colonial share of postage on parcels exchanged with the United Kingdom is allocated for the sea service; but such is not the case, and it must be obvious that (the Orient and P. and O. Companies having two years since abandoned their special charges for the sea transit of parcels) there is no need to allocate any portion of the postage receipts to cover charges which no longer exist.

The London Office has not made, *nor is it entitled to make, any claim for the sea transit of parcels sent from the Colonies addressed to the United Kingdom*, and, as the arrangement made is that the Colonies are to receive the *same share of postage* on parcels exchanged with foreign countries *viâ* the United Kingdom as on parcels exchanged direct with the United Kingdom, and in view of the other strong reasons herein given, it seems sufficiently clear that the London Office has no good claim to the credit asked for; *and it is still thought that the request made should not be acceded to.*

To sum up the matter, on parcels for Foreign Countries *viâ* the United Kingdom, the London Office receives *its full share of postage at the rates agreed upon, in addition to the onward postage from the United Kingdom to destination*, and it would seem clear that the London Office has no good claim for any further payment.

Were the claim of the London Office admitted, the Colonies would receive (after the first lb.) only 2*d.* per lb., whilst the United Kingdom would receive 4*d.* per lb., instead of each receiving as at present, 3*d.* per lb.

We recommend that the foregoing statement be communicated to the London Post Office, Queensland dissenting, that Colony having already made the necessary charge on parcels in order to meet London demands.

No. 55.—“The practicability or otherwise of introducing the ‘Value payable,’ or ‘Cash’ on delivery of Parcels System into the Australasian Colonies.”

It is thought that there would be strong protests from country storekeepers and others were this system introduced; indeed, when the parcel post was brought into operation there were numerous complaints that people in the country found it cheaper to obtain their goods from the city by parcel post than to (as formerly) patronise their local storekeepers, who suffered in consequence. Were the “value payable,” post inaugurated, it is obvious that the grievance would be intensified. Moreover, were the system to apply, as in India, only between Money Order Offices, it would not be available for use by people in remote districts, by whom it would be most appreciated. Under these circumstances it is thought that it would not be desirable at the present time to bring the system mentioned into operation in the Australasian Colonies.

No. 56.—“Rates of Commission on Money Orders from the Australasian Colonies to the United Kingdom, Cape Colony, &c.”

We recommend that the rates of commission charged on Money Orders for the United Kingdom, British Possessions, and Foreign Countries, in all the Colonies as in New South Wales and Queensland, be 6*d.* for each pound or fraction of a pound.

No. 57.—“Reduction in rate of commission to paying country on Money Orders exchanged between Australasian Colonies and Singapore.”

The rate of commission has now been reduced from one per cent. to half of one per cent. by all the Colonies.

No. 58.—“Treatment of Money Order Advices missent to other Colonies.”

We advise that in the event of Money Order Advice being inadvertently sent to the wrong Colony, that Colony should forward the Advice without delay to the Head Office of the Colony on which the Money Order was drawn, so that the payee may at once receive payment; at the same time, the issuing Colony should be informed of the action taken and requested to deduct the amount of such Advice from the next Account.

No. 59.—“Practice of forwarding Money Order Advices, with and without lists, between Colonies.”

We advise that Tasmania correspond by letter with the Colonies concerned.

No. 60.—“Telegraph Money Orders to New Zealand and Tasmania.”—“Omission of signature from Advices, and Cable Company’s charges.”

At the 1896 (Sydney) Conference, the following recommendation by Permanent Heads of Departments was adopted, viz.:—“We recommend that the proposal of New Zealand to introduce the Telegraph Money Order system between that Colony and Australia and Tasmania be agreed to. Our experience of the system which is now in force between the Australian Colonies and Tasmania does not lead us to anticipate that any serious risk would be incurred by extending it to New Zealand. We advise that the usual Money Order Commissions be charged, plus the cost of a ten-word telegraph message to the paying office, and another to the payee.”

The system was brought into operation in July, 1897, and, in the Regulations adopted, it was provided that *one* message would “be sufficient for any number of Orders from the same remitter to the same payee, provided the numbers are continuous.”

However, on the 21st December, 1897, Mr. Warren, of the Eastern Extension Telegraph Company, wrote, intimating that, from the 1st January, 1898, “*only one Money Order will be accepted at the single rate, every additional Order embodied in the same message to be charged as an extra message,*” and also suggesting that a considerable reduction in the average number of words in a message would be made were the signatures to Telegraph Money Order Advices omitted. On the recommendation of the Controller, it was decided by New South Wales to “agree to dispense with the transmission of the Postmaster’s name and designation to all telegraphic advices to New Zealand, as it is of no use to the paying office.”

However, in the Regulations subsequently prepared on the subject, it was provided that “in advising the remittance of money by telegram to *either New Zealand or Tasmania*, the Postmaster or other official will not give his name or official designation, but simply the name of the office at which the order is issued.”

The *Tasmanian Postal Authorities* apparently were not consulted respecting the above-mentioned altered arrangement, and on receipt of an unsigned telegraph money order advice from the Postmaster, Oxford-street, made enquiry in the matter. A memorandum in reply seems to have been sent from the Money Order Office, to which the *Hobart Office* replied that “*Telegraph Money Order advices unsigned will not be recognised by this Colony (Tasmania).*” Hobart was thereupon informed that “signatures of Postmasters dispensed with in accordance with arrangement with Cable Company.”

A letter, dated the 16th February, 1898, has since come to hand from *Tasmania*, intimating that with regard to the signatures of telegraphic advices being abolished altogether, the question will be placed before the Honorable the Postmaster-General on his return to the Colony, and his decision made known to you.

By letter, dated the 19th February, Mr. Warren intimated that “*on and after the 1st March, 1898, the New Zealand cable rate for official Telegraph Money Order Advices will be two shillings and sixpence, instead of two shillings, as at present,*” also that “*additional orders may be included in one telegram at the minimum rate of two shillings and sixpence.*” In reply to an enquiry from the Sydney Office, Mr. Warren stated that the above rates will not apply to Tasmanian Money Order cable business.

The points for consideration seem to be the adoption of a uniform practice on the part of the whole of the Australasian Colonies respecting the signing or otherwise of Telegraph Money Order Advices to New Zealand and Tasmania respectively.

New Zealand has intimated that the Postal Department of that Colony is unable to dispense with the issuing officer's signature; whilst *Tasmania* has notified the Sydney Office that unsigned Telegraph Money Order Advices will not be recognised by that Colony.

We are of opinion that the practice of wiring the Postmaster's signature is a safeguard. We also consider that *the simplest way of adjusting the charges with the Cable Company would be to pay them their proper tariff of 2s. in the case of New Zealand, and 1s. in the case of Tasmania, for the first 10 words, and 3d. and 1d. each additional word contained in the messages transmitted over the New Zealand and Tasmanian cable lines respectively, the sender, of course, being charged the full rates as given in the Postal Guide.*

No. 61.—“Exchange of Money Orders with Japan.”

The Hong Kong Office having intimated that they can no longer act as intermediary in connection with the exchange of Money Orders between Australia and Japan, we advise that a joint Convention be entered into with that country.

Nos. 62 and 63.—“Suggested discontinuance of the issue of Duplicate Postal Notes and the payment of the face value of postage stamps affixed to Postal Notes.”—“Duplicate Postal Notes.”

We advise that a Duplicate Postal Note may be issued on satisfactory evidence of the destruction of the original, or in case of loss, on the expiration of Six months from the date of such original note. No note shall be paid after the expiration of Six months from date of issue without reference to the Head Office of the Colony of issue, in order to ascertain whether the original has been paid.

No. 64.—“Exchange of Postal Notes between Australasia and the United Kingdom.”

At the 1892 (Hobart) Conference it was decided to invite the London Office “to adopt an exchange of postal notes with the Australasian Colonies on the same lines as those now existing between some of the Colonies.” At the 1893 (Brisbane) Conference the Permanent Heads reported that “the London Office having absolutely refused to exchange postal notes with Australia, we have no recommendation to make.” At the 1894 (New Zealand) Conference the Permanent Heads reported that “as no new circumstances have arisen since the Brisbane Conference, we do not think that this matter should be reconsidered at present;” and, again, at the 1895 (Hobart) Conference it was reported that “the London Office was communicated with, but declined to exchange postal notes on account of the great risk.” It appears from enquiry made by the Deputy Postmaster-General of New South Wales, when in London last year, that that office is quite firm in its opposition to the exchange of postal notes between the Australian Colonies and the United Kingdom. In the first place there is the old objection, namely, the difficulty of guarding against forgery and fraud, and of providing for the payment of these notes at the 12,000 offices in the United Kingdom, many of these being held, as in our case, by storekeepers who could not distinguish between a postal note issued at one country or another country, or whether it was a forgery. A further objection is that the balance—always an uncertain one—would be against the United Kingdom, that is to say, that more postal notes would be issued in the Colonies upon Great Britain than in Great Britain upon the Colonies.

It was suggested that the case might be met by adopting a similar course to that in the case of India, that is, let the Colonies purchase a quantity of British Postal Notes, paying of course cash for them, and also paying the commission. The London Office has no objection to our selling these notes in the Colonies, charging of course our commission in addition to the British commission. Should this be done they would agree to date the currency of the notes only from the date of our postmark, and not from the date of purchase from the London Office.

It is stated that experience has shown that there is very little demand for these notes in India. We consider that all the requirements of the public in the way of remitting small sums of money have been met in most of the Colonies by the reduction in the charge on Money Orders for sums not exceeding £1, from 1s. to 6d.

No. 69.—“Berne's Circular *re* tabulated Telegraph Routes, and method of indicating such Routes.”

We consider this does not affect the Colonies to any great extent, and it is therefore recommended that no action be taken.

No. 70.—“Fire Alarms.”

We have no report to make.

No. 71.—“Sunday Telegraph Rates to Tasmania.”

We recommend that Tasmania adopt the Sunday rates on telegrams charged in the other Colonies,

Nos. 72, 73, and 81.—“Intercolonial Telegraph Rates.”—“Resolution of Conference Chambers of Commerce *re* Intercolonial Telegraph Charges.”—“Reduction of the New South Wales-Queensland Telegraph Rates, and alteration in mode of charging on Inland and Intercolonial Telegrams.”

The question of reducing the rates—2s. for the first 10 words, and 2d. each additional word—on telegrams between New South Wales and Queensland, has been under consideration on several occasions.

In 1885, a proposal was made to Queensland that the rates be reduced to those then, and now, existing between New South Wales and Victoria, viz., 1s. for the first 10 words, and 2d. for each additional word. A reply was received that, having regard to the long distances over which telegrams pass in Queensland, the Government of that Colony was not then disposed to make any reduction in the charges levied. In 1887 the attention of Queensland was again drawn to the matter, but a reply was received to the effect that, for the reasons already given, the Government of that Colony was “still unable to meet the wishes of the Government of New South Wales with regard to the proposed reduction.”

At a Conference held at Adelaide in 1890, a Resolution was agreed to, of which the following is an extract, viz. :—

“That, between any two contiguous Colonies, 1s. shall be the initial charge for 12 words, and 1½d. for each additional word; names and addresses to be paid for.”

Owing to some of the Colonies not taking the necessary action, this Resolution was not given effect to, nor was a somewhat similar Resolution making the charge “between any two contiguous Colonies 1s. for 15 words, and 1½d. for each additional word, names and addresses to be paid for,” which was adopted at a Conference held at Sydney, 1891. A Resolution, similar in terms to the latter, was submitted for consideration at the 1892 (Hobart) Conference, but was rejected.

In 1896 the Chambers of Commerce in Sydney, Melbourne, and Adelaide wrote to the New South Wales, Victorian, and South Australian Post and Telegraph Administrations, asking for the reduction of the Intercolonial telegraph rates. The Sydney Chamber of Commerce asked that, after the first ten words, the charge on messages between New South Wales and Victoria be reduced from 2d. to 1d. per word. The Melbourne Chamber of Commerce made a similar request with respect to messages from Victoria to New South Wales, besides asking that consideration be given to the existing rates on messages between Victoria and South Australia. The Adelaide Chamber of Commerce also asked for a reduction.

The matter was considered at the 1896 (Sydney) Conference, when the Permanent Heads reported as follows :—

“We refrain from making any recommendation. We would, however, suggest for the consideration of Ministers that, in the event of an alteration of the rates being made, it should be *on the basis of the International principle of counting addresses and signatures*, as recommended at the Conferences held at Adelaide and Sydney in 1890 and 1891 respectively.”

In December, 1897, the Brisbane office opened up a correspondence with the Sydney office on the question of reducing the rates on telegrams to and from New South Wales and Queensland. The proposal of Queensland was to charge 1s. for 12 words, including address and signature, and 1½d. for each additional word. To this proposal New South Wales could not agree, because of the anomaly which would be created, and owing to it being thought that the charges on messages between New South Wales and Victoria, and New South Wales and Queensland, should be as nearly uniform as possible, whereas were the Queensland proposal adopted the following would be the position :—

New South Wales to Queensland.—1s. for the first 12 words (at least six of which would be address and signature), and 1½d. for each additional word.

New South Wales to Victoria.—1s. for the first 10 words (exclusive of address and signature), and 2d. for each additional word.

Queensland was informed that if it would agree to the addresses being sent free, and to charge 1s. for the first 10 words and 2d. for each additional word, New South Wales would be prepared to consider the matter. The question still remained unsettled, but, in a letter explaining the reasons which guided Queensland in making the above-mentioned proposal, the Brisbane Office states that “*it has been recognised in all European Administrations, and confirmed by the International Bureau (see Rule 19, &c.), that the words in addresses and signatures should be counted,*” and that “*the Australian Colonies appear to be the only Administrations which do not observe this rule.*”

In a letter dated 11th August, 1897, the Adelaide Office drew attention to the fact that “a general reduction of telegraph rates, local and intercolonial, is again being urged in several of the Colonies,” and stated that “our rates compare very favourably with those obtaining in Europe.” That office also stated that the Queensland Postmaster-General is anxious that some re-arrangement should be arrived at, but he considered—

1. That no Colony should take separate action.
2. That any change should include the charging for addresses and signatures.
3. That the rates internally should be uniform throughout the Colonies, if this can possibly be arrived at, but in any case intercolonial rates should be uniform.”

73

The whole subject has to be considered at the present Conference, the points for consideration being—

1. The charges on messages to and from New South Wales and Queensland.
2. The adoption of uniform rates between contiguous Colonies.
3. The adoption of uniform rates between Colonies not contiguous to one another, as between Queensland and South Australia, New South Wales and Western Australia, &c.
4. The advisability or otherwise of charging for addresses and signatures, or signatures alone.
5. The adoption of uniform charges for inland messages.

We are still of opinion that any re-arrangement of charges should be on the basis of charging for every word, whether in addresses or text. This is the International principle. We would also respectfully point out that the present rates appear very reasonable when the great distances covered, and the small population, are taken into consideration. They compare very favourably with those obtaining in Europe, as the following table will show :—

		Minimum Charge.	Rate per Word.	Distance about
		<i>d.</i>	<i>d.</i>	Miles.
Between London and	Paris.....	10	2	287
"	" Madrid.....	10	4	1195
"	" Antwerp.....	10	2	270
"	" Berlin.....	10	2	746
"	" Vienna.....	10	3	980
"	" Hamburg.....	10	2	657
"	" St. Petersburg.....	10	5½	1774

Names and Addresses being counted.

With a view, if possible, to effect some reduction, we suggest the following Tariff for consideration :—

	Queensland.		New South Wales.		Victoria.		South Australia.		West Australia.	
	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>
Queensland	1	6 0 2	2	3 0 3	2	3 0 3	3	0 0 4
New South Wales	1	6 0 2	1	0 0 2	1	6 0 2	2	3 0 3
Victoria	2	3 0 3	1	0 0 2	1	6 0 2	2	3 0 3
South Australia	2	3 0 3	1	6 0 2	1	6 0 2	1	6 0 2
West Australia	3	0 0 4	2	3 0 3	2	3 0 3	1	6 0 2
Tasmania	In proportion, <i>plus</i> cable rate									

The Address and Signature, to the number or twelve words, to be sent free.

In this table the first amount indicates the rate for the first ten words, exclusive of names and addresses, the second amount indicates the rate for every succeeding word.

Nos. 74, 85.—“ Mode of counting and charging Telegrams. Disputes with the public as to what are Cipher Words. (Orders for parts of Machinery).” “ *Re* numbers as well as words appearing in Telegrams.”

We recommend that figures be not allowed in the text of Inland or Intercolonial messages, but that amounts or numbers be written and signalled in words only. Isolated letters or groups of letters having no connective meaning shall be charged as one word for each letter.

Nos. 75, 78.—“ System of counting words in Inland and Intercolonial Ordinary Telegrams.” “ Counting double names in Telegrams.”

We suggest that these matters be referred to a Sub-Committee, to consist of Sir Chas. Todd, Mr. P. B. Walker, and Mr. John Hesketh, to be settled by correspondence.

No. 76.—“ Share-dealing.”

We are unable to deal with this matter. It refers to traffic in shares by telegraph employees, and should, we respectfully suggest, be dealt with by the respective Governments,

No. 77.—“Share Telegrams between Stock Exchanges.”

We are of opinion that telegrams giving share quotations and passing between stock exchanges should not be accepted at press rates, but be charged as ordinary telegrams.

No. 79.—“*Re* word ‘care’ being inserted in Address of Message.”

We recommend that when an International telegram is addressed to the care of a person who has registered an abbreviated or code address, his name or registered address must be preceded by the word “care.” When such word is omitted the omission should involve a non-delivery, and the sender be obliged to correct the address by a paid service, as provided for in the International Regulations.

No. 80.—“Suggested abolition of additional charge on cipher words contained in Inland and Intercolonial telegrams.”

With reference to the extra rate now levied on cipher words, we recommend that no extra rate be charged on any English Dictionary word containing not more than 15 letters. The above is intended to apply to both Inland and Intercolonial telegrams.

No. 82.—“Intercolonial Telegraph Repeats.”

It is desirable that the practice of the Colonies should be uniform in dealing with the question of repeats, and it is recommended that the Resolution, No. 43, of the Brisbane Conference, March, 1893, be adhered to. The Resolution in question is as follows:—

The receiver of a message may have the whole or part of it repeated on payment of the cost of the telegram demanding the repetition, and of the reply to the same.

The sender can also have the whole or any portion of his message repeated on payment of the cost of the telegram he forwards and of the reply.

The demand for the repetition must be made within seventy-two hours after receipt or despatch of the telegram, and should be written in the following manner:—

“Sydney from Brisbane” (these words are not charged for).

“R.P. 4” (representing reply paid, four words).

“Twenty-sixth” (date of message to be repeated); “Brown” (receiver’s name); “Repeat first, fourth, ninth” (meaning words of the text of the telegram to be repeated); or,

“Twenty-sixth”; “Brown” (repeat word or words); “after”

The reply will be worded as follows:—

“Brisbane to Sydney,” (these words are not charged for).

“Brown” (words repeated.)

No. 83.—“Proposed omission of the word “to” from before addresses on telegrams.”

We are of opinion that it is unnecessary to signal the word “to” before the addresses on telegrams.

No. 84.—“Charges for certified copies of telegrams and search fees.”

We recommend that a certified copy of any Inland or Intercolonial message be supplied to the sender or addressee, or their authorised representative, upon proof of identity and full particulars being furnished, together with the payment of a fee of 1s.; but where such particulars are not supplied the fee will be 2s. 6d.

No. 86.—“Consideration of Berne’s Circular Letter, August 3rd, 1897.”

This letter relates to contradictory articles in the Buda-Pesth Convention pointed out by Austria. No report is thought to be necessary, as the matter can be dealt with departmentally.

No. 89.—“Urgent Telegrams, distinctive coloured forms.”

This is a matter which can be dealt with departmentally.

No. 90.—Question of issuing vouchers with ‘Reply Paid’ telegrams in terms of paragraph 1, clause 51, of Buda-Pesth Telegraph Service Regulations.”

Appendix C. We advise that the voucher system be adopted, and that the New Zealand form be accepted as pattern.

No. 91.—“Typewriters for Telegrams.”

This matter can be dealt with departmentally.

No. 92.—“Code Vocabulary. Points submitted by Berne Telegraph Bureau for consideration.”

We suggest that this matter be referred to a Sub-Committee, to consist of Sir Charles Todd, Mr. P. B. Walker, and Mr. John Hesketh, to be settled by correspondence.

No. 93.—“Proposal that Australasian Telegraph Administrations undertake for a fee the ‘coding’ of International Messages, as is now done by Reuter’s Agency.”

We are of opinion that the time is not yet ripe for the consideration of this question.

Nos. 94, 95, 96, and 97.—“Adoption of Uniform Charges and Regulations with respect to International Code Addresses.”—“Surnames as Code Addresses.”—“Code Addresses.”—“Code Addresses, registration of.”

We recommend that the fee for registration of code addresses be 10s. 6d. for the year, or 2s. 6d. for one month, for each address registered. We also recommend that the attention of the Australasian Administrations be drawn to the Resolution passed at the Conference at Sydney in November, 1896, with the request that it be complied with in future. The following is the Resolution referred to:—“(1.) That code addresses be not adopted intercolonially, except in the case of Tasmania and New Zealand, which for this purpose are international. (2.) That in connection with International Messages, code surnames be not accepted.”

Nos. 98, 99, 100.—“Telegraph Regulations.”—“Telephone Regulations.”—“Private Telephone Line.”

No report. We advise that these questions be taken up later on if time permits.

No. 101.—“Free transmissions of Telegrams on Postal Service over New Zealand and Bass Straits Cables.”

We recommend that this matter be dealt with departmentally.

No. 103.—“Regulations regarding Uniforms of Letter Carriers and Messengers.”

We recommend that this matter be dealt with departmentally.

No. 104.—“Holidays, Christmas and Good Friday.”

We recommend that this matter be dealt with departmentally.

No. 105.—Free transmission of instructions respecting delivery of Telegrams.”

We recommend that office instructions, such as “By post,” “Porterage paid” or “guaranteed,” be charged for, the same as “Reply paid.”

The following is our Report on additional matters remitted to us by the Honorable the Ministers:—

No. 39.—“Ratification of Washington Congress, and consideration of the various Conventions entered into at Washington but not signed by the Australasian Delegate.”

We see no objection to the ratification by the Australasian Administrations of the Postal Union Convention as agreed to at Washington.

The most important question, so far as Australasia is concerned, is the reduction of the territorial and sea transits; but we find that these reductions will, if anything, be in our favour, especially as, owing to the new arrangements in connection with the P. & O. and Orient contracts, the transit rates payable by non-contracting countries and colonies will, instead of being retained by Great Britain in one direction and the Colonies in the other, be placed to the credit of the subsidy, and the balance divided between Great Britain and the Colonies in the proportion of $\frac{1}{4}$ to Great Britain and $\frac{3}{4}$ to the Colonies.

With reference to the subsidiary Treaties referred to in the Hon. Mr. Duffy’s Motion, time has not permitted of a careful examination of the untranslated Book of Proceedings recently received from Washington, but we understand that these Treaties do not materially, if at all, affect the Australasian Colonies.

With regard to the optional provisions of the Washington Principal Convention, we report as follows:—

1. Article 6.—The registration fee is fixed at “25 centimes, ($2\frac{1}{2}d.$) at most,” but, under Article 2 of the Final Protocol, “it is agreed that the States outside Europe are authorised to maintain the maximum at 50 centimes ($5d.$)” Under these circumstances the Colonies need not alter their present charge for registration, which is $3d.$ and we advise accordingly.

2. *Article 7.*—Administrations agreeing thereto may exchange registered correspondence marked with trade charges, up to 1000 francs (£40) to be collected on delivery; the proceeds (less charges of collections, &c.), to be remitted to the senders of such correspondence.

The Colonies decided in 1892 not to adopt the system, and again at the present Conference.

3. *Article 8.*—This provides for the payment of an indemnity of 50 francs (£2) “in case of the loss of a registered article and except in cases beyond control,” but under Article 3 of the Final Protocol, “it is agreed, as a temporary measure, that Administrations of Countries outside Europe whose legislation is at present opposed to the principle of responsibility, retain the option of postponing the application of that principle until they shall have been able to obtain from the Legislature authority to introduce it. We recommend the adoption of this provision, and that it be extended inland and intercolonially from 1st January next.

4. *Article 9.*—Where the legislation of a country permits, the sender of a letter or other article can have it withdrawn from the post, or have its address altered, so long as such article has not been delivered to the addressee.

No objection to this, it being our present practice.

5. *Article 13.*—In countries which consent to undertake the service in their reciprocal relations a system may be adopted under which, at the request of the senders, and on their paying in advance a sum of 3*d.* for each article, all classes of correspondence are sent to the addressees by a special messenger immediately on arrival in the country of destination.

We do not recommend the adoption of this system, as it is not practicable in sparsely populated districts.

6. *Regulation 6.*—It will be necessary for the Colonies to consider whether they are in a position to make up their postage stamps in the stipulated colours:—

2½*d.* in dark blue,
1*d.* in red,
½*d.* in green.

We see no objection, and recommend accordingly.

7. *Regulation 11.*—Administrations, whose Inland Regulations do not admit of the use of labels (R) in connection with registered articles, may postpone their introduction, and continue to use stamps for the indication of registered articles.

The present practice is to mark registered letters with a blue or red cross, and impressed with the letter “R,” which we find answers every purpose, and we advise its continuance.

No. 68.—“Cable Subsidies and Guarantees, time of year closing.”

We recommend that this matter be referred to the Postmaster-General, South Australia, to arrange, if possible, with the Eastern Extension Telegraph Company that the year close on the 31st December.

No. 87.—“The question of abolishing the system of ‘Urgent’ Intercolonial Telegrams, or of overcoming the delays to which ordinary Telegrams are subjected in Colonies in which such system is in operation.”

We recommend that the system of urgent telegrams be discontinued with regard to Intercolonial and International Messages. Queensland and Tasmania dissenting.

No. 88.—“Urgent Telegrams with West Australia.”

It is suggested that this Question be withdrawn, as it is disposed of by the recommendation of No. 87.

No. 102.—“Establishment of Telephonic communication between the Capital Cities of the Australian Continent.”

In 1896 several letters were received by the Sydney Office from Mr. Jules Renard, respecting the establishment of Telephonic communication between the capital cities of the Australian Continent (Adelaide, Melbourne, Sydney, Brisbane), it being pointed out that such a system of communication existed between Brussels and Paris; Paris, Lyons, and Marseilles (537 miles); Chicago and New York (1500 miles*); as well as in other places. It was represented that the line from Adelaide to Brisbane could be constructed for a sum not exceeding £40,000. The Sydney Chamber of Commerce also wrote, enclosing a copy of a letter received by that body from Mr. Renard, and suggested that the subject might be considered at the next Intercolonial Postal Conference.

The matter received attention at the 1896 (Sydney) Conference, when the following Report of Permanent Heads was adopted; viz. :—

“This is a matter that requires careful consideration. The first cost would be more than double Mr. Renard’s estimate for connecting Brisbane, Sydney, Melbourne, and Adelaide,

* The distance is under 1000 miles.

and the charge that would have to be made for conversation would be so large as to be almost prohibitory. The population of the Colonies is not sufficiently developed to enable an expensive work of this nature to be carried out so as to be remunerative at a reasonable charge to the public. The line from Sydney to Brisbane alone would cost £41,750, or, presuming that the existing poles could be used (which is impracticable), the estimate might be reduced to £24,250. Even making no allowance for maintenance of the line or for working expenses, the interest and sinking fund on a fifteen years' purchase is 10 per cent. of the capital cost (really £9 12s. 8d. per cent.). Therefore, for a line to be justifiable, a revenue of £4175 will require to be guaranteed on the Brisbane and Sydney line alone. It must also be borne in mind that telephonic communication between the capital cities of Australia would materially interfere with the telegraph revenue. We are therefore not prepared to recommend Mr. Renard's proposal for favourable consideration."

Mr. Renard subsequently wrote, stating that the line from Sydney to Brisbane would not cost more than one-half the sum named in the above-quoted Report, and that, taking the largest diameter of wire for the through line from Adelaide to Brisbane (1800 miles), the total cost would not exceed £100,000, including new poles.

In June, 1897, the Sydney Chamber of Commerce forwarded to the New South Wales Postal Department a copy of the following Resolution, adopted at a Conference of Chambers of Commerce of Australasia held at Sydney, in May, 1897, viz. :—

" *Long distance Telephony.*—That it is desirable that telephonic communication be established between the various Capitals and leading Towns of Australia as early as possible."

In forwarding this Resolution, a hope was expressed that, as early as possible, enquiry would be made into the prospects of such an undertaking being a commercial success.

We are still of the opinion that there is not sufficient justification at the present time for the adoption of any scheme of Trunk Telephone Lines between the capital cities of the Australian Colonies. The reasons for our arriving at this decision are as follow :—

The present lines of poles are not able to carry the telephone wires in some cases, and, therefore, new poles would require to be erected in these places. The cost of construction would be still further increased by the necessity for using very heavy copper wires, and of re-arranging the present wires so as to avoid interference.

Experience indicates that the use of Telephone Trunk Lines would interfere with the Telegraphic Revenue. The extent of this interference depends upon the amount and nature of the business and tariffs.

The centres of Australia are far apart and comparatively sparsely populated. We are, therefore, of the opinion that the circumstances of the Colony, its population, &c., do not justify us in recommending the adoption of any comprehensive scheme at present.

We are, however, of opinion that the steps at present being taken by the various Colonies are in a direction which will eventually lead to the desired end. In all the principal Colonies trunk lines of moderate length are being introduced. Those in New South Wales and Queensland lead in the direction of the respective borders. As experience gained on them is found to justify it, the various Colonies will doubtless still further extend these lines until at last they meet.

Meantime, we recommend that the different Colonies be desired to furnish a statement of the Telephone Trunk Lines in use or contemplated, together with particulars of the cost, effect on revenue, and any other information of interest on the subject.

H. V. BAYLY, Chairman, Secretary Post and Telegraph Department, Tasmania.

S. H. LAMBTON, Deputy Postmaster-General, New South Wales.

F. L. OUTTRIM, Deputy Postmaster-General, Victoria.

CHARLES TODD, K.C.M.G., Postmaster-General, South Australia.

JOHN M'DONNELL, Under Secretary Post and Telegraph Department, Queensland.

APPENDIX A.

PROPOSED EMPLOYMENT of Special Trains for Mails arriving at the Semaphore, South Australia, (a) up to 2 P.M. on Saturdays, (b) between 3 P.M. on Saturday, and 2 P.M. on Sunday, and (c) between 2 P.M. and 7 P.M. on Sundays.

MAILS from Europe per British mail packets arriving at the Semaphore on Saturday up to 2 P.M. leave Adelaide at 4.30 P.M. the same day, arriving in Melbourne on Sunday at 9.55 A.M., where they now remain until 6.15 A.M. on Monday, arriving in Sydney on Tuesday at 6 A.M., the mails for Europe closing in Sydney at 4.30 P.M. on the same day.

It has been suggested that, with a view to obviate the detention of the mails in Melbourne for about 21 hours, and thus afford the Sydney public more time in which to reply to their London correspondence, a special train might on such occasions be employed to leave Melbourne on Sunday, at 11 A.M., arriving in Sydney between 4.15 and 6.0 A.M. on Mondays. The mails for Queensland, under such an arrangement, would then leave Sydney on Monday instead of Tuesday, at 6.15 P.M., and arrive in Brisbane at 10.30 P.M. on Tuesday instead of Wednesday. The cost of such a special train would be £226 0s. 6d., namely:—

	£	s.	d.
Melbourne to Albury (191 miles), at 7s. 6d. per mile	71	12	6
Albury to Sydney (386 miles), at 8s. per mile	154	8	0
	£226	0	6

It was thought that the cost of such a train might be borne by Victoria, New South Wales, and Queensland, but the Melbourne Office states that it would not be prepared to bear any portion of such cost, as the train would be of no value so far as that office is concerned, there being no pillar clearances after 3.30 P.M. on Saturday, and all the business places being closed; that office thinks that under the circumstances the Intercolonial correspondence to be forwarded by the special train would be very trifling, not exceeding 100 letters.

A second point for consideration is, in the event of a steamer reaching Adelaide after 2 P.M. Saturday, and not later than 9.30 A.M. Sunday, to arrange for special train to reach Melbourne by 5 A.M. Monday, securing delivery in Melbourne at 8 A.M. Such an arrangement might be joined by Victoria, New South Wales, and Queensland. Victoria has already agreed that, in the event of the South Australian Department conveying the mails by special train to Serviceton free of charge on occasions when the steamers may happen to reach Adelaide on Sunday up to 2 P.M., to favourably consider the running of a special from Serviceton to Melbourne, to enable the mails to reach Melbourne 9.55 A.M. on Monday, provided the other Colonies share the cost of the special. In such a case it is thought that South Australia will run a train to Serviceton free of charge. Probable cost from Serviceton to Melbourne, £107 12s.

A third point for consideration is the employment of special trains when the Mail steamers reach the Semaphore on Sunday by 7 P.M. In such a case it is also considered that the South Australian Government will, free of charge, run a special train to leave Adelaide Sunday 9.30 P.M. (or earlier as required), connecting at Serviceton with a special train arriving in Melbourne on Monday at 2.55 P.M. The mails to then come on by express train leaving Melbourne on Monday at 5.15 P.M., arriving in Sydney on Tuesday at 10.40 A.M. Mails for Queensland, leaving Sydney on Tuesday at 6.15 P.M., arriving in Brisbane on Wednesday at 10.30 P.M.

Under such an arrangement as this mails arriving at the Semaphore up to 7 P.M. on Sunday would reach Melbourne about 19 hours, and Sydney, and Brisbane, 24 hours, earlier than at present. The cost of the special train from Serviceton to Melbourne would be £107 12s., the charges for such train on other week days being only £71 15s.

It now seems necessary to ascertain—

1. Whether Queensland is willing to share with New South Wales the cost (£226 0s. 6d.) of the suggested special train from Melbourne to Sydney on Sundays to convey the mails arriving at the Semaphore on Saturdays up to 2 P.M., Melbourne Sunday morning, and if so, what proportion of such cost Queensland will bear.
2. Whether the three Colonies will share the cost of special Serviceton to Melbourne leaving Adelaide between 3 P.M. Saturday and 9.30 A.M. Sunday, or leaving Adelaide up to 4.30 P.M. Sunday.
3. Whether any arrangement can be made for the employment of special trains from Adelaide to Melbourne to convey the mails from Adelaide between 4.30 and 9.30 P.M. Sundays, and if so, what proportion of the cost (£107 12s.) Victoria and Queensland respectively are prepared to bear.

APPENDIX B.

CONVENTION.

His Excellency the Governor of the Colony of the Cape of Good Hope, and His Excellency the Governor of the Colony of _____, being desirous of promoting greater facilities than at present exist for the exchange of parcels between the Colony of _____ and the Colony of the Cape of Good Hope, have agreed, on behalf of their respective Governments, to the following Articles:—

ARTICLE 1.

The parcel post between the Colony of _____ and the Colony of the Cape of Good Hope, shall come into operation on the First day of _____, one thousand eight hundred and ninety _____.

ARTICLE 2.

There shall be a regular exchange of parcels between the Colony of _____ and the Colony of the Cape of Good Hope, and other South African States and Colonies served through the Cape Colony, which shall be effected by means of the ordinary postal service between _____ and the Cape Colony.

ARTICLE 3.

All parcel mails shall be made up on, and forwarded direct to, such offices of exchange as may be mutually agreed upon.

ARTICLE 4.

In the event of its being necessary to provide receptacles for the exchange of parcels under this Convention, the cost of such receptacles shall be equally shared between the post offices of _____ and the Cape Colony.

ARTICLE 5.

A parcel must not exceed three feet six inches in length, nor six feet in girth and length combined.

ARTICLE 6.

The maximum weight of a parcel must not for the present exceed eleven pounds avoirdupois, and the scale of weight shall advance by even pounds, beginning with the first pound.

ARTICLE 7.

Postage for the conveyance of a parcel from the place of posting to the place of destination must be prepaid by means of postage stamps.

Parcels not fully prepaid and posted out of course, the senders of which are not known, may be forwarded, charged double the deficiency, entry to be made in "Rates prepaid" column as if fully prepaid, and the amount of tax and fine to be entered in column "Accrued charges due to country of despatch."

ARTICLE 8.

Parcels of the following description must not be accepted for transmission by parcel post:—

(a) Parcels which bear on the outside any writing or drawing of an indecent or offensive nature, or within which any contents of a like nature may be observed, and parcels containing parts of the vine, fruit, plants, cuttings, bulbs, or roots, (unless accompanied by a special declaration that no phylloxera exists or has existed in them); gunpowder, cartridges, lucifer matches, or anything explosive or liable to sudden combustion; bladders containing liquid; live animals; grossly offensive or filthy matter; and anything in a condition likely to injure other parcels or any officer of the post office, are prohibited.

Should any such parcel as is described above be tendered for posting at any post office it must be refused, or, if detected in transit, it must be detained, and the sender communicated with. If this cannot be done, the Postmaster must report the circumstance to the chief office of the Colony in which the irregularity is detected, stating the address of the parcel, the number of the Letter Bill or Parcel Bill on which it is entered, the office from which it was received, its supposed contents, and request instructions.

If, however, such a parcel should contain perishable matter which has become offensive, the Postmaster may use his own discretion if the immediate destruction of the parcel be imperative.

(b) Parcels containing game, meat, eggs, &c., or razors, scissors, needles, knives, forks, or other sharp instruments, must not be accepted unless securely packed, so as to guard against risk or injury to other parcels. Liquids, or semi-liquids, such as jellies, pickles, paint, varnish, &c., must not be accepted unless in bottles or cans securely stoppered, nor powders, unless so packed that they cannot escape in transmission. Bottles or glass in any form must be accepted only when so packed as to be secure from breakage.

If a parcel of this nature be tendered at any post office in a damaged or insecure condition, or in a condition likely to injure other parcels or any officer of the post office, it must be refused; if a parcel in such condition should be observed in transit it must, if possible, be made secure and sent forward; if it cannot be so secured it must be detained, and a report must be made to the Chief Officer of the Colony in which the irregularity is detected, as in the case of forbidden articles (paragraph 8A).

(c) No parcel containing diamonds, specie, bullion, gold (in dust or nuggets), or ostrich feathers, must under any circumstances be accepted for transmission by Parcel Post, but these articles may, as heretofore, be sent through the post at the letter rate of postage, if duly registered.

ARTICLE 9.

The postage on parcels posted in _____ and addressed to the Cape Colony, and on parcels posted in the Cape Colony and addressed to _____ shall be at the rates specified in Schedule "A" to this Convention.

ARTICLE 10.

No parcel may contain a letter or other postal packet intended for delivery to a person other than the addressee of the parcel.

If such a letter or postal packet be discovered in a parcel it must be sent forward charged with postage at the unpaid rate applicable to such letter or postal packet.

ARTICLE 11.

No parcel may contain other parcels intended for delivery at any address other than that borne by the parcel itself. If such enclosed parcels be detected they will be withdrawn and sent forward, charged with new and distinct Parcel Post rates.

ARTICLE 12.

Each parcel must be plainly directed, such direction setting forth the name and full address of the person for whom the parcel is intended.

ARTICLE 13.

The sender should write the words "Parcel Post" on the address side of the cover, as well as his name and address at the date of posting.

ARTICLE 14.

All parcels must be securely and substantially packed and closed by the sender, and, in those cases where seals are necessary, the wax must be of a quality to resist any heat to which it may be subjected during transit.

ARTICLE 15.

All parcels must have attached to them a Custom House Declaration form, similar to that set forth in Annexure "C" to this Convention, which must give an accurate statement of the contents and value of the parcel, the name of the place to which it is addressed, and the sender of the parcel must affix his signature and place of abode to the form, together with the date on which the parcel was posted. This form must, after being affixed to the parcel in such a manner as to be readily seen by the Custom House officers, be impressed with the dated stamp of the office at which the parcel is posted.

ARTICLE 16.

In the event of the declaration being found incorrect in any particular, the parcel will be liable to seizure by the Customs Department.

ARTICLE 17.

We advise that the form of Parcel Bill to be adopted should be similar to that in use between the Colonies and the United Kingdom.

ARTICLE 18.

All such Parcel Bills shall be made out in triplicate, and be disposed of in the following manner:— One copy to be retained by the office of exchange of the Colony of despatch, and two copies to accompany the mail to the office of exchange of the Colony of destination.

The Parcel Bills shall be numbered consecutively, commencing with No. 1, on the 1st of January in each year; and each entry in the Bill shall be numbered consecutively, commencing with No. 1. The number of the Bill and entry shall be entered on the corresponding parcel, for the purpose of identification.

ARTICLE 19.

All parcels exchanged under the provisions of this Convention shall, for the time being, be chargeable with such Custom dues as may be leviable under the laws of the Colony of destination.

ARTICLE 20.

We advise that this Article be excised, as not applicable to the Australasian Colonies.

ARTICLE 21.

The despatch of every separate parcel mail shall be advised on the ordinary Letter Bill of the mail with which the parcel mail is sent.

ARTICLE 22.

All errors which may be discovered on receipt of the mails at the office of exchange of the Colony of destination shall, after verification by a second officer, be reported to the Postmaster-General of the Colony of despatch.

ARTICLE 23.

If a parcel advised on a Parcel Bill be not received, the entry on the Parcel Bill shall, after the non-receipt has been verified by a second officer, be cancelled, and the error reported at once to the Postmaster-General of the country in which the error is discovered.

ARTICLE 24.

Should a parcel be received in a damaged or imperfect condition, full particulars must be reported, without delay, to the Postmaster-General of the Colony in which the damage is observed.

ARTICLE 25.

All errors and irregularities in connection with the exchange of parcel mails shall be reported by the one Colony to the other, on the form of Verification Certificate set forth in Annexure "E" to this Convention.

ARTICLE 26.

If no Verification Certificate be received, a Parcel mail shall be considered as duly delivered, having been found on examination correct in all respects.

ARTICLE 27.

The postage levied under Table I of the Convention shall be divided between the Colonies of origin and destination in the proportions set forth in Schedule B, Tables 1 and 2.

The despatching Colony retaining the sea rate of 2*d.* per lb.

ARTICLE 28.

At the close of each quarter the Postmaster-General of the Cape Colony shall prepare a general account between the two Colonies, on a form similar to that set forth in Annexure "F" to this Convention, which shall be supported, so far as the entries of parcels are concerned, by a statement on the form set forth in Annexure "G" to this Convention, of the proportions of postage to be credited to South Australia and the Cape Colony respectively on parcels exchanged, and also the proportion of postage on parcels redirected in both directions, the entries being supported by the necessary vouchers in detail.

ARTICLE 29.

Immediately on receipt of the General Account referred to in the foregoing Article, the Postmaster-General of _____ shall cause it to be examined, and shall, as soon as possible thereafter, forward to the Postmaster-General of the Cape Colony through the Agents-General for the respective Colonies in London, or otherwise as may from time to time be determined, a remittance for the amount of the balance thereof, if in favour of the Cape Colony, and in the event of the balance of the account being in favour of _____, the Postmaster-General of the Cape Colony shall forward with the account a certificate for the amount of such balance, which shall be payable on presentation by the Agent-General of the Cape Colony in London, or shall otherwise cause an adjustment of the balance due to be effected as may be determined by mutual agreement between the two Departments: provided always that the balance to be so adjusted shall in either case exceed the sum of £100, and that a remittance on account shall be similarly effected by either Department in advance of the quarterly account, at the end of every month in which it is ascertained that the indebtedness to the other Department exceeds £100. In the event of the balance on the quarterly account not being in excess of £100, the amount thereof shall be carried forward to the next account.

ARTICLE 30.

Any parcel which may be redirected shall be subject to a redirection charge equal to the original postage, and the credits shall be apportioned in all respects as if the parcel had originated in the ordinary course in the Colony from which the parcel is redirected.

ARTICLE 31.

Parcels which may from any cause remain undelivered after the lapse of a period of six months from the date of posting shall be returned for disposal to the Superintendent of the Office of Exchange in the Colony in which they were posted; but such parcels shall give rise to no charge and to no account.

ARTICLE 32.

Parcels missent shall be returned to the Office of Exchange in the Colony of Despatch by the earliest possible opportunity.

ARTICLE 33.

Government parcels must be paid for as ordinary parcels, and will be liable to be charged for redirection, and they will be subject in all respects to the same rules, as regards dimensions, weight and contents, as ordinary parcels.

ARTICLE 34.

The Post Office Department of either of the Colonies parties to this Convention will not be responsible for the loss or damage of any parcels, and no indemnity can consequently be claimed by the sender or addressee of either Colony.

ARTICLE 35.

Except as otherwise provided in this Convention, all parcels passing between _____ and the Cape Colony shall be subject to the general Regulations of the Postal Department of those Colonies respectively.

ARTICLE 36.

Subject to the general provisions of this Convention, parcels may be exchanged through the intermediary of the Offices of Exchange of the countries parties to this Convention, between either of such countries and any other country with which a direct exchange of parcels shall have been arranged by either of the contracting countries; and there shall be paid by the country of origin to the postal administration of the country of transit the credits specified in Article 27 of this Convention, and any "Forward Postage" which may be payable for the conveyance of such parcels beyond the country of transit to the place of destination.

ARTICLE 37.

All parcels sent from the Colony of _____ to Colonies or States served in transit through the Cape Colony must be entered separately from parcels addressed to the Cape Colony on the form set forth in Annexure "D" to this Convention.

ARTICLE 38.

This Convention is entered in between the respective Governments of the Colony of the Cape of Good Hope and the Colony of _____ from the date hereinbefore mentioned, and shall remain in force until it shall be necessary to be modified in consequence of the Cape Colony subscribing to the Parcel Post Convention signed at Paris on the 3rd of November, 1880, or otherwise as may be found expedient.

SCHEDULE A.

TABLE I.

POSTAGE TARIFF on Parcels originating in the Colony of _____ and addressed to the Cape Colony and other States and Colonies in South Africa served in transit through the Cape Colony.

After that interval no application for the return of the amount will be entertained

POSTAL AND TELEGRAPHIC CONFERENCE, 1898.

REPORT OF THE DEBATES.

(See also Minutes of Proceedings.)

MONDAY, 28TH MARCH, 1898.

Election of President.

Hon. JOSEPH COOK said he had much pleasure in proposing that Sir Philip Fysh take the Chair, not only because the Conference had assembled in Hobart, but also by reason of Sir Philip's seniority and his well-known abilities.

Hon. J. R. DICKSON had much pleasure in seconding the Motion, and in doing so felt he did not need to add to what had been very properly said by the Postmaster-General of New South Wales, of one who had held a high position in the Colony for a long time.

Motion put and passed.

Sir PHILIP FYSH, in taking the Chair, thanked them for their kind expressions of goodwill and the honor they had done him. He desired, on behalf of the Government and himself, to heartily welcome them all, both Ministers and Permanent Heads of Departments to Tasmania, trusting that during their stay they would not only render service to the Colonies they represented, but also derive much health and pleasure at the same time.

Election of Secretary.

Hon. J. GAVAN DUFFY moved—

“That Mr. T. C. Just be elected Secretary to the Conference.”

Hon. JOSEPH COOK seconded. They had previously had a taste of Mr. Just's qualities in that position, and were sure that the fact of his being made Secretary would conduce to the despatch of business.

Motion put and passed.

The Press.

Hon. J. GAVAN DUFFY moved—

“That the Press be admitted to all the deliberations of the Conference, excepting Sittings in Committee.”

Hon. JOSEPH COOK seconded.

Motion put and passed.

Papers.

Hon. JOSEPH COOK tabled a Report on the Palmyra and Fanning Islands as to their suitability and capabilities as submarine cable stations, prepared by Captain A. M. Field, R.N., of H.M.S. *Penguin*.

Sir CHAS. TODD tabled a Return of Inter-colonial Telegraph Traffic for the past Nine years.

Hon. JOSEPH COOK tabled a Return relating to Postal and Telegraphic Business in New South Wales during 1897.

Printing.

Hon. J. GAVAN DUFFY moved—

“That the President and the Hon. Joseph Cook be a Sub-Committee to consider and report upon what papers and documents required to be printed.”

Hon. J. R. DICKSON seconded.

Motion put and passed.

Days of Sitting.

Hon. J. R. DICKSON moved—

“That this Conference sit for the despatch of business each day at half-past 10 o'clock until 1 P.M., and from half-past 2 till 5 P.M., Sundays excepted.”

Hon. J. GAVAN DUFFY seconded, and the Motion was agreed to.

Subjects for consideration.

A list of the subjects proposed to be discussed at the Conference was then tabled by the Secretary. It was arranged that those subjects of a detailed character should first be submitted to the permanent Departmental Heads to report upon. The subjects of a more general nature were reserved for direct consideration by Ministers.

Hon. J. GAVAN DUFFY moved—

“That the Sub-Committee of Permanent Heads be requested, previous to considering the various items placed before them, to revise the list and report to the Conference as to such matters as they consider either unnecessary, or that time will not permit them to proceed with.”

Hon. J. R. DICKSON seconded the motion, which was put and passed.

On the motion of the Hon. Joseph Cook, the Heads of Departments present were appointed a Sub-Committee for the purpose of giving effect to the previous Resolution.

The Conference adjourned until 10·30 next day.

TUESDAY, 29TH MARCH.

The Conference met at 10·30.

In the absence of Hon. Sir Philip Fysh, Hon. Joseph Cook was voted to the Chair on the motion of the Hon. J. Gavan Duffy, seconded by the Hon. J. R. Dickson, and the Conference adjourned until next day at 10·30.

This course has been found necessary on account of the Permanent Heads of the Postal and Telegraphic Departments having such a large number of subjects to handle and report upon to the Ministerial Heads, that they had not yet completed their work.

WEDNESDAY, 30TH MARCH.

The Conference met formally at 10·30 A.M.

Hon. JOSEPH COOK was voted to the Chair in the absence of the President.

Hon. J. R. DICKSON moved—

“That, to enable the Departmental Heads to proceed with work in Committee, the Conference adjourn until 10·30 A.M. next day.”

Hon. J. GAVAN DUFFY seconded.

Motion put and passed.

The Conference adjourned accordingly.

THURSDAY, 31ST MARCH.*Papers.*

Hon. J. GAVAN DUFFY tabled a Paper furnishing Returns in connection with the Telegraph Service of Victoria.

Hon. J. R. DICKSON tabled a similar Paper on behalf of Queensland.

Proposed Reduction of Postage Rate.

The Conference proceeded to discuss the proposed reduction from 2½*d.* to 2*d.* per half ounce postage of Letters passing in both directions between the United Kingdom and other parts of the British Empire.

Hon. JOSEPH COOK (New South Wales) said there had already been a great deal of correspondence in regard to this proposal between these Colonies and the Mother Country, and also between Canada and the Mother Country. It appears that Canada wanted to make the rate very much lower to the British Possessions, and to differentiate between 2*d.* for the Empire and her Colonies, and 2½*d.* between the Empire and the rest of the world. So far as New South Wales was concerned they felt there was every reason why the present rate should not be reduced from 2½*d.* to 2*d.* There was no great demand in the Colonies for such a reduction. What demand there was had come from certain distinguished gentlemen in England who interested themselves from time to time in Postal and Telegraphic matters. If the proposed reduction was made it would at once mean an agitation and a demand for a reduction of the Intercolonial and Inland rates on the ground of anomaly. A Postal Commission was, he believed, being held, or about to be held, in London, where this question was also to be considered, and New South Wales had definitely instructed her Agent-General to say that his Colony could not consent. Victoria, he understood, had refused point blank to send a representative.

Hon. J. GAVAN DUFFY : We appointed a delegate, who has received similar instructions.

Hon. JOSEPH COOK would point out that the anomaly of such a reduction would be at once seen with the inland rate of 2*d.*, and an agitation would at once arise for reducing the latter rate. The Colonies could not at present afford such reductions. Having to send the letters a distance of 14,000 miles, 2½*d.* per half ounce did not seem after all to be very excessive. He could easily understand the reduction from the old rate of 6*d.* to 2½*d.* It was felt in his colony, at any rate, that if the Government was in a position to grant concessions to the people, the same could be done in many more advantageous ways than by reducing the oversea rate for letters from 2½*d.* to 2*d.* per half ounce. Sentimental reasons might be given for the proposal, but sentimental reasons could stand no chance when there was a need for hard cash in the Treasury. At present the net loss to New South Wales alone in the maintenance of their postal relations with the outside world was just £20,000 per annum, and if this proposal was adopted it would mean an additional £3000 a year loss, and for the whole of the Australasian Colonies he supposed it would be £7000 to £8000 per annum. The latter sum might not seem very much distributed over all the Colonies, it was true, but the reduction would mean a demand for intercolonial and inland rates of postage to be reduced. A reduction of a halfpenny per half ounce in the oversea letters would not make any appreciable increase in the amount of correspondence, and altogether the matter of ½*d.* was not worth the doing. If the Colonies could see their way to substitute a 1*d.* letter rate it would be something ; but, of course, at present that could not be thought of. He therefore moved,—

“That, in the opinion of this Conference, it would be inadvisable to make any further reduction in the oversea postage rate until the way is clear for a reduction of the present large subsidies paid for the carriage of mails at present inland and colonial rates.”

Hon. J. GAVAN DUFFY seconded the motion. He did not think he had anything to add to the exhaustive statement which had been made by the Hon. Joseph Cook in this matter. He fully concurred with him that it would be an anomaly to reduce the postage rate as proposed whilst they were unable to reduce the rates to their own people within the Colonies. The rate of 2½*d.* per half ounce was not an excessive one. Until not long ago it was 6*d.*, and that was excessive, and the correspondence was limited ; nobody could hold that a reduction from 2½*d.* to 2*d.* would increase the correspondence to any degree whatever. To put the matter in a nutshell, the Colonies could not afford it. A reduction of postage from England to 2*d.* all over the world was proposed in a Budget Bill of the British Chancellor of the Exchequer. Of course, such a reduction would not be felt in a wealthy country with an immense population, a high standard of education, and with a yearly surplus of three millions. At the Washington Postal Conference, when such a reduction was proposed, it had very little support. Then the Imperial Government dwelt upon 2½*d.* being an excess of the 25 cents stipulated in the Postal Union treaty, but still England had little support, the general feeling being that England ought not to make a reduction below what was considered fair all over the world.

Hon. J. R. DICKSON said hon. members who had spoken had voiced the opinion that Queensland held in this matter. He did not think the reduction was demanded by the public, and it would not mean any appreciable increase in the quantity of letters that would be posted. Queensland had sustained a loss of £34,000 in consequence of the reduction seven years ago from 6*d.* ; but he would not say that they should revert to the 6*d.* rate. He was aware that Mr. Henniker Heaton was always advocating reductions in postal rates, and the Imperial Government seemed to favour the idea ; but the Australian Colonies could not at present entertain such proposals.

Hon. J. G. JENKINS, on behalf of South Australia, supported the motion. The main point had been tersely made by Mr. Cook when he said there was no great demand for the reduction in question at the present time beyond what Mr. Henniker Heaton and a few commercial men had advanced. Moreover, it would be followed by an agitation for such a reduction of intercolonial rates which could not be made.

Motion put and passed.

The Canadian Three Cents proposals.

The consideration of proposal of Canada to reduce postage on letters to all parts of the British Empire from 5 cents to 3 cents was taken in Committee, when the following resolution was passed :—

“That this Conference communicate by cable with the Canadian Postmaster-General to the effect that the various Colonies cannot agree to receive Canadian letters with only 3 cents postage thereon, and ask that the proposal be not proceeded with.”

Queensland's Surcharges.

“*Re* Queensland surcharging New Zealand postal matter prepaid at the ½*d.* per 2 oz. rate.”

Hon. JOSEPH COOK said that some years ago New Zealand had this low rate on printed matter in existence. The question, however, was then raised by New Zealand whether she would be compelled to revert to the higher rate of postage on printed matter. He took it that New Zealand still continued to impose the ½*d.* rate, but did not know if Queensland surcharged.

Hon. J. R. DICKSON : She has to surcharge under the statute law.

Hon. JOSEPH COOK moved,—

“That the matter be referred to the heads of departments for report.”

After discussion the motion was withdrawn.

Hon. JOSEPH COOK moved,—

“That the matter be struck out.”

Hon. J. GAVAN DUFFY suggested that instead of being struck out the subject should simply be not dealt with. It might seem discourteous to strike it out.

The motion was not seconded, and the subject was dropped.

Obliteration of Stamps.

As to obliteration of stamps issued to collectors,

Hon. J. GAVAN DUFFY said that this matter was becoming somewhat of a nuisance. Many people seemed to be fanatics in regard to collecting stamps, and latterly in Victoria the department had been placing a courtesy post mark upon them. This was done in order that the stamps might not be used for postage purposes by those who obtained them. That did not do away with the philatelic value of the stamps. He thought that a uniform method ought to be adopted by the different colonies. It should be clearly arranged so that stamps given out for purposes of collection could not be otherwise used. He moved,—

“This Conference is of opinion that all stamps issued to collectors should be post-marked, so as to prevent them from being used for postal purposes.”

Hon. J. R. DICKSON seconded the motion.

Hon. J. G. JENKINS moved as an amendment,—

“That the word ‘specimen’ should be placed across the stamps issued to collectors.”

Hon. JOSEPH COOK seconded the amendment.

Hon. J. GAVAN DUFFY said that as the weight of opinion appeared to be against him, he would withdraw the motion.

The amendment was then put, when

The PRESIDENT said that it appeared from the voices that it would be his duty to give a casting vote. He regarded the Post Office as an institution maintained by the Government for postal purposes only, and would therefore vote for the amendment, and declared it carried.

Hon. JOSEPH COOK moved—

“That all postage-stamps issued to the Berne Postal Bureau or between Post Offices shall bear an obliteration with the date-stamp.”

Hon. J. G. JENKINS seconded, and the motion was agreed to.

Newspaper Supplements.

Hon. J. GAVAN DUFFY said: In the Victorian Post Office Act, which, he took it, was similar to if not identical with that of other colonies, a newspaper supplement was said to be wholly and substantially part of the newspaper; but he wanted to call the attention of the Conference to tradesmen’s handbills and insets being sent in the newspapers through the post, and his department held that such were not supplements within the meaning of the law. He would like to have the matter discussed. It was claimed in Victoria that such handbills were supplements within the meaning of the Victorian Act. He formally moved—

“That an inset or a handbill shall not be regarded as coming within the definition of a newspaper supplement under the Post Office Acts.”

Hon. J. G. JENKINS seconded. As far as his colony was concerned their regulations did not allow such so-called “supplements” to be carried in newspapers.

Hon. JOSEPH COOK said it was never anticipated that such things should be carried in the newspapers. It was a means of distributing small handbills for shopkeepers, for which the newspapers were paid. It would never do in New South Wales, where the newspapers were carried through the post free. It was an abuse against which decided action should be taken.

Hon. J. R. DICKSON quoted the Queensland Act and regulations bearing on the subject, and supported the motion.

Motion put and passed.

Queensland’s Treatment of other Colonies’ Newspapers.

Consideration of operation of the Suppression of Gambling and Indecent Advertisement Act of Queensland, in connection with newspapers published outside Queensland and forwarded by post to that colony.

Hon. J. GAVAN DUFFY wondered if there was anything to be done with their friends from Queensland in this matter. As Mr. Dickson knew, this matter had been a bone of contention between Queensland and the other Colonies for years. He had put the subject down on the notice-

paper to see if Queensland could not be induced to fall into line with the other Colonies. That Colony had been treated with every fairness and courtesy, and he did not think Queensland realised the amount of restraint and restrictions that her laws had imposed upon the press of all the other Colonies. He did not wish to force this on his hon. friend, but he thought, perhaps, that a few friendly remonstrances from his fellow Postmaster-Generals of the other Colonies would have some effect upon him.

Hon. JOSEPH COOK : What have they been doing ?

Hon. J. GAVAN DUFFY : Stopping all newspapers from the other Colonies coming into Queensland at the same rate as we allow Queensland newspapers to come into the other Colonies. Proceeding, Mr. Duffy said he did not wish to put a motion before the chair, but he trusted his hon. friend would have the matter thoroughly looked into. Though Queensland had not yet joined the proposed federation they trusted that she would do so soon. (Hear, hear.) In these days of federation it was hardly right for one Colony to stand aloof from its neighbours in postal matters.

The PRESIDENT : We must have some definite motion before the Conference. It had better be put that representations be made to Queensland—

Hon. J. GAVAN DUFFY would adopt the President's suggestion, and move—

“That representations be made from this Conference to the Post Office authorities in Queensland, pointing out that the operation of their Suppression of Gambling and Indecent Advertisements and Post Office Acts in regard to newspapers published outside Queensland, and forwarded by post to that Colony, is a restriction upon the Australian press.”

In fact, newspaper proprietors sending newspapers into Queensland had to publish special issues before they could get them delivered in Queensland, or do as the Czar of Russia did with newspapers going into that country—blacken out a page ; and, in addition, Queensland imposed a much higher rate of postage on newspapers from outside than the other Colonies imposed on Queensland newspapers.

Hon. JOSEPH COOK could not see his way to support the motion in regard to Queensland suppressing gambling and indecent advertisements.

Hon. J. GAVAN DUFFY : I want to include a representation to them to modify their postage rates on newspapers.

Hon. JOSEPH COOK would second the motion for the sake of discussion.

Hon. J. R. DICKSON said his Colony had endeavoured to suppress a growing spirit for gambling, especially among their youths, and the restrictions in these respects, and with respect to indecent advertisements which had been thus imposed, applied equally to newspapers published in Queensland as to those coming from outside. He recognised that the press of the other Colonies had met them very fairly in this matter, and had endeavoured to conform to the new legislation by excluding from the columns of their papers entering Queensland such advertisements as were objected to. Having the law before them, the Queensland postal authorities were bound to act up to it. As to the postal rates charged upon papers coming in from the other Colonies, that was a separate matter. Before the rates were altered the Colony was inundated with newspapers from the other Colonies, and which were carried gratuitously. The Colony was a large one, much of it was sparsely populated, and the distances were long, and so the cost thus incurred became too great. On that account it had been found imperative to charge for the newspapers at the rates now in force. Perhaps upon fuller consideration of the matter the Government of Queensland might, in the future, feel justified in modifying the restrictions at present imposed ; but when those special Acts were passed they became imperative by reason of the ever increasing demoralising tendencies of the advertisements objected to. At that time the Parliament might have gone to extremes, but such legislation was much required, and the respectable press, both of Queensland and the other Colonies, deserved to be thanked for the readiness with which they had conformed to the views of the Parliament of that Colony.

Hon. J. G. JENKINS would support the Resolution if it was limited to a protest against the high postage rates charged in Queensland on Intercolonial newspapers. It would only be right that Queensland should have the same intercolonial postage rate.

Hon. JOSEPH COOK thought that Queensland was to be congratulated on her Act against indecent literature and gambling. The efforts made in the other places to drive out gambling had resulted in sending it to another Colony. They ought not to do anything to hinder Queensland from continuing her crusade against gambling and indecent advertising ; it was a step in the right direction. If the mover would eliminate certain matter from the Resolution, he would support it. The charges levied by Queensland on intercolonial newspapers at the present time was exorbitant. They charged 2*d.* on certain Sydney weekly newspapers that were sent to that Colony ; that was a rate which specially applied to back-woodsmen, as the newspapers referred to were largely availed of by people resident in the country.

Hon. J. GAVAN DUFFY expressed pleasure at hearing that Queensland was not only so good as she claimed to be, but was also as good as she ought to be. He readily agreed that gambling to the extent that it had taken root in Australasia was becoming a public danger. With regard to indecent advertising, they were all agreed that it should be put down. In reference to

gambling advertisements, he was sorry to see that Queensland had gone so much further in the matter than the other Colonies had done. It was to be hoped that the whole of the Colonies would deal firmly with indecent advertising, but he did not agree that the gambling advertisements did so much harm as was suggested. He intended, with the permission of the other Members of the Conference, to withdraw his Resolution and propose another. He hardly liked to say that the rate in Queensland was exorbitant, but it was excessively heavy. It was not in the interests of any Colony that the people should be denied outside newspapers owing to a heavy rate. Victoria did not try to keep other colonial newspapers from her people. He hoped that the Queenslanders would see their way to deal with the Colonies in the way that the other Colonies dealt with them.

Leave was then given to withdraw the motion.

Hon. J. GAVAN DUFFY said that the following was the motion which he would submit in place of the one withdrawn :—

“That representations be made from this Conference to the Post Office authorities of Queensland, pointing out to them that the high rates charged on newspapers coming from the other colonies is an unjustifiable restriction on the Australian press.”

Hon. JOSEPH COOK seconded the motion.

After further discussion,

The PRESIDENT said that before putting the motion he wished to refer to a remark made with reference to the gambling having drifted to another colony. It would be just as well for the members of the Conference to carry away a correct idea of how the gambling was carried on. He would have been glad if they could have had an opportunity of visiting the racecourse in order to see what immense advantages Tasmania possessed by reason of her management of the Gambling Act. Tasmanians when visiting the racecourses on the mainland found objection to the noisy system of bookmakers, which held forth such inducements to the young, who were inclined to gamble. They found that the totalisator system in Tasmania did not inculcate gambling into the young of the colony, as representatives from the other colonies supposed.

The motion was then put and passed.

Urgent Telegrams.

Hon. JOSEPH COOK moved—

“That the system of ‘urgent’ telegrams in operation in six Colonies of Australia be abolished.”

They in New South Wales never had, as a matter of fact, concurred in the proposal to treat certain messages as “urgent” over others. It was not the right thing to allow certain people to have a monopoly over the telegraph service because they were able to pay an extra rate. The system was often most vicious in its application. A poor man with only 1s. in his pocket could only pay that sum for his message at the ordinary rate, and had to wait until perhaps 50 or 60 urgent messages paid for at a higher rate took precedence. The telegraphs being maintained by the Governments of the colonies, the telegraph rate should be made the same to every member of the community.

Hon. J. GAVAN DUFFY would second the motion as a matter of courtesy to his hon. friend, not that he believed in it—quite the contrary.

Hon. J. G. JENKINS moved as an amendment,—

“That the matter be referred to the Permanent Heads of Departments for report.”

In his colony they had power by Act of Parliament to charge for “urgent” telegrams, so any postmaster, even if the motion was passed, would be obliged to send “urgent” telegrams. But beyond that, he did not think the proposal was a wise one.

After further discussion,

Hon. J. R. DICKSON could not say that he was in favour of either the motion or the amendment. A man might get a special train to proceed to a place—it was all a matter of paying.

Hon. J. GAVAN DUFFY: Withdraw.

Hon. JOSEPH COOK hoped Mr. Jenkins would not withdraw the amendment. There was no parallel at all between a man paying for a special train and men, because they had the money, monopolising the public telegraph service. A man could only get a special train so long as he did not inconvenience the public using the ordinary trains. A special train could be delayed by an ordinary train, but the ordinary telegraph business of the country was compelled to wait until specially paid for “urgent” telegrams had passed over the wires; and that, he held, was unfair, making it a source of trouble, inconvenience, and annoyance.

The amendment was agreed to. (See Report of Sub-Committee, page 76.)

Telephonic Communication.

On the subject of “Establishment of telephonic communication between the capital cities of the Australian Continent,”

Hon. JOSEPH COOK said that the question was one that had been raised from time to time by the various Chambers of Commerce. No doubt it would be a desirable thing to have a thorough

connection by telephone between the various metropolitan centres if it could be done on a commercial basis. It appeared, however, that the cost would be out of proportion to the benefits derived from its establishment. Long distance wires were becoming the fashion, but whether the time had arrived for the system to be established among the colonies he was not prepared to say. It would be advisable to refer the matter to the heads of the departments. If the cost was shown to be reasonable as regarded its construction, he did not think that anyone would object to its introduction. He moved—

“That the matter be referred to the Heads of Departments, with a view of ascertaining what the cost would be, and also information as to the possible loss to the telegraphic revenue.”

Hon. J. GAVAN DUFFY seconded the motion. He was not prepared to say that Victoria would, at first, be prepared to take part in the undertaking. If the telephonic system were adopted, it would, of course, destroy to a certain extent the revenue derived from the telegraph. Such things would progress, however, and the telephone in course of time would almost completely supersede the telegraph. He had at times used the telephone, which extended over a long distance, and had found it to work well.

Hon. J. G. JENKINS supported the proposal. A great deal of information had been obtained in 1892, but no doubt things had very much changed since then. At the time to which he referred it was shown that the undertaking, if entered upon, would cause a heavy loss. He had no objection, however, to further information being obtained with reference to the matter.

Hon. J. R. DICKSON also approved of the subject being considered by the heads of departments. He agreed with the Hon. Joseph Cook that the telephonic system was bound to come. It was only a question of time. They must not rest content with the facilities that were at present enjoyed. In Queensland one of the gold-mining towns was connected with Townsville, a distance of 82 miles. The same wire used for the telegraph was also utilised for the telephone, and the results were in every way satisfactory. It would be a wise thing to refer the matter to the permanent heads to report upon.

The motion was put and passed. (See Report of Sub-Committee, p. 76.)

Adjournment.

The Conference adjourned until 10:30 A.M. next day.

FRIDAY, 1ST APRIL.

Papers.

The PRESIDENT laid on the table the minute of his appointment as a Delegate to the Conference; also Post and Telegraph Returns, (Tasmania).

Hon. J. G. JENKINS (South Australia) tabled the Minute of his appointment.

The Washington Conference.

In the matter of the ratification of Washington Congress, and consideration of the various Conventions entered into at Washington but not signed by the Australasian Delegate;

Hon. J. GAVAN DUFFY moved—

“That this Conference recommends to the Governments of Australasia the ratification of the treaty entered into at Washington at the last Universal Postal Congress. That the Sub-Committee of Permanent Heads be requested to report to the Conference—1st. On the several matters left optional by the principal treaty; 2nd. On the various subsidiary treaties entered into by some Administrations at Washington, but not signed by the Australasian Delegate.”

In rising to move this resolution, he said he thought that in the first place he should take this first public occasion offered him of thanking his fellow Postmaster-Generals for the honour and distinction which they conferred upon him in sending him to the Washington Congress as the representative of Australasia. He would never forget their having done so, and the kind manner in which it was done. Where every one was so kind in the matter, it would perhaps be improper to single out individuals; but he could hardly pass on without mentioning the Hon. Joseph Cook, Postmaster-General of New South Wales, who, if he had pressed his claim to have gone to the Congress it could scarcely have been refused. In thanking them he would say he was especially proud of the Commission because he was, he believed, the first to have held a Commission for all the Colonies of Australasia for any purpose. On that occasion he looked upon himself in some respects as a forerunner of the Federation they were all hoping now to see brought about. Having described the gathering as a most interesting one, with representatives from every independent nation in the world, the picturesqueness of some of the costumes worn, such as that of the representative of Corea, the hospitality enjoyed, and the great ability many delegates displayed—though at the same time he felt that Australasia had occasion to be proud of its Todds and its Lambtons, and others whom he met at the Australasian Postal Conferences—the speaker said: The result of

the labours of the representatives at the Congress was now before them. He hoped that they would ratify the treaty which he had had the honour of signing on behalf of Australasia. The treaties themselves had only just reached the Colonies, and the English translations had not yet arrived. He had taken out all the changes made by the last Congress in the treaty of Vienna, by which they were formerly bound. These changes had been printed (see page 43), but he realised that it would be hard to follow them without having the full context of the Convention itself before them. At these meetings of postal matters a great amount of minor detail had to be considered. He desired to call attention to the second part of his motion. It struck him when at Washington that it would be better if they were furnished with all information about the subsidiary treaties. It would be well to be furnished with those treaties in order to consider them at leisure to see if they would not be of advantage to the Colony on the whole. Although nothing might be done in the matter for a year or two, he desired to draw attention to them with a view to having them dealt with at the next Conference. There might be in the treaties some advantage worthy of adoption. The treaty also contained several clauses making it optional to do certain things if it were possible to do so. He understood that all the optional points that were in the old treaty of Vienna had been carefully considered. A matter that had been introduced of somewhat minor importance was the colour of stamps. He was not sure that they need trouble themselves about that, because if federation were brought about it would put postal matters in Australia on a different footing. Before he left Washington he had sent a short report to the various administrations which he represented which he thought contained pretty well the gist of the matter. In accordance with instructions he twice brought before the Congress the question of prohibiting the carriage in the mails of indecent and obscene literature. He regretted to say that his motion was both times lost by a majority of four votes; not that the majority approved of the matter, but that they were afraid of establishing what might be a censorship of the post offices. A material matter in which the treaty of Washington made a change from the former treaty was on the question of transit rates and the taking of statistics. By a large majority a motion had been carried reducing territorial and maritime transit rates. It was decided that the statistics should not be taken afresh before the meeting of the next Congress, which would meet at Rome in about five or six years hence, but were to be calculated on the last statistics taken in 1896. In other respects it went without saying the treaty at Washington was certainly a benefit to all the countries within the postal union, and a great deal of care had been taken and skill displayed in remedying the defects of the former treaty, and putting the whole business of the union on a better and surer basis.

The PRESIDENT said it was understood the second portion of the motion dealing with the reference to the permanent heads was to be taken first.

Hon. J. R. DICKSON rose to second the motion, and, referring to Mr. Duffy's interesting speech, said that gentleman had justified the wisdom of selection made in him as the representative of Australasia. In Queensland the Postal Department had but just come into possession of the very bulky tome containing a report of the Conference, and the heads of departments could not yet be fully conversant with the bearing of the various proposed changes, and it was therefore very desirable a report should be obtained from them before they recommended the Governments of Australasia to ratify the treaty as a whole. The press reports of the Washington Conference had been very meagre—

Hon. J. GAVAN DUFFY: Yes, we had great difficulty with the American press. One day we would be referred to as snobs, and another as puppets of European kings. (Laughter.)

Hon. JOSEPH COOK supported the motion, and thought it very necessary the permanent heads should report as to how the proposals would affect the colonies. Some very serious alterations were proposed in respect to territorial and maritime transit rates that would affect the British Empire much more than any other people in the world, for the simple reason that Great Britain had such a preponderance of the traffic of the world, and it would be well for the permanent heads to let them know what these alterations would mean even to these colonies. The reductions, it was true, were proposed on a sliding scale over a term of years, but at the present time they did not know what the probable effect would be.

Hon. J. G. JENKINS supported the motion, and, after remarks highly complimentary to Mr. Duffy, agreed with Mr. Cook that the proposed changes in territorial transit rates was a matter needing careful consideration by the permanent heads before unqualified approval was expressed.

Hon. J. GAVAN DUFFY, closing the debate, considered the transit rate question a most important one, and this had been a subject of the greatest controversy at the Washington Congress, the result being in reality a compromise between the views of the German representative on the one side, and the English and Colonial on the other. He himself had got a little more heated than he need have done during those discussions, which were in French, and had intimated that, though signing the treaty, if the fact proved that the loss involved was greater than the Colonies could reasonably bear, advantage would have to be taken of a clause allowing any State to withdraw from the Union. This extreme measure he did not, however, anticipate would be necessary.

The second part of the motion was put and passed. (See Report of Sub-Committee, p. 75.)

Hon. J. GAVAN DUFFY moved that the first part of the original motion be discharged, and made an order for next day.

The motion was agreed to.

Hon. JOSEPH COOK moved :—

“That this Conference hereby records its appreciation of the zealous and able manner in which Hon. J. Gavan Duffy, Postmaster-General of Victoria, discharged the duty of representing Australasia at the Washington Postal Conference.”

Hon. J. R. DICKSON seconded, and the motion was passed.

Hon. J. GAVAN DUFFY thanked the Conference in suitable terms. He was pleased to say that it had come to him from outside sources that his efforts at the Congress were not altogether unsuccessful. (Hear, hear.)

Report of Permanent Heads of Departments.

The Report of the Sub-Committee of Heads of Departments on the subjects submitted to them was next considered, most of the recommendations being agreed to. (See Minutes of Proceedings, pp. 18, to 40.)

Queensland Mail Service.

The Sub-Committee reported :—

“It is admitted that the present railway arrangements are extremely inconvenient to Queensland in regard to the connection of the English mails at Sydney. If any arrangement could be made by which the Commissioners of these two Colonies could arrange for a train to leave Brisbane about 1.30 p.m. on Monday, to arrive at Sydney at 5 p.m. next day, this would enable the Queensland public to post up to noon on Monday, instead of the business people having practically to close their correspondence on Saturday evening.”

Hon. J. R. DICKSON explained that lately the Queensland train service had been extended considerably north of Brisbane, and under the new arrangements places which formerly received mail matter by steamer now were supplied by train. He was looking forward to the time when some general action would be taken in the direction of a tidal or mail train running through the whole of the mainland. He knew that even the step now suggested would mean expense, but it was justifiable, and they must face it on a fair basis.

Hon. J. GAVAN DUFFY thought it the duty of the Conference to try and help Queensland in this direction, and while believing in the idea of facilitating arrangements between Queensland and New South Wales, was still more in favour of Mr. Dickson's contention that the time had come that the Colonies should have a postal train going through the whole continent, so that every colonist who wished to send a letter by mail should be able to do so at the earliest possible moment. (Hear, hear.)

Hon. J. G. JENKINS appreciated the suggestion of the permanent heads, but he was inclined to think it would be better to withdraw in favour of any arrangement that could be made for a special mail train. He saw no reason why an arrangement should not be made for a special mail train to run once a week from Brisbane direct to Adelaide. Of course it would involve a change of gauge and transfer of mails: but instead of a delay of several hours in Sydney and Melbourne the train might be accelerated to arrive in Adelaide without any special delay. The Colonies despatching their mails by such a train would all benefit by the expedition, even Tasmania. A rapid mail train from Brisbane right through to Adelaide would carry many passengers who could not, perhaps, be carried otherwise. He would suggest that this matter be referred to the Railway Commissioners of the whole of the Colonies.

Hon. JOSEPH COOK sympathised very much with Queensland, and if that Colony could be helped in the matter he would like to see it done. Such a mail train would be very desirable, but the difficulty was the enormous cost. As the result of repeated conversations with Commissioners on this very point, it was found that a special mail train per week between Brisbane and Sydney would cost £5000 a year, and to run one through to Adelaide would cost £10,000 to £12,000. If the Colonies would agree to incur that cost something might be done in that direction. It would be an admirable thing to have such a train not only as an express for mails, but also for passengers, and as an additional facility for travelling. He would like to see it, but felt justified in saying that £10,000 was too much to pay for it. The service of such a train would relieve the clerks of Sunday work, just as the previous change had relieved them in Sydney, and which was much appreciated.

The Report was agreed to.

Special Trains.

On the question of a special train in the event of mail steamers reaching Largs Bay on Saturdays and Sundays, the permanent heads reported as follows:—“As bearing upon the English mail train service, and considering the likelihood under the present contract of the steamers frequently reaching Largs Bay on Saturday and Sunday, we have considered the question of making some provision for forwarding these mails on to their destination by special trains, and thus avoiding the great delay which would be otherwise unavoidable. A memorandum showing possibilities in regard to special trains is appended, and we recommend that the question therein set forth be remitted for the favourable consideration of the Colonies concerned.”

Agreed to.

The Conference adjourned until 10 A.M. next day.

SATURDAY, 2ND APRIL.

Papers.

Hon. J. G. JENKINS tabled Statistics of the South Australian Post and Telegraph Department for 1897.

Report of Sub-Committee.

The Conference continued consideration of the Report of the Sub-Committee of Permanent Heads.

On the question of intercolonial telegraph rates, resolution of Conference of Chambers of Commerce *re* intercolonial telegraph charges, reduction of New South Wales telegraph rates, and alteration in mode of charging on inland and intercolonial telegrams ;

The Permanent Heads Committee presented a lengthy report explaining the position. The question of reducing the rates—2s. for the first 10 words, and 2d. each additional word on telegrams between New South Wales and Queensland, has been under consideration on several occasions. They concluded :—

“ We are still of opinion that any re-arrangement of charges should be on the basis of charging for every word, whether in addresses or text. This is the international principle. We would also respectfully point out that the present rates appear very reasonable when the great distances covered and the small population are taken into consideration. They compare very favourably with those obtaining in Europe.”

On the motion of the Hon. J. GAVAN DUFFY, the Report was considered in Committee.

Upon the Conference resuming,

The PRESIDENT read the following formulated Resolution that had been drawn up :—

“ That this Conference regrets that owing to the financial losses involved, the question of a general reduction in the prices of Intercolonial telegrams must stand over for the present, and makes no suggestion on the question of limitation of addresses.”

Hon. J. GAVAN DUFFY would like to add to that Resolution, that it was suggested that the Post Office Departments of New South Wales and Queensland might make an arrangement between themselves as regards the telegrams passing between those two Colonies. He moved that the following be the words added :—

“ But it is suggested that the Governments of New South Wales and Queensland should arrange between themselves as to the limitation of words and addresses.”

Hon. J. G. JENKINS seconded.

Hon. J. R. DICKSON, before the motion was put, wished to say, for the purpose of recording the position he occupied, that his Colony desired that a closer arrangement should be made not only between New South Wales and Queensland, but also with the other Colonies. In the meantime he had moved in Committee a Resolution for the purpose of re-approaching New South Wales. It was as follows :—

“ That any re-arrangement in charging may be on the basis either of charging for every word, whether in addresses or text, such being the International principle, or of allowing the address and signature to the number of 12 words to be sent free.”

The Government he represented would be quite prepared to enter into an arrangement with New South Wales on the basis of that between New South Wales and Victoria, subject only to restrictions being placed on the number of words in the addresses. His Government was prepared to join New South Wales in a tariff of 10 words for 1s. text, and allow either 10 or 12 words for address and signature. He wished that to be understood, so that the fact might be recorded that he had done all he could to make a satisfactory arrangement as between New South Wales and Queensland. He hoped negotiations to that effect would be successful. There was a strong feeling in his Government in favour of adhering to the principle of the International Bureau. Queensland might enforce her own system within her own territory, but did not like the idea of telegrams coming from New South Wales being surcharged across the border.

Hon. JOSEPH COOK said it seemed to him that what Mr. Dickson had said went a long way towards what was desired. When he (Mr. Cook) returned to Sydney he would have the whole question of the average number of words in signatures and addresses connected with messages travelling between New South Wales and Queensland looked into, and unless he found some very violent reasons he would be glad to fall in with Mr. Dickson's wishes. On the other hand, he hoped that if he found New South Wales telegrams were not passing the limit, Mr. Dickson would take a common-sense view of the matter.

The Resolution was then passed.

Hon. J. GAVAN DUFFY moved—

“ That the Motion introduced by Hon. J. R. Dickson in Committee, but which was not seconded, be placed upon the Records.”

Hon. J. G. JENKINS seconded, and the motion was agreed to.

Share-dealing by Telegraph Operators.

Hon. J. GAVAN DUFFY said, with reference to share-dealing by employees, that in Victoria any telegraph employee dealing in shares was dismissed, but the public ought to know why. Telegrams respecting shares had been used for personal purposes.

Hon. J. G. JENKINS : Do you allow them to deal in shares as an investment ?

Hon. J. GAVAN DUFFY : No. I move—

“That in the opinion of this Conference telegraph employees should be absolutely prohibited from speculating in shares.”

Hon. J. G. JENKINS seconded the Resolution. But it was a question where speculation began. In South Australia it was discovered that operators dealt in telegrams respecting shares, and gave information of their contents to other people. The department held an inquiry into the matter, which resulted in the loss of some of their most able officers. Wherever they could suppress dealing or speculating in shares by telegraph employees they should do so.

The Resolution was carried.

Ratification of Washington Treaty.

Hon. J. GAVAN DUFFY moved—

“That this Conference recommend to the Governments of Australasia the ratification of the treaty entered into at Washington at the last Universal Postal Congress.”

He said : After reading the very able report of the Permanent Heads, especially considering the limited time at their disposal, regarding the various points in connection with the treaty, he thought the Conference could fairly recommend that it be ratified. (Hear, hear.)

Hon. J. G. JENKINS seconded, and said it had been made evident by the reports of the Permanent Heads that the material alterations suggested were profitable ones as far as the Australasian Colonies were concerned.

The motion was agreed to.

The Conference then adjourned until 10:30 A.M. on Monday.

MONDAY, 4TH APRIL.

Canadian Three Cents Postal Rate.

The PRESIDENT said : Before they proceeded to the business on the Agenda paper he had to call the attention of the Conference to a cable message that he, at their request, despatched a few days ago to the Postmaster-General of Canada, and to the reply which he had received by cable late on Sunday evening from Ottawa. The message which he despatched to Ottawa read as follows :—

To the Hon. the Postmaster-General, Ottawa, Canada.

I am directed by the Australian Postal Conference, sitting at Hobart, to inquire if it is intended to carry out the proposed reduction of postage from five cents to three cents, and to inform you of the objection of Australasia to concur in the proposition.

It was dated April 1 ; and to it he had received the following reply :—

Canada would welcome inter-Imperial uniform reduced preferential postal rates, but if that plan not approved of hopes she may be allowed, at her own expense, to reduce her out-going letter rate to all parts of the Empire, conceding like freedom of action to all other portions of Empire. Having regard to Canada's geographical and commercial position, existing postal rates constitute serious grievance. Meantime Canada has suspended all action pending approaching Postal Conference at London.—W. MULLOCK, *Postmaster-General*.

Hon. J. GAVAN DUFFY moved—

“That the cable reply from the Postmaster-General of Canada be received, and that the Conference resolve into Committee to consider the same.”

He understood that the Postal Conference now sitting in London required to know what Australasia was going to do in the matter. It would therefore be necessary to formulate the objections of this Conference to Canada's proposals.

Hon. J. G. JENKINS seconded, and the motion was agreed to, and the Conference resolved into Committee.

The Committee, after deliberation, submitted the following Report to the Conference :—

“That the various Agents-General delegates to the Postal Conference in London be instructed to oppose the proposal to reduce the rate of postage to all parts of the British Empire from 2½d. per ½oz. to 2d., and also the Canadian proposal to reduce her outgoing rate from 5c. per ½oz. to 3c. per 1oz., for the following reasons :—(1.) The present rate is not an unreasonably high one, having in view the large cost to the colonies involved in the maintenance of the present means of postal communication with the various portions of the Empire. (2.) Because of the anomaly which would be created by carrying letters 14,000 miles for the same rate as now charged for delivery

within the limits of the town where posted. Regarding the proposal of Canada to reduce her outgoing postage, this Conference is strongly of opinion that no reduction should take place which would be a departure from the present uniform rate, for the following reason, *inter alia* :—At present a charge of 2*d.* per $\frac{1}{2}$ oz. is made in Australia for the carriage of letters to however small a distance, while the Canadian proposal would involve the carrying of letters over the same routes at a greatly reduced cost. This would, in the opinion of the Conference, lead to confusion and dissatisfaction.”

On the motion of the Hon. JOSEPH COOK the Report was adopted.

Hon. J. GAVAN DUFFY moved that the following reply be sent to the Postmaster-General of Ottawa :—

“It is satisfactory to learn that your contemplated action *re* postage rates is postponed pending London Conference.”

The motion was put and passed.

It was agreed, on the motion of the Hon. J. G. JENKINS, that a copy of the Resolution should be despatched to the Premiers of the different colonies.

Alterations in Postal and Telegraph Rates.

Hon. J. G. JENKINS moved—

“That this Conference recommends to the Governments of Australasia that no alteration in international postal or telegraphic rates be made without the colony proposing to make such alterations advising the other colonies and endeavouring to arrange for uniformity of action.”

It was not necessary for him to make any lengthy explanation, as the meaning was patent to all members, excepting to say that in the past, in one or two instances, there had been some alterations made in one of the colonies in postal rates either in newspapers or letters, and they in South Australia thought it would be better—and he was sure the other members of the Conference would agree—that before any alterations, even of a trifling character, were carried out by the Postal and Telegraph Department of a colony, the same departments in the other colonies should be advised, so as to secure as far as possible uniformity throughout all the colonies. He especially referred to intercolonial postage. As to local alteration it would not so much matter.

Hon. J. GAVAN DUFFY seconded the motion. The observance of such a resolution would be most useful on the part of all the postal administrations of Australasia. Even over any slight change in the intercolonial postal and telegraph arrangements, the departments of the different colonies should first consult one with the other, so that all objections might be fairly considered and got rid of. He had much pleasure in seconding the motion.

Motion put and passed.

Telegraphic—Alternative Cable Route.

Hon. J. GAVAN DUFFY explained that Mr. Warren was present, and had received a reply from the Eastern Extension Telegraph Company to place before the Conference. He moved :—

“That the Conference resolve itself into a Committee to interview Mr. Warren.”

Motion was put and passed.

Upon the Conference resuming—

Hon. JOSEPH COOK obtained leave to move a Resolution without notice. He said they were all aware that the representatives of the other Colonies had been endeavouring during the last few days to ascertain from the manager of the E. E. Telegraph Co. (Mr. Warren) on what basis fresh arrangements could be entered into after next year for carrying on the cable business over the Company's lines. He had to express disappointment at the unsatisfactory nature of the reply received from the Company on the subject. Of course, Mr. Warren was only able to do what the Company authorised him to undertake. But with regard to the attitude of the Company, he thought the Conference had great reason to complain at the way they had acted. Negotiations had been pending with the Company during the sitting of the present Conference, and at the close of it they had no definite proposal from the Company, and nothing, so far as could be seen, by which any fresh arrangement could be entered into when the present undertaking ceased. In conducting the negotiations, the Conference had submitted three plain queries to be answered. If those queries had been answered there would have been something definite upon which to make a fresh arrangement. The most vague replies, however, were given to the questions that they had asked. The Company was asked, in the first place, what would be the cost of messages passing from the Colonies to England after the subsidy should expire during the next year; secondly, what would be the cost, assuming the subsidy was still paid to them, leaving out of count altogether the question of a duplicate cable. Another question asked the Company was—What would be the rate on messages, assuming the subsidy was paid and the Colonies entered into the Company's proposal for the construction of an alternative route? The Company simply said, in reply to those queries, that they could make no reduction in the present rates. The reply, in fact, was one that did not justify

consideration. The Company said that if they entered into the Cape route arrangement the price of Government messages would be reduced from 3s. 6d. to 2s. 6d. per word, and press messages from 1s. 9d. to 1s. 6d. There appeared to be no inclination to reduce the price of messages sent by the public. The Company got what concession was possible from the Government by means of a large subsidy, and were prepared to give the Government in return a concession amounting to about £2000. This amount, together with the concession that would be made to the press, would total about £4000 a year. Last year alone, which was a year of reduced traffic, the money collected in excess of the guaranteed amount was £50,000. Yet, in view of this extensive business, the Company was only prepared to make a reduction of about £4000. It seemed to him that such a proposal was inadequate, in view of the large subsidies that the Company had received during the last 20 years. It was not sufficient to induce them to enter into any fresh arrangement. It would be a reasonable proposal on the part of the Company if they had said we will give the public their messages at 4s. That would have reduced the amount of the Company's takings to about the guaranteed amount. After receiving the subsidy for 20 years the Company still wanted the subsidy, and were prepared to make no abatement on the present prices. The Company were disinclined to do anything except on the understanding that the colonies entered into the new project of an alternative route *viâ* the Cape. Instead of a definite plan being arrived at they were no nearer a solution of the matter than at the commencement of the Conference. The last response made by the Company was a very singular one. The telegram received by Mr. Warren stated that the Board had carefully considered the question in all its bearings, and, with every desire to meet the Colonies, it was found impossible to make any reduction in the ordinary charges. The Company said it would involve them in a loss of £60,000 a year. This last suggestion of theirs meant that they wanted the present receipts guaranteed to them, or that they required a guarantee of £45,000 more per year than was guaranteed three years ago. That was the plain English of the proposal. He thought, unless it could be shown that the cable *viâ* the Cape had some advantages for Australia other than from an absolutely strategic standpoint or the sentimental, the Empire point of view, they would not be justified in representing to their respective Governments that arrangements should be made on the basis laid down. Moreover, he did not think the Conference was in a position to make any arrangements with regard to the Cape Cable. That had been practically decided by the Conference of Premiers, whose views had already been communicated to the Home Government. The most this Conference could do would be to give utterance to an expression of opinion regarding this or any other proposal, as they were met primarily to make business arrangements on lines determined by the various Governments. Since the cable project was so absolutely a matter of policy, this concerned the Governments, and it would be *ultra vires* for the Conference to make arrangements with regard to a route not yet in existence. That being so, they were in the position that, since the Company had made no proposal with respect to fresh arrangements when the present subsidy expired, the delegates would have to go home without anything to recommend one way or the other. The Conference of Premiers had, by implication, decided that they would not subsidise this Cape Cable. He was aware this result had not been stated in so many words, but the Premiers had said they would subsidise the Pacific Cable, and had simply let the Cape proposal drop out altogether. A strategic scheme was paid for too dearly on the lines suggested by this Company. If they wanted an alternative route, it should be by means of Canada rather than the Cape. It seemed to him, that at the bottom of all this agitation was the feeling that the present rates were too high for the purposes of business, and the great advantage of an alternative cable under control of Government would be the establishment of competing rates, and the consequent gain to the public. He could only hope that the further negotiations which must undoubtedly take place would result in a more reasonable attitude on the Company's part, and that they would still gain some material concession with regard to the rates given to the public by this very powerful and widely ramified Company. He moved:—

“That, in the absence of any satisfactory proposal from the Eastern Extension Telegraph Company, and of any proposal at all except on the basis of an alternative cable *viâ* Africa, this Conference is unable to make any fresh arrangements with that Company.”

Hon. J. GAVAN DUFFY seconded the motion, and reminded the Conference that in 1872 the relations of the Company and Australia were very different, and the former had actually to go to the Government of South Australia to ask permission to land their cables upon the South Australian shores. But that pleasant state of things for the Governments and people of Australia had gradually undergone a change. They had spoon-fed the Company, and the more they had fed it the more spoon-fed they wanted to be. The first time the Government interfered was in 1879, when it became necessary, on account of frequent breaks, that a duplicate cable should be laid. The Company came forward and said they were prepared to lay it, but would it not be nice for the governments to give a little subsidy. They agreed, and gave £32,400 for 20 years; in other words, the governments of Australia were to pay for the making of that cable, extending over 20 years, and no doubt secured to the colonies a good service. People, however, began to grumble at paying 10s. or 9s. 2d. a word, and the Company were quite willing to reduce it, but suggested it would be nice if the governments would give a guarantee against possible loss. Well, the governments were willing to do some more spoon-feeding, and gave the guarantee, but business was so good that the guarantee practically ran itself out. Now, they had arrived at the present position. There were two matters which got mixed up, but which had no connection with each other. The subsidy of £32,400 that the colonies, except Queensland, gave to the Telegraph Company was in reality the

price for the duplicate cable; the other matter was the guarantee to the Company against the Company's receipts falling lower than £237,000 in the first place, and £227,000 in the second. Both the guarantee and subsidy would run out in October of next year; so that in October, 1899, all parties would be at perfect liberty. If the Company liked it could, of course, take up its cable and carry it away, but he had no doubt the people and the Company would be quite able to make satisfactory arrangements without the governments interfering. Still, there was this peculiar feature, that this was the only cable communication between Australia and Europe, Asia, Africa, and America, and without going the extreme length he had indicated, there was no doubt the Company might raise their prices to such a prohibitive figure as to practically shut the colonies off from the outside world. That was not a position in which the people of Australia should be placed, or allowed to remain in for any length of time, and the Company ought to be bound down on some terms that they should not charge those dealing with them more than a reasonable business rate. Failing this the colonies ought to be prepared to encourage competition, or, better still, to undertake rival lines themselves. That was the position that struck them all some time ago. A patriotic sentiment arose in Canada, and a strong desire to be linked with the Imperial Government and Australia. The Canadians came forward and offered to bear one-third of the cost of constructing a totally new line of cable across the Pacific, if Great Britain—who, by the way, he would say, had never behaved fairly to the Australian colonies in cable matters—would also pay one-third. That project was entertained very fairly, and at one time it seemed as though the line would be immediately constructed. But, for some reason or other, a blight had come over it, and they did not now hear of it. To his mind, if the Imperial Government would come forward and act more justly towards Australia than hitherto, and Canada would come forward and contribute her quota, as she had already intimated her willingness to do, we in Australia ought to be very glad to contribute our quota and have an all-British line, along which all those cabling would get messages at reasonable rates. (Hear, hear.) There was no object to serve but to secure for the public the cheapest and best service they possibly could. He would now say that he favoured a Canadian-Pacific scheme. What they wanted to get in Australasia was cheaper communication with the old country, and if possible an all-British one; but at any rate they did not want to give a monopoly to any company, however wealthy and effective that company might be. They required freetrade in telegraphy as well as in other matters, and as the Governments, both in Great Britain and in the Australian Colonies, had taken over the land lines, they should also have the oversea services as well. For these reasons he hoped the all-British Pacific cable scheme would come into great prominence. A new scheme had just dawned upon them, which they had never thought of before. The Eastern Extension Company, who already had a monopoly of the cable business of Australasia, agreed with the Imperial Government to a line by way of St. Helena, Ascension Island, the Cape and Mauritius, and so on to India, and then they thought it would be a grand opportunity of having an all-British line to Australia by extending an arm of the cable from the Mauritius to Australia. The idea seemed to have struck the people as an eminently Australasian matter, whereas, as a fact, Australia was not interested in the line at all until it got to the Mauritius. Only from there to Australia would it give these Colonies an alternative route. And an unfortunate feature of the route was, that it would involve the taking up of the cable already existing to Roebuck Bay—there being three lines—one to Roebuck Bay and two to Port Darwin. If Australia joined in a cable from Perth to the Cape, then, under such circumstances, there would only be three lines, as at present. He saw the advantage of the project from strategic, imperial, and commercial points of view; but, unfortunately, the Eastern Extension Telegraph Company, in endeavouring to secure that route, were securing a further monopoly and preventing the Pacific cable from being made. Such terms were not calculated to benefit the people of these Colonies from a commercial point of view, for they wanted a reduction of the present charges. Australia's subsidy ran out next year, and the company was naturally anxious to continue to receive a comfortable sum annually; but if Australia was to continue to fund £32,000 a year, even if they got the new route *via* the Cape provided, the game would not be worth the candle unless the charges were reduced. (Hear, hear.) That opinion had already been voiced at the recent meeting of the Premiers in Melbourne, and he could not, therefore, see how this Conference could arrive at a different conclusion. It would be preferable to break the monopoly by having the all-British Pacific cable, *via* Canada, and the Company should not have the monopoly and the power to prevent it. If the Company would agree to a more reasonable business rate, he would then be prepared to consider a fresh agreement with considerable favour. (Hear, hear.)

Hon. J. R. DICKSON regarded it as a matter for very great regret that the Eastern Extension Telegraph Company had not placed the Conference in possession of fuller information, or submitted such proposals as would have enabled the Conference to deal with the matter before they separated. He would say at once that, as far as Queensland was concerned, the Pacific cable route was that which was of primary consideration to her; but at the same time he would have been glad to consider any reasonable proposal the E. E. Company might have been prepared to make in regard to the duplication of their line. Had their proposals been of such a character as would mean giving the public cheaper cable rates, he would have been prepared to recommend his Government to consider the same favourably. Though Queensland dissented over the subsidy, she had come in over the guarantee.

Hon. J. GAVAN DUFFY: When there was nothing to pay.

Hon. JOSEPH COOK: Absolutely nothing. (Hear, hear.)

Hon. J. R. DICKSON: Well, we would have been prepared to discharge any liability that might have arisen. (Laughter.) He hoped the public would clearly understand the position. It was that up to the present the Eastern Extension Telegraph Company expected a continuance of the subsidy already paid for 10 years more, and that without any reduction, whatever in the cable rates (excepting some proposed minor reductions to the press and Government business), and that in face of the fact that the business had been continually increasing, and would doubtless continue to increase in the course of the next 10 years. The Company should be prepared to submit better terms, or permit some other means of communication by cable which would give these Colonies the advantages they ought to possess. He looked upon the proposed cable from the Mauritius as actually detrimental. It seemed that a cable *via* the Cape to the Mauritius was a matter that the Imperial authorities had approved of, and that its construction to that point had already been decided upon on account of its strategic advantages. The extension of that line to Australia (as well as to India) was what the Eastern Extension Telegraph Company had submitted for the consideration of this Conference, and to his mind it did not offer the advantages of duplication which the Pacific cable route would afford. But whether it would furnish a duplication or not, if it would confer upon the people of these Colonies cheaper cable communication he would be prepared to say that Queensland would join her sister Colonies in fairly considering it. He said that much because he recognised that although the Company had made a considerable amount of money out of their cable communication with Australia, they had furnished a very beneficial service between Australia and the rest of the civilised world. It was, undoubtedly, a company with strength and power, and fully capable of undertaking any increased cable accommodation financially, and having the plant to carry out such undertakings without unnecessary delay. If, therefore, they were able to meet the Conference with cheaper rates, he thought the Eastern Extension Company deserved consideration. Mr. Warren had been most attentive and courteous in the matter of these negotiations, and was to be absolutely excluded from all blame, for he had doubtless done his part in seeking to obtain for the Conference the information desired.

Hon. J. G. JENKINS joined with the other speakers in regretting that they were unable to come to some arrangement, either in the way of a renewal or some other arrangement with the Company. He would have been pleased if Mr. Warren had been able to place before them some proposal to reduce the charges to the public, irrespective of any line from the Cape. It was to be deplored that some arrangement could not be entered into with the Company for a number of years irrespective of any other line. There was nothing to be feared, however, although there would be some delay. It might appear as if they were placed in the power of the Company by failing to enter into some arrangement. It was very likely that within a few months' time they would be able to speak to the Company as a National Australasia, and then fresh negotiations might be opened up. There was no danger of excessive charges being made on the public in future. Excessive charges would only bring into existence early competition.

Hon. JOSEPH COOK wished to refer to a statement that had been made by the Hon. J. Gavan Duffy with regard to the construction of the Cape cable. It had already been decided to construct the cable from Mauritius, irrespective of any connection with Australia. Out of the 14,000 miles to be constructed *via* the Cape route, 10,000 miles had already been decided upon. Therefore, whether they agreed to any subsidy or not, that part of the cable had to be constructed, and, perhaps, the cable would be taken from Mauritius to India. The only part of connection they were directly interested in was from the Colonies to Mauritius. That was about 4000 miles. It was always represented by the Company that the cost would be £2,700,000. The great point to be considered was that the Colonies were interested in a small modicum of that sum, and that was a feature he would like the public to thoroughly understand.

Motion put and passed.

Hon. J. R. DICKSON said the matter of maintaining communication with the outside world was considered one of primary importance in Queensland. They believed that by the construction of a Pacific cable *via* Vancouver, communication would not only be obtained with the great districts of the Dominion, but it would also enable them to introduce a cheaper system of telegraphic communication than was likely to be obtained from any private company. It would have the advantage of destroying a monopoly, which at present was certainly not tending to reduce the charges commensurate with public business, and would also answer requirements until the time arrived when the Governments of Australasia, the Dominion, and Great Britain, acting in concert, could construct a line connecting the different portions of the Empire. The Premiers of the colonies had met from time to time to consider the question, and no later than this year the Committee made a recommendation on the subject. Therefore the question of communication had never been lost sight of. As the hour was getting late he would not detain them any longer, but move—

“That this Conference re-affirms the opinion that, in the interests of Australasia the Pacific cable project should be consummated as speedily as practicable, and that the Governments of the various Australasian colonies be requested to represent to the Imperial and Dominion Governments the foregoing opinion, together with the proposal of the Premiers, as agreed to at their recent Conference held in Melbourne, viz.:—‘That if Great Britain and Canada would each contribute one-third of the cost, the Colonies would be prepared to contribute the remaining one-third.’”

Hon. J. GAVAN DUFFY seconded the Resolution.

Hon. J. G. JENKINS explained that he did not wish to act out of harmony with the other colonies. He recognised the important fact that between South Australia and West Australia a considerable amount of telegraphic business was conducted, and at the Premiers' Conference recently held, the Premiers of West Australia and South Australia refrained from voting on a similar resolution that was proposed. In his opinion he could not do better than follow their example, and, while not opposing the motion, he would refrain from voting in support of it.

Motion put and passed.

The Overland Wire.

Hon. J. R. DICKSON said this was a matter which more particularly affected the working of the overland line between Adelaide and Port Darwin, and doubtless would afford an opportunity to the South Australian representatives to say something concerning the repeated faults which appeared to exist on that line. Queensland, however, had a direct interest in the South Australian overland line, inasmuch as she had extended her telegraph system to her western border, and was desirous that South Australia should connect therewith from Alice Springs, Reid's Creek, or such other point as would be most convenient to effect such connection. He moved—

“That the question in reference to the overland telegraph wires between South Australia and Queensland be referred to the Governments of those two colonies.”

Hon. J. GAVAN DUFFY seconded, and said in his opinion this matter of land-lines was of as great importance as that of the marine cables. The great complaint in West Australia, as in Tasmania, was that the land-lines were continually breaking down. The land-line crossed South Australia, traversing some hundreds of miles through desert country, and was continually breaking down one way or another. What they wanted was that the line between the Capitals of Australia should be put in such a state as to render regular and efficient service. He gave the South Australian Government great credit for the Adelaide-Port Darwin line, but then they had paid handsomely for it, and the least they had a right to expect in return was that it should be kept in efficient order. Beside that, they had the cable to Roebuck Bay, but could not make use of it, because as soon as the floods came the land-line was washed away, so that there was no efficient service in West Australia. What they really wanted in regard to Roebuck Bay was a new land-line service through West Australia, not touching the sea coast at all, but running inland, where it was not so liable to damage as was a line skirting the coast. He hoped the Conference would be able to make a suggestion to the Colonies of West Australia, South Australia, and Queensland, by which the existing state of affairs could be remedied.

Hon. JOSEPH COOK said something would have to be done as far as New South Wales was concerned, for the simple reason that things could not go on as they were at present. Business was disarranged, and had been for months past, and the great delays caused by land-line interruptions rendered the marine cable of little use. From a list of delays from December 9, 1897, to March 8, 1898, he found no less than 38 specific delays in the cable business. It had become quite a frequent thing to hear of interruptions. Last year there were over 60, but every month they were getting more frequent, and the statement at the head of newspaper columns that the cable was interrupted had become so monotonous and so provocative of bad language and loss of business and money, that it was imperative something must be done. They were all disposed to blame the Cable Company, and when, through the breaking down of the land-line, interruptions took place, people worried Mr. Warren, Manager of the Eastern Extension Telegraph Company, although he assured them that not a single interruption had taken place on his line for years past. Whatever had been said about the obligations of the Eastern Extension Company applied equally to the South Australia land-line. Their receipts were from £10,000 to £12,000 a year more than the amount the Colonies guaranteed three years ago, and he thought, as their receipts were swelling so enormously, they might spend a few thousands in putting this line in repair. He was sure, if they duplicated the line all through, it could be done for £150,000, and the losses through these interruptions would be equal to interest on £300,000. He did not hesitate to say the agitation in favour of the Pacific cable was greatly strengthened by the interruptions, the fault of the land-lines; but though they would not have anything to do with the Pacific cable, they sat quietly down while they had it in their own hands to remedy all this, and to make people positively love the Eastern Extension Company by attending to the land-line, the source of the mischief. Delays during the last six months had averaged eight or nine days per month, meaning immense loss to the business public. There was an absolute feeling of irritation and disappointment in Sydney and throughout the whole mercantile community of New South Wales through these vexatious defects in the land-line.

Hon. J. G. JENKINS said some years ago he had had the pleasure of listening to a lecture delivered by the Rev. Joseph Cook of Boston; just now he had had another all to himself by the Hon. Joseph Cook. (Laughter.)

Hon. J. GAVAN DUFFY: No. Only a simple relation of facts.

Hon. J. G. JENKINS: Well, he had been glad to listen, because it showed necessity for careful inquiry into the whole subject. The statements made by Mr. Cook might be perfectly true as regarded the number of breaks, yet not correct as applied to South Australia and West Australia. During the last 14 years, according to their statistical records, there had been only 67 breaks on the overland route to Port Darwin.

Hon. JOSEPH COOK: The hon. member says "breaks," not "interruptions."

Hon. J. G. JENKINS: No; interruptions. In 1897 the returns showed that the breaks in the overland line between Adelaide and Port Darwin were only four. If 1,000 messages had to be sent through, and New South Wales had to wait, that would be delay, but not an interruption. He read a list of items of breakages in the line which had taken place in 1897. The South Australian Government recognised that they had had a very good return for the line they had constructed; but they had already expended within their own territory over £100,000, and had provided for another expenditure of £30,000 to put the same in better repair. As to their line from Port Darwin, nearly all the interruptions were caused by floods and hurricanes; and it was proposed by the South Australian Government to construct a double line, as they were advised that such would avoid many of the present interruptions and breakages, being most anxious to get over these interruptions. His Government recognised the friendly spirit displayed by the other Colonies, and felt that if South Australia went to a large expense in duplicating the line or adopting an alternative route in the worst places, the other Colonies would not hesitate to compensate them for their enterprise. He would say, without binding the other Colonies, whilst trusting to their support, the South Australian Government had agreed to incur an expenditure of £50,000 to £60,000 to duplicate the wire to Port Darwin at places that were so dangerous, and when that was done, and the other Colonies had duplicate lines through their territories also, duplicate messages would be sent direct from Port Darwin to Melbourne and Sydney without re-transmission.

Hon. JOSEPH COOK: When will that be done?

Hon. J. G. JENKINS: I cannot say exactly. Sir Charles Todd tells me that everything is ready to send for the material. If that is the case we should have the line duplicated during the present year.

Hon. JOSEPH COOK: What about the other arrangement about duplexing?

Hon. J. G. JENKINS: The duplexing could be done at once.

Sir CHARLES TODD: The duplex will be working both ways in the same manner within the next two months.

Hon. JOSEPH COOK: We expect to have our line completed to Deniliquin in about six months.

Sir CHARLES TODD explained that frequently hours of delay between Adelaide and Sydney arose through the pressure on one line.

Motion put and passed.

Hon. JOSEPH COOK moved—

"This Conference has heard with satisfaction from the Representative of South Australia of the intention of his Government to take immediate steps for the improvement of the overland telegraph line, and urges him to impress upon his Government to lose no time in effecting the improvements suggested, and hoping the West Australian Government will take similar steps with regard to their overland line."

Hon. J. GAVAN DUFFY seconded. He was sure they had all heard with great satisfaction what the Hon. the Minister from South Australia had stated. No doubt his Government, having put their hands to the plough, would not look back, but carry the work through, so that the complaints now made in Melbourne and Sydney would not continue. He was sorry Western Australia was not represented at the Conference; but they trusted she would take similar steps in her territory, and thus secure an effective service right over the continent.

Motion put and passed.

Thanks.

Hon. JOSEPH COOK said that as the business of the Conference was completed, he had several votes of thanks to move. In the first place, he wished to move a cordial vote of thanks to the President for the courtesy, urbanity, and wisdom with which he had guided their deliberations.

Hon. J. G. JENKINS seconded the motion. He wished to endorse all that had been said regarding the capable manner in which the President had discharged his duties. It would not be out of place if he paid a tribute to the hospitality of the Tasmanian people.

Hon. J. R. DICKSON heartily concurred in what had been said by the previous speakers.

Hon. J. GAVAN DUFFY said he believed that the business had been conducted with all necessary decorum.

The motion was unanimously agreed to.

The PRESIDENT, in thanking them for the vote that had been passed, said it was a pleasure to meet the representatives from the other Colonies. That Conference might possibly be their last one, but against that one regret there would be, he hoped, the lasting pleasure of the consummation of Federation, the great destiny that they were all looking forward to, when the Colonies would be one in commerce, with one postage-stamp.

Hon. JOSEPH COOK proposed a vote of thanks to Mr. T. C. Just, who had so ably filled the office of Secretary at several Conferences.

The motion was supported by the Hons. J. G. Duffy, J. R. Dickson, and J. G. Jenkins, and carried.

Mr. JUST acknowledged the compliment.

A vote of thanks to the Press and the Secretary of the Hobart Post Office (Mr. H. V. Bayly) was next proposed by the Hon. JOSEPH COOK.

Hon. J. G. JENKINS seconded the motion. He felt sure that the Press had given the public a clear idea of their deliberations.

The other members of the Conference also spoke in support of the Resolution.

The motion was then put and agreed to.

This concluded the business of the Conference.

1898.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

POLICE DEPARTMENT.

(REPORT FOR YEAR 1897.)

Printed under No. 1 Report from Printing Committee, 30 June, 1898.

The Inspector-General of Police to The Principal Under Secretary.

Sir,

Police Department, Inspector-General's Office, Sydney, 7 January, 1898.

In compliance with the Chief Secretary's instructions, and as required by the Police Regulations, I have the honor to submit the following Report for the year 1897, respecting the Department under my control, accompanied by a statement, as usually furnished, of the strength and distribution of the Police Force on the 31st December.

New stations have been formed during the year at the places named hereunder :—

Metropolitan District	{ Longueville Wahroonga.
Northern District	{ Mullumbimby. North Lismore.
Southern District	{ Cathcart. Central Tilba.
Eastern District...	{ Bundanoon.
Western District	{ Capertee. Tomingley.
Bourke District	{ Bobadah. Comborah.
South-western District	{ Finley. Lockhart.
Murray District	{ Walla Walla.

Police-camps have been formed on the Hilltop-Exeter, Orange-Mullion Creek, and Frampton Railway deviation works, and at the Robertson-Macquarie Pass Public Road works. A constable has also been sent to Henty, in the Murray District, for duty during harvesting.

Additional police have been stationed at Cobar and Brewarrina in the Bourke District and Barraba in the North-western District; also at Walbundrie, Murray District, during the shearing season. A slight increase has also been made in the strength of the Force in the Metropolitan District.

The stations at the following places were discontinued during the year :—

Northern District	{ Brunswick. Narooma.
Southern District	{ M'Mahon's Reef. Bibbenluke.
Bourke District	{ Grawin.
South-western District	{ Round Hill.
Murray District...	{ Gerogery. Tooma.

To provide for the increase shown, and to fill vacancies occasioned as under, 107 appointments have been made during the year :—

Resignations	25
Discharges	17
Dismissals	2
Superannuations	22
Deaths	19

Eight police pensioners died in 1897 who had been in receipt of pensions amounting in the aggregate to £859 5s. 5d. per annum.

* 8—A

[735 copies—Approximate Cost of Printing S.L. (labour and material), £5 15s.]

Twenty-two

Twenty-two members of the Force were superannuated during the year, 15 receiving pensions at rates varying from £68 8s. 9d. to £245 per annum, amounting in all to £2,278 7s. 1d. per annum, and 7 being granted gratuities upon their discharge, which entailed a further charge of £940 10s. upon the Fund.

Thirteen widows of members of the Force were awarded gratuities from the Police Reward Fund, amounting in all to £2,673 13s. 4d., and two were granted pensions of £60 and £100 per annum respectively.

The investments of the Police Reward and Superannuation Funds having become exhausted, the income has been insufficient to meet the claims for pensions and gratuities. The balance required has been provided from the Treasury, an event probably foreseen when the Police Regulation Act of 1850 was passed (*vide* section 25). Considering, however, the strain upon the funds when the present Act was passed in 1861, and during the period bushranging was rife, it is a matter for surprise that the Funds have been self-supporting for so long a time—forty-seven years—even taking into account the extra 1 per cent. voluntarily contributed by the members of the Force for the past thirty years.

The following figures taken from the station watch-house records in the Metropolitan District show a decrease of 233 in the total number of apprehensions within that district during 1897 as compared with the previous year:—

Total number of arrests during 1896	22,226
Do	do	1897	21,943

There were 38 less apprehensions for drunkenness, simple or accompanied by disorderly conduct, than during the previous year.

As regards the Colony generally, there has been a large increase in the number of charges of criminal assaults on girls and women, the numbers for 1896 and the year just closed being 47 and 75 respectively. The number of cases of murder was considerably below the average, there having been only 6 as compared with 21 during the previous year. There have also been marked decreases in the numbers of cases of forgery and of horse and cattle stealing.

Burglaries and cases of thefts from dwellings are still numerous, most of the latter being from premises left unprotected. The total for the year is about the usual average.

The following statement will serve to show the extent of the licensing business transacted in the Metropolitan District during the year:—

Applications.	Granted.	Refused.	Withdrawn.	No Parties.	Total.
For new publicans' licenses		1	1
For Colonial wine licenses	74	22	9	11	116
For conditional licenses.....	1	1	2
By landlords, under sec. 16	13	1	14
For publicans' transfers	395	8	42	14	459
For Colonial wine transfers	40	2	42

At the close of the year the publicans' licenses in existence totalled 789, the same as in 1896; colonial wine licenses 292, an increase of 26; spirit merchants licenses 104, a decrease of 5; billiard licenses 122, a decrease of 20; and packet licenses 21, an increase of 3.

There were 1,151 inquests held during the year on the bodies of deceased persons, a decrease of 12 as compared with the previous year. In 84 cases death was attributable either directly or indirectly to intemperance.

193 inquests were held on fires, a heavy increase of 59 on the year 1896. 50 were returned as "wilful," 53 as "accidental," and 90 not specified.

The "missing friend" inquiries made by the Department continue to increase. During the past year 533 such inquiries, including 104 from the United Kingdom and abroad, have been undertaken, 261 resulting successfully.

Proceedings have been taken by the Police on behalf of the Public Instruction Department in 1,663 cases under the compulsory clauses of the Education Act, for neglect to send children to school, and recovery of fees, &c., and cautions issued by them in 194 cases.

Inquiries have also been conducted in 984 cases for the Master-in-Lunacy, 1,228 for the State Children's Relief Department and Government Asylums, 324 for the Mercantile Explosives Department, and 460 cases on behalf of the Superintendent of the N.S.S. "Sobraon." 560 notices were also served on behalf of the Land Board.

The duties devolving upon the police under the Health Act, which became law on the 1st January, 1897, have added considerably to the work and responsibility of many members of the force, who have to act as local authorities and sanitary inspectors, and generally to afford assistance to the Board of Health in carrying out instructions for the enforcement of the Act. This work is likely to increase considerably in the near future.

The undermentioned works in connection with buildings have been completed during the year on behalf of the Department:—

Castle Hill	Erection of lock-up.
Drake	Erection of court and watch-house.
Forbes	Erection of police barracks and stables.
Lismore	Additions to lock-up.
Marsden's	Erection of court and watch-house.
Parramatta	Erection of court-house and police barracks.
Sofala	Erection of lock-up.
Tumut	" "
Wee Waa	" "
West Maitland	Erection of court-house and police barracks.
White Cliffs	Erection of court-house and police station.
Wyalong	Erection of lock-up.

During the year a number of police have voluntarily attended courses of instruction under the St. John Ambulance Association. In the Metropolitan District 127 members of the Force hold ambulance certificates awarded by that institution.

It is interesting to notice the establishment of a police band. A high state of efficiency has been reached, largely due to the encouragement given by the Chief Secretary in authorising the payment of a highly competent bandmaster.

The Police Rifle Club and the Police Swimming Club are both flourishing and doing good work in an important direction. Many men have also perfected themselves in the use of the bicycle.

The usual increase to the establishment has not been provided on the Estimates for the current financial year. It will, therefore, be impracticable to comply with the numerous applications for additional police or new stations.

Numerous applications are made for employment in the Police Force, and no difficulty is experienced in obtaining men up to the standard both educationally and physically. Of the 107 new appointments made during the year, 40 were for the Mounted and 67 for the Foot Police. The average height and weight of the former were 5 ft. 9 $\frac{3}{4}$ in. and 10 st. 13 lb. respectively, and of the Foot 5 ft. 11 $\frac{3}{4}$ in. and 13 st.

Resignations during 1897 were 40 below the average for the previous ten years, which, no doubt, is to be attributed to the scarcity of employment in other directions and the relatively high rate of pay received. The number of discharges was also below the average, and the fact that there were only 2 dismissals during the year is in itself sufficient evidence to show that the conduct of the members of the Force has been good.

I have, &c.,

EDMUND FOSBERY,
Inspector-General of Police.

RETURN of the Strength and Distribution of the Police Force on the 31st December, 1897.

COMMISSION.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen,
Defender of the Faith, and so forth.

To Our Trusty and Well-beloved

WHITTINGDALE JOHNSON, Esquire, a Stipendiary Magistrate for the Metropolitan Police District of Our
Colony of New South Wales,—

Greeting :—

KNOW YOU, That We, reposing great trust and confidence in your ability, zeal, industry, discretion, and integrity, do, by these presents, authorise and appoint you to make a diligent and full inquiry into certain charges made by Mr. John Rowland Dacey, in the Legislative Assembly of our said Colony, on the 17th day of August last, against SENIOR-CONSTABLE WILLIAM E. QUELCH, and generally into the conduct of the said Senior-constable.

And We do, by these presents, grant to you full power and authority to call before you all such persons as you may judge necessary, by whom you may be better informed of the truth in the premises; and to require the production of all such books, papers, writings, and all other documents as you may deem expedient, visit and inspect the same at the offices or places where the same or any of them may be deposited; and to inquire of the premises by all lawful ways and means: And Our further will and pleasure is that you do, within one month after the date of this Our Commission, certify to Us, in the Office of Our Chief Secretary, under your hand and seal, what you shall find touching the premises: And We hereby command all Government Officers and other persons whomsoever within Our said Colony that they be assistant to you in the execution of these presents: And We do hereby declare this our Commission to be a Commission for all purposes of the Act 44 Victoria No. 1, intituled "*An Act to regulate the taking of evidence by Commissioners under the Great Seal.*"

In testimony whereof, We have caused these Our Letters to be made Patent, and the Great Seal of Our said Colony of New South Wales to be hereunto affixed.

(L.S.) Witness Our Right Trusty and Well-beloved Cousin, HENRY ROBERT, VISCOUNT HAMPDEN, Our Governor and Commander-in-Chief of Our said Colony of New South Wales and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this twenty-third day of September, in the year of our Lord one thousand eight hundred and ninety-seven, and in the sixty-first year of Our Reign.

HAMPDEN.

By His Excellency's Command,
JAMES N. BRUNKER.

Entered on record by me, in REGISTER OF PATENTS, No. 19, page 114, this twenty-fifth day of September, one thousand eight hundred and ninety-seven.

For the Colonial Secretary and Registrar of Records,
CRITCHETT WALKER,
Principal Under Secretary.

ROYAL COMMISSION OF INQUIRY INTO CERTAIN CHARGES AGAINST SENIOR-CONSTABLE WILLIAM E. QUELCH, AND GENERALLY INTO THE CONDUCT OF THE SAID SENIOR-CONSTABLE.

WHEREAS it is necessary to extend the time within which the Commissioner is to make his report in the above matter: Now, therefore, I do hereby, with the advice of the Executive Council, extend the time within which the said Commissioner is to make such report for a period of one month,—to take effect from the 23rd instant.

Given under my hand, at Government House, Sydney, this twentieth day of October, one thousand eight hundred and ninety-seven.

HAMPDEN.

By His Excellency's Command,
JAMES N. BRUNKER.

ROYAL COMMISSION OF INQUIRY INTO CERTAIN CHARGES AGAINST SENIOR-CONSTABLE WILLIAM E. QUELCH, AND GENERALLY INTO THE CONDUCT OF THE SAID SENIOR-CONSTABLE.

WHEREAS the time appointed for the return of the Commission in the above matter was by an instrument dated the fourteenth day of October last extended for a period of one month: And whereas it is necessary to extend the same still further: Now, therefore, I do hereby, with the advice of the Executive Council, extend the time within which the Commissioner is to make his return to and for a further period of one month beyond the time in and by the aforesaid instrument appointed for the purpose,—to take effect from the 23rd instant.

Given under my hand, at Government House, Sydney, this twenty-third day of November, one thousand eight hundred and ninety-seven.

FRED. M. DARLEY,
Lieutenant-Governor.

By His Excellency's Command,
JAMES N. BRUNKER.

ROYAL COMMISSION RE SENIOR-CONSTABLE W. E. QUELCH.

MINUTES OF PROCEEDINGS.

THE First Meeting of the Royal Commission to inquire into certain charges against Senior-constable W. E. Quelch was held on Monday, 25th October, 1897, at the Central Police Court, at 10 a.m.

PRESENT:—

WHITTINGDALE JOHNSON, Esq., S.M., Commissioner.

J. R. Dacey, Esq., M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared for Mr. J. R. Dacey, M.L.A., in support of the charges.

Mr. C. Bull, M.L.A., solicitor, appeared for Senior-constable W. E. Quelch.

The Commission appointing Mr. Whittingdale Johnson, S.M., a Commissioner to inquire into certain charges brought by Mr. J. R. Dacey, M.L.A., against Senior-constable W. E. Quelch, and generally into the conduct of the said senior-constable, was read.

An authority from His Excellency the Governor, dated 14th of October, 1897, extending the time within which the Commissioner may report to the 23rd of November, 1897, was also read.

Pending the appointment of a shorthand-writer the Commission adjourned until 10 a.m. on Wednesday, 27th October, 1897.

Confirmed,—

WHITTINGDALE JOHNSON, S.M.,

Sole Commissioner, 3rd November, 1897.

J. GARLICK, Secretary.

The Second Meeting of the Royal Commission to inquire into certain charges against Senior-constable W. E. Quelch was held on Wednesday, 27th October, 1897, at the Central Police Court, at 10 a.m.

PRESENT:—

WHITTINGDALE JOHNSON, Esq., S.M., Sole Commissioner.

J. R. Dacey, Esq., M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared for Mr. J. R. Dacey, M.L.A., in support of the charges.

Mr. C. Bull, M.L.A., solicitor, appeared for Senior-constable W. E. Quelch.

Mr. E. Harris, shorthand-writer Public Works Department, attended to take verbatim notes of the evidence.

The following witnesses were examined on oath:—Inspector Edmund Lawless, Constable William Richard Swan, Mrs. M. Brull, Senior-constable W. E. Quelch.

At 1 p.m. the Commission adjourned for luncheon.

On resuming after the luncheon adjournment the following witnesses were examined on oath:—Senior-constable W. E. Quelch, Mr. Isaiah Chaseling, Constable F. Robinson, Sergeant Thomas Vane, Constable W. R. Swan.

At 4 p.m. the Commission was adjourned until 10 a.m. on Friday, 29th October, 1897.

Confirmed,—

WHITTINGDALE JOHNSON, S.M.,

Sole Commissioner, 3rd November, 1897.

J. GARLICK, Secretary.

The Third Meeting of the Royal Commission to inquire into certain charges against Senior-constable W. E. Quelch was held on Friday, 29th October, 1897, at the Central Police Court, at 10.15 a.m.

PRESENT:—

WHITTINGDALE JOHNSON, Esq., S.M., Sole Commissioner.

J. R. Dacey, Esq., M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared for Mr. J. R. Dacey, M.L.A., in support of the charges.

Mr. C. Bull, M.L.A., solicitor, appeared for Senior-constable W. E. Quelch.

Mr. J. Garlick, shorthand-writer, was sworn to faithfully take and transcribe verbatim notes of the evidence and proceedings.

The following witnesses were examined on oath:—Constable G. H. Edwards, Inspector E. Lawless, Senior-sergeant R. Bell, Constable G. C. Harrison, Senior-constable W. E. Quelch, Mr. R. Friend, Constable W. Bruce.

At 1.25 p.m. the Commission adjourned for luncheon.

On resuming after luncheon the following witnesses were examined on oath:—Constable P. M'Evoy Brennan, R. H. Brewin, night-watchman and special constable.

At 4.40 p.m. the Commission adjourned until 10 a.m. on Monday, 1st November, 1897.

Confirmed,—

WHITTINGDALE JOHNSON, S.M.,

Sole Commissioner, 3rd November, 1897.

J. GARLICK, Secretary.

The Fourth Meeting of the Royal Commission to inquire into certain charges against Senior-constable W. E. Quelch was held on Monday, 1st November, 1897, at the Central Police Court, at 10 a.m.

PRESENT:—

WHITTINGDALE JOHNSON, Esq., S.M., Sole Commissioner.
J. R. Dacey, Esq., M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared for Mr. J. R. Dacey, M.L.A., in support of the charges.
Mr. C. Bull, M.L.A., solicitor, appeared for Senior-constable W. E. Quelch.

The Commissioner announced that, when the evidence was completed, he would not hear addresses from the solicitors on either side.

The following witnesses were examined on oath:—R. H. Brewin, night-watchman and special constable; Constable G. H. Edwards; Senior-constable W. E. Quelch; Constable A. Kidd; Constable Charles Willson; Senior-constable W. E. Quelch (recalled).

At 1 p.m. the Commission adjourned until 2:15 for luncheon.

On resuming after luncheon the following witnesses were examined on oath:—Senior-constable Quelch; Constable S. B. Guthrie; Constable M. Fitzgerald; Mr. W. Somerville, journalist; Mr. T. Coghlan, Clerk, Charities Department.

At 4:30 p.m. the Commission was adjourned until 10 a.m. on Wednesday, 3rd November, 1897.

Confirmed,—

WHITTINGDALE JOHNSON, S.M.,

Sole Commissioner, 3rd November, 1897.

J. GARLICK, Secretary.

The Fifth Meeting of the Royal Commission to inquire into certain charges against Senior-constable W. E. Quelch was held on Wednesday, 3rd November, 1897, at the Central Police Court, at 10 a.m.

PRESENT:—

WHITTINGDALE JOHNSON, Esq., S.M., Sole Commissioner.
J. R. Dacey, Esq., M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared for Mr. J. R. Dacey, M.L.A., in support of the charges.
Mr. C. Bull, M.L.A., solicitor, appeared for Senior-constable W. E. Quelch.

The minutes of meetings held on 25th, 27th, and 29th of October and 1st of November were read and confirmed.

The following witnesses were examined on oath:—Constable J. McIntosh; Mr. W. A. Newcombe, Clerk, Charities Department; Mr. A. Farnell, Clerk, Charities Department; Senior-constable W. E. Quelch.

At 1 p.m. the Commission adjourned for luncheon.

On resuming at 2 p.m. the examination of Senior-constable Quelch was concluded, and the following witnesses were examined on oath:—Mr. G. O'Donnell, gentleman; Senior-sergeant Bell; Inspector E. Lawless.

At 4:30 p.m. the Commission adjourned until 10 a.m. on Thursday, 4th November, 1897.

Confirmed,—

WHITTINGDALE JOHNSON, S.M.,

Sole Commissioner, 4th November, 1897.

J. GARLICK, Secretary.

The Sixth Meeting of the Royal Commission to inquire into certain charges against Senior-constable W. E. Quelch was held on Thursday, 4th November, 1897, at the Central Police Court, at 10 a.m.

PRESENT:—

WHITTINGDALE JOHNSON, Esq., S.M., Sole Commissioner.
J. R. Dacey, Esq., M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared for Mr. J. R. Dacey, M.L.A., in support of the charges.

Mr. C. Bull, M.L.A., solicitor, appeared for Senior-constable W. E. Quelch.

The minutes of meeting held 3rd November, 1897, were read and confirmed.

The following witnesses were examined on oath:—R. H. Levien, Esq., M.L.A., solicitor; Mr. T. Coghlan, Clerk, Charities Department (recalled); Mr. W. A. Newcombe, Clerk, Charities Department (recalled); Mr. J. H. Smithers, S.M.; Constable J. Lambert; Senior-constable W. E. Quelch.

At 1 p.m. the Commission adjourned for luncheon.

On resuming at 2:10 p.m. the following witnesses were examined on oath:—Senior-constable W. E. Quelch; Senior-constable J. Wilson; Mr. Biron Pogson, grocer, Regent-street, Redfern; Senior-constable Shaw; Constable Kidd; Senior-sergeant Vane.

At 5:15 p.m. the Commission adjourned until 2 p.m. Friday, 5th November, 1897.

Confirmed,—

WHITTINGDALE JOHNSON, S.M.,

Sole Commissioner, 5th November, 1897.

J. GARLICK, Secretary.

The Seventh Meeting of the Royal Commission to inquire into certain charges against Senior-constable W. E. Quelch was held on Friday, 5th November, 1897, at the Central Police Court, at 2 p.m.

PRESENT:—

WHITTINGDALE JOHNSON, Esq., S.M., Sole Commissioner.
J. R. Dacey, Esq., M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared for Mr. J. R. Dacey, M.L.A., in support of the charges.

Mr. C. Bull, M.L.A., solicitor, appeared for Senior-constable Quelch.

The minutes of meeting held 5th November were read and confirmed.

The

The following witnesses were examined on oath:—Mr. E. Watts, watchman and special constable, Railway Department, Eveleigh; Sergeant J. Houlahan; Senior-constable G. H. Harrison; Senior-sergeant R. Bell; Senior-constable J. Ingram; Senior-constable P. Corcoran.

At 5 p.m. the Commission adjourned, after arranging to inspect the premises known as "Myall House," Cleveland-street, Redfern, and Mr. Biron Pogson's grocery store, Redfern, on Monday, 8th November, 1897, at 11 a.m.

Confirmed,—

J. GARLICK, Secretary.

WHITTINGDALE JOHNSON, S.M.,
Sole Commissioner, 10th November, 1897.

The Eighth Meeting of the Royal Commission to inquire into certain charges against Senior-constable W. E. Quelch was held at Myall House, Cleveland-street, Redfern, on Monday, 8th November, 1897, at 11 a.m.

PRESENT:—

WHITTINGDALE JOHNSON, Esq., S.M., Sole Commissioner.

J. R. Dacey, Esq., M.L.A.; Senior-constable W. E. Quelch; Mr. T. Coghlan; Mr. W. A. Newcombe; Inspector E. Lawless; and Constable J. McIntosh.

Senior-constable W. E. Quelch, Mr. T. Coghlan, and Mr. W. A. Newcombe explained to the Commissioner where they were standing and what they did on the night of the 26th of July, 1896, when Quelch is alleged to have burgled these premises.

The Commission then adjourned to Mr. Biron Pogson's store, Redfern, at which place there were present:—Whittingdale Johnson, Esq., S.M., Sole Commissioner; J. R. Dacey, Esq., M.L.A.; Senior-constable W. E. Quelch; Inspector E. Lawless; Constable Lambert; Mrs. Pogson.

After inspecting the premises with reference to charge 7, the Commission proceeded to Margaret-street, where Senior-constable Quelch alleges he obtained the sand which in charge 8 is alleged to have been sugar.

At this point there were present:—Whittingdale Johnson, Esq., S.M., Sole Commissioner; J. R. Dacey, Esq., M.L.A.; Senior-constable Quelch; Inspector E. Lawless.

After leaving Margaret-street, the Commission proceeded to Absalom's vacant piece of land, Regent-street, Redfern, referred to in charge 8. There were present:—Whittingdale Johnson, Esq., S.M., Sole Commissioner; J. R. Dacey, Esq., M.L.A.; Senior-constable W. E. Quelch; Inspector E. Lawless; Constable Hill.

The Commission adjourned at 12:15 p.m. until 10 a.m. on Wednesday, 10th November, 1897.

Confirmed,—

J. GARLICK, Secretary.

WHITTINGDALE JOHNSON, S.M.,
Sole Commissioner, 10th November, 1897.

The Ninth Meeting of the Royal Commission to inquire into certain charges against Senior-constable W. E. Quelch was held on Wednesday 10th November, 1897, at the Central Police Court, at 10 a.m.

PRESENT:—

WHITTINGDALE JOHNSON, Esq., S.M., Sole Commissioner.

J. R. Dacey, Esq., M.L.A.; and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared for Mr. J. R. Dacey, M.L.A., in support of the charges.

Mr. C. Bull, M.L.A., solicitor, appeared for Senior-constable W. E. Quelch.

The minutes of meetings held 5th and 8th of November, 1897, were read and confirmed.

The following witnesses were examined on oath:—Constable E. Hill; Senior-constable W. E. Quelch; Constable F. Whitehair; Mr. H. Bath, carter for Mr. Jones, produce merchant, Redfern (Regent-street); Constable M. Fitzgerald; Constable J. Christison; Constable J. McIntosh; Senior-constable G. Proctor.

At 1 p.m. the Commission adjourned for luncheon,

On resuming at 2:5 p.m. the following witnesses were examined on oath:—Senior-constable J. Ingram; Mr. Biron Pogson, grocer, Regent-street, Redfern; Mrs. Robinson, widow, George-street, Redfern; Senior-constable W. E. Quelch; Senior-constable G. Proctor.

At 4:40 p.m. the Commission adjourned until 10 a.m. on Monday, 15th November, 1897.

Confirmed,—

J. GARLICK, Secretary.

WHITTINGDALE JOHNSON, S.M.,
Sole Commissioner, 15th November, 1897.

The Tenth Meeting of the Royal Commission to inquire into certain charges against Senior-constable W. E. Quelch was held on Monday, 15th November, 1897, at the Central Police Court, at 10 a.m.

PRESENT:—

WHITTINGDALE JOHNSON, Esq., S.M., Sole Commissioner.

J. R. Dacey, Esq., M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared for Mr. J. R. Dacey, M.L.A., in support of the charges.

Mr. C. Bull, M.L.A., solicitor, appeared for Senior-constable W. E. Quelch.

The minutes of meeting held 10th November, 1897, were read and confirmed.

The following witnesses were examined on oath:—Constable F. Whitehair; Inspector E. Lawless; Constable F. Robinson; Constable G. H. Edwards; Senior-constable W. E. Quelch; Constable J. McIntosh; Constable J. Cubitt; Sergeant Vane; Mr. A. Margoschis, pawnbroker, Redfern; Constable Hill; Constable N. Moore; and Constable G. H. Edwards (recalled).

At 1 p.m. the Commission adjourned until 2 p.m. on Tuesday, 16th of November, 1897.

Confirmed,—

J. GARLICK, Secretary.

WHITTINGDALE JOHNSON, S.M.,
Sole Commissioner, 16th November, 1897.

The

The Eleventh Meeting of the Royal Commission to inquire into certain charges against Senior-constable W. E. Quelch was held on Tuesday, 16th November, 1897, at the Central Police Court, at 2 p.m.

PRESENT :—

WHITTINGDALE JOHNSON, Esq., S.M., Sole Commissioner.
J. R. Dacey, Esq., M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared for Mr. J. R. Dacey, M.L.A., in support of the charges.

Mr. C. Bull, M.L.A., solicitor, appeared for Senior-constable W. E. Quelch.

The minutes of meeting held 15th November, 1897, were read and confirmed.

The following witnesses were examined on oath :—Mr. E. Spearman, Redfern, livery stable proprietor; Sergeant J. Houlahan; Constable E. Ridley; Senior-constable W. E. Quelch; Inspector E. Lawless; Senior-Sergeant J. Bradwell; Senior-constable A. S. Cook; Mrs. A. Brown, married woman, Redfern; Constable G. H. Edwards; Constable N. Moore; First-class Constable W. J. Castle.

At 6 p.m. the Commission adjourned until 2 p.m. on Wednesday, the 17th November, 1897.

Confirmed,—

WHITTINGDALE JOHNSON, S.M.,

Sole Commissioner, 17th November.

J. GARLICK, Secretary.

The Twelfth Meeting of the Royal Commission to inquire into certain charges against Senior-constable W. E. Quelch was held on Wednesday, 17th November, 1897, at the Central Police Court, at 2 p.m.

PRESENT :—

The minutes of meeting held on 18th November, 1897, were read and confirmed.

The following witnesses were examined on oath :—Senior-constable W. E. Quelch; Mrs. Annie Brown; Constable Frederick Robinson; Constable George Henry Edwards; Louis Crosbie, driver, Redfern; Senior-sergeant Robert Bell; Inspector Edmund Lawless; Senior-constable W. E. Quelch; Constable Nicholas Moore.

At 6 p.m. the Commission adjourned until 2 p.m. Wednesday, 8th December, 1897.

Confirmed,—

WHITTINGDALE JOHNSON, S.M.,

Sole Commissioner.

J. GARLICK, Secretary.

The Fifteenth Meeting of the Royal Commission to inquire into certain charges against Senior-constable W. E. Quelch was held on Wednesday, 8th December, 1897, at 2 p.m.

PRESENT:—

WHITTINGDALE JOHNSON, Esq., S.M., Sole Commissioner.

Minutes of meeting held 22nd November, 1897, were read and confirmed.

The Draft Report was then considered and redrafted, and at 3 p.m. the Commission adjourned until 2 p.m. next day, the 9th December, 1897.

Confirmed,—

J. GARLICK, Secretary.

WHITTINGDALE JOHNSON, S.M.,
Sole Commissioner, 9th December, 1897.

The Sixteenth and Final Meeting of the Commission to inquire into certain charges against Senior-constable W. E. Quelch was held on Thursday, 9th December, 1897, at 2 p.m.

PRESENT:—

WHITTINGDALE JOHNSON, Esq., S.M., Sole Commissioner.

The minutes of meeting held 8th December, 1897, were read and confirmed.

The report was then adopted and signed, and the Commission adjourned at 3 p.m. *sine die*.

Confirmed,—

J. GARLICK, Secretary.

WHITTINGDALE JOHNSON, S.M.,
Sole Commissioner.

ROYAL COMMISSION *re* SENIOR-CONSTABLE W. E. QUELCH.

REPORT.

To His Excellency the Right Honorable HENRY ROBERT, VISCOUNT HAMPDEN, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

I, the Commissioner appointed by Your Excellency on the 23rd day of September, 1897, to make a diligent and full inquiry into certain charges made by Mr. John Rowland Dacey, in the Legislative Assembly, on the 17th day of August last, against Senior-constable William E. Quelch, and generally into the conduct of the said Senior-constable, have the honor to submit the following Report:—

1. Owing to the parties not being prepared to immediately proceed with the charges it became necessary to request an extension of the time granted within which to make this Report; and, by Your Excellency's pleasure, on the 14th day of October, the requisite extension was granted to the 23rd of November. An additional extension of time had to be applied for in consequence of the large amount of evidence submitted, and Your Excellency was pleased to grant an extension, on the 23rd day of November, until the 23rd day of December.

2. The inquiry was commenced as early as was practicable, and extended over sixteen sittings. In the course of Mr. Dacey's speech in the Legislative Assembly he made ten original charges, to which, in a letter to your Commissioner, dated the 21st day of October, 1897, he added five supplemental charges. Fifty-six witnesses were examined, and, both Mr. Dacey and Senior-constable Quelch being represented by attorneys, each and all of the charges were exhaustively investigated.

3. As the investigation proceeded it became necessary for your Commissioner to visit certain premises and localities in the Redfern Police Division in order to thoroughly comprehend the evidence adduced in connection with certain of the charges. He therefore did so, accompanied by Mr. John Rowland Dacey, M.L.A., Senior-constable William E. Quelch, and a number of witnesses whose evidence was material.

4. The evidence for the prosecution was unnecessarily lengthy and involved, and tended, in a measure, to obscure the real issues; but I was unable, from obvious reasons, either to shorten or reject any portion of it. It would be impracticable for me, within the limits of this Report, to traverse the whole of the evidence given for either side; and I must content myself by stating, as shortly as possible, the conclusions I have reached as to the truth or otherwise of each specific allegation.

CHARGE I.

5. This charge is one of perjury against Senior-constable Quelch in connection with evidence given by him at the Redfern Police Court in 1894, on a prosecution under the "Sale of Liquors Licensing Act." Senior-constable Quelch deposed that by looking through the key-hole of a door he saw persons drinking in a hotel. However objectionable "espionage" of this nature may be considered under ordinary circumstances, still, in the detection of breaches of the law mentioned, a certain amount of secrecy is unavoidable, and I am of opinion that it was possible for Quelch to have seen sufficient to justify him in giving the testimony he did on the occasion. I cannot find, therefore, that he swore falsely, and the magistrate who sat in the case did not express such an opinion.

CHARGES II AND III.

6. Senior-constable Quelch is here charged with having obtained two convictions against licensed publicans for selling liquor during prohibited hours, by means of a trick, "in contravention of the strict instructions of the Inspector-General of Police." No such instructions are or were in existence, but there was an expression of opinion by that officer in connection with a case of this description, that a constable should not endeavour to induce a publican to sell liquor to him at unlawful hours by any trick or disguise. This, however, is a very different matter from merely sending a newly-joined constable in the garb of the ordinary habitues of the place, to ascertain whether or not the law was being broken by others, which is only what was done in both of these instances. Without a resort to some such strategy very few convictions of this nature would be obtained. I consider that no infraction of the Police Regulations has been brought home to Quelch in connection with the cases in question.

CHARGES IV AND V.

7. It is insinuated in these charges that Senior-constable Quelch in his capacity as officer-in-charge of the Redfern Police Station, released, on two several occasions, prisoners brought there on suspicion, because they were friends and associates of his. The matter was investigated at the time by the Police Department, and Quelch was fully exonerated from any breach of duty, on account of the imperfect nature of the information afforded him by the arresting constables. On the evidence adduced at the inquiry there was nothing to induce me to differ from the previous decision arrived at by the Police Department, or to show that Quelch had any prior knowledge of the three men in question, or released them from improper motives.

CHARGES VI AND VII.

8. These charges are the most serious brought against Senior-constable Quelch. In fact it is alleged that he was at "Myall House," Cleveland-street, Redfern, then used as a branch office of the Government Asylums Department, on the night of the 26th of June, 1896, for a felonious purpose, and at a Mr. Pogson's store in Botany road for a similar purpose, on the morning of 28th July, 1895. In the first case the evidence of intended burglary by someone was conclusive, door-hinges being found unscrewed, and goods packed for removal. If Senior-constable Quelch had been surprised as a private person on the premises in the manner stated his guilty purpose would have been clear beyond all doubt. But that a constable of ten years' standing, and well known to the whole neighbourhood, should be found in a building it was his special duty to protect, in full uniform and armed, with the intention of carrying off, at an early hour in the evening, a large bag of miscellaneous articles through the public streets, appears to me almost incredible. The contradiction of the witnesses on minor points did not seem to me to negative Quelch's very natural statement that he was there simply in the execution of his duty in endeavouring to detect the thief, having found a suspicious person in the vicinity watching the house, and the gate open. Mr. Coghlan arrived soon after, and each apparently took the other for the burglar.

9. In the similar charge made against Quelch in the matter of a Mr. Pogson's store in Botany Road, I am, however, confronted with the difficulty that the accounts of Senior-constable Quelch and Constable Lambert as to the main facts are wholly at variance and quite irreconcilable. The former states that he simply found the door open on his rounds; that he neither locked nor unlocked it; and that he did not find some goods packed up ready for removal, as specifically described by the latter when he appeared on the scene. In fact, Quelch denies the conversation and the whole circumstances, as related by Lambert, *in toto*.

10. Lambert's account of the matter is that, hearing a noise when on his beat in the direction of Pogson's store, he crossed over to the place, and saw Quelch stooping down and locking the door; he also perceived a bag of groceries just outside the door, packed up ready for removal, which, after some conversation, Quelch put back into the store, and, telling Lambert to return to the station, said he would go and call the owner of the store, who lived in the vicinity. Nothing was missing from the store, nor were any goods found packed up ready for removal on Pogson's arrival.

11. Lambert's evidence, therefore, has an important bearing on the question of the intention of Quelch in being at Pogson's store at that early hour in the morning. It is, however, part of a constable's duty to test the doors of all business premises on his beat to see if they are secure. This same door had been found open on other occasions by the police, and about a month previously by another constable, and duly reported at the Redfern Station. The charge that Quelch did not report the circumstance is unfounded, for it was shown that the entry was made at the proper time and place in the station books. Lambert on the morning in question reported "all correct," but appears to have mentioned in a conversational manner part of the statement he now makes as to the goods being packed for removal. There is no other corroboration of either of their respective statements.

12. The question of Senior-constable Quelch's motive for being, as he was, at Pogson's store, must, therefore, rest upon the respective credibility of his statement and that of Lambert's, the surrounding circumstances, and also, as in the "Myall House" case, upon the improbability of an officer in Quelch's position—who, whatever his other faults may be, has never, during an official career of over twenty years in the Royal Navy and the Police, been suspected of dishonest practices—being a burglar in disguise.

13. From a judicial point of view, Senior-constable Quelch would be entitled to the benefit of the doubt that unquestionably does exist as to the truth of the respective statements of Lambert and himself in this matter.

14. It is very apparent that Quelch is, from causes that I will subsequently touch upon, unpopular with, and the source of much ill-feeling among, many of the police at Redfern, who are certainly in a measure inimical to him.

CHARGE VIII.

15. This charge is somewhat similar to, and connected with, Charge 7. Senior-Constable Quelch was admittedly found at an early hour of the morning, carrying a bag containing, as he stated at the time, sand for the use of canary birds which he apparently breeds to some extent. This sand, which he undoubtedly does use for that purpose, was stated by him to have been procured near the railway, from which direction he was coming, and he might have passed near the rear of Mr. Pogson's store by the route he was taking. The Constable who met him assisted to carry the bag across the road, and until these charges were made, never doubted for a moment but it contained sand. There was nothing to show that it was sugar and not sand, nor was it shown that any such article had been extracted from Mr. Pogson's store; and, in fact, this charge seems to me to be merely a suspicion arising from the nature of the previous one.

16. There was conflicting evidence as to dates, but the balance of evidence was in favour of the date being the 16th of February, 1897, and not the 18th as as averred by Quelch, and this being the case, it would seem to indicate some irregularity on the part of Senior-constable Quelch in the performance of his duty.

CHARGES IX AND X.

17. These are merely statements made in the Legislative Assembly by Mr. Dacey, M.P., and Mr. Levien, M.P., on the 17th of August, 1897, and call for no remarks from me, except that Mr. Levien in his evidence before the Commission admitted that he had recommended Quelch for the Police Force on the second occasion of his joining. In addition to this Mr. Levien frankly stated that although he considered that Quelch pressed his cases unduly in the Police Courts, he was not now prepared to endorse his expression used in the heat of debate, that Senior-constable Quelch was "a liar"; and he also stated that he did not believe him guilty of burglary.

CHARGE XI.

18. I think in this instance it may be assumed that Senior-constable Quelch was somewhat under the influence of drink on the occasion mentioned, but under peculiar circumstances. His wife was dangerously ill, and on the day in question
the

the doctor's opinion was so unfavourable as to her recovery that Quelch was much disturbed in mind, and also harassed by night-watching. Knowing these facts his superior officers did not take any action. There was no official record of any action having been taken upon a similar charge, said to have been preferred against him, as far back as 1890, in another district. Senior-constable Quelch's general reputation is unquestionably that of a sober man.

CHARGE XII.

19. The misconduct charged against Senior-constable Quelch is apparently that in July, 1895, he entered the "Salutation Hotel" without authority, and that he made improper proposals to a woman whom he found there and escorted to her home at an early hour in the morning. Without entering into the lengthened and involved evidence in this matter, it was not shown to me that Quelch had exceeded his duties, or that there is any foundation for the latter charge, which the woman denied upon oath.

CHARGE XIII.

20. On a careful consideration of this case your Commissioner is not satisfied that Senior-constable Quelch exceeded his duty.

CHARGE XIV.

21. The allegation is that Senior-constable Quelch appropriated money paid to him as compensation for damage to his uniform, the property of the New South Wales Government. It appears that the Senior-constable's trousers were torn by a dog that attacked him in the street, and he thereupon laid an information against the owner of the dog, a Mr. George O'Donnell. Mr. O'Donnell, hearing of the circumstance, voluntarily paid for the damage done, and the information was not acted upon. Senior-constable Quelch made no demand for compensation from the Police Department, and asserted that the trousers were his own private property, and this was not disproved.

22. Action upon the information which was laid against Mr. O'Donnell could only have been stayed by the sanction of Quelch's superior officer. Your Commissioner thinks that there was an irregularity in this matter, and that a charge for what was a public offence should not have been withdrawn on account of compensation for private loss. It is alleged, however, that the charge was actually withdrawn on the promise of the owner that the dog would be destroyed. A charge of misappropriating public moneys cannot, however, be substantiated.

CHARGE XV.

23. As in the first charge, this is an accusation of perjury in the Police Court at Redfern, on the 21st day of August, 1894, in connection with the prosecution of one Michael Madigan, on a charge of cruelty to a horse, such cruelty consisting of the unnecessary or careless performance of an operation known as "firing." When the case was heard Madigan produced evidence to show that the operation was not performed by him, but by one Owen Crilley, and also brought professional evidence to show that the operation was both necessary and lawful, and was skilfully performed. The case was thereupon dismissed, but not in any way upon the question of identity, and no remark on that point was made by the adjudicating Justice.

24. It is difficult for me in this, as in the previous accusation against Quelch for perjury, to pronounce on the evidence before me, after the lapse of so long a period, a judicial opinion as to whether there has been false swearing on either side. I may say, however, in this case, as in the other, I was not satisfied that Quelch did not see what he deposed to.

GENERAL.

25. In summing up the whole matter I may remark that it is very evident to me that a strong feeling exists against Senior-constable Quelch, not only within but outside the Redfern Police Force, where he has certainly made enemies. This
personal

personal animus on their part was, in many instances, not attempted to be concealed, and tinged the whole of their testimony. Senior-constable Quelch is unquestionably an active and intelligent officer, but is also, apparently, a man of quarrelsome disposition, excitable temperament, and has a forcible and overbearing manner. He is evidently, also, unduly anxious to obtain conviction in every case, and certainly does not combine the *Suaviter in modo* with the *Fortiter in re* so desirable in the performance of those duties which bring the police so much in contact with the general public.

26. Within the Force itself a certain amount of jealousy has probably been engendered by Quelch's promotion to the position of Senior-constable over the heads of others who have been longer in the Force. He has, no doubt, attained his present position by his superior energy, activity, and the many convictions he has obtained, including those for breaches of the Licensing Act, which would certainly not add to his popularity in some quarters. Such qualifications as these must always be a passport to promotion in a service like the Police, and, no doubt, have been the sole cause of his advancement.

27. Senior-constable Quelch served his time in the Royal Navy, and left with a good character as a Petty Officer. He had, however, to resign from the Water Police Force for insubordinate conduct, but was subsequently admitted to the ordinary Police.

28. During the course of the Inquiry, side issues were raised as to the disorganized condition of the Police at Redfern; but beyond the disturbing element I have mentioned with reference to Quelch, I have no reason to suppose that there is anything affecting the ordinary discipline of the Force there.

29. In conclusion, I may be permitted to state that I think it undesirable that Senior-constable Quelch should remain in the Redfern Division, whatever action may be taken on this report.

I have the honor to be,

Your Excellency's most obedient Servant,

WHITTINGDALE JOHNSON,

J. GARLICK, Secretary.

Commissioner.

Sydney, Monday, 13th December, 1897.

LIST OF WITNESSES EXAMINED.

1. Edmund Lawless	Inspector of police, Redfern.
2. William Richard Swan	First-class constable of police, Redfern.
3. Margaret Brull	Married woman, Regent-street, Redfern.
4. William Edward Quelch	Senior-constable of police, Redfern.
5. Frederick Robinson	Second-class constable of police, Redfern.
6. Thomas Vane	Sergeant of police, Redfern.
7. Isaiah Chaseling	Assistant teacher, Public School, Redfern.

**LIST OF CHARGES BROUGHT BY MR. J. R. DACEY, M.L.A., AGAINST
SENIOR CONSTABLE W. E. QUELCH.**

1. That some time ago he brought an action against the lessee of the "Somerset Hotel," Redfern, for selling drink within prohibited hours. He also charged a brother policeman named Swan with being present in the hotel and drinking within those prohibited hours. Quelch swore that he looked through the keyhole and saw Constable Swan drinking a glass of beer. The evidence was so conflicting that the Magistrate decided to go and inspect the premises for himself, with the result that when he looked through the keyhole of the door he could only see a man's legs in the position indicated by Quelch.
2. That in contravention of the strict instructions of the Inspector-General, who orders that no constable shall in any way try to trick a publican into supplying liquor within prohibited hours, Quelch disguised a young new policeman and sent him into an hotel next the Fishmarket before 6 o'clock in the morning to appeal to the publican for a drink. Quelch got a conviction by that, in my opinion, most contemptible action.
3. That similarly he sent the same constable, disguised as a driver, into a hotel next McMahon's stables. He was disguised as one of McMahon's drivers; the result was that the lessee of that hotel was also fined.
4. That some short time ago a constable named Bruce was on duty at the Baptist Estate, near Moore Park, when he saw three men prowling about in a suspicious manner. He went over to see what they were at, and they ran away. He chased the men actually into the arms of Quelch. Quelch heard their yarn, which was that they were dairymen going to the Farmers' and Dairymen's Milk Supply Company to get milk for their customers, but, strange to say, they said they lived at Pymont. Quelch did not see the absurdity of that, but he took down these men's names and let them go. A few minutes afterwards Bruce went back on their tracks and discovered a sack full of pigeons which these men had evidently stolen.
5. That, shortly after this, there was a robbery at Botany-road, at a boot store kept by a man named Riddle. Constable Brennan saw three men in front of Riddle's shop under rather suspicious circumstances, and he tried to get near them. When he got within about 60 yards of them they ran away. He went after them and eventually arrested them with the assistance of Special-Constable Brewin. They gave their names and addresses, and he took them up to the station where Quelch was. They gave different names and addresses to Quelch, and one of them gave the self-same name that one of the pigeon stealers gave a few nights previously. Notwithstanding that, Quelch released these men. While these men were standing there in the presence of Quelch they actually had on their persons the stolen boots out of Riddle's shop. The arresting constable appealed to Quelch to wait until he went back to see if a robbery had been committed; but he refused to do so, because, as I think I will show, Quelch was in league with these men, whom he twice saved from the clutches of the law. These men were released, and afterwards the robbery was discovered. A couple of nights afterwards the same three men committed a burglary at Cohen's jewellery shop, King-street, Newtown, or rather two of them did. Seeing their names recorded, I suppose in the books which the police have, Brennan went there and found two of the burglars who had been concerned in the robbery of Riddle's boot store, but he had some difficulty in getting the third. If Quelch had arrested these men when they were caught in connection with stealing pigeons, Riddle's boot store would not have been broken into, nor would Cohen's jeweller's shop.
6. That, in July, 1896, upon the advent of the Public Service Board, it was decided to remove the offices of the Director of Charitable Institutions from Myall House, Redfern, to Richmond Terrace, in the Domain. Pursuant to this determination the front part of the building was vacated, and all the things were removed. There was at the back of the premises a store containing boots, shirts, and other articles. There was a clerk named Coghlan there in charge during the daytime, and he was asked by the Director of Charitable Institutions to draw the attention of the police to the fact that the place was unprotected at night, and that it was necessary for them to keep an eye upon it. As far as I can ascertain the only man who received this information was Quelch. Coghlan showed him over the premises, and the amount of stock which the place contained, and, strange to say, about three nights afterwards the building was broken into under circumstances of the most suspicious character. Coghlan had told Quelch that he had left the store between 5 and 6 o'clock in the afternoon. On this particular night Coghlan returned, in company with another clerk named Newcombe. They stood outside the store door at the back of the main building for about ten minutes. The place where they stood yarning is not more than about 12 feet away from the doors behind which Quelch was hidden. One of the clerks finally went into the main building, and lit the gas, and called out, "What did you leave the middle door open for?" The door had also been taken off its hinges. The other clerk had been to one of the outhouses, and when he came out of the outhouse he put his knee against an empty case opposite an outhouse door broken off its hinges, and placed it in a line with some other cases. This so disturbed the burglar inside the door that he pushed the door open and rushed out. The man who rushed out of the building was, strange to say, Senior-constable Quelch. Coghlan said, "What is this?" whereupon Quelch said, "Someone has been in, and has got away over the fence."

7. That Constable Lambert was on duty one night, and heard a noise at Biron Pogson's grocery shop. He came up to the place to see what it was. He found the door open and Senior-constable Quelch inside with a bag of groceries. Quelch said, "Someone has broken into the place."
What I wish to draw particular attention to is that this case of attempted robbery of the grocery store has not been reported at head-quarters. That is a significant fact. Quelch was the officer to have reported it, but he has not yet made his report.
 8. That about six months ago Constable Hill, when on duty on the Botany-road, saw a man crossing the road in a slouch hat, and with a bag of something on his back. Hill approached the man, and was astonished to find that it was his senior officer, Quelch, who said, "It is all right, Hill, I have been getting some sand for my canaries."
 9. Mr. HOGUE: Does the honorable member charge this man with being a burglar?
Mr. DACEY: I do. I also charge him with being a perjurer, on the verdict of Mr. Smithers, the Stipendiary Magistrate.
 10. Mr. LEVIEN (Quirindi): I am not a believer in Quelch. I do not think that he is a man that will altogether speak the truth. There is no doubt he told a lie. I believe he is a liar beyond all doubt.
 11. Drunkenness in the Redfern Police Station.
 12. Misconduct in connection with the "Salutation Hotel."
 13. Misconduct in connection with one Crosby.
 14. Appropriation of Government money in connection with one O'Donnell.
 15. False swearing in the case against one Madigan, charged with cruelty to a horse.
-

ROYAL COMMISSION—*Re* SENIOR-CONSTABLE W. E. QUELCH.

MINUTES OF EVIDENCE.

WEDNESDAY, 27 OCTOBER, 1897.

[The Commission sat in the Licensing Court, Central Police Station.]

Present:—

MR. WHITTINGDALE JOHNSON, S.M. (SOLE COMMISSIONER).

Mr. J. R. Dacey, M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared to support the charges; Mr. Charles Bull, M.P., solicitor, appeared to defend Senior-constable Quelch; Mr. E. Harris, shorthand-writer, Public Works Department, attended to take notes of the evidence.

Charge No. 1 was read:

“That some time ago he brought an action against the lessee of the “Somerset Hotel,” Redfern, for selling drink within prohibited hours. He also charged a brother policeman named Swan with being present in the hotel and drinking within those prohibited hours. Quelch swore that he looked through the keyhole and saw Constable Swan drinking a glass of beer. The evidence was so conflicting that the magistrate decided to go and inspect the premises for himself, with the result that when he looked through the keyhole of the door he could only see a man’s legs in the position indicated by Quelch.”

Mr. Abigail: The first thing I want to do in this No. 1 charge is to tender the original depositions in the case against Brull. [*Exhibit No. 1.*]

Edmund Lawless sworn and examined:—

1. *His Worship.*] What is your name? Edmund Lawless.
2. What are you? Inspector of Police, New South Wales.
3. *Mr. Abigail.*] Quelch is an officer at Redfern under your control? He is.
4. Is there any regulation in the force against constables spying-out and using disguises in order to bring about a prosecution against publicans? There is not.
5. You know that in this case of Brull’s, Quelch prosecuted him? Yes.
6. Under your instructions? I may say the information was given to me by the constable, and I signed the information upon that.
7. Following the usual practice? Yes.
8. You are sub-inspector under the Licensing Act? Yes.
9. There are two other sub-inspectors for your district? Yes.
10. Is it not the rule that unless the constable gets some instructions from a sub-inspector, it is not his duty to prosecute under the Act? No.
11. Anybody in the Police Force would be acting within his power to watch a public-house with a view to a prosecution? Certainly, if he thinks a breach of the Act is being committed.
12. *Mr. Bull.*] The Licensing Act makes provision for it?
- Witness:* If a constable passes a public-house and sees a breach of the Act being committed, and if he did not make a report, he is liable to be reported for it.
13. Does the Licensing Act allow any one to proceed for breach of the Act, except a sub-inspector? Any constable can lay the information.
14. *Mr. Abigail.*] Notwithstanding that he is not acting under the instructions of his sub-inspector? Certainly.
15. Has a constable any authority to watch outside a public-house for an hour and a half to enable him to lay information? I should not think so; I could not say whether he had instructions or not; unless he had instructions, he might be reported for loitering on his beat.
16. On the 7th January, 1894, had Quelch any instructions from you, or as far as you know, to wait outside a certain hotel for an hour and a half? Not from me.
17. Did not the fact that you were informed by Quelch that Constable Swan was seen off duty in an hotel at the time influence you to lay the information against Brull? From the report I considered it well to lay the information.
18. Was not the object to punish the publican as well as the constable? Of course.
19. Although he was off duty? You know the result of the case against Brull? The case was dismissed. After the magistrate came back from viewing the premises, he said he thought it possible that Quelch might have been mistaken, and he gave Brull the benefit of the doubt.
20. Did not the magistrate, after looking at the keyhole through which Quelch said he saw all he had reported, say it was impossible for him to have done so? No.
21. Did he say he did believe him? He did not, as far as I remember.
22. Do you know that Brull sent in a report complaining to the Inspector-General? I believe he did.
23. Quelch was called upon for a reply? He was.
24. And did reply? I think so.

E. Lawless.
27 Oct., 1897.

25.

- E. Lawless. 25. I wish to put in Brull's report [*Exhibit 2*], of 22nd January, 1894, with the reply and official minutes. You know that Inspector-General Fosbery said this, "I have already strongly expressed my opinion of officers acting as spies?" Yes.
- 27 Oct., 1897.
26. Did not you know that for one and a half hours Quelch watched outside Brull's Hotel? Yes.
27. Do you not know that the one and a half hours the Inspector-General mentioned in his report could be better employed thief catching, referred to the hour and a half Quelch watched outside Brull's hotel? I imagined it did.
28. You also know that Mr. Fosbery wrote a minute to the effect that Brull was a respectable man, and he trusted he was not going to be persecuted? Yes.
29. He added, "I think that Quelch should pay all expenses"? He did.
30. May I assume that you, in your position, would not commend any tactics of this sort? Not if I knew of them.
31. Am I right in assuming that when you laid this information against Brull that Quelch did not instigate you in any way? No; he told me he saw the constable drinking, and I sent my report in about it.
32. Had you known that Quelch had been spying through the keyhole for an hour and a half, would you have taken the responsibility of prosecuting? I would have been very loth, unless subsequent events led me to do so.
33. Was Quelch submitted to any punishment following upon the strong minute of the Inspector-General's? There was no punishment.
34. Do you know that Quelch, in his answer to a minute, said that his case was not closed when it was dismissed, and he had two constables outside to give further evidence? I heard that something to that effect was sent in.
35. Although you said all the evidence was brought? I believed so at the time.
36. Is this true: Quelch said, in his reply, that from the information laid, the instructions to prosecute were given by you? I always give instructions.
37. You laid the information? No; from information received by me.
38. You laid the information from information received from Quelch? Yes.
39. You did not know anything about the "Somerset Hotel" until the complaint was laid the following morning? No.
40. How long would it take for Quelch to walk from "Somerset Hotel" to Redfern Police-station? About six or seven minutes.
41. From five to seven minutes? Six or seven minutes.
42. *Mr. Bull.*] Quelch, as senior-constable, has authority under the Licensing Act to enter hotels? No; without he sees something.
43. Could he not enter if he suspected a breach was being made? If the door was open.
44. Supposing Quelch was on duty after closing hours, and saw something which indicated that a breach of the Act was being done in an hotel, would it be his duty to see what was being done and report it? Certainly.
45. Supposing that while watching he saw a constable in the hotel after hours, would it be his duty to watch and report the conduct of that constable? Certainly.
46. There are rules for the government of the police, which are supplied to the members of the force? Yes.
47. And Constable Swan would have a copy of them? Yes.
48. Rule 58 relates to constables frequenting hotels and accepting drinks from any person while on duty. He would have knowledge of that rule? Certainly.
49. *His Worship.*] In this case I understand that Swan was not on duty. It does not apply to this case.
50. *Mr. Bull.*] Was there not some difference in the case of Mr. Brull with regard to the time Quelch was watching the house? I think there were some contradictory statements.
51. Do you know that in this case Quelch never entered the hotel? As far as I know.
52. Were not the depositions of the case taken out of court by Mr. Smith, the solicitor, and read to witnesses in the court-yard? Yes.
53. Although the witnesses had been ordered out of the court? Yes, I pointed it out at the time, and I expressed my strong opinion about such conduct.
54. Did not you, as officer in charge of the prosecution, characterise Mr. Smith's conduct as gross impertinence, and draw the magistrate's attention to it? I did.
55. Was it not after the depositions, or portion of them, had been read to the witnesses by Mr. Smith, that he called these very witnesses? Yes.
56. How long has Quelch been in the force? Since 1887—before I took charge.
57. Since you had charge of the division, has he not been chosen as an officer to work under the Licensing Act? Yes.
58. Working with Senior-sergeant Vane and other officers? Yes.
59. Has he not been sent to act under other sub-inspectors? Yes, applications having been made for him.
60. Would you say he is a zealous, fearless officer? Yes.
61. *Mr. Abigail.*] With reference to the question asked by Mr. Bull, relating to the depositions taken out of the court, do you mean the depositions were taken out during the progress of the case? I do.
62. Do you wish the Commission to believe that Mr. Smithers let Mr. Smith take out the depositions during the progress of the case? They were taken out.
63. When all the evidence had been given for and against, did not the magistrate decide the case from what he himself saw through the keyhole?
64. *His Worship.*] That question is quite inadmissible.
65. *Mr. Abigail.*] No decision was given by the magistrate until he had looked through the keyhole? I do not know.
66. And do you say you do not know the magistrate was there? Of course he was there.
67. And you say you do not know he looked through the keyhole? He went there for that purpose.
68. Did not the magistrate say he went to look through the keyhole, and could not see? He did not. He said Quelch might have been mistaken.
69. You were asked your opinion about Quelch as an officer; how long has he been in your division? Since 1891.

70. How many complaints have been made against him? I could not tell you. Perhaps one or two.
71. How many complaints have been minuted? There might have been two.
72. Has he been disrated once? Not in my time.
73. Was he promoted? Yes.
74. After the strong minute of the Inspector-General? Yes.
75. How soon after? I do not know; six or twelve months.
76. Was not there a report sent in against him? I do not remember, unless it was by Brull.
77. Not by Brull? I do not remember.
78. Do you not know that there were strong minutes recommending him for promotion? No; other people could recommend him.
79. Would it not have to filter through your hands? Yes.
80. Could any of your subordinates be promoted without a recommendation from you? Yes.
81. Without you minuting it? Just possible, but not probable.
82. Was it done in Quelch's case—was he promoted on recommendations other than your own? There were others.
83. Who was it? Superintendent Read.
84. With no remarks by you? I might have said a few remarks about his activity, and what I might say about any officer.
85. How many officers have you recommended for promotion since you have been there? I could not tell you.
86. Are there not only two—Quelch and Dukes? I have recommended nearly a dozen; but they have not got promotion.
87. Were there only two cases where promotion was given—Quelch and Dukes? No.
88. *Mr. Bull.*] McLean? Yes; but he went as a detective.
89. With regard to Mr. Smith taking part of the depositions out of the court, the case was on Tuesday, and then adjourned till Thursday? Yes.
90. Was it on the morning of Thursday that Mr. Smith took the depositions into the court-yard? No; while the court was on.
91. *Mr. Abigail.*] I have the depositions all in as evidence. The evidence of Griffiths and Swan only was taken after the depositions had been read.
92. *Mr. Bull.*] No; there was Mrs. Brull's as well.

E. Lawless.
27 Oct., 1897.

William Richard Swan sworn and examined :—

93. *Mr. Abigail.*] What is your name? William Richard Swan.
94. You are a police constable at Redfern? No, at No. 2.
95. Formerly at Redfern? Yes.
96. You remember the case of Brull, "Somerset Hotel," in which you gave evidence? Yes.
97. Were you at the "Somerset Hotel" when the Magistrate went out? Yes.
98. Did he look through the keyhole? Yes.
99. What did he say when he came back? He said he was quite satisfied Quelch had made a mistake.
100. He said that when he came back from the hotel? Yes.
101. You know that Quelch had previously sworn that on the 6th of January, two days previously, he saw you drinking in the hotel? Yes.
102. He was looking through the keyhole and could see you and others? Yes.
103. Did you have any drink at all? Not after 11 o'clock.
104. Were you on or off duty? Off duty, and in plain clothes.
105. Did you go on duty at 2 o'clock that morning? No, at 10 o'clock next morning.
106. Did you ever stand in the passage-way, or in any position on that night where you could have been seen by Quelch looking through the keyhole? No.
107. Although he did swear he saw you; you know that? I have been told so.
108. You first saw Quelch that night about 12:20? Yes; when I was first coming out I saw Quelch watching.
109. He was in Phillip-street then, the intersecting street near the hotel? Yes.
110. You left at 1:20 and met Quelch then? He overtook me.
111. Just when you got outside the hotel door? When I got a hundred yards up the street.
112. I suppose Quelch between 12:20 and 1:20 could have gone up to Redfern Station in that time? Yes.
113. It is only about five minutes' walk? Yes.
114. Did you look through the keyhole? Yes.
115. Could you see anything but the legs of a man in the position indicated by Quelch in his evidence? No.
116. Could you see a man in the act of raising a glass to his mouth? No.
117. Looking through that keyhole could Quelch or any one else see who was sitting round the table? No.
118. They would not be in the line of vision? No.
119. Did you leave the hotel with two companions? No.
120. Did you leave alone? Yes; there was another one followed me up afterwards.
121. But you left alone? Yes.
122. Who was the man? Griffiths.
123. Do you know that Quelch produced a pattern of the keyhole to show the size and the extent of the view through it? Yes.
124. Until you came out of the hotel and were accosted by Quelch could he have had an opportunity of seeing you? Not until I came to the door to come out.
125. Did you go to that hotel for the purpose of getting drink? I went there to meet a friend, Mr. Cooke.
126. Did you go by appointment? Yes.
127. Is he an alderman of Wagga? Yes.
128. Did he not come purposely all the way from Wagga to give evidence in the case? Yes.
129. In your evidence you stated that you were very much surprised to learn that Quelch was in the station at 12:20 a.m.? Yes.
130. That was the time you saw him over the road in Phillip-street? Yes; outside the hotel.
131. *Mr. Bull.*] How long have you been in the force? Ten years.

W. R. Swan.
27 Oct., 1897.

- W. R. Swan. 132. Where have you been? Eight years and three months at Redfern, the remainder at No. 2.
 27 Oct., 1897. 133. You are an ordinary constable? First-class.
 134. I suppose the statement you gave in the case of Brull's was true? Yes.
 135. Have you read it since? No.
 136. Did you swear this: "I was going out at 12:20. I saw Quelch opposite. I thought it would be judicious to wait. I went out at 1:20 with Griffiths. We saw a man come up"—I may have made a mistake, it is four years ago. What I said then was true.
 137. If then you swore you came out by yourself, you are mistaken? Yes.
 138. It is not true what you have sworn to-day about coming out by yourself? I was mistaken.
 139. What is in the depositions is true? I have not seen them since.
 140. Did you swear this: "I went back to defendant's hotel in the evening to see Cook. I met him at 2 p.m., and made an appointment for 10 p.m."? I do not recollect.
 141. Do you remember swearing to this: "I met him (Cooke) at 2 p.m., and made an appointment for 10 p.m." Do you swear that is true? Yes.
 142. Do you know Cooke in that case swore he did not arrive from Wagga until that same evening at 6? He could not say so.
 143. Were you in court when Cooke gave evidence? No.
 144. Do you know he swore to this: "I am a baker living at Wagga. I know the defendant (Brull). I arrived in the city at 7 p.m. last Saturday week." He is speaking on the 16th. Would not last Saturday week from the 16th be the 6th? Yes.
 145. Do you not know that Cooke swore that very thing? I did not hear it.
 146. Cooke swore: "I put up at defendant's. I went out and returned with a friend named Griffiths, and stayed all night. When we returned we found Swan there"? I think that was a mistake.
 147. He goes on to say: "I had made an appointment with him; he was late." Do you say now that you made an appointment with Cooke that day at 2 o'clock? Yes.
 148. But he did not arrive till that night!
 149. *Mr. Abigail.*] He arrived in the morning? I do not know.
 150. *Mr. Bull.*] "I arrived in Sydney at 7 p.m. last Saturday" the deposition says.
 151. *His Worship.*] Was an appointment made by letter? No.
 152. Where? At the hotel.
 153. *Mr. Bull.*] Do you know Brull gave evidence? Yes.
 154. Do you remember Cooke saying this: "I put up at defendant's. I went out and returned with a friend named Griffiths, who stayed all night. When we returned we found Swan there. I had made an appointment with him, but was late. He refused to have a drink at my request? Yes; I had a cigar."
 155. Do you remember Brull giving evidence and saying that you had a drink? Not after 11.
 156. This is what Brull swore: "Cooke visited me from Wagga Wagga. He stayed until last Wednesday. Walter Griffiths, a friend, stayed there that night. Swan was there, and had a drink before 11." Yes; before 11.
 157. Cooke swears that you refused to have a drink? Cooke did not come till 11:30.
 158. He says "He was sober. He refused to have a drink at my request. I gave him a cigar from my pocket." Is that true? Yes.
 159. They both cannot be true? I had a drink at 11.
 160. Right at 11? About 11.
 161. You stayed at this hotel till 1:15 or 1:20 in the morning? Yes.
 162. You know that Quelch fixes 1:30 as the time you came out? When he came up to me he said it was 1:20.
 163. Quelch says 1:30? That was not true.
 164. Mrs. Brull swears the same thing? I do not suppose she noticed the time.
 165. Just to show your mistake in saying you came out by yourself, Mrs. Brull swore this: "He (Cooke) came in at 11:30 with Griffiths; he asked for drinks; Swan refused to have one; one was not supplied to him"—was that true? That is true; I did not have a drink.
 166. "Swan refused to have one, and one was not supplied to him; it was after 11 p.m.; he had no drinks subsequently; after 12, midnight, Swan wanted to go; I cannot say I heard his reason for not going; about 1:30 he left with Griffiths; no one else went out"—was Mrs. Brull mistaken? I had a drink at 11.
 167. *His Worship.*] I do not think this throws much light on the matter.
 168. *Mr. Bull.*] You remember Quelch speaking to you when you came out? When I came out at 1:20 he said: "This is a nice time to come out of an hotel."
 169. What did you say to him? I did not say anything, because I was so vexed.
 170. He rebukes you about coming out of an hotel, and you have nothing to say for yourself? No, because I was so vexed.
 171. Is that your only reason? Yes.
 172. Do you remember giving this reason: "Quelch came up to me and spoke to me, saying, 'This is a nice thing, Swan, coming out of an hotel at this hour;' he spoke in such an angry manner that I would not answer him for fear of a quarrel"?
 173. *Mr. Abigail.*] That is what he says now.
 174. *Mr. Bull.*] You have been eleven years in the force; how many times have you been punished as a police officer? Several.
 175. Over a dozen? About that.
 176. Just as an instance: In March, 1889, when you were at Redfern, were you fined for being under the influence of drink? Yes.
 177. In April next year were you fined for neglect of duty? No.
 178. Do you know your defaulter's sheet is here? I have never been punished for neglect of duty.
 179. Were you not punished by your wages being kept off? No.
 180. "May, 1891, losing a warrant"—were you reprimanded? Yes; it dropped out of my pocket.
 181. Did you report it? I did.
 182. On "21st June, 1892, absent from parade"—were you reprimanded for that? Yes.
 183. On 8th July, 1892, was your pay reduced for fourteen days for being in an hotel while on duty? Yes.

184. In 1893, June, and in November, two cases of neglect of duty, and reprimanded in each case? I have not been fined or reprimanded for neglect of duty. W. R. Swan.
185. Both cases were for neglect of duty? Never. 27 Oct., 1897.
186. On 26th March, 1894, were you fined and your pay reduced for neglect of duty? I do not understand these cases of neglect of duty.
187. Were you not reported for them and your pay reduced? When I was charged it was for not working my beat.
188. Was not that neglect of duty? I suppose so.
189. On 2nd September, 1894, you were again fined by being reduced for being in an hotel? Yes.
190. 6th June, 1895—again in hotel while on duty? Yes.
191. On 5th July, 1895, further neglect, again fined? I was reported once for being five minutes late; I was persecuted.
192. *Mr. Bull.*] Who was your officer—was it Corcoran who persecuted you? Yes.
193. How long have you been in No. 5? About 2½ years.
194. Have you a clean sheet? No, I was reduced for fourteen days for getting into a tram while in motion.
195. You were fined 7s.? Yes; I was also reprimanded for being half an hour late for parade the first time in eleven years, and was reduced for one week for being in an hotel.
196. With regard to Cooke, how long have you known him? Several years.
197. What is his Christian name? Charles—Charlie Cooke.
198. Has he no other Christian name? I do not know.
199. You say he is an alderman of Wagga? He was not then, but is now.
200. You say he was not an alderman then? Not at that time.
201. You have ascertained that fact since? Certainly.
202. Would you be surprised to know that he was not elected till 1896? He has only lately been an alderman.
203. When he was referred to at the time of this case he was simply Charlie Cooke? Yes.
204. With regard to what was said by Mr. Smithers, did he not say this, "That he thought Quelch was mistaken, and that he would give defendant the benefit of the doubt"? Yes.
205. Were you asked to attend on the visit of the magistrate at the hotel? No.
206. You were sitting at the same table in the parlour; it was alleged Quelch saw you on that morning? Yes.
207. You were not asked to go? No; I had been home and saw the magistrate coming, and I waited for him.
208. You were there on duty? No.
209. You were really there to find out if the magistrate had examined the keyhole. Did you not ask Mr. Brull if the magistrate had been there? No.
210. Do you remember Mrs. Brull, in her evidence on the 18th, the day the case was dismissed, saying this, "I supplied Swan before 11 with a drink. I did not afterwards. Swan came in to-day to see if the magistrate had examined the keyhole. Swan occasionally comes to our place when off duty." Can you now swear the other thing? I do not remember it.
211. You do not remember it? I do not.
212. Cooke, in his evidence says, "I arrived in Sydney 7 p.m. last Wednesday week." Do you remember that? Yes.
213. "I was a lodger. I went to the hotel about 7 p.m. When we returned we had a drink." What do you say about that? I think you will find it is 7 a.m., not 7 p.m.
214. *Mr. Abigail.*] There is evidently a mistake in the depositions. It is certainly meant for 7 a.m.
215. *Mr. Abigail.*] At no time did you leave the hotel with two men? No.
216. You left, and Griffiths followed afterwards? Yes.
217. At the time you did not know what Brull swore. You were called afterwards? Yes.
218. One of the charges against you is for being ten minutes late coming off duty. That means you were ten minutes longer on duty than necessary? Yes.
219. And for your industry you were fined? I was reprimanded?
220. You have known Cooke for some years? Yes.
221. Was there any ill-feeling between you and Quelch? No.

Mrs. Brull sworn and examined:—

222. *Mr. Abigail.*] What is your name? Margaret Brull. Mrs. Brull.
223. You are the wife of Joseph Brull? Yes. 27 Oct., 1897.
224. You are now in the grocery business? Yes; for some time now.
225. You have no connection with the hotel business? No.
226. Will the President please have Mrs. Brull's depositions read? *[Depositions read.]* You remember giving evidence in that case brought against your husband? Yes.
227. Do you remember if the key was in the door that night? The key was always in the door to my knowledge.
228. Anyone standing outside and looking through the keyhole could see anyone sitting round the table? No.
229. You have looked through the keyhole and tested this question? Yes.
230. You know the door through which Quelch swore drinks were supplied? I do.
231. Was it possible to see the faces of men standing at the table? No, not at all.
232. If drinks were served through the door it would open out against that keyhole? Yes, the door would open out against the keyhole.
233. You could not serve drinks without that door being open? No.
234. Did Swan ever stand there at all? Not to my knowledge.
235. Do you remember when Cooke arrived? He came by the 6 o'clock train in the morning.
236. And then he went out and returned about 7 o'clock? Yes.
237. He was in and out of the hotel, and when he came back Swan was waiting for him? Yes.

- Mrs. Brull. 238. Could anyone looking through the keyhole see drinks being served at the table? Not at all.
 239. As a matter of fact did Swan drink after 11? Not at all.
 27 Oct., 1897. 240. Did he refuse? Yes.
 241. *Mr. Bull.*] When did you leave this hotel? In the same year as the case.
 242. That would be in 1894? November or December.
 243. You have not been in the hotel business since? No.
 244. Were you in court when Cooke gave evidence against your husband? No.
 245. Would you be surprised to know that he came to Sydney on the 6th at 7 o'clock p.m. that day? I would be surprised.
 246. That is clearly an error in the depositions? He came in the morning because I was not up out of bed when he came.
 247. *Mr. Bull.*] You remember Swan coming to the hotel? Yes.
 248. He was there before Mr. Smithers got there? Yes.
 249. Were you and he in conversation before he came? No.
 250. He asked if the magistrate had come down? That is all to my knowledge.
 251. Do you remember swearing this: "I supplied Swan before 11 p.m. with a drink. I did not afterwards. Swan came in to-day to see if the magistrate had examined the keyhole. Swan occasionally comes to our place when off duty." Did you say that? Yes.
 252. Did he ask you if the magistrate had been there? Yes.
 253. And if he had examined the keyhole? Yes.
 254. Do you remember how long he had been there before Mr. Smithers came? Not many minutes.
 255. Did he have a drink? Not to my knowledge.
 256. He was a customer of yours? When off duty.

William Edward Quelch sworn and examined:—

- W.E. Quelch. 257. *His Worship.*] What is your name? William Edward Quelch.
 27 Oct., 1897. 258. What are you? Senior-constable at Redfern.
 259. *Mr. Bull.*] How long have you been in the force? At Redfern, since January, 1887.
 260. And before that? At D. Jones & Co's, for a short time.
 261. In what capacity? As storeman. Previous to that I was in the Water Police, and before that from 3rd April, 1873, to 5th December, 1885, I was in Her Majesty's Imperial Service, in the Royal Navy. I completed my time, and took my discharge on the 5th December, 1885, and joined the Water Police on 7th December.
 262. In what year? 1885. Altogether I have been twenty-five years in the Queen's service. I have testimonials covering the whole time.
 263. Do you remember 1894? I do.
 264. And the 6th January, 1894? Yes, a Saturday.
 265. You were on duty that night? Yes.
 266. What time did you go on? Ten o'clock.
 267. During the night you were in the vicinity of the hotel kept by Brull? Yes; previous to that I was with Vane up to 12 o'clock.
 268. Where did you leave Vane? At the Redfern Station. He took me in at 12 o'clock, and immediately after I left the station, on duty, about 12-20.
 269. How far is this hotel of Brull's from the station? At least 300 yards.
 270. You were in the vicinity of that hotel? Yes; when I got down Pitt-street, in view of the hotel, I saw a glimpse of light coming through the bar-door. The parlour in Pitt-street was fully lit up, and the hall in Phillip-street was lit up. At that time of night I considered it my duty to see if anything was wrong. I heard a female voice in the bar. I heard the noise of glasses rattling, and the beer-engine at work.
 271. You heard the voice of a female in the bar, and then saw Constable Swan? Yes.
 272. You were there from 12-30 to 1-10, and Swan passed some remark to the publican if they were not going to bed? Yes.
 273. Were the depositions you made at Redfern Police Station, with regard to the circumstances, true? Perfectly true. I will swear to them to-day.
 274. You mean you are as positive to-day as you were then? Yes.
 275. In those depositions you swore you saw Swan supplied with liquor? I did.
 276. Is this a plan which you had prepared of the inside of the house? Yes.
 277. *Mr. Abigail.*] I object to this.
 278. *Mr. Bull.*] I am simply asking if it is a plan. Which door were you standing outside of? The Pitt-street parlour door.
 279. And looking through the parlour-door, what is in front of you? In view of the key-hole you can see the door leading from the bar to the parlour, which remained open the whole time.
 280. And from that position you swore you saw what you deposed to in that case? I did.
 281. Was the key in the keyhole? No.
 282. When the case was on at Redfern, did any one suggest that the key was in the door? No one, not even the publican.
 283. The presiding magistrate was asked to go and inspect the keyhole? Yes.
 284. Not the keyhole with the key in? No.
 285. This is an impression of the keyhole produced at the trial? Yes.
 286. I put this in as an exhibit (No. 3.) It is a sketch of the keyhole from the outside? Yes; I produced it in my evidence.
 287. I understand you made a report? I did.
 288. Can you tell me what you said in that report? There would only be the rough information at the time. The rough book is not here.
 289. Did you enter into some book a report of the matter? No; the watchhouse-keeper does that.
 290. Did you dictate? Yes; I reported the circumstances, and they were noted.
 291. What time was that report made? I do not know exactly; but it must have been made instantly for the summons to be issued.

W. E. Quelch.

27 Oct., 1897.

292. At the first convenient time? Yes.
293. Was any officer there then? Sergeant Houlahan.
294. How many persons did you see leaving the hotel before speaking to Swan? Three men were let out of the side-door—Swan, Griffiths, and the other I did not know. I went right up to them.
295. When did you speak to Brull? When Swan went home I went back to the hotel and spoke to Brull. Brull said to me, "Do not report the matter this time, for the sake of the constable."
296. Is that what you refer to in your deposition when you say, "I spoke to him (Brull). The licensee asked me not to report the matter for the sake of the constable. I accused defendant of supplying liquor after hours"? Yes. I said I should not do anything of the sort. I would report it to my inspector.
297. Do you remember the circumstance of the depositions? I do.
298. Mr. Carter Smith was the solicitor for Brull? Yes. The depositions were obtained somehow from the clerk's desk by Mr. Smith and taken into the yard near the urinals, and read to the witnesses who had been examined and ordered out of court and the witnesses—Mrs. Brull and Griffiths—who had not given their evidence.
299. You made a complaint? The inspector brought it under the notice of Mr. Smithers, and he gave instructions for Mr. Smith to be brought into court and hand over the depositions to the clerk.
300. The case was dismissed? Mr. Smithers went to the hotel, and when he came back he said he would dismiss the case, as he thought I might have been mistaken, and he gave the publican the benefit of the doubt.
301. You intended to call other witnesses when the case was closed? I intended to call them to give evidence that I was at the station when it was sworn that I was at the hotel. I reported it to the Inspector-General that I had these witnesses to call.
302. This is the first report you made as far as Swan was concerned? Yes. My object was not for the purpose of getting a case against the publican, but, as the senior constable, to see about Swan, and I had to be guided by my inspector, no matter who it was for or against.
303. *Mr. Abigail.*] You have admitted that your only object in looking through the keyhole was not to get the publican into trouble, but to get a complaint against Swan? It was my duty as —. [*Interrupted.*]
304. I do not want to know that, or hear you make speeches. You have admitted that your object was to see after Swan? Yes.
305. Had you any right, not being licensed under the act, to watch that hotel? Certainly, that was my duty.
306. It was your duty? If I failed in my duty —. [*Interrupted.*]
307. Is it your duty to endeavour to entrap publicans for a breach of the act without being specially authorised? Yes, if I think there is a breach of the act in progress.
308. And you, knowing that it was your duty, waited till you saw drinks served, and afterwards left the other two men and followed Swan? They all went away together.
309. Did you not say you saw four or five drinks handed into the parlour by a female, and you waited outside till Swan left the hotel, and then followed him? I think you have made a mistake in saying the female handed drinks round.
310. But you have sworn that you saw a female hand drinks round? I saw a female come out of the bar with four or five drinks, and as soon as she came out of —. [*Interrupted.*]
311. That is in your evidence. Did you not also swear another round of drinks was handed round? Yes.
312. If you were there to honestly discharge your duties, why did you not knock at the door and accuse them? Because I had no authority to enter under the act.
313. You had no authority to enter the hotel? No, but I had authority to lay information.
314. And your main object in watching the hotel was not the performance of your duty, but to obtain a complaint against your subordinate officer? No, my duty was for both.
315. Why did you watch at the keyhole for an hour and a half, when you could have gone to the police-station and got an inspector to come in five minutes? There was only one sub-inspector on the street that night, and it might have taken till 3 o'clock for me to find him.
316. Did you not swear that Vane was at the station when you got there? No.
317. Did you not say he took you there? Yes, that was at 12 o'clock; but I was not at this hotel then.
318. But within twenty minutes you left the station and went to the keyhole? I did not go for that purpose.
319. When you got to the hotel you saw something which attracted you, and you looked through the keyhole? I did.
320. And you heard what you deposed to? Yes.
321. A few minutes after that you saw drinks being served, and then another—how long after? It may be five, ten, or fifteen minutes.
322. When you saw the first drink served, why did you not return to the station and get Vane to come? Yes, and find them all gone when I got back!
323. That is your explanation? Yes.
324. When you made that sketch of the keyhole, did you shade it to make it look bigger? No.
325. Which side of the table were the men sitting? On the Waterloo side.
326. The side nearest the keyhole? Yes.
327. How many men? I do not know, exactly.
328. You swore, "I saw two or three rounds of drink supplied, and all the glasses but one were handed to men sitting at the table"? I could only see the legs of one at the table.
329. You swore you saw Swan lift the glass to his lips? No.
330. Where was Swan at the time the glasses were handed to the table? At the table.
331. If the door leading from the bar is open, it will shut out all view of the parlour; is that a fact? No.
332. Why did you not say anything about Mrs. Brull? I did not know her at the time; I said "a female."
333. Did you not say Mrs. Brull was there? Yes.
334. Why did you not ask who the lady was? I had the publican to deal with.
335. With regard to the key being in the door or not, was not that question raised in court? No.
336. It was never suggested that the key was in the door?
337. Was it in the lock? No.
338. The key was out? Yes.

- W. E. Quelch. 339. Why did you wait so long after seeing Swan drink ; would you have waited until 4 o'clock if Swan had not come out ? I would ; it was my duty as his senior officer.
- 27 Oct., 1897. 340. You said you were in the Queen's navy first ? Yes.
341. Did you resign ? I completed my service, and got my discharge and certificate.
342. How many years were you in the navy ? From 3rd April, 1873, to 5th December, 1885.
343. What was your record in the navy ? My parchments can be produced.
344. Were they good or bad ? Good.
345. What were you ? Sailmaker.
346. You were ranked as a petty officer ? Yes.
347. How long were you in the Water Police ? Going on for two years.
348. Why did you leave ? I resigned.
349. Did you not put in your resignation to avoid dismissal ? No.
350. Was it not put to you that to avoid disgrace you should resign ? Were you not first suspended during inquiry ? No.
351. Were you not suspended for four days for insubordination ? No.
352. In January, 1887, you were reported for insubordination to your superior officer, Donohoe ? If the department terms what I was reported for insubordination, I was.
353. The official record shows that you were reported for insubordinate conduct to Inspector Donohoe ? If the department calls it so, I was.
354. What do you term it ? The Inspector believed I was a man of violent temper and insolent in manner.
355. That was the report made against you.
356. *Mr. Bull.*] That was insubordination.
357. *Mr. Abigail.*] Was there a young lady in this case ? Not at all.
358. Was there not some trouble about a young lady ? No, not in the least. I do not know a lady in the case at all.
359. In 1887 you were under the supervision of His Worship, Mr. Marsh. Did he recommend your removal from the Water Police Division ? Yes.
360. And a very strong minute was written by Inspector-General Fosbery ? No.
361. I have here a report from Inspector-General Fosbery and Mr. Marsh [*Exhibit 4*] recommending your removal from the Water Police Division. Was it never brought to your notice ? It says, "It is unfair to transfer a man with his (Quelch's) character. He had better send in his resignation?" I never heard that minute read.
362. Was it not furnished to you ? No.
363. And you sent in your resignation ? No, I did not hear that report read to me.
364. Did you not go to the then Mr. Dibbs and ask him to throw in his influence to keep you in the force ? I went and he thought an inquiry should be made into the conduct of other officers.
365. Did Mr. Dibbs interview the Inspector-General and get a letter from him in these words : "My dear Mr. Dibbs —" [*Interrupted.*]
366. *Mr. Bull.*] This is immaterial.
367. *His Worship :* It is immaterial if Quelch says he has never seen it. Mr. Marsh recommended his removal to another division.
368. *Mr. Abigail.*] The Inspector-General writes this letter, and then there was the minute : "This man should send in his —" [*Interrupted.*]
369. *His Worship :* He must admit he resigned in consequence of the report against him.
370. *Mr. Bull.*] And that was ten years ago.
371. *Mr. Abigail.*] Was that the only report you had against you while in the Water Police Force ? Yes.
372. Were you not reported in 1888 for neglecting to work your beat, and fined ?
373. *His Worship :* That is a very trivial matter.
374. *Mr. Abigail.*] Notwithstanding all your influence, did not the men with whom you were associated threaten to throw you in the harbour if you remained in the Water Police ? No, I never heard of such a thing.
375. What is your salary ? 9s. a day.
376. Is that for seven days a week ? Yes.
377. Do you get that clear ? No, less 3 per cent.
378. What family have you got ? Six.
379. A wife and six children ? Yes.
380. You married a widow. Had she any means ? Yes, a business.
381. *Mr. Bull.*] I object to this.
382. *His Worship.*] I do not think we can go into this.
383. *Mr. Bull.*] At present we are dealing with the first charge. What has all this to do with the Somerset Hotel ?
384. *His Worship :* Keep his wife and family out of the case altogether.
385. *Mr. Abigail.*] I want to show that Quelch could not obtain property and keep up the position he has on wages of £3 3s. a week.
386. *His Worship.*] I will not listen to any matter with reference to his wife and family.
387. *Mr. Abigail.*] Returning to this charge of the Somerset Hotel : you admitted to me that you had no right as a constable to go into the hotel or demand admittance, although you saw a breach of the law in actual progress ? No.
388. Did you not, although you had no authority, after seeing Swan, come back to the hotel and demand admittance, and make them open the door ? I did not.
389. When you went back was the door open ? Yes.
390. Did you have a conversation with the licensee ? Yes.
391. Had you any right to have this conversation whether the door was open or shut ? Yes.
392. Without receiving authority from your sub-inspector ? Decidedly.
393. You know that all through the inquiry in this case for the defence it has been said that Swan was on the side of the table near the fireplace ? I never heard tell of it.
394. Did Swan not swear he never had his back against the door ? No.
395. *His Worship :* With all this conflicting evidence, the magistrate dismissed the charge. 396.

396. *Mr. Abigail.*] Which went to prove that Quelch endeavoured to get an accusation against the publican and Swan by false evidence. Will you swear that the Phillip-street door was open or shut—which Swan had his back to? The near door was wide open all the time.
397. Then, how could Swan have his back up against it? I did not say against the door.
398. You did.
399. *His Worship.*] That is a matter of credibility, and we really cannot go into it.
400. *Mr. Abigail.*] How many times at Redfern have you been reported? I was fined about seven years ago by Acting Superintendent Anderson for not working a portion of my beat.
401. Since you have been in Redfern has not some charge been made against you? I do not know of any.
402. By the Warden of the Theological College? No.
403. Did you not prosecute some women for prostitution, and after they had pleaded guilty did you not in your theatrical style declare that the two men they were with were students of the Theological College? No. It was before they pleaded guilty.
404. Was it not after the women pleaded guilty that you said that? I said I saw the two women committing an offence with the men.
405. Was this before or after the women pleaded guilty? Before. As far as I recollect, I was very lenient with the women. I got women from the Home of Hope —. [*Interrupted.*]
406. I do not want all this. Was not a complaint made against you by the warden of the Theological College in connection with this case? Not at all.
407. Did you charge either of these students? No; they cleared away.
408. So that it was only because one had a college cap on that you thought them students of the Theological College? He had the gown.
409. Although there are four colleges, you said the students came from the Theological College. Did not Mr. Anderson make a complaint about your conduct? No.
410. Have not other complaints been made against you? Did not Higgins make a complaint against you? Yes. He also took an action, and never appeared.

W. E. Quelch.
27 Oct., 1897.

Isaiah Chaseling sworn and examined :—

411. *Mr. Bull.*] What is your name? Isaiah Chaseling.
412. What are you? A teacher, in the Department of Public Instruction.
413. Where? In the Redfern Public School.
414. In what capacity are you employed there? Assistant Teacher.
415. Do you know the hotel alleged to be kept by Brull in 1894? I have had it pointed out to me.
416. Where is it situated? At the corner of Pitt-street, Redfern, and Phillip-street, Waterloo.
417. You made personal inspection of the door there? No; I worked out my calculations from measurements given to me.
418. Were these measurements worked out by yourself? The calculations were. [*Exhibit 5.*]
419. Showing the ability of a person looking through a keyhole of these dimensions to see inside the place? Yes, showing the vertical range and horizontal range of vision.
420. You have seen the place? Yes.
421. What did you find from your calculations? The vertical range of any person outside, looking through a keyhole of these dimensions, would be 11 feet 8 inches, and the horizontal range 4 feet 1 inch.
422. Supposing a man were standing inside, 14 feet away from the keyhole, and a person was looking through the keyhole from outside, how much of that man would he see? Anywhere within the horizontal range of 4 feet 1 inch, you could see the whole of a man 6 feet high. The question can be worked out by Todhunter's Mensuration.
423. *His Worship.*] I think it is a waste of time going into this.
424. *Mr. Abigail.*] The magistrate who decided the case did not think it a waste of time.
425. *Mr. Bull.*] I suppose an observer in the dark outside would see more distinctly looking into a building lit up? Yes.
426. *His Worship.*] Would he be able to see the greater portion of the room? Yes. When I found I was to be called in this case, I made an experiment through the keyhole of my own door of similar measurements, and I could see over the head of a man 5 feet 10 inches high.
427. *Mr. Abigail.*] Your calculations were made from figures supplied by Quelch? Yes.
428. You have never looked through this particular keyhole? No.
429. You have seen the door? Yes.
430. There are a couple of steps outside? I do not know.
431. You have not taken into calculation the thickness of the door? Yes. These are the exact figures on the paper.
432. You have never taken the bearings of the room? I made this out from measurements given me by Quelch.
433. *His Worship.*] It is absurd to try and prove what Quelch did or did not see from this examination.

I. Chaseling.
27 Oct., 1897.

Frederick Robinson sworn and examined :—

434. *Mr. Bull.*] What is your name? Frederick Robinson.
435. What are you? A constable, stationed at Redfern.
436. Do you know the hotel which was kept by Brull in 1894? Not in 1894; I know it now.
437. It is kept by Murphy now? Yes.
438. Have you lately made an observation through the keyhole of the door in Pitt-street? Three or four weeks ago I did.
439. So far as you could see, have there been any alterations made in the door? It appears to be an old door.
440. In the same condition as in 1894? It appears to be an old door.
441. Who was with you at the time? I remember speaking to the licensee of the hotel.
442. What was the effect of your observations? I got him to close the door, and then stand in the position he said Swan was.

F. Robinson.
27 Oct., 1897.

- F. Robinson. 443. Describe the position? Down the doorway in the second room, or hall, from the keyhole.
 444. What time was it? Day.
 27 Oct., 1897. 445. Tell us what you saw? Murphy asked if I could see him. I said, "Yes." He had a bottle in his hand, and I could see his mouth distinctly. I saw him lift his hand, and saw him drinking.
 446. Could you see the man himself? Yes; I could see his face.
 447. You had no difficulty in seeing this? No; I saw it easily enough.
 448. You know the statement made by Quelch as to what he saw through the keyhole? I have heard it.
 449. From your observations, and judging from the view you had, would Quelch have had any difficulty in seeing inside? No.
 450. How was the room lighted? By daylight.
 451. You have been in the force some years? About four.
 452. And you do night duty? Every second month.
 453. Would you find any difficulty in seeing into a building lit up, looking in from the dark outside? No.
 454. There was no artificial light when you made this experiment? No.
 455. *Mr. Abigail.*] You are not instructed to spy upon publicans through keyholes? No.
 456. That appears to be the approved way of publican-catching. You know Swan? Yes.
 457. He is a man and a half compared with Murphy? He is a medium-sized man.
 458. You admit he is not as tall as Swan? No, not as tall.
 459. And he is thin? Yes.
 460. *Mr. Abigail.*] You know where the table is now? I cannot say.
 461. Did you see where the table was? I never noticed it.
 462. If it was in your line of vision, you must have noticed it? I never noticed it.
 463. *His Worship.*] I am getting tired of this keyhole business. I think you might drop it.
 464. *Mr. Abigail.*] Would you go and see it?
 465. *His Worship.*] No, certainly not.
 466. You did not see the table when you looked through the keyhole? I did not notice.
 467. *His Worship.*] I think this keyhole subject is exhausted.
 468. *Mr. Abigail.*] Were you not charged with breaking a man's arm while in the force? I was acquitted.
 469. Notwithstanding the fact that you admitted breaking it? Yes.
 470. *Mr. Bull.*] Was not the case this: A man struggled with you, and, if his arm were broken, it was done during the tussle? Yes.
 471. And the jury chose to believe you? Yes.

Thomas Vane sworn and examined:—

- T. Vane. 472. *Mr. Bull.*] What is your name? Thomas Vane.
 473. You are a senior-serjeant. No, a serjeant.
 27 Oct., 1897. 474. How long have you been in the Force? Twenty years.
 475. Stationed at Redfern? Yes.
 476. You know Quelch? Yes.
 477. How long has he been associated with you in police work at Redfern? Nine years.
 478. He is a very active officer? Yes.
 479. He has worked with you a long time in connection with your duties connected with hotels? Yes in all parts of the city and suburbs.
 480. Are you a sub-inspector under the Licensing Act? Yes, in the metropolitan division.
 481. Do you remember the 6th January, 1894? I remember the circumstances of the night.
 482. It was the night it was alleged that Swan was in Brull's hotel? Yes.
 483. Had you been on duty with Quelch that night? Yes.
 484. What time did you leave him? About 10 past 12.
 485. You left him at the station? Yes, taking notes.
 486. Do you know the house then kept by Brull and now kept by Murphy? Yes, I live within 20 yards of it.
 487. Do you remember the matter before Mr. Smithers? I was there on the Thursday.
 488. Do you remember something happening with regard to the depositions? Yes, Mr. Smith was spoken to by Mr. Smithers for having taken them out of court.
 489. And you know they were read to persons outside? I do not know. I heard Mr. Smith accused of it and he did not deny it.
 490. During the time you have been associated with Quelch what sort of a man have you found him? Truthful and honest.
 491. Your experience of him is that he is truthful, honest, zealous, and a hard worker? Yes.
 492. Have you ever had reason to complain about him for misconduct? No, I was sorry to lose him.
 493. Your experience of publicans is that they will do all manner of things to evade the Act? Yes.
 494. Have you ever had reason to doubt his word in connection with his duties? Yes, in cases where men have been charged with drunkenness; but they have afterwards been proved guilty.
 495. These men were charged with drunkenness, and gave wrong names? Yes, and I doubted whether it could be proved that they were the same.
 496. *Mr. Abigail.*] Are you really serious in saying, after giving Quelch such a good testimonial, that you had doubts about his information? I did not mean that. I meant the men who had been summoned and gave other names and addresses.
 497. You said that you had doubts about him? I said about the same men.
 498. You doubted him when he said certain men had been drinking in an hotel? About the two men, until they had pleaded guilty, and proved he was right.
 499. You doubted that they could be proved to be the same men? Yes, that is it.
 500. You must admit that at Redfern, at the station, the Police Force is very much disorganised? I cannot say that.
 501. Do you know that sides are taken in this very case, and that there is another dispute going on? I cannot say anything about it. I have not found it so.
 502. You must admit that the men there are taking sides for and against Quelch? No. 503.

503. You will admit that a certain section have taken the side against Quelch? I cannot admit anything of the sort. T. Vane.
27 Oct., 1897.
504. You said Quelch was such a pleasant officer that you were sorry to lose him. Have you made up your mind that you have lost him? His services are lost to me in a certain portion of his duty.
505. You have made up your mind you have lost him? No.
506. How long has he been suspended? Two months.
507. During that time have you been to his house? Yes.
508. Have you been since this inquiry and been assisting him? No.
509. Has Lawless been there? I do not know.
510. I suppose you will admit that Quelch has been to your house since his suspension? Yes, once.
511. When was that? I could not say, I did not take notice.
512. You cannot tell. Was it yesterday or the day before? The first week he was removed from duty.
513. Would it not have been easy for Quelch to have left his position at the keyhole and gone to the station and back again in a few minutes? In about fifteen.
514. He could have left, been seen by an officer in the station, and returned in fifteen minutes? Yes.
515. You have a son, a painter? Yes.
516. You are frequently called to complain about signs? No, my son is 26 years old, and has been away at Mount Morgan this long time.
517. *His Worship.*] You must not go into this sort of thing.
518. *Mr. Bull.*] This is an attack all round against everybody. Where is your son? At Mount Morgan.
519. How long has he been there? Three months.

William Edward Quelch recalled and examined :—

520. *Mr. Bull.*] You are already sworn? Yes. W. E. Quelch.
27 Oct., 1897.
521. You saw some measurements in the hands of Mr. Chaseling? Yes.
522. Did you make them? Yes, in the presence of the present licensee of the hotel, in the first week I went off duty.
523. They are correct? Yes.
524. I hand them in as an exhibit [*Exhibit No. 5*], with two papers containing the calculations Mr. Chaseling has sworn to. You heard the question asked about your suspension—you are not suspended? No.
525. Simply removed from duty? Yes.
526. Explain the difference: in one case you would not get paid, and while you are removed from duty you get paid? Yes.

William Richard Swan recalled and examined :—

527. *Mr. Abigail.*] You have been sworn? Yes. W. R. Swan.
27 Oct., 1897.
528. With reference to the trivial offences mentioned by Mr. Brull, have you been frequently congratulated by juries who tried cases in which you were interested? Yes.
529. And specially thanked in court by the juries? Yes.
530. And by Judge Backhouse? Yes.
531. In one case, in connection with a "push" battle, the jury handed up a memo. thanking you for your conduct?
532. *Mr. Bull.*] I object to this.
533. *His Worship.*] I do not want that sort of thing.
534. *Mr. Abigail.*] This man's character has been blackened, and I think this should go in. In the hotel that morning, say where you and the other men were sitting round the table? At the fireplace.
535. *Mr. Bull.*] This is unfair at this stage.
536. *Mr. Abigail.*] You say you were sitting at the side nearest the fireplace. Who also sat at that side? Mr. and Mrs. Brull.
537. Were any others sitting? Mr. Cook and Griffiths.
538. Is it absolutely impossible for anyone to see you through the keyhole where you were sitting? It is impossible.
539. Were you standing with your back against the door? No.
540. *Mr. Bull.*] You did not know Quelch was looking through the keyhole? I saw him when I came out the first time.
541. And then I suppose you did not care to be seen, and went in again? Yes.
542. *His Worship.*] You did not know he was looking through the keyhole? No.
543. *Mr. Abigail.*] I wish to put in the report of Mr. Marsh's, and the official papers dealing with that case. I assume they will be equally applicable for the other charges? [*Exhibit No. 4.*]
544. *His Worship.*] Yes.

The inquiry was then adjourned until Friday, the 29th of October, 1897.

FRIDAY.

FRIDAY, 29 OCTOBER, 1897.

[The Commission sat in the Licensing Court, Central Police Station.]

Present:—

MR. WHITTINGDALE JOHNSON, S.M. (SOLE COMMISSIONER).

Mr. J. R. Dacey, M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, Solicitor, appeared to support the charges; Mr. Charles Bull, M.L.A., Solicitor, appeared to defend Senior-constable Quelch; Mr. J. Garlick, L.S.W., Vic., was sworn to faithfully take and transcribe shorthand notes of the evidence and proceedings.

Charges Nos. 2 and 3.

Mr. Abigail: I am going now your Worship on charge No. 2, "Bellevue Hotel."

Inspector Cotter then read charge No. 2—"That in contravention of the strict instructions of the Inspector-General, who orders that no constable shall in any way try to trick a publican into supplying liquor within prohibited hours: Quelch disguised a young new policeman as a fisherman and sent him into an hotel next the fishmarket before 6 o'clock in the morning to appeal to the publican for a drink. Quelch got a conviction by that, in my opinion, most contemptible action."

And Charge No. 3.

"That, similarly, he sent the same constable disguised as a driver into an hotel next McMabon's stables. He was disguised as one of McMabon's drivers; the result was that the lessee of that hotel was also fined."

Constable George Henry Edwards was called and sworn:—

G. H.
Edwards.
29 Oct., 1897.

545. *Mr. Abigail.*] How long have you been in the Police Force? About four and a half years.

546. And are you attached to the Redfern station? Yes.

547. And have you been there from the first? Yes.

548. Since your entering into the Police Force? Yes,

549. And you are under the command of Senior-constable Quelch? Yes.

550. Have you done publican duty with him? Yes.

551. Public-house duty? Yes.

552. That is known to the Force as "pub catching" is it not? Yes.

553. Have you, when on such duty, assumed certain disguises? No.

554. *Mr. Abigail.*] Now, Edwards, I want you to be very, very careful.

555. *His Worship.*] Had not you better ask him in such and such a case.

556. *Mr. Abigail.*] I will ask him generally first.

To the witness: You are perfectly protected now. Whatever answers you give to my questions you are perfectly protected, and you need not be afraid of any outside influence against you in the Force.

557. *His Worship.*] You have not sent me the original of the two cases where they pleaded guilty?

558. *Mr. Abigail.*] Yes, I have.

559. *His Worship.*] You might let me have them?

560. *Mr. Abigail.*] Certainly, I will.

561. *His Worship.*] Then you can ask him as to those particular cases? Those are the only two. [*Mr. Abigail then handed up the papers to His Worship.*]

562. *His Worship.*] You will confine yourself to the Regent-street hotel.

563. *Mr. Abigail.*] Yes. (*To the witness.*) Now, do you know that there is a rule issued by the Inspector-General; a rule which obtains in the Police Force, against constables trying to trick publicans into supplying liquor within prohibited hours? No.

564. You do not know that there is such a rule? I was not aware of it at that time.

565. Are you now aware of it? I have been informed so.

566. When? I think it was last Sunday week, by Mr. Dacey. I fancy it was on a Sunday afternoon.

567. Then last Sunday week, for the first time since you have been a policeman, you were informed by Mr. Dacey that there was a rule in the Police Force against constables tricking publicans into supplying liquor within prohibited hours? Yes.

568. Do you read your Regulations? I have read them.

569. The Regulations of the Police Force? Yes; I read them when I joined.

570. Is not every constable furnished with a copy? Yes.

571. And are there not from time to time orders issued from the head office which are affixed to the walls of your station? Yes.

572. And which you are asked to read? Yes.

573. Well, since Mr. Dacey informed you that there was a rule against this trickery of publicans, have you made any inquiries from your superior officers to find out whether it is true or not? No.

574. So that even now you do not know that there is such a rule—you do not know it officially? No.

575. *His Worship.*] Had not you better ask him what he did on this particular occasion?

576. *Mr. Abigail.*] I am coming to that.

577. *His Worship.*] There is a great difference between tricking a man into a thing and adopting a necessary disguise.

578. *Mr. Abigail.*] That is the element in the trickery, the disguise.

579. *His Worship.*] No. Almost every conviction is obtained by constables going in disguise.

580. *Mr. Abigail.*] We say the rule is against it.

581. *His Worship.*] It would be a trick for a man to go at an unusual hour and say that a certain person was very ill and required a certain stimulant, and get it in that way.

582. *Mr. Abigail.*] Your Worship is inducting me into the meaning of the word "trickery."

583. *His Worship.*] That is my opinion. I want to know what the man did. I will have to say whether it is a trick or not.

584. *Mr. Abigail.*] It is for me to say it here. It is for your Worship to say it afterwards.

585.

G. H.
Edwards.
29 Oct., 1897.

585. *Mr. Bull.*] I might be pardoned for saying that my friend has no right to say what is a trick at the present time.

586. *Mr. Abigail.*] I have already put in a minute from Inspector-General Fosbery.

587. *His Worship.*] I want you to extract from the man what he did, and then it will be seen whether it is a trick or not.

588. *Mr. Abigail.*] I have to show your Worship whether it is a breach or contravention of the rule.

589. *His Worship.*] You get what he did, and call in the publican, and from the facts produced I can ascertain whether there is a trick or not. All it is necessary for you to do is to ascertain what the publican did, and what the constable says he did, and whether it comes within the regulation or not. Of course, when you address the Court, you can bring forward that statement if you like, and give your opinion then.

590. *Mr. Abigail.*] Then you will meet me by saying "Where is the evidence of the rule?"

591. *His Worship.*] Of course there is a rule, but this is the interpretation of this rule; if the law were as interpreted by you it would prevent any convictions whatever.

592. *Mr. Abigail.*] If you read Charge No. 3 you will see that part of my evidence goes straight in support of that charge. "He was disguised as one of McMahan's drivers."

593. *His Worship.*] There is no good a constable going in with his metal buttons on; he could not get a conviction.

594. *Mr. Abigail.*] If your Worship expresses an opinion beforehand there is no good in going on. Your Worship says a disguise is not a trick.

595. *His Worship.*] No. Ask the man what he did. That is what I want.

596. *Mr. Abigail (to the witness).*] I want to know from you whether you went to this Belleview Hotel on 3rd November, 1893, with Quelch, who is your senior constable? Yes.

597. And whether you detected the licensee in supplying liquor within prohibited hours? Yes.

598. How were you attired on that occasion? I was dressed in my own private trousers, and the coat I would not swear to; I think it was an old coat of Quelch's, and a slouch hat of Quelch's, and I had a basket on my arm, which basket —. [*Interrupted.*]

599. Which basket? Was left outside on the kerbstone when I entered the public house.

600. What was the object of your having this old coat of Quelch's on, the slouch hat of Quelch's, and the basket on your arm? I had to put plain clothes of some description on.

601. A basket is not part of a man's attire? I might as well have had Quelch's clothes on as my own.

602. That is a very ingenious way of getting out of it.

603. *His Worship (to the witness).*] Answer in a straightforward way.

Mr. Abigail.] A basket is not part of a man's ordinary apparel. A set of false teeth might be, but a basket is not? The basket was to get close to the hotel without attracting attention.

604. *His Worship.*] Was it not that you might not be known as a policeman. I do not suppose you would get a conviction if you went in in policeman's clothes. Was it not that you should be considered one of the ordinary public? Yes.

605. *Mr. Abigail.*] Why did not you answer that question direct? You know that that was your object.

606. *His Worship (to the witness).*] Tell the exact truth about it from beginning to end.

607. *Mr. Abigail.*] Did not you say you did not take the basket in? No; I did not.

608. How near to the door did you leave it? Some 4 or 5 yards.

609. Well, then, it must have been on the kerb? It was on the kerb.

610. Are you sure it was not in the gutter, where no one could have seen it? It may have been.

611. Now, did not you take it in with you? No.

612. You were supposed to be a fisherman, a hawker? No; I was not.

613. Is there not a fishmarket in the vicinity of the hotel? Yes.

614. Next door? Yes.

615. And you mean to say that your senior constable was posted outside when you were doing this? He was somewhere in the vicinity.

616. And you were working under his instructions? Yes.

617. Then he knew that you were endeavouring to deceive the publican?

618. *His Worship.*] You know the business of an informer is not one of very high order at any rate.

619. *Mr. Abigail.*] I want to know whether your superior officer, Senior-constable Quelch, knew that you had been endeavouring to deceive a publican into believing that you were not a policeman? Yes.

620. *His Worship.*] Of course he was.

621. *Mr. Bull.*] Can there be any doubt in the world about it?

622. *Mr. Abigail.*] And you prided yourself that you really did look like a real fish hawker? No.

623. Did not you say so? I might have said so at the time.

624. There is no offence in it at all. Did not you afterwards go back to the station and publicly talk about how successfully you disguised yourself? Yes; I was not the first.

625. You were congratulated on your excellent acting, were you not? Yes.

626. This coat of Quelch's was really a jumper—a sort of jumper worn by the Water Police? I do not recollect the coat; I would not swear it was Quelch's coat.

627. But you have? I beg your pardon, I said I would not swear whose coat it was.

628. You have sworn deliberately here that you were in a pair of your own trousers and a coat of Quelch's? No, I did not.

629. *His Worship.*] You went there for the purpose of ascertaining whether the law had been broken and disguised yourself as one of the ordinary frequenters of the place? Your Worship, I did not swear that I had Quelch's coat on.

630. Did you not go there for the purpose of being taken for one of the ordinary public buying liquor at the place? Yes.

631. *Mr. Abigail.*] By what door did you enter the hotel? It was the door in Redfern-street, next to the market.

632. That is opening on to the street? Yes.

633. You said you left your basket either on the kerb or in the gutter, and that that is 4 or 5 yards from the door. Now, do you not know perfectly well that from the gutter to the front door is only 4 feet?

634. *His Worship.*] I will admit that it is perfectly immaterial whether he left the basket on the kerb or not.

G. H.
Edwards.
29 Oct., 1897.

635. *Mr. Abigail.*] But if I can show that he is a liar —. [*Interrupted.*]
636. *His Worship.*] You are going outside the matter altogether. The publican has pleaded guilty. There is no question whether the liquor was sold.
637. *Mr. Abigail.*] I am only questioning the manner in which the evidence was obtained.
638. *Mr. Bull.*] My friend is calling this witness to prove something, and then he says, "If I can prove he is a liar, I will prove something else."
639. *Mr. Abigail (to the witness).*] As a matter of fact you have been told by Quelch what your evidence ought to be at this commission? Oh no, I have not.
640. When did you see Quelch about your evidence on this Commission? I did not see Quelch about any evidence.
641. Do you mean to say that you have never had any conversation with him nor he with you about the evidence you should give? No.
642. *His Worship.*] What is the use of going on with this? The man has admitted being disguised as a fisherman into this place.
643. *Mr. Abigail.*] If I can incidentally prove and put before your Worship that some of these witnesses have been influenced by Quelch into giving false evidence, I can —. [*Interrupted.*]
644. *His Worship.*] He has not been giving false evidence.
645. *Mr. Abigail (to the witness).*] Do you say that you have never been interviewed by Quelch as to what your evidence would be? No, never asked as to what evidence I should give.
646. Have you had any conversation with Quelch about your evidence at this Commission? No.
647. Do you mean to stand there, having taken an oath, and swear that Quelch has never had any conversation with you about your being a witness here? No, we have never gone into details.
648. *His Worship.*] They have naturally spoken about it. The whole thing has been before the public the last week. Everybody has spoken about it? I have not spoken of the direct evidence I should give. I have not spoken to anybody about it.
649. *Mr. Bull.*] The question was: Have you spoken to Quelch or Quelch to you about the evidence you should give?
650. *Mr. Abigail.*] When you knocked at the door who opened the door to you? Nobody opened it.
651. *Mr. Bull.*] Have you noticed the form of the question—"when you knocked at the door"? There is no evidence of that yet.
652. *Mr. Abigail.*] It was open when you walked in? Yes.
653. What time was it? It was about twenty-five minutes past 5, or five and twenty to 6.
654. In the morning? Yes.
655. Hotels ordinarily open at 6 o'clock? Yes.
656. *His Worship.*] That is the legal hour; they are not supposed to be open before that time.
657. *Mr. Bull.*] Between 6 and 11 on the business days of the week—that is the Act. This was a Friday.
658. *Mr. Abigail (to the witness).*] Now, did you go to the "Imperial Hotel" on November 23rd of the same year? Yes.
659. Were you similarly attired on that occasion? No.
660. Were you disguised? No.
661. What particular form of disguise did you have on on that occasion—private clothes? I think I had my own private clothes on on that occasion, and, instead of the round basket, similar to the fisher basket, I had a square basket with a handle to it.
662. I see the basket was "on the square" if you were not? We were both "on the square."
663. Instead of a basket, was not it a brick with a handkerchief tied over it? No; no handkerchief, or no brick either.
664. As if you were carrying a very fat lunch? No.
665. Was the basket empty or full? Empty.
666. That was at 5:35 a.m.? Yes, one of these two was about 5:35. I would not be sure which one it was.
667. That is in the vicinity of the fish market? It is rather further away.
668. It is in the neighbourhood, is it not? Yes, it is in Redfern.
669. Now, you did not wear your own uniform on that occasion. Where was Quelch at that time, was he in your vicinity? Yes, he was close by.
670. And you were acting under his instructions? Yes.
671. Now, in either of these two cases, were either of you acting under the instructions of the Sub-Inspector under the Licensing Act? I never took any orders of any description from the Inspector under the Licensing Act.
672. You take your orders from Quelch? Yes.
673. You do not know where he got his orders? No.
674. How did you get into the "Imperial Hotel"? The gate was open.
675. Which gate? The gate round in Wells-street.
676. There is a spring on the gate, is not there? I did not notice whether there was a spring on the gate.
677. You walked through the back way? Yes.
678. Where was Quelch at this time? With me.
679. You walked in together? Yes.
680. He was in uniform? Yes.
681. On the occasion when you walked into the "Bellevue Hotel," did he walk in too? No, he was just behind me.
682. Tell me, were you ever called upon for a report in connection with the entrapping of these two licensees? No.
683. I suppose that since these dates in November, 1893, you have been continually assuming disguises, have not you, and going out with Quelch? No.
684. Did you hear Quelch say "No" in that dramatic stage whisper of his just now? No.
685. Well, I heard it. Now, did not you say in the station in the presence of your fellow constables, in connection with this commission, that you did not know which side to take—now, did you not? I have no recollection of saying that.
686. Will you swear that you did not say in the Police Station, in the presence of your fellow officials, "I do not know which side to take"? No, I never said that. 687.

G. H.
Edwards.

29 Oct., 1897.

687. Now, first you say you do not recollect it, and now you say you never said it; now, which is it? I never said that.
688. You will swear positively you never said it? Yes.
689. Don't you know that neither a constable nor a senior-constable, unless the senior-constable be a sub-inspector under the Act, has any right to enter an hotel? I did not know then; I was not in the Force six months; how would I know it?
690. Do you know it now? Yes, I know it now.
691. And did not Quelch tell you that the object he had in getting these prosecutions against licensees was to become appointed a sub-inspector, which meant £15 a year to him? No, he never said any such thing to me.
692. At any time? At no time whatever.
693. *Mr. Bull.*] I object to that.
694. *Mr. Abigail.*] I will alter it to £5? No.
695. He never told you, did he? No.
696. *Mr. Bull.*] Did your Worship notice the last question? However, the witness has said "No." He never told you, did he, that the object he had in getting these prosecutions was to become a sub-inspector, which meant £5 a year to him?
697. *His Worship (to the witness).*] Did he tell you that? No.
698. *Mr. Bull.*] Now, speaking of the "Bellevue Hotel"—the matter came before the present gentleman, His Worship, Mr. Johnson? Yes.
699. And the licensee pleaded guilty, did he not? Yes.
700. Did he make any complaint at all to the magistrate with regard to his being tricked by you? No.
701. As a fact you swear that the door was open? Yes.
702. The "Bellevue"? Yes.
703. How many persons do you remember had you seen enter by that side door before you yourself went to the door? Some three or four, at any rate.
704. And there can be very little doubt about it, Edwards, if you realise it, that if you had gone in your uniform you would not have got within a mile of the hotel? No, certainly.
705. You were conscious that the law was being broken, or, at any rate, you suspected it was? I had seen the man doing a systematic trade at that hour in the morning. I had marked it myself.
706. You had seen the same publican doing a systematic trade on similar mornings? Yes.
707. This was on a Friday morning; the 3rd of November was a Friday. Do you know as a fact—was it not known to you, and to the other police officers, that this man systematically carried on business from 5 o'clock in the morning? Yes.
708. Do you know as a police officer that persons were about the hotel keeping watch, looking out in case a policeman might come along? That I do not know.
709. Now, I want your Worship's attention to this charge. Did you at any time that morning ask this publican for a drink? No; never.
710. Did you, by any trick or by any subterfuge, attempt to impose upon the publican? No.
711. Is it true, as stated in this charge—I want your Worship's attention to this—"That, in contravention of the strict instructions of the Inspector-General, who orders that no constable shall in any way try to trick a publican into supplying liquor within prohibited hours, Quelch disguised a young new policeman as a fisherman and sent him into an hotel next the fish market before 6 o'clock in the morning to appeal to the publican for a drink." Is there any truth in that? None whatever.
712. He was charged, was he not, and convicted, pleading guilty, of supplying liquor to other persons, not to you? No; not to me.
713. And the disguise which you did adopt was what you described? Yes.
714. Now, can you remember what coloured coat it was?—I am speaking now of the "Bellview"? No; I do not recollect the coat.
715. Do you remember what description of coat it was? I fancy it was rather a short coat with a band round the middle.
716. Do you know what a policeman's jumper is? Yes.
717. Undress? Yes.
718. *Mr. Abigail.*] You have got one on? This is a jumper.
719. *Mr. Bull.*] Do you know what a Water Policeman's jumper is? Yes.
720. Is that the description of the coat you had on, something short with a band on, as you have described it? It was short, with a band on, as far as I can recollect.
721. Now let me take you away for a moment to the "Imperial," that is Friend's Hotel? Yes.
722. Is the description that you have given of the manner in which you were dressed the actual description of your dress? Your own clothes, civilian clothes? Yes.
723. And a small basket in your hand? Yes.
724. What head-dress had you? I had a slouch hat on, I think it was the same one as I had before.
725. Were you disguised in any way as a driver? No.
726. One of McMahan's drivers? No.
727. You and Quelch were the only Police Officers who were concerned in the prosecution of Friend for that offence? Is that not so? Yes.
728. Were you carrying a whip in your hand in imitation of a driver? No.
729. Have you seen these drivers of McMahan's? Yes, I have seen them.
730. How were they usually dressed? They usually have all clothes on and their shirt sleeves tucked up to the elbows, carrying a coat over their arm, and whip in their hand and a tucker bag.
731. Similar to this [*producing one*]? Yes, similar to that.
732. And with regard to the trousers, have you noticed anything in regard to the manner of the tuck or anything of that sort in the trousers? Some of them are tied round about with string, or with a piece of tape.
733. The corporation style, like the corporation labourer? Yes.
734. Now was any portion of that disguise adopted by you? No, none of it.
735. And might I ask you was Friend the defendant in that case?
736. *Mr. Abigail.*] Mr. Bull, I have not gone into Friend's case.

G. H.
Edwards.
29 Oct., 1897.

737. *Mr. Bull.*] You have gone to the "Imperial Hotel," and I have gone too. The "Imperial Hotel" is kept by Richard Friend, at the corner of George and Wells Streets? Yes.
738. That is right opposite McMahan's stables? Yes.
739. Well, did you see Mr. Friend at the police court the morning the matter was heard? Yes.
740. He appeared there himself, and pleaded guilty? Yes.
741. Did he make any charge or accusation to the Bench of any deceit practised upon him? No. I think he made a statement to the effect that it was his own fault for leaving the gate open.
742. I might ask you, with regard to the same publican, has he been convicted since? I think he has been convicted once since then.
743. I will withdraw that question, and when I put Quelch in the box I will prove that beyond a doubt.
744. *Mr. Abigail.*] You have only got to insinuate and he is bound to say it.
745. *Mr. Bull.*] I do not want to insinuate anything.
746. *His Worship.*] The whole question was whether he acted in contravention of his instructions in disguising himself.
747. *Mr. Bull.*] Whether he disguised himself in the way they charge him here.
748. *Mr. Abigail.*] The thing is this, whether to catch the criminal the policeman should himself be a criminal?
749. *Mr. Bull (to the witness).*] You have been asked by Mr. Abigail, whether you were aware of an order of the purport which he himself nominated to you. Have you ever seen such an order? No.
750. You have read these regulations through from beginning to end, have you not? Yes I did about four years ago.
751. The regulations "for the general government and discipline of members of the Police Force of New South Wales?" Yes.
752. I suppose you will state on oath that there is nothing in this with regard to it? I would not state it but I do not recollect it.
753. Have you any recollection of any rule? I have no recollection of any such rule in that book.
754. I suppose you recognise these books? Yes.
755. They are the four order books, are they not, since 1887. You know what an order book is, don't you? Yes.
756. Don't you know that these books contain the whole of the minutes of the Inspector-General, and orders through the superintendents to supernumerary policemen? Yes.
757. Would you be surprised to know that in none of these orders or books is there any such order or instruction; have you ever seen it? No.
758. The books are here; my friend may use them for any purpose he may please.
759. *Mr. Abigail.*] Do you mean to infer, from your replies to Mr. Bull's questions, that every driver is dressed as you described, with a whip in his hand, too? Well, I do not see every driver.
760. How did you dress on the occasion? As I have described to Mr. Bull.
761. How did you describe it? My own clothes and a square basket.
762. Your sleeves rolled up? No.
763. Your coat over your arm? No.
764. Your tucker-bag? No.
765. Did you not have a bag like this (*producing one*)? No.
766. *Mr. Bull.*] My friend has gone all through these questions as to how he was dressed at the time of the "Imperial."
767. *His Worship.*] I think it perfectly immaterial.
768. *Mr. Abigail.*] I want to prove that there was a disguise, and you say that it is immaterial.
769. *His Worship.*] Of course there was a disguise; a man does not go into a public-house to detect breaches of the law in the uniform of a policeman. I admit that it has been proved that this man was disguised.
770. *Mr. Abigail.*] Then, why did your Worship think it was sufficiently serious to make a charge of it? You have actually tabulated it as one of the charges.
771. *His Worship.*] They were your charges, taken from *Hansard*; they are not my charges. I think a great many of them are most trumpery. I did not tabulate them; the police tabulated them, and sent them here to me. They are what were said in the House word for word from *Hansard*.
772. *Mr. Abigail.*] Well, then your Worship will be good enough to patiently allow me to justify them if I can. If the evidence that I propose to produce is not sufficiently material to justify your Worship in finding for us, then find against us.
773. *His Worship.*] It is for you to try to prove them, and for the other side to try to disprove them. They are not my charges. They are your client's charges.
774. *Mr. Abigail to the witness.*] You admit that you were disguised when you went into Friend's "Imperial Hotel"? Yes.
775. And you will admit that Quelch was not disguised? No, he was not disguised.
776. And he and you went in together? In one case yes.
777. Now, did not you go in in both cases in the instance at the "Bellevue Hotel," and ditto in the "Imperial Hotel"; and did not you yourself ask the licensees or somebody who was attending to the bar in each hotel, for a drink? No, I never did in either case.
778. *Mr. Bull.*] In Friend's case you and Quelch entered together? Yes.
779. That is, entered the gate in Wells-street? Yes.

Inspector Edmund Lawless was called and sworn :—

Inspector
Lawless.
29 Oct., 1897.

780. *Mr. Abigail.*] Do you not know under the Licensing Act that no one in the Police Force has any authority to enter licensed premises, even where a breach of the Licensing Act is in actual commission unless he be a superintendent or a sub-inspector under the Licensing Act? Is that not so? A serjeant or a constable empowered by a written authority from the superintendent.
781. Under the Licensing Act he must be a sub-inspector, must not he? No.
782. Of course he may be a senior-constable in the Police Force; but he must be a sub-inspector under the Licensing Act? Not necessarily.
- 783.

Inspector
Lawless.
29 Oct., 1897.

783. *His Worship.*] He must be to demand admission? An amendment of the Act says that a senior-constable can be made a sub-inspector.
784. *Mr. Abigail.*] That is what I say. He must be a sub-inspector, must not he? No. In some of the country districts the constables and senior-constables have a distinct authority from the superintendent.
785. Do you not know that the Licensing Act says this, the 21st section of the 45 Victoria, No. 14—"Any of the persons hereinafter described having reasonable cause for suspecting unlawful or disorderly proceedings to be carried on, or of any breach of this Act, or the Licensing Act of 1883, to have been committed, or to be in process of commission, in any licensed premises, or the appurtenances thereto, at any time during the day or night, may demand entrance into such premises or appurtenances, namely :—(1) Any superintendent, inspector, sub-inspector, or serjeant of police"? That is what I say.
- 785½. "(ii) Any senior-constable duly authorised by any general authority under the seal of a Licensing Court. (iii) Any inspector appointed under this Act. (iv) Any constable authorised in writing by a licensing magistrate, justice, or superintendent of police." And 46 Victoria, No. 24, that is the Amending Act, says: "The provisions of section 21 of the Principal Act shall be applicable as well to any breach of this Act as of the Principal Act. But in no case shall any person be liable to the penalty prescribed by the said section for delaying admittance within the meaning of that section, unless such delay be wilful"? That is under the Act, is it not?
786. *His Worship.*] That is to "demand entrance." He cannot "demand entrance," but he can go in if the door is open, just as much as you or I or any one else can go in.
787. *Mr. Abigail.*] "Any inspector appointed under this Act—any superintendent, sub-inspector, or serjeant of police, any constable authorised—in writing by a licensing magistrate, justice, or superintendent of police."
788. *His Worship.*] I overrule that objection altogether.
789. *Mr. Abigail.*] It is not an objection, it is evidence. I submit it must go down.
790. *His Worship.*] Of course, it can go down.
791. *Mr. Abigail (to the witness).*] Are not the persons just mentioned by me the only persons entitled to enter licensed premises where a breach of the Act is being committed? Under certain conditions.
792. Under the Act? That may be; but there is something that might override the Act—for instance, there might be a great disorder.
793. *Mr. Bull.*] What a nice state of things might exist if my friend's construction of the Act were law.
794. *Mr. Abigail.*] My argument will be based on this: that this man endeavoured to secure promotion, to get an addition to his income by being promoted to sub-inspector under the Act.
795. *His Worship.*] It is a very natural thing for any man to do if he can.
796. *Mr. Abigail.*] He sets the rules of the department absolutely at defiance.
797. *His Worship.*] That is not one of your charges.
798. *Mr. Abigail (to the witness).*] I want to know from you, as Inspector of your division, had Senior-constable Quelch any authority to take any policeman, and to command that policeman to assume disguise and to enter licensed premises, he not having any authority to do so under the Act? Yes; if the licensee made no objection to his entry.
799. But if the licensee were not asked at all, and the constable and senior-constable walked in, had he any authority to do it—was it part of his duty? Certainly, if there was a breach of the law; if the door was open he could walk in. If you read further, there is a clause which empowers a constable, accompanied by someone else, to walk in.
800. *His Worship.*] It has not anything to do with the tabulated charge.
801. *Mr. Abigail (to the witness).*] Do you not know that there is a rule which you, in your position, have had to promulgate in your own division, to the effect that no constable shall trick a publican by disguise or any other form of trickery into committing offences? Certainly. No trickery of any kind.
802. And a disguise is part of trickery? I do not see that there is any disguise in a person putting on plain clothes. Certainly, if he was using any trick or doing anything which could be construed into a trick then that would be against the rules.
803. Pardon me, is this not trickery for a constable to assume the disguise of a fish hawker, and to go into an hotel and to pretend that he is a fish hawker by his disguise, is that not trickery? Certainly, if you can state what a fish hawker's disguise is, or who is a fish hawker, but I really could not.
804. Will you state this: if a constable puts on any other clothing when on duty, and not his uniform, is not that a trick? Not if he gets instructions to do it.
805. So far as a licensee is concerned, between the licensee and the constable assuming the disguise, is that not a trick? No; I should say it was a trick if he disguised himself as a salvationist, or put on a volunteer's uniform, or the uniform of the Naval Brigade, then I should say this time it was a trick.
806. You would say a salvationist uniform would be a disguise, and a fish hawker's uniform is not? Certainly. If you can show what a fish hawker's uniform is I will tell you.
807. Do you mean to seriously say that if a policeman on duty assumed someone else's clothing, or the clothing of a tradesman or a mechanic, that is not inducing the publican to think he is what the policeman assumes himself to be? I cannot say what the clothes were like he had on. He might have had Mr. Dacey's clothes on, or yours.
808. *Mr. Bull.*] Is not this the charge: that Quelch got a new policeman to disguise himself to trick the publican into selling him, the new policeman, a drink? If he drank in the house he did wrong. If he asked the publican to supply him with drink he did wrong.
809. *Mr. Abigail.*] As a matter of fact, for the last seven years, how many public-houses have you visited yourself in your position of Sub-inspector? 70 or 80.
810. Have you visited more than two?
811. *Mr. Bull.*] Why, he says 70 or 80.
812. *Mr. Abigail.*] Is it not a fact that you personally have only made two visits as Sub-inspector under the Licensing Act, have only made two visits to public-houses? What, to catch them under the Act?
813. As a Sub-inspector under the Licensing Act, how many visits have you made to public-houses? I can show you a book that will certify to you that I have made 100 visits, because I am obliged to visit the houses to report upon them.
814. Has not Senior-serjeant Bell had that duty imposed upon him? Not at all.

815.

Inspector
Lawless.
29 Oct., 1897.

815. Has he not personally complained to you that he has? Certainly not.

816. *His Worship.*] Is there any rule in writing with regard to this matter of disguise? I believe, but I cannot ascertain—[*Interrupted.*]

817. Or is it simply that the Inspector-General has given an opinion on the matter verbally? It is an opinion, I believe, that he wrote in reference to something that took place in 1882 or 1883.

818. *Mr. Bull.*] That is right, and it is with reference to a report which was sent in by a publican to the then Minister of Justice, now Mr. Justice Cohen—I was in the case—where a policeman had adopted the disguise of an old woman. The opinion of the Minister of Justice can be very easily found. He justified it. He said that if the publicans made up their minds to commit incessant infraction of the Act the police were driven to the necessity for adopting some disguise for the purpose of catching them.

819. *Mr. Abigail.*] I protest against the immorality of that decision.

820. *Mr. Bull.*] The gentleman has been elevated to the Bench since then. If a man went in any disguise himself into an hotel during prohibited hours, and induced the publican to supply him in that disguise, most certainly it would be wrong; but if a policeman, knowing that an offence is being committed and that systematic trade is going on, wants to catch the publican at that trade, he can adopt what he may consider to be a sufficient disguise to prevent his recognition as a policeman.

821. *Mr. Abigail.*] Inspector-General Fosbery is a personal authority, and he says the thing is bad.

822. *Mr. Bull.*] He expressed an opinion upon a complaint sent in about Quelch, that Quelch by his trick had induced the publican to serve this young policeman.

823. *Mr. Abigail.*] If publicans are to be at the mercy of men who have the character given them by Inspector-General Fosbery, then there is no hope for the publicans. [*To the witness.*] Do you remember a question on this very case being asked in the Legislative Assembly on the 3rd of April, 1894, to this effect: "Is it a fact that Senior-constable Quelch has succeeded in having some publicans fined under the Licensing Act by disguising himself as a fish hawk?" I remember I reported upon it. [*Exhibit No. 6.*]

824. And did you reply as follows: "I have the honor to report that I have made inquiry, and so far as I can ascertain there is no foundation for the statement made in the first question *re* the catching of the publicans, the senior-constable being in uniform all the time?" Now, I ask you candidly, did not you take advantage of the form of that question to burke the real issue by answering it specifically as asked, when you knew that the question if asked correctly meant: "Did not the Senior-constable Quelch disguise a young policeman?" You put the question in such a roundabout way—did not I do this and did not I do that? I did nothing of the kind. If you would ask me a question in a straightforward way I might be able to answer you in a straightforward way.

825. As you are a simple man, I will put my question in a simple way, and then you will probably be simple enough to understand it. I ask you now did you not answer the question as it was specifically asked? I answered the question as I got it.

826. And did not you know very well at the time that the fact aimed at was the disguise, not of Quelch, but of the constable who was in his company at the time? I answered according to my opinion of the fact.

827. Did not you know at the time that you answered that question that it was intended to mean that the constable who accompanied Quelch was disguised? Now, did you not? I did not know what they intended. I answered the question as I got it.

828. Did not you make merry of this? I cannot enter into your brain and determine what you are thinking about? I answered it as I got it, and I answered it truthfully.

829. I am trying to penetrate [*Interrupted.*] You are trying to penetrate me for something I have not got.

830. Very well, if you have not got any brains I cannot help it.

831. *Mr. Bull.*] That is the way questions are answered in Parliament. I have been a witness several times, and I think I give as little information as I can. It is an art to answer questions.

832. *Mr. Abigail.*] It is a science, not an art. It is the science of deceit. I think when a man is made a member of Parliament he loses all sense of morality. (*To the witness.*) Don't you see these terms "there is no foundation for the statement made in the first question"? Yes.

833. Did not you know that this young man had been disguised? I wrote according to my convictions, and nothing more.

834. Although you knew that the member asking the question had evidently fallen into a mistake in the way in which he asked it? I did not know what Mr. Black had done or what he did not do. I never had any interview with Mr. Black on that question.

835. Now, this Mr. Cooper, Belleview Hotel, you will admit that he is a very reputable man? I do not remember anything against his reputation. I am not aware of anything against him.

836. And that there was no record against him at all prior to this conviction? Not that I am aware of.

837. Now, did not he come into your station and personally complain to you of the tactics used by Quelch and his subordinate, young Edwards, in entering into his hotel as they did this morning? He may have done so, but I cannot remember. It is surprising to me if he did that he did not write me a letter or something of that kind. They generally do, and then I call upon the constable for an explanation in writing.

838. Is it your duty to protect your officers only, and to forget your duty to the public? Certainly not, I am sworn to protect the public.

839. *Mr. Bull.*] I object to that.

840. *His Worship.*] That has nothing to do with it at all.

841. *Mr. Bull.*] Do you remember whether, on the occasions referred to, when the offences were committed by the licensees of the Belleview and Imperial Hotels, do you remember whether Quelch then was acting under certain instructions from you? He was.

842. Special instructions? Yes.

843. And that special duty had relation to the manner in which certain hotels were kept? Yes.

844. Was Edwards also with Quelch acting under the same instructions? I was told so; but I did not see him.

845. But if Quelch was doing duty under special instructions from you, and Edwards accompanied him, he would also be doing duty under special instructions? Certainly.

846. Might I ask you have you ever heard from anybody that Quelch on that occasion at the Belleview personally adopted a disguise and imposed upon the publican to supply him with liquor? Never, never heard any question of it.

Inspector
Lawless.

29 Oct., 1897.

847. You wait a moment. I will put the question to you. Was not this the very question that was asked in the House by Mr. Fegan, on Mr. Black's behalf, and answered by you [*Exhibit 6*]: "Is it a fact that Senior-constable Quelch has succeeded in having some publicans fined under the Licensing Act by disguising himself as a fish-hawker, and obtaining liquor some minutes before the prescribed opening hour?" Was not that the charge made against Quelch? I believe so; but I cannot remember, because it is so long since. I cannot remember the exact words. I made inquiries and reported on it.

848. Is not that it? [*Paper handed to witness.*] My friend read it; but he did not read it all? Yes, I think so.

849. In that very charge made by Mr. Black Quelch was charged himself with having adopted "the disguise of a fish-hawker," and that he himself had imposed upon the publican to get him to supply him (Quelch) with drink before the opening hour? Yes, it was something to that effect.

850. You had never heard of such a thing as that from anybody, not even from the publican? No.

851. Not even from the publican; it is very funny. Now, Mr. Lawless, have you read these charges upon which this inquiry is being held? Yes, I read them in a copy of *Hansard*, and his Worship gave me a copy to read.

852. You noticed that these charges made no such complaint as that Quelch himself imposed, or attempted to impose, on the publican, but that he employed some new hand in the police force to practise that deceit. Had you ever heard that even Edwards, the supernumerary, in adopting any disguise which he did adopt, did it for the purpose of imposing upon the publican, and did impose upon the publican to supply him (Edwards) with drink? No. Both the parties pleaded guilty when they were brought before the court.

853. But they pleaded guilty to supplying liquor to persons then in the house, not to a policeman in disguise? No. If they had supplied the policeman with liquor, I would not have summoned them.

854. *Mr. Abigail.*] You know better than that. I have been in the court when you yourself have done that.

855. *Mr. Bull.*] Do you remember any one case in the Redfern division since you have been there where any publican has been convicted for supplying any policeman? No.

856. *Mr. Abigail.*] The informers in the cases I am referring to have been the policemen in plain clothes? Never during my charge of the division.

857. *Mr. Bull.*] During the last seven or eight years—and my friend has not been in practice longer than that—do you know of your own knowledge of a conviction of a publican for supplying drink to a policeman under any circumstances? No. They have been convicted for sly grog selling.

858. I am speaking of publicans, licensed publicans? No.

859. Now these are the rules, are they not, of the New South Wales Police Force? Yes.

860. And you have already said, and I want it again, that a copy of these is supplied to every constable as soon as he is a policeman? Yes, and there is a strict injunction to read them.

861. Is there any rule from the first page to the last which says that some disguise is not to be adopted for the purpose of detecting a thief? No.

862. Or anybody who makes a breach of the law? I am not aware of it.

863. Do you recognise these four books? Are they not the Order Books? Yes.

864. I may tell you that they range from 1887 to 1897, the whole range of Quelch's reign of terror out there? Yes.

865. Can you say from any knowledge that you have of these books that they comprehend or comprise any order from any superior police officer of the same purport or import? Not that I am aware of.

866. Are there any other books which would give the information? I think not; I do not know of it.

867. *Mr. Abigail.*] I do not say they are in the book; I say they have been promulgated by minutes.

868. *Mr. Bull.*] If a general minute had been made by the Inspector-General of Police, or by a superintendent, would it not be contained in one of these four books during that period? I think so; yes. Of course I have private circulars.

869. That is another matter? I have private instructions, yes.

870. I am speaking of those instructions, minutes, or orders, which all the members of the Police Force have a right to ascertain? Yes.

871. Of course, I can quite understand that you have special private instructions? Of course they can be easily obtained.

872. Do you know of any order or regulation consonant with this second charge that, in contravention of the strict instructions of the Inspector-General, who orders "That no constable shall in any way try to trick a publican into supplying liquor within prohibited hours, &c., &c.?" I admit that there has been a minute, I do not know that there is an order, but I believe there is a minute. We cannot find it just now, it is a long time back, but it is in reference with something connected with the Haymarket that the Inspector-General decidedly set his face against any attempt at disguise, where a policeman dressed himself up as a female or as a Naval Brigadier, but not in ordinary clothes.

873. That was to obtain liquor by that trick? Yes.

874. You have been associated with the city forces for many years? Thirty-two years nearly.

875. Do you remember a conviction of a publican for supplying liquor to a police officer, or some person disguised in the garb of an old woman? No.

876. Do you remember the circumstance being referred to the then, Minister of Justice? I cannot say I remember it.

877. Now, the minute which you refer to, which you cannot find, has relation to this circumstance, has it not, that no police officer would be justified under any circumstances in assuming a disguise for the purpose of entrapping the publican into supplying liquor to himself? Certainly.

878. That is the minute. Do you know of any regulation or order which prevents this being done, a police officer in his rounds satisfies himself that a systematic trade is being carried on by a certain publican within prohibited hours, he makes a report of that circumstance to his superior officer. Do you know of anything in the nature of a Police regulation or order which would prevent that policeman from dressing in civilian clothes for the purpose of obtaining an opportunity of seeing and satisfying himself that an offence was being committed? I do not know of any.

879. You know of none? No.

880. *Mr. Abigail.*] I want to know in this very strong minute, by the Inspector-General, which you say has gone astray and you cannot find it—[*interrupted*—] I cannot say whether it is a very strong minute, 881.

Inspector
Lawless.
29 Oct., 1897.

881. Now you say that the Inspector-General certainly sets his face against policemen assuming disguises of any sort? Oh, no; you mentioned the word "trickery."
882. You said disguise? The term is so general.
883. I am not asking what you did mean; but what the Inspector-General did actually say? I cannot tell you the words; I cannot find out. I looked this morning.
884. You told Mr. Bull that the effect of the minute was that the Inspector-General set his face against any disguise being assumed by a policeman? Yes, for the purpose of getting drink.
885. For the purpose of getting convictions? Getting drink.
886. Was it not for the purpose of getting convictions against publicans? No. For the purpose of getting drink; you can construe it into that if you think proper.
887. Did not the Inspector-General in his minute set his face against the police assuming disguises or being guilty of any trick by means of which publicans were to be entrapped into becoming guilty of breaches of the Licensing Act? Any trick, certainly.
888. Or any disguise? It depends upon what would be considered disguise.
889. I only want to get at the fact. You are trying to justify the fact, and talk all round it. I only want to get at the nature of this minute? Well, I never heard any minute which prevented a constable putting on plain clothes.
890. I am not talking about plain clothes. I am only going into the question as to whether the minute was not against a constable assuming disguise or being guilty of any trick? Being guilty of any trick.
891. Or assuming any disguise? It all depends upon what you mean by disguise.
892. In the instance quoted by you; I am asking you what the minute was? I cannot tell you exactly, because I cannot get it.
893. Did not you say just now that the minute included the term "disguises"? No.
894. You did not say that here, in answer to Mr. Bull's question, two or three minutes ago, that the minute of the Inspector-General mentioned the word "disguised"? I do not think so.
895. *His Worship.*] I think he did mention the word "disguise."
896. *Mr. Bull.*] I question it; he did not say it? Of course the word "disguise" would be "trick," according to Mr. Abigail's version of it; but what I mean is that a constable would not be prohibited from putting on plain clothes. He would be prohibited from going as a female.
897. *Mr. Abigail.*] Or a fish-hawker, or a Salvation Army recruit? Or a Salvation Army recruit.
898. Or a clergyman, or a solicitor? There are all sorts of disguises.
899. *His Worship.*] You are losing sight of the point altogether.
900. *Mr. Abigail.*] I am going to show that the minute is to the effect that no constable has any right to assume any disguise or any trick to trap a licensee into committing any breach of the Act in any way.
901. *His Worship.* It is impossible that the Inspector-General could have said such a thing?
902. *Mr. Abigail.* I have got it from the witness. I am told by your Worship that it is impossible for him to have said it; how is your Worship to know?
903. *His Worship.*] Detectives do it every day.
904. *Mr. Abigail.*] Your Worship cannot take judicial cognizance of anything of the kind.
905. *His Worship.*] I am quite willing to admit that a man should not disguise himself to entrap a publican into committing a breach of the law for him.
906. *Mr. Abigail.*] I will reduce that to a *reductio ad absurdum*. Supposing a constable, disguised in plain clothes or disguised as a Salvation Army man, goes into a hotel, and there are half a dozen men there, none of them drinking, and he says, "Come on, chaps, and we will have a drink," and the licensee immediately serves the other six and does not serve him. Is not that a circumstance under which this minute would operate? [*Witness.*] In that case the constable would be committing a breach of the Regulations.
907. How many times does a constable do that? I never knew an instance of that yet. I should report it if he did.
908. *His Worship.*] That would be a trick.
909. *Mr. Bull.*] I have never heard a case yet where the publican said the constable called for a drink.
910. *Mr. Abigail.*] I will give you an instance. The licensee of the Tom Ugly's Point Hotel was charged with a breach of the Act, selling on Sunday; and the evidence was this: that a sergeant of police, who was a sub-inspector under the Act went into the hotel. He had been in the week before, with some friends, with whom he had been out fishing; and the Sunday following he went in with his basket and induced the publican to assume that he was out fishing, and the liquor was supplied to him. The publican was brought into the Court afterwards, and it was immediately shown that the man was caught by a trick; but he was convicted and fined.
911. *Mr. Bull.*] My friend is wrong. The house was Sandringham, and the officer was Senior-Serjeant Mackay.
912. *Mr. Abigail.*] Then, assuming that the locale is wrong, the facts are all right.
913. *Mr. Bull.*] The facts are not correct. He did not assume to be a fisherman. Mr. Mackay had been out on special police duty, and had observed something, and he assumed that if he went dressed in his ordinary clothes he would get served, and he did go in his ordinary clothes, and he did get served.
914. *Mr. Abigail.*] He was one of a party introduced by a bank manager the week before as his friend, and he went the week after.
915. *His Worship.*] It does not affect this question at all.
916. *Mr. Abigail (to the Witness).*] You say the minute only affects tricks and not disguises? Yes.
917. You say a disguise is not a trick? No.
918. Is not part of a trick? No.
919. There is no element of trickery in a disguise? No.
920. *His Worship.*] None whatever.
921. *Mr. Abigail.*] I know instances where your Worship has committed people for false pretences where the only false pretence has been dressing up as a drunk sergeant.
922. *His Worship.*] In order to commit a fraud; that is a different thing.
923. *Mr. Abigail.*] Is not this a fraud to get a licensee to commit a breach of the act.
924. *His Worship.*] There is no proof in this case that anything of the sort was done. The man went in ordinary clothes, and saw other people drinking. I admit that if he obtained a drink himself he would break the regulations.

925. *Mr. Abigail.*] But your Worship can read between the lines.

926. *Mr. Bull.*] Suppose Quelch had sent this man in before him in any disguise at all, and he, by anything that he had adopted, had attempted to impose upon the publican, and Quelch had given his consent. What would a police officer think under the circumstances? It would be the senior officer's duty to report him.

Inspector
Lawless.
29 Oct., 1897.

927. And if it was reported, what would be the result? He would be severely punished.

928. The policeman would. Would the publican be summoned at all? No; he could not have been. I have known instances of the kind where I have reported such matters to the Superintendent, and I have refused to summon.

929. *Mr. Abigail.*] Is there any minute to that effect? I have refused, of course, to summon. I would not do anything of the kind.

930. *Mr. Bull.*] You were asked by my friend earlier in this Commission whether you yourself had not been so absolutely inactive and inefficient, or wanting in zeal, as only, during the time that you have been at Redfern, to visit two of the hotels in the whole of that division?

931. *Mr. Abigail.*] Made two rounds, two general visits; what I mean by that is that he has visited on two occasions all the hotels in his division.

932. *Mr. Bull.*] The insinuation now is that only on two occasions did you deem it necessary as a matter of duty (or did you do it as a fact) to visit the hotels in your division on two separate occasions? I could not tell you.

933. You know the provisions of the Principal Act? Yes.

934. You know that you yourself are the District Inspector? Yes.

935. You have made quarterly reports? Yes, I got that from the senior-serjeants.

936. You yourself have to make a report? Yes; I report, and that is taken to the Chief Inspector, who reports to the Bench.

937. "The District Inspector in every Licensing District shall furnish to the Clerk of the Court, at least ten days before each Quarterly Sitting, a report of every licensed public-house in such district, &c., &c."? Yes.

938. *Mr. Bull.*] My friend attacks Mr. Lawless by saying that he is so wanting in zeal that he has only been round twice himself.

939. *Mr. Abigail.*] What I did say was this, that I was entitled incidentally to bring out any maladministration or any inefficiency if I could do so by putting questions to the witnesses.

Senior-sergeant Robert Bell was called and sworn:—

940. *His Worship.*] What is your name? Robert Bell.

941. And you are a senior-sergeant of police stationed at Redfern? Yes.

942. *Mr. Abigail.*] Your superior would be Inspector Lawless? Yes.

943. The police duties under the Licensing Act in the district of Redfern would be more immediately under your supervision than under Mr. Lawless, the detail work, would not it? The detail work, I think, would be more under me.

944. Would not you do the visiting in furnishing this quarterly report? Yes, as a rule I generally visit the hotels.

945. Now, this Mr. Cooper, of the "Bellevue Hotel," what character did he hold as a publican?

946. *Mr. Bull.*] That is not in question here.

947. *Mr. Abigail.*] I will show you directly what bearing it has. Your contention is that he was guilty of systematic trading. I want to show his character.

948. *His Worship.*] There is a record of his being fined.

949. *Mr. Abigail.*] Once.

950. *Mr. Bull.*] I will prove now a subsequent conviction.

951. *Mr. Abigail.*] Oh, I am asking now for his character previously.

952. *His Worship.*] It is entirely out of the scope of this commission.

953. *Mr. Abigail.*] Previously to this conviction of Cooper's on the information of Quelch, what was the character of Cooper as a publican? I know nothing against the man?

954. Did he not have a good character as a publican? So far as I knew.

955. Now, was Quelch on that morning of the 3rd of November, 1893, so far as you know, acting under your instructions or under the instructions of any other inspector or sub-inspector under the Licensing Act in entering this hotel kept by Cooper? He was not acting under my instructions.

956. Do you know whether he was acting under anybody else's instructions? I could not say.

957. We have got it he was not acting under Mr. Lawless's instructions.

958. *Mr. Bull.*] Mr. Lawless said he was.

959. *Mr. Abigail.*] He only said he thought he was. (*To the witness.*) Do you know of any rule against the assuming of disguises by constables, or the trapping of publicans into breaches of the act by tricks on the part of constables? No, I do not.

960. Do you not know that there is a very strong minute of the Inspector-General's in existence against the police assuming disguises and endeavouring to entrap publicans in that way? I am not aware of that.

961. You set your face against that practice, do you not, in your instructions to subordinates? Well, when I go out on Sunday I generally dress in the ordinary way of dressing on Sunday.

962. But you would not assume a disguise? No.

963. And you would not allow a subordinate to assume a disguise? No.

964. And you would not allow a subordinate acting under your instructions to be guilty of any trick in getting any publicans to commit a breach of the act? I would not allow him to do anything that I would not do myself.

965. The whole matter of the supervision of the public-houses in your division has been more on your shoulders than on Mr. Lawless', has it not? Well, as far as inspecting them and seeing that they were correct and clean.

966. Do you remember Cooper coming to the station after his conviction and making a complaint against Constable Quelch and young Edwards? Well, I am not sure. I heard that he had come to the station.

967. And did he not make a complaint? I only heard something.

968.

Senior-sergt.
Robert Bell.
29 Oct., 1897

- Senior-sergt. 968. About being entrapped by Quelch disguising Edwards as a fish-hawker? Well, I did not see him; I
Robert Bell. only heard so.
- 29 Oct., 1897. 969. *Mr. Abigail.*] I would like the Observation Book produced for that date with the entry of this case
against Cooper by Quelch.
970. *Mr. Bull.*] It is explained that there would be no observation against a case by summons. The object
of the Observation Book was that it should be brought before your Worships at the annual meeting in the
in the nature of an objection, and the constables would give evidence from their observations, but no
observation was made here, as a summons was issued.
971. *Mr. Abigail.*] I only want your Worship to see it when you are coming to a decision. I do not want
to see it.
972. *Mr. Bull.*] I suppose you look upon it that it would be a portion of your duty if you were instructed
by your superior officer to visit the different hotels so that he might make the necessary report on their
condition? Oh, yes; I always receive his instructions.
973. And you acted under those instructions? Oh, yes.
974. You have not been particularly active with regard to the prosecution of publicans in the Redfern
district for offences? No.
975. Might I suggest this: suppose you are on night duty to-night, would it be proper to suggest that you
would leave that duty about 3 o'clock to-morrow morning? Yes.
976. And you would not be on duty until when? Till the following night.
977. You would have to report yourself just the same as any other police officer? Yes, going off duty.
978. And then whoever came on in relief would take that particular duty that you had been taking up to
that hour? Yes.
979. So that you would know very little about the conduct of Cooper's house down near the fish-markets at
5 in the morning? No; I would be off duty then.
980. In fact you would be happily in bed, like all well-intentioned people? Yes.
981. Now, do you not know that Cooper was subsequently to this summoned and convicted for selling on
Good Friday? I believe he was.
982. He has left this house? Some time ago.
983. How long ago would you say? I dare say it would be close on a couple of years ago now since he left.
984. Do you know who keeps the house now? Yes, a man named Roderick.
985. I suppose you cannot tell us as a fact whether Roderick has been summoned for an offence during the
two years he has been there? I do not think so, although I have had occasion to go in there a couple of
times when there was some little disturbance.
986. That is only of course during opening hours, not during prohibited hours? No.
987. So that apparently a better state of things exists under the new regime than under the old? Yes.
He keeps a better house.

Constable George Cress Harrison was called and sworn:—

- Constable 988. *His Worship:* What is your name? Constable George Cress Harrison.
Harrison.
- 29 Oct., 1897. 989. *Mr. Abigail.*] You remember the manner in which a conviction was obtained by Senior-Constable
Quelch and Constable Edwards against the licensee of the "Bellevue Hotel? I remember the morning.
That is all.
990. Do you remember did you see Quelch and Edwards leave the station that morning to go down to the
hotel? No I did not see them leave the station.
991. Did you see them in the morning? Yes.
992. Where did you see them? In the station.
993. How was Edwards attired? He was dressed in old clothes; it appeared to be an old coat he had on;
I did not take any notice of his trousers, he had an old slouch hat, and I do not remember, certainly, whether
he had a handkerchief round his neck.
994. Was Quelch with him? He was in the station while I was there.
995. Was he dressing in the station? He fitted the things on him in the station when I saw him.
996. Who fitted him with them? Quelch helped him.
997. As a matter of fact Quelch was dressing him up? I do not say he was dressing him altogether, he
was assisting him.
998. *His Worship.*] It seems waste of time; I admit the fact that he went disguised in both of the cases.
999. *Mr. Abigail.*] Don't you see your Worship has already expressed an opinion as to what the value of
that is, and I want to get all the evidence down to see the value of your Worship's opinion afterwards.
1000. *His Worship.*] I admit that he was disguised, and that he saw liquor sold to other people, but did not
take any liquor himself.
1001. *Mr. Abigail.*] Did you have any conversation with Quelch about this case? No; the only conversa-
tion was that Senior-Constable Quelch made a remark to the effect that he was a fish hawker.
1002. The effect of it was, "Don't you think that he would make a good fish hawker." Yes.
1003. *His Worship.*] I will admit the fact that he went there disguised as a fish hawker.
1004. *Mr. Abigail.*] Because it is a matter of evidence now? [*Witness*] I could not remember the words;
I said he made a remark.
1005. Then they both left the station? I do not know where they went, nor what they were going to do.

Senior-constable William Edward Quelch was called and sworn:—

- Senior- 1006. *His Worship.*] What is your name? William Edward Quelch.
constable
- W. E. Quelch. 1007. *Mr. Abigail.*] You are a senior-constable, stationed at Redfern? Yes.
- 29 Oct., 1897. 1008. You will admit, will you not, that what Edwards and Harrison say about Edwards being dressed in
the disguise of a fish hawker is true? I will admit what Constable Edwards said, but I will not admit
what Constable Harrison said. 1009.

Senior-
constable
W. E. Quelch
29 Oct., 1897.

1009. Do you deny what Harrison said? I deny that I passed remarks that he would make a very good fish hawker.
1010. What did you say? I did not pass any such remark at all.
1011. You are perfectly friendly with Harrison, are you not? I do not know about that.
1012. Is he under your command? I have had to do my duty towards him.
1013. You quarrel with most of your subordinates? No.
1014. *Mr. Bull.*] I will promise my friend I will recall Harrison if he makes any insinuations against Quelch,
1015. *Mr. Abigail.*] Do you remember Mrs. Norah McInerney, licensee of the "Court-house Hotel"? I do.
1016. *Mr. Bull.*] I object to this. What has this to do with this charge?
1017. *Mr. Abigail.*] This is on his general conduct. His Worship cannot shut it out; he said that on Wednesday.
1018. *Mr. Bull.*] It is all very well for my friend to rant in this way. I want to save him all the trouble I can. I know he is not too well. We are dealing with two specific charges. As a fact, this matter that Quelch is now being asked about formed a portion of the complaints made by Mr. Dacey in the House, and included in Mr. Dacey's speech; but it forms no charge here in this investigation.
1019. *His Worship.*] I am compelled by my commission to take any evidence as to his general conduct.
1020. *Mr. Abigail (to the witness).*] Was a complaint made by Mr. Doyle, solicitor for Mrs. Norah McInerney, about your insulting language? It was, and answered by me to the Department.
1021. You were called upon for a report? Yes.
1022. Is that an extract from your report [*Exhibit No. 7.*] Did you say, "No doubt Mrs. McInerney wants the Senior-constable"—that is you—"to close his eyes on Sundays"? Yes.
1023. "Or to follow in the footsteps of some of my comrades, which will never happen so long as the Senior-constable is entrusted to do his duty in an honest, impartial, and straightforward manner"? Yes.
1024. Is this the Inspector-General's minute appended to your report: "Mr. Read will see within the tenor of my reply; but I cannot comprehend the object of this wandering, irrelevant report from Senior-constable Quelch. What does he mean by his charges against his colleagues"? Yes; there are two other minutes there.
1025. Wait a minute. I am going too fast. Your Worship, I want all the official papers put in dealing with that report of Mrs. McInerney's.
1026. *His Worship:* I have got them here. (*Exhibit No. 7.*)
1027. *Mr. Abigail.*] Now, in the case of this Belleview Hotel, did not you send in a report? Yes.
1028. And is this not your statement [*Exhibit No. 6.*] "On Friday, the 3rd of November last seeing a number of men walking in and out of the side door of the Belleview Hotel which was left open, the Senior-constable and Constable Edwards entered and found the men in the bar drinking liquor"? Yes.
1029. "The licensee behind the bar supplying the liquors"? Yes.
1030. "He was spoken to by the Senior-constable and admitted that he was fairly caught breaking the law"? Yes.
1031. "A summons was issued against the licensee for keeping his house open for the sale of liquor during prohibited hours at 5.27 a.m. on the 3/11/93, and he appeared before Whittingdale Johnson, Esq., S.M., on the 7/11/93 and pleaded guilty to the information and was fined £3 with costs 5s. 6d."? Yes.
1032. And you were also called upon to make a statement in connection with the Imperial Hotel? Yes.
1033. And in that report you also said that "The Senior-constable and Constable Edwards entered. The men were in the hotel. The licensee was supplying the liquors. He was spoken to by the Senior-constable, and he admitted that it was a fair catch"? Yes. "It was his own fault for leaving the door open."
1034. And did you not say also "Neither did he (the Senior-constable) disguise himself as a fish-hawker, but wore his uniform, and did his duty in each case in a straightforward manner"? Yes.
1035. But you never said a word in your report about you dressing up or instructing Edwards to dress up in the disguise of a fish hawker? Certainly not. I answered the questions as they were put to me.
1036. You only reported the facts which satisfied specifically the question? I answered what I was called upon to answer.
1037. Will you not admit to me that you saw your Inspector, Mr. Inspector Lawless, and that you both talked over the way in which you were to answer these Parliamentary questions? I tell you candidly I never had a word with Inspector Lawless about the question, and I tell you this, that ever since I have been in the station, till to-day I never consulted Inspector Lawless one iota as regards any answer I had to give as respects my duty.
1038. Now, did you not commonly talk in the station, in the hearing of other officers, was it not common talk and did not you make a lot of merriment out of it, that you simply answered the question the way it was put? I would not tell them anything in connection with my duty or anything I had to answer, not one there. I am just as clever as any one there.
1039. There is such a lot of brotherly feeling that each one of you has to be careful of the others? The person who does six months there has to be careful as to what goes on. My ambition is "Man, mind thyself, and let the others do the same."
1040. Now, if you would only mind yourself instead of other people you would not be here. I want to know this, is your evidence just now your official utterance of the disorganised state of the Police Force in Redfern? No; certainly not. I conduct my own duty, and work upon my own bottom, and I ask no assistance.
1041. Do you now notice the peculiar phraseology that you used in every one of your reports: "The Senior-constable did his duty in each case in a straightforward, honest manner"? Yes.
1042. And do you call dressing up a subordinate—a raw policeman who has just been pitchforked into the Force, and does not know anything about his duties—do you call dressing him up in a disguise, and making him act under your instructions in that disguise, doing the duty in a straightforward, honest manner? Yes. The same as Constable Edwards was attired I have been going about for the last eight years, all over the Metropolitan District—dressed as Constable Edwards was, not a dirty, greasy garb.
1043. Have you ever carried bags of sand in that disguise? I have worn the same attire as was in this present case of a morning for the last eight years, about four times a year.
1044. Were you supposed to be on duty? No.
1045. Where did you get the slouch hat? At my home.
1046. Did you bring it to the station that morning? No, I did not.

1047.

Senior-
constable
W. E. Quelch.
29 Oct., 1897.

1047. Where did Edwards get it from? On the public-house morning?
 1048. Yes? I went and fetched it that morning.
 1049. What time did you go on duty that morning? I was on duty that night.
 1050. Were you near the hotel that night? Half a dozen times—both of them.
 1051. Did you know it was going on then? I knew it was going on every morning.
 1052. Before you went out with Edwards that morning did you know? Most decidedly; we stood and watched.
 1053. I want to know, up to 3 o'clock had you been there half a dozen times? I dare say I had been within view of the hotel half a dozen times, perhaps more.
 1054. And up to that hour had you noticed any breach of the law? Not before 3 o'clock.
 1055. Don't you know that I am asking that question? No.
 1056. Did you not anticipate that I was going to ask you this: Why did not you, if you noticed in those half dozen visits to that hotel that there was a breach of the Act—why did not you complain to Sub-inspector Bell? They would be in bed then. This business used to start at 5 in the morning, when Mr. McMahon's men would be coming about, and the fish-hawkers would be coming about.
 1057. But on that morning you had seen no one between 5 and half-past, had you? Oh, yes, we had.
 1058. Why, you were down there at half-past 5? We were in view, and we waited until we saw so many go in and out.
 1059. What time did you and Edwards leave the station that morning? As near as I can guess, about a quarter past 5.
 1060. Then, from a quarter past 5 to twenty-five minutes to 6, it is fair to say you saw no one? Oh yes, we did, and we followed them in.
 1061. And, if you had not seen them drinking, Edwards would, under your instructions, have called for a drink? Not at all, decidedly. I always instruct a young man that goes with me on no account to ask the publican for a drink; because, if you do, you are asking the publican to break the law. I have had, this last eight years, I suppose, two or three hundred cases under the Licensing Act all over Sydney, and I never heard of a constable appealing to a publican for a drink. If a person went sly-grog catching he would, no doubt, ask for a drink.
 1062. You applied to be appointed an inspector under the Licensing Act? I did.
 1063. When? Some considerable time ago. I could not tell you the date.
 1064. Did you get the Rev. Mr. Boyce to assist you in it? I did not.
 1065. Do you know that he went? I do not know anything about it.
 1066. Did you have any knowledge, or did you ask, or did you know, or did you ask anybody else to influence the Rev. Mr. Boyce to support your application? Not at all.
 1067. So that the mere fact that he went down and supported your application is a mere coincidence so far as you are concerned? I suppose so. Mr. Boyce knows me, and he knows my ambitions in regard to that as well. I never told him that I had applied. I wrote out my application, and it was recommended by my Superintendent, Mr. Read, and I received a certain reply.
 1068. It was refused by the Inspector-General? No; it never went to the Inspector-General.
 1069. Why was it not granted if it was favourably received by the Superintendent? It was favourably received by the Superintendent, and I received a reply that at present there were no funds, and, therefore, it was unnecessary to forward it further, and if I wished he would forward it, and I said, "I will abide by your decision, Mr. Read."
 1070. You have never made an application since? No.
 1071. You have not made a great number of "pub-catching" cases since? I have had a great many cases since, and I have had promotion.
 1072. Promotion goes by the number of cases? No.
 1073. What was the date of your application? I could not give you the date.
 1074. I will ask for all papers in connection with your application, and the application itself, and we will see how much your statement about Mr. Boyce is to be believed.
 1075. *His Worship.*] I do not see that it has anything to do with the matter at all; it is a mere departmental matter.
 1076. *Mr. Abigail.*] So is this inquiry.

Mr. Richard Friend, licensee of the "Imperial Hotel," Redfern, was called and sworn:—

Mr. R.
Friend.
29 Oct., 1897.

1077. *Mr. Abigail.*] I may say that, except in three cases, I have not spoken to one of the witnesses that I am calling in.
 1078. *Mr. Bull.*] If you have not, Mr. Dacey has.
 1079. *His Worship.*] What is your name? Richard Friend.
 1080. What is your occupation? Hotelkeeper.
 1081. What hotel do you keep? The "Imperial Hotel," Redfern.
 1082. *Mr. Abigail.*] You were on the 23rd of November, 1893, convicted for selling early in the morning within prohibited hours? Yes.
 1083. At what time? At twenty minutes to 6 in the morning.
 1084. Senior-constable Quelch and Constable Edwards were the constables in the case, were they not? Yes.
 1085. How was Edwards dressed? Dressed as an ordinary artisan going to work.
 1086. By his dress were you induced to believe that he was an ordinary artisan? Yes, I thought so.
 1087. Now, how did they get into the hotel at that time in the morning, do you know? They must have opened the gate and come in the yard and planted there.
 1088. Was the gate shut that morning? The gate was closed to with a heavy spring.
 1089. It required some force to push it open? Yes; they would have to force it open.
 1090. Did you ever admit that it was a fair catch? I admitted I was guilty.
 1091. But did not admit that it was a fair catch? I did not know at the time that a police constable could adopt a disguise.
 1092. Did you admit at the time that it was a fair catch? It was a fair catch.
 1093. Did you say so? It was not necessary to say so.

1094.

Mr. R.
Friend.

29 Oct., 1897.

1094. You pleaded guilty? Yes, I pleaded guilty. The door stood here [*indicating*]. This here man in the plain clothes, with a slouch hat on, and what I supposed was half a brick in a handkerchief, was standing like this [*indicating*].
1095. Leaning up against the door? Two men had come in. I had served them with two whiskeys. And I turned to this other man; I said, "What is your drink?" He said, "Oh, I am a constable." I said, "Are you," and as soon as I did Constable Quelch jumped over the steps and came in, and he says, "Have you any objection to my taking those glasses?" I said, "Not the slightest."
1096. Did you let him in? No; I had no thought of letting him in.
1097. Neither he nor Edwards were there with your consent or knowledge? No, I had never seen either of them before.
1098. And Edwards was waiting there as if for a drink? Waiting for a drink; in fact, the drinks were standing there, and he never said a word one way or the other, and I said, "What's your drink?" He said, "I am a constable."
1099. Is it true that he had a basket? He had a bandanna handkerchief with half a brick, as I think now. I thought it was his lunch. He had an ordinary suit of clothes, like a labouring man or artisan going to work.
1100. *Mr. Bull.*] You say you admitted it was a fair catch? I pleaded guilty.
1101. There was no doubt in the world about it? I was guilty.
1102. You did not supply either of these two men by any subterfuge of Edwards? No.
1103. So that you were not tricked into supplying these two men by anything Edwards said? Certainly not.
1104. And you never supplied anything to Edwards? No.
1105. Edwards never asked for a drink? No, certainly not.
1106. Did Edwards ask you to supply these other two men with drink? No.
1107. Would you admit that you supplied these men before hours? Yes.
1108. And as an honest publican you pleaded guilty? Yes, and paid the penalty.
1109. Do you remember saying to Edwards something like this, "How did you get in?" and his answering "Oh, we pushed the gate open"? No, I never asked him the question.
1110. Do you remember saying this, "It was my own fault for leaving the gate open"? I never spoke to Edwards on the case from that day to this.
1111. How did the other two men get in? Through the gate.
1112. Then they were in the habit of coming? Yes.
1113. There is no other means of access if the door is shut except by that gate? They can get in by two or three ways.
1114. How? There are two back entrances, you would not actually call it two back entrances, but they lead from the back.
1115. Is not the recognised entrance to your place from Wells-street? From George-street.
1116. But when it is shut is not the principal entrance for these people in the morning by that side gate? No, certainly not; ask Constable Quelch.
1117. If they wanted to come in from George-street they would have to climb the balcony when the door was shut? If I left the door ajar with a spring on it they could come in.
1118. Who let these men in that morning? They let themselves in.
1119. Then it is fair to say that others were in that morning? Yes, I think so.
1120. Your home is a place of call for a great many of the police officers? A few constables.
1121. Let us give you a few of the names. Is Connor in the habit of calling at your house? Yes, he has—very seldom.
1122. Bruce? Yes.
1123. Willson? Charley Willson?
1124. Yes? Yes.
1125. *Mr. Abigail.*] He was prosecuted in a case by Senior-constable Quelch; what was it for?
1126. *Mr. Bull.*] He was charged with selling—a man was found leaving his premises with a bottle of brandy in his possession. The man did leave the house with a bottle of brandy in his possession, but we succeeded in proving that he had it in his possession when we came to the house.
1127. *Mr. Abigail.*] Although Constable Quelch swore that he obtained it at the house.
1128. *Mr. Bull.*] He could not swear that. (*To witness*): Those were the facts, were they not? Yes.
1129. We succeeded in proving that the man had the bottle of brandy actually in his possession before he went into the hotel at all? Yes, that is so.
1130. *His Worship.*] I suppose in that case the magistrate gave you the benefit of the doubt?
1131. *Mr. Bull.*] So that there may be no misconception about it, did not a storekeeper from one of the bonds come forward and swear that he supplied this bottle of brandy to this man. He was a carter, who had carted wood for him, one of McMahon's draymen, and they simply failed to prove that you had sold it because you did not sell it, and notwithstanding that the man was actually in your hotel and had that bottle of brandy in his possession when he came out? Yes.
1132. Quelch is not in the habit of attending your house? Yes, he attended my house, and watched me pretty closely.
1133. I mean as a customer? Oh, no.
1134. Mr. Quelch is not a customer of yours? No.
1135. How long is it since you were charged with any offence under the Licensing Act at the instance of Quelch? 1896.
1136. Is that the case I had for you? Yes.
1137. I suppose it is only fair to say that you have been convicted since on the evidence of some other police officer? No, only on Constable Quelch's.
1138. *Mr. Abigail.*] Not since 1896? No, in 1896.
1139. *Mr. Bull.*] Not since this case when you were convicted on the evidence of Quelch and Bell? Yes.
1140. The Senior-serjeant? Yes.
1141. That was the 7th of November, 1896? Yes.
1142. You were charged there with having your house open for the sale of liquor at twenty-five minutes past 5 in the morning? Yes, that is almost the same as this case.

1143.

- Mr. R. Friend.
29 Oct., 1897.
1143. Whitehair, do you know him? I suppose he occasionally, if not frequently, visits your house? Yes, now and then—very seldom.
1144. Christison? Yes.
1145. Brennan? Yes.
1146. Edwards? Yes.
1147. Harold? Yes.
1148. Jackson? Yes.
1149. Ridley? Well, I have not seen Ridley lately.
1150. Harrison? I have not seen him.
1151. *His Worship.*] Are these constables that lodge there?
1152. *Mr. Bull.*] Constables that visit his house as customers.
1153. *Mr. Abigail.*] When they are off duty.
1154. *Mr. Bull.*] I am not suggesting anything against them. I am sure nobody would accuse me of being unfair. I am not insinuating anything against my friend or these policemen. (*To the witness.*) I suppose it occasionally happens that these men when off duty call at your place and have a drink? Sometimes.
1155. Even when in uniform? Sometimes.
1156. Hill is the last name? I have not seen him in my hotel for the last two years.
1157. *Mr. Abigail.*] Does Quelch ever come to your hotel? No.
1158. Do you know his particular hotel? I am sure I do not know. I do not know anything about his business.
1159. *Mr. Bull.*] Mr. Abigail has just suggested that Mr. Quelch has some share in some other hotel in Redfern. Do you think so? No.
1160. *Mr. Abigail.*] Has he ever had a drink in your house? No.
1161. *Mr. Abigail.*] That will be all the evidence in respect of charges 2 and 3. Now we will go on to charges Nos. 4 and 5.

Charges Nos. 4 and 5.

The following charges were then read:—4. That, “some short time ago, a constable named Bruce was on duty at the Baptist Estate, near Moore Park, when he saw three men prowling about in a suspicious manner. He went over to see what they were at, and they ran away. He chased the men actually into the arms of Quelch. Quelch heard their yarn, which was that ‘they were dairymen, going to the Farmers’ and Dairymen’s Milk Supply Company to get milk for their customers’; but, strange to say, they said ‘they lived at Pymont.’ Quelch did not see the absurdity of that, but he took down these men’s names and let them go. A few minutes afterwards Bruce went back on their tracks and discovered a sack full of pigeons, which these men had evidently stolen.”

5. That, “shortly after this, there was a robbery at Botany Road, at a boot store kept by a man named Riddle. Constable Brennan saw three men in front of Riddle’s shop under rather suspicious circumstances, and he tried to get near them. When he got within 60 yards of them they ran away; he went after them, and eventually arrested them, with the assistance of Special-constable Brewin. They gave their names and addresses, and he took them up to the station where Quelch was. They gave different names and addresses to Quelch, and one of them gave the self-same name that one of the pigeon-stealers gave a few nights previously. Notwithstanding that, Quelch released these men. While these men were standing there, in the presence of Quelch, they had actually on their persons the stolen boots out of Riddle’s shop. The arresting constable appealed to Quelch to wait until he went back to see if a robbery had been committed; but he refused to do so because, as I think I will show, Quelch was in league with these men, whom he twice saved from the clutches of the law. These men were released, and afterwards the robbery was discovered. A couple of nights afterwards the same three men committed a burglary at Cohen’s jewellery shop, King-street, Newtown, or rather two of them did. Seeing their names recorded, I suppose in the books which the police have, Brennan went there and found two of the burglars who had been concerned in the robbery of Riddle’s boot store, but he had some difficulty in getting the third. If Quelch had arrested these men when they were caught in connection with stealing pigeons, Riddle’s boot store would not have been broken into, nor would Cohen’s jeweller’s shop.

Constable William Frederick Bruce was called and sworn:—

- Constable W. F. Bruce.
29 Oct., 1897.
1162. *Mr. Abigail.*] I am taking charges 4 and 5 because they are so dovetailed. The charge is that Quelch for some reason of his own let these men go.
1163. *His Worship.*] What is your name? William Frederick Bruce.
1164. What is your position? Constable, stationed at Redfern.
1165. *Mr. Abigail.*] You sent in a report, did you not? No.
1166. Do you remember one night in May last, you were on duty at Marriott-street, Redfern? Yes.
1167. What time at night was it? About a quarter or twenty minutes past 4 a.m.
1168. Did you notice three men in a lane off Marriott-street, Redfern? Two men.
1169. What is the name of the lane? St. Saviour’s lane, I believe.
1170. Were they acting suspiciously? I considered it so.
1171. They were watching you, were not they, blinking round the corner at you? Well, when they went to the corner of the lane, they looked back, and that made me suspicious.
1172. You went after them, did not you? Yes.
1173. And they ran away? They did get away.
1174. You doubled round another street? Yes.
1175. And into Young-street? Yes.
1176. And did you then see them walking in front of you? Yes.
1177. Did you also see Senior-constable Quelch in front? Yes.
1178. And, when you got up to them, Quelch was speaking to them, was he not? Yes.
1179. Did you hear the conversation? Part of it.
1180. What was it? Well, when I got up, the senior-constable asked me, “What is the matter, Bruce?” I said, “I do not know; that is what I want to know.” He said, “I saw these two men running towards me.”

me," and he then asked them questions—asked them where they were going, and they said they were sleeping in the Randwick Paddock. He then asked them what they were running for, and they said to keep themselves warm, and then, after another question, they said they were going to the markets.

Constable
W. F. Bruce.
29 Oct., 1897.

1181. What markets? The vegetable markets in Sydney here.

1182. They were then going in the direction of Moore Park? No, they were coming this way.

1183. The contrary direction to the markets? No, towards the markets at the time.

1184. Did not they say they were going to the Farmers' and Dairymen's Milk Supply Company? No, they did not. The senior-constable then took their names and addresses. The only one I can remember was one who gave his name as Wilkinson, and one gave his address as Bunn-street, Ultimo, next door to Senior-serjeant Roden's.

1185. What took place after that? When he took their names and addresses, he simply let them go.

1186. Did he not detain them? No.

1187. Did you ask him to detain them? No.

1188. Did you and Quelch proceed up the lane, and find something? Yes.

1189. What did you find? A bag, containing three or four pigeons. A hand-bag; there were three or four pigeons in it.

1190. Did you subsequently find out to whom they belonged? I did not; but I heard that a certain person claimed them afterwards.

1191. *His Worship.*] Were they alive or dead? Alive.

1192. *Mr. Abigail.*] They had evidently been stolen, and placed in the bag? I could not say that.

1193. At any rate, they were claimed afterwards by somebody else? Yes.

1194. Did that somebody else say that they had been placed by him in the bag? I could not say that.

1195. *Mr. Bull.*] I must object to that. He must say what he knows.

1196. *His Worship.*] He can only say what he knows.

1197. *Mr. Abigail.*] Did you, or did the senior-constable to your knowledge, make any inquiry as to the addresses given by these men? I could not say.

1198. Did you? No, I did not.

1199. Do you not know that in the vicinity of where you saw these men running, and at the same time, there was a robbery committed, and a complaint about this robbery forwarded to the station soon after? I did not hear of it until two or three days after.

1200. What robbery was it, do you remember? I could not tell you.

1201. You do not remember now what it was? The robbery of the pigeons.

1202. Anything else? A pair of boots and a coat, I believe.

1203. There was a robbery in a house near by? That is what I heard.

1204. Now, did they not tell Quelch that they were dairymen, going to the Farmers' and Dairymen's Milk Supply Company to get milk? No; not in my hearing.

1205. *Mr. Bull.*] I suppose you are in the habit of looking at the rough book which is kept at the station, in which officers make reports? Very seldom.

1206. Do you very seldom make reports? Is that it? There is a man who enters the reports. If I make a report the man enters it.

1207. You look on while it is being entered? I look on.

1208. And you see that a proper entry is made? Certainly, in my own reports.

1209. Naturally. Have you seen a report which was entered by Senior-constable Quelch of this very circumstance at half-past 4 that same morning? I have not.

1210. Did you never take the trouble to ask to be let see it? At half-past 4 that morning. Certainly I have seen the report since.

1211. "About 4.15 a.m. this date (17/5/97) as Constable Bruce was working Zamia-street he saw three young men standing [*Exhibit No. 8*]; seeing the constable coming they walked to St. Saviour's lane and then ran through the lane to Redfern-street where they were stopped by Senior-constable Quelch." Is that a truthful report? I could not say about running. He told me he saw them running.

1212. Is that a true report as to the locality and the circumstances? Yes.

1213. You say they disappeared into the lane? Yes, that is quite correct.

1214. "Where they were stopped by Senior-constable Quelch and questioned, having nothing in their possession, and stating that they were running to the markets to keep themselves warm"? That is perfectly correct.

1215. So far as you know, nothing in the world was said about the Farmers' and Dairymen's Milk Company? Certainly not.

1216. "Their names and addresses were taken; 1st, Frederick Page, 3, Bunn-street, Ultimo, next Senior-serjeant Roden, about 19 old, 5 ft. 6 in. hair black, fair complexion, very small black moustache; dressed in dirty light tweed trousers, no vest, white shirt, woollen singlet outside, dark sac coat, black soft hat." Would that be a fair description? I could not give you a fair description.

1217. Would that be a fair description? Pretty near it, I believe.

1218. The second man, "William Wilkinson, at R. Robinson's, 163 Albion-street, Pyrmont, about 19 old, 5 ft., fair complexion, clean-shaved; dressed in dirty brown mixture tweed sac suit and soft felt hat, wore sand shoes, a small bag was afterwards found in the lane where they run through, pigeons now at this station, an owner required"—would that be a truthful report? That is pretty near it, at any rate.

1219. "Wore sand shoes"? I drew the senior-constable's attention to the sand shoes.

1220. "A small bag was afterwards found in the lane containing four pigeons where they ran through"? Yes.

1221. Is this the bag [*producing one*]? It is similar to that.

1222. I think you will find in this book that after you went back four pigeons were found in a bag similar to this? Yes.

1223. You went, you say, with Quelch? Yes.

1224. You had an opportunity of seeing whether these men had any property on them? No, I had not.

1225. What do you mean by that? Because I was too far away.

1226. Did not you go over to where Quelch was? At the time, certainly. I thought you meant when I discovered them first.

1227.

- Constable W. F. Bruce.
29 Oct., 1897.
1227. When Quelch was interrogating them, you then had an opportunity of seeing whether they had any property on them? Yes.
1228. You did not see any such property as a new white shirt, new undershirts, a pair of boots, or a woman's nightdress, or some sheets? No, I did not.
1229. Do you think it possible from your observation that they could have had such property on them without your noticing it? I do not think they could.
1230. I suppose you do know that subsequently there was a report about a robbery at Mrs. Cussen's? Yes.
1231. Will you kindly tell us, as near as you can, how long after this was it that you first heard of the robbery at Mrs. Cussen's? About three or four days.
1232. Who was it who found these pigeons? The senior-constable; he was the first to pick them up.
1233. They were not picked up by you, and then you drew Quelch's attention to the fact that you had found them; nothing like that? No.
1234. Do you know as a fact that Quelch reported the finding of these very pigeons, and that in the Diary of Duty and Occurrences at the Redfern Police Station, under the heading of "Week ending 17th of May," there is this entry: "Found in a lane off Zamia-street, Redfern, about 4.15 a.m., 17th instant, by Senior-constable Quelch, and now at this station—an owner required—a bag containing four pigeons"? That is correct. [*Exhibit No. 9.*]
1235. Now, do you happen to know that in consequence of that information afforded by Quelch, and on intimation in the newspaper that such property was at the Redfern Station requiring an owner, on the 18th, the very next day, there is an entry in the Property Book kept at the station reading thus, "Date, 18/5/97. [*Exhibit No. 10.*] Description of property.—Four pigeons. Circumstances of case.—Found in a lane off Young-street, on 16th instant, by Senior-constable Quelch, stolen from J. Cussen, 42 Thirlow-street. How disposed of—given to owner. Signature—M. Cussen. Constable in charge of case—Senior-constable Quelch"? I did not know that.
1236. So that, plainly, in consequence of the things being found and reported at the station, and possibly in consequence of the newspaper intimation—you know the newspapers sometimes do state that such and such a thing has been found and is awaiting an owner at a certain police station—you know that this property was claimed afterwards by these people? I believe so, but of course I could not swear it.
1237. You knew it as a matter of police information? Yes.
1238. I suppose it was not a really hot morning that morning, was it? No.
1239. It was on the 17th May? Yes, it was very cool that morning.
1240. Do you not remember that it was? Yes.
1241. *Mr. Abigail.*] "Running to keep themselves warm"—would that satisfy any ordinary constable?
1242. *Mr. Bull.*] However, that is your statement that what they said was that they were on their way to the market; you did not see them run at all? No.
1243. And if Quelch desired, he could have kept that information to himself? Yes.
1244. You missed them in this lane, and only came round the corner in time to see Quelch speaking to them, so that the fact of whether they were running or walking, if they did so or not, was not known to you? No.
1245. Is this true: "Some short time ago a constable named Bruce was on duty at the Baptist Estate, near Moore Park, when he saw three men prowling about in a suspicious manner. He went over to see what they were at, and they ran away"—is that true? No.
1246. Did you see three men prowling about in a suspicious manner? No, I saw two.
1247. Did you go over to see what they were at, and did they run away? Certainly; I walked over towards them, and they went away.
1248. Did you go over to see what they were at, and did they run away? The men did not run away that I saw.
1249. Did you chase the men? I took a short cut.
1250. Just answer my question? Certainly I chased them.
1251. I thought the men went one way, and you took a short cut to intercept them? Yes.
1252. Did you run? Yes.
1253. Is this true: "Quelch heard their yarn, which was, that they were dairymen going to the Farmers and Dairymen's Milk Supply Company to get milk for their customers"—is that true? No, it is not true. I never heard it said.
1254. Is it true that "A few minutes afterwards Bruce went back on their tracks and discovered a sack full of pigeons"? Yes.
1255. What? Yes.
1256. Now, be careful? Yes.
1257. Now, kindly listen to my question—"A few minutes afterwards Bruce went back on their tracks and discovered a sack full of pigeons, which these men had evidently stolen"? Certainly not.
1258. That is not true? No.
1259. You had never seen pigeons or anything else in these men's possession? No; I had not.
1260. Would you tell me this: Was there anything, from first to last, in your observation of that morning, which would have entitled you to have charged these two men with having stolen these pigeons which were found in the lane? No; certainly not.
1261. Do you remember what took place after you and Quelch found the four pigeons in the bag? Do you remember his giving you some instruction or doing something? He told me to follow them up and see if I could overtake them.
1262. What did he do? He naturally took the pigeons and came after me.
1263. He did not go with you? No; he came after me.
1264. In other words, he went a different way? I could not say.
1265. You do not suggest that he sent you on in front to bear the whole brunt of it? He may have come the same way.
1266. You cannot say? No.
1267. Did he not send you along Wells-street? Yes.
1268. Do not you know as a fact that Quelch went along Cleveland-street? No; I do not.
1269. Do you remember that, after he gave you that instruction, he picked you up again with Cubitt? Yes.
1270. Later on? Yes.

1271. Where was that? In Regent-street.
1272. That would be, I suppose, nearer Cleveland-street? Yes; pretty near. About 300 yards away, at the corner of Regent-street and Redfern-street.
1273. *Mr. Abigail.*] So that, although there was nothing to justify you or Senior-constable Quelch in the arrest of these men, Quelch subsequently sent you along Redfern-street and he himself went along Cleveland-street to try to find the men after the pigeons had been found? Yes.
1274. And it is true, is it not, that these two men, and not three, you saw prowling about in a suspicious manner at this corner, and that you followed them? Yes.
1275. It is also true that you did chase these men and came up when Quelch had them practically in custody? Yes.
1276. And it is true, also, is it not, that whatever these men said to Quelch before you came up was utterly impossible for you to hear? Yes.
1277. And for all you know they might have said to Quelch that they were dairymen going to the Farmers' and Dairymen's Milk Supply Company to get milk for their customers? Certainly.
1278. And it is true, is it not, that you did find a bag full of pigeons? No, I did not.
1279. With three or four pigeons in? The senior-constable found it.
1280. You were there? Yes.
1281. But he actually picked them up? Yes.
1282. But you were both there? Yes.
1283. And there is no doubt in your mind, and no doubt in Quelch's, from what he told you at the time, that these men must have been the robbers? I could not say.
1284. Did not you suspect the men at the time? I had suspicions of them at the time, certainly, but I could not say they stole the pigeons.
1285. But from what Senior-constable Quelch told you you knew that he had a similar suspicion? I could not say.
1286. Well, did not he tell you to go one way to find the men, and did not he go another? Certainly.
1287. Is not that sufficient to show you that he had a suspicion?
1288. *Mr. Bull.*] That is a matter for Mr. Johnson.

Constable
W. F. Bruce.
29 Oct., 1897.

[The Commission adjourned from 1.25 to 2.30 p.m. for luncheon.]

On resuming after lunch,

Constable Patrick McEvoy Brennan was called and sworn:—

1289. *His Worship.*] What is your name? Patrick McEvoy Brennan.
1290. What is your position in the Force? Constable, stationed at Redfern.
1291. *Mr. Abigail.*] On the 26th May last did you, about 5.30 a.m., when on duty in Waterloo, see three men standing under the verandah of Mr. Riddle's shop? Yes.
1292. A noise first attracted your attention? Yes, a kind of grating sound.
1293. And you had some suspicion of these men, had you not? Yes, I thought there was something wrong when I heard the noise.
1294. And you went along to the shop? Yes.
1295. Did you see the men? Yes, I saw the three men.
1296. Did they see you? One of them did.
1297. What was done then? The man who saw me cried out "Nit."
1298. That is thieves' slang? It is larrikins' slang for "clear," and that the police are coming.
1299. What was done when this man called out "Nit"? The three of them ran across Botany Road towards Chapple-lane.
1300. Did you follow them? Yes.
1301. And from there where did they go? Into Spence's-lane; it is a lane off Chapple-lane.
1302. Were you in full chase? Yes. They ran pretty hard.
1303. You had to run pretty hard? Yes. I had to drop my cape. I dropped it on the Botany Road, in order to catch them.
1304. And when you got up to within a few yards they turned round? Yes, and faced me.
1305. And you, fearing an outbreak, drew your revolver? Yes.
1306. And covered them? Yes.
1307. What did you say to them? "What's your game?" And one of them, Conlon, said, "I came up here to ease myself."
1308. He must have been very bad when he ran so quickly? I said, "It is a very curious thing you have not even got a button undone." I marched them down before me on to the Botany Road at the point of the revolver, and I was joined by Special-constable Brewin.
1309. Who assisted you to take the men to the lock-up? Yes.
1310. Did he draw his revolver too? Yes.
1311. And you took them up to the station? Yes.
1312. When you arrived at the station whom did you meet? The morning relief men who were going to relieve us at the time, and I kept them in the yard until the relief men had gone out.
1313. Who was in charge of the station? Constable Kidd was in the station at the time when I brought the men in.
1314. Who was in charge? Senior-constable Quelch came in with the night-duty men.
1315. Then he would be in charge? Yes.
1316. Did you say anything to him about this capture? Yes.
1317. What did you say to him? I told him what I had seen on the Botany Road and what I had done. I said, "I saw these three men down under the verandah of Botany Road."
1318. *Mr. Bull.*] Do you say you said this to Quelch? Yes.
1319. *Mr. Abigail.*] Yes? I told him they ran across the Botany Road, and I ran after them, and that I drew my revolver and brought them down to Botany Road, and, assisted by Special-constable Brewin, brought them to the station.
1320. What then? He took their names and addresses.
1321. *Mr. Bull.*] Do you mean Quelch? Yes.

Constable
Brennan.
29 Oct., 1897.

- Constable
Brennan.
29 Oct., 1897.
1322. *Mr. Abigail.*] Was that the first time you had got their addresses from them? No, sir. When we were coming up the Botany Road, they gave us their names and addresses, and they gave us entirely different addresses.
1323. Tell us what they were? I could not think of them now; but I mentioned them when I came to the station.
1324. To whom? To Quelch.
1325. And did Quelch ask their names and addresses? Yes.
1326. And you say they gave different names and addresses—different to those which they had given to you? Yes.
1327. Did you remark the difference to the senior-constable? I told the senior-constable they had given me different addresses down the Botany Road.
1328. Now, tell us from that point what was said and done?
1329. *Mr. Bull.*] What is that you have got there? This is a copy of my report to the superintendent immediately afterwards.
1330. You need not look at that now.
1331. *Mr. Abigail.*] If you need to refresh your memory, tell us? I should like to because it is such a long time ago.
1332. *Mr. Bull.*] You say this is a copy of the report sent in by you and nothing else? Yes, and nothing else. The report I sent to the superintendent has been copied from that.
1333. What date are you speaking about—when do you say these men were brought to the station? The 26th.
1334. If he can speak without referring to that, I will prefer it, your Worship.
1335. *Mr. Abigail.*] If you want to refresh your memory, his Worship will tell you you may.
1336. *Mr. Bull.*] I object to his looking at this. He says it is a copy he has made from something else. It is not a memorandum he made at the time. As my friend has the report, let him put the report in his hand? It is the original.
1337. How can it be?
1338. *Mr. Abigail.*] It is the original report from which he copied the Official Report. (*To witness.*) You made a report? Yes.
1339. I will put the report in, please, your Worship [*Exhibit No. 8*]. There is a report by Brennan, which is answered by Kidd, Quelch, and Guthrie.
1340. *His Worship.*] I read it at the time. The investigation was as to what was given to Quelch at the time—whether they stated to him what they subsequently stated.
1341. *Mr. Abigail.*] You made a report on the 27th May, 1897? I would not be sure. It was a few days after the occurrence.
1342. I will put in these reports [*Exhibit No. 8*] together with the reports of the other constables, and the reply of Senior-constable Quelch to it, and the minute on it. (*To witness.*) Now, tell me what was done? I told Senior-constable Quelch that the men had given different names to those they had already given me on the Botany Road. I told him that somebody should be sent down the Botany Road to see what the men had done. I told him that a telephone message should be sent to see if the men had given correct addresses.
1343. A telephone message to the nearest Police Station to these addresses? Yes; that is what I said.
1344. *Mr. Bull.*] Tell us what you said? I said a telephone message should be sent to see if the men had given correct addresses. He did not take any notice of what I had said, but he told the men they could go now, and he said to me, "You will know what to do if you see them again."
1345. *Mr. Abigail.*] Did he discharge them? Yes; he discharged them then, he told them to go.
1346. I believe you did object so far as a subordinate officer could? Yes.
1347. *Mr. Bull.*] I object to my friend putting the answers into this man's mouth to give. "You did as a matter of fact object," and all he has to do is to say "Yes"
1348. *Mr. Abigail.*] Were you or Special constable Brewin, or anybody else, detailed for duty at the place located by you? No.
1349. Did you, as a matter of fact, afterwards go down to this shop? Yes; when word came to my house that the place had been broken into I went down afterwards.
1350. At 7 a.m.? Yes.
1351. And was there a quantity of goods stolen? Yes, there was.
1352. In your report did you also mention the case of Constable Bruce, in which he had chased some men? Yes; that happened a few mornings before the occurrence on the Botany Road.
1353. Although you were not the constable who had anything to do with it, did you think it part of your duty to mention that matter in your report to your superior officer? Yes.
1354. And did you hear the description of the men whom Bruce had had in custody, and, comparing those descriptions with the descriptions of the men you had in custody, did you connect the men in the one case with those in the other? Yes, because one man gave the address as Bunn-street in each case.
1355. I see also in your report you say [*Exhibit No. 8*]: "One of the three men answers the description of a man who, at 6 a.m. on the 25th instant, was seen by Senior-constable Quelch on the roof of a shop in Redfern-street, and who, on being disturbed by the senior-constable mounting a verandah after him, made off; after which a window, belonging to John Hunter's boot-shop, was found broken open"? Yes, it was a matter of gossip at the time among all the men at the Station.
1356. And did you also conclude your report in this way: "The constable feels it most unjust to him that, through the action of Senior-constable Quelch, the ends of justice have been defeated." Did you say that? Yes.
1357. And did you say: "He also reports the matter out of self-protection, as the whole of these circumstances are now public property in the District, through the Special Constable"? Yes; I reported it because I thought I would be reported for laxity of duty.
1358. Did you, on the 29th May, make out a further report? Yes; in answer to Senior-constable Quelch's report.
1359. And did you, in that, state that two out of three men discharged by Senior-constable Quelch on the morning of the 26th May were, at the time of your report, in Darlinghurst Gaol, on remand, charged with burglary? Yes.

Constable
Brennan.

29 Oct., 1897.

1360. Burglary at a pawnbroker's shop at Newtown? Yes.
1361. And that you had been to the gaol to see them, and had identified them? Yes, sir.
1362. And do you know that, as a matter of fact, these men were subsequently committed for trial? Yes.
1363. Do you know, as a matter of fact, that they were subsequently convicted? Yes.
1364. While these men were in the police-station, did not one of them turn round to Constable Willson in the station and say, "You know me Constable Willson"? Yes.
1365. "You know I live" at some address given by him? Yes, he said he lived in Waterloo.
1366. And what did Willson say? He said, "Yes, I know you."
1367. But he had not seen him for some time? Yes.
1368. And did not know where he lived now? Yes. That man gives his address as 111 or 113 Cooper-street, Waterloo.
1369. Do you know any of these addresses? Yes.
1370. Did you go there? Yes.
1371. Did you find he lived there? No.
1372. How long would it have taken you to go to this address in Waterloo to see whether this man lived there? To go there and come back would have taken about twenty-five minutes as far as I can judge.
1373. Were you present when the reports of the other constables were made out? The constables were in the station about 3 o'clock, in the magistrate's room, making out their reports, I would not be sure which morning.
1374. Did you hear any conversation about the addresses? I cannot remember that.
1375. Do you know that, after your report, and after Quelch's reply to it, he made a complaint against you for making a report against him? Yes; he did.
1376. Did he not make a complaint against you, stating that you had falsely and maliciously reported him, or words to that effect? He said that I had tried to injure his reputation, or words to that effect.
1377. Were you ever asked to answer that report? No. Mr. Lawless told me the report was withdrawn.
1378. The complaint against you was withdrawn? Yes.
1379. Were you under the control of the senior-constable? Yes; the morning that I brought those men in.
1380. As a matter of fact, one of the policemen making a report in respect of Constable Quelch's reply to yours, was brought in off duty at 3 a.m. for that purpose? Two of them were?
1381. Who were they? Constables Willson and Guthrie.
1382. Who brought them in? Constable Guthrie told me that Constable Quelch brought him in.
1383. *Mr. Bull.*] So you get in a lot of this sort of rubbish, which you call evidence.
1384. *Mr. Abigail.*] Your client drags in these men to report for him.
1385. *Mr. Bull.*] You will find that these men were brought in at the instance of the inspector, and this man knows it? I do not know it.
1386. How long have you been in the Force? Three years and three or four months, and I served in the police in the old country.
1387. For how many years? For about fifteen months.
1388. How old are you? I will be 24 on the 22nd of November next.
1389. You have been in the Force here, how long? Three years and three or four months.
1390. So you were in the Irish Constabulary before you were a man? Yes, about fifteen months in it.
1391. Did you actually wear the uniform? In a place called Clanark. I got a discharge from the County Inspector saying that my conduct was very good.
1392. Just answer questions and nothing else. I take it that any part you took in this matter, from beginning to end, has been purely in the interests of Police discipline? Yes.
1393. You are such a disciplinarian that all you have done here has been purely in the interests of discipline I have done it to protect myself.
1394. I suppose Mr. Dacey interviewed you, did he not? I spoke to him once.
1395. Now, tell me, when were you seen by Mr. Dacey? It would be more than a week ago. I could not exactly say.
1396. I suppose you will admit this, that when a Police Officer gives evidence in a case against a man he should realise that he should tell the whole truth about the matter? Yes. I understand that.
1397. You have been long enough in the Police Force to realise that? I think so.
1398. I suppose you will admit, too, that it would be a very strong point, and a very strong suspicion against a man when you were charging him, if you could give evidence that he had altered his name and given different names? I should think it would be.
1399. When you were prosecuting these two men did you give evidence? No. I did not say that, I mentioned it in my report.
1400. Never mind about your report. The fact is, you actually prosecuted these two men? Yes.
1401. Murray and Conlon? Yes.
1402. You actually gave evidence against them on the very charge which you took them to the lock-up about? Yes.
1403. And I take it, Mr. Brennan, with your singularly long experience, and your great idea of discipline, that you would have said something against these men about their giving different names and addresses? I might have missed something.
1404. You make oversights, do you? Not often.
1405. You do not forget much, do you? No.
1406. Did you not actually charge these two men, Murray and Conlon, with burglariously entering Riddle's shop? Yes.
1407. *Mr. Abigail.*] You did not prosecute; you gave evidence as a witness? Yes.
1408. You were there to answer questions?
1409. *Mr. Bull.*] It will be just as well if my friend does not interfere at this stage. Do not mislead the witness. (*To witness.*) You did not prosecute these men until after they had been committed at Newtown. You have just given an answer; I want really to find out whether you are serious about it? I did not prosecute them, sir. It was Senior-constable Wilson prosecuted them on the first occasion; I gave evidence.
1410. Were not you the man who actually charged them, and did you not swear you did? Yes.
1411. *Mr. Abigail.*] He did not conduct the prosecution.
1412. *Mr. Bull.*] He did.

- Constable
Brennan.
29 Oct., 1897.
1413. *Mr. Abigail.*] He could not if the senior-constable were present.
1414. *Mr. Bull.*] Did not you charge those men on the 1st June? Yes; I think that is the date.
1415. Where was that? At Redfern. When I heard they were at Newtown I went there for them, and brought them to Redfern.
1416. Now, is this the evidence you gave there? Listen to it, and do not be ridiculous by saying that other people make charges [*Exhibit No. 11*]: "I am a constable of police, stationed at Redfern, Patrick McEvoy Brennan. About 3 p.m. yesterday I charged both accused, while in custody on another charge, with, in company, breaking and entering the house of one Riddle"? Yes.
1417. You were the actual person charging them? Yes.
1418. Now did you, in this deposition of three pages and a half, say one word to the magistrate about these men having given different names and addresses? I would not be positive.
1419. What a funny memory you have, now? I could not be sure; it is some time ago.
1420. Do not you know you did not? I do not know that I did not.
1421. I will read the deposition right through, and then answer me. [*Exhibit No. 11.*] [*Read Constable Brennan's deposition.*]
1422. *Mr. Abigail.*] He did give the addresses; he has given them there.
1423. *Mr. Bull.*] I am talking about these men having given different names. Do not people throw off the scent in that way? (*To witness.*) Now, that is your deposition. Did you, from first to last, swear that these men had given different names to you from what they had given at the station? No, I did not.
1424. Did you forget it? I might have forgotten, but I did not give the names in the witness-box.
1425. Will you swear they did give different names? Yes.
1426. Tell us the names? I cannot tell you now.
1427. The men were discharged in this remarkable prosecution of yours; I see the case came before his Worship, Mr. Delohery, who is a careful man; they were discharged, were they not? Yes.
1428. *Mr. Abigail.*] Why? Because there was no property found on them.
1429. *Mr. Bull.*] I suppose that would be one of the reasons, but I suppose the best reason would be that there was no evidence against them.
1430. Now, you gave evidence on the 10th June against the same two men? Yes.
1431. And they were charged by Constable McAtamney? He was the constable who arrested them in Newtown.
1432. He was the officer who had charge of the case? At Redfern.
1433. And you went into the witness-box and gave evidence? Yes.
1434. Did you say a word, then, in this second case, against these two men, after you had identified them at Darlinghurst, as the same two men as you had had in your custody, that they had given different names at different times? I would not be sure.
1435. Would you like to swear you did? I would not like to swear.
1436. Do you want me to read the whole of this deposition through to satisfy you that you did not? [*Deposition read.*] Tell me this: I suppose you will admit that it would be necessary in charging these men to narrate or relate any suspicious circumstances. In giving your evidence against the two, over this either attempted or suspected burglary at Riddle's, would it not be natural and proper for you to give evidence of any suspicious circumstances? So I did. I said they ran away.
1437. Tell me this: If you had heard noises as if these men were trying to break into the place—interfering with doors or windows—making noises which would indicate to you or a passer-by that there was something wrong, would you not think of it to give evidence of it? I might not give evidence of it.
1438. You were sworn to tell the truth, the whole truth, and nothing but the truth? Yes.
1439. Did you give an atom of evidence against these two men of hearing some grating sound as if the place was being interfered with or somebody was trying to break in? I could not say that I did.
1440. Did you hear a grating sound? I did.
1441. Did you report that at the station? I told Senior-constable Quelch that, and I believe, as far as I can remember now, that I said it in the court to the magistrate in the second case.
1442. Of course I am going to show that you said that in the second case and something else. [*To His Worship.*] If the fact was that this man had given evidence against two men before you, and had abstained from giving evidence of certain circumstances which were suspicious, and if he came before you again against the same men and added circumstances, I think you would have a peculiar opinion about him.
1443. *His Worship.*] It does appear to me strange that such a very important piece of evidence was omitted in the prosecution.
1444. *Mr. Bull.*] Then, of course, that goes against the credibility of this man? I said it on the second occasion.
1445. *Mr. Abigail.*] Every witness who comes here to give evidence against Senior-constable Quelch must expect to be treated as a liar and a perjurer. Quelch is like Caesar's wife—above suspicion.
1446. *Mr. Bull.*] My friend has called Quelch a liar over and over again, and even when the music struck up outside he could not let it pass, but said: "I wonder they don't strike up the 'Rogue's March,' or the 'Dead March in Saul.'"
1447. *Mr. Abigail.*] I said it was very cheerful; but it might have been less inspiring had they been playing the "Rogue's March," or the "Dead March in Saul." My friend immediately assumed that I was hitting at his client.
1448. *Mr. Bull.*] You were present, were you not, at the lock-up when this report was made of what you did see? Yes.
1449. Whom to? On what occasion?
1450. On the occasion when you made the first report of what you had seen in the street? I made a report to the Superintendent.
1451. Afterwards, when you were asked to make a report? I gave a voluntary report to the Superintendent—I was not asked about it.
1452. You know it is the duty of every officer to report matters which he sees, or which come under his observation, while he is out on his duty? Yes.
1453. You saw the report in the book? Which report?
1454. The report made with regard to the arrest of these two men, and the charge against them? I did not see it until I made my report to the Superintendent.
- 1455.

Constable
Brennan.
29 Oct., 1897.

1455. Have you seen it at all? I do not think I have seen it.
1456. But, whether you did or not, you did give evidence against these two men on the second occasion, the 10th June? Yes.
1457. Here is a piece of evidence which you gave in the second case which you absolutely forget in the first. Do you remember swearing this. [*Exhibit No. 12.*] "At first I heard a grating sound"? Yes.
1458. "It came from the direction of where they were standing"? Yes; that is right.
1459. Now, I suppose you will admit that you never thought of making such a statement on your oath in the first case? As an oversight.
1460. An oversight? Yes.
1461. The men were charged with an attempted burglary, and you tell his Worship here that it was an oversight not to mention that you had heard a-grating sound from where the men were standing? Well, I suppose when I got in the box I forgot it.
1462. I suppose it does not matter very much; but let me remind you that in one case you swore that one man whom you spoke to said he ran up the lane to ease himself, and in the second case you said they both said so? They all ran up the lane. I spoke about the man that actually told me; the man that said he wanted to go up.
1463. But in the second case you said, speaking of the men, "They said, 'We came up here to ease ourselves' "? No, I do not think I did.
1464. Now listen. "I passed the shop window." Not only did you forget to mention this circumstance, which you swear you forgot, but in your deposition you take upon yourself to swear this. [*Exhibit No. 12.*] "I passed the shop window at fifteen past 4 a.m. The window was then intact." Did you? That is the trip before I got these men. We work the beat in an hour and a half.
1465. "I told the senior-constable that I heard a grating noise." Do you swear that you told Quelch that you heard a grating noise? Yes.
1466. When did you tell him that? I told him at the station when I brought the men in.
1467. You swear that? Yes.
1468. Do you know the constable who made the entry in the Occurrence Book at the station? Yes.
1469. Who was that? Constable Kidd, I believe it was.
1470. You believe it was? Yes.
1471. Do not you know it was? I think so. Constable Kidd was there that morning.
1472. Do not you know that Constables Kidd, Guthrie, and Wilson all made reports of the circumstances appertaining to that? Yes.
1473. Contradicting you? Well, they said something.
1474. They did not agree with you? No, they did not. I made mention of that in my report to the Superintendent.
1475. Now, here is an entry written in Constable Kidd's handwriting, "James Conlon, Cooper-street, Waterloo. William Murray, Mrs. Bayley's Restaurant, Liverpool-street, city"? He gave his address as Pymont first.
1476. [*Exhibit No. 14.*] "Henry Wilson, 9 Bunn-street, Ultimo. Brought to station by Constable Brennan at 6 a.m., 26th, who found them in Chapple-lane, Alexandria, where they had run from Botany Road. They explained, one of them had been taken short and run into the lane to ease himself. Allowed to go by Senior-constable Quelch"? I never saw that before.
1477. Do you know that this was not written until you had given all the information that you could in the presence of the four or five officers who were there? I suppose the constable wrote it.
1478. Do you swear that—at that time, in that place, to Quelch, in the presence of any of these three—you mentioned anything about these noises? Yes, I swear that.
1479. Or that you brought the men down at the point of the revolver? Yes, I did.
1480. You swear that too? Yes, I do.
1481. I suppose you know well, to begin with, that Constable Kidd has been very much longer in the Police Force than you? I think so.
1482. Is not he a first-class constable? It would not be necessarily because he was in the Force longer than me.
1483. But Kidd, you know, is a first-class constable? Yes.
1484. Willson, is he a first-class constable? No.
1485. How long has he been in the Force? Ten or eleven years; something like that.
1486. And Guthrie, is he a first-class? He is an ordinary constable. I think he has been about eighteen months.
1487. They were all present? Yes.
1488. Do you know that the Superintendent, when he was speaking about that matter being withdrawn, recommended Quelch to let the matter drop—that complaint against you of either insolence or want of discipline? If I can remember, I think he said that it would be just as well if the senior-constable withdrew his report.
1489. Have you ever seen this report of Mr. Lawless', dated 4th June [*Exhibit No. 8.*]; "The minutes of the Superintendent have been read and explained to Senior-constable Quelch and Constable Brennan. The senior-constable now states that he wishes to withdraw his report against Constable Brennan, who appeared to be satisfied with the decision of the Superintendent"? No, I never saw that.
1490. Be careful, now; you look at that [*handing papers to witness*], and then I will ask you whether that actual document was not read to you by Mr. Lawless, in Quelch's presence? No, sir.
1491. You swear it was not? I do.
1492. Do you remember Mr. Read, the Superintendent's report? Yes, I do.
1493. Do you remember Mr. Read's report being read to both you and Quelch? No, it was not read to me or Senior-constable Quelch; there was no report read to me.
1494. Do you say that the senior-constable's report was not read to you? It was read to me, but not by Senior-constable Quelch.
1495. By Mr. Lawless? Yes; and I read it myself, too.
1496. Is this the report that you heard read. [*Exhibit No. 8.*] "The statement of the constable with regard to the suspicious conduct of the three men referred to may be substantially correct, but the evidence

is

Constable
Brennan.
29 Oct., 1897.

is overwhelming that he only communicated a very unimportant portion of the particulars to the senior-constable, whose statement is supported by those of Constables Kidd, Willson, and Guthrie; whose reports agree with the entry in the rough book." Did you hear that read? Yes.

1497. "The constable, according to the statement of Mr. Lawless, is of an excitable temperament"? Yes.

1498. That is you? Yes.

1499. "And possibly imagined he had made a fuller report to this officer than he did, and there is the further fact that he had just previously been engaged with what to most men would be an exciting event." What was that? I suppose the burglary. But I am not of an excitable temperament as a rule. The people in Redfern know that.

1500. The Superintendent knows better. "The discrepancy in his evidence at the court and his written statement is unsatisfactory." Now, he is speaking of you "and I am warranted in assuming that his deposition is the more reliable version of the matter. I trust, therefore, he will be more guarded in future. I think the circumstances scarcely warrant the belief that he had any deliberate purpose to injure his superior officer. I trust, therefore, Senior-constable Quelch will withdraw his complaint"? Yes, I heard that read. [*Exhibit No. 8.*]

1501. Do you know that minute is dated 4th June, and was sent to Mr. Lawless on the 4th June, and do you swear now, having heard that read, that you did not hear this read to you by Mr. Lawless? Yes, Mr. Lawless read it to me, but Senior-constable Quelch was not there.

1502. But you swore it was not read to you at all? Yes. I swear it was read to me, but not in the presence of Senior-Constable Quelch.

1503. Did you not swear to me awhile ago, when I took the trouble to walk to the table, and show you that, that it had not been read to you, by anybody? No, that had not been read to me, never. That is not the Superintendent's minute.

1504. *Mr. Abigail*: Show him Superintendent Read's minute. You are asking him one thing and showing another.

1505. *Mr. Bull.*] He admits that that minute was read to him by Mr. Lawless, but not in Quelch's presence. Then I said, "Will you answer now, Mr. Read's minute being dated the 4th June, Mr. Lawless' report being dated the 4th June, that you did not see that at the same time"? I did not notice Mr. Lawless' report at any time. I saw Mr. Superintendent Read's report, but I did not see Mr. Lawless'.

1506. *Mr. Abigail.*] If your Worship will read Inspector Lawless' report you will see what it says.

1507. *Mr. Bull.*] I object to my friend interfering in any way.

1508. *Mr. Abigail.*] I challenge my friend to produce the report and let me show you are wrong.

1509. *Mr. Bull.*] I am not going to let my friend have these papers at present. I have an object in not letting him have them.

1510. *Mr. Abigail.*] Your Worship will see that Mr. Lawless says he has shown this minute to the constable, and he appeared to be satisfied with it, and he withdraws his complaint. Does not that show that this witness' evidence is true, that he told the inspector he was satisfied with it, and Mr. Lawless immediately reports on the result of the interview? He would not see Inspector Lawless' report; that would be sent on at once to the Superintendent. The inspector would not dream of showing his report to the subordinate constable before he sent it to the Superintendent.

1511. *Mr. Bull.*] You have already admitted that Mr. Read's report was read to you by Mr. Lawless? Yes.

1512. You have admitted that Mr. Read's whole report was read to you? Yes.

1513. There is no issue between us about that? No, sir.

1514. Did not I show you then, in addition to Mr. Read's minute, a report of Mr. Lawless'—have not I shown you that twice? Yes.

1515. Did not I ask you some time ago whether that minute had not been read to you by Mr. Lawless—the minute, not Read's, this? I swore it was not read to me, and I swear that now. I never saw it until now.

1516. Even Mr. Read makes a remark about your depositions, about your omission of certain important facts, if they were true. You notice that? Yes, sir.

1517. And he found fault with you for that. Do you remember Mr. Read's report of 31st May, after hearing your statement, Quelch's, Kidd's, Guthrie's, and Willson's? What one is that?

1518. A most remarkable circumstance that you have not mentioned to-day; another particular that you forgot to mention, and you never have mentioned, in any deposition. You saw this report [*Exhibit No. 8*]: "If Constable Brennan informed Senior-constable Quelch of all the circumstances of the case, that is, that he heard a grating sound close to a shop window, as if it were being tampered with, that the three men ran away at such a speed that the constable was compelled to part with his cape to overtake them." You never mentioned that until to-day. I am aware you said it to-day; but is not that the first time you have said in giving evidence anywhere that you were compelled to take your cape off in chasing these men? You will admit that in neither of the depositions which you gave in either of the cases, either when the men were discharged on your prosecution or committed for trial, you never mentioned the circumstance of having thrown the cape away? In the first case, I answered every question that was put to me by Senior-constable Wilson.

1519. Was it not Constable Bannan who conducted that prosecution? No, I do not think so.

1520. Do not lead yourself into a mistake? I will not swear it.

1521. Are you not sure of this—and I do not want to mislead you at all—was it not Bannan who conducted the case which was dismissed, and Wilson who conducted the case when the two men were committed for trial? I think it was McAtamney who conducted the second case, and Wilson the first.

1522. *His Worship.*] Do you not think you are going beyond the first charge, which is the statement he made to the senior-constable at the lock-up?

1523. *Mr. Bull.*] If I can show that this man when he was on his oath never made the statements which he has since made in these reports, and that his anxiety was to convict these men, if he believed they were the burglars—. [*Interrupted.*]

1524. *His Worship.*] I see it.

1525. *Mr. Bull.*] I will ask you if you used these words, "and that they manifested an intention to resist?" I did not say that.

1526. I am reading Superintendent Read's minute. [*Exhibit No. 8.*] "If Constable Brennan informed Senior-constable

Senior-constable Quelch of all the circumstances of the case, that is, that he heard a grating sound close to a shop window as if it were being tampered with, and the three men ran away at such a speed that the constable was compelled to part with his cape to overtake them, and that they manifested an intention to resist arrest, inducing the constable to threaten to shoot them, it was undoubtedly the imperative duty of the senior-constable to have detained them until an inquiry had been made; but according to the reports of the senior-constable and Constables Willson, Guthrie, and Kidd, none of the circumstances I have mentioned were communicated to the senior-constable except that as soon as the men saw the constable in the Botany Road they ran away." Now, you heard that read, did you not? Yes.

Constable
Brennan.
29 Oct., 1897.

1527. "All the reports should be shown to the constable, and he invited to make any further statement he may wish, after which I will decide the matter." You heard that read? Yes; and I made a further statement.

1528. I suppose you will admit that, after all, you have not a clean sheet? I have not a bad sheet.

1529. But you have not a very clean one. Have you been fined four times for neglect of duty? I have been fined once for being some minutes late for court.

1530. I will put them to you categorically. On the 2nd August, 1895, were you fined a day's pay for neglect of duty? What was the neglect?

1531. I am not here to say what it was. I simply ask you whether you were fined a day's pay for neglect of duty? I think it was for being late.

1532. And then two days afterwards were fined for neglect of duty? I was late that morning. That was the morning when my brother was sent on the Ashantee Expedition in South Africa, and I was a few minutes late reading his letter.

1533. On the 4th April, 1896, were you again fined a day's pay for neglect of duty? I cannot swear that.

1534. I may tell you that I have got this from the defaulters' list? I cannot say. I am not going to say when I do not know what I am charged with.

1535. I have got it here. I may tell you this is a copy from it. On the 26th February this year were you fined a half-day's pay for being found hiding behind a bar counter when on duty? That was on an occasion when my child was dying at Ashfield. I went in to have a glass of beer, and I paid for it.

1536. Were not you hiding? I deny it.

1537. Who was it reported you? Senior-constable Corcoran.

1538. And Corcoran made a mistake, then? I suppose so.

1539. At any rate, whether he made a mistake or not, the Department believed it, and you were fined for it? I was in there, and I was in uniform, and I told my Superintendent about it.

1540. You told your Superintendent the reason for hiding behind the counter? I deny that. I was fined a day's pay for being late coming on duty.

1541. *Mr. Abigail.*] I shall ask that Quelch be not believed because there were complaints against him.

1542. *Mr. Bull.*] Quelch has denied them on his oath, and you have brought nothing to contradict him.

1543. *His Worship.*] Those are not matters which affect his credibility as a witness. (*Witness.*) I hope Mr. Bull has got my character from the police in the old country.

1544. *Mr. Bull.*] I am not insinuating a word against that.

1545. *Mr. Abigail.*] There are two Constables Guthrie, which is it? Constable Samuel Guthrie.

1546. He was in the station at the time when you brought these people in? Yes, he was in the yard at the time.

1547. Did Senior-constable Quelch know that you had gone over to Newtown to assist in the prosecution of those men? I think he should know.

1548. Did he know that they were being prosecuted at Redfern on the charge you brought against them? Yes.

1549. Did he offer to give evidence? No.

1550. Did he give evidence? No.

1551. Although he was your senior-constable? No.

1552. Did he suggest that he could assist in the prosecution? No.

1553. Nor did he do anything to assist in bringing those alleged offenders to justice? No.

1554. At the Quarter Sessions, did you give any evidence? Yes.

1555. Did you then give full evidence of all you knew about the men? All I knew as far as I could recollect.

1556. And explaining the nature of the charge? Yes.

1557. Did you explain in your evidence at the Quarter Sessions the nature of the evidence which you had against them on the charge on which they were acquitted? Yes.

1558. Did you also then explain about the different names and addresses they had given? I believe I did, and about the grating noise.

1559. What was the sentence on them? Two years and eighteen months' imprisonment. Those were the two who pleaded guilty; and the other man pleaded not guilty, and he was sentenced to nine months.

1560. I want to have a look at Superintendent Read's report of the 21st May. I want to ask your Worship's attention to this part of the minute: "If Constable Brennan informed Senior-constable Quelch of all the circumstances of the case, *i.e.*, that he heard a grating sound close to a shop window, as if it were being tampered with; that the three men ran away at such a speed that the constable was compelled to part with his cape to overtake them, and that they manifested an intention to resist arrest, inducing the constable to threaten to shoot them; it was undoubtedly the imperative duty of the senior-constable to have detained them until due enquiry had been made." [*Exhibit No. 8.*] I want to ask you that, if I can certify your Worship that this witness is a witness of truth, then I can invite your Worship to find against Quelch, following the minute of Superintendent Read.

1561. *His Worship.*] I cannot find anything until the finish of the inquiry.

1562. *Mr. Bull.*] I thought my friend had got those papers to ask a question. I object to his addressing you upon anything at this stage.

1563. *His Worship.*] It is no use addressing me now.

1564. *Mr. Abigail.*] Rather than call two or three witnesses to get out of their mouths each time this part of the report, and to get out the nature of certain regulations, I want to say that, if you find, as a matter of evidence, that the senior-constable was told these things, I invite you to find against him.

1565. *His Worship.*] I will give no opinion here as to what conclusion I come to. I give my report to the Governor.

1566.

- Constable Brennan. 1566. *Mr. Abigail.*] I know that ; but with a view to shortening the evidence.
 1567. *His Worship.*] I do not want you not to call any witness whom you think material.
 29 Oct., 1897. 1568. *Mr. Abigail.*] Very well ; I will get it the longest way, because you insist upon it.
 1569. *His Worship.*] I think that matter has been quite exhausted.
 1570. *Mr. Abigail.* (*To witness.*)] Do you say you read this report of Superintendent Read of the 31st May, 1897? Yes.
 1571. There was no reason why this report of Inspector Lawless' should be read to you? No.
 1572. *Mr. Bull.*] He has said the minute was read, and this report was not read. He has said that half a dozen times.
 1573. *His Worship.*] The gist of the matter is what was said to Quelch at the station.
 1574. *Mr. Abigail.*] Did you know whether Senior-constable Quelch had been asked by the inspector to withdraw his complaint against you? I could not say that.

Richard Henry Brewin, Watchman and Special Constable, Redfern, was called and sworn:—

- R. H. Brewin. 1575. *His Worship.*] What is your name? Richard Henry Brewin.
 29 Oct., 1897. 1576. What are you? Night-watchman.
 1577. A special-constable? Yes.
 1578. *Mr. Abigail.*] Have you been so occupied for a period of years? About eight years.
 1579. In the one district? In the one place all the time.
 1580. Where? Botany Road and Regent-street.
 1581. Of course you are privately employed? Yes, by the residents—shop people.
 1582. Are you, in the performance of your duty, frequently called upon to assist the police? Oh, yes, I have.
 1583. And if you, while going round, see anything suspicious, is it a part of your duty to acquaint the police on the beat? Yes, I always acquaint the police of it.
 1584. You frequently have informed the police and given evidence in cases, have you not? Oh, lots of cases.
 1585. Now do you remember, in May last, assisting the last witness, Constable Brennan, with three people? Yes.
 1586. I want you to tell us what you know about it? It would be about twenty minutes to 6—I do not know the date—in the morning I heard somebody run. I looked, and I saw two or three men crossing over the road from one side of Botany Road to the other, and then I walked in towards the corner of Chapple-lane, near the "Commercial Hotel," and I there saw Constable Brennan coming out of the lane with three men.
 1587. You took the short cut to where they came from? No; I was just coming down the lane towards home.
 1588. And there you saw Brennan with three men? Yes, coming out of the lane into Botany Road, bringing them up towards the station.
 1589. Had he these men covered with a revolver? Yes; he asked me to assist him.
 1590. Did they give their names and addresses? They did give names—there was Conlon and Murray; but they gave some other names before that.
 1591. Did they give any names at the time you went up—not afterwards at the station, but when you went up—what names did they give? At the station?
 1592. No. Before you took them to the station, did you hear them give any names and addresses? They did give some names, but I forget what the names were.
 1593. You assisted the constable to take them to the station? Yes.
 1594. Did you see Senior-constable Quelch there? Yes.
 1595. Can you tell us the conversation which took place between Brennan and Quelch with reference to these three men? He told him that he got them at Botany Road. Of course I was standing outside the door; I did not go inside.
 1596. Did you hear anything else? I heard him say something about some one ought to go down and see what was the matter.
 1597. *Mr. Bull.*] Who said that? Brennan said that.
 1598. *Mr. Abigail.*] Where? Down the Botany Road.
 1599. Did you hear the men give their names and addresses at the station? Yes, they gave their names and addresses.
 1600. Did you hear those? Yes, they gave their names; one gave the name of Murray, and one Conlon, and the other one—I forget what the other one's name was. I know there were three men.
 1601. Did they at the station give the same names and addresses that they gave to Brennan and you? No, they gave different names to what they gave down the Botany Road. I think Conlon gave his name right.
 1602. But the other two gave different names? I know there were different names given; but I forget what the names were.
 1603. Was there any remark made by anybody at the station about these different names? Did you hear Brennan say anything to Quelch about it? I do not know who it was, but I heard somebody in the station say that these men had given "cronk" names—different names.
 1604. *Mr. Bull.*] Which was it "cronk" or "different"? I would not be sure. I know the meaning was that.
 1605. *Mr. Abigail.*] Did you hear anything else? Of course they were let go.
 1606. Who let them go? Their names and addresses were taken down by Constable Kidd. I believe he was in the desk, and Senior-constable Quelch was standing at the side of him.
 1607. And who let them go? Quelch, as the officer in charge at the time, because there was no other senior-constable there then.
 1608. Did Brennan or anybody else ask that these men should be detained while these inquiries were being made in Botany Road? You said that somebody said that somebody ought to go down the Botany Road and see what was up? I believe Brennan said they ought to be detained while somebody went down Botany Road.
 1609. Now, after they had gone into the station, did you see Senior-constable Quelch come out of the station into the yard and call Constable Bruce on one side? Yes, he was in the yard.
 1610. What did he say to Constable Bruce? He seemed certain that one of these men—. [*Interrupted.*] 1611.

1611. What did he say? "That is one of them all right." I did not know at the time what he was referring to. R. H. Brewin.
1612. Now you know that he was referring to these men who had the bag of pigeons, do you not? I did afterwards, but I did not know at the time. 29 Oct., 1897.
1613. Anything else? Bruce said he did not think so; he did not seem sure.
1614. And what did Quelch say? He seemed positive they were.
1615. And was it after this conversation which Quelch had with Bruce that he let these men go? Yes.
1616. He returned to the station, and then a little while after that these men were let go? I would not be sure whether it was before they were let go or after they were let go.
1617. I want you to think about that? I know he came out to the yard, because I remained in the yard.
1618. Had the men been liberated then, or were they not liberated until after that? I would not be sure of that.
1619. What is your impression? I would not be sure of that.
1620. *Mr. Bull.*] I object to his impressions.
1621. *His Worship.*] We cannot take that.
1622. *Mr. Abigail.*] To the best of your recollection, what do you think? Which was it? I would not be positive on it.
1623. Did you give evidence against these men? Yes, I gave evidence as to being called to assist.
1624. I ask for the depositions. (*To witness.*) What case was it that you gave evidence in? In the second case.
1625. What was the nature of the second case? Breaking and entering Riddle's shop.
1626. Then it was this very matter upon which Brennan had arrested them? Yes.
1627. *Mr. Bull.*] You did give evidence in this case when the men were committed for trial? Yes.
1628. You seemed to know that the robbery was going to be committed? Yes, Mr. Siddons at the billiard room told me.
1629. He told you the robbery was going to be committed? He said there was some "cronk" ones knocking about.
1630. This is what you said, "I assisted to bring them. I know Mr. Riddle's shop. It was intact"? I do not know the meaning of that word. I never made use of that.
1631. "I also cautioned Mr. Riddle of something I heard"? I told Mr. Riddle and another man in another shop on the road.
1632. This is your evidence? Yes; that there were two or three fellows knocking about, and that Siddons had told me.
1633. Is that Mr. Siddons, of 134, Botany Road, Alexandria? Yes; that is he.
1634. Since this matter of the inquiry into Quelch's conduct, do you know that Mr. Siddons has been threatened with letters? No. I never heard that. I heard that he signed Quelch's petition.
1635. A certificate of character of Quelch's? Yes.
1636. Do you happen to know that since he signed some certificate for Quelch, along, of course, with a number of other persons, he has received an infamous letter from somebody, making threats? No; he never told me anything about it.
1637. Do you know that on the 25th of this very month he made this complaint to the Police Station at Redfern. [*Exhibit No. 15.*] "James Siddons, 134, Botany Road, Alexandria, complains that young men about his shop at the above address, annoy and threaten him, and throw stones at his premises; they have broken three windows in his shop during the last three weeks from stone-throwing. He desires police attention"? I did not know that. I am not a constable. I am not connected with the Police Station.
1638. Do you know that his shop windows have been broken? There is a little window that has been broken.
1639. Do you know that some windows have been broken? Yes, there is one there.
1640. Do you know that Mr. Siddons himself actually laid this complaint? No.
1641. To Serjeant Vane? No.
1642. It was a report at the station on the 25th October. How long have you been a night-watchman? Between seven and eight years.
1643. How many charges might you have had during all that time against people for assaulting you? I do not know.
1644. Give the court some idea. You know it is a money-making game if you can only manage to get enough? I could not say how many.
1645. How many do you think? I have no idea.
1646. Twenty? I could not say.
1647. Would you like to swear that you have not charged as many as twenty people with assault? I may have.
1648. Have you ever appeared at the court once with any mark anywhere upon you as the result of any assault that was committed on you. Can you remember any one instance when you could show anything in the nature of an injury on you? Yes.
1649. When was that? Whenever I have charged anyone with assault it has been when I have been assisting the police.
1650. You have not the kindest feeling towards Quelch, have you? I have nothing against him; I never speak to the man.
1651. How many times have you been to the inspector making complaints against Quelch? I went to him one night.
1652. Only once? I told Mr. Lawless about him telling the men—complaining of speaking to me when I never spoke to them at all.
1653. Do you not know this: That the very Superintendent of Police instructed the different officers of the Redfern division not to have any conversation with you—did not Proctor give you that very information? Not with me altogether, but with the watchmen.
1654. With you alone? No, with the watchmen.
1655. Did not Proctor, the police officer, give you that information, that the superintendent had instructed his men to have, in no sense or way, anything to do with you? No; he never mentioned that. It was the time when the constable was reported.
- 1656.

- R. H. Brewin. 1656. Has Quelch ever prosecuted you for anything? Only once.
 1657. What for? For having an unregistered dog.
 29 Oct., 1897. 1658. *Mr. Abigail.*] That was playing it pretty low down?
 1659. *Mr. Bull.*] Is that your card [*producing card*]? Yes.
 1660. Did you send that to Quelch? No.
 1661. Write on a piece of paper for me, please, the words I tell you to write. Write first "With deepest sympathy." Now write "Senior-constable Quelch, Police Station, Redfern"? It is the man's own card, on it "with deepest sympathy," in a black-edged envelope. [*Witness wrote on a piece of paper, which was then handed to Mr. Bull.*]
 1662. *Mr. Abigail.*] It is very easy for a man to send that to himself if he wants to impeach a witness.
 1663. *Mr. Bull.*] Now, you were in charge, some time ago, of some premises of a Mr. Flynn? Yes.
 1664. And you were night-watchman? Yes.
 1665. You were paid really to watch Flynn's place, were you not? I was.
 1666. Are you now? No.
 1667. Now you admit that you were paid to watch Mr. Flynn's place? Yes.
 1668. Did not Quelch, on one occasion, find you, with another man, robbing that very place? No, never. I will explain that.
 1669. *Mr. Abigail.*] In order to identify that writing, I wish to have that marked.
 1670. *Mr. Bull.*] I am not going to let you see that. [*To Witness.*] Do you not know that Quelch accosted you and another man carrying provisions and things out of another man's store? No, he did not; not me. I can explain that.
 1671. What man were you with on the morning of the 10th May, 1896? I do not remember being with any man on that morning.
 1672. Now, you be very careful? I am speaking the truth. I have no need to be careful.
 1673. Were not you in the company of a man named Charles Russell? I was not in the company of the man at all. I can explain that.
 1674. If it did not happen, you cannot explain anything. Were not you seen by Quelch coming out of Flynn's shop at the back, carrying a bag of meat, a bag of sugar, and sundry things? Never in my life.
 1675. Were not you chased by Quelch, and did not he catch both of you? No, he did not.
 1676. At the corner of Wyndham and Margaret streets, Redfern? He did not chase me. I did not come in that direction at all. I came from Cleveland-street.
 1677. Did the other man run away? I do not know whether the other man ran away. I will explain it to you. Quelch has been fighting me for years, since I have been in Redfern, and other men too.
 1678. I suppose everybody in Redfern knows you? Everybody knows me.
 1679. And I take it, at half-past 5 in the morning, a man would not make very much mistake if he saw you, if he knew you well? I do not say he did not see me.
 1680. Do you remember one morning, as a fact, being in the company of this man Russell, who was an employee of Mr. Flynn? I was never in the man's company in my life—never stood to speak to the man in my life.
 1681. Will you swear it is not true that he caught the two of you coming out, and that he gave chase to both of you, and caught you up at the corner of Margaret and Wyndham Streets, Redfern. Did you never hear of this man Russell being charged, or, at any rate, it being alleged against him, that he had obtained a number of things at Mr. Flynn's place? I heard it a couple of days afterwards.
 1682. Tell us when you heard that? On the Monday.
 1683. Tell us what you heard? I heard that a man working at Flynn's had been locked up by Quelch, and that he had seen him coming out of the back of Flynn's shop with some groceries.
 1684. Did you never hear your name identified with that? No, my name was not mentioned in connection with that at all.
 1685. You swear it was not? No.
 1686. How soon after that were you dismissed by Mr. Flynn? A few weeks afterwards.
 1687. Were you not dismissed almost at once after? No, I was not.
 1688. You say that Quelch might have been trying to "ready" that thing on you? I say that Quelch is always "readying" things on me.
 1689. Were you not in the habit of going in in the early morning and lighting up Mr. Flynn's shop? Yes I was.
 1690. Had you any authority from Mr. Flynn to do that? No, but from the foreman.
 1691. What is his name? Frank, we called him.
 1692. Is that the "German," as he is called? I don't know.
 1693. Was not he "sacked," the same man? Not that I am aware of.
 1694. Do you not know he was? I do not think the man was sacked.
 1695. Can you say what time in the morning it was that you saw this man, or that you heard that he was chased by Quelch? I never heard that he was chased by Quelch at all, and I know he was not chased by Quelch.
 1696. That is exactly what we are suggesting—that you know all about it. You were there? I was not there at all.
 1697. You said, awhile ago, you knew nothing of the circumstances, and you were not with the man that morning? Neither was I, and I did not know what had happened until a few days after.
 1698. And what you say is that it is a fabrication of Quelch's if he says that you were one of the two persons he chased? Yes.
 1699. I suppose you think Quelch is capable of fabricating a charge against you? I would not like to say that, I know he has never acted honorably to me.
 1700. Do you know this, that on the very same morning he reported this at the Police Station? No, I do not know that it was ever reported.
 1701. Are not you always at the Police Station—you have friends, you know, in the Redfern Police Force? Yes; but I have many enemies in the Redfern Police Force.
 1702. Were you never shown the entry made by the lock-up keeper? No.
 1703. *Mr. Abigail.*] I object to my friend trying to get in, to influence your mind afterwards, something which the witness has an absolute ignorance of. How can you or I or any other person have access to the Rough Occurrence Book kept at the Police Station? 1704.

1704. *Mr. Bull.*] I can put this book into Quelch's hands when he comes into the box, and ask him the same thing. R. H. Brewin.

1705. *Mr. Abigail.*] That is the proper course.

29 Oct., 1897.

1706. *Mr. Bull.*] I ask him if he has ever seen this book at the Police Station, and has he ever heard of this entry being made against him [*Exhibit No. 16*]: "About 5.30 a.m., 10th instant (May, 1896), Senior-constable Quelch saw a man coming from Mr. Flynn's, butcher, in McNamee's Lane, Alexandria, on seeing the senior-constable he ran away. The senior-constable gave chase, and caught him at the corner of Margaret and Wyndham Streets, Redfern. He had a bag of meat and bread, a small bag of corn, some sugar, and sundries, in his possession. As he would not account for the things, Senior-constable Quelch took him back to Mr. Flynn's shop, and afterwards to Mr. Flynn's house; he admitted stealing the articles. He was an engineer in Mr. Flynn's employ, and he declined to prosecute. His name is Charles Russell, 59, George-street, Waterloo."

1707. Did you never hear of that entry? No. I never heard of any entry at the Police Station.

1708. And you swear that you were not with that man at the time? Were you seen by Quelch with that man that same morning? I was not with that man. I will explain it if you will allow me.

1709. *Mr. Abigail.*] He is entitled to explain.

1710. *Mr. Bull.*] He is entitled to explain, but not to stand there and mutter complaints against me. (*Witness.*) I was returning home about a quarter to 6, and just as I got near Moon's shop—that is almost at Margaret-street, at the corner of Margaret-street and Regent-street—I saw Senior-constable Quelch coming up quite leisurely, walking up quietly until he met me, and then this man came out of Margaret-street into Regent-street, towards the city. I stood when I saw Quelch call the man up, and he said something to him. Anyhow, he took the man back again down Botany Road, and he passed me and never said a word to me, and the man never spoke to me, and I never spoke to the man in my life. Then there was a constable on the opposite side, and I walked over to him, and never knew what had happened until the Monday.

1711. *Mr. Abigail.*] You say you had no connection with the man, and did not know him? No.

1712. *Mr. Bull.*] And you never spoke to this man Russell, who was actually in Mr. Flynn's employment. Do you swear that? Yes, I swear that.

1713. Do you remember making a report to a Mr. Yedwohf, a tailor, in Regent-street? You know him, don't you? I know him.

1714. Do you remember making a report to him that his place was going to be "cracked"? I never remember such a thing in my life.

1715. Will you swear that you did not say to Mr. Yedwohf that you had heard a man say that his place was easy to be cracked, and to be on the look-out? I never remember such a thing.

1716. Will you swear you never did? I do not remember ever saying any such thing as that.

1717. Did not you mention the man's name to him whom you heard say how easy it would be to crack his place, and there was a safe at the back, and any one could crack it? There was no safe at the back. I never heard that there was ever a safe at the back in my life.

1718. Do you not know that Mr. Yedwohf, on the statement made by you, went to the Police Station and made a report on the information that he got from you? No. I do not remember it.

1719. *Mr. Abigail.*] Where is the Occurrence Book with the entry?

1720. *Mr. Bull.*] He will get that in time.

1721. Were you watching his shop at that time? Were you paid by Mr. Yedwohf for watching his shop? I was paid there at one time; but he had his brother.

1722. As a fact, did he discontinue or did you? He discontinued to pay me for the reason that he got his brother, and his brother did remain on the premises for some considerable time.

1723. You mean he told you he had a brother who was going to live on the premises, and he would not require you? He did not tell me there was going to be a man remain on the premises.

1724. Will you swear that you did not mention a certain man's name to him as the man that had given you this information that the place was going to be cracked, and were you not seen in this same man's company night after night? No. I am under the notice of the Police and have been there for eight years, and they cannot say anything wrong against me, nor truthfully.

1725. Do you not know this, that you have reported doors on different business places found open by you? Yes.

1726. Do you not know that the different Police on the different beats have stated that, almost momentarily before the time that you have fixed for these doors being found open, they have tried these doors and found them fast, and for five hours before you have reported that you have found these doors open, while the Police were on the beat, they have persistently tried these doors, and you, almost immediately after they have passed, have found them open and reported it? I do not know that, but of course I found the doors open, and I reported it, and I acquainted the constables on the beat.

1727. You know Marshall's, the chemist? Yes.

1728. Did you find that door open on the 16th March, 1894, at 10 to 4 in the morning? I have no recollection; I may have found it open.

1729. Did not you actually report at the Station that you had found Marshall, the chemist's door open. Was not Quelch at the Station, and did not he go back at once down to see the place? He may have. I do not remember that.

1730. *Mr. Abigail.*] It is three years ago.

1731. *Mr. Bull.*] All this is three years ago.

1732. *Mr. Abigail.*] He does not keep Occurrence Books.

1733. *Mr. Bull.*] Did not you actually report at the station that you had found both the shop and the side doors open? I do not remember it. I may have.

1734. Would you be surprised to know this: that in the Occurrence Book an entry is made on page 36, as of date 16th March, 1894. [*Exhibit No. 17.*] "Found open, by Brewin, the shop and side door of Marshall's, chemist, 97, Regent-street, at 3.50 a.m., 16/7/94. No person resides on the premises. Everything appeared correct.—Quelch." Do you know this, that Quelch went back on your report, and every door in the place was locked except the front and side doors, that you allege you found open? I do not remember that.

1735. And the money intact in the shop. Do you not remember the circumstance of having reported this? I do not remember that. 1736.

- R. H. Brewin. 1736. Do you not know that there was a policeman on the beat from 10 o'clock until 3, and that he reported the matter "all correct" during the whole time of his beat? I have no recollection of that whatever; and then I would not know all the constables.
- 29 Oct., 1897. 1737. Do you remember the fact of the constable taking the key out and taking it up to the Police Station? No.
1738. "Received from the police a door key belonging to Marshall's shop, Cleveland-street.—R. Chapman, 151, Cleveland-street." Do you remember that? No.
1739. Do you know Mr. Chapman, the shopman at Marshall's, the chemist? I do not know any man by that name.
1740. Do you know the shopman at the shop? Of course, ever since I have been there. I do not know all the names.
1741. *Mr. Abigail.*] There is evidently a week's industry on Quelch's part to go through these books to blacken this man's character,
1742. *His Worship.*] There is always a feeling on the part of the police towards these private watchmen. I do not think there is any necessity to pursue this any further.
1743. *Mr. Abigail.*] Were you discharged by Flynn, or did he merely discontinue your services weeks after that occurrence that Mr. Bull refers to, and did he give you a recommendation? No, but he told me he would.
1744. You have never applied for it, have you? No.
1745. What reason did he assign for the discontinuance of your services? He said that it was on account of my having so far to go. Of course I have a long beat, because things are so bad on the beat. There is such a competition, I have a longer way to go.
1746. Did not the Commercial Bank discontinue your services for the same reason, and give you a letter of recommendation? Yes.
1747. You have got that, have you not? Yes.
1748. *Mr. Bull.*] If my friend is going to put in certificates, I have got a lot of other questions to ask.
1749. *Mr. Abigail.*] Keep the certificates in your pocket. You have many certificates and testimonials of your character? Yes, I have never been suspected of anything.
1750. You have never been charged with anything during the whole of that time? Except that Senior-constable Quelch had me once for not registering a dog.
1751. *His Worship.*] It is quite clear that their relations are strained.
1752. *Mr. Abigail.*] You have frequently been the subject of complimentary reference from the Bench in cases where you have assisted the police? Yes, I have ably assisted them in every respect.
1753. *Mr. Bull.*] And it has happened that you charged a man with assault and appeared at the Police Court to prosecute him, and two police officers and a civilian were ready to give evidence to prove that it was impossible for the man to have committed an assault upon you under the circumstances you had sworn to, and you withdrew the charge? I withdrew the charge, I think Mr. Addison was the magistrate on the Bench. I had been told the man was fined the day before and I was asked to withdraw.
- [The Commission adjourned at 4.40 p.m., until Monday, 1st November, 1897, at 10 a.m.]

MONDAY, 1 NOVEMBER, 1897.

[The Commission sat in the Licensing Court, Central Police Station.]

Present:—

MR. WHITTINGDALE JOHNSON, S.M. (SOLE COMMISSIONER).

Mr. J. R. Dacey, M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared to support the charges; Mr. Charles Bull, M.L.A., solicitor, appeared to defend Senior-constable Quelch.

His Worship.] I may as well state, to save inconvenience, that I do not intend to hear any addresses from either side when the evidence is concluded.

Charges 4 and 5 continued.

Constable George Henry Edwards was recalled:—

- Constable Edwards. 1754. *His Worship.*] What is your name? George Henry Edwards.
1755. What are you? Constable, stationed at Redfern.
- 1 Nov., 1897. 1756. *Mr. Abigail.*] Do you remember the day of the arrest of those three burglars? Yes, the same morning.
1757. You heard a conversation, did you not, at the station? Yes.
1758. It was the morning they were arrested, as a matter of fact, was it not? Yes.
1759. Did you hear Brennan have a conversation with Quelch? I caught a smattering of it.
1760. Is this the smattering that you heard: Did you hear Brennan ask Quelch to telephone and see if the men had given correct addresses? Yes.
1761. Did you hear Brennan also ask Quelch to detain the men until some one went down to Botany Road to see if everything was all right there? Yes.
1762. Did you see Senior-constable Quelch leave the station, and walk into the yard and have a conversation with Constable Bruce? No, I did not see that; I had left before that.
1763. Were the men detained, or were they allowed to go by Quelch? They went; I saw them go.
1764. They could not go unless they had been discharged, could they? No.
1765. And Senior-constable Quelch was the officer in charge at the time? Yes.
1766. *Mr. Bull.*] What did you say? I said that they were discharged.
1767. How long were they at the station? I suppose they were, as near as I can remember, from five to ten minutes, perhaps a quarter of an hour.

1768.

1768. In fact those men had been in the station, or were at the station, before you arrived with Quelch. Do you remember your coming into the station with Quelch and finding the men there and Brennan with them? Yes.
1769. Who was in charge of the station when you and Quelch arrived? The man who was in charge of the station was asleep at the time; I forget who it was.
1770. Surely there was somebody there when Brennan and the two men arrived; who was he? I think it was one of the reserve men.
1771. Do you know his name? I do not recollect who it was.
1772. Do you know Senior-constable Harrison? Yes.
1773. Was he there at any time during the time that Brennan was there with these men? I could not say. I do not remember that.
1774. Senior-constable Bourke, do you know him? He might have been there, coming on at 6.
1775. No; at the time Brennan was there with the men. Do you know Constable Hind? Was he there? I think he went off with the relief.
1776. Constable Kidd? He might have been the man in the reserve.
1777. He might have been? Yes.
1778. Did you hear anything said by Brennan about hearing grating noises, or sounds as if a place was being broken into, in any statement that Brennan made whilst Quelch was there? No.
1779. You know these men were there as suspected burglars? Yes.
1780. Of course, your attention would be attracted by that? Yes; but I would not take particular notice.
1781. If you had heard such a statement made by Brennan, it would have struck you, would it not? Yes.
1782. And you say that no such statement was made by Brennan whilst you were there? I did not hear it.
1783. Did you hear anything said by Brennan to anybody there; that in the street these men had given different names and addresses altogether to those that they had given when at the station? Yes, I heard that.
1784. Whom did he say that to? I do not know. I did not notice.
1785. He said it to somebody? Yes.
1786. Did he mention the names that had been given which were different to those then being given at the station? Yes, I think he did.
1787. Are you sure he did? Just try and think. Would you be surprised to know that he says he did not? That he could not remember the names?
1788. *Mr. Abigail.*] I object to that manner of asking the question. My friend finds the witness is a witness of truth, and he then puts him up to it.
1789. *Mr. Bull.*] I asked Brennan distinctly this question: "Can you remember the names which you say those men gave?" He said, "No, I cannot." I said, "Can you remember even now the names which you say they gave which were different?" He said, "No." I said, "Did you mention the names at the station?" He said, "I do not remember whether I did or not, but I did say I do not remember the names they gave in the street." I ask now this question.
1790. *Mr. Abigail.*] I object to the unfairness of the question.
1791. *Mr. Bull.*] You have had no conversation with me about the evidence you have to give? No.
1792. *Mr. Abigail.*] Nor with me? No.
1793. *Mr. Bull.*] You have had some with Mr. Dacey? Not about this case.
1794. Did you hear him mention any names? No.
1795. At any rate, there is this thing certain, when you and Quelch came in these men were already in the station with Brennan? Yes.
1796. And they were there for some ten minutes after you had arrived? Five or ten minutes, I would not be certain to a few minutes.
1797. *Mr. Abigail.*] You said yourself when I examined you just now that you only caught a smattering of the conversation? Yes.
1798. And when you got to the station, Brennan, the three accused persons, and Quelch were at the station? Yes.
1799. And they had evidently had some conversation before you arrived? I would not say that because I would not stop in the station.
1800. When you got to the station first the three accused, and Brennan, and Quelch were there? Yes.
1801. *Mr. Bull.*] I beg your pardon. Have not you already stated in answer to me, that you went in with Quelch? Yes, we went in together.
1802. *Mr. Abigail.*] I do submit that I am entitled to examine without interruption. My friend has finished. I proceed to bring out some facts to explain misapprehensions he has put the witness under, and then, immediately I ask a question and the witness is going to answer, my friend interferes.
1803. *Mr. Bull.*] My friend assumes that something has been said that has not been said. My friend is assuming that Quelch was in the station some time before this witness arrived.
1804. *Mr. Abigail.*] The manner in which my friend has cross-examined this witness leaves behind the impression that he was present the whole of the time. I want to show that he was there only part of the time, and has deposed to what he did hear. (*To witness*): As a matter of fact, you say that when you got to the station Quelch was there, Brewin was there, Brennan was there, and the three accused persons? As far as I remember. I would not be certain whether they were all there or not.
1805. In all probability there was conversation passing between them that you had no opportunity to hear? I cannot say.
1806. *His Worship.*] He cannot say that. He could say there was time for conversation.
1807. *Mr. Abigail.*] When you left the station whom did you leave behind—the three accused? No; they left before I did.
1808. And did Quelch leave with you? I could not say whether he did or not. I did not take particular notice at all in this case.
1809. But the facts which you have deposed to impressed themselves on your mind so that you remember them now? Yes.

Constable
Edwards.

1 Nov., 1897.

Senior-constable William Edward Quelch was recalled :—

Senior-constable
W. E. Quelch.
1 Nov., 1897.

1810. *Mr. Bull.*] With regard to this charge, "That some short time ago a constable named Bruce was on duty at the Baptist Estate, near Moore Park, when he saw three men prowling about in a suspicious manner. He went over to see what they were at, and they ran away. He chased the men actually into the arms of Quelch. Quelch heard their yarn, which was that they were dairymen going to the Farmers' and Dairymen's Milk Supply Company to get milk for their customers; but strange to say they said they lived at Pymont. Quelch did not see the absurdity of that; but he took down these men's names and let them go. A few minutes afterwards Bruce went back on their tracks and discovered a sack full of pigeons which these men had evidently stolen." You remember the circumstances of your being on duty? I do, well.
1811. And the fact of seeing two men hurrying in the direction of where you were? That is in Bruce's case; I left the station and went along Redfern-street for the purpose of visiting Constable Bruce; in the ordinary working of his beat he would continue right along Zamia-street to Young-street.
1812. That would be his ordinary beat? That is as he should come.
1813. In fact that is his proper beat? That is his way; when I got to the corner of Young and Redfern Streets I stood, and two young fellows, very respectably dressed, came trotting along the footpath the same side of the road that I was; I stopped them and questioned them as to what they were running for.
1814. Just say what you said to them? I said, "What are you running for?" They said, "We are going to the Belmore Markets, we are late, and as it is cold we are just trotting to keep ourselves warm." I examined them.
1815. Tell us what you mean by that? I searched them; I found nothing on them; whilst I was so conversing with them, Constable Bruce came round the corner of Telopea-street right opposite, and crossed over to me. He said, "I saw two young fellows standing at the corner of Marriott and Zamia Streets just now as I was coming up Zamia-street." The charge says three. "When they saw me coming they walked along Zamia-street to St. Saviour's-lane. They ran through St. Saviour's-lane to Young-street. He said "I came round Telopea-street thinking I might catch up and see what was the matter." I said "Did you see them carrying anything, or having anything in their possession when you first saw them?" "Oh," he said, "No, I saw nothing on them, nothing whatever." I asked the young fellows where they had been. They said they had been to some friend's that night, and they remained there until it was time to leave to go to the markets. I took their names and addresses. One gave the name of, it is down there, Page, I think.
1816. They gave the names of what? The first one gave the name of Frederick Page, residing at 3 Bunn-street, Ultimo, next Senior-serjeant Roden's. Then follows his description. [*Witness looked at Rough Book.*]
1817. The other? The second gave the name of William Wilkinson, at R. Robinson's, 163, Albion-street, Pymont. Then follows his description.
1818. Whilst you were talking to these men did Bruce come up? Yes.
1819. And over to where you were? Over to by my side. After their names and addresses were taken, and they had given what I considered reasonable account of themselves, I allowed them to go.
1820. You exercised your own discretion in that, as a police officer? I did.
1821. And was the information which they gave, or any answers they made to any questions asked by you, given with any hesitancy? Not at all. Not in the least.
1822. After letting them go? After letting them go I went back, and I took Constable Bruce with me.
1823. In what direction did you go? I retraced the steps that Constable Bruce told me these men had come.
1824. That is through St. Saviour's-lane? Through St. Saviour's-lane.
1825. What did you find? Constable Bruce went right through the lane out into Zamia-street ahead of me. When I got within about 10 feet off Marriott-street I picked up a small handbag and called Constable Bruce back.
1826. The handbag that was on the table here the other day? Yes.
1827. How far in advance of you was Bruce? I suppose he was about 12 feet. I said, "Look here, Bruce," and showed him the small handbag of pigeons.
1828. You know the charge here says a whole sack full of pigeons? Yes.
1829. Nothing of that sort was seen by you? There was no sack at all about there.
1830. That bag contained how many? Four.
1831. *Mr. Abigail.*] I object to this. We have already gone into this in Riddle's case. Your Worship remembers that Mr. Bull cross-examined this witness about that.
1832. *Mr. Bull.*] This witness has given no evidence at all about this. (*To witness.*) You called Bruce back? I called him back, and I had the pigeons. I said, "You hurry back along Redfern-street and work right up to Regent-street to see whether you can see these men."
1833. *His Worship.*] Those same men that you saw before? Those same men.
1834. *Mr. Bull.*] What did you do? I said, "I will go right straight along Cleveland-street. That will allow us, if we can, to intercept them." Constable Bruce did as he was ordered.
1835. He left you to do it? Yes, and I went right along Cleveland-street to Regent-street, and up Regent-street to Redfern-street, where I met Constable Bruce.
1836. And anybody else? And Constable Cubitt, who had joined him. I still had the pigeons, carrying them the whole time. When I got up to them, Constable Bruce said, "I did not see anything of them, did you?" I said, "No." I said, "Let us go through the markets, the fish markets." We examined the fish markets, and could see nobody.
1837. Nobody answering their description? Nobody answering their description.
1838. You did not see the men? No. After that I went to the station and made the entry in the book.
1839. Now, what entry is that? Read it [*Exhibit No. 18*]: "About 4.15 a.m., this date, as Constable Bruce was working Zamia-street, he saw two young men standing. Seeing the constable coming they walked to St. Saviour's Lane, and then ran through the lane to Young-street, to Redfern-street, where they were stopped by Senior-constable Quelch, and questioned; having nothing in their possession, and stating they were going to the markets and were running to keep themselves warm; their names and addresses were taken. 1st, Frederick Page, 3, Bunn-street, Ultimo, next Senior-serjeant Roden, about 19 old, 5 ft. 6 in., hair black, fair complexion, very small black moustache; dressed in dirty, light tweed trousers, no vest white

white shirt, woollen singlet, outside dark sac coat, black soft hat. 2nd. William Wilkinson, at R. Robinson's, 163, Albion-street, Pyrmont, about 19 old, 5 feet, fair complexion, clean shaved, dressed in dirty brown mixture tweed sac suit and soft felt hat, wore sand shoes, a small bag was afterwards found in the lane containing four pigeons, where they ran through." The footnote is entered by Constable Moore, "Pigeons 1 Nov., 1897. Senior-constable W. E. Quelch."

1840. Well, you know this charge that is made against you here, No. 4? Yes.

1841. Is this true. I will read, first, the portion introductory to what I want you to answer,—“Some short time ago a constable named Bruce was on duty at the Baptist Estate, near Moore Park, when he saw three men prowling about in a suspicious manner.” Was anything said by Bruce to you about these two men acting in any suspicious way? Not a word.

1842. And instead of three it was two young men? Two.

1843. Were these men chased, actually chased, by Bruce into your arms? Not at all. Constable Bruce came in a different direction.

1844. Is this true: “He went over to see what they were at, and they ran away. He chased the men actually into the arms of Quelch. Quelch heard their yarn, which was that they were dairymen going to the Farmer's and Dairymen's Milk Supply Company to get milk for their customers”? It never was uttered.

1845. No such statement was made by these men? No.

1846. And no such statement was made at all? Not at all.

1847. “But strange to say they said they lived at Pyrmont”? Yes.

1848. “Quelch did not see the absurdity of that,” living at Pyrmont and going to the Farmer's and Dairymen's, “but he took down their names and let them go”? They explained, as I have said, where they had been that night, to a friend's.

1849. They explained where they had been and where they were going? Yes.

1850. And it was really, in fact, to the Belmore Markets? Yes.

1851. *His Worship.*] You let them go in the street? Yes.

1852. And made a report afterwards? Yes.

1853. *Mr. Bull.*] How long after these circumstances in the street was it that you reported the matter? The “time reported at the station” is entered in the book at the station also—4.30. The time is entered in the margin.

1854. The entry was made in the book at the Police Station at 4.30? 4.30.

1855. Is this true: “A few minutes afterwards, Bruce went back on their tracks and discovered a sack full of pigeons, which these men had evidently stolen”? It is not true at all.

1856. So far as you know, was there any evidence to connect either of these two men with the pigeons? Not a bit. If I had come upon the men after going after them with Constable Bruce, I had no charge unless I liked to swear one against them, because I never saw anything in their possession, nor did Constable Bruce. From the same residence —. [*Interrupted.*]

1857. You asked Bruce if he saw them carrying anything? Yes.

1858. He said, “No.” He saw nothing with them? Nothing at all.

1859. You were going on to say, “From the same residence”? From the same residence where it was reported the pigeons were stolen, a report reached me thirty-six hours afterwards that the pigeons were stolen.

1860. And there was a number of articles of wearing-apparel alleged to have been stolen? New clothing.

1861. “Shortly after this there was a robbery at Botany Road, at a boot store kept by a man named Riddle. Constable Brennan saw three men in front of Riddle's shop under rather suspicious circumstances, and he tried to get near them. When he got within about 60 yards of them they ran away; he went after them, and eventually arrested them with the assistance of Special Constable Brewin.” What was the first intimation you had of the arrest of the men there? I was on my duty. The constable who had just left the box, Edwards, was one of my relief, and Constable Brennan was also one of my relief. At 6 o'clock that morning there was parading at the station, Senior-Constable Bourke, Senior-Constable Harrison, and 5 constables.

1862. Give their names? I forget. They are all in the margin there.

1863. Proctor? He was the Station Sergeant. He was to be had if necessary.

1864. Hind? Hind.

1865. Kidd? Kidd.

1866. Archibald, Walker, Guilfoyle, and Vane? They were all in the station waiting for duty if anything was required.

1867. This was at 6 in the morning? Yes, before 6. They generally arrivé there about half-past 5. At 6 o'clock all these men were paraded by the two senior-constables, and were in the station when Constable Brennan was supposed to have taken these three men in with Brewin. Every constable is supposed to know his own duty, as well as myself, by the rules. When all these men marched out on the street for duty, I paraded my relief then at the Redfern Post-office on the public street. I found them all present but Constable Brennan. I marched them in to the station. On arriving in the station I found Constable Brennan there in the charge-room with these three men. The station-hand was behind the desk.

1868. Do you remember who it was? Constable Kidd. And they were all standing there looking at one another. I dismissed my relief and some went away. Constable Bruce left the station, and Constable Edwards went out into the yard; and Special-constable Brewin, the night-watchman, was also in the yard. Constable Brennan then said to me, “When I was coming up the Botany Road, Senior, I saw these three men standing on the footpath.” He never mentioned what place, or any name, where they were standing; but merely said that he saw them standing on the footpath. “When they saw me coming they ran across the road to Chapple-lane.” Chapple-lane is just opposite. “I ran after them and caught them, and asked them what was their game, or words to that effect.” One of them, Conlon, said, “We ran over here to ease ourselves.” I said, “Did you see these men do anything when you first saw them”? He says “No.” I said, “Did you find anything wrong, any robbery, or anything broken into, or anything in the locality that you saw them”? He said, “No.” I said, “Did you find anything thrown about, or anything on them, when you chased them”? He said, “No.” I said, “What did you bring them to the station for, then”? “Well,” he said, “I thought it peculiar that they should run away when they saw me.” “Well,” I said, “the only thing we can do by your information is to take down their names and addresses, as the constable did

Senior-constable
W. E. Quelch.
1 Nov., 1897.

- did not supply any more information." Constable Kidd, Constable Willson, and Constable Guthrie were there present. I said to one man named Murray, "What's your name"? He said, "William Murray." "Where do you live"? He gave an address in Pymont. He said, "Pymont is my proper home; but at present I am staying at Mrs. Bayley's restaurant." His present address was entered down. The other gave his name as Harry Wilson, No. 9 Bunn-street, Ultimo. Then follow the reports entered by Constable Kidd, as given by Constable Brennan at the station. [*Exhibit No. 14.*] "Brought to the station by Constable Brennan at 6 a.m."— [*Interrupted.*]
1869. We do not want that again? No.—"who found them in Chapple-lane, Alexandria, where they had run from Botany Road. They explained that they had been taken short, and ran into the lane to ease themselves. Allowed to go by Senior-constable Quelch."
1870. *Mr. Abigail.*] What page is that? Page 26. The report was entered and timed, "6 a.m.; 25/5/97."
1871. *Mr. Bull.*] Did Brennan, during any portion of the conversation, say anything with regard to his having brought these men to the station at the point of the revolver? Not a word. I would have acted differently if he did.
1872. Did he say that he had used his revolver, or threatened them with it? Not a word.
1873. Did he say that in chasing them he had to throw off his cape so as the more easily to pursue them? Not a word.
1874. And these men were, as a fact, brought before the court, were they not? They were.
1875. The next day? They were brought before the court on the 18th June.
1876. Brennan gave evidence against them? He did.
1877. And you know, from my examination of Brennan, and the production of the depositions, that he said not one word from beginning to end in that deposition about bringing them to the station at the point of the revolver, or pursuing them, and throwing his cape away? Not a word.
1878. Did he, in the Station, challenge the men with having given different names then? Not at all.
1879. To what they did upon the street to him? Not at all.
1880. Did he, in his deposition, give any such evidence? Not a word.
1881. Then, subsequently, I understand, these men were discharged by the Court? They were.
1882. Were they liberated from custody? No.
1883. Meanwhile, I understand, some other robbery had been reported? Some other robbery had been reported shortly after the Botany Road, and they were arrested on that charge at Newtown, and they were committed from Newtown; and the constable that had charge of that was Constable McAtamney. He declined to charge them on the information supplied by Brennan, and then, after that constable refusing, it was Constable Brennan charging.
1884. You are speaking still of the first case? Yes.
1885. McAtamney refused to charge them, and then Brennan charged them, and it resulted in their discharge? Yes.
1886. And they were subsequently charged with some other robbery, and were committed for trial? Yes.
1887. *His Worship.*] Was any one of these three men either of the two that were previously arrested? Not at all.
1888. Neither of those two men previously arrested was one of the three? Not at all.
1889. *Mr. Bull.*] Was any of these second men any one of those two men whom you had inspected in Young-street? Absolutely different.
1890. *His Worship.*] I understood that they were the same two men.
1891. *Mr. Abigail.*] Yes; they gave the same name and address. They gave "Bunn-street" in each instance.
1892. *Mr. Bull.*] However, you say that not one of those three men was either of the two men who were stopped by you in Young-street? No.
1893. *His Worship.*] But you were able to personally identify them in both cases? I was.
1894. *Mr. Bull.*] I will read on in this charge, "They gave their names and addresses, and he took them up to the station where Quelch was. They gave different names and addresses to Quelch, and one of them gave the self-same name that one of the pigeon-stealers gave a few nights previously"? That is not correct.
1895. "Notwithstanding that Quelch released these men. While these men were standing there in the presence of Quelch they actually had on their persons the stolen boots out of Riddle's shop." Riddle's shop at that time had not been reported robbed? No.
1896. Now this is the particular part. "Is this true, "The arresting constable appealed to Quelch to wait until he went back to see if a robbery had been committed"? No.
1897. "But he refused to do so because, as I think I will show, Quelch was in league with these men"? No such report was ever made.
1898. And is there a scrap of truth in any such insinuation? No; the constable in his deposition swears that he never saw any property on the man.
1899. "He refused to do so"? That is utterly untrue.
1900. "Quelch was in league with these men, whom he twice saved from the clutches of the law." You swear that they were not the same men? Not at all. Different men altogether.
1901. *His Worship.*] And you had no previous knowledge of them? No. If the constable reported one iota of what he says here I should most decidedly have gone down myself.
1902. *Mr. Abigail.*] Of course we are always wiser after the event.
1903. *Mr. Bull.*] In any conversation that Brennan had with you at the station, or with anybody else whilst you were there, did he make any reference to the circumstance that he heard a grating sound or noise in the vicinity of where these men were? He never uttered such a word.
1904. You say that is an afterthought by Brennan? It is an afterthought, and I am certain the constable in the Station would never let them go himself if ever such a word was used.
1905. You mean Kidd? Yes.
1906. "A couple of nights afterwards the same three men committed a burglary at Cohen's jewellery shop, King-street, Newtown, or rather two of them did." Yes, that is the case.
1907. Well, now, it is quite true that different reports were sent in to the Inspector-General of Police, or Superintendent, on some complaint made by Brennan? It was.
1908. You heard me read on Friday a report of Superintendent Read's? I did.
1909. Dated May? Yes.

Senior-
constable
W. E. Quelch.
1 Nov., 1897.

1910. You remember that in that report, on the very last page of it, the Superintendent refers to the withdrawal by you of some statement which you make in contradiction? Yes.
1911. Was that report read to Brennan in your presence? It was, by Inspector Lawless.
1912. And you heard me read a minute or short letter of Mr. Lawless' appended to that? I did.
1913. On the recommendation of Mr. Read, did you, as a fact, withdraw? I did.
1914. And did you hear Mr. Lawless read what I asked Brennan whether it was read in his presence—that note signed by Mr. Lawless? Mr. Lawless asked the pair of us whether we were both contented with the minute of the Superintendent, as he had to report having read the minute to us, and I said —. [*Interrupted.*]
1915. You were both together? We were both present.
1916. Always? Always.
1917. Whenever any matter arose with regard to these transactions or proceedings? I said, "If that is the wish of the Superintendent I ought to abide by the wish of the Superintendent." I said, "I am quite satisfied for myself," as for Constable Brennan, he could answer for himself.
1918. And the matter in that way was withdrawn? Withdrawn.
1919. And it really wound up with the intimation or note of Inspector Lawless? Yes.
1920. That is how the matter terminated? Yes.
1921. But it is a fact, is it not, that in that matter of complaint, your report, your statement of what took place was substantiated by several of the police officers? Yes, Kidd, Willson, and Guthrie. In the second deposition of the constable you will see where a question is asked by one of the prisoners of Constable Brennan—prisoner Conlon—and you will see his reply there as to the first deposition and the second deposition. One of the prisoners himself noticed the discrepancy.
1922. You mean his attention was drawn by Conlon to the fact that he was swearing differently to what he had sworn in the other case? Yes, and you will see Brennan's reply.
1923. Conlon asked him this question [*Exhibit No. 12*]: "Is that the same statement you gave before?" That is the question by the prisoner Conlon.
1924. And that had relation to the evidence immediately preceding that which I will read [*Exhibit No. 12*]: "I had passed the shop window at 4.15 a.m., the window was then intact. I told the senior-constable what had happened; I have since seen the window; the lower corner of one of the panes was sufficiently broken to allow of the property being removed"? Yes.
1925. Then immediately follows this question by Conlon, "Is that the same statement you gave before?" Yes.
1926. *Mr. Abigail.*] And what is Brennan's reply?
1927. *Mr. Bull.*] "It is the same." [*Exhibit No. 12.*] I have read this deposition, in the first case, right through to Brennan; your worship may take judicial notice or cognisance of the fact that there is no such statement or fact mentioned by Brennan in the first deposition; I will read it again if you like; he admits that he forgot to mention it.
1928. *Mr. Abigail.*] Your Worship will also take judicial cognizance of this fact that everything a witness says in the box is not always taken down in depositions, especially where they are written, and not typewritten.
1929. *Mr. Bull.*] I do not think that assists my friend much in this matter, because the officer says he forgot to mention it. [*To witness.*] Now, I take it that you have a very general knowledge of these Rules and Regulations? Yes.
1930. And I see that, in addition to the Rules and Regulations contained in the book there are Special Regulations or Hints to Police engaged in Detecting Offenders, dated Sydney, October, 1895? That was issued by the Inspector-General, and served out to every officer of the Police.
1931. And in this matter, and in all matters which come under your notice as a Police officer you exercise the best discretion you can? I do.
1932. I notice there is one here which is not usually credited to the Police Department. "All suspected persons should be treated with consideration; any unnecessary or excessive violence to be carefully avoided. Their possible innocence should be kept in view." That is not generally credited to the Police Force.
1933. *Mr. Abigail.*] Perhaps that is why three suspected burglars were allowed to go.
1934. *His Worship.*] It is a matter of discretion with the officer.
1935. *Mr. Bull.*] They could not possibly be suspected of a burglary which had not taken place.
1936. *Mr. Abigail.*] You must not think that that is an isolated case. When you come to string together a lot of these coincidences you are drawn to the extremity of saying that this person is guilty of—remarkable coincidences.
1937. *His Worship.*] Would you wish to see a man convicted merely on coincidences?
1938. *Mr. Abigail.*] No.
1939. *Mr. Bull.*] That is not my friend's case. The gist, after all, of this charge, is not so much that Quelch was careless, but that Quelch was a companion of these men, that he shut his eyes to a burglary, and because he knew these men were going to commit another burglary, in which he was to participate, he let them go—in fact the furniture in his house and his wife's maintenance is said to be obtained from the same source.
1940. *Mr. Abigail.*] We do not say "from the same source." We say from "Myall House" and other places, and getting money that should be paid to the Government for compensating him for the destruction of police uniform. He will be an acrobat if he can push through this cloud of suspicion.
1941. *Mr. Bull* (*To witness.*)] In last September, did you give evidence at Wagga Wagga? No; that is a remark by Judge Cohen.
1942. Is there anything that you want now in addition to what I have just asked you? No.
1943. *Mr. Abigail.*] Take this pigeon-case. You say you accosted these two men—not three—in Young Lane? No, at the corner of Young and Redfern Streets.
1944. And it was while you were engaged in conversation with them that the other constable, who was in pursuit of them came up? He came round Telopea-street corner.
1945. But you already had them, and were conversing with them? Yes.
1946. So that what passed between you and these two men before Bruce came up, of course, nobody had any opportunity of knowing except the three of you? No.
1947. Thinking they were perfectly innocent? I did.

Senior-
constable
W. E. Quelch.
1 Nov., 1897.

1948. And then, after letting them go, you proceeded up the street, and when you found the bag of pigeons, you immediately gave instructions to Constable Bruce to go one way while you went the other, with what object? If it laid in my power to question them, and see if they would admit that they had them.
1949. Was it not your object to arrest these men? No.
1950. Why did you send Bruce one way and you go the other? To get the men.
1951. When you had them in custody then you would put questions to them about this bag of pigeons? I would not have them in custody.
1952. That is, under detention? Yes.
1953. It is a distinction without a difference. Then, when you allowed these men to go, prior to finding these pigeons, you had some suspicion? No.
1954. But immediately you found these pigeons you did have a suspicion? I did have a certain amount of suspicion, it is true.
1955. It was only a few days after that that these men were brought, as we say, to the station? Yes.
1956. Having had that suspicion in your mind about the pigeons, did it not strike you that those were the same men, particularly as one of them had given the same name and address? But he did not do anything of the sort.
1957. Did you have no suspicion that they were the same men? No.
1958. Why did you go out of the station into the yard and interview Constable Bruce? I did not go into the yard. I called him back.
1959. Why did you, if you had no suspicion that they were identically the same persons, call Bruce back, and, on your own admission, take out the bag to him that had contained the pigeons? Had not Constable Bruce seen the bag before?
1960. I am asking you this, if you had no suspicion that two of the three men who were brought in by Brennan were identical with the two men whom you suspected with reference to the pigeon case, why did you interview Bruce at all—because Bruce was the man who knew about the pigeon case? Most decidedly it was my duty to make a thorough investigation to see if I could in any way connect them before I let them go.
1961. Is it not a fact that you did suspect them? I did not suspect either one of them of anything because nothing was reported then.
1962. Why did you not call any other constable in? Because there was not any other constable present.
1963. Did you not say there were five or six constables there? Not at all. I do not know what you are driving at.
1964. *His Worship.*] I do not know what you are driving at either. He naturally called Bruce because Bruce knew the two men.
1965. *Mr. Abigail.*] He will not admit that. I want to make out that he knew they were the same, and he will not admit that? Of course, they were not the same men, and Constable Bruce said so.
1966. Why did you think it necessary to call him at all? It was my duty to do it before I let them go.
1967. Why did not you call Guthrie, Hind, Willson, and the others? What was the good of calling those men, when they had never seen the two previous men?
1968. Is not that what I am trying to draw out of you, the admission that you will never give me?
1969. *Mr. Bull.*] My friend has no right to say that.
1970. *Mr. Abigail.*] My friend has no right to interfere. I ask your Worship to protect me from his interference and objections.
1971. *Mr. Bull.*] I say, why did you not ask him straightforwardly that question instead of getting it in a roundabout way?
1972. *His Worship.*] He called Bruce, because Bruce was the man who had seen the other men. (*To witness*): Had you any idea that they might be the other men? I had no idea. I simply called him in to see if he could identify them as being the only constable that saw those other two men. Naturally I called him to see if he could possibly identify them, and he said, "No, nothing like them."
1973. *Mr. Abigail.*] I want you to give me a direct answer to my question. I have asked you this: When these three men came in you say you had no suspicion that two of the three had any identity with the two men in the pigeon case? I was not there, in the station, when they came in.
1974. When you got them? I was not there when they came in.
1975. When you called Bruce in—why did you, of all policemen in the world, call Bruce in? Because he was the only other officer that saw those two men, and it was my duty to see, if possible, if he could identify them with the two men he saw on his beat.
1976. Therefore, am I not justified in drawing this deduction from your evidence that, before you called Bruce in, and what prompted you to call him in was the fact that you, in your own mind, had an idea that two of the three were identical with the pigeon stealers? Not at all. It was my duty as senior officer there to do all that lay in my power.
1977. And to see if two of those men were the two who had those pigeons? Not at all.
1978. *His Worship.*] Had you an idea that they might possibly be the other two men? I had an idea that they might be, but that was all. It was only an idea of my own.
1979. *Mr. Abigail.*] You say they were not in any way the same men, but I am going to show that you thought they were.
1980. *His Worship.*] You called Bruce in order to be certain that they were not the same two men? Yes.
1981. *Mr. Abigail.*] You did not know these men? No.
1982. They had tight clothes? Yes.
1983. They did not appear to have anything on them? No.
1984. Did you look to see? Surely —. [*Interrupted.*]
1985. Never mind? I said in the first instance —. [*Interrupted.*]
1986. I am not asking "in the first instance." I say, "When Brennan brought these men did you search them to see if they had any property in their possession they could not account for?" No.
1987. Did you give any instructions to search them? No.
1988. Is not that the usual custom when people are accused? They were not accused.
1989. Why, when Constable Brennan asked you to send down and see if anything had occurred —. [*Interrupted.*] He did nothing of the sort. 1990.

Senior-
constable
W. E. Quelch.
1 Nov., 1897.

1990. You deny the major part of what Constable Brennan says he said to you at the station? I deny the whole of it.
1991. Constable Edwards is a constable who has been under your command? Yes.
1992. And he is the constable who was working with you in these publican cases? Yes.
1993. And you see he says that Constable Brennan did say these things to you? I think he is going by something that he has read, because I should have called upon him for a report.
1994. You say the men did not give you different addresses? Most decidedly.
1995. Even you yourself to-day said they had? No.
1996. In one case one of the men said he lived at Pymont? Yes.
1997. Conlon? No, Murray.
1998. He said he lived at Pymont? Yes.
1999. And then afterwards he said he lived at Mrs. Bayley's Restaurant? Yes.
2000. Surely that would arouse suspicion in your mind? No. The man clearly explained it.
2001. That was a clear explanation? Quite so.
2002. Do you still adhere to the statement in your report. Evidently the Superintendent allows language like this to be used to him. In your report you say. [*Exhibit No. 8.*] "The constable's report is a tissue of lies from beginning to end?" Quite so.
2003. How can it be a "tissue of lies" when you yourself bear out a good deal of it? Is it not a fact that the men were brought to the station? Yes.
2004. And that you let them go? Yes.
2005. Is that a "tissue of lies"—do you still say it is "a tissue of lies," notwithstanding the evidence you have heard from Constable Edwards? I do say that it is a tissue of lies.
2006. So that not only is Bruce a liar, but it follows now from your report that Edwards is a liar also? Quite so.
2007. Now, you do give some motive for the lie on the part of Brennan, but what motive has Edwards for telling a lie against you? I tell you my reason. I asked him at the time whether he heard any conversation in connection with these men. He said, "No, senior. I heard that there was a conversation going on; but I was out in the yard, and I did not hear it." If he had said he heard it, I should have called upon him for a report the same as I did the others.
2008. So that, in your mind, is a sufficient reason for Constable Edwards telling a lie. Is not Edwards on perfectly good terms with you? Most decidedly.
2009. Have you ever known him to do anything or say anything which would impress you with falsehood on his part? The man has admitted to me that he spoke against me once. I can be no fairer than that.
2010. From your own observation of him, your own experience of him as his senior-constable, is he not a witness of truth? I believe he is, but I think he is mistaken in this case.
2011. You say he is telling a wilful lie?
2012. *Mr. Bull.*] I think he said that the witness was confused in this matter from something he has read? If you recall the constable and ask him whether he did not ask me whether he was down in this case.
2013. *Mr. Abigail.*] Did you say that Senior-constables Burke and Harrison were standing by and not dealing with these persons? They were all in the station.
2014. Were they dismissed? They were returning out for duty.
2015. They were dismissed at the station for duty? Yes.
2016. And you were coming in with your relief? Afterwards.
2017. Why, if it was their duty to deal with Brennan and his three prisoners, did you take upon yourself to do it? It was Constable Brennan's own duty.
2018. Why, if it was their duty to deal with Brennan and his three prisoners, did you take it upon yourself to do that? What could I do with it when he reported it to me when I came to the station?
2019. Why did not you report it to the senior-serjeant? He was in bed.
2020. In the Occurrence Book you have entered up the description of the alleged pigeon-stealers? Yes.
2021. Why did not you also enter up the addresses they gave you? I did not enter the Occurrence Book.
2022. You signed it, did you not? The Occurrence Book?
2023. Yes? No.
2024. The Rough Occurrence Book? No.
2025. The Rough Information Book? Yes, I entered that.
2026. Why did not you then enter, not only the names, but the addresses which those men gave you? I did.
2027. Will you turn it up and show me? Most decidedly. [*Exhibit No. 18.*] [*Showed book, page 251, to Mr. Abigail.*] There is the full address.
2028. Well then, as you did enter the addresses, you see the second man, Wilkinson, gave his address as Pymont, and one of the three men in Brennan's case, in Riddle's case, also gave his address as Pymont. Did not that arouse your suspicion? No. If he were to give the same address it would.
2029. You see, Page gave his address as Bunn-street? Yes.
2030. Did not one of these three men give his address as Bunn-street? Yes; but not the same number.
2031. You see, there is Bunn-street in both cases, and Pymont in both cases? Pymont is a big place.
2032. Australia is a big place, too. Bunn-street is a peculiar name, is it not? Yes.
2033. Did not the peculiarity arouse your inquisitiveness? Not at all.
2034. Your curiosity? Not at all.
2035. And did not arouse your suspicion? Not at all.
2036. And you are a senior-constable in the police? Yes.
2037. You see, one of them gave his name as Harry Wilson, and one as William Wilkinson? Yes.
2038. You see the similarity in the names? But Wilkinson was not his name.
2039. You found out that was a wrong name? I found out that in the last case.
2040. What was his right name? "Burton" was what he was tried on.
2041. As a matter of fact, you know that when they were charged on that Cohen case, in King-street, Newtown, it was found that they had Riddle's boots on them? No.
2042. Was it not found that they went to Liverpool-street, City, and sold some of the stuff? That was some time afterwards. I do not know what they did afterwards.

Senior-
constable
W. E. Quelch
1 Nov., 1897.

2043. *Mr. Bull.*] I may say I was under the impression that the boots those men wore were what were stolen? The boots were stolen from a second-hand shop, and he values them at £3. Three pairs of ladies' boots and several pairs of boys' boots, which would make a good sized bundle.
2044. *Mr. Abigail.*] But they were sold the same morning? I do not know when they were sold.
2045. Do you not know fairly well, and was it not freely and fully discussed amongst you and others at the station that those boots, the proceeds of that robbery, were sold in Liverpool-street the same morning that you let those men go? I do not know. You will find in the first deposition of the constable where they were sold. There was no evidence that they were ever discovered.
2046. But you know it was discussed in the station that these things were sold in Liverpool-street? A month afterwards.
2047. But on the morning that you let them go? No.
2048. How could it be a month afterwards when they were arrested a few days afterwards? Yes.
2049. They were arrested two or three days after you let them go, and they were never after released, and are still doing time in gaol, so how could they have sold these things a month afterwards? I never said that.
2050. *Mr. Bull.*] He said a month after there was some discussion amongst the police about that? They were brought before the court and discharged, and then no property was discovered.
2051. *Mr. Abigail.*] This minute of 4th June, which Mr. Lawless made out after seeing you and Brennan, and asking you if you were satisfied with the suggestion of Superintendent Read [*Exhibit 8*], was it ever shown to you? The inspector's minute was not shown to me, as far as I can recollect, but the intention of it was explained to us what would be on it.
2052. But it was never shown to you, was it? The Superintendent's minute was read to the pair of us, and Inspector Lawless asked us whether we were satisfied as he would have to report to the Superintendent if we were satisfied, and that would be the contention of the minute he would have to send down.
2053. After Mr. Lawless wrote out his reply to the Superintendent's minute, that was not shown to you. It would not be, would it, in the ordinary course of things? I cannot recollect whether it was or not.
2054. Was it shown to Brennan in your presence? All documents in connection with the case were read to me and Brennan personally.
2055. After all those documents were read you were asked whether you were satisfied, and then Inspector Lawless sent all the papers back with his report on, but did not show you his report? I cannot recollect it.
2056. He would not, in the ordinary course, would he? He might in some cases, where there was a pair of us, have read it to see if we were satisfied.
2057. As Brennan has sworn that he did not read it, you will say, I suppose, that he did not? I do not know about that.
2058. Did you know that your inspector sent this report in dated 3rd June, 1897 [*Exhibit 8*]? "In forwarding the attached reply of Constable Brennan, after his perusal of the several statements of Senior-constable Quelch and Constables Willson, Kidd, and Guthrie, I beg to state that I have read the depositions taken at the hearing of the case against these men. In them no mention is made of Brennan having heard a noise as of scratching or trying any window. Constable Brennan seems to be of a nervous temperament, and, being anxious to do his duty, 'never having had a case of this kind before,' no doubt became excited, and neglected to tell the senior-constable the whole particulars, although he insists that he did." Was this report of Inspector Lawless, of 3rd June, 1897, in which this occurs, shown to you? He would swear it was. It may have been.
2059. Now, when these men were charged on Brennan's information with this robbery at Riddle's, why did not you, as senior-constable, you having had some of the facts before you, on your own admission, assist in the prosecution? I knew nothing at all about them being charged.
2060. You knew the men had come there to the station with Brennan? Not at all. I was not on duty when he charged them.
2061. Will you kindly listen to me, and then you will not make these blundering mistakes? There is no mistake about it.
2062. When Brennan charged these men with the Riddle burglary, I ask you why you did not assist Brennan with the prosecution? You say you did not know these men were brought into the station by Brennan. Were not you in the station when Brennan brought these men in and wanted you to detain them? When he did not want me to detain them. I went into the station and I found Constable Brennan there, and he never requested me to detain them.
2063. You know that Brennan brought these men, and you had taken down the addresses? Yes.
2064. Why did you not assist Brennan in the prosecution of that case, and give evidence of that fact? I was quite willing if he called me.
2065. As senior-constable why did not you suggest it to him? I did not suggest anything.
2066. Is it not your duty, if you have a piece of evidence which is material to the issue and is evidence of guilt, to either acquaint your Superintendent or to volunteer it yourself? I knew no evidence of guilt to give.
2067. Was not this fact material, and did not you know it as a senior-constable, that, if a man comes into the station and gives two addresses to you within the space of five minutes of each other, that fact is material and ought to be given in evidence? It came out in the evidence of the constable himself.
2068. Then I want to know this, too, about the withdrawal of this complaint which you say you made against Brennan's complaint that it was sent on wilfully and maliciously? I did most decidedly.
2069. And said it was a tissue of lies? Yes.
2070. And, notwithstanding that, you withdrew it? On the suggestion of the Superintendent.
2071. Although you knew it to be a tissue of lies? But it was not a tissue of lies that he brought them to the station; but what he says he reported was a tissue of lies.
2072. You used those words in the sense that it was maliciously made to injure you? Yes.
2073. And notwithstanding that fact, instead of your probing it to the last extremity, and showing this man to be a liar, you agreed to withdraw it? At the suggestion of my Superintendent.
2074. *His Worship.*] They were both withdrawn.
2075. *Mr. Abigail.*] No; there was an end of it.
2076. *His Worship.*] There must have been.
2077. *Mr. Abigail.*] Brennan's was explained, not withdrawn.

2078. *His Worship.*] It would be tantamount to withdrawing it.
2079. *Mr. Abigail.*] You withdrew yours; but Brennan did not withdraw his? I think the constable's report here substantiates my action.
2080. But Brennan went right through until he got a decision? Yes.
2081. And he was asked was he satisfied with that decision? Yes.
2082. And was he satisfied with that decision? Yes.
2083. And were you satisfied with it, and did you withdraw your letter? Yes.
2084. There was no withdrawal in Brennan's case? There was no need to withdraw it. I think I showed very clearly the constable neglected his duty.
2085. Do you remember calling Constable Kidd and Constable Guthrie into the station to make reports? It was the inspector did it.
2086. It was in the early hours of the morning, was it not? It was, with two of them.
2087. How early was it? Three o'clock.
2088. Now, did not you bring them in and say to them, "Well, you are better here than out in the street; take your own time and write out your reports"? Not at all.
2089. And did not you see the reports as they were being written? No.
2090. And did not you all have a chat about the addresses that these men gave? Not at all. The books were there. They went into the magistrates' room and wrote out their reports while I was in the lock-up and out in the street.
2091. The reports were not required until the next day? They gave them to the officer in the station, not me.
2092. There was no need to take them off duty to write out reports? The constables were ordered off duty.
2093. You called them in? The inspector gave orders.
2094. You called them in, did not you? Yes, I did.
2095. You say that Inspector Lawless, at 3 o'clock, ordered you to call them in? He ordered me before he went home.
2096. Will you swear that Inspector Lawless was there at all? I will swear he is never there at 3 o'clock in the morning.
2097. I am asking did he that morning, at 3 o'clock, give you instructions? He gave me orders before he went home at night.
2098. What time was that? 12 o'clock.
2099. Why did not you call them in then? Because it would be disobeying my inspector's orders. He told me to bring them in in the early hours of the morning, when all was quiet.
2100. Why did you bring them in at 3? The constables were to go off duty then.
2101. Did not you bring them in when nobody was in the station so that the three of you could put your heads together and concoct a report? No. There were the reserve constables in the station, and I was out in the street part of the time.
2102. Did not the inspector give these instructions, pure and simple, that they were to have their reports ready by 10 a.m. the following morning? Not that I am aware of.
2103. Did he personally give the constables those instructions? I do not know what he gave the constables.
2104. Did not you call them in at 3 a.m. because there were fewer constables about and you had less chance of being interfered with? There are never no constables in the station after 10 o'clock at night. There are only just the station hands there—just the constables passing in and out to report every hour and a half.
2105. You never called upon Night-watchman Brewin to make a report? Me?
2106. Yes? What of?
2107. Of what was said at the station? He was there? He was in the yard; he was not in the station.
2108. You heard him say he was at the station? He was not.
2109. Did you call upon him? Why should I call upon a civilian?
2110. Did you call upon him to report? No, decidedly I did not.
2111. Have not you been interesting yourself in Brewin's case? Which case?
2112. Have not you been going round to the people who employ Brewin and telling them observations, yarns, imputing all sorts of guilty conduct on Brewin's part? I have not been going round to people. I have done my duty as a police officer, and I have entered anything (that has happened) in the book, and other officers the same.
2113. Have not you in five or six instances told these people who employ Brewin that there was no need to employ a night-watchman at all, the police could do it? Have you not said that? I think the police can do their duty.
2114. *His Worship.*] Have you or have you not? No. I did speak to one gentleman, I will tell you.
2115. *Mr. Abigail.*] Who was the gentleman? Mr. Thomas Flynn, the butcher.
2116. Do you say that Flynn gave Brewin a bad character? I did not say anything at all about a bad character.
2117. You insinuated that he was a bad character? I said I caught his employee robbing him, and Brewin was in his company.
2118. You told Flynn that? I did.
2119. Flynn holds Brewin in the highest esteem? Flynn discharged him. He swears it here himself.
2120. Was it with that object? I do not know.
2121. Do you not know that Flynn holds him in the highest esteem? I do not know what Flynn holds him in.
2122. Has he not told you that? No.
2123. Has not Flynn told you this—. [*Interrupted.*] No.
2124. You see, you say "No" before the question is put to you. You have such a habit of negating every question I put to you. He says Flynn told you that he disbelieved you when you told him that you caught Brewin with Flynn's employee? I never heard such a word in my life.
2125. Do you deliberately say that you did not know anything of these three men? I do.
2126. Nor the two pigeon-stealers? Not one of them.
2127. Never saw them before? Never saw them in my life before.
2128. I see you say it is a common thing to see people at that time running to keep themselves warm? Running to their employment.

Senior.
constable
W. E. Quelch.
1 Nov., 1897.

- Senior-constable W. E. Quelch. 1 Nov., 1897.
2129. This is your report [*Exhibit No. 8*]: "The men replied that they were going to the market, and were late, and were running to keep themselves warm, which is a frequent thing to see at this period of the year"? Yes, quite right.
2130. So that you mean to say that at that period of the year, 7th May, it is a frequent thing to see people at an early hour of the morning running to keep themselves warm, and that you, as a senior-constable, were satisfied with that explanation, that they were "running to keep themselves warm"? I see plenty of people from 4 right up to half-past 6 running along the main street, not lanes; I never saw these people at all.
2131. Not in the lane? No.
2132. You saw them at Teloopa-street? Yes.
2133. And you were satisfied with the explanation that they were running to keep themselves warm? Most decidedly; you will see plenty of Mr. McMahan's men running to keep warm.
2134. *Mr. Bull.*] You heard me asking Brewin, and you heard his statement; was it a fact that in the morning mentioned in the entry I read to him, you found an employee of Mr. Flynn's leaving the place, Brewin being in his company, with a lot of goods in his possession belonging to Mr. Flynn? Yes.
2135. And that entry which I have read is absolutely a true statement of what you saw, and what took place? Yes.

Constable Archibald Kidd was called and sworn:—

- Constable Archd. Kidd. 1 Nov., 1897.
2136. *His Worship.*] What is your name? Archibald Kidd.
2137. What are you? Constable.
2138. Stationed where? Redfern.
2139. *Mr. Bull.*] How long have you been in the Force? A little over eight years.
2140. And during all that time have you been stationed at Redfern? Yes.
2141. Do you remember the 26th May last? Yes.
2142. Were you on duty at the Redfern Station at 6 that morning? I was.
2143. Do you remember Constable Brennan bringing three young men in there? Yes.
2144. Brennan made some statement with regard to where he had seen these three men? Yes.
2145. Did he, in any statement which he made in your presence, say that he had heard a grating noise over where he had seen these three young men run from? No.
2146. Did he say that he had chased the three men and in running, pursuing them, throw off his cape so as all the more easily or readily to pursue them? No.
2147. Did he say that he had used his revolver and had brought them to the Police Station at the point of his revolver? No, he never mentioned his revolver.
2148. Do you remember Senior-constable Quelch asking Brennan any questions? Yes.
2149. What, so far as you can remember, took place between Quelch and Brennan? Senior-constable Quelch asked them what they were doing. Before that Brennan had made a statement. He said, "Senior, I saw these three men run up a lane off Botany Road, and I followed them up." He said, "I thought it was suspicious."
2150. That is, the circumstance of their running? Yes—"so I brought them to the station," and then—
[*Interrupted.*]
2151. Do you remember who, at that time, were in the station? The relief just going off. There were four or five there.
2152. Constable Willson? He was there.
2153. Guthrie? Yes.
2154. Bruce? Yes.
2155. Do you remember the Senior-constable asking Brennan with regard to what observation he had made before he brought them into the station; I mean of the premises or place in the vicinity of where the men were, where he saw them run from? I hardly understand the question.
2156. Do you remember Senior-constable Quelch asking Brennan if he had noticed anything suspicious in the vicinity of where he saw the men start from? Yes, he asked him if he had seen them do anything and he said "No."
2157. Do you remember his asking Brennan whether he had looked round where he saw them? Yes.
2158. What did he say to that? "Yes." He said he had looked round.
2159. You made a report, did you not? You made your report, of course, from your recollection of what had taken place? Yes.
2160. Who wrote the report for the Occurrence Book? I did.
2161. Did you take that down from the statements made by Brennan? Yes.
2162. *His Worship.*] At the time? Yes.
2163. *Mr. Bull.*] If he had made such a statement that he had heard a grating noise in the vicinity of the place where these men were before he saw them start to run, would that have escaped your observation? Oh, not at all.
2164. If he had said that he had brought them to the station at the point of the revolver, and that he had chased them and thrown away his cape, would that or any one of these things have escaped your attention? No.
2165. Did he say this at the station when the men gave their names; in your presence did he rebuke any one of them for giving different names to what they had given when in the street? No.
2166. Did he, as a fact, say to you or Quelch: "These men are giving different names to what they gave me in the street"? No.
2167. Did he, from first to last, say that he had asked the men their names? No; he never mentioned it.
2168. He had simply seen them run, and chased them, and brought them to the station, because he thought that circumstance of their running was suspicious—is that so? Yes.
2169. And you made this entry on page 26 [*Exhibit No. 14*]: "James Conlon, 111 Cooper-street, Waterloo; William Murray, Mrs. Bayley's restaurant, Liverpool-street, City; Harry Wilson, 9, Bunn-street, Ultimo. Brought to station by Constable Brennan at 6 a.m., 26th, who found them in Chapple-lane, Alexandria, where they had run from Botany Road; they explained that one of them had been taken short and run into the lane to ease himself. Allowed to go by S.-C. Quelch." This is the entry you made? Yes.
2170. *Mr. Abigail.*] You say you put down everything in the Rough Occurrence Book as it was said by Brennan? No, not everything that was said.
- 2171.

2171. You did not take down everything that was said? Supposing one of these men had given two addresses, would that have escaped your attention? No, they did not.
2172. Did not one man say he lived at Pymont? There is the address in the book.
2173. And then did he not subsequently say he lived at Mrs. Bayley's restaurant? No. He did not say that.
2174. You see how wrong you are; for others, Quelch included, admit that that was said, and you say it was not said; so that you see something of importance did escape your attention? I do not remember it.
2175. You will admit that is an important thing, where a man brought into the station by a constable gives two addresses? You were making the entry in the Rough Occurrence Book, and you missed that most material and important fact? I would not notice it at the time.
2176. *His Worship.*] He would naturally put down the correct address.
2177. *Mr. Abigail.*] He says he put all down? No, I did not.
2178. Now he says he did not.
2179. *His Worship.*] It is not an important matter? There was so little thought about it at the time.
2180. You put down the final address—the correct address? Yes.
2181. There might have been a conversation about the address? There might.
2182. He may have given another address first? He may have.
2183. *Mr. Abigail.*] And I suppose that you will admit that there might have been other things said by Brennan to Quelch that you did not think important enough to take down? There might have been things I did not consider of consequence.
2184. If Brennan had said that he brought them on the point of the revolver you would not have put it down? I should not have put anything down. I would have called the officer in charge of the station.
2185. If Brennan had said that he threw his cape off you would not have put that down? No; I would have called the officer in charge.
2186. Quelch was the officer in charge? No.
2187. He was in charge? He was in charge of the relief.
2188. He was in charge so far as you were concerned? No. He was in charge of the relief.
2189. You allowed him, and you had no option at all in the matter, I presume, to take upon himself the responsibility of hearing the complaint of Brennan, the men's answer, and of discharging them? Yes, as Brennan was in the relief of Senior-constable Quelch. I was not under Senior-constable Quelch.
2190. You had nothing to do with Brennan's charge against these men? I had a lot to do with it. If he had made any charge at all Senior-constable Shaw would have been called.
2191. What I want to know is, what right had Quelch to interfere? As the senior officer over Brennan. If there had been any charge Senior-constable Quelch would not have had any say in the matter.
2192. He had to hear Brennan's complaint, the men's reply, and discharge the men? Yes.
2193. And you only took down what you esteemed to be important? Just their names and addresses for future reference.
2194. If there had been a charge made out, a direct charge of burglary, for instance, you would have taken a full report of it? No; I would not.
2195. Who would? Senior-constable Shaw.
2196. So that, because there was not a direct charge, you only took down in the Rough Occurrence Book these few details? The men's names and addresses.
2197. That is all. And, when you say that Brennan did not say anything about a revolver or about throwing his cape off, you are merely now simply testing your recollection of what was said? I am certain that if there had been anything like that said I would not have had anything to say in the matter, or Quelch either. My duty would have been to call Senior-constable Shaw.
2198. Edwards was there? I think so.
2199. Edwards said that Brennan did say these things. Is it not possible that you might have been mistaken? No.
2200. So that Edwards is wrong, and must be drawing upon his imagination? Yes; it might have been said after.
2201. It was said at the time the men were discharged? No.
2202. Who called upon you for a report in this case? I think it was Inspector Lawless.
2203. Did not Quelch ask you off duty at 3 o'clock one morning? I am not certain. I think it was Mr. Lawless. It was either Mr. Lawless or Senior-constable Shaw.
2204. Were you present when Guthrie made his report? No.
2205. Willson? No.
2206. You were not in the station when they made their reports? No.
2207. Before you sent your report in you showed it to Quelch, did you not? I am not certain. I do not think so.
2208. Would you swear you did not? I do not think I showed it to him at all at any time.
2209. Will you swear you did not? To the best of my knowledge I will swear I did not.
2210. You will not positively swear you did not? I do not believe I did.
2211. *His Worship.*] What report is that?
2212. *Mr. Abigail.*] The report he sent to the Superintendent on the matter [*Exhibit No. 8.*] (*To witness.*) Do you know whether Constable Guthrie or Constable Willson showed their reports to Quelch before they were sent in? I do not know. I did not see any reports that were put in.
2213. Do you know Night-watchman Brewin? Yes.
2214. You have known him some years? Yes.
2215. He bears a good character, does he not? I have heard rumours about him.
2216. But for anything you know, does he not bear a good character? So far as his private character goes, I think it is pretty fair.
2217. I suppose from your observation of Edwards he is a man of truth, is he not? He is not a man who is likely to tell a lie? So far as I know.
2218. A man who ought to be believed? Yes.
2219. And Brewin is a truthful man, is he not? I do not know.
2220. You know nothing against Brewin, do you? Not personally.

- Constable Archd. Kidd.
1 Nov., 1897.
2221. You will admit that in Redfern Station the police have taken sides in this matter against Quelch, some for and some against? Not that I am aware of.
2222. Do you really seriously say that, that you in the station do not know that the constables have taken sides in the Redfern Division? No; I do not. I believe they are saying the truth as far as they know.
2223. Do you not know there are sides taken? There is a bad feeling.
2224. Against Quelch? Certainly.
2225. He is not a popular officer there? No.
2226. *Mr. Bull.*] I object to that. The complaint is not that he is not popular in the Police Force.
2227. Where were you at the time that you were sent for or asked to make this report [*Exhibit No. 8*] ? Were you on duty or off duty? On duty.
2228. Where were you? In the station.
2229. Were you influenced in any sense or way in your report by anything that Quelch said to you? No.
2230. And speaking of Edwards, insinuating nothing against him, do you remember whether he was in the station or outside, out in the yard; what is your recollection? I did not take that much notice; but there were three or four there. I am certain of Constable Bruce. He came in at the time. I took particular notice of him.
2231. And speaking of the man Brewin, you know that he has made reports from time to time at the Police Station of something which he had alleged he had seen? Yes.
2232. Do you know that those things have been investigated by different officers of the police afterwards? Yes.
2233. Do you remember one complaint, or report, of his with regard to Marshall's chemist shop? I do not remember it.
2234. Have you never seen a report in this Observation Book [*Exhibit No. 17*]: "Found open, by Brewin, the shop-side door of Marshall's, Chemist, 97, Regent-street, at 3:50 a.m., 16/3/94. No person resides on the premises; everything appeared correct. QUELCH."
2235. *Mr. Abigail.*] He says he knows nothing about it? I do not remember it.
2236. *Mr. Bull.*] Have you never seen this entry in the Observation Book? How long ago is it?
2237. You know nothing of it? I do not remember it. No doubt, if it was in the Rough Book I should have seen it.
2238. You have heard rumours in regard to this man? Yes.
2239. They are to his discredit? Yes.
2240. *Mr. Abigail.*] I object.
2241. *His Worship.*] I did not object to its being said that Quelch was an unpopular officer.

Constable Charles Willson was called, and sworn:—

- Constable Chas. Wilson.
1 Nov., 1897.
2242. *His Worship.*] What is your name? Charles Wilson.
2243. *Mr. Bull.*] What grade of officer are you? Second-class constable.
2244. Stationed at Redfern? Yes.
2245. How long have you been there? Eleven years, about.
2246. You know Constable Brennan? Yes.
2247. Do you remember the 26th May last, when he brought three men to the station at Redfern? Yes.
2248. Had you been on duty that night? Yes.
2249. When were you going off? Six o'clock in the morning.
2250. Then you would be relieved at 6? Yes.
2251. Do you remember whether Brennan and the men were at the station when you arrived there? Yes, they were.
2252. Were you inside when Brennan made his statement with regard to them? Yes, I was in the Charge Room.
2253. Do you remember Constable Kidd being there? Yes.
2254. From memory, could you tell us what Brennan said with regard to them? I know the senior-constable asked him what he had got the men there for.
2255. What did Brennan say? He said he saw them in the Botany Road, and when they saw him they ran away.
2256. Did Brennan say what he did, whether he followed them, or what? He said he ran after them into Chapple-lane.
2257. Did he say anything, repeat anything that they said, or any reply that they gave to any questions that he asked them as to what they were doing there? He said he asked one of them what they were doing, and he replied that he had only come there to ease himself.
2258. That is, into Chapple Lane? That is, into Chapple-lane.
2259. Did you hear Senior-constable Quelch ask him other questions with regard to what he had seen? I think the senior-constable asked him what they were doing, and asked him if he saw anything wrong. He said, "Did you notice anything wrong about there?" and Brennan replied, "No."
2260. The senior-constable's question to him was whether he had seen anything wrong about there? Whether he had noticed anything amiss or wrong; I could not exactly state the words.
2261. What did the question refer to? I suppose to whether they had been stealing anything.
2262. What was the answer to that? He said not so far as he could see. I believe that was his answer to it.
2263. Do you remember whether he gave any answer that he thought it suspicious they should run away and he brought them up to the station? In the first place he said, "I thought it strange that they ran away on seeing me."
2264. Now, did you see Kidd write down in the Information Book? Yes.
2265. You were then in the lock-up, in the Charge Room? Yes.
2266. Did Brennan, during the whole time that he was there in Quelch's presence, tell Quelch, or say to anybody there that he had heard a grating sound in the vicinity of where these men started to run from? I did not hear him say so.
2267. Could he have said it without you hearing him? He might have done so.
2268. You did not hear him? No.
- 2269.

2269. Did you hear him say that in pursuing them he had to dispossess himself of his cape so as to all the more easily chase them? I did not hear him say it.
2270. Did he say that he had brought them to the Police Station on the point of his revolver, meaning that he had to take out his revolver? I did not hear anything of that.
2271. Supposing all these statements had been made, supposing he had said he heard a grating noise, insinuating, of course, that some premises in the vicinity of where the men had started from had possibly been interfered with, that he had chased the men and got rid of his cape to pursue them the more easily; and brought them to the station at the point of the revolver, what would you have done had you been the officer in charge? I should have detained them.
2272. Was anybody sent for? No, not to my knowledge.
2273. Was there anything said in your presence so far as you could see to justify the detention of these men? Only one thing. One of the men gave two addresses.
2274. Tell us what that was? One of the men gave two addresses. I think it was Brougham-street.
2275. Perhaps it was Bunn-street? Yes. They gave their addresses, and I asked one of them afterwards his address, and he gave a different address. He gave the address "Mrs. Bayley's restaurant, Liverpool-street."
2276. Do you remember Murray giving his address as Bunn-street, Pymont, or Ultimo, and then saying that at that time he was not living there; he was living at Mrs. Bayley's, but Bunn-street was his home when he was there? Yes, that was in answer to Mr. Quelch.
2277. Did Quelch ask Brennan a question as to whether he had seen the men carrying anything? Yes, he did.
2278. And whether everything, so far as he could see, was all right in the locality where the men had started from? Yes.
2279. What was Brennan's reply to that? As far as he could see. It was all right so far as Brennan could see.
2280. You mean everything was all right so far as he could see? Yes.
2281. Do you remember Quelch making any remark with regard to the altered address which Murray gave? I called the senior-constable's attention to the two addresses, and Quelch asked him how it was he gave two different addresses, and then he explained by saying that his proper home was Ultimo, but that he was staying at Mrs. Bayley's restaurant.
2282. You made a report? I had to write a report.
2283. Was that report made at the instance or at the dictation, or any coercion of Quelch? Mr. Lawless asked me to make a report.
2284. Having made it, was that in any sense or way influenced by Quelch? No.
2285. Was it either dictated to you, or were you coerced in any way to make a statement? No.
2286. You made a report dated 29th May. [*Exhibit No. 8.*] Do you remember saying this in the last part of it? "The senior-constable asked them where they lived again. Conlon and Wilson gave the same address, but Murray gave another address, that of Mrs. Bayley's restaurant, Liverpool-street. The senior-constable then said, 'That is not the address you gave just now.' Murray explained that he was only staying at Bayley's, but Bunn-street was his home." That is what you are referring to all along? Yes.
2287. *Mr. Abigail.*] If you had been the officer in charge you would not have been satisfied with the explanation given by this man in the attempt to explain away the fact that he had given a different address when first asked; you would have gone to see for yourself? I should.
2288. And so would most constables I presume? Yes.
2289. Do you remember when Quelch asked Brennan had he seen anything amiss or anything gone wrong, Brennan's suggesting that the men should be detained whilst somebody was told off to go along Botany Road to see if anything was wrong? I do not recollect his saying anything. He might have done so, because I was in conversation with the prisoners a good deal. I knew one of them.
2290. Was he a bad character, the one that you knew? Yes.
2291. Did you tell Quelch that? No. I did not say anything about that.
2292. Why did not you? Because I had left the station then. I did not think I had any business to interfere.
2293. Did you know that Quelch knew him? I think the senior-constable knew him. I think he knew Conlon.
2294. What has been the nature of his convictions? He was up once for rioting some years back.
2295. Can you remember anything else? I think he has been up for small offences.
2296. He is the associate of thieves, is he not? Oh, yes.
2297. And that fact is generally known at the Redfern Police Station, is it not? Well, I believe so, by myself and the old constables.
2298. How old is Conlon? I think he is about three or four, or four or five and twenty.
2299. Well, a man who has been in the Police Force these ten or eleven years should know the character of this man? Yes, but I had not seen him myself for some two or three years.
2300. If you had been taking down in the Occurrence Book what these men had said would you not have made a special note of the fact that one of the men upon being asked, had given two different addresses? Would you not have noted that as an important fact? I do not know whether I should or not.
2301. It is not usual, is it, to enter in the Rough Occurrence Book all that takes place unless a person is detained on arrest—held in custody? Oh, no.
2302. Where people are brought to the station, and asked certain questions, and reply, and are allowed to go, the merest note is taken of the occurrence? Yes.
2303. The officer in charge never goes into details, and never puts into the Rough Occurrence Book all that the constable says he saw and all that the prisoners say? Oh, no.
2304. By the by, when you made that report out, do you remember what time in the morning it was? About half-past 3, I think.
2305. Why did you choose that time in order to make a report out? Well, I was some distance from the station.
2306. At any rate, you got there, you know, about half-past 3? Yes.
2307. Who asked you to come in? The senior-constable told me I had better go in to make the report out.
2308. When you got there you saw Guthrie there making his out? No; he came in after me. 2309.

Constable
Chas. Wilson.
1 Nov., 1897.

- Constable 2309. And then the two of you made out your reports at the same time in the magistrates' room? Yes.
 Chas. Wilson. 2310. When you made them out, what did you do with them? I folded mine up.
 1 Nov., 1897. 2311. And gave it to Quelch? No; I handed it in at the station.
 2312. Where was Quelch when you made these reports out? I could not say.
 2313. Did not you show it to him? No, I do not think so; I do not recollect it.
 2414. I want you to recollect this: Did you not, and did not Guthrie, after you finished your reports, compare them? No.
 2315. And then show them to Quelch? No, we did not.
 2316. You did not compare the reports? No.
 2317. And nobody suggested anything to you in connection with the reports? The only thing that passed between him and me—he is a young hand in the police—he asked me how to start his report.
 2318. Did you keep it up from start to finish? No; I did not.
 2319. You will see at the end of his report it says, “and they were allowed to go.” And the end of yours is, “and they were allowed to depart.” Now, will you be surprised to hear that the two reports exactly correspond, with the exception of a change in a word here and there, “go” and “depart,” “he said” and “it was said”? I did not see his report, and he did not see mine.
 2320. And yet you say, although you assisted him to start his report, you had no other hand in it? No, I did not.
 2321. Now, you see your report says “That on the morning of the 26th instant, when going off duty at 6 a.m., he saw three men,” and his report says, “That on the morning of the 26th instant, when going off duty at 6 a.m., he saw three men.” You see it is word for word? Yes.
 2322. “He heard Senior-constable Quelch ask Constable Brennan,” and “He heard Senior-constable Quelch ask Constable Brennan.” You see, exactly the same words? Yes.
 2323. “What they were up to,” and “what they had been up to.” Then Guthrie's report says, “Constable Brennan replied that I saw them in the Botany Road, and when they saw me they ran up Chapple-lane,” and your report says, “Constable Brennan replied I saw them in the Botany Road, and when they saw me they ran away up Chapple-lane,” and that peculiar correspondence in the reports you see goes right through. Now, will you, upon that being pointed out to you, undertake to swear that you and Guthrie did not compile these reports so that you would get your facts to correspond particularly? Now, is not that a fact? I tell you once again Guthrie never saw my report.
 2324. Now, did you tell him how to do his? I told him how to do his.
 2325. And you read from yours, telling him what was in yours, so that he could copy it down and put it in his? No, I did not.
 2326. Now, is not one a copy of the other? It is something like it.
 2327. It is the exact, self-same choice of language, and you want to say that the peculiar particularity in the choice of language is a mere matter of coincidence? Well, Guthrie was in the station the same as I, and he heard word for word the same as I what was said.
 2328. And, from the mere fact that he and you were sitting in the same room on the same work, you want us to infer that it is merely accidental that in his report the same words and the same phrases are used as you used in yours? I tell you what we did do—before we wrote the report out we talked it over.
 2329. *His Worship.*] And wrote a draft? Yes.
 2330. *Mr. Abigail.*] So that you will admit that it was talked over first? Yes.
 2331. Now did not Quelch come in and talk it over too? No, he did not.
 2332. Was not he in there at all? He came in and looked at us once, and asked us, “How much longer are you going to be, Willson?” I said I had finished my report and young Guthrie had not quite finished his.
 2333. But did not he ask Guthrie how long he was going to be? No; he spoke to me.
 2334. *His Worship.*] Guthrie was a new hand and did not understand that sort of thing? No.
 2335. That explains the whole thing. I can understand their making out a draft, and the young man, being inexperienced, copying it.
 2336. *Mr. Abigail.*] And Quelch inspected it? Inspected what?
 2337. Inspected your report, told you what was wanted? No, he did not.
 2338. Did not he give you a hint of what would be serviceable to him? He did not.
 2339. And what ought to be put in the report? No, he did not.
 2340. Did not Quelch tell you what was in his report? No, he did not.
 2341. And did he not suggest to you what ought to be in yours to corroborate his? He did not.
 2342. Did you have the Rough Occurrence Book to read? I looked in the Occurrence Book.
 2343. Who brought it to you? I took it out of the rack.
 2344. Did you show it to Guthrie? No, I did not.
 2345. Did not you ask Quelch what address these men had given. Did not you say, “I forget the address, what addresses did they give”? No, I did not.
 2346. Where did you leave your reports? Left them at the station.
 2347. Whom did you give them to or where did you put them? I think they were put in the desk.
 2348. Who was there? Constable Kidd.
 2349. And who else? I do not think there was anyone else there.
 2350. Was not Quelch there? That question I could not answer. I am not sure.
 2351. He came in and asked you to hurry up and you said you were finished? Yes.
 2352. Did you happen to know that Quelch had made his report out before or after yours? I did not know.
 2353. You were not told? No.
 2354. Did not you know that Quelch had made out his report on the 28th, a few minutes before midnight, and were you not called in at 3 o'clock in the morning of the 29th, and did not you hand your reports to Quelch? No; I did not know up till now that he had made a report out.
 2355. Surely you do not expect me to believe that? I did not.
 2356. Although this was a complaint against him personally for misconduct or some dereliction of duty, you did not know? I did not know what it was, I was simply asked by Mr. Lawless to make out a report of what I had heard take place in the station on the morning of the 26th.
 2357. *Mr. Abigail.*] What time did you go off duty on the 29th? Six o'clock.
 2358. While you were making your report out you were not on duty? No.

2359. Did not Quelch say, "Come on inside. It is far better to be making out reports than on duty in the streets?" No; he did not.
2360. *Mr. Bull.*] There is nothing, is there, in the insinuation that these reports of yours and Guthrie's were doctored, or in any sense or way influenced by Quelch? Not the slightest. While I was making my report out I only saw the senior-constable once, and we were a long time over it.
2361. Do you not know that Quelch himself was on duty in the streets on that morning up till 6? I believe so. I am not quite sure.
2362. Did you ever tell anybody that Quelch had influenced you in this report of yours? No, I did not.
2363. Did you ever give anybody the slightest suspicion or say anything to lead anybody to the slightest suspicion that anything of the sort had taken place founding this long and fishing examination of my friend's? No, never, to my knowledge. I just simply stated what took place in the station.
2364. *Mr. Abigail.*] I am out for mackerel. That is only a sprat.
2365. *Mr. Bull.*] Is there any doubt in your mind that these two reports, yours and Guthrie's, were, so far as you know, absolutely independent of Quelch in every respect? In every respect.
2366. Guthrie was a young officer who had never made a report before, any assistance you gave him was simply instruction as to the form of the report? That is it.
2267. Nothing approaching such a thing as Mr. Abigail has insinuated about, that Quelch wanted you to make a report which would be serviceable to him? No. In fact at the time the report was made out I did not know what it was for.
2368. You were simply asked to make a report of what you recollected had taken place in the Police Station? Yes.
2369. *Mr. Abigail.*] But you know it is common talk in the station at Redfern that these reports were inspected by Quelch, and that you and Guthrie were influenced by Quelch to make them out as you did.
2370. *Mr. Bull.*] Did you hear that from anybody? No, I did not.
2371. *Mr. Abigail.*] And that is common talk in the station? No.
2372. Did you hear anybody mention it at all? No.
2373. *Mr. Bull.*] Would any police officer there insinuate that to you? I should put him on paper if he did.
2374. You would make a report to your superior officer? Yes.
2375. *Mr. Abigail.*] There is a great deal of friction at the station? Yes.
2376. A good deal of illfeeling, too? Not amongst the men, I do not think there is.
2377. Is not there, even amongst the serjeants, a lot of ill-feeling against the inspector because he prefers Quelch and that gentlemanly officer, Dukes, to do duty which the serjeants ought to do, and is not there the utmost friction over that? Of course, I do not know what the serjeants feel like.
2378. But you know there is? I know there is a good deal of illfeeling towards Quelch.
2379. Is not he looked upon as "Mr. Lawless' pet" there; is not that the exact phrase used? I never heard that phrase used.
2380. *Mr. Bull.*] There is nothing in the nature of disorganisation there, is there? Not the slightest.
2381. There is absolute discipline? There is.
2382. Some of them are fairly jealous of Quelch? I could not say.
2383. *Mr. Abigail.*] I pity them if they are.
2384. *His Worship.*] There must be a certain amount of ill-feeling or these charges would never have been preferred.

Senior-constable William Edward Quelch was recalled:

2385. *Mr. Bull.*] With regard to these reports [*Exhibit No. 8*], is there any truth in the world in this assumption by Mr. Abigail that you conjured or inspired these reports of Willson and Guthrie? Not at all. The first time I had the pleasure of reading their reports was just now, at that table.
2386. This was the first time that you ever had the opportunity of seeing either Guthrie's or Willson's reports? Yes, and they never saw mine.
2387. It is not true, as insinuated by Mr. Abigail, that you had written yours out at midnight?
2388. *Mr. Abigail.*] I object to the form of the question; "asked by" me, not "insinuated by" me.
2389. *Mr. Bull.*] I put it that way. It must be an insinuation. There is no evidence to support it. Is there any truth in the question of Mr. Abigail that you had made out your report at 12 o'clock, and that these men had a knowledge of it? Not at all. They never saw it.
2390. Now, I have another thing to ask you. Have you not a number of certificates? Just take them in your hand, will you?
2391. *Mr. Abigail.*] If these certificates are put in, I tell my friend now, it will necessitate my calling, from special instructions I have got about some of them, a great many witnesses to explain why these things were given, and their opinion of the man since.
2392. *His Worship.*] I cannot take opinions. I can only take facts. Documents of that sort are facts unless you can prove they are forgeries. The opinions of the people have nothing to do with this inquiry.
2393. *Mr. Abigail.*] I submit that this is not evidence.
2394. *Mr. Bull.*] Surely it is as much evidence as asking the different witnesses here with regard to the disorganisation, and the insinuations and dislike to Quelch. My friend has laid the foundation for this.
2395. *Mr. Abigail.*] I asked for his character as a police officer.
2396. *Mr. Bull.*] And this is as regards his character as a police officer; is that not so? As a police officer for the last ten years, and as a private citizen.
2397. *Mr. Abigail.*] Your Worship sees; if he goes round there begging of a lot of people—. [*Interrupted.*]
2398. *Mr. Bull.*] I object to this.
2399. *His Worship.*] I do not think any of these are admissible.
2400. *Mr. Bull.*] I have not attempted to put them in.
2401. *His Worship.*] I believe he has been in the Royal Navy. Let him put his discharges in, and any police reports.
2402. *Mr. Bull.*] Your Worship is either anticipating me or mistaking me. I was not going to put any of these in. (*To witness*): You have, have you not, characters there from all classes and grades of people? Yes.
2403. Certificates in writing? Yes.
2404. Unasked, unsought? Yes.

- Senior-constable
W. E. Quelch.
1 Nov., 1897.
2405. Which you are willing the Commissioner may see if he chooses? Yes; or to call any one as a witness to substantiate it.
2406. *Mr. Abigail.*] You say they are unasked? Some of them are marked "unsolicited."
2407. Do you mean to say that you have not asked for them? I have interviewed people as to whether they have not known me.
2408. And they have sent in these things at your request? Yes.
2409. Why do you say "unsolicited and unasked"? Some of them are not. Those are the people who have known me, and with whom I have done business all the time.
2410. Have you got one from Riddle? What do I want to go to his place for?
2411. Have you got one from Pogson? No. No doubt he would come here to give you what he knows of me.
2412. You see how general your solicitation has been. Have you got one from the Director of Public Charities? No.
2413. And "Myall House" is on your beat? No; it is in the district.
2414. It is near where you live? No.
2415. You have not got one from Inspector-General Fosbery, have you? I cannot get that until I leave.
- [At 1 p.m. the Commission adjourned for luncheon.]

On resuming after luncheon,—

2416. *Mr. Abigail.*] This morning your Worship announced that at the conclusion of the evidence you would not allow speeches from either side. I am bound to say now that you deprive me of a good deal that would tend to strengthen my case.
2417. *His Worship.*] It is my function to hear the evidence, and to give my opinion upon it. That is all. I do not want the opinion of any one else, one way or the other. You have plenty of opportunities of giving your views while the case is going on. I will hear no addresses when it is over. You may say what you like in the meantime.

Senior-constable William Edward Quelch was recalled :—

2418. *Mr. Bull.*] Do you know Mr. Dacey, the gentleman sitting by the side of Mr. Abigail, here? Yes.
2419. How long have you known him? Several years now.
2420. I suppose you know him, not only in his parliamentary capacity as member for Botany, but in his private capacity? Where I knew him was in his capacity as a member of the borough council of Alexandria.
2421. Do you know him to distinguish him from anybody else? Yes.
2422. So that when he says he does not know you from a crowd— [*Interrupted*]? He has addressed me and shaken me by the hand on election day.
2423. Was that a municipal election? Yes.
2424. There is no doubt Mr. Dacey knew you well? Yes.
2425. Called you by name? Yes.
2426. Knew you in your police capacity? Yes.
2427. In what capacity did you know Mr. Dacey? As wheelwright and blacksmith on the Botany Road, Alexandria.
2428. And as an alderman? Yes, of the same borough in which he resides.
2429. How long do you think that knowledge has existed? I have known him myself now for the last eight or nine years.
2430. And I suppose when you would meet the conventionalities of ordinary life would pass every day? Yes; the same as the other aldermen of the borough.
2431. The same as you would with anybody you knew as well? Yes.
2432. *Mr. Abigail.*] Did your duty ever lead you into Botany? Yes.
2433. You were never on any Botany beat? No; Mr. Dacey's place is in Alexandria.
2434. You know that Mr. Dacey has publicly stated that he does not know you, and does not want to? I have read it.
2435. I suppose you will admit that he is well known to the police? Every other alderman in the whole of the four boroughs is known to the police as well as Mr. Dacey is.
2436. You have not put in the books to show what your knowledge of Mr. Dacey is. You say nothing against him? I do not insinuate anything against him. I say that he knew me.
2437. How many years is it ago since he shook you by the hand and bade you "Good day"? The last time he contested one of the wards of Alexandria.
2438. How long ago is that? Three years ago.
2439. So you think you are a sufficiently distinguished identity for him to remember you? I have no doubt about that.
2440. *Mr. Bull.*] Mr. Dacey is a man in business, as my old father was before me, as a blacksmith? Yes.
2441. And in that capacity, and in that line of business, you knew him? Yes, the same as he is in to-day; in fact Mr. Dacey resides in the Botany district as a wheelwright now.
2442. *Mr. Abigail.*] It is fortunate that Mr. Dacey is a wheelwright, not a burglar, not a thief, and not a perjurer.
2443. *Mr. Bull.*] I must draw your Worship's attention to what my friend says.
2444. *His Worship.*] It is a very improper thing to say. It shows your venom in the matter.
2445. *Mr. Abigail.*] Why?
2446. *His Worship.*] I know what you refer to. You refer to Mr. Quelch being a burglar and a thief.
2447. *Mr. Abigail.*] Nothing of the kind. I had not Quelch in my mind's eye. I say so seriously as a gentleman.
2448. *Mr. Bull.*] I am very sorry for my friend's statements.
2449. *Mr. Abigail.*] If you fit them to your client, I present you with them. Certainly, in all candour, that is my opinion of him.
2450. *Mr. Bull.*] I draw your Worship's attention to that. We have it from him that, in all candour, that is his opinion of him.
2451. *His Worship.*] I want facts, not opinions.

Constable Samuel Brown Guthrie was called and sworn :—

2452. *His Worship.*] What is your name? Samuel Brown Guthrie.
 2453. You are a constable of police? I am.
 2454. Stationed where? At Redfern.
 2455. *Mr. Bull.*] What grade of police officer are you? Probationer.
 2456. And how long may you have been under probation? Since last November.
 2457. This very day twelve months? Yes.
 2458. You know Constable Brennan? I do.
 2459. Do you remember in May last his bringing three men to the police station? Yes, I do.
 2460. Were you in the Police Station at the time that Brennan had his men there? I got there just when he brought them in.
 2461. Were you one of the relief which the senior-constable had charge of? I was.
 2462. And you were really being relieved at 6 o'clock? Yes.
 2463. Did you hear the statement made by Brennan with regard to the three men he brought there? I do not know what statement he made. I never heard him make any statement.
 2464. You saw him in the station with the three men that he brought in? Yes.
 2465. You made a report afterwards, did you not, of the circumstances in writing? I did.
 2466. Of what had come under your observation, what you had heard and what you had seen? Yes.
 2467. Will you tell me this, what was said, if anything, by Senior-constable Quelch to Brennan, appertaining to the men in relation to any charge which he was about to make or had made. What did Quelch ask Brennan? He asked Brennan what the three men had done, or what they were up to, or something to that effect.
 2468. Do you remember Brennan's reply to that? Yes. He said the three men were in the Botany Road, near Riddle's shop, and they ran away, and he pursued them and caught them in Chapple-lane.
 2469. Do you remember Brennan's making mention of his having spoken to one of them and the answer given by one of the men? He asked what he ran away for, and he made a remark that he was short-taken, or something of that sort.
 2470. He had gone into the lane to ease himself? Yes, in the lane.
 2471. After that conversation do you remember the Senior-constable asking Brennan what he had seen at the time he saw them first, at the time they started to run? No. I could not tell you. It is so long I forget it now.
 2472. I see your report is dated 29th May. That would be within some three days of the time? Yes.
 2473. Let me ask you have you any recollection of Brennan's having said anything regarding the circumstances which attracted his attention. I do not want to mislead you in any way. Do you remember did Brennan relate any circumstance, anything which he saw or heard which attracted his attention before the men ran away? No. The only thing that attracted his attention was the men running away. That is all I heard.
 2474. Did he say that he heard a grating noise in the vicinity of where the men were before they started to run? He did not say that in my hearing.
 2475. That certainly was not said whilst you were there? I do not think so.
 2476. Did he say that in pursuing them he had to throw off his policeman's cape so as the more easily to pursue them? I heard it the next day.
 2477. I mean while the men were there before he let the men go? No. I never heard that.
 2478. Did you hear him say at the time, of course, I am speaking now, and all my examination relates to the time when the three men were in the Lock-up, or at any rate, in the Charge Room—did you hear him say that he had taken out his revolver and brought the men to the Station at the point of his revolver? No. I never heard it.
 2479. Is it possible that it was said without your hearing it? It may have been said without my hearing it.
 2480. It certainly was not said within your hearing? No.
 2481. Do you remember Quelch asking him the question if everything was all right in the locality where the men were before they had started to run? Oh, I think you answered that by saying he thought it was strange that the men ran away. Now, will you tell me this, had you made any report under any circumstances, of any matter in which you had taken part, before this report of yours on May 3rd—was this the first experience you had had of reporting? It was.
 2482. Just answer me. Look at these two sheets and tell me whether those are the reports that you made of the circumstances. [*Exhibit No. 8 handed to witness.*] Just look carefully at it? Yes, that is my writing.
 2483. Is that the report you made of the circumstances. Look at the second page, you will see, I think, the signature there. Is it possibly yours? Yes.
 2484. Is that report true? Yes, that is the report which I sent in.
 2485. Of the circumstances appertaining to the men being in the Police Station? Yes.
 2486. Was this dictated to you by Quelch in any way? No.
 2487. Were you under any coercion or influence of Quelch's in making out this report? I was not.
 2488. Would you tell us in what part of the premises this was made? In the Magistrates' Room.
 2489. Was Quelch present, assisting in its compilation, or suggesting anything which you should say in it? No.
 2490. From the time that you began it until you ended it, was he there? No.
 2491. Of course, I mean assisting you in it. Is it true, even, as it is suggested, that this was made at the instance of Quelch, and that it was suggested that this would be a serviceable report?
 2492. *Mr. Abigail.*] Pardon me. I must submit that this is not the way to conduct an examination-in-chief.
 2493. *His Worship.*] It is simply asking him whether he was coerced in getting this report.
 2494. *Mr. Bull.*] Were you influenced by Quelch, or coerced by Quelch in any way? No.
 2495. *Mr. Abigail.*] It puts him on the alert when I ask him.
 2496. *Mr. Bull.*] Who was present when you were writing out this? Constable Willson.
 2497. Was anybody else at all in the room at the time? No.
 2498. And you say that that report was then true, and is now true, of the circumstances, so far as your recollection has served you? Yes.

Constable
S. B. Guthrie.
1 Nov., 1897.

- Constable 2499. *Mr. Abigail.*] You say that Willson was with you in the room at the time you made out your report?
 S. B. Guthrie. Yes.
- 1 Nov., 1897. 2500. Did he assist you in making it out? Yes.
 2501. Did he tell you what he put down? No.
 2502. Did you copy his? No.
 2503. Would you be surprised to hear that your report was the same as his? He blocked it out for me.
 2504. What do you mean by "blocked it out"? He wrote roughly down the heading, and the way to write it.
 2505. And then did you write straight off, and did you show it to him when it was done? Yes, I showed it to him.
 2506. Did you read his? I never saw his.
 2507. He read yours? I believe he did. I would not be sure.
 2508. What did you do with it when you had finished? Put the two of them in an envelope, and put it in the desk.
 2509. To whom did you address it? Inspector Lawless.
 2510. Did you close the envelope? Yes.
 2511. Was Quelch there when you were writing the report? No.
 2512. Did he come in and ask Willson how long he was going to be, and had not he finished? I believe he did. I would not be sure. I believe he came in when we were just about finished. Willson had finished first.
 2513. How long had you been there before Quelch came in? As near as I can remember, a little over two hours.
 2514. Over two hours writing out a sheet and a half of foolscap. Is that correct? That is what I said. That is correct.
 2515. Now, why did not you wait until you were off duty; why did you come in at 3 a.m.? We went off at 6 o'clock.
 2516. You were supposed to be on duty at 3 a.m., but were then in the Magistrates' Room writing out reports. Who told you to go there and write out reports? Quelch.
 2517. What did he say to you? He told me I had to go in at 3 o'clock to write out a report, and he told me to go in and do it.
 2518. Did you know he was reported over this matter? Yes, I did.
 2519. Had you had any conversation with him about it? No.
 2520. None at all? Well, I had a few words with him in the street when he told me I had to write this affair, and he told me to give my unbiassed opinion.
 2521. What time was that? About 11 o'clock.
 2522. He told you what? He told me that I had to send in a report about three men.
 2523. Did Mr. Lawless ever speak to you about sending in a report? He told me to send in a report.
 2524. When? The same night.
 2525. About what time? About half-past 11 it may have been.
 2526. As a matter of fact, Quelch told you that Lawless was going to ask you to send in a report, did he not? Yes.
 2527. And he told you to give your unbiassed opinion? Yes.
 2528. He told you that he had been reported, and that you and Willson were to send in reports. You, and Willson, and Kidd? He would naturally come to that conclusion. I could not tell you whether he told me now that he was reported or not, but we came to that conclusion.
 2529. Did he tell you what he put in his report? Who?
 2529½. Quelch? No, he did not.
 2530. Are you under Quelch in that division? Yes.
 2531. Have you been under him since? Were you still under him up to the time he was released from duty? Well, we were under him in our turns.
 2532. You will admit, will you not, that it would require some courage on the part of a constable to send in a report which would be contradictory of his senior's report?
 2533. *Mr. Bull.*] I object to that. It is not evidence. It is mere opinion.
 2534. *Mr. Abigail.*] How can it be opinion? I ask him will he not admit that it would require some courage on the part of a constable to send in a report which would contradict his senior's report.
 2535. *His Worship.*] I do not think it is a proper question.
 2536. *Mr. Abigail.*] With great respect, I must insist on its being taken.
 2537. *His Worship.*] It is a supposition, it is an opinion.
 2538. *Mr. Abigail.*] It is a matter of experience.
 2539. *His Worship.*] He had only been a short time in the Force. He could not have had much experience of his superior officers at that time.
 2540. *Mr. Abigail.*] I ask him now as a matter of experience.
 2541. *His Worship.*] Of course, we all know as a matter of practice it is a dangerous thing for any subordinate to make a report against his superior officer.
 2542. *Mr. Abigail.*] If your Worship knows it, I am quite satisfied. (*To witness.*) At 3 a.m. you were called in from street duty, and spent two hours making this report out? Yes.
 2543. What was Quelch doing while you were making out your report? I cannot say.
 2544. What time did he come in? How long after you had been in did he come in? I could not tell you.
 2545. An hour or an hour and a half? It was over two hours.
 2546. You said you were only there two hours? I told you we were there over two hours.
 2547. From 3 o'clock until 6, did you go on duty again? We were on duty for about half an hour, I suppose.
 2548. So, during the two and a half hours that you were writing out the report, your part of the duty that you and Willson should have been controlling was neglected? Yes.
 2549. Inspector Lawless, when he told you to send in a report, did not state that you should do it at any specific time, did he? No.
 2550. Did he not say that as long as you had it there at the station at 10 o'clock the following night it would do? Yes.
 2551. So that you had twenty-three hours in which to get it ready under instructions from the inspector?
 Yes. 2552.

2552. And, notwithstanding that, you were called in at 3 a.m. by your senior-constable, whom you had to obey? Yes. Constable
S. B. Guthrie.
2553. And you only went in, then, to make out the report because your senior-constable told you you ought to? Yes. 1 Nov., 1897.
2554. Has it been remarked to you that there is a peculiar similarity between your report, in the choice of language used, and Willson's? Yes.
2555. You say it has been remarked; when was it remarked; during dinner hour, was it not; it was talked over, was it not, in the dinner hour? Not in my hearing.
2556. Now, come on, was it not? Not in my hearing; it was not; I did not take any notice of it; I did not hear it.
2557. You did not want to hear it, is that it? No, I did not hear it, no matter whether I wanted to or not.
2558. *His Worship.*] Did you say you did not want to hear it? No.
2559. *Mr. Abigail.*] Do you mean to say that you did not say you did not want to hear it, and did not hear it? I did not hear it.
2560. As a matter of fact, you did not want to hear it? I did not hear it.
2561. And you did not want to? It is a very funny question. I tell you I did not hear it.
2562. *His Worship.*] Had you any reason for not wanting to hear it? No.
2563. *Mr. Abigail.*] You know there are sides taken at Redfern over this matter of Quelch, some speak for him and some against him? I believe there are.
2564. Which side have you taken? I have not taken any particular side. The senior-constable never did me an injury in his life.
2565. And you do not want to do him any? I do not want to injure any man.
2566. You are more for him than against him, are not you?
2567. *Mr. Bull.*] I object to that.
2568. *His Worship.*] You are quite entitled to ask him that.
2569. *Mr. Abigail.*] You do not favour Quelch in the matter? I do not favour Quelch more than any other man.
2570. *His Worship.*] You are neutral in the matter? Yes, I am neutral.
2571. *Mr. Abigail.*] You know that there is a good deal of conflict at Redfern, do you not, as to the carryings on of certain constables?
2572. *Mr. Bull.*] I object to that.
2573. *His Worship.*] That has nothing to do with this enquiry.
2574. *Mr. Abigail.*] Quelch is one of them. I say at once every obstacle to getting at the truth is being thrown in my way here. (*To witness*): Is it not a fact that a good deal of ill-feeling exists over this matter, over Quelch, at the Redfern Police Station? Yes, there is.
2575. And do you not know as a fact that complaints are made that Quelch is the pet of Mr. Lawless? I have heard the remark.
2576. Is not that the epithet that is used, "Mr. Lawless' pet?" Is not that so? I do not say as I have heard those words used, but I have heard words to the same effect.
2577. Is it not a fact that at Redfern complaints are made that Quelch is ordered to do duty that Serjeant Bell and other serjeants ought to do, and that he is put over the serjeants? No. I do not think so.
2578. *Mr. Bull.*] Is there any such complaint as that?
2579. *His Worship.*] If that were the case the serjeants would very soon make complaints.
2580. *Mr. Abigail.*] They have. Do you not know as a fact that one serjeant was actually told by the inspector not to come near him because he was actually supposed to be smelling the breath of the inspector and trying to detect the signs of liquor on him? I never heard that at all.
2581. Then you must be a probationer. When Brennan came in with these three men did you hear him say that Quelch ought to send some one down to Botany Road? No.
2582. Did you not hear Brennan say when he had these three men in the station that Quelch ought to send somebody down to Botany Road to see if anything was wrong there? No; not in my hearing.
2583. Did you hear him say he had heard a noise? No.
2584. You were out in the yard? Not the whole of the time.
2585. The whole of the time? No. Part of the time.
2586. Can you tell me what part of the time you were in the station? I believe I was in the station twice and out again.
2587. Then you were in and out of the yard twice? I would not be sure. I know I was in the station, and out in the yard too, and did not hear everything that passed.
2588. Were you there when Constable Willson was there? Yes.
2589. Did you hear one of the men give an address as Pymont? Ultimo, it was.
2590. Did you hear an address given afterwards as Bayley's Restaurant? Yes.
2591. And soon after that they were let go? Yes.
2592. But you were not in the station when Brennan brought the men in first and they had a conversation with Quelch? No; I was out in the street when Brennan brought the men in first.
2593. *Mr. Bull.*] Going off duty at 6 o'clock that morning, when would you be on duty again? Ten o'clock that night.
2594. So that, unless you made a report during that time, and before 6 o'clock, you would not be on duty again before 10 o'clock the same night? No.
2595. I suppose, even as a probationer, you take the trouble to read the rules for the general information and discipline of the members of the Force? Yes.
2596. I suppose you have read Rule No. 73: "Any member of the Force believing he has grounds of complaint must report the circumstances of the case to his superior officer promptly; for, if he broods over or delays making his statement, his motives will be judged of by such delays." You have read that? Yes.
2597. Both your senior-constable and your senior officer, Mr. Lawless, had spoken to you before midnight about your making this report? Yes.
2598. Do you not know that Quelch was on duty all that night, until 6? Yes, he was.

First-class Constable Maurice Fitzgerald was called and sworn :—

- First-class Constable Fitzgerald.
1 Nov., 1897.
2599. *His Worship.*] What is your name? Maurice Fitzgerald.
2600. *Mr. Bull.*] What are you? Constable, stationed at Redfern Police Station.
2601. First-class constable?—Yes.
2602. Do you know Special-constable Brewin? Yes, I know him.
2603. How long have you known him? I believe I have known him over six years.
2604. Do you remember the 16th March, 1894? I do not exactly remember the date, sir.
2605. Do you remember some report being made about Marshall's chemist shop? Yes.
2606. *Mr. Abigail.*] I object to this. Special-constable Brewin is not on inquiry, and this constable is evidently being called with the object of damaging Brewin. What earthly connection has Brewin with this inquiry except as a witness.
2607. *Mr. Bull.*] Brewin is put forward here and called by Mr. Dacey as a witness of truth, as a witness whom he asks you to believe; and he therefore asks you to believe Brewin's statements in what he says against Quelch. I asked him distinctly whether he did not, as a fact, make a report with regard to Marshall's chemist's shop, that he had found the side and the front doors open, when as a fact the very police officer on the beat that morning almost momentarily before his report of finding the place wide open had examined the place and found it shut. He denied that he made that report. He denied as a fact that he went to the Police Station and reported that matter. I am producing this officer in contradiction of that report of Brewin's. The truth of Brewin's statement has a lot to do with it.
2608. *Mr. Abigail.*] If your Worship looks up the evidence you will see that Brewin says he was outside the station on the doorstep at the time and did not hear it at all.
2609. *His Worship.*] I do not think it comes within the scope of this inquiry. I quite satisfied myself about Brewin. I heard what he had to say. I did not think it very material.
2610. *Mr. Bull.*] Suppose I show that Brewin is a liar. Suppose I show that he is not a man that can be believed, would not that be material in this matter?
2611. *Mr. Abigail.*] What is the value of his evidence?
2612. *His Worship.*] I think this evidence should not be taken. It would leave the door open to a lot of other evidence that is not desirable.
2613. *Mr. Bull.*] I understand you would hold exactly the same thing with regard to Mr. Yedwohf. I asked Brewin if he had not gone to Mr. Yedwohf and told him that his place was to be broken into, and told him that he was actually seen by Mr. Yedwohf in the company of the man whom he had nominated to Yedwohf as the man who had given the information to him about the burglary.
2614. *His Worship.*] If I have to receive this evidence I may have to receive evidence on the other side that I would rather exclude, and ought to be excluded.

Charge No. 6.

“That in July, 1896, upon the advent of the Public Service Board, it was decided to remove the offices of the Director of Charitable Institutions from “Myall House,” Redfern, to Richmond-terrace, in the Domain. Pursuant to this determination the front part of the building was vacated and all the things were removed. There was at the back of the premises a store containing boots, shirts, and other articles. There was a clerk named Coghlan there in charge during the day time, and he was asked by the Director of Charitable Institutions to draw the attention of the police to the fact that the place was unprotected at night, and that it was necessary for them to keep an eye upon it. As far as I can ascertain, the only man who received this information was Quelch. Coghlan showed him over the premises and the amount of stock which the place contained, and, strange to say, about three nights afterwards the building was broken into under circumstances of the most suspicious character. Coghlan had told Quelch that he left the store between 5 and 6 o'clock in the afternoon. On this particular night Coghlan returned in company with another clerk named Newcombe. They stood outside the store door at the back of the main building yarning for about ten minutes. The place where they stood yarning is not more than about 12 feet away from the door behind which Quelch was hidden. One of the clerks finally went into the main building and lit the gas and called out, ‘What did you leave the middle door open for?’ The door had also been taken off its hinges. The other clerk had been to one of the outhouses, and when he came out of the outhouse he put his knee against an empty case opposite an outhouse door broken off its hinges, and placed it in a line with some other cases. This so disturbed the burglar inside the door that he pushed the door open and rushed out. The man who rushed out of the building was, strange to say, Senior-constable Quelch. Coghlan said, “What is this,” whereupon Quelch said, “Some one has been in, and has got away over the fence.”

Mr. William Somerville, journalist, was called and sworn :—

- Mr. W. Somerville.
1 Nov., 1897.
2615. *His Worship.*] What is your name? William Somerville.
2616. What is your position? Journalist.
2617. *Mr. Abigail.*] You were a shorthand reporter for the *Daily Telegraph*? Yes.
2618. Do you remember, on the 27th June, 1896, taking a shorthand report from Quelch about a supposed burglary in “Myall House,” Cleveland-street, Redfern? Yes; I got a report from him.
2619. And from that report did you prepare this paragraph, which appeared in the *Daily Telegraph* on the 27th of June, 1896? I wrote a paragraph which appeared on the 27th of June. [*Exhibit No. 19.*]
2620. “As Senior-constable Quelch, of the Redfern police, was walking down Cleveland-street at about 7-30 last evening, he observed a man acting in a suspicious manner in front of the building at 289, Cleveland-street, until lately used as a branch office of the Asylum Department. With the intention of watching his movements, Quelch crossed over into Prince Alfred Park; but the man made off towards Castlereagh-street, and when Quelch got there he had disappeared. Knowing the place to be unoccupied except at the rear, where a small out-building is used as a store for asylum supplies, Quelch proceeded through to the back, which abuts on James-street; here he found that the door, which was padlocked, had been removed from its hinges, which were on the outside. Hearing some one approaching he hid in a dark corner, and as the visitor entered the door he jumped out and grabbed him. It turned out, however, to be Mr. Coghlan, the clerk in charge, who was returning to do some back work. A light being procured it was found that an inner door had

had also been removed from its hinges, and access gained to the store. Samples of everything in the store had been heaped up ready to be carried away; a large sack being partly filled with a miscellaneous collection of goods. The thieves had decamped. Two screw-drivers were found on the floor, one of them bearing the stamped initials F.L.P. A constable was left in charge during the night." That was your report prepared from the shorthand-notes of the alleged occurrence as described by Senior-constable Quelch to you? No shorthand-notes, I would not say that.

Mr. W.
Somerville.
1 Nov., 1897.

2621. You made a note of it? Well, the information was given to me by Mr. Quelch as I was walking down the street with him.

2622. Where? From Redfern Police Station.

2623. Did you ask him for that, or did he volunteer that? When I went up as usual to Redfern Police Station this evening, about 8 o'clock, Quelch was there. I do not know exactly how, but there were some remarks made about a robbery, and I asked, at any rate, I walked down with Quelch to the place to see it, and on the road down Quelch gave me the information. I may say I saw the screw-drivers there at the Police Station and I made out what I thought were the marks that were on them.

2624. I suppose you know that it is not an unusual occurrence that a constable very frequently, for the purpose of self-glorification, gives an elaborate report to a journalist, with two objects in view—to see his name in print, and also to secure promotion? I cannot say.

2625. Cannot you say that as a matter of journalistic experience? No.

2626. I can assure you, as a solicitor, that it is so.

2627. *His Worship.*] Are you certain whether he volunteered the information or whether you asked him for it? I asked him for it. Of course I cannot write copy without the information; and I heard of the occurrence, and I asked Quelch for the information.

2628. *Mr. Abigail.*] You must be a young journalist, because the old journalists can write copy without information? That sort of copy does not do in Sydney.

2629. Did you go round to see "Myall House"? Yes.

2630. Who went with you? I went with Quelch.

2631. Did he point out how he managed to get out and surprise the alleged burglar, whom he found out to be Coghlan, the clerk in charge? He showed me where the door had been pulled open so that the padlock acted as a hinge, and he showed me a case behind which he said he hid when he heard the footsteps.

2632. Did he explain to you what he did inside the store at the time the front of the store was being opened by another clerk? No.

2633. Did he explain why he only jumped out at the time he heard Coghlan coming to the door behind which he was concealed? He said he jumped out when they came upon him.

2634. Did he not state also that before he heard footsteps coming to the door, behind which he was concealed, that he heard a key turned in the front door? No.

2635. And that the gas was about to be lighted? No.

2636. He did not explain that? He said nothing about that.

Mr. Thomas Coghlan, Clerk, Department of Charities, was called and sworn:—

2637. *His Worship.*] What is your name? Thomas Coghlan.

2638. What is your occupation? Clerk.

2639. Residing where? In Redfern.

2640. *Mr. Abigail.*] Just carry your recollection back to a Monday or Tuesday in June, 1896, when you saw Constable Quelch at Myall House? Yes.

2641. Did you have a conversation with him, or, rather, did he come and have a conversation with you about an inmate of the Asylum? He came down to make an inquiry about an inmate, or a person that either was an inmate or had been an inmate.

2642. While inquiring about this inmate it came on to rain pretty heavily, and while there you suggested that he should put the time in in going through the store? There was some conversation.

2643. Did you ask him to keep watch on the store? Yes.

2644. Did you tell him why? Yes.

2645. Now I want you to tell us all the conversation you had with him? Well, I think as far as my memory will go now in the course of conversation we spoke about the different stuffs in the Store and its being unprotected, and how easily it could be broken into. The conversation was something like that as far as I can recollect,

2646. You took him over the Store, did you not? Yes.

2647. Did you tell him that it was your usual habit to leave the Store at 5 o'clock in the afternoon? No.

2648. Did you tell him the place would be unprotected after a certain hour. Did you show him how easy it would be to break into the store, and ask him at the same time to keep a sharp look-out on the premises as they were left unprotected after office hours? Yes.

2649. *Mr. Bull.*] You showed him how easy it would be for anybody to break in? At one particular part I showed that.

2650. *Mr. Abigail.*] The hinges of the doors are outside? Yes.

2651. And this store is at the rear of the main building, right up the back yard? Yes.

2652. It is a private house? Yes.

2653. And it was used as an office by the Charities Institution? Yes.

2654. And this long building of tin and wood or iron and wood was used as a store? Yes.

2655. And your office was in it? Yes, my office was in it.

2656. It was on a Thursday night, was it not, that something occurred there? Friday night.

2657. You were working back that night? I was going to work back.

2658. And there was a clerk in the head office who was going to assist you? Yes.

2659. On that Friday night or Friday afternoon, what time did you leave your office before tea? Just before 5, as far as my recollection goes.

2660. What time did you go back? About between a quarter and half-past 7.

2661. Now, at the rear of this store there is a lane? Yes.

2662. And the front of it looks over across Cleveland-street into the Park? Yes.

2663. And there is a side entrance from Cleveland-street? Yes.

2664.

Mr. T.
Coghlan.
1 Nov., 1897

- Mr. T. Coghlan.
1 Nov., 1897.
2664. On this Friday night the place next door was untenanted? Yes.
2665. It is a large house? It is a cottage.
2666. It was unoccupied? Yes.
2667. A large cottage with a large yard at the rear? Yes.
2668. Just outside the store there were a lot of empty cases, large ones? Yes; there were a lot of empty cases.
2669. You returned that night about a quarter or half-past 7. Now, I want you to tell us what occurred, how you returned, what conversation, if any, you had outside, and what occurred? I think I had to meet Newcombe about 7 o'clock, and he was late, and we walked down the road, and passing the gate I proposed that we should go further down to Crimp's Hotel and have a drink. Seeing the gate open I just slipped across and pulled it to and went down. We went down and had a drink. We went in a side passage, and walked up towards the front of the door, when the two of us stopped, speaking, I suppose about five or ten minutes, and I went round the side of the store to the w.c., previously giving the other clerk the keys to open the door and light up the gas.
2670. That was to open the front door? Yes.
2671. As you came back from the w.c., you would get in the side door? I went round to the w.c., and Newcombe went into the store, and when I came back one of the cases happened to touch my coat, and I bent, like this, and pushed it.
2672. That made a noise? It scraped on the asphalt, and immediately a door which ought to open this way opened the other way, and I said "Who is there"? And somebody rushed and said, "Oh, that's your game, is it"? and it was Senior-constable Quelch. Newcombe came out, and the gas was lit, and while Quelch and I were looking for the burglars Newcombe telephoned for the Police. Then we rushed upstairs, and into the water-closets and down below, and then we came back again, and a few minutes after the Police were down. That's about all.
2673. When Quelch came round had he a baton drawn or a revolver in his hands? Nothing.
2674. And I suppose that for all he knew you might have been a most desperate criminal? I might have been.
2677. The hinges were on the outside? Yes.
2676. The door canted on the lock? It canted on the clasp.
2677. The hinges had evidently been taken off from the outside? Yes.
2678. The door canted over, and he came out unarmed, without a baton or a revolver? Yes.
2679. What did he tell you when he did come out, and you were all calmed down a bit after the fright? He said that he saw a suspicious character outside, and went through the park and stopped behind one of the trees, and the man then walked along towards Castlereagh-street. Constable Quelch then informed me he went up to the gate near Cleveland-street, and, as the man went round, he followed him across, and as the man went along he came round and went up, and while he was investigating I and a fellow-clerk came up, and he waited inside until we came in.
2680. He thought you were going to commit a burglary at 7.30 at night, and from the front, although you could have come in at the back. Did he tell you that the alleged burglar got over into the next yard? No, he did not say anything about that because he could not tell.
2681. What did he say? He suspected that the man would go round and give his friends inside notice that he was there, and when he came round they must have gone out of the back.
2682. Did not you jump on the case near the fence? Yes.
2683. And did you not want to jump over to see if there were any footprints, and did he not say, "Oh, it is no good doing that, the ground on the other side is hard"? Yes.
2684. Although he did not tell you he had been on the other side to see? Oh, he had never been there.
2685. When you took him in on the Tuesday before the Friday on which this alleged burglary was committed by unknown burglars, did you show him where the telephone was? No.
2686. He could not fail to see where it was? I telephoned down to head office.
2687. While he was there you actually telephoned down to head office? Yes.
2688. And he did not tell you that when he was in pursuit of the alleged burglars he telephoned up to the Police Station to send any relief down to him? No; he might have, but he did not say anything to me.
2689. As a matter of fact, what did you find? Did you find that there had been any displacement of the stock? Yes.
2690. I want you to explain to his Worship exactly the nature of that displacement or interference with the stock? Whoever had been there must have gone completely over the store, because there were bootlaces taken from up in the loft.
2691. And to reach this loft there was a ladder from the main store? Yes. There were boots taken, and cottons and a miscellaneous assortment taken from everywhere.
2692. Did the appearance of the store after the alleged burglarious visit give you an impression that a burglar had got there, and in a hurried and indiscriminate fashion had attempted to get hold of anything that came to his hands? No.
2693. Or did it give you this opinion: that the things which had been taken had been carefully taken with a view to an assortment? Yes; it gave me the impression that it had been carefully sorted out.
2694. And, for instance, did the size of the boots give you any peculiar idea as to who the alleged burglar was? It gave me no idea at all!
2695. What was the size of the boots? Women's boots, 4's and 5's.
2696. Yes? And men's boots—9's and 10's.
2697. Yes? And slippers—9's and 10's.
2698. Yes? And boots and slippers—women's—4's and 5's.
2699. See how nicely they were sorted? There were braces taken from the top, and a couple of flannel shirts.
2700. What size? I cannot tell you.
2701. Would they fit a big man like Quelch? They were ordinary men's sizes. They were not out-sizes. There were a couple of Scotch plaid shirts. Then there were half a gross of laces, and cottons.
2702. Towels? Russia Crash.
2703. Men's flannels? Yes, I think there were six or seven different items we counted.
2704. Was there a sailor's palm? No, we never use them.

2705. These were carefully assorted : Slippers and boots—9's and 10's, and boots for the burglar's wife and children. Do you not know that the Police report is that there was a sailor's palm taken? There could not have been possibly, because it was not there.

Mr. T.
Coghlan.

1 Nov., 1897.

2706. What I want to show is that it was left there, and whoever did leave it there must have been a sail-maker at one time. By an oversight on the part of the careful burglar it was left there.

2707. *His Worship.*] Can any of the witnesses produce it?

2708. *Witness.*] We had packing-needles.

2709. *Mr. Abigail.*] Were packing-needles taken? Yes.

2710. Did you have any palms? No.

2711. *Mr. Bull.*] Was any such thing found there? Not to my recollection.

2712. *Mr. Abigail.*] Did you find that some of these things had been put in a bag? Yes.

2713. And was the bag just by the side of the door through which Quelch came? It was just behind the second door.

2714. You went upstairs with Quelch, did you not, to see what things were taken? Yes.

2715. Did you find other things up in the loft that had been nicely left there ready to be shoved in the bag? No. They were all down ready to be put in the bag.

2716. And did not you, as a matter of fact, remark to Quelch or to the police magistrate afterwards, that the burglars must have been very strange burglars to commit a robbery in the way they did? Something like that.

2717. You went to the station afterwards about this? No.

2718. Were you never asked to go to the station to make a complaint; were you never asked by Quelch to go and make a statement? No.

2719. He did not suggest to you the wisdom of going to the station to back him up in his complaint? The police were already informed.

2720. Because Newcombe, your under-officer, had telephoned? Yes.

2721. And while you were at the urinal, before Quelch surprised you in the way he did, Newcombe had gone into the main building to light up? Yes, he had turned on the gas.

2722. He had actually turned the gas on and lighted a match to light the gas? He had turned on the gas, of course, that I know.

2723. He was in the act of lighting the gas? He was in the act of walking across.

2724. Did you find that the screws out of the hinges had been evidently carefully taken out and laid down by the side of the door? Yes.

2725. Peculiar burglars; most careful burglar.

2726. *His Worship.*] It might have been the burglar's intention to replace them.

2727. *Mr. Bull.*] It must have been, probably, somebody who had been there every day.

2728. *Mr. Abigail.*] Somebody who had been shown over the premises sometime previously. Of course, our case is this, that Quelch did it. For two reasons we say particularly and specifically Quelch did this.

2729. *Mr. Bull.*] I object to my friend addressing your Worship.

2730. *His Worship.*] That is your charge.

2731. *Mr. Abigail.*] I want your Worship to find that he either did it for the purpose of gain, or to advertise himself. (*To the witness.*) You were satisfied yourself that the affair was very very peculiar? I thought, well, I made the remark that it seemed a peculiar way of a burglar doing business; I made the remark that it was a wonder he did not go for the cotton, which was much more valuable, and very easy to have disposed of.

2732. And I think you included the tape in your observation, did you not? I would not say as to the tape.

2733. When you and Newcombe went up to have a drink before you went on duty, did you see Jamieson, the night-watchman, standing a few doors off? I saw some one there, but I did not know it was Jamieson.

2734. You have learned since that it was Jamieson? Yes.

2735. Did you see any suspicious-looking character about the place at that time, beyond Jamieson; I do not know whether he is suspicious? I do not say he is. I only saw the one man.

2736. Who was that? I have subsequently learned it was Jamieson.

2737. And, from the time you passed until you came back was only a quarter of an hour? It could not have been much more.

2738. Was it long enough for a man to unscrew the door off its hinges, be careful enough to put down the screws one by one, to go inside and up that loft, and carefully assort, with this particular nicety and degree of accuracy in the choice of the articles, the slippers and the boots the same sizes in each case—the men's and the women's—and the shirts and flannels of the same sizes right through; was there sufficient time for him to do all this in that quarter of an hour? No, certainly not.

2739. Were there any signs in the store of a lighted candle having been carried about—any drips of grease? I could not say that, because I carried one myself.

2740. But that was afterwards. In searching, did you find any signs of grease from a candle? I never looked.

2741. But you would have seen them? Not necessarily. I would not have seen them.

2742. Next morning they were not remarked? I did not remark them; but I did not look.

2743. You were in the store in the morning, up in the loft? I could not say.

2744. By the way that Quelch came out of that door, which canted over, did he seem to be eluding capture or pursuing somebody? I could not say.

2745. He did not come out with much respect for his dignity? He rushed out.

2746. And nearly capsized in the endeavour to get out; did he not? Did he not come out like this, with his head down? Yes.

2747. Did you remark the absence of the baton or revolver? Yes.

2748. What did he say? He said his pistol was not loaded.

2749. *His Worship.*] Was he in uniform?

2750. *Mr. Bull.*] Helmet and all on.

2751. *Mr. Abigail.*] Here is a policeman on duty trying to arrest a burglar with his pistol not loaded and with no baton. And, even if his pistol were not loaded, why did he not carry it in his hand unloaded, clubbed as a weapon? (*To the witness.*) The baton was not in his hand? No. 2752.

- Mr. T. Coghlan.
1 Nov., 1897.
2752. The baton is a source of protection and a weapon of offence or defence, and it was not in his hands? No.
2753. Did he tell you how long he was behind that door waiting for the supposed burglar to come out? No; he did not tell me anything about that. He said that in investigating he heard footsteps coming up, and he went round waiting for us to come through. He thought the burglars were returning, and waited.
2754. Did he tell you when he heard those footsteps they were yours and Newcombe's? Oh, yes; meaning mine and Newcombe's.
2755. Did he explain this fact—that he waited until you had actually come out, during which time Newcombe had actually opened the front door and had got as far as the gas? Now, that gas is on a parallel line with the door which leads into the passage out of which he sprang? Yes.
2756. Did he explain away why he did not rush out immediately he heard Newcombe at the front door, because on his own showing he was in the front of the building, and only rushed out of the side door when you came to it? No. I was chaffing, and wished he had gone in to catch Newcombe.
2757. If he had been waiting for the burglar, Newcombe was the first burglar who entered those premises? Yes.
2758. When you came to the side door was not Newcombe right inside and almost up to where Quelch was standing? Past him.
2759. That is better for my case still. You chaffed him about it, did you not, Coghlan? I was chaffing Newcombe about his (Quelch's) not going to meet Newcombe.
2760. *Mr. Bull.*] Were you chaffing Newcombe or Quelch? Newcombe.
2761. *Mr. Abigail.*] Before Quelch? Yes.
2762. What did you say to Newcombe before Quelch? I think I said I would have given a fiver if he had gone in to catch Newcombe, for the fun of it.
2763. I suppose you will admit, as a reasonable man, that if Quelch had been in there to catch burglars he must have seen Newcombe come in and go to the gas to light it? You know the building? Yes.
2764. So do I. You know that here is the main store running right down here, and there is a desk right up to here [*indicating*]? Yes.
2765. And then there are a couple of steps, and the loft is up there, up a ladder? Yes.
2766. Now, the door leading into the door out of which Quelch came is here; you go down here and up a couple of steps, and here is the side door? Yes.
2767. Newcombe had got in the front door, had turned the gas on here, had struck a light, and was in the act of lighting up. Now, if Newcombe is telling the truth, and Quelch is telling the truth, and Quelch was over here, on his own admission, watching for the burglar before you came up, could he have failed to detect Newcombe? I should have thought he could hear; but he might possibly not have been able to see the light, which was at the back of him.
2768. He would have heard the noise? Yes.
2769. It is only about as wide as that [*indicating*]? About that.
2770. So that if he had been waiting and was alert, waiting for the burglar to enter, he must have heard the key turn in the lock and the door open, and then have heard the footsteps right up to parallel with him, and heard the match struck; and it was only when the stream of light displayed itself that he rushed out after you? I could not say.
2771. Did you see any light? I could not see any light.
2772. The door that Newcombe opened was very difficult to open, was it not? Yes. It was always difficult.
2773. And you know that it required a considerable shove, and made a grating noise? It either had to be shoved or lifted.
2774. And it made a noise in opening? Yes.
2775. So that it would have made sufficient noise for anyone in the main building to have heard it? Nobody could get in the door without making a noise.
2776. When Quelch came out he never said a word about hearing Newcombe coming in? No.
2777. And it was only when Newcombe came round that anything was said about Newcombe opening the door? I do not think anything was said about that.
2778. At any rate, from first to last that night Quelch had never said anything about Newcombe? Not so far as I can recollect.
2779. *Mr. Bull.*] I understand that these premises were being used as a store in connection with the Charities Organisation? The Government Asylums.
2780. And the character and description of stuff in there are the usual character and description of Government stores for destitute people? Yes.
2781. The boots, for instance, 9's and 10's, what description of boots were they? Blucher, with the ordinary brand on. They were always branded there.
2782. Branded with the Government brand? Yes.
2783. And I suppose there were other marks of identification upon different articles which were in the store there? Well, in some instances there were.
2784. Of course, I do not mean to say that a reel of cotton would be branded, but I suppose the things were generally those articles that could be easily identified as Government property? All kinds of stuff had the Government brand? All bulk stuff could.
2785. How long were you there in charge of this place, or in connection with it? I was there from 1892.
2786. Do you know that in the immediate vicinity of this place several burglaries had been committed? About that time?
2787. No; in that vicinity. Do you know Mr. Brush's house? Yes.
2788. How far is that from this place? About 30 yards.
2789. Do you know Mr. Alderman Poole's house? Yes.
2790. How far would that be. It is really on James-street, is it not, just at the back of this place? His house is up at the corner of Cleveland-street.
2791. *Mr. Abigail.*] About a quarter of a mile away? Yes.
2792. *Mr. Bull.*] I am speaking of the place at the corner of James-street? That is one of Mr. Poole's terraces.

2793. Do you know that just shortly before that a burglary had been committed in that house? No.
2794. Do you know Mr. Stedman's residence on the other side of Pitt-street? Yes.
2795. Do you know that Stedman's house had been burgled at least twice just immediately before this? I think I recollect it.
2796. Not only had his place been twice burgled, but do you not remember that Mr. Stedman himself had been knocked down in the street and a bag stolen out of his hand within a stone's throw from this place? I remember that.
2797. A sum of £160 or £180 was taken from him? Yes, about 6 o'clock.
2798. In broad daylight in summer time? Yes.
2799. Right opposite St. Paul's Church? Yes.
2800. Do you know some premises occupied by Kimber? Yes, they were empty then.
2801. Immediately next door? Yes.
2802. Do you know that these premises of Kimber's were the resort of questionable characters? When Kimber was there.
2803. And afterwards? Yes, they were a very low class of people all about there.
2804. You are speaking, of course, of Kimber's time? Yes.
2805. And all the time? Yes.
2806. Kimber's premises are immediately at the side of it? Yes.
2807. Now, I take it you have heard or read something of burglaries every day. Quelch's account to you was that he saw a very suspicious character standing opposite these premises? Outside.
2808. On the opposite side? No, on the same side of the street.
2809. In the very front of the place? Yes, in the front. The constable told me, of course, that he was under the impression he was watching the people inside.
2810. And, I suppose, from your experience, at any rate what you read of burglaries, is that there is usually somebody on the watch outside while somebody else is looting the place? Yes.
2811. You believed Quelch when he told you of the man he saw there, and whom he had followed? I thought I saw a man myself.
2812. Quelch described to you, did he not, the course which he himself said that man took? Yes.
2813. That the man had gone into the park? No.
2814. That Quelch had gone into the park? Yes.
2815. And that he had followed the man who had gone into Castlereagh-street? Yes.
2816. Which would enable him to get into James-street, a street running from one street to the other? Which would enable him to get round to the back of these premises.
2817. Then there is a gate leading from the back of these premises of yours into James-street? Yes.
2818. Communication could very easily be made from anybody in James-street to anybody in the back portion of these premises? Oh, certainly, yes.
2819. Quelch was in his uniform, helmet, and all? Yes.
2820. Did you see any receptacle for property, if his disposition was to steal? Did you see anything with him at all? With the constable?
2821. Yes? No.
2822. Was he carrying anything at all when you say him come through this doorway, the hinges from one door of which had been removed? No.
2823. Carrying nothing? No.
2824. Immediately, just before you came to the door, out of which he came, you had been into the water-closet, had you not? Yes.
2825. And I suppose anybody could hear you walking on the asphalt? Yes.
2826. Anybody from the inside? In the daytime I could always hear people coming in.
2827. Well, I suppose when the place would be particularly quiet, as at night time, you could hear very easily? Yes.
2828. What distance had you walked from the w.c. before Quelch sprang out? From the water-closet?
2829. You had just left the water-closet and you were going towards the door? About 2 yards.
2830. And I take it that the portion of the premises where Quelch was would be quite dark? Oh, yes.
2831. In fact before there was any attempt to light gas in the place it would be in utter darkness? Yes.
2832. Do you remember who it was gave instructions to telephone to the police. Who was it said, "Get on to the telephone and call somebody from the Police Station"? At the time of the burglary?
2833. After you entered the premises, who was it asked to telephone to the police? I could not say, because I rushed and got a knife and lit a candle and rushed up-stairs.
2834. You got some weapon with which to arm yourself and went up-stairs? Yes, and the constable with me.
2835. *Mr. Abigail.* Did you go first? Yes.
2836. *Mr. Bull.* Another insinuation against the Police Force.
2837. Did Quelch ask you to go in front of him? No, he did not.
2838. I suppose you knew the way better than Quelch? Certainly.
2839. Immediately the telephone was used, immediately afterwards, did not Senior-serjeant Bell and some other officer come down? Yes.
2840. Was there any insinuation made by you or by Newcombe on the place that Quelch was acting in any other capacity than that of a police officer there? No.
2841. *Mr. Abigail.* It was not his duty.
2842. *Mr. Bull.* I suppose Senior-serjeant Bell and the other officer had a look through the place too? Yes.
2843. Do you remember whether any screw-drivers were found there? Yes, there were two screw-drivers.
2844. Did they belong to the premises? No.
2845. I see one of them is branded "F.L.P." It looks very like that. Those do not belong to the premises in any way [*Two screw-drivers produced*]? No.
2846. And where were these found? Found on the table.
2847. Just inside? Just inside the door.
2848. I suppose you know something of carpenters' tools? Yes.
2849. This is, to all intents and purposes, the formidable screw-driver the carpenters' use. It is a carpenter's screw-driver.

Mr. T.
Coghlan.
Nov., 1897.

- Mr. T. Coghlan.
1 Nov., 1897.
2850. *Mr. Abigail.*] Another very strange element in this case. It is not a burglar's jemmy.
2851. *Mr. Bull.*] It would make a very good jemmy. It would open any door here I am sure. (*To the witness*): These you say were found on a table just inside? Just inside.
2852. You would not suggest that the policeman had had these up his sleeve, would you? I made no suggestion.
2853. Do you know that the policeman had, while he was there, his revolver, baton, and handcuffs? I do not know. I did not see them.
2854. Have you made any inquiry to ascertain what time Quelch left the Police Station that evening on duty? No.
2155. Would you be surprised to know that he left the Police Station on duty that evening at Redfern at 6 o'clock? He was on duty at the time.
2856. I am asking you now would you be surprised to know that he left the Police Station and went on duty at 6 o'clock? That is the usual time.
2857. Do you know what his rounds were; do you know what beats he worked before he reached that place that night? No.
2858. How far is this place from the Baptist Estate? More than half a mile.
2859. Would you be surprised to know that when he left the station he worked those beats? Do you know the number of this beat in which this store is situated? No.
2860. Would you let me tell you that that store is situated in beats Nos. 1 and 2. At any rate, the Baptist Estate is quite half a mile away? Fully that.
2861. If I understand your evidence it means this: that whoever packed up those things for the purpose of taking them out did not do it in a hurry? No, they did not.
2862. That is, it was not somebody simply getting in quickly and putting something quickly in a bag, but it was plainly assorted as you say? Yes.
2863. How long would you say it would take, knowing the locality of the different goods, and knowing the assortment, to get those things together? It would take me half an hour.
2864. And you knew where to put your hands on them, and how to select them as to quality. It would take any other man a little longer? Yes.
2865. *Mr. Abigail.*] There would be time enough between 6 and 7.30, would there not? Yes I think that.
2866. *Mr. Bull.*] I am going to account for Quelch's whereabouts for every minute until he saw the place. Do you remember giving Quelch a list of the articles in the presence of both Bell and Harrison? There was a list partly made out.
2867. Did not you supply the very paper from your own establishment? I supplied some paper.
2868. And did not you give a list or inventory of the property ready for removal at "Myall House," Cleveland-street, 26/6/96, 7.30 p.m.? There was a list made out.
2869. Who made the list out? I think it was the police.
2870. Was it not Quelch, in the presence of both Bell and Harrison? Yes.
2871. Was not the list made out by Quelch, written down on paper supplied by yourself, at your dictation, and in the presence of both Bell and Harrison? I will not swear that Constable Quelch made it out. It was made out by one of the three.
2872. You say it was made out by the police? You do not know which one? It was made by one of the three? Yes.
2873. Did not the list which you gave Quelch purport to be a list of the property packed for removal? No, I believe it was not the whole lot of it.
2874. *Mr. Abigail.*] Have you seen this list before? I must have. [*Exhibit No. 20*].
2875. *Mr. Bull.*] Do you remember the first item which you wrote out as a portion of the property packed up to be taken away, "46 yards of bleached holland"? There was some half-bleached holland.
2876. When you gave the list of women's boots here, it is a significant thing you did not give the names of any men's boots? There were men's boots there.
2877. There is not a single man's boot in the list you gave? As I said before, the list was not complete, but there were boots there.
2878. Do you mean you found other boots packed up to take away after the police left which you did not show to the police? No.
2879. Will you swear that you reported to the police the packing up of any other goods for the purpose of removal than what are entered in this list that I will read to you? Let me hear the list first.
2880. *Mr. Abigail.*] Show it to him.
2881. *Mr. Bull.*] There is something on it I do not wish him to see.
2882. *Mr. Abigail.*] There is something on this list, I see now. I ask my friend to put this list in when he has done with it.
2883. *Mr. Bull.*] It is only a memorandum of the whole circumstances, of everything that took place at the time, in Quelch's own handwriting. (*To the witness*): Will you swear that you gave or nominated a pair of men's boots at all, whilst the police were there? To the best of my belief there were Blucher boots there.
2884. "Russia crash," what's that? Kitchen towelling.
2885. I will read this list: "5 pairs of women's leather boots, B.A." What does B.A. mean? The brand on the bottom.
2886. "Three pairs of women's vamps, size 7." What is that? They are women's boots.
2887. They are a description of women's boots? A kind of sateen.
2888. They are a kind of boot which is supplied to the older women in these societies, for people who have soft feet? Yes.
2889. "Two pairs basil slippers, size 6; 2 pairs cloth slippers, size 7; 1 dozen braces, D.E." What is the meaning of that? Double-ended.
2890. "One dozen women's single B.C.H." What is B.C.H.? Brown cotton hose.
2891. "One dozen women's single B.C.H.; 1 gross of pairs of laces; 4 pairs of leggings, men's; 3 dozen table spoons; 3 dozen tea spoons; 3 dozen dessert spoons. Branded." Branded what? N.S.W.G.
2892. "Seven dozen Brook's cotton; 7 dozen Coate's cotton; 1 lb. of black thread; 1 lb. of white thread; 2 waterproof sheets; 12 dozen of tape, white, 1 and 9; 1 dozen fine tooth-combs; 2 gross of white brace-buttons; 1 set of draughtsmen; 2 gross of brace-buttons, black; 9 pairs of specs." Are they merely coloured glass or not? For the old men and old women.
- 2893.

2893. "Two corkscrews." What do you keep them for in a charitable institution? For the hospitals.
2894. "One shoemaker's emery board; one pair of eyelet-pliers." Then, written on it, "Inventory of property packed ready for removal at "Myall House," Cleveland-street, 26/6/96; 7:30 p.m." Now, there is nothing there about men's boots? But there were more goods than that.
2895. There is nothing else on that, excepting a memorandum which I do not suppose you saw, something written by Quelch.
2896. *Mr. Abigail.*] You were never asked to sign the inventory, were you? No.
2897. So that you cannot certify to the correctness of this? No.
2898. Have you ever seen this list before? Yes, I have seen that.
2899. Did you ever check it? No.
2900. And you did not dictate it, did you? Yes; I called out. I think Newcombe and I called out and picked them up.
2901. Notwithstanding the fact that men's boots are carefully left out, you say that there were men's boots there—9's and 10's? Yes.
2902. And men's slippers? Yes.
2903. And in each case there were 9's and 10's boots, and 9's and 10's slippers? Yes.
2904. And will you tell his Worship were the 9's and 10's kept up the loft in the same place, or different places? No, in different places; the sizes were all together.
2905. Were the slippers kept in separate places? Every size was kept separate according to its size.
2906. *His Worship.*] All branded with the Government brand? The slippers were not.
2907. The boots were? Yes.
2908. *Mr. Abigail.*] This brand could easily be taken off? I could not say.
2909. It only wanted a rasp to rasp them off. The brand was just there (*indicating*); was it not? Yes; it was there.
2910. *His Worship.*] I do not think this matter of the sizes of the boots is at all pertinent to the matter.
2911. *Mr. Abigail.*] I am trying to show that these boots were his (Quelch's) size. (*To the witness*): You say that all these things were put in separate places, according to their size? Yes.
2912. I am advancing that to show that they were carefully picked out by the burglar.
2913. *Mr. Bull.*] Plainly, according to this gentleman, the person who was in there removing these boots must have been there three-quarters of an hour.
2914. *Mr. Abigail.*] This gate opening into the lane at the rear is a large door with a bolt on it? Yes.
2915. Were there any signs that an entry had been made through that large door? I never looked.
2916. Was not the place locked? There was a wicket gate; that was not locked.
2917. With a bolt on it? Yes.
2918. Did Quelch take you up there to show you that they had entered there? No, because we knew they had entered from the front.
2919. Was there any question about their having entered from the front? No.
2920. It would have been easier to have entered from the back? No.
2921. *His Worship.*] Was there anything to show where the men had entered? The doors were open.
2922. *Mr. Abigail.*] Would it have been easier to have got into Kimber's, unoccupied yard next door, and then have got over? I should say the easiest way was to walk up the passage.
2923. The easiest way to escape detection would have been through Kimber's yard, over the fence? Yes.
2924. And at 7:30 at night that would have been the most burglarious way of getting in, from the point of view of an expert burglar. It would have been an easier way, would it not, in order to escape detection, to come over that fence from Kimber's yard? It would have a pretty good jump.
2925. Still, it was easy to climb up, using the cases? But the fence is 7 feet high.
2926. You will admit that, in order to invite detection, the best way for a burglar to proceed would have been from the front? Yes.

[The Commission adjourned at 4:30 p.m., until Wednesday, 3rd of November, at 10 a.m.]

WEDNESDAY, 3 NOVEMBER, 1897.

[The Commission resumed its sittings at 10 a.m. in the Licensing Court, at the Central Police Station.]

Present:—

MR. WHITTINGDALE JOHNSON, S.M. (SOLE COMMISSIONER).

Mr. J. R. Dacey, M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, Solicitor, appeared to support the charge; Mr. Charles Bull, M.L.A., Solicitor, appeared to defend Senior-constable Quelch.

Charge No. 6 (continued):—

Constable John McIntosh was called and sworn:—

2927. *His Worship.*] What is your name? John McIntosh.
2928. Where are you stationed? At Ashfield.
2929. As a constable? Yes.
2930. *Mr. Abigail.*] Were you on the Redfern beat in June, 1896? I was.
2931. Were you then under the command of Senior-constable Quelch? Sometimes under the command of Quelch and sometimes under the command of other senior constables.
2932. Do you remember an alleged attempt at robbery at "Myall House"? I do.
2933. On the 26th of June, 1896? Yes.
2934. Were you on duty that night in the vicinity of "Myall House"? I was.
2935. And was "Myall House" included in your beat? It was.
2936. What time did you go duty? Seven o'clock in the evening.
2937. Did you pass "Myall House"? No.

Constable
J. McIntosh.
3 Nov., 1897.

2938.

- Constable J. McIntosh.
3, Nov., 1897.
2938. Why? I was working the beat. In working the beat you take a street and miss the next one, so that I did not pass there.
2939. This was a street you missed? Yes, I turned into Pitt-street.
2940. Did Quelch know that you were on duty on that beat that night? Yes.
2941. Did he know that you would miss passing "Myall House"? Yes.
2942. Then would it be a fact that on that night there would be no policeman patrolling the beat near "Myall House" from about half-past 5 until a quarter to 8? Until about a quarter to 9.
2943. About a quarter to 9? Yes, that would be so.
2944. Had Quelch, previous to this 26th of June, given you any instructions about "Myall House"? No.
2945. Had you been working that beat all that week? All that month.
2946. During the whole of the month? Yes.
2947. And during that week in which the 26th of June came did he tell you anything about "Myall House"? No.
2948. Did he give you any particular instructions to watch it? No.
2949. If Quelch had been particularly requested to keep an eye on that place, and had been informed that it was a likely place, and an easy place to be looted, would it not have been his duty as a police officer to have acquainted you with the nature of that information which he got? Yes, I should say it would.
2950. In the ordinary course of things, the man on the beat should certainly be told by the superior constable? Yes, had he known that such a place was likely to be robbed.
2951. Well, then, did you know as a matter of fact whether there was any store at the back of "Myall House"? I did not.
2952. You did not know that there was such a thing as a store there, did you? I did not.
2953. Were you sent to Newtown Road that night? No.
2954. Is there a lane at the rear of the store. Yes.
2955. Is that James-street? That is James-street.
2956. Would it be part of your duty, patrolling that beat, to include James-street? It would not, and it would, to a certain extent; we could go through the lane, but we did not go through it.
2957. As a matter of fact, you did not go through the lane that night, did you? I did not.
2958. And you received no instructions from your senior, Quelch, to go through the lane? No.
2959. Neither that night, nor on any previous night? No, I cannot say that I did.
2960. What time should Quelch have been on duty and off duty that night? 6 p.m. to 10 p.m.
2961. Then he was on duty from 6 p. m. till 10 p.m.? He was.
2962. Would anybody, with the exception, of course, of a police officer, know that there would be no policeman patrolling the street in front of "Myall House." Could anybody outside the Force know? Of course, I cannot say. It is possible for anybody to know the time that the constable would pass.
2963. The instructions for the beat are issued at the station? They are.
2964. And they are not always the same? They are always the same.
2965. They are continually being changed? They are always the same.
2966. How long have you been in the Force? I joined two years last February.
2967. During that two years, with the experience you have got as a police officer of two years' standing, would you say that 7 o'clock in the evening is an unreasonable hour for a burglary?
2968. *Mr. Bull.*] I object.
2969. *Mr. Abigail.*] Is it the usual thing?
2970. *Mr. Bull.*] I object to it.
2971. *Mr. Abigail.*] I put it now that I am entitled to ask this question as a matter of police experience; because I want to show that one of the greatest elements of suspicion in the constable's conduct is that he says a burglary was committed at 7. I want to show how extremely improbable it is that a burglary would be committed at 7 in the evening, and from that I want you to draw the deduction that the constable is not to be believed, and then to ask him what he means by saying that a burglary had been committed.
2972. *His Worship.*] It would not be a legal burglary. This would be breaking and entering a house. The question is not admissible at all. House breaking occurs at any hour of the afternoon.
2973. *Mr. Abigail.*] After the alleged burglary, did you go into "Myall House"? Were you called in? Yes.
2974. Who called you in? Senior-constable Quelch.
2975. From what locality were you called? At the corner of Pitt and Cleveland Streets.
2976. And at what time? Between twenty minutes and ten minutes to 9.
2977. Did you go back with him to the store? I went straight along the street to the store, yes.
2978. And whom did you find there when you went in? I found Senior-serjeant Bell, Mr. Coghlan, another gentleman I do not know, and two ladies.
2979. The gentleman you did not know, you now know as Mr. Newcombe? Yes.
2980. Did you see the stuff that was about to be removed? I did see the stuff.
2981. Did you see how it was packed up? I could not actually say as to how it was packed up. I looked at some of it; but I did not take particular notice of it.
2982. Did you notice the screws from the hinges of the outer door? I saw that the door was there, and the screws were taken out of the hinges, and it was open against the lock.
2983. Did you see that the screws had evidently been put down with the intention of being used again? They were put down, yes.
2984. Did you see any packing needles and twine among the stuff? Yes; there were packing needles. I cannot say I saw twine. I saw hank thread.
2985. Did you see a sailor's palm? Yes.
2986. *Mr. Bull.*] These beats that you speak of are every night, I understand, in the same condition? They were every night in the same condition while I was there.
2987. About this time? Yes.
2988. The night of the 26th June was no exception? No.
2989. Perhaps I might enumerate other beats; do you know beat No. 1? Yes.
2990. No. 2? Yes.
2991. No. 4? Yes.
2992. No. 9? Yes.
2993. No. 11 and No. 12? No. 11, not 12.

2994. Do you know that these beats between 6 and 7 are without police protection? I do.
2995. I suppose the circumstance of this place, "Myall House," not being under police surveillance or protection between 6 and 7, would be known to the night-watchmen, and people like that? Oh, yes; it would be known to them.
2996. Mr. Brewin, for instance, would know that—you know him, don't you? Yes, I know him.
2997. He would know whether or not this place was continuously under police protection? He would.
2998. Do you know that Brewin has been a night-watchman in that district for a very long time? Yes.
2999. Do you know Jamieson? I do.
3000. Is he another night-watchman? Yes.
3001. He would know? He would know.
3002. "Myall House" is situated in Cleveland-street? Yes.
3003. Have you had opportunities of seeing what the traffic is there between 6 and 7 o'clock? Is not a portion of Cleveland-street very much trafficked and frequented between 6 and 7 o'clock? It generally is on race days.
3004. Is it not the principal route of persons coming across from Moore Park and Surry Hills into Redfern and the Glebe, and other places? It is.
3005. Is not Cleveland-street the main thoroughfare from the eastern suburbs across to the western suburbs? It is.
3006. Let me ask you this: In your experience as a police officer, burglaries or attempted burglaries have been reported at all hours of the day, have they not? They have.
3007. You were never told not to watch this place by Quelch? I was not.
3008. And you were never told not to go down this lane by Quelch? I was not.
3009. And you were never told not to satisfy yourself, or acquaint yourself, with the fact that there was a store in connection with some charitable institution there? I was not.
3010. Is it not a fact that Quelch gives very material and very great instruction to the men under him with regard to their conduct on their beats? So far as I am personally concerned he always has to me.
3011. But you would not, nor would any other man, be on this beat between 6 and 7 o'clock? No.
3012. And, therefore, any instruction from Quelch, or, indeed, from anybody else, would not be applicable to that particular beat between those hours? No.
3013. You would be somewhere else? Yes.
3014. You were, as a fact, placed in charge of the place that night until you were relieved? I was.
3015. And you were placed there by Quelch? I was brought to the place by Quelch, and asked to stop there by Senior-serjeant Bell.
3016. You were brought to the place by Quelch, and there were Senior-serjeant Bell and some other officers there? Yes.
3017. Who allots these beats? They are all put down on the board, and every man takes his number.
3018. They are all put on the board by the inspector, or by some subordinate officer, possibly the senior-serjeant? I should say by the inspector.
3019. It would not be done by Quelch? No.
3020. In the book kept at the station for reports of either robberies or attempted robberies have you seen several entries with regard to attempted burglaries at different places in the vicinity of "Myall House"? I have not seen the entries in the books. They have been read out to us always.
3021. You have had certain entries read out to you? I had.
3022. Do you remember, for instance, an attempted burglary at Mr. Stedman's, "Melrose," Cleveland-street, Redfern? I do.
3023. Can you say, from your recollection, how many reports of either attempted or actual burglary were read out to you with regard to Mr. Stedman's place? Only one.
3024. You know James-street? I do.
3025. That is the street at the rear of these premises running from Pitt across to Young-street? Yes.
3026. Now, do you know as a fact that very questionable characters assembled in James-street from time to time? I do.
3027. Do you know Kimber's premises, the premises next to "Myall House"? Yes.
3028. Some premises which were occupied for a long time by a Walter Kimber? Yes.
3029. Do you know that complaints were made to the police by the Council and by the other persons there of the destruction of the electric arcs and globes? I cannot recollect that.
3030. Do you know this as a matter of police information, that Mr. Stedman actually has a man, his own private watchman, watching his place night after night? I do.
3031. How far distant would you suggest to the Commissioner is that from "Myall House"? It is not very distant. I could not exactly say.
3032. Would it be more than 100 yards? Yes.
3033. How much further? It might be from 200 to 300 hundred yards.
3034. Speaking of premises in Pitt-street and also premises in Pitt-street near the corner of James-street, do you know, as a matter of police information, that the gas fittings from several houses there have been reported stolen? I do not know that.
3035. You do not that? No.
3036. You are not aware then that in these books there are reports of the stealing of gas fittings from a house at the corner of Pitt-street and a lane running through? Probably I might have heard, I do not recollect it.
3037. Have you seen this entry. [*Exhibit No. 21*]: "Stolen during the night of 14/3/94 from an unoccupied house, No. 103 Pitt-street, Redfern, the property of Thomas Glover, 101, same street, three gas chandeliers, value 30s., identifiable. Effected by getting through a fanlight. No person suspected"? I cannot say I recollect that.
3038. Do you know that Mr. Glover's premises were again raided during the night of the 4th of April, 1894, and a report sent in? "Stolen during the night of the 4th instant (April, 1894), from an unoccupied house, 109 Pitt-street, Redfern, the property of Thomas Glover, No. 5, Pitt-street, Redfern, a quantity of chandeliers and gas-fittings, value £4. Damage done to the extent of £10. Effected by cutting a piece of glass out of the back window with a diamond. No person suspected." [*Exhibit No. 22.*]
3039. [*His Worship.*] Is that place in your ordinary beat? It is in the ordinary No. 2 beat.

Constable
J. McIntosh.
3 Nov., 1897.

- Constable J. McIntosh.
3 Nov., 1897.
3040. And you pass it every night? About once in three hours.
3041. And knowing this as a place where burglaries have been committed, you are on the *qui vive* when you pass it? We work the beat as it is laid down.
3042. *Mr. Bull.*] Do you try the doors of the different places to ascertain whether they are fastened or not? We do.
3043. *His Worship.*] Did you try that house? We do not try any dwelling-houses, only shops.
3044. *Mr. Bull.*] Now this place being a favourite locality for burglaries, Senior-constable Quelch having been specially asked by an officer of "Myall House" to keep a look-out for suspicious characters and to have a proper watch set for the purpose of protecting the place, was it not his duty to acquaint you, who were on the beat, with the information he had received, and to particularly direct your attention to "Myall House"? Yes, if he were informed to that effect.
3045. Now, as a matter of fact, did Quelch threaten to report you on that particular night? No, not on that night.
3046. What night was it? One time he did; it was after that some time.
3047. Tell me when it was, and what it was about? For going to what are known as 12 and 13 beats, *via* Redfern-street to Young-street.
3048. Were they your proper beats? Yes.
3049. Had he seen you previously on those beats? Yes.
3050. Had he passed you? Yes.
3051. Had he spoken to you at all? No.
3052. What did you tell him? I said that if he was informed that I was to go along Cleveland-street it was all right, and I should do so. He said, "I have no wish to report you, but if Mr. Lawless sees you I will have to." And then I said, "Very well, if you report me I will report you for neglect of duty."
3053. *His Worship.*] Then you were off your beat? No, I was not.
3054. How could he report you? It was an order given by Mr. Lawless to go round that way.
3055. *Mr. Bull.*] Then you said that if he reported you you would have to report him for neglect of duty? Yes.
3056. What did you mean by that? For neglecting to tell me to go that other way.
3057. Then there had been a change in the working of the beats, and he had neglected to inform you? The senior-constables had been informed to tell the men.
3058. And had he told you of this change? No.
3059. As a matter of fact, did he report you? No.
3060. *His Worship.*] And would that change take you past this place? It was going to the beat.
3061. It would have taken you past that house? Yes. It was after Mr. Stedman had been robbed. It was after this had occurred there.
3062. *Mr. Abigail.*] Without special instructions, you would not have taken James-street in your beat? No.
3063. The store is a long way from Cleveland-street? It is a good way back.
3064. Right up from the front gate, right up to the street, it is on an incline? Yes.
3065. And it is all asphalted? Yes.
3066. And anybody walking up that asphalt path would make a considerable noise—it is a hard asphalt? Yes.
3067. *Mr. Bull.*] You have had frequent conversation lately with Mr. Coghlan? No.
3068. Have you had conversation with him within the last twelve months? Oh, yes.
3069. What would those conversations have relation to—matters of police duty? No; merely idle talk.
3070. You mean that as a police officer you stood talking to him in the street? Yes.
3071. Near this place? Yes; sometimes in front of the place.
3072. Would that be at night? Sometimes at night, and sometimes during the day.
3073. Did Coghlan in any of those conversations say that he had ever mentioned to Quelch the necessity of having special watch kept upon this place? No.
3074. How many times do you think you have been in personal conversation with Coghlan near these very premises? I could not say for a certainty; but several times.
3075. I suppose you would be in police uniform upon almost all, if not all, occasions? I think I have upon all occasions.
3076. This alteration of the beat that you speak about would be at the instance of the inspector? Yes.
3077. And would not the sole object of this alteration be simply to prevent gossip by the men meeting upon different beats? It could not be, because scarcely two men ever meet at the same corner.
3078. Would not that be the effect of the alteration, to prevent men on the 11 and 12 beats going over on the 3 and 5 beats with the 3 and 5 men? No, that would not be the effect of it. The 11 beat is at Newtown road and the 12 is at Bourke-street.
3079. Perhaps I am making a mistake with regard to the beats? 12 and 13.
3080. *Mr. Abigail.*] As a matter of fact you have not spoken to Coghlan since the removal of the office from "Myall House" to the Domain? No. I do not think I did.
3081. Of course Coghlan lives at Redfern? Yes; he lives in Pitt-street.
3082. And you have not particularly spoken to him about "Myall House," about this robbery, in this idle talk? I cannot say that we did. Probably we may have mentioned the robbery. I could not say for certain.
3083. But you had no conversation with Coghlan prior to the alleged robbery there? No.
3084. In fact you did not know him then? I did not know him before.

Mr. Walter Alfred Newcombe, clerk, Charities Department, was called and sworn:—

- Mr. W. A. Newcombe.
3 Nov., 1897.
3085. *His Worship.*: What is your name? Walter Alfred Newcombe.
3086. You are a clerk in the Department of Charitable Institutions? Yes.
3087. *Mr. Abigail.*] Do you remember 26th of June, 1896? Yes.
3088. You were assisting Mr. Coghlan at "Myall House"? Yes.
3089. That is a branch of the head office? Yes.
3090. There is a store, a galvanised iron building, with an addition, a sort of lean-to? Attached to the side, yes. 3091.

Mr. W. A.
Newcombe.

3 Nov., 1897.

3091. And that was a store and an office? Yes, for bulk stores.
3092. At the time that we speak about? Yes.
3093. There was a telephone attached to it? Yes.
3094. In a conspicuous place? Yes.
3095. Nobody going into main building could fail to detect the presence of the telephone? No.
3096. And the front door was rather difficult to open? Yes.
3097. It was a large heavy door? Yes.
3098. What were the locks on it? There were two locks. One was a Yale lock, and the other was an ordinary lock with a large key. Just an ordinary lock you know that you turn the key of.
3099. Did it make a noise when you were opening it? Yes. It made enough noise to —
3100. Waken the dead? Yes.
3101. Certainly enough noise to alarm a burglar who might have been inside, or a policeman who might have been on the inside watching a burglar? Yes. He would have gone away very quickly.
3102. Now, in opening the door would it also make a noise? Yes.
3103. Why? When I open the door I have got to lift it, and then it makes a grating noise.
3104. It was stiff? Yes; it was always stiff.
3105. And then it required manual force to push it open? Yes.
3106. And it would make a grating noise when it was pushed open? Yes.
3107. Now, on this 26th of June you were with Coghlan, and prior to going in you passed the front of the place? Yes; we did.
3108. As a matter of fact, you went up to have a nip—refreshment? Yes.
3109. And after the refreshment you came back to resume duty? Yes.
3110. Now, was it about 7 when you walked up the asphalt path from Cleveland-street to get into the store? Yes, between 7 and a quarter past; something like that.
3111. Were you in conversation? Yes.
3112. When you were walking up the asphalt path? Yes.
3113. And you talk much louder than Coghlan? I think so.
3114. And it was a still, calm night? Yes; the moon was just getting up.
3115. Coming up that asphalt path, when you approached the store, do you think that, if anybody were watching inside the store and were on the alert, they would have heard your conversation and detected your presence by the sound that you made on the asphalt? Oh, yes.
3116. Now, I want you to relate all the circumstances in their order and sequence from the time that you both got up to the door of the store? Well, when we were walking up the yard on the asphalt walk we stood outside of the door about a yard and a half away.
3117. *Mr. Bull.*] What door are you speaking about? The front door of the store. And we were talking there for about five or ten minutes.
3118. *Mr. Abigail.*] By-the-by, there are steps leading up to that door? Yes.
3119. Two or three steps? Yes.
3120. Wooden steps? Yes. And he gave me the keys.
3121. Coghlan? Yes. While he went round to the side to ease himself, and of course I took the keys to open the door, and they made a noise.
3122. What did he say to you? He said "Oh, take these and open up, and get the books ready."
3123. "Open up and get the books ready"? Which I did.
3124. Before that you had to open the door. When he went to the W.C. that was about 12 feet away? Yes.
3125. When he walked away what did you do; did you mount the steps and open the door? Went straight to the steps and opened the door.
3126. Then you tell us that it made a great noise? The door, yes, made a grating noise.
3127. And being a galvanised iron building, I suppose it would make all the more noise, more noise than a brick? Yes.
3128. When you opened the door what did you do with the keys? As soon as I opened the door I took the big key out, because I had to do that, and with the Yale key on it too I dropped it in a baking-tin.
3129. And that was lying on a centre table? Just at the side of the door when you go in. I dropped them down and walked in.
3130. That made a noise, did it not? I rather think it did.
3131. Then, what did you do? I walked up to the side of the desk; there was a partition in the centre.
3132. There was a desk running along the side of this store? Yes.
3133. You walked along through to the gas and turned it on? Yes.
3134. Of course, you knew the place in the dark, and could go straight to it? Yes.
3135. When you turned the gas on, what did you do? I struck a match before I turned the gas on, and held it in my hand while I turned the little tap at the side, and with that I saw the door open.
3136. But you saw the door open by the light of the match? Yes; that was what attracted my attention.
3137. That was the door from the main building into this lean-to or side addition? Yes.
3138. And did the ray of light from the lighted match go right through the doorway? Yes; it threw a reflection through.
3139. And you saw this door open, and you uttered some exclamation; what was it? I called out, "What a fool you were to leave the door open."
3140. At that time Coghlan was in the W.C.? Yes.
3141. And you called out pretty loudly? Yes.
3142. Now, up to that time, had you heard anything to lead you to suppose that somebody was in that store? Yes, I dropped in a minute.
3143. Up to that time did you hear anything to lead you to the conclusion that somebody was in that store? No.
3144. Then immediately you saw the doors open you did drop to something? Yes.
3145. Immediately afterwards you heard a noise? Yes.
3146. What was it? Mr. Coghlan calling out, "Hullo, what's your game."
3147. And then you ran out? Then I ran out the same way as I came in, to his assistance.
3148. You ran out, then, from the front? Yes.

- Mr. W. A. Newcombe. 3149. What did you find? I found the constable there in front of him.
 3150. You found Constable Quelch in front of Coghlan? Yes; he had just started to relate the facts of the case.
 3 Nov., 1897. 3151. How was the constable attired? He had his uniform on.
 3152. Had he his helmet on? No.
 3153. Had he any pistol? No.
 3154. Did he have any revolver? No.
 3155. *His Worship.*] Had he his helmet on? No.
 3156. Where was it? In his hand, just putting on.
 3157. *Mr. Abigail.*] You said he had no revolver in his hand—had he no baton drawn? No.
 3158. He had no weapon in his hand for offence or defence? Nothing at all.
 3159. Except his helmet that he was just putting on his head? Yes.
 3160. Tell me, if you had been in that little addition to the store on the alert for a supposed burglar to return, and you had on your person a baton and a revolver, and there were things about the store which you could have used as weapons of defence or offence, and you heard the supposed burglar outside returning and rushed out to catch him, would you have prepared yourself to attack him by drawing your revolver or your baton?
 3161. *Mr. Bull.*] I object to that.
 3162. *His Worship.*] I will not allow the question; it is not evidence.
 3163. *Mr. Abigail.*] I am going, your Worship, to draw the inference of guilt from the fact that the constable did not do what a common-sense person would have done.
 3164. *His Worship.*] That is not evidence.
 3165. *Mr. Abigail.*] Did the constable when you saw him appear to be preparing for an attack? No.
 3166. Or preparing to resist one? None whatever.
 3167. Did he seem to be rather alarmed than prepared? No.
 3168. Did he seem to be more prepared than alarmed or more alarmed than prepared?
 3169. *Mr. Bull.*] I object.
 3170. *Mr. Abigail.*] Did the constable seem to be prepared or alarmed? He did not seem to be prepared at all.
 3171. Now, if the constable says that he was there in that store prior to you opening the door, had not he ample opportunity of coming into the main building to surprise you before he rushed out and collided with Coghlan? Yes, he could have done that very easily.
 3172. Of course, if he had anticipated Coghlan's return by the front, the way that you had entered the building, and if he wished to elude capture, if he wished to get away from the alleged burglar, he would have done exactly what he did do, and have got out exactly in the manner in which he did through that door? Yes.
 3173. But if, on the other hand, his object was to detect the burglar, he would have gone into the main building and captured you?
 3174. *Mr. Bull.*] I object to that. What this gentleman would have done, and what anybody else would do, are different matters. Let us have what took place.
 3175. *His Worship.*] That is not evidence.
 3176. *Mr. Abigail.*] After you got out, and saw the two of them—Coghlan and Quelch—did you have any conversation with Quelch? Yes.
 3177. Tell us what it was? I said to him: "How is it you did not get inside, and ring up the police on the telephone, to come round and give you assistance?" He said he did not know the door was open—the side door.
 3178. That is, the side door, giving entrance from the main building into where he was, and through which the ray of your lighted match had shone? Yes.
 3179. How many feet is that door away from the door out of which he ran? Three or four feet.
 3180. *His Worship.*] Was that the door with the screws taken off? Yes; there were two doors with the screws taken off.
 3181. *Mr. Abigail.*] If he had been there, just behind that door with the screws taken off, say, five minutes before you came in, and he had been feeling round for some weapon of defence, or to understand the locality in which he found himself, could he have failed to detect the opening there? No; certainly not.
 3182. Because it was within arm's reach? Yes.
 3183. If he were there to surprise a burglar that would be his first measure of self-preservation, being afraid of an unseen foe in the dark. He said he did not know the door was open. Then what did you say to him? After he answered me?
 3184. Yes? We both then went in and did not say any more. I said: "You had better come in now and see if there is anybody here"—and we proceeded and went in.
 3185. So that it was you that suggested that he should go back with you and see if there was anything? Yes.
 3186. And did he do it? Yes, we trooped in then and lit the gas.
 3187. And then you also did? Yes.
 3188. Coghlan went in first and you followed, and Quelch after? Yes.
 3189. And when you lighted the gas what did you find? Found a lot of things strewed all over the place, but the first thing I picked up was two screw-drivers.
 3190. Are these they? I could swear to that big one.
 3191. You cannot to the little one? No.
 3192. It would have made a good weapon of defence? That is what I remarked at the time.
 3193. You took up this big one, did you not? Yes.
 3194. And what did you say to him? I said: "If the burglars were here, and we were here too at the time, they would have had these in their possession waiting for us, so it is no use going looking for them, they are gone now."
 3195. And these were in the main store on the table which ran up in the centre? Yes, on the table.
 3196. Laid down both together? Yes.
 3197. In a careful kind of way? Both together.
 3198. Nice and orderly? Yes,

Mr. W. A.
Newcombe.

3 Nov., 1897.

3199. Did you find some things in a bag? Yes.
3200. Where was the bag? Outside the store.
3201. Outside the door? Yes.
3202. Just out of the main building, in the lean-to, the addition? Yes.
3203. And it must have been within some inches of where Quelch was hiding? Yes.
3204. If he had been hiding there waiting for burglars, just inside that door which was screwed off its hinges, could he have failed to have touched this bag, was it not very near him? The bag was near him, close by him.
3205. And until you detected the bag did he say one word about the bag? No; he did not say anything about the bag.
3206. Was it not dark until you lit the place up? It was dark.
3207. Was the bag a bag belonging to the store? That I could not say.
3208. You could not say whether it was part of the material in the store or brought there? I could not say.
3209. Have you bags in the store? There were one or two to my knowledge. That was about twelve months ago.
3210. You do not know whether the bag in which these articles were found belonged to the store or was brought there? No.
3211. *Mr. Abigail.*] What sort of a bag was it? Chaff-bag.
3212. An ordinary chaff-bag? Yes.
3213. What did you find packed up in it? A considerable lot of things, a mixture, boots.
3214. Shoes? Shoes.
3215. Ladies' and gentlemen's? Yes.
3216. What were the sizes? Eights and 9's, I think.
3217. Did the shoes correspond in size to the boots? Yes, the shoes did.
3218. And in the store everything is put in the racks according to sizes? Yes.
3219. The boots are kept in one place and the shoes in another? Yes.
3220. So that whoever put these things in that bag must have deliberately and elaborately assorted them? Yes.
3221. They could not have been picked up in an indiscriminate way? No.
3222. *His Worship.*] And either in daylight or with a light? Oh, they had a light, because I picked up a piece of candle by the side of the screw-driver, and the same size.
3223. *Mr. Abigail.*] It had evidently been stuck up on the table? Yes.
3224. Did you go upstairs in the loft? No; I did not.
3225. Coghlan and Quelch did? Yes.
3226. Did you see a lot of things downstairs all ready to be packed up? Yes; on the table.
3227. Were they nicely packed up? Yes; the cotton was by itself, tapes by themselves; and then there were other things on the top, such as leggings.
3228. *His Worship.*] Then it must have taken some considerable time to select and pack these things? Oh, no; it could have been done in a very short time.
3229. *Mr. Abigail.*] In what time? About twenty minutes.
3230. Especially if the party sorting these things had had a previous knowledge of the place? They must have.
3231. It would then have been easier for him to pack them up in the time? Yes.
3232. Particularly if he had been shown over it a few days before? Yes.
3233. And he had had the locality pointed out of these separate articles? Yes.
3234. *His Worship.*] Had Mr. Quelch been shown over, and had the locality of those articles been pointed out to him? I believe so; I heard so.
3235. *Mr. Abigail.*] Who rang up the telephone for the police? I did.
3236. Quelch did not seem to be very well, did he? No.
3237. He did not busy himself about as an industrious constable would? No; it might have been his place to ring up the telephone.
3238. At any rate he did not suggest it, and when you suggested it to him he did not go to the telephone, and you did it? And I did it.
3239. And some five or ten minutes afterwards the police came down? Yes.
3240. Do you remember a sailmaker's palm being left there by some employee? I could not swear to it, it might have been.
3241. The palm is what these men use for sewing with a large needle? Yes.
3242. Had not you men in sewing frequently? Oh yes, often. Of course that was twelve months' before.
3243. And for that work these palms would be used? Yes.
3244. There were also hooks? Yes.
3245. For pulling bales about? Yes.
3246. *Mr. Bull.*] Mr. Abigail just finished by asking you about a palm? Yes.
3247. The thing that you described there was in use about twelve months before this? I mistook him.
3248. I am only repeating what you said. When did you see what you call a palm? It was about twelve or fourteen months prior to that. It was in 1894.
3249. Twelve months prior to this alleged burglary there you had seen this palm that you speak of? I did not see the palm that night. Exactly.
3250. You did not see anything of the sort which he describes there that night? No; I could not swear to seeing it.
3251. But somebody had been sewing bags or something of that sort some twelve months before, when something similar had been used by that person? Yes.
3252. Now this place, I understand, called a store, is some 30 or 32 feet long by about 12 or 14 feet wide? Something to that effect.
3253. And I suppose the goods which are kept there are kept sorted up in different places where those who are acquainted with the place can find them? Yes.

- Mr. W. A. Newcombe.
3 Nov., 1897.
3254. Which of you, you or Coghlan, is more in the habit of sorting goods out for persons who may require them to be sent away to the different establishments? Sometimes he did them and sometimes I.
3255. Are you more expert than he? No, I could not say that.
3256. Coghlan says somebody who knew where the goods were must have taken them from their places making a careful assortment of the things, and that it would have taken him at least half an hour himself to have picked these things out and packed them as he found them packed. He says it would take anybody who did not know the run of the place certainly longer than that. I suppose you will agree that the person who ever put the goods there must have been there twenty minutes or half an hour before you came there? Yes.
3257. Or he must have been there half an hour before you got there? He might have been there earlier.
3258. What you mean is that he might have been there shortly after 6, or shortly after you left the place. What time did you leave that afternoon? I was not there.
3269. Do you know whether Coghlan was there that day? Yes, he rang me up on the telephone.
3260. What time was that? In the afternoon, about 4 o'clock.
3261. What time did Coghlan leave the place that afternoon? I do not know.
3262. Are there regular hours, or usual hours, for your occupation there? The usual hour is half-past 4.
3263. At any rate, Coghlan would have left between half-past 4 and 5 o'clock? I could not say what time he leaves. He sometimes leaves at 6, and sometimes at 5.
3264. I suppose you would not be surprised to know that it was a little before 5 o'clock that he left that afternoon? I would not be at all surprised.
3265. Coghlan leaving, would anybody be in charge of the premises? Nobody.
3266. Possibly somebody got into that place between 5 and 6 o'clock. Possibly so.
3267. Certainly they must have been in for some time between 5 and 7? I could not say.
3268. Did not you tell us that it was shortly after 7 that you came on the scene? Yes, a quarter past 7.
3269. Did not you say "about ten minutes, certainly not later than a quarter past 7"? About a quarter past 7.
3270. So that I say if Coghlan left the place a little before 5, then, whoever had been in that place—unless they had been in in the daytime before Coghlan left—and that is not likely, is it? No.
3271. Must have got into that place, say, between 5 and the time you came there—ten to a quarter past 7? They must have.
3272. And it must have been during that time that these things were sorted and chosen? Yes; during that time.
3273. And, besides sorting these goods and occupying the time that would be necessary for that, I would suggest it would take some time to take these doors off their hinges? Not very long.
3274. Have you tried it? No.
3275. Tell me how many doors were taken off their hinges? One door was off, and another was hanging off?
3276. But two different doorways? Yes.
3277. We have not heard this before. How far distant would these doors be from one another where the hinges had been tampered with? About a yard or a yard and a half.
3278. Different openings? Yes.
3279. Where did the smaller door open out into—into a shed or outhouse? Yes. And that shed was locked, and the door of that was off its hinges.
3280. Is it a double door further on? That is the one I am talking about now.
3281. Then a large single door as well? Yes.
3282. Does not that open out into the yard where a lot of empty cases are packed? Yes.
3283. So that there are two doors opening into two distinct and separate places? Yes.
3284. Are they partitioned off; is the shed partitioned from the yard where the empty cases were? No.
3285. But there is the side of the shed, which would form a partition? Yes.
3286. Going out through the smaller door, you could not get beyond the shed through the shed? No.
3287. Going through the other doorway of which the hinges were off would lead you out into the yard, the premises outside, the enclosure where the empty cases were? Yes.
3288. All that I suppose would take a little time? It would not take very long.
3289. How long do you think now, as an expert at taking doors off hinges, it would take you?
3290. *Mr. Abigail.*] Are you an expert at taking doors off hinges? My friend objected to my putting a question like that to Quelch.
3291. *His Worship.*] I must disallow that, as I have disallowed the other.
3292. *Mr. Bull.*] This gentleman is there, and he observes the doors are taken off the hinges, and now I ask him how long does he think it would take to take the doors off? I am not an expert. I really could not tell you.
3293. I suppose this is an old building? To my knowledge, it is about five or six years old.
3294. Now, did you not use this expression to Mr. Abigail when he asked you Quelch's manner as he sprang out, "He was not alarmed"? Yes.
3295. Would you suppose, Mr. Newcombe, if Quelch was there, having noticed goods packed, and some interference with the place, if he was waiting there to surprise somebody who might return for this property, do you think he would light the place up? No.
3296. *Mr. Abigail.*] I object to that.
3297. *Mr. Bull.*] Would you? No; not if I were a policeman.
3298. There is no doubt about it, he was there fully dressed as a policeman in uniform? Yes.
3299. *Mr. Bull.*] I would suggest it would be a rather ludicrous position for a policeman to find himself in, burgling that place in full uniform, and carrying a chaff bag along the street?
3300. *Mr. Abigail.*] Oh, that would be easy, for he did not live very far away. And if he had been detected he could have said, "Oh, well, I am just taking it up to the station to report a robbery."
3301. *Mr. Bull.*] Do you know where Mr. Quelch lives? No.
3302. Do you know that he would have to pass the Police Station on his way home, and that his place is 1,000 yards away at least from Myall House? I do not know where he lives.
3303. Do you know George-street, Redfern? Yes.
3304. Do you know the Police Station in George-street, Redfern? Yes, I do.

3305. If Quelch lives about 80 yards from that station, how far would he have to go from "Myall House" carrying this bag? Oh, I am not a judge.
3306. A fair half-mile? Something near it.
3307. Did you hear it said that Quelch had seen a man watching that place that evening? Yes; Quelch made a remark like that.
3308. Did Quelch relate to you what he had done with regard to that man? Yes; he had followed him across the park, and there he missed him.
3309. Did Quelch tell you where he lost sight of the man? It was somewhere in the park, going out of the park.
3310. Did not Quelch tell you that he himself had gone into the park to watch a man, and that he himself had walked along the park, and the man disappeared round in the direction of James street? All that I remember is this: that he said he followed the man through the park and lost sight of him.
3311. You never lit up the place until you returned with Quelch and Coghlan? No; when I went in first I struck a light.
3312. You struck a match simply? Yes.
3313. How long were you engaged there as a clerk at "Myall House"? How long was this place kept as a branch store of the Charities Department? I do not know exactly.
3314. I do not want to bind you down to a month? I might be twelve months out. I was there four or five years; but prior to this burglary I had left there.
3315. *Mr. Abigail.*] You had gone to the head office? Yes.
3316. *Mr. Bull.*] Were you not there at all the week before the 26th? No.
3317. You were not engaged on the place at all at this time? No; Mr. Coghlan rang me up that afternoon.
3318. And you had not been actually engaged on that place for how long? For about fourteen months.
3319. So that really in no capacity had you been there for fourteen months? I had been there occasionally.
3320. But you had not been officiating there as a clerk? No.
3321. Do you know some premises which were occupied for some time by Kimber? Yes.
3322. They are immediately adjoining? Yes.
3323. Do you know that very great and grave complaints had been made to the Police at Redfern with regard to the character of persons who were in the habit of infesting these premises of Kimber's? No.
3324. Nor James-street? No.
3325. Do you know as a fact that about that time and since frequent burglaries have been reported to the Police in that very vicinity? No.
3326. Do you remember this that after you and Quelch and Coghlan went in, and the Police were telephoned for, it does not matter whom by, Senior-serjeant Bell and another Police officer came, who was the other? I could not tell you.
3327. Were there two who came? Yes.
3328. Do you remember then that a list of the articles which were then found packed up was written by one of the Police officers at the dictation of yourself or Coghlan? There was a list taken. I could not swear who it was who took it. Yes, I can; one of the constables.
3329. At whose dictation? I could not swear whether it was at Mr. Coghlan's dictation.
3330. It was not yours? No.
3331. As a fact as the things were taken out of the parcel or bag, were they not enumerated to the Police, and was not a list taken of the things as they were enumerated? No. They were taken down as they were handed out of the bag.
3332. That is what I want to get. Did you see that list? I saw the list in the hands of the constable. I did not read it.
3333. Do you know that the officer who made out that list was Quelch? I could not swear it.
3334. The class of good which were kept there was the class of goods used both for male and female, they were the class of goods usually supplied by Government Stores to the infirm and destitute asylums? Yes, anybody could use them.
3335. *Mr. Abigail.*] Male, female, and children? Yes, they were just cotton tapes and needles.
3336. *Mr. Bull.*] It has been insinuated here that some Blucher boots were missing.
3337. *Mr. Abigail.*] I object to the form of the question.
3338. *Mr. Bull.*] It has been stated that some Blucher boots were missing.
3339. *His Worship.*] Were there men's boots among the articles? Yes.
3340. *Mr. Bull.*] The class of boots was, I understand, what are ordinarily known as Cossack boots, Bluchers? Yes.
3341. Do you remember whether any of these were taken out of the parcels as you were there, were any of these enumerated on the list? Yes.
3342. Would you kindly look at this list. Do you see any men's boots of any description enumerated in that? [*Exhibit 20.*] Yes, there are women's leather elastic boots.
3343. You see there are sizes given there for some of the boots or slippers. Are not they women's? Yes, those are women's boots.
3344. Now, look at the whole of that list from one end to the other and see if you can find anything approaching Nos. 9 or 10 men's boots? No, I cannot see the boots.
3345. Was that list taken down in the presence of the Senior-serjeant and the other officer as well as Quelch? Yes.
3346. You were all there? Yes, we were all there. We were bustling about. I was ringing up Mr. Maxted.
3347. *Mr. Abigail.*] Now, you cannot swear that this is *the* list that was taken, can you? No.
3348. You only saw a list? Yes.
3349. You cannot swear that that is *the* list? No.
3350. And when the list was being taken you were all talking I suppose? Yes, I was using the telephone.
3351. For all you know Quelch might have taken this list himself? He might have.
3352. And whether the Blucher boots are on the list or not for all you know this list might have been taken by Quelch himself without assistance from anybody? Yes.
3353. And whether the Blucher boots, men's, and men's slippers are on that list or not, you have no doubt, Newcombe, that they were certainly taken out of their accustomed places for the purposes of removal this night? Yes.

Mr. W. A. Newcombe.

3 Nov., 1897.

- Mr. W. A. Newcombe.
3 Nov., 1897.
3354. And if they were not on the list, and the list was properly taken, they ought to be? Yes.
3355. You are satisfied about that? Yes.
3356. *His Worship.*] I will admit that the Blucher boots were in the bag and were omitted from the list.
3357. *Mr. Abigail.*] And the omission is peculiar, another element in this suspicion. At the time of this alleged burglary the Kimbers had left that place next door? Yes.
3358. They were there for some time? Yes.
3359. For the whole of the time they were there was there ever a burglary or a robbery committed at that store? No.
3360. This was the first time after they had left? The first time.
3361. You were originally attached to Myall House? Yes.
3362. And there was a large staff of clerks there up till within twelve or fourteen months prior to the date of this alleged burglary? Yes.
3363. Most of you had been drafted down to the head office, leaving a small staff there and Coghlan in charge of the store? Yes.
3364. And occasionally you used to be called up by telephone to come down and assist? Yes, that would be at night.
3365. Now you are not a policeman. If you had been there to defend that store, to protect it, and you had seen a burglar leave the place, or you assumed that he had left the place, and you had gone in there and crouched down behind the door which you found detached from its hinges and canting over on its lock, would you have gone through to wait for the burglar? I should have had a look round first.
3366. *Mr. Bull.*] Did you notice the second item which was enumerated upon this list, a material called Russia Crash? Yes.
3367. Do you think that a police officer would himself know the trade name of such an article as that? Well, he might know something about it.
3368. Will you swear that Coghlan did not actually describe the article to him as he wrote it down? I do not understand you.
3369. You have heard Mr. Abigail's further questioning of you with regard to this list, and he added to your answer that Quelch might have written this out by himself. Now I am asking you as to the second item on the list, "Russia Crash," will you swear that he did not get the nomination of that article, and the number of yards from Coghlan in your presence? I could not swear it.
3370. Will you swear that he did not? No.
3371. What is "half-bleached holland, 46 yards"—what does that mean, half a roll? I do not know.
3372. Will you swear that that very information was not given by Coghlan, so that he might write it down? No.
3373. Then, "Russia Crash, 14½ yards," do you mean to tell the Commissioner that you did not hear that information given by Coghlan? No, I could not swear to it.

Mr. James Abbott Farnell, clerk, Charities Department, was called and sworn :—

- Mr. J. A. Farnell.
3 Nov., 1897.
3374. *His Worship.*] What is your name? James Abbott Farnell.
3375. What are you? Clerk in the Charities Department.
3376. *Mr. Abigail.*] You were employed at the "Myall House" Branch? Yes.
3377. And you were there on the 26th June, 1896? Yes.
3378. And you were there on the previous Monday? Yes.
3379. Do you remember Senior-constable Quelch coming down? Yes.
3380. And having a conversation with Mr. Coghlan in your presence on the Monday or Tuesday? Yes.
3381. Do you know what he came down about? It was about some information about an inmate at Newington Asylum.
3382. While he was there, I believe a storm came on? Yes.
3383. And that detained him? Yes.
3384. And did you hear any conversation between the constable and Mr. Coghlan? I heard a little; just that the place would be easy to enter.
3385. Burglariously entered, do you mean? Yes, and then the only thing I know was that Mr. Coghlan showed the constable over the place.
3386. Right over? Yes.
3387. How long was he there altogether? Oh, well, I could not say exactly, but I should think about an hour and a half.
3388. But you know that Coghlan went up the ladder into the loft accompanied by the constable, and they remained there some time? Yes.
3389. And while there was the telephone used? Yes; I used the telephone.
3390. During that hour and a half? Yes.
3391. In fact, you had to use this telephone about this Newington inmate while the constable was there? Yes.
3392. So that he could not have failed to have noticed that the telephone was there? No.
3393. He was standing near you at the telephone while it was used? Yes.
3394. Did you see Coghlan also show him the door on the outside? Yes.
3395. And say anything about the hinges? I would not be sure about the hinges, but I supposed that.
3396. But you know he took him outside? Yes.
3397. Did you hear any conversation while they were outside? No.
3398. You were not working back the night of the robbery? No.
3399. But you know that that front door was difficult to open? Yes.
3400. And made a noise? Yes.
3401. A slight noise or a great noise? Well—. [*Interrupted.*]
3402. Had it to be pushed with any force to open it? Yes, it would make a little row; not much to speak of, if you were careful about it.
3403. You know that there were two locks on this door? Yes.
3404. And they were noisy locks; you had to pull a bolt back, and then there was a Yale lock? Yes.
3405. And it is a galvanised-iron building? Yes. 3406.

3406. A portion board and a portion galvanised-iron; the front of it is galvanised-iron—the front of the store and the lean-to? I do not think the front is.
3407. The left-hand side is all galvanised-iron? Yes; of course there is a wooden partition inside. Then, on the right-hand side it is wood, as far as I know.

Mr. J. A. Farnell.

3 Nov., 1897.

Senior-constable William Edward Quelch was recalled:—

3408. *Mr. Bull.*] You have been some years in the Police Force? Yes.
3409. Do you remember the Monday antecedent to the circumstances of the 26th of June, 1896? I do.
3410. What brought you down to "Myall House"? I was sent from the station with a message written on paper for the Government Asylums people to enquire round the whole of their asylums whether a certain man had been admitted into any of the asylums since a certain date. I gave that to Mr. Coghlan, with the man's name on. Mr. Coghlan got on to the Head Office, and asked for the information. Word came back that I would have to wait there as they would have to turn up all the books for the information.
3411. And you did as a fact wait there? I had to wait there. Mr. Coghlan remained at the telephone.
3412. How long were you actually on the premises in connection with that duty? Several minutes elapsed before the information came back, as soon as the information came back I left.
3413. You have heard the last witness's statement, Mr. Farnell's, what portion of the premises were shown to you? What was done with regard to showing you over the premises as they described? There is no need for showing over the premises at all.
3414. *Mr. Abigail.*] Were you shown over? I was not.
3415. *Mr. Bull.*] Why is there no need to be shown over the premises?
3416. *Mr. Abigail.*] I object to that.
3417. *His Worship.*] Were you shown over the premises? No.
3418. Did you go over the premises? No; there is no need. The building has been measured by myself since.
3419. Were you in the store? I was in the main store on this occasion, and the building is 12 feet wide and 32 feet long, extreme measurement. All round are racks, wire racks built right up from the floor up where this property is stacked. That is round the side. In the main entry there is a centre rack leaving just a pathway right round it. Up at the end is a big table over which the gas is, your Worship. The telephone is over in the further corner, right the other side of this table. You would have to walk right round this table. That is where the telephone is. You can sit or stand at this table and just look round—just like that—and see everything. The up-stairs is only half the length of the store. You see it runs up and then comes down in that way. The rear portion of the building is like an addition put on with weatherboard, with an iron roof. This back portion is a brick building. The little outhouse is a bit of a slope of galvanised iron.
3420. *Mr. Bull.*] What is called a skillion? Yes. Inside is total darkness; shutters are on the windows of the main building, and there are two little windows right up high that abut on to the lane.
3421. In what portion of the premises were you on that day? On this night, your Worship, as I generally do, I left the station with my relief at 6 o'clock.
3422. With regard to your visit there during the day before your going down in the afternoon or evening, how long do you say you were there altogether? I should say, to the best of my belief, it would be about half an hour.
3423. Were you there an hour and a half? Not at all.
3424. *His Worship.*] Were you told to keep an eye upon the place? I cannot remember the remark at all.
3425. *Mr. Bull.*] Was there any occasion, was there any incident or circumstance, which would necessitate Coghlan's saying to you, "This will be a very easy place to break into"? If a remark such as that had been made use of by him, or if ever such a request had been made by him for this place to be watched, it would have been entered in the Complaint Book.
3426. *His Worship.*] That is to say, you have to enter it in the Complaint Book? I would have to enter it and sign, and all the non-commissioned officers would have to put their signatures to it.
3427. *Mr. Bull.*] You never recollect hearing such a remark? No.
3428. And, if you had heard it, your duty was to have made an entry in the book of that? I would most decidedly have done it.
3429. As you have done in hundreds of instances? Any instance that came under my notice I always put in the Rough Book.
3430. Then you left the premises. What time did you go on duty that day? I think I would be going on at 6 o'clock that night.
3431. Have you any doubt that it was 6 o'clock? I may have a doubt. I can tell from the Occurrence Book.
3432. *His Worship.*] Is that the night you were found in the store? On the night of the 26th I went on duty at 6 o'clock.
3433. *Mr. Bull.*] Where had you been before you went on duty? I was at home.
3434. At your own place? I never do go out anywhere.
3435. Where is that situated? Just below the station.
3436. In George-street? In George-street.
3437. And you came from your own house, where you had been all the time you were off duty, into the Police Station at 6 o'clock? Into the Police Station, yes.
3438. Now, I want you to describe what you did from 6 o'clock? At 6 o'clock the relief marched out, and it is customary for the senior-constables to see the constables away on their beats. It used to be the routine of the men going away over on 3 and 5 and the men going over on to 12 beat to go over together, walking along and gossiping together. Inspector Lawless gave instructions that as 1 and 2 beats were vacant during this hour, and it was quite as easy for the men to go down George-street and along Cleveland-street over to 12 beat, that the man going over on to 12 beat was to go down and round Cleveland-street so as to avoid gossiping with the men on Nos. 1 and 2. Of course, the senior-constables would tell the constables to go that way. After they break off from their beats the senior-constable, whichever side he is on, then patrols his beat.
3439. Where did you go that evening? I went, as I generally did, over first into 3 and 5 beats. 3440.

Senior-constable W. E. Quelch.

3 Nov., 1897.

Senior-
constable
W. E. Quelch.
3 Nov., 1897.

3440. What direction would that be? Forsyth's Rope Works—more in the direction of Cornwall's Brewery.
3441. Towards the Baptist Estate? Yes. I passed through that ground, and I visited the constable, and then I passed on to the 12 beat, and would pick up the man who had gone round Cleveland-street coming on to 12 beat. I saw that man on 12 beat that night; to the best of my belief now I think it was Constable Brennan. I would not be positive; but I think so. I met him at the corner of Cleveland and Baptist Streets.
3442. Which is Baptist-street? Right opposite Crown-street.
3443. As it were, a continuation of Crown street? Yes.
3444. How far would that be from "Myall House"? You can just do it comfortably at the ordinary pace of a policeman in between ten and fifteen minutes.
3445. It is quite half a mile? Yes. I stood at the corner of Baptist and Cleveland Streets after the constable had gone away. A gentleman came up and said something to me.
3446. Who was that? I do not know who he was. He was asking me for some information. Whilst I was so speaking there to the gentleman—I was not on the footpath, I was more off the footpath into the roadway—Superintendent Read came up from the direction of Dowling-street, going towards the city.
3447. What time would that be? As near as I can tell it would be just gone 7 o'clock. The Superintendent passed some remark to me about gossiping. Of course, I suppose the Superintendent thought I had been there some time. He then continued along Cleveland-street, and I followed in the same direction. That would be going then towards "Myall House." I met the man coming out at 7 o'clock. I continued on until I got to the corner of Castlereagh-street. I stood at the corner of Castlereagh-street for a few minutes, as we have received complaints from the business people there of the larrikins, and then I walked along towards Pitt-street. "Myall House" then would be between the two—between Castlereagh and Pitt Streets. That would be the front entrance. About 20 or 30 yards this side—that would be my side—of "Myall House" the electric light was alight. I then noticed a man standing under the big pepper-tree that hangs from "Myall House" front. He crossed over directly opposite to the other side of Cleveland-street. I noticed it, and I continued on to the corner of Pitt-street. That would be just about the same distance the other side of "Myall House."
3448. You had passed where he had been standing? Yes.
3449. To the corner of the next street? Pitt-street. I turned the corner of Pitt-street, making out that I had gone round.
3450. As if you were going in the opposite direction? Yes. I stayed and watched. As soon as he saw that I was round the corner, this individual who had passed directly over recrossed back again into his former position. When I saw that I crossed Cleveland-street, and went in the main gates of the Prince Alfred Park.
3451. They open out opposite Pitt-street? Right dead opposite.
3452. How far would that gate opening be from this pepper tree in the front of "Myall House"? I suppose about 70 yards. I went along inside the railings in the dark, thinking that I had got there unobserved, and when I got almost parallel with the man he walked away towards Castlereagh-street. I continued along inside the railings to the middle gate, near the public school, which would bring me out into Cleveland-street again.
3453. There is no other means of getting from the park until you reach the small gate near the school? Not unless you get over the railings. I came out then and went towards Castlereagh-street myself. This individual went round Castlereagh-street to the right, which would bring him up to James-street.
3454. At the rear of "Myall House"? Yes; when I got to Castlereagh-street I could not see anything of him. Then something came into my mind about a store. I thought of all the gas fittings of Mr. Poole's house, and Mr. Johnson's house, and Mr. Glover's house, and I went back to "Myall House." I went up the flight of steps going into the front door, and tried the front door and the two front windows, and came down again and went round the side to the back to see whether the back door was open. At the best of times, when I am on duty I have generally got clod-hoppers on; they are generally clad with boot-protectors—my duty boots. I went round to the back and found that all secure, too. From the back I went then up to the main entry door of the store of the main building. That was all secure with a brass padlock on it. From there I turned in a little opening to the left, a 2-foot opening running parallel with the building, with the galvanised iron fence covering the urinals. I went into that opening. Twelve feet from the entrance to that opening there was another door belonging to an out-house. I noticed that door was off its hinges. I went inside of that. When I got inside of that I could see then through the dark the wicket-gate in the back gate was open. It only had a bolt to it—no lock at all. The wicket-gate was open. I passed right through, and went out into James-street round to Burnett-street, where the larrikins generally congregate, just right at the back of Kimber's gate.
3455. So you had left the Myall premises altogether, going to the wicket out into the lane behind? I went out into the public thoroughfare. After looking round James and Burnett Streets, I retraced my steps back again in through the wicket, and bolted it. At the top of the main gates above the wicket-gate there is also a space any one could also get over, or in or out. It is there to this day. When I got to the door I first entered—that would be the door off its hinges—I heard footsteps. The first thing I then saw was a figure coming out of the corner 12 feet from the door.
3456. You have made a plan of the whole of this place? Yes, and measured it myself.
3457. *Mr. Abigail.*] I object to it.
3458. *His Worship.*] There is no objection to that.
3459. *Mr. Bull.*] You have measured every distance? Yes.
3460. You swear this plan is made by you, and it is an accurate sketch or plan of the premises? Yes, every measurement was made by myself, and in the presence of one of the ladies who live there now. [*Exhibit No. 23.*]
3461. *Mr. Abigail.*] I wish your Worship would go and visit the place?
3062. *His Worship.*] If it is necessary I will go and see it.
3063. *Mr. Bull.*] This is James-street, at the rear of the premises? Yes, and that is Burnett-street.
3064. This is Cleveland-street in the front of the house? Yes.
3065. And this describes the whole of the "Myall House" premises? Yes.
3066. Which is the gate which you speak of? That is here. The top of the gate has a big opening in it. You can get over, in or out. 3067.

Senior-
constable
W. E. Quelch.
3 Nov., 1897.

3067. Is that the gate in which there is a wicket? Yes.
3068. Then you had gone right through these premises? Yes.
3069. Which door was it that you saw open? This one here. You cannot see that because as soon as you enter here you are in utter darkness.
3070. You have marked this door "unhinged"? Yes.
3071. Having gone out you came in and bolted that? The wicket-gate, yes, and as soon as I bolted the wicket-gate I heard footsteps coming, and when I got to this door the first thing I saw was a figure coming round a corner of this galvanised fence. It is 12 feet away from that door to that corner.
3472. I see you have marked here "W.C."? Yes.
3473. Is that the position of the w.c.? That is the position of the w.c.
3474. And a urinal here, too? Yes, and then there is another shed here, a w.c.
3475. Hearing the footsteps what did you do? I listened for a second and saw a figure at this corner. And then there is a little opening of 2 feet parallel with this building, and these doors run that way parallel with this building.
3476. *Mr. Abigail.*] I dispute this; this little store here is not all this distance away. It is only about 2 feet away from the main door? It is 12 feet from that door to that corner there, and it is 20 feet from that door round there to that door where Mr. Dacey says is only 12 feet.
3477. *Mr. Bull.*] I am not attempting to put this plan in as an accurate plan, but to describe the doors. It is a matter of convenience for the evidence. This doorway leads, as I understand it does, into this outhouse or shed? Yes.
3478. Now, you have described that you came along, and hearing footsteps you saw a figure coming round this fence? Yes.
3479. Does that describe the fence? Yes, that is a galvanised-iron fence.
3480. Is this a galvanised fence? Oh, no; that is a line of sight.
3481. From there to the corner of this fence is 12 feet? Yes.
3482. You say you saw a form coming round there? Yes.
3483. What did you do? I sprang out and grabbed him, and he made himself known who he was?
3484. Who was that? Mr. Coghlan.
3485. Where did you come from? I had come right through from the street then. As soon as I came through the gate I heard the footsteps, and when I got to the door I sprang out and grabbed him. It was lucky he made himself known, too.
3486. What did he say? I said to him, "It is lucky you made yourself known, Mr. Coghlan."
3487. Now, you heard Coghlan's description? Yes.
3488. And Newcombe's? Yes.
3489. Where was Newcombe at this time that you say you sprang out to Coghlan? I did not see him at all.
3490. When, so far as you remember, did Newcombe come on the scene? After I had got Mr. Coghlan I heard a noise. He came out of the store.
3491. What direction would Newcombe come from? This way. From here and round there.
3492. Round that galvanised-iron fence and round to where you and Coghlan were? Yes.
3493. You have heard them describe that you rushed out of this place in the act of falling almost through this doorway which was unhinged? Oh, no.
3494. Had you been in there at all? Of course I passed through here, but not this place.
3495. Is this the main store here? Yes. And then this is merely a bit of an outshed with a double door. It is parallel, let in with the same gable.
3496. How many doors were there off the hinges? This door and these doors. This padlock was intact so that it was impossible to remove the door.
3497. You mean the double door was still fastened with its padlock? This outside door was still fastened with its padlock. There was no padlock on these doors because they were fastened from the inside and since both these doors have been barred up.
3498. Is this a double door? No, it is a single door.
3499. What do you mean by "the padlock was intact"? The hasp was on and the padlock was locked so that it was impossible for anyone to shift the door away.
3500. It was not undone? No.
3501. This is as a fact where you were at the time that you heard the footsteps? Yes.
3502. And you really were in the vicinity of that door when you first saw Coghlan? Yes; or the man who afterwards turned out to be Coghlan.
3503. Was it light here; was there any light of any description? It was not very light because I do not think the moon had got up then very much.
3504. We were told that it was about rising. What I mean is was there any artificial light? No; the only light is at the corner of Burnett-street.
3505. But that would not assist you at all? No, because there is a high fence here and the side of the shed too.
3506. You sprang out, surprising Coghlan, and said, "It is a good job you disclosed who you were"? Yes.
3507. Tell us then what took place? As soon as Mr. Newcombe joined us we then all went into the store. The gas was then, I think, lit by Mr. Newcombe over the table. As soon as ever the gas was lit that was the first sign we saw that anything had happened.
3508. The lighting of the gas disclosed? Disclosed the place all ransacked, heaps of things all packed up ready for removal, and then we noticed one of these large corn sacks just inside of the double door there in the outshed almost full of things. I suggested to ring up the station.
3509. You did? I suggested that, and Mr. Newcombe I think it was who went and rang up the station and shortly afterwards Senior-serjeant Bell came.
3510. Now what had you upon you? What do you mean?
3511. What weapons, if any, did you carry? I had my helmet, jumper, my handcuffs, baton, and loaded revolver.
3512. At the time that you first saw this form coming round this galvanised-iron fence had you your helmet on? Yes.
3513. Was it off under any circumstances? Not at all.
3514. You say you had your loaded revolver and your baton. Where were you carrying these things? My baton in my pocket here and my revolver at my side on a strap served out to us. 3515.

Senior-
constable
W. E. Quelch.
3 Nov., 1897.

3515. I suppose, as a matter of absolute duty, that would be upon you when you left? I would be reported if it was not.
3516. And loaded? Yes. We never know the moment we may be trapped. The inspector sometimes asks us to show them to examine them.
3517. You would be liable to inspection, and if caught napping would be reported? Yes. In fact at one time Mr. Lawless reported some of the men for not having them on, and since then we have always been careful to have them on. As soon as the light was lit up it was then seen that all these articles were there. A telephone message was sent and Senior-serjeant Bell came down.
3518. Who were they? Senior-serjeant Bell and Senior-constable Harrison. Mr. Newcombe and Mr. Coghlan were there also.
3519. Were these things found in the bag; were they left in the condition that you first found them? In the same condition.
3520. Until Bell and Harrison came? Yes.
3521. You heard Mr. Abigail's question to Newcombe whether you were armed with anything or had anything in your hand; you heard the suggestion that you were ill? Yes.
3522. I suppose Bell and Harrison had ample opportunity to see your condition? Yes.
3523. Were you ill or unwell under any circumstances? Not at all.
3524. On the contrary, the accusation against you, as a rule, is that you are rather too brave, rather too plucky and cheeky? That is generally the case.
3525. If anything you are too cheeky, and too zealous, and too courageous? That is it.
3526. I say that is generally the complaint against you, particularly by people you are prosecuting; "strong" is the usual expression, that you are rather too "strong." Was there anything in your manner, or anything in your conduct then to warrant any such assumption? Not at all.
3527. Were you there to burgle this place? Not in the least. If I wanted to do such a thing as that I do not think I should select that locality, and that time, and the garb that I was dressed in.
3528. *His Worship.*] You heard it suggested that you had your hat in your hand; is there any truth in that? No.
3529. You had it on your head? Yes.
3530. There was no light? No.
3531. It was quite dark? Utter darkness. The clerks have not said anything about the shutters, which were all shut to.
3532. *Mr. Bull.*] Then, the gas being lit inside, that for the first time illumined the place? Lighted up the place.
3533. About these screw-drivers, where were they seen, how were they found? As far as I can recollect now the little one was on a recess and the big one was on the floor.
3534. Near where? Nearer to the table.
3535. Need I suggest or ask is either of these your property; were they ever seen by you under any circumstances before they were found on these premises? Never. I do not know them. I thought it was the property of the store.
3536. There are certain initials upon one, the big one? Yes.
3537. F. L. P.? Yes.
3538. That is the brand, mark, or initial? Yes.
3539. Do you remember Mr. Abigail in the early stage of this investigation mentioning the surname of Philpott? Yes.
3540. Your *Worship* will see at once my friend's insinuation. [*To the witness.*] You married a widow lady? I married a widow lady named Philpotts.
3541. Were any of the Philpott family, so far as you know, carpenters? No.
3542. How many of them are living? Two sons.
3543. And what business are they? Shoemakers. The other brother, the husband of the lady now my wife, was in business as a shoemaker and kept the Alexandria Boot Palace.
3544. Well, then, the police station was rung up? Yes.
3545. And Senior-serjeant Bell and Senior-constable Harrison came down? Yes.
3546. I want you to describe what took place when they came? When they came down I would not be sure, but I think it was myself suggested to the senior-sergeant, but I would not be positive on the point, whether it would be necessary to take a list of the articles; at any rate, it was decided that a list would be taken; Mr. Coghlan supplied all the paper that you see with the brass paper-binder.
3547. Who took that down? I wrote it down.
3548. At whose dictation? Mr. Coghlan's.
3549. Is that the actual list of the property, as described by Coghlan to you? This is the very list, with the addition of these pieces of paper on the end of the table there. [*Exhibit No. 20.*]
3550. Blank sheets? Yes.
3551. Did you see the articles taken from these parcels, packages, or bags? As Mr. Coghlan took them out he gave the names of the articles.
3552. He described them? Yes, he gave the names of the articles, and whatever it was, and the quantity of material and the initials; I do not understand them now.
3553. As he dictated it to you, so you wrote it down? Yes, so I wrote it down.
3554. Now, you have heard it said that there is an omission in that list? Yes.
3555. Is that so? Not an omission.
3556. You have heard it said that there were 9's and 10's Blucher boots? There was not a Blucher boot there, not packed; of course, there are plenty in the store, but there was not a Blucher boot there packed.
3557. *His Worship.*] Or put together to take away? Not one; every article that was there packed is here as described by Mr. Coghlan himself.
3558. And I notice there the nomination of an article called "Russia crash"? I do not know what it is now.
3559. That is the description of an article nominated to you by Coghlan? Yes.
3560. What was done with that list? It was taken to the station with a note of the occurrence that I put on the back.
3561. Did you there and then in anybody's presence write a note of the occurrence? I did. 3562.

3562. Who were present at that time? Senior-serjeant Bell, Mr. Coghlan, and Mr. Newcombe. I think Senior-constable Harrison had left.
3563. And was that attached to the list and taken by you to the Police Station? Yes.
3564. Read what you wrote. Has this pencil-writing that you are going to read been attached to these two lists? It was the back portion.
3565. Put that back again just in the shape in which it has been in the Police possession ever since it was made by you? [*Witness did as requested.*]
3566. Now, fold it as it has been? [*Witness did as requested.*]
3567. That is the position in which this thing has been all along in the possession of whom? Myself.
3568. That pencilled writing you wrote at the time in the store before you left, in the Senior-serjeant's presence? Yes.
3569. Now, read it please? [*Witness read, with the aid of a magnifying glass.*] "Between 7-15 and 7-30 p.m., 26th instant, about 5 ft. 8 in., dressed in dark clothes; went into park; saw me watching; cleared round Castlereagh-street, could not see him. [*Exhibit No. 20.*] Returned, found door open, a man then came; pounced out on him; turned out to be the clerk. As soon as light was struck it was found they had also taken the hinges off all doors inside, and all sorts of goods heaped ready for removal. Branded with Government Asylums' brand. Two screw-drivers found in store. Clerks suspects the push next door, who, he says, were a bad lot. The next yard is Kimber's yard."
3570. This slip of paper [*showing another slip of paper to witness*] was torn by Mr. Abigail off the second page of that list when I was handing it in the other day to some witness? Yes.
3571. *Mr. Abigail.*] Upon Mr. Bull agreeing that it had nothing to do with it.
3572. *Mr. Bull.*] Upon an admission by both of us that it had nothing to do with the list which was then taken? I think it has a lot to do with it.
3573. It has nothing to do with the list? No.
3574. When was it written by you? At the station.
3575. That is when you returned to the station? When I returned to the station. The watch-house keepers, that is the sergeant and the constable, have generally got a piece of blue or red pencil on the desk. I just simply picked up the piece of pencil and wrote that short memo. there.
3576. And that memo. was written by you and remained attached to that until it was torn off? The last court day.
3577. It really had no relation to the list? No; not at all.
3578. But it does refer to a circumstance which happened before you reached Myall House? Yes.
3579. In fact it is a memorandum of the circumstance of your having seen the Superintendent? [*Exhibit No. 20.*] A memorandum of my having met the Superintendent.
3580. A personal memorandum you made at that time? Yes.
3581. You took this list to the station. Did you make a report? I gave the list and the report entered there, and the report was entered by the constable in the book.
3582. Now read it? [*Exhibit No. 24.*] "Between 7 and 7-30 p.m., 26th instant (June, 1896), S. C. Quelch, on passing the Government Asylums' store, at the rear of Myall House, Cleveland-street, Redfern, found that the back door had been forced open by unscrewing the hinges of the door. The place was ransacked, and a quantity of the stores were packed up in a sack ready for removal. Two screw-drivers were also found in the store. Nothing at present missing."
3583. And the time it was made? It was made at that time and "routed" round the metropolitan districts on 26/6/96.
3584. *His Worship.*] What do you mean by "routed"? Sent round the whole of the metropolitan district.
3585. *Mr. Bull.*] The information then entered in the book is sent to other metropolitan police stations? Yes.
3586. What are you looking at? I am looking at the "route" of a similar occurrence. "Sent from Redfern at 1-2 in the morning. Routed by the serjeant at the station."
3587. Now these things were found at this place, it is described, in what is called a chaff-bag? Yes.
3588. Did you carry any such thing to those premises that night? Not at all. I paraded at the station at 6 o'clock in uniform.
3589. You passed your parade at the station when you left it and before leaving it? Yes.
3590. In the presence of the inspector. Yes.
3591. I suppose a 3-bushel bag would not be easily carried inside or under your tunic? I do not think so.
3592. And, supposing that these things were to be carried away by you, give his Worship some idea of the traffic in this particular spot about that time in the evening, 7 o'clock? Cleveland-street, in particular, is always pretty well thickly populated.
3593. And you heard Mr. Newcombe say that the moon was rising? Yes.
3594. How far would it be, as a matter of distance, from "Myall House," by any route that you could go, to your own house? I should say half a mile.
3595. And you really would have to pass through the principal streets and past the Police Station? Yes, and the principal people in the district, too; in fact, I would have to pass Mr. Coghlan's house, too. I do not think the quantity of goods that was there packed ready for removal, and those that were not packed, but were all ready for removal—I do not think a man could carry them. I think he would want to get a cart.
3596. Now, listen to this. Is this true, speaking of one of the two clerks—"The place where they stood yarning is not more than about 12 feet away from the door behind which Quelch was hidden"? Their evidence is that they stood at the front door; that is 20 feet away, and then it is at right angles.
3597. But, as a fact, did you hear these two people in conversation? Not at all.
3598. Was there any person, so far as you knew or heard, in conversation? Not one.
3599. Were you hidden behind one of the doors? No.
3600. Speaking of his having kicked some case or something of the sort on his way to the door; the charge says: "The place where they stood yarning is not more than 12 feet away from the door behind which Quelch was hidden. One of the clerks finally went into the main building and lit the gas and called out, 'What did you leave the middle door open for?'" The door had also been taken off its hinges. The other clerk had been to one of the outhouses, and when he came out of the outhouse he put his knee against an

Senior-
constable
W. E. Quelch.
3 Nov., 1897.

empty case opposite an outhouse door broken off its hinges, and placed it in a line with some other cases." Is it true that he called out, "What did you leave the middle door open for"? I never heard it. I heard no such remark.

3601. Did you hear any such voice from anybody inside the building? No; I did not know the second man was there.

3602. In fact you had interfered with the man whom you saw approach before the arrival of the other men at all? Yes.

3603. "The door had also been broken off its hinges"? Yes.

3604. "When he came out of the outhouse he put his knee against an empty case and placed it in line with some other cases"? It is impossible to do it. How could they do it, when the door was intact in the lock?

3605. You have read that to mean that the door was placed in line with the others? Most decidedly.

3606. "This so disturbed the burglar inside the door that he pushed the door open and rushed out." Is there an atom of truth in that? Not at all.

3607. *Mr. Abigail.*] We say that a case was placed against other cases—not a door.

3608. *Mr. Bull.*] "The man who rushed out of the building was, strange to say, Senior-constable Quelch. Coghlan said, 'What's this,' whereupon Quelch said, 'Some one has been in, and has got away over the fence.'" Was that said? What did you say to Coghlan with regard to the place? I did not say anything to him. Mr. Coghlan was in the act of buttoning up his trousers, and I think I almost frightened the life out of him. He could hardly speak at the time.

3609. And that is when you used the expression "It is a good job you disclosed who you were"? Yes.

3610. Did Coghlan say to you, "What's this"? I never heard such an expression.

3611. And did you in reply say, "Somebody has been in, and has got away over the fence"? No; I did not say any such thing at all. It clearly indicates that he did not get over the fence by the wicket gate being open.

3612. *His Worship.*] Did you expect to find anybody in the store, or did you think they had gone? I thought they had gone, seeing the door open.

3613. And you did not expect to find them inside? No.

3614. *Mr. Bull.*] The place inside would be absolutely dark? Utter darkness—all shutters.

3615. You have heard of a candle which it is said somebody had used inside? Yes.

3616. Did you take up a whole candle—a piece of candle the size of this small screw-driver? No such thing.

3617. Had you any such thing at all? None at all.

[At 1 p.m. the Commission was adjourned until 2 p.m.]

On resuming after lunch,—

Senior-constable W. E. Quelch's examination was continued:—

3618. *Mr. Bull.*] The last question I asked you had relation to the piece of candle which was picked up. Now, tell me this, besides making these reports which you did make, the production of the books shows what is your knowledge with regard to this very locality? It is a very bad knowledge; it is infested with complaints from the residents.

3619. Of what character or nature? Of larrikins—they term them hoodlums—insulting ladies and females, and smashing electric light globes, putting the place in utter darkness; robberies in the houses.

3620. Speaking of some of the houses in Pitt-street, near its junction with James-street, were robberies reported and inquired into with regard to the gas fittings being stolen from a number of houses there? Alderman Poole's—Mr. Brush's house, all the gas fittings were taken down; the big robbery at Mr. Renwick's—the father of Sir Arthur Renwick. Over £100 worth were stolen from Mr. Stedman's, and then another big robbery; and then at Glover's place.

3621. Speaking of these premises immediately adjoining Myall House, they were for some time tenanted by Kimber? For many, many years; before ever I went to the district.

3622. Was there a complaint with regard to the class of people who were about the premises? That place was where we looked for horse-stealers, and anything like that.

3623. You say Senior-serjeant Bell was there during the time—the whole of the time—from the time that the Police arrived. Who left first? Senior-constable Harrison went first. I think I and the senior-serjeant went away together.

3624. What did you do with regard to the premises after leaving there? I went to the station and gave in the form, and I received instructions then to find Constable McIntosh, and place him there in charge of the store. I went, and I retraced the beat so as to meet him, and I found him and placed him in charge of the store until he was relieved by another constable at 10 o'clock. He was relieved by another constable at 10 o'clock, and that constable remained there the whole night.

3625. Until this matter was mooted in the House by Mr. Dacey, and until you read some newspaper report with regard to some insinuation or suggestion that you were the burglar, had the matter in any sense been brought or mooted against you? I never heard of such a thing.

3626. How long were you married? Have you been twice married? Yes.

3627. How long have you been married to your present wife? In 1890.

3628. What family have you? I was left with two children by my first wife; and when I married the wife that is now, she had two children; and I have had two since.

3629. That is six in the family? Six in the family.

3630. You have heard a question asked McIntosh with regard to some want of instruction or insinuation about neglect of duty in the matter of these beats? Yes.

3631. Kindly explain to the Commissioner what that is? At 6 o'clock, or at any other time during the day, the constable passing over on the 12 beat used to join in the company of the 3 and 5, and they used to walk gossiping together right from the Redfern Post-office over to Young-street. This gossiping of the constables came under the notice of Inspector Lawless personally and he gave instructions that the constable going over on to 12 beat was not to join in company with the man on 3 and 5 and walk all the way along Redfern-street gossiping, and that in future he would have to go down George-street and pass along Cleveland-street to his beat.

3632. How was that information communicated to the policemen? By the senior-constables.
3633. You heard McIntosh say that he understood there had been some alteration, but it had not been reported by you to him, and there was some difference between you with regard to it? I noticed him taking the usual course one day, joining in with this man on 3 and 5, and I drew his notice to it, about the new order of the inspector. The constable said, "Well, I have not been acquainted with it." I said, "You had better be careful in future as it is Inspector Lawless' order, and no doubt if he catches you gossiping with this other constable it will necessitate us having to report you." I said, "I do not want to do that because I have always found you a very good constable and very willing."
3634. *Mr. Abigail.*] Now, you having heard the evidence given by Coghlan and by Farnell as to what occurred on the Monday or Tuesday previous to the 26th June your evidence now is a complete denial of what they say took place on that day? Not to all of it.
3635. Yes, because they say that you were there an hour and a half? It is impossible for me to be there that long. I said I was there about half an hour.
3636. First you said you were only waiting there a few minutes, and immediately you got the reply, which took a few minutes to get, you left, and then afterwards you told us that you were there from first to last half an hour? I say altogether about half an hour.
3637. Would it be about an hour? No.
3638. About half an hour? Yes.
3639. You also deny that you were shown over the place, although Coghlan swears positively that you were not only shown over the whole building, but taken up the ladder into the loft, and shown where each article was put. Do you deny that? I do.
3640. You deny that Coghlan is correct when he says that you took up some of the articles shown to you in the stock, and that you spoke of the value of them? I did not hear Mr. Coghlan say such a thing.
3641. If Mr. Coghlan said that it is incorrect? It is.
3642. Your denial is tantamount to saying that he is merely drawing on his imagination? Yes, perhaps something else.
3643. That means, "Perhaps something worse"? No.
3644. You say, "Perhaps something else"; you mean that perhaps he is influenced by somebody? I do.
3645. Or his own motive is to injure you? I believe so. I have never seen the man from that day to this; but Mr. Dacey has seen him.
3646. You believe that Mr. Dacey has influenced him to injure you? I do.
3647. You think that Mr. Coghlan is a man who would be influenced by Mr. Dacey, or anybody else, to injure you? I do.
3648. Against whom he has got no enmity at all on your own admissions? I do.
3649. Why should Coghlan want to injure you? I am sure I could not say. I have had no conversation with him, and never interviewed him at all.
3650. Do you think it is because he does not believe your first statement to him that there was a burglar, and that he believes it is moonshine? I do not know.
3651. Do you think that if anybody got over the fence it was your shadow? I did not get over the fence.
3652. Is he correct or incorrect when he says that he went to the fence and wanted to get over to see if there were footprints, and you said "Oh, no, don't do that," because he could not see it? I heard him swear it here.
3653. Is it true or untrue? It is untrue. I never heard such a foolish remark.
3654. Is it true that, as he alleges, and he is borne out by the other witness, Newcombe, that you got out of this door which was hanging on the lock, the hinges of which had been taken off, and that you got out of the skillion room underneath the door which was canting on the lock? No, not at all.
3655. You say that before you had collided with Coghlan you had never been inside that skillion room? Most decidedly.
3656. I want to put to you categorically the things which these other witnesses swear, and which in every instance you have denied, and to avoid any misapprehension I want you to contradict, if you can and if you dare, everyone of those three. Of course, as a constable, you see at once the wisdom of denying everything?
3657. *Mr. Bull.*] I object to this.
3658. *Mr. Abigail.*] Perhaps my friend thinks he is the only person to be heard here. Do you not know, do you not see the wisdom as a constable of denying all that these other three people said occurred in order to show your innocence? I would not deny it if it had been the truth.
3659. Would you admit your guilt? I would. If I was guilty of such an offence as that I would say, "Do away with me at once."
3660. That is what we are going to try to do. Do you see this: if their evidence is not denied by you you can see at once there is no possible escape for you. If their evidence is believed there is such a case against you that it is impossible for you to escape the charge of being a burglar?
3661. *Mr. Bull.*] I object to the question.
3662. *His Worship.*] He can deny the statements, and that is all you can ask.
3663. *Mr. Abigail.*] I can test his motives for denial.
3664. *His Worship.*] Granted that all their statements are absolutely correct, it does not make him a burglar.
3665. *Mr. Abigail.*] It involves him in such a cloud of suspicion that if you take it in connection with the other cases which are coming on, you must find him guilty.
3666. *His Worship.*] Clouds of suspicion are not facts. (*To the witness*): Do you not admit that you were in the store? I was in the outshed.
3667. *Mr. Abigail.*] Were you in the main building or the skillion? Never.
3668. Were you in any part of the store where the stock is? Never.
3669. Do you deny that Coghlan, when you went there on the Monday or Tuesday prior to the 26th of June—do you deny absolutely that Coghlan told you to go and look round the premises, that it was a very easy place to burglariously enter, and that there were suspicious characters about? He never made such a remark to me. If such a request had been made that is the book it would be in. [*Pointing to the Information Book.*]
3670. You mean that it would have been your duty to enter it? It would.
3671. But it is quite possible, if the request were made and you had forgotten it, that you would have forgotten to enter it in that book? But I did not forget it.

Senior-
constable
W. E. Quelch.
3 Nov., 1897.

Senior-
constable
W. E. Quelch.
3 Nov., 1897.

3672. You only go this far. In answer to Mr. Bull you say this, that you have no recollection of Coghlan saying it? I say that he did not say it.
3673. Now, in answer to me, you go further—you go to the very extreme that you could possibly go to and say absolutely that he is incorrect? I think I swore before dinner that he did not give me that advice.
3674. Now, after dinner, you emphatically say that Coghlan is untruthful? He did not give me that advice.
3675. And if he swore it he is swearing what is false? He is.
3676. That he is a perjurer, and you are not? I did not pass any comments on Coghlan at all.
3677. Although you think he is a man who could be easily influenced to injure you? I do.
3678. So that he is a man who if he could be easily influenced in that way, from the same motive he could be induced to commit perjury; that is your opinion of him? I do not say he is such. I say myself that he has not got the facts of the occurrence in his mind.
3679. He has sworn to them? He has sworn to them.
3680. And remember that there were only three of you there who knew anything about the earlier facts prior to the police coming in answer to the telephonic communication, so that you see you have denied all that the only people who could have sworn as to the occurrence have sworn? Yes.
3681. And it is your oath against the other two? Yes.
3682. So that, if it is a question of credibility, you will admit at once that the weight of evidence is against you? I will not; no.
3683. Will you not admit that, there being the evidence of two respectable people against you, the weight of evidence is against you? So you put it; you mean in numbers.
3684. Now, you will admit that they are truthful in one or two particulars. Let us state them. You will admit that they are truthful when they say that they could not give you the information that you wanted about this inmate in the asylum, and that they had to telephone, and that you waited while they telephoned? It was not information they could give. They had to go to the Head Office for it, at my request.
3685. You will admit that they are correct in saying that you had to wait? Most decidedly I do. It saved me the trouble of going down town.
3686. And that you knew that the telephone was there? I should think I did. How often did the Redfern police go there?
3687. But, you see, you admit the telephone is there? Yes.
3688. And you know that the only escape from the inquiry, "if you were inside waiting for the return of the burglar, and there was a telephone there, why did not you go for it," is to say that you were not in there at all? I could have gone away for miles, and no one have known anything different.
3689. And there would not have been this charge? You would not have known anything about it.
3690. You see, also, they are correct when they say that they saw a man outside in the street, but who afterwards turned out to be Jamieson? I do not know.
3691. You know you spoke to Jamieson that night outside? No, I do not.
3692. Did you speak to him after? No.
3693. Have you spoken to him since? I have since.
3694. Did not you see him speaking to somebody in one of the houses nearer Castlereagh-street than "Myall House" that night? No.
3695. Did you see him in a barber's shop that night? No.
3696. Did you speak to him at all that night? No.
3697. Have not you reported at the Police Station that you did? Nothing of the sort.
3698. You said, "I cannot remember being told to keep an eye upon it; I have no recollection of it whatever." Now you go further, and say that it is a falsehood by Coghlan? He told me nothing of the sort.
3699. So that during the luncheon adjournment your memory has become stronger? I have not had much during lunch.
3700. You say that as Superintendent Read was passing along the street he said something to you about gossiping? Yes.
3701. Something about your duty, I presume? I believe so.
3702. Will you swear it was? The gentleman was asking me for information, and I suppose the Superintendent thought I was gossiping.
3703. Was there any reason why you should make a note of that occurrence? I did make a note of it.
3704. Is there any necessity to make a note of such an occurrence? There is.
3705. Will you tell me why you did not do it until after you got to the Police Station that night, at nearly 10 o'clock? I was at the Police Station before 10 o'clock.
3706. What time were you there? I was at the Police Station at 8 o'clock.
3707. Now, remember that you put McIntosh in charge, and that was after 9? Oh, no. I put McIntosh there before 9.
3708. Well, a quarter to 9. And in the interval you had Senior-serjeant Bell there, and had taken the list and had walked out and met McIntosh and brought him in? No; I had been to the station and given in my particulars, and then I was instructed to go and find McIntosh and place him there.
3709. You will admit that you did not make a note of the Superintendent having spoken to you until you got to the Police Station? Yes.
3710. I want to know why you did not make a note before? I did not make a note until I got to the station. It did not drop across my memory.
3711. Did you think that the suspicious character of the alleged burglary suggested the wisdom of making a note? Not at all.
3712. And that the note should be made on the list of the alleged stolen goods? Not at all.
3713. You will admit that when you were making out that list there were about a dozen sheets of paper of the same size? Yes.
3714. Separate sheets of paper? Yes.
3715. Blank? Yes.
3716. You had got this paper at "Myall House," had you not? I had, from Mr. Coghlan.
3717. Here it is. Your Worship sees this. I want your Worship's attention to this if you will be kind enough. (*To the witness*): You see you have got this note attached to the second sheet of this list. [Exhibit

- [*Exhibit No. 20.*] “*Re Superintendent at 7 p.m., at corner of Cleveland and Baptist Streets.*” What I want you to explain is this: why was it you waited until you got to the Police Station before you appended this note? As soon as ever I had got that I had to go to the station and give in the particulars, and after I had finished with the particulars there I just casually picked up the pencil and wrote that down.
3718. You see you made this list, and if there had been any evidence given this list would have gone in as evidence? No.
3719. What was the object of making a list out? For the station.
3720. Why did not you hand this out and leave it at the station? Was not the proper custody of it at the station? No.
3721. Should not a copy of it have been taken in the Occurrence Book? What they take in the station and what I do are two different things.
3722. Why did not you leave this list in the station, instead of carrying it about with you all this while? It has been with all my other papers.
3723. Why have you kept it in this wonderful and marvellous state of preservation? Because I keep a copy of all my correspondence.
3724. But this is not your correspondence? Anything that comes under my observation I keep a copy of.
3725. You see the enormous importance of this little slip “*re Superintendent at 7 p.m., at corner of Cleveland and Baptist Streets.*” “Now, if I can show that I met the Superintendent at 7, how easy it is to show that I met the Superintendent at 7, and it took longer than that to get all these things together.” I cannot discover what is on your conscience unless your tongue will assist me. Did not you make that note because you knew the importance of having some written memoranda to fix the time that you met the Superintendent? Nothing of the sort.
3726. You know the advantage of an *alibi* and the importance of it? I do.
3727. And you see the peculiar connection between this memorandum and this list of goods? Yes.
3728. *His Worship.*] What was your object in writing that memorandum? I have been spoken to when I have thought that I have not been there, so, especially when I would meet one of my officers, I always made a note of it. If I had seen the Superintendent in our district anywhere, and I was anywhere near the station, I would always say, “I met Superintendent so-and-so.”
3729. *Mr. Abigail.*] Do you make a note of it? I mention it at the station.
3730. Do you make a written note of it? If I am away from the station.
3731. Have you made a written note like this before? Not of the Superintendent.
3732. Of anybody else? Any amount of them.
3733. Produce one memorandum that you have made? I can produce any amount, but I have not got them here.
3734. You have admitted how important it is to marry this memorandum with the list, and you see you have yet got to explain away the fact that you had one, two, three, four, five, six, seven, eight, nine sheets of blank paper upon which you could have made that note, a note which, you will admit, has everything to do with this occurrence? I do not see what it has got to do with it.
3735. It proves an *alibi* for you? I do not say any such thing at all.
3736. *His Worship.*] Who was the Superintendent? Superintendent Read.
3737. Can he recollect that he met you at that time? I have brought it under his notice, and he told me that he generally goes along Cleveland-street one night in the week, but he could not remember it. I am only on that section every other night. I am out with the senior-constable. Two nights of the four I would be off. I was off on the Wednesday, at Darlington on the Thursday, on this section on the Friday night.
3738. *Mr. Abigail.*] That would not show the Superintendent was on that section at that time. Have you called Superintendent Read? No.
3739. And you admit that the Superintendent could not remember. Every word of that note is plain? Yes.
3740. It is not, you see, for it is indistinct except the word “at” at the corner. Will you swear that has been written there all the time? Most decidedly.
3741. Has not that been written in a hurry, and smeared over, and was not the little word “at” omitted? No.
3742. Now, you see, on the ninth sheet of these blank leaves, you have made a note which, practically, bears out the entry in the Occurrence Book? Yes.
3743. You have had to read that with the aid of a magnifying glass? And it was published in the paper the day after.
3744. Will you explain this: How is it that that is so indistinct, and this, on the same sheet, being protected by the first sheet covering it, is so distinct? Which?
3745. Do you see a difference in the distinctness of this. There is not a smudge on it. It is as plain and distinct as if written yesterday? One is written with black and the other with blue.
3746. The little word “at” is just as distinct as if written just now. All the rest of this, written in black, is just as distinct; but just this little note, which he says he made at the time, only, of all the writing on that one page, is indistinct, although all the other writing is distinctive. The sheet is protected by the sheet in front of it? I cannot see that it is indistinct.
3747. *Mr. Bull.*] Blue is not so indelible as the other.
3748. *Mr. Abigail.*] You will admit that writing with a black pencil is very much easier to obscure or smear, or render indistinct, than blue? I do not think so.
3749. Look at the paper yourself; can you not see where the perspiration of the hand has been over it? I cannot say what has been over it.
3750. Does it not appear to be so? My opinion and yours may differ.
3751. I will take yours? I cannot say what it is, perspiration or anything else.
3752. *Mr. Bull.*] Will my friend let me say this: after that was torn off I had it on my thumb for a few minutes. I had forgotten there was anything on it until I asked my client for the memorandum.
3753. *Mr. Abigail.*] Do you distinctly swear that that was written on the 26th June, 1896? The same night in the station.
3754. What do you call the outhouse. You say when you went up to the gate you saw the outhouse door was open. Do you mean the skillion addition? Yes.
3755. The door which you say is the door of the outhouse is the door which Coghlan says you came out of? Yes.

Senior-constable
W. E. Quelch.
3 Nov., 1897.

- Senior-constable
W. E. Quelch.
3 Nov., 1897.
3756. Which he says you tumbled out of? There was no tumbling out at all.
3757. With your head down? I deny that too. I did not do anything of the sort. If Coghlan had not made himself known in another instant he might have been down.
3758. Did you tell Mr. Bull that you said to Coghlan, "It is lucky you made yourself known"? I made such a remark myself.
3759. You know Mr. Bull did not ask Coghlan such a question, don't you? I was not taking particular notice what questions Mr. Bull asked.
3760. You say there is a very high fence at the back; but you will admit that there is an electric light in James-street? At the corner of James and Burnett Streets.
3761. You know it is pretty high up? It is about 3 feet higher than the ordinary gas-lamp.
3762. And that would be about 5 feet higher than the ordinary fence? Yes.
3763. Would not that light be reflected into that yard? It may not be alight.
3764. Will you swear it was not that night? I could not swear anything; but I tell you that on moonlight nights the Redfern Council light the lights when they like. They never light their lights some nights until 10 o'clock, and some nights 11.
3765. You heard footsteps, and saw evidence of the place being broken open, why did you not arm yourself, why did you not take out your baton to be prepared? I have been eleven years in the police, and I have never hit a man with my baton. If I want to use anything I use these (*his fists*).
3766. You usually hit them with your fists? Yes.
3767. You heard this witness, Newcombe, say that when he came out you were just putting your helmet on; is that correct too? Yes; I had it on, the same as Mr. Coghlan swears.
3768. You heard Mr. Newcombe say that he said to you, "Why did not you telephone for the police?" and that you said, "I did not know there was a telephone there"? Oh, I said nothing of the sort.
3769. Is that deliberately untrue? Of course it is. I was there at the telephone only on the Monday, and many a time before.
3770. Then he is incorrect too? Most decidedly.
3771. You heard him say that it was at his suggestion that you went inside the store to see if any burglars were there, and that Coghlan went in first, and you last? I cannot tell you who went in first. It is a toss-up who went in first.
3772. I want to show that you had no particular anxiety to do your duty there that night? Hadn't I?
3773. And that, if you did not go in first, there would be some justification for a charge of that kind? I do not know who went in first. I know we went in all together; but who was 6 inches in front I could not tell.
3774. You could not tell who led the attack? No.
3775. Now, Mr. Bull asks you would it not be a ludicrous thing for you—a constable—to be seen carrying a chaff-bag full of things at 7 or 8 o'clock at night? Yes.
3776. I suppose you would admit that it is equally ludicrous for you to be seen carrying a big bag at 2 o'clock in the morning? I was never seen carrying a big bag at 2 o'clock in the morning.
3777. At 4 o'clock in the morning? No.
3778. In the early hours of the morning? Yes, I often do. I went and got some sand the other day at Margaret-street, Redfern.
3779. It was not from the Locomotive Sheds? Not at all. The Locomotive Sheds are a mile away from there.
3780. So you do not think it ludicrous for you to be seen carrying sand in the early hours of the morning? No.
3781. But you will admit, will you not, that these things could have been left there, and carried away at 1, 2, 3, 4, or 5 o'clock in the morning? Yes, with a horse and cart.
3782. Or in a bag? No man could carry that quantity of things.
3783. In a chaff bag? No.
3784. Not a strong man? No.
3785. Not a man of your build? No.
3786. You are pretty strong? Yes.
3787. Pretty muscular? Yes.
3788. Don't you think you would have carried that bag? No.
3789. Did you try? No.
3790. How do you know? I take it by the large quantity of things.
3791. Boots and shoes do not weigh much you know? A lot of them put together do.
3792. *Mr. Bull.*] Were you in your uniform and helmet when you were carrying the sand? No.
3793. *Mr. Abigail.*] But you should have been, because you were on duty? No.
3794. Did you hear a case moved, a grating noise as if something was being pushed? There was no such thing ever happened.
3795. You deny from first to last all that Coghlan and Farnell have said about your first visit, you deny all that Coghlan and Newcombe say about getting out of that store? In the way they describe.
3796. And I suppose you will say this: that you never were in the store from first to last until after you saw Coghlan and Newcombe? I was not in the store at the main building.
3797. And you were not in the skillion? I swore I was in the skillion and passed through it.
3798. Then you will admit that before Coghlan came out from the water-closet, and you sprang upon him, that you had been through that skillion? I had been right through to the public street.
3799. Did you strike a light? No, I had not a match on me.
3800. So that it was light enough for you to walk through the skillion and get out at the back? The wicket door was wide open, and most naturally you could see right through.
3801. You said just now that there was no light. You admitted to me that the electric light did not reflect any light at all in the yard. You have admitted it was a pretty dark night, and you have admitted that the moon had not risen, and now you say that it was light enough to walk right through that skillion? If you were inside this place in utter darkness, and there was a wicket in that wall there, wide open, and it was a public street outside there.
3802. Now, there is the main building and the store according to your plan? Yes.
3803. You will admit that that is the door the hinges of which were screwed off? Yes. 3804.

3804. The outer door of the skillion? Yes.
3805. And you will admit that you walked right through this out to the back gate? Out through it.
3806. And you say it was light enough to see that? Of course it was.
3807. Now, will you admit that after you went in with Coghlan and Newcombe, you found a bag of stuff just at the side of the door? It was just at the side of the inside door.
3808. Will you tell me how you could have walked through there without tumbling over the bag of stuff? Of course you could.
3809. Could you see it? No, the bag was close to that door and the wicket-gate down to the left. It was about halfway down.
3810. You see you have got it almost up to the wicket-gate. Did you see that bag of stuff when you walked through? No.
3811. You will admit that you walked right through it? Yes.
3812. Well, then, is not Coghlan right when he says that you sprang out of that door? Did not I say so myself.
3813. Did you say you sprang out from the outhouse there? That is the out-shed there.
3814. This is the outhouse here? No, that is empty cases.
3815. Well, then, they are right when they say that you came out of this door? I said so myself.
3816. You will admit they are right? Most decidedly.
3817. It was difficult to get out, was it not, because the hinges were screwed off and the door was resting on the lock only? The hinges were off and the hasp and the lock were intact.
3818. Did not the door go over? No.
3819. Did not you go through like this [*bending down*]? No.
3820. As you walked through there, and before you got outside to collide with Coghlan, you have heard Newcombe say that he was in the store and lighting the gas. How could you have gone through there and caught Coghlan and missed Newcombe, who was lighting a match which was reflecting itself right across there? It was not done at all; the gas was not lit until after we got into the store.
3821. Did you hear him call out? No. I never saw or heard Newcombe until after he came out of the store again here, and came round here, when I had Mr. Coghlan there, 12 feet from that door.
3822. Is not this a fact: that the only possible way by which you could have failed to detect the presence of Newcombe in that store—because he got into that store before Coghlan went over to the w.c.—that the only way possible for you to fail to detect Newcombe's presence in the main store would be that you were hiding down by that door because you wished to elude them? Not at all; if I wished to elude them at all I could have got out of that door again and over the top of the gate without going out of that door also [*indicating on plan*].
3823. You have admitted this: that when you came back through that wicket gate you bolted it, and you could not have got out of that gate? Why not?
3824. Because you had drawn the bolt back and you could not get out of that door? Not at all.
3825. Then you walked right through the skillion and sprang out upon Coghlan? When I heard steps I went to see who it was, and sprang out on them.
3826. So that you see it was not impossible to fail to detect Newcombe's presence there, and, as a matter of fact, you did not know he was there until you sprang out, as Coghlan said you did, from that door? I never saw Newcombe, and never saw a light or anything else.

Senior-
constable
W. E. Quelch.
3 Nov., 1897.

Charge No. 14.

Charge 14 was then read by Inspector Cotter as follows:—"Appropriation of Government money in connection with one O'Donnell."

Mr. George O'Donnell, Gentleman, 156 Pitt-street, Redfern, was called and sworn:—

3827. *His Worship.*] What is your name? George O'Donnell.
3828. What are you? Gentleman.
3829. Where do you live? 156 Pitt-street, Redfern.
3830. *Mr. Abigail.*] You are a gentleman of retired means? Yes. [*To his Worship.*] With your approval and the consent of these gentlemen, would it not be better for me to tell you the whole of the circumstances and answer the questions afterwards?
3831. *His Worship.*] You must answer questions.
3832. *Mr. Abigail.*] On the 5th of November, 1892? I cannot say about the dates, you know.
3833. You know what you are here for? Yes.
3834. Do you remember a dog biting Quelch's trousers? My little girl told me.
3835. You had a dog?—Yes.
3836. What sort of a dog? Fox-terrier.
3837. Have you got it still? No.
3838. Did it die or did you kill it? It did not die nor did I kill it. It is *non est* somewhere. I have not got it now.
3839. When did you cease to have it? As near as I can remember, about twelve months ago.
3840. Did Quelch come and make a complaint to you that this dog had bitten his trousers? Certainly not.
3841. Did he never make a complaint to you about it? Certainly not.
3842. Did he threaten to summons you for it? Certainly not.
3843. Did not you pay him something? I did.
3844. What did you pay him for? I paid him as a reimbursement for the trousers that my dog had torn.
3845. Did he speak to you about it? No.
3846. How did you come to pay him? I called upon him.
3847. Your daughter told you something? My daughter told me that a man's trousers had been torn. I did not know whether it was Mr. Quelch or a private individual, and I called upon Mr. Quelch, and the words, so far as I can remember, that I spoke to him were these, "I understand my dog has torn your trousers,"

Mr. George
O'Donnell.
3 Nov., 1897

- Mr. George O'Donnell.

- trousers," he said, "Yes, the dog has torn my trousers." I said, "Look, what is about the cost of the trousers?" He said, "About 14s. or 15s.," and I said, "Here, there is 14s., 15s."—or whatever it was—"and get a new pair of trousers."
3848. *His Worship.*] Were you summoned? No.
3849. *Mr. Abigail.*] You never saw the trousers? No.
3850. You do not know whether they were uniform trousers or private trousers! I do not know whether he had on uniform trousers or private trousers, or any trousers at all, as a matter of fact.
3851. There was no summons issued against you? No.
3852. Have you since learned that a summons was applied for? No.
3853. And was actually in the Redfern Police Station? I am quite unaware of it; when I gave this money, it was without any threat or intimidation on the part of Mr. Quelch.
3854. *His Worship.*] You simply wished to compensate him for the damage done to the trousers? Certainly.
3855. Then I see nothing in it. The magistrate could not have awarded damages. This is not Government money.
3856. *Mr. Abigail.*] It was asked about in Parliament, and it was answered in the categorical way in which it was asked. (*To the witness.*) That is all you had to do with this matter? Yes.
3857. Except that there was a complaint made, and Senior-serjeant Bell waited on you about this matter? Yes.
3858. Between the time that you had paid the money to Quelch and the time that Senior-serjeant Bell waited on you, you had seen Quelch, or Quelch had seen you? Oh, no, no, no. I had seen Quelch before Senior-serjeant Bell came to me at all.
3859. Did not he tell you that there was a complaint about it? Not a word.
3860. What did you see him for? Because he did not know whether Senior-serjeant Bell had called upon me or not.
3861. What did he come to see you about? I will enlighten you so far by telling you that twelve months after some question was asked in the Legislative Assembly, and then, when Quelch was asked for a report, these officers came to me to ask me something about the matter. Being, as the Commissioner says, a paltry matter, I had forgotten all about it, and I said, "It is so-and-so. I paid the man for the trousers, and the question is done with."
3862. *His Worship.*] Do you know, as a matter of fact, whether they were private or public trousers? No.
3863. Did Quelch say anything to you about that when you paid him? No.
3864. *Mr. Abigail.*] What did you go to Quelch for before? To reimburse the man.
3865. But after that, and after the questions appeared in the paper? You have confused this altogether. The day after the trousers were torn I called upon Quelch and I gave him this 14s. or 15s, whatever it was, to reimburse him for the destruction of his trousers by my dog.
3866. And you never saw him again until Senior-serjeant Bell had called upon you? A question was asked in the Legislative Assembly some twelve months afterwards, and they came to me to make inquiries.
3867. During the period intervening between the tearing of the clothes and the question in the House had you seen Quelch? No; I did not know him before. Of course, being a public officer, I might have seen him in the street before.
3868. You have discussed the case since? I may have had something to say about it.
3869. And have you found out now whether they were uniform or private clothes? I am surprised at you. How possibly could I find out whether they were uniform or private clothes?
3870. Did not the wisdom of asking for them to be produced suggest itself to you? Do you mean to say, as a business man, that you went and paid 14s. or 15s. for the trousers and did not ask Quelch to show them to you? No. I paid him on the remark of my little girl, and on the supposition, as my little child told me, that the trousers were torn. I made inquiries, and found out who it was. I did not know Quelch before this.
3871. How did you know it was Policeman Quelch? From inquiries.
3872. Then he must have been in uniform? No.
3873. Did your daughter tell you it was a policeman? No. There is a cottage just opposite where this dog ran out, and it was occupied by a man named Burton; and this man Burton happened to see the dog tear the trousers, and he confirmed what my little child told me, and I said to this man, "Who is the man whose trousers are torn?" He said, "Well, it is a policeman—Constable Quelch"; and I said, "Where does he live?" and from other inquiries I made I found that he was living, not where he is living now, but somewhere over towards Mount Lachlan, and the next afternoon I called upon him and I said, "What is the damage my dog has done?" and then I gave him the 14s. or 15s.
3874. Did this man tell you what time it was that the dog had rushed out and bitten the man? Four or five years ago.
3875. What time of the day? As far as my memory serves me, it was between 4 and 5 o'clock.
3876. Was it not between 5 and 6? I cannot say. I am desirous of giving every information, but I cannot recall to my mind four or five years ago. I cannot tell you the very day.
3877. *Mr. Bull.*] There never was any intimation given you that you were to be summoned for anything. None at all.
3878. Nor intimidation in any sense or way? Not in the slightest form.
3879. You have been living at Redfern for many years? For about twenty-five or twenty-six years.
3880. And you have had some opportunity, certainly during the last two or three years, of noticing the senior-constable? I have had many opportunities.
3881. Well, as a resident out there and a Justice of the Peace, how would you speak of him as a police officer from any observation that you have made? Without any flattery or nonsense in the case at all, he is a thorough officer, and a man desirous at all times of doing his duty, and I think the general surroundings of Redfern will support me in saying that the man at all times has been found there when he is wanted.
3882. You have had no conversation with me? No.

Charge No. 6 (continued.):—

Senior-serjeant R. Bell was recalled:—

Senior-
serjeant
R. Bell.

3 Nov., 1897.

3883. *Mr. Bull.*] How long have you been in the Force? Thirty years in January.
3884. And stationed in Redfern how long? About seven years.
3885. You know Senior-constable Quelch? Yes.
3886. Has he been stationed at Redfern during all the time you have been in that division? Yes.
3887. He is your subordinate officer? Yes.
3888. Do you remember the 26th of June, 1896? Yes.
3889. Do you remember some circumstance of a telephonic message from "Myall House"? No. I do not know that.
3890. Did you visit that house that evening? Yes.
3891. What time did you arrive there? I think it would be about 8 o'clock.
3892. Have you a recollection of when you arrived, and of what took place after you did arrive? I went there from Redfern Police Station in company with Senior-constable Harrison.
3893. Did you find Quelch, Coghlan, and Newcombe there at the premises when you got there? Yes, and the place lit up with gas.
2894. I suppose you have heard some conversation between and amongst the people who were there with regard to what was alleged. Did you see some property there? Yes.
3895. You might describe, as far as you remember, what property it was, of course I mean property which apparently had been prepared to be moved by some one? I saw a sack there half filled or more with boots and slippers, and also a waterproof sheet folded up.
3896. With some articles or goods in it? No, I think the waterproof sheet was folded up by itself, and on a table I noticed a large number of reels of cotton.
3897. Do you remember a list being made of the things which it was alleged had been apparently prepared to be removed? Yes.
3898. Who wrote out that list? I think it was Senior-Constable Quelch.
3899. Do you remember how, and under what circumstances it was written—how was the list obtained? I cannot remember; I only remained there a few minutes; as Quelch was there before me, I mentioned that he might get the particulars.
3900. You did mention that? Yes.
3901. As a fact no particulars had apparently been got before you arrived there? Oh, no; there was no list taken at that time.
3902. As his superior officer, you suggested that a list or particulars of the goods should be taken? Yes.
3903. Did you hear either of the two clerks, either Coghlan or Newcombe nominating the goods as they were listed by Quelch? I cannot say that I did.
3904. But did you see the list? I did not see the list at all; I think I mentioned to Quelch that he might get the particulars.
3905. How long, do you think, were you on the premises? About ten minutes.
3906. Then you left Quelch there? Yes.
3907. And Harrison, where was he? He went away with me.
3908. Do you know whether it is a fact or not that reports have been received at the Police Station with regard to burglaries in that vicinity, in the vicinity of "Myall House"? I think there was a robbery at "Myall House" some time previously to that.
3909. Whether there was a robbery at "Myall House" or not, do you remember the stealing of a quantity of gas-fittings from different houses—Mr. Poole's residence, for instance, and some premises of a Mr. Glover? About that time?
3910. Yes? No; I could not say.
3911. Before and since? I could not say for a fact.
3912. Did you hear of the circumstance, or the allegation of the fact, that these robberies had been committed, and that the gas-fittings from several places had been removed? I cannot say for a fact.
3913. You were asked before when you were called with regard to one of these charges: you are not so active as you were when you were lower down in the grade—in other words, you do not do early morning duty? If you are on night duty you invariably leave at 3? Yes.
3914. And do you do much duty upon any beat? I patrol the district when I am out.
3915. You have no beat? No.
3916. You are not like constables, who are simply told off under senior-constables to work certain beats? No.
3917. As a superior officer you patrol? Yes.
3918. Now, during all these years that you have been there, and Quelch has been under you, you have had plenty of opportunities of observing Quelch as a zealous officer? Yes.
3919. Have you ever heard or have you known any insinuation against his honesty, I mean with regard to any propensity to peculate or steal? I never heard anything about his dishonesty until I saw what appeared in *Truth*.
3920. In other words, until these charges, which have since culminated in this inquiry, were put in the papers? I never heard of it until I saw it in *Truth*.
3921. Do you think it likely from your opportunities of observing him, from his manner and his conduct, do you think there could be any truth in any allegation against him of committing this burglary at "Myall House"?
3922. *Mr. Abigail.*] I object to this. It is a matter of opinion.
3923. *His Worship.*] It was decided that we were not to ask the opinion of one officer about another.
3924. *Mr. Bull.*] You never heard any insinuation against his honesty until you saw something in the *Truth* newspaper? No.
3925. You know "Myall House"? I do.
3926. What beat would that be in? That would be in No. 1 beat.
3927. Now, can you tell me this, from any knowledge that you have as an officer of the police there, what hours of the day, as a fact, is that particular beat without a constable? There is always supposed to be a constable upon that beat. Sometimes a constable would be told off to work two beats together and sometimes he may have four beats; very seldom though.

- Senior-serjeant R. Bell.
3 Nov., 1897.
3928. Can you tell me whether between the hours of 6 and 7 in the evening this beat in which "Myall House" is situated would be without a constable? I could not say that.
3929. *His Worship.*] Has Senior-constable Quelch a beat in that direction? It is just according to what side he may be on.
3930. Sometimes it is his beat? Sometimes he would be on that side, and sometimes he would be on the Darlington side.
3931. On that night would that be within the sphere of his patrol? I suppose he would be on that side. Yes, I feel sure.
3932. *Mr. Bull.*] Do you know, as a fact, where he went to when he went on at 6 o'clock that evening? I do not. I did not go on myself until 7 that evening.
3933. Now, tell me, are beats Nos. 3 and 5 in the vicinity of "Myall House"? No; they are on the other side.
3934. They are away out towards Bourke-street? On the other side of Redfern.
3935. Where is No. 12? That is away out on the Baptist Estate.
3936. You know the corner of Crown and Cleveland Streets? Yes.
3937. Baptist-street? Yes.
3938. This place I have named would be in No. 12 beat? Yes.
3939. *Mr. Abigail.*] You are an officer of thirty years' service? Close on.
3940. Were you at Redfern before Mr. Lawless took charge? Yes.
3941. Is it not a fact that in the station there Quelch is known as Mr. Lawless' pet? I do not know for a fact; I have heard so.
3942. There are two men there, are there not—Dukes and Quelch, who are spoken of under that soubriquet? I have heard it spoken of.
3943. Do not answer this question if you have any personal reason why you should not; but I am instructed to put it. As a matter of fact, you have personally complained to the Superintendent that it was a grievance to you that these two men should be told off to do duty which was strictly yours? No, I never complained.
3944. You have not? No.
3945. But you have felt aggrieved, have you not? I never complained to Mr. Lawless.
3946. But you have felt aggrieved, have you not? Well, I would rather not answer that question.
3947. *His Worship.*] Did you feel aggrieved that they should have been told off to do duty that you considered was yours?
3948. *Mr. Abigail.*] You need not answer this unless you like; but is it not a fact that you have felt aggrieved at Mr. Lawless, the inspector, taking Dukes and Quelch into his counsel instead of you, as senior-serjeant, and the next officer in rank to the inspector? Well, I would rather not answer those questions.
3949. As a matter of fact, you know that Quelch is not liked by his brother officers? I have heard so.
3950. Rightly or wrongly, he is not a favourite with his brother officers? I have heard so.
3951. It is a matter of repute there? Yes, he is not liked.
3952. Is it not a fact that some of the other serjeants complain that Quelch has more influence over the inspector than the serjeants have? I have just heard so, that is all.
3953. Is not the complaint pretty general throughout the entire Force there in that division that Mr. Lawless makes too much of Quelch? Yes, as I have said, I have heard all that conversation talked over amongst the men.
3954. In fact, did not this occur: that Mr. Lawless was talking at one time to Quelch and you went in to speak to Mr. Lawless at the station, you bent down to speak to him, and he roared out to you, "Senior-serjeant Bell, don't you attempt to come near me and smell my breath"? I would rather not answer that.
3955. Is it not a matter of common repute at Redfern that Quelch has poisoned Inspector Lawless' mind against you? Has not that been talked about? I do not know. I have only heard so.
3956. And that is the state of things which prevails amongst the police at Redfern, that subordinate officers can complain about their superiors in the manner described in these questions? I have heard so.
3957. *Mr. Bull.*] What special duty would devolve upon Dukes or Quelch which you could perform, or which you complain you could perform and would not be allowed? I would not be sure.
3958. Can you name any one duty which Lawless asked Quelch and Dukes to do and that you felt aggrieved that you were not allowed to do yourself? I do not know of any.
3959. You have, as a fact, had Quelch with you doing special duty with regard to public-houses; in other words, with regard to either systematic Sunday trading or selling during prohibited hours? I think he has been with me on one or two occasions.
3960. You, as a fact, were one of the officers giving evidence in the case against Friend? Yes, he was with me on that occasion.
3961. And you gave evidence in that case corroborating Quelch's statement, in fact you swore exactly the same as Quelch swore, both of you observing what you described? Yes, we were both together on that occasion.
3962. You were not only both together, but you each saw what the other saw? Yes.
3963. You gave evidence on oath at the Police Court of what you saw? Yes, on that occasion.
3964. Do you know as a matter of fact, that it is charged and alleged against Quelch that he did not tell the truth then? Yes.
3965. Did he tell the truth in the case against Friend? He did; on that morning we were both together.
3966. It was selling between 5 and 6 in the morning? Yes.
3967. On that very occasion Quelch had gone to your house that morning? Yes, he came to my house for me.
3968. And he and you were on duty after you came out of your house? We were both in uniform.
3969. *His Worship.*] There was a conviction in that case? Yes.
3970. *Mr. Bull.*] Have you sent any complaint to the Superintendent with regard to this treatment that is insinuated by Mr. Lawless, to you or of you? No.
3971. I suppose you look forward very shortly, do you not, to retire from the Police Force? I could not say that.
3972. You have been there very nearly thirty years? Yes.
3973. I do not mean to say that you are not an active officer. You have not made any of these complaints?
No.
- 3974.

Senior-serjeant
R. Bell.

Nov., 1897.

3974. Have you been chatting with Mr. Dacey? No.
3975. Have you written a long list of your grievances to Mr. Dacey? No.
3976. Can you suggest to the Commissioner from what source Mr. Dacey could have got the information founding these questions which have been asked you with regard to these troubles and grievances? I have no idea.
3977. Except that it is the tittle-tattle of some officer who is not pleased in the Redfern Division, possibly? Yes.
3978. Would you say that there was anything savouring of want of discipline in that Division of the Police Force? I would not like to say so.
3979. I prefer to ask you straight out. Now, we have it that you have never made a personal complaint to your superior officer either verbally or in writing? No.
3980. You have never found fault to Superintendent Read or the Inspector-General with regard to Mr. Lawless' treatment of you? No.
3981. And you are certainly not in the habit of talking to your inferior officers with regard to grievances if you have them? There is one thing I would like to say with regard to Mr. Lawless. I hardly think he has treated me as he has a right to treat me.
3982. Having said so much, do you think that Mr. Lawless has some personal dislike for you? I do think that he has a very personal dislike to me.
3983. But notwithstanding there may be personal dislike between you, he has never in any sense or way interfered with, or prevented you from doing your duty? No. I have always done my duty the same; and no later than last night he insulted me and Serjeant Houlahan most grossly.
3984. *His Worship.*] Then do you think that there is any undue favouritism shown in the station? I do not know so much about that.
3985. *Mr. Abigail.*] What do you mean by that?
3986. *His Worship.*] Do you think that any members of the Force are unduly favoured over others in that section? Do you mean Quelch?
3987. Any? Well, I do not know, sir; but I know that he has not shown me very much.
3988. *Mr. Bull.*] Perhaps you will explain what you mean? Last night I received a telephone message from Mr. Dacey to say that Constable Begg would be required at this court. I was in charge of the station from 2 o'clock to 6, whilst Serjeant Houlahan was at his dinner. Mr. Lawless came in at 6 o'clock, and I showed him the list that I had taken down on paper about Constable Begg to attend at this court, stating that I had received it from Mr. Dacey. Mr. Lawless said, "It appears to me that Mr. Dacey knows as much about these books and this station as we do ourselves."
3989. A very natural thing to say? "And there is no doubt that the serjeants in the station must give Mr. Dacey this information." Serjeant Houlahan said he was the station serjeant, and that he never gave Mr. Dacey any information. I also said to Mr. Lawless that I never gave Mr. Dacey any information, and that I would make him prove it in this court to-day about accusing me of giving him information.
3990. Whose duty would it be if application was made at that station to give information? It would be Mr. Lawless' duty. He is in charge.
3991. It certainly would not be the duty of a senior-serjeant, or even of a senior-constable? Certainly not without Mr. Lawless' permission.
3992. It must filter through the inspector? Yes.
3993. Did not you understand Mr. Lawless to mean that he was making this complaint that information must have been afforded Mr. Dacey through somebody, because he himself had not afforded it to Mr. Dacey? I do not know, I am sure.
3994. And it was, therefore, in the nature of a complaint being made then by Mr. Lawless that somebody without his authority had afforded Mr. Dacey information from these books; is that not what you gather from that? Yes.
3995. What is the gross insult then that Mr. Lawless offered you last night? I consider that a gross insult, to accuse a man of giving information he never gave. He said the station serjeants, and there was no one there then but Serjeant Houlahan and myself.
3996. Is there no other station serjeant but you and Houlahan? Yes, Shaw.
3997. Are not there two other persons who are frequently in charge? I only do that duty while Serjeant Houlahan is at his dinner.
3998. Do not you know, as senior-serjeant there, that both Moore and Kidd, who are only ordinary constables, have charge of the station from time to time? Kidd might. I do not think Moore has.
3999. Don't you know that Moore and Kidd have alternate duty each morning from 3 to 7? Oh, yes, I know that they take the station from 3 in the morning while the serjeant goes and has a sleep.
4000. You know they are there? Yes.
4001. They would have alternate charge of the station each morning? From 3 in the morning until about 7.
4002. Then the information which was afforded Mr. Dacey, if afforded at all, might just as easily or readily have come through these two police officers? I cannot say.
4003. He might just as well have accused the other two police officers. -
4004. *Mr. Abigail.*] They are not station serjeants.
4005. *Mr. Bull.*] Something must have been in Mr. Lawless' mind, that information was afforded without his authority, and no information should be afforded without first filtering through the inspector? Certainly.
4006. You felt annoyed because you thought an accusation was being made against you of doing something you were not guilty of? Just so.
4007. *Mr. Abigail.*] Such an accusation being made in the presence of a serjeant of less rank than yourself? Yes.
4008. *Mr. Bull.*] You and Houlahan are good friends? Yes.
4009. You are sufficiently comrades-in-arms not to have anything like ill-feeling with one another? No.
4010. Are you of a fault-finding disposition or nature? You know, there are some people in the world who are never satisfied unless they are—well, inspectors themselves. Are you of that disposition? No, I am not.
4011. You really were anxious to have an opportunity to say what you have already said? I told Mr. Lawless last night.
4012. And you could only have that opportunity when you were asked? Yes.

- Senior-serjeant R. Bell.
3 Nov., 1897.
4013. *Mr. Abigail.*] You have never spoken to me, have you? No.
4014. Tell me this: From your experience as the senior-serjeant at that station—I want you to directly answer me this question—is there any justification for this epithet being applied to Quelch, “Lawless’ Pet”? Well, as I have said before, I have heard it spoken of.
4015. Does not Mr. Lawless think a good deal more of him, and treat him and Dukes much more liberally than any other constable in the Force there? I do not know, really, for a fact, about that. I know he gives them work to do—inquiries, and all that sort of thing.
4016. And the other men complain that it is work that should be given to seniors in rank? I have heard that.
4017. In fact, work that you should have been given to do, as the next officer in rank to Inspector Lawless, has been handed to Quelch and Dukes? I have never complained of it.
4018. But you have been aggrieved? Well, I have sometimes felt it.
4019. You will admit this, as the next officer in rank at Redfern, that, with these rumours and epithets flying about, it must tend to lessen the discipline at Redfern?
4020. *Mr. Bull.*] I object to that.
4021. *Mr. Abigail.*] As a matter of experience, has it not tended to lessen the discipline there?
4022. *Mr. Bull.*] That I object to.
4023. *Witness.*] I would rather not answer.
4024. *His Worship.*] Do you consider Quelch an active, energetic officer? Yes; I have always found him so.

Inspector Edmund Lawless was recalled:—

- Inspector Edmund Lawless.
3 Nov., 1897.
4025. *Mr. Bull.*] Might I ask you, without being at all inquisitive or offensive, how long you have been in the Police Force? I joined the Police Force in New South Wales in June, 1866; I have been over thirty-one years in the service.
4026. How long have you been in the position of inspector at Redfern? Since 1893.
4027. You were for many years a sub-inspector? Since 1882.
4028. You have gone gradually up, I think, like all good officers who are in your present position? Yes.
4029. You have heard some questions asked by my friend of Mr. Bell with regard to Quelch and Dukes? Yes.
4030. Is it a fact that you have asked both Quelch and Dukes on many occasions to do special duty? Yes.
4031. You might nominate of what character? Oh, different inquiries, and to investigate complaints.
4032. And as plain-clothes constables? Sometimes.
4033. I suppose they have only been asked to do just that character of duty which constables are asked by their officers to do? That is all.
4034. They are much younger men than Mr. Bell? Both of them.
4035. Twenty years younger possibly? Yes.
4036. More capable, either or both of them, of physical endurance? Yes, I should think so.
4037. And certainly more physically active? Certainly.
4038. What aged man would Bell be? I could not tell you; I suppose he must be getting on towards 60.
4039. Neither Quelch nor Dukes would be probably very much over 33 or 35 at the outside? I do not know their age; they might be a little over.
4040. Have any complaints been made to you by Bell at any time with regard to your favouring Quelch or Dukes? Never to my knowledge.
4041. Are you aware of the existence in the Redfern Division, of this disaffection or dissatisfaction? Not until Mr. Dacey had mentioned it, ventilated it. He says so.
4042. Are either of these two men, Quelch or Dukes, shown any special favours by you? Certainly not and never have; that I can prove by the Superintendent, for I have had to report both of them, and in one instance, I may say so, I am bound to say so, Dukes was so vexed at what I had said about him that he asked the Superintendent to remove him to some other station.
4043. You say Dukes was so much annoyed with your treatment of him that he asked the Superintendent to remove him? Yes. There is not a man in the division who could get up and conscientiously say that I have favoured him more than another man. I have always given any man a chance to show what he can do. I have recommended them to the Superintendent when I have had an opportunity. I do not often get an opportunity.
4044. Is there any personal dislike from you to Senior-serjeant Bell? No, no personal dislike whatever.
4045. *Mr. Abigail.*] We say that all these men are “pulling your leg” and you do not know it, you are too simple to see it? No.
4046. *Mr. Bull.*] Has your superior officer at any time charged you with simplicity? Not that I am aware of.
4047. It is a fact, is it not, from your own personal observation and knowledge, that information has been afforded by some of the men in the Redfern Division without your authority? Certainly. It must have been done.
4048. Application has not been made to you as the fountain head? Never until this commenced.
4049. And that is the matter which you complained of last night. That is what it had relation to? It had.
4050. When Bell speaks of having received a gross insult from you, were you doing any more than as his superior officer—rebuking those who were there for doing what they had no right to do, as a matter of duty? That is all. I did it in a very quiet way.
4051. I have never heard you speak in any other way but quietly. You did it in your usual way? Yes. I did not wish to disguise it, and I told them they could mention it here if they wished.
4052. *Mr. Abigail.*] You know, do you not, that it is common talk amongst the men in your division that Quelch and Dukes are favoured? No, I never knew it mentioned until I heard it in this court.
4053. And have you made inquiries since to ascertain? No, I do not make any inquiry about such gossip as that.
4054. Although it has been mentioned in this court, you never made inquiries? No.
4055. And you assign as the reason for the absence of investigation that you do not take notice of such gossip, although the statement is made by Mr. Dacey, a member of Parliament? It is made by my officers. I am not going to retail what is said in the court.
- 4056.

4056 Is not this enquiry, embracing seven years of Quelch's police career, sufficiently serious for you, as inspector, to make inquiry as to whether the charges are true or not? I deny it *in toto*—everything.

4057. Have you made inquiries amongst your subordinates to see whether they do commonly talk in the way that is alleged? I am not going to lower myself to go and communicate with the men about that.

4058. Would not you tell off one of your serjeants to make inquiries? No. I would not trust any one of them.

4059. When you are giving orders for work requiring physical qualifications superior to those of an officer of Serjeant Bell's age, is it not one of the canons of the Service, which should be always observed, for you to issue your order through the senior-serjeant so that he can issue it to the senior-constable? Yes, if it is his day; but he is not there.

4060. But when he is there, do you not pass him over and issue your orders direct to Quelch and Dukes? Certainly I should, and every other officer would.

4061. Is not that a breach of departmental canons? No. If I had to send a report in, I would send it through my superior officer.

4062. Do you not send work to Quelch and Dukes not requiring any superior qualifications to the qualifications of Senior-serjeant Bell, but requiring a mental qualification and discretion where the age of the officer would be material, and pass over the senior officers? I would rather you put it in more simple language. You put it in such a roundabout way it is impossible for me to understand it. If you will ask me a simple question, I will answer you in a simple way.

4063. You have admitted that you are frequently called upon to give Quelch and Dukes work which you would give to Bell only that these two men have superior physical qualifications to Bell? I never said anything of the kind.

4064. That is what it means. Now, have not you passed over Bell and other senior officers and preferred Quelch to do duty where the discretion of an older officer was required? No.

4065. Where the mental qualification was in Bell and not in Dukes or Quelch? I do not know. I am not prepared to state what his mental qualification is.

4066. Will you swear you have not? Certainly. I have not given them anything to inquire into when I thought he had a better capacity than they had.

4067. You know that these men are spoken of as Mr. Lawless' pets? You have said so.

4068. You know it is a matter of common talk in the station? No; I do not. You have mentioned it in Court; that is all I know about it. If the men have said so they are responsible for it, I am not.

4069. You will admit that right through this inquiry, and before the Court sat Quelch was allowed to have free access to all the books and papers in the station, although he was relieved from duty, and that permission was given to him by you without any authority from his Worship? He had access to the books.

4070. And you will admit that when Mr. Dacey went up to see the books that Quelch had had access to he was denied, and given as a reason that you had left express orders that he was not to be shown anything unless he brought with him an order from the Commissioner? Certainly.

4071. Why did you exercise discretion? I had orders to refuse Mr. Dacey from my superior officer.

4072. Which superior officer? Superintendent Read. You do not suppose I should do such a thing of myself without authority.

4073. *Mr. Bull.*] You refused until you got some authority from the Commissioner? Yes.

4074. *Mr. Abigail.*] I want to fasten the responsibility on the person who ought to carry it? I obeyed instructions.

4075. Did you last night charge Bell or Houlahan; did you mean to convey to them that they had given any information to Mr. Dacey when you said "the station serjeants"? I said that it was quite evident some particulars had been given to them by some of the serjeants or someone in the station.

4076. And did not you mean to convey that they were partly to blame? Certainly, because they had charge of the documents, and they ought not to have allowed anyone to have access to them.

4077. So that you were not surprised at Bell and Houlahan feeling aggrieved? I am not surprised at anything; they do not attend to their duty much.

[At 4:30 p.m. the Commission adjourned.]

THURSDAY, 4 NOVEMBER, 1897.

[The Commission resumed its sittings at 10 a.m. in the Licensing Court, at the Central Police Station.]

Present:—

MR. WHITTINGDALE JOHNSON, S.M. (SOLE COMMISSIONER).

Senior-constable W. E. Quelch and Mr. J. R. Dacey, M.L.A.

Mr. J. W. Abigail, Solicitor, appeared to support the charges; Mr. Charles Bull, M.P., Solicitor, appeared to defend Senior-constable Quelch.

Charge No. 10.

Charge No. 10 was read as under:—

"*Mr. Levien*: I am not a believer in Quelch. I do not think that he is a man that will altogether speak the truth. There is no doubt he told a lie. I believe he is a liar beyond all doubt."

Robert Henry Levien, Esquire, M.L.A., Solicitor, was called and sworn:—

4078. *His Worship.*] What is your name? Robert Henry Levien.

4079. You are a practising solicitor? Yes.

4080. And you are the member for Quirindi? Yes.

4081. *Mr. Abigail.*] Do you remember a statement in the Assembly by Mr. Dacey dealing with certain charges against Senior-constable Quelch? Yes; I do not recollect the date.

Inspector
Edmund
Lawless.

3 Nov., 1897.

Robert Henry
Levien, Esq.,
M.L.A.

4 Nov., 1897.

Robert Henry 4082. And you took part in that debate? Yes.

Levien, Esq., 4083. And you made a speech, in the *Hansard* report of which the following paragraph appears —

M. L. A.

4084. *Mr. Bull.*] I object to my friend reading from *Hansard*.

4085. *Mr. Abigail.*] Then I will read from the tabulated report of the charge. [*Read the charge.*] Did you make those remarks? Yes; those are my observations.

4 Nov., 1897,

4086. Now, do you wish to say anything with regard to those observations? That is a peculiar way of putting a question. I want to know what you want to ask me.

4087. Is it from your experience as a practising solicitor in courts in which you have seen Quelch give evidence that you have come to the conclusion that "he is a liar beyond all doubt"? Of course, believing the statements of my clients.

4088. *Mr. Bull.*] That is quite right, Mr. Levien; we do sometimes believe them? Believing the statements of my clients. Some of them, I know, are reliable men, whose words I would just as soon take as their oaths, and that is the conclusion I came to. Perhaps I may say this, it may have been a bit strong to use that language without some absolute proof; but believing my clients as against him is how I come to that conclusion.

4089. *Mr. Abigail.*] What case were you referring to when you made use of the words "there is no doubt he told a lie"? That was referring to that case with reference to the keyhole. I took the statements of Mr. Smithers, who tried the case.

4090. You were in Court at the time? No, I was not.

4091. From hearing what? From just hearing the statements of what was said by the people round, and hearing the comments that had been made by Mr. Smithers. I understood that Mr. Smithers had visited the place, and had come to the conclusion that he could not see, and that is how I arrived at that conclusion.

4092. You will admit that these are very strong words to use, even for a member of Parliament under cover of privilege? Yes. In that case, believing Mr. Smithers' statement that he could not see, and as his evidence was so much at variance with Mr. Smithers' opinion, I came to the conclusion that I would rely on Mr. Smithers.

4093. There can be no doubt that you spoke of Quelch in the general sense from your opinion of him, observing him as a practising solicitor? Yes, taking into consideration that I would sooner believe my clients, having a knowledge of them. Of course you must admit, that on the other hand my clients may not have been telling the truth.

4094. *His Worship.*] When you are conducting a case, it is your place to throw as much doubt on the opposite side as you can? Yes.

4095. Do you consider that when a magistrate gives a defendant the benefit of the doubt he actually brands the prosecutor as a perjurer? No, certainly not. I would be very sorry to think so, because I know many times that your Worship has even leaned with the utmost discretion to try and relieve a man of any stain upon him, and at the same time give the man the benefit of the doubt even when the evidence leaned against him.

4096. You know that people can unconsciously give a different statement of what they conceive to be a fact? Yes. Lawyers themselves are a bit prejudiced to their own side.

4097. *Mr. Abigail.*] You do not believe in hitting a man below the belt? No, I do not.

4098. So that you had satisfied your own mind that you were justified in speaking in that way of Quelch? I felt satisfied in my own mind or I would not have used those observations with reference to him. At the same time you know there are parts of my speech where I referred to this burglary business, and said that, as a matter of fact, it was beyond all comprehension; I could not believe it myself, and if you allow me to express an opinion, I do not believe it. With reference to Mr. Inspector Lawless, I have the utmost confidence that he would not allow any officer to remain under him that he had the slightest doubt about.

4099. *His Worship.*] As a matter of fact, you believe that Quelch presses his cases very hard? Yes, and unduly presses them.

4100. *Mr. Abigail.*] You think he is a man who would not mind straining a point and saying something not absolutely true to win his case? I would not take upon myself to stamp any man as a liar in that way. Of course I believe my clients against him, but you mean committing perjury.

4101. *His Worship.*] In that particular case, do you think it was improbable that he could have seen what he said, taking all the circumstances of the case together? I know nothing about the facts, only what I heard and Mr. Smithers' statements.

4102. Of course, you know a man can see a good deal through a key-hole, sometimes? Yes.

4103. *Mr. Abigail.*] But you certainly said this: "It should have been the duty of the presiding magistrate to recommend the man's dismissal, or to have an inquiry"? Yes, I did say that. That is, believing that statement.

4104. You said also, "I would not have him in the Force ten minutes." And, personally, you would not, would you, from your knowledge of him? Well, now, there is no doubt I said that; and I am man enough to admit that, perhaps, it was a bit too strong. I am not going to follow up any unfortunate observation of mine. I think I may have in my time, and I dare say every member of Parliament has, at one time or another, unfortunately, said too much, and I regret two or three instances in my public life of making comments, that I, without reservation, withdraw, and feel very sorry that I have made them.

4105. *Mr. Bull.*] Is that one of them? Well, with reference to that, perhaps that was a bit too strong. I know of others, I suppose, about every other public man.

4106. *Mr. Abigail.*] Do I understand you to say that you wish to withdraw that? Well, I would like to withdraw that.

4107. *His Worship.*] Don't you think it would have been the duty of the magistrate, if he thought that wilful and corrupt perjury had been committed in this case, to have taken some notice of it? Yes, I think my observations would infer that. Perhaps in the hurried speaking in the House a man may overlook what ought to be conveyed.

4108. I suppose you know as well as I do that there is a good deal of doubtful evidence given in these courts on all occasions? Yes. And as your Worship says, the people may do so unconsciously. I do say with reference to Mr. Quelch that he likes to press his cases, and he goes a little bit further than what some men would do.

4109. And don't you think it quite possible and probable that he could have seen enough to have led him to

to

to the conclusion that he saw what he thought? Of course I do not know. I do not believe in these "keyhole constables" at all myself; it is a most degrading position.

4110. *Mr. Abigail.*] You do not believe in constables assuming disguises? I think it is necessary to assume disguise. You would never get anybody convicted at all if the constables did not.

4111. But to obtain convictions by means of false pretences on the part of a constable pretending to be somebody else than he really is, you do not believe in that, nor in constables playing the part of Paul Pry at keyholes? No, I do not believe in it. I think that observation applies to the former part of my speech.

4112. You know that there is a good deal of dissension amongst the police at Redfern, do you not? Well, as a matter of fact, I never had any conversation with the police officers in Redfern about Quelch at all, but when this matter was spoken of, I thought it would be unfair of me, considering that the Government intended to have a commission, to even speak upon that at all, because I would have no right to do it.

4113. But, prior to this discussion in the House, do you not know from your experience, practising in the Redfern Court so frequently, that there is a good deal of dissension in the Redfern Force? Well, I have heard one or two of the Police Officers say that there was.

4114. *His Worship.*] No doubt in every force there is a good deal of dissension.

4115. *Mr. Bull.*] Why, in our profession there is.

4116. *Mr. Abigail.*] But of course you will admit that dissensions of that sort would be subversive of all discipline in the Police Force?

4117. *His Worship.*] That is not one of the charges.

4118. *Mr. Abigail.*] I merely wished to get it out as a matter of experience.

4119. *Mr. Bull.*] As a rule we take for granted that our clients, when instructing us, particularly in cases under the Licensing Act, are telling us the truth? Yes, generally we do.

4120. And we take some trouble sometimes to find out whether they are? Yes, a great deal at times.

4121. Sometimes in your experience you find that they really are not telling the truth? Yes, and I know both of us at times have asked them not to go into the box, and at other times we have had sufficient power over our clients to compel them to plead guilty.

4122. Has not this happened to you: In appearing for some publican who has actually made an admission of the very circumstance which was alleged against him, has he not been prepared unless prevented by you or me to go into the witness-box and swear that the thing never happened? I would rather not be asked that.

4123. As a fact have you not advised in cases under the Licensing Act, after hearing the evidence for the prosecution, that the defendant should plead guilty? Yes.

4124. Notwithstanding the fact that your instructions were opposed to the evidence given by the police? Yes.

4125. *Mr. Abigail.*] Or probably in matters of that kind your defence was purely technical, and you were waiting to see if the case was technically proved.

4126. *Mr. Bull.*] Technical cases cannot assist us in this matter. I am asking Mr. Levien plainly and bluntly with regard to people charged with offences.

4127. *His Worship.*] My experience is that the attorneys will not fight a bad case.

4128. *Mr. Bull.*] In any utterance made by you in the House you were not prompted by any personal matter of yours in which you could accuse Quelch of lying? No. I may as well give myself away at once. It is not generally known but I believe I recommended Quelch to the Police Force.

4129. And spoke personally to Inspector-General Fosbery of the man? I did.

4130. On his entering into this present position? Yes; I think Quelch came to me and I knew him and had met him frequently.

4131. You gave him a letter in the first instance and personally spoke to the Inspector-General of Police? Yes, I wanted to do him a good turn.

4132. And this conclusion that you came to was really what you had heard outside and upon the conclusion which you understood Mr. Smithers himself had come to in contradiction of the statement made by Quelch that he had seen what he said he saw through the keyhole? Yes.

4133. That is the way you come to your conclusion? Oh, certainly, I believed the statement of Mr. Smithers thoroughly and the matter was such public property, as you know. It was spoken of very strongly.

4134. Speaking with regard to Quelch as to unduly pressing his cases, you and other members of the profession have used this expression that he was "rather strong"? Yes.

4135. Which means exactly the same thing only put from our own point of view? Yes.

4136. Is not this what it is intended to convey, that he swears up to the mark, presses his cases possibly more than it might be fair for a policeman ordinarily, and swears up to the mark? You know there is a way of giving evidence. A man gives his evidence, and makes it, to use our own words, "stronger" than what is needed.

4137. *His Worship.*] Presses the case more than is needed? Yes. If he sees the defence gone into and he can fill up a gap with something he has forgotten, policemanlike, he gets into the box and fills up that gap.

4138. *Mr. Bull.*] A la Brennan? I think it is a most reprehensible practice.

4139. I think you will agree that in cases where Quelch is a witness he does not forget much? Oh, no.

4140. *Mr. Abigail.*] The complaint generally is that he remembers things that never existed. Is not that the complaint among the solicitors?

4141. *Mr. Bull.*] I must object to your interposing these questions in this irregular way. (*To the witness*): You were not aware at the time you made the remarks in the House that the very depositions of the witnesses in this case where Mr. Smithers made this inspection were taken outside the court by the solicitor who had charge of the defence and read to the witnesses who had not been called—the evidence which had already been given in the prosecution was read to the witnesses who had not been called for the defence? No; I was not aware of that. There was a man of the name of Swan giving evidence. I knew Swan for years. I had implicit confidence in him, as I have now.

4142. The question was not whether Swan was in this hotel until this hour of the morning, but whether Swan had been seen by Quelch at some hour in the morning drinking liquor? I know nothing about the case.

4143. Do you know there is no such contention that Swan was in the house at that hour of the morning? Now, I know it. The only thing I knew was that it was generally spoken of, the man being seen in the bar, and the possibility of seeing him.

4144.

Robert Henry
Levien, Esq.,
M.L.A.

4 Nov., 1897.

- Robert Henry 4144. The only contention was, apparently, that Swan being admittedly in the place at the time when
Levien, Esq.,
M.L.A. Quelch saw him there, did Swan at the time that Quelch said he saw him through the keyhole drink of
something from a glass which was a liquor? No; I did not know that that was the contention.
- 4 Nov., 1897. 4145. Nor did you know that the very depositions were taken by Mr. Smith out of the court into the yard,
and read to the witnesses who had not been called, and were afterwards called? No, I did not know that.
4146. How would you stigmatise conduct like that. Would you descend to do that? I would not like to
take the responsibility.
4147. *Mr. Abigail.*] In justice to Mr. Smith, whom I know, I think he should be called to give evidence.
4148. *His Worship.*] He is not charged. I do not think it is necessary at all.
4149. *Mr. Bull.*] Do you know that Mr. Smith actually took the depositions out and read them to the
witnesses in the court-yard?
4150. *His Worship.*] When friends are found at a quarter past 1 in a public-house, which is lit up, and in
the vicinity of the bar, don't you think that the probabilities are that they have been drinking? It is too
natural. I think I would. I do not think I would stop there all the time without drinking.
4151. *Mr. Abigail.*] The only test is for your Worship to look through this keyhole and see whether you
can see.
4152. *His Worship.*] I decline to do that.
4153. *Mr. Bull.*] Were you aware, at the time that you made the remarks that you did in the House, that
these depositions had not only been taken out, but that the circumstances had been strongly commented
upon by Mr. Smithers? No. This is the first I have heard about that. I did not know, until you just
mentioned the matter, who the attorney was.
4154. Were you aware, too, that Mr. Smithers, when dismissing the case, said this: "I think it is possible
Quelch was mistaken in saying what he saw. At any rate, I give the defendant the benefit of the doubt
which I have in this matter"? No. I understood that he went further than that.
4155. *Mr. Dacey* went so far at the House as to claim me as one of the audience at the time this was heard,
and I was not within miles of the court on that day. The matter only came to me as a matter of hearing,
the same as it came to Mr. Levien. Your Worship will understand, I think it only right to say as I said
just now, that, believing that statement of Mr. Smithers was stronger than I hear now, of course I came to
that conclusion; and, from the general manner in which Quelch conducts his cases, and believing the
statements of my clients, knowing that some of them are respectable men whose words I would just as soon
take as their oaths in cases I may have against Quelch—I say I may have been mistaken.
4156. *His Worship.*] Were you defending this case? No.
4157. *Mr. Bull.*] Mr. Carter Smith was the solicitor? This is the first time I have heard about these
depositions being taken out. I may say that, in the heat of debate, any man in Parliament may make an
expression of opinion which he may afterwards find out to be a mistake. "Open confession is good for the
soul," they say. I know that I have even expressed an opinion against his Worship who sits here, Mr.
Clark, and I know that I was wrong when I made it, and I ought to have there and then made an apology
the next night.
4158. You heard this charge which was made against Quelch of burglary at "Myall House"? Yes. And
I made my observations then, and I did not believe it.
4159. And you do not know? Of course I am not off my head.
4160. *Mr. Abigail.*] You only heard what was said in Parliament? Knowing the character of Quelch—
he may stretch his imagination—but I do not believe that he is a thief. I do not wish to go back on my
statement that I know that Quelch has, what I consider, been too zealous, and there is a way of stretching
a case. Neither you nor I would do it.
4161. An officer like that is a menace to public liberty? I do not think I should give an opinion on that.
4162. Although you stated, upon Mr. Dacey's allegations concerning Quelch with reference to "Myall
House," that you could not come to the conclusion that Quelch was a thief, still you did not mind coming
to the conclusion, from your general experience of the man and from your observation of him, that he was
a liar? That is what I said.
4163. Is not that still your impression or opinion? After considering the matter over I do not go that far.
Knowing Inspector Lawless as I have done for a number of years, and having the highest opinion of him,
I can hardly think that if he had any knowledge of these things he would have allowed him to stop for one
moment.
4164. Then it is your respect for Mr. Lawless rather than for Quelch that has brought you to this
conclusion? No. I have just given my evidence as fairly as I can. I say I may have made my observations
a bit strong, but it is from the general knowledge of his manner of pressing cases and from my belief in my
own clients. Sir James Martin once told Sir Julian Salomons that he had better hold his tongue than
repeat himself, and I do not think that it is any use my repeating myself.
4165. *His Worship.*] In fact you think Quelch may be over anxious to secure convictions? Yes; that is
the way I put it. I think that would be a very good definition.
4166. *Mr. Abigail.*] You admit that a model policeman should preserve neutrality and show no bias? Yes.
And they tell me that Quelch is religiously inclined. I should advise him to read that "On and Off Duty."
It would save him a bit of trouble.
4167. From your knowledge of Mr. Carter Smith, he is not a man, in your opinion, who is likely to take
out depositions?
4168. *Mr. Bull.*] I object. I made no personal reflection against Mr. Carter Smith.
4169. *His Worship.*] Mr. Smith is not in the matter at all.
4170. *Mr. Abigail.*] He is being stabbed behind his back as it were.
4171. *His Worship.*] There can be no doubt about that, because he was censured by the magistrate at the
time.
4172. *Mr. Bull.*] I would just like to ask Mr. Levien this question, so as to show that I am making no
insinuation against Mr. Smith. Are you aware that on the very next day, in the daily press, the following
paragraph appeared referring to the charge of Sunday selling at Redfern?
4173. *Mr. Abigail.*] I object to my friend asking these questions, because it is only done to get it down in
the notes.
4174. *Mr. Bull.*] This is in defence of Mr. Smith, and not an insinuation against him. Are you aware,
as

as a fact, that the newspaper of the next day mentioned the circumstances, and also gave Mr. Smith's explanation to the magistrate. "Mr. Smith was called into Court, being told he had no right to do such a thing. He explained that he considered he was perfectly in order in doing so, but would not have done it had he not left a full note of the proceedings which he himself had taken at the time in another Court." [Exhibit No. 25.]

Robert Henry
Levien, Esq.,
M.L.A.
4 Nov., 1897.

4175. *Mr. Abigail.*] There is the end of this great plot to suborn people to commit perjury, and I say that is a deliberate charge hurled against Mr. Smith.

4176. *Mr. Bull.*] I suppose Mr. Smith acts for me oftener than he acts for any other practitioner in the city, and he would not act for me if I had that opinion of him.

Charge No. 6.

Mr. Thomas Coghlan, clerk, Charities Department, was called and sworn:—

4177. *Mr. Abigail.*] Is it a fact that there was sufficient light in that skillion addition to the main store for Quelch to have walked through from the front entrance to the skillion, right through to the wicket-gate at the back? No. Not sufficient for him to miss the bag.

Mr. Thomas
Coghlan.

4178. That was the bag of stuff that was just at the side of the door? Yes.

4 Nov., 1897.

4179. *Mr. Bull.*] Might I point out that in these commissions witnesses cannot be called from time to time to contradict each other. My friend is pursuing a course that is never allowed in these commissions. This man has given his account of what took place there, and Quelch has given his account, and if this course of procedure is proceeded with I shall recall two witnesses to contradict this man.

4180. *His Worship.*] This is the same matter.

4181. *Mr. Bull.*] Have you not been told since yesterday that Quelch swore that he did go through without seeing this bag? Yes.

4182. *Mr. Abigail.*] I told him. Your Worship sees that these are my witnesses —

4183. *His Worship.*] I do not think it is necessary. I decline to allow the question to be put.

4184. *Mr. Abigail.*] I submit that this is a Court for the full investigation of these charges, and in order to get, if possible, at the truth.

4185. *His Worship.*] I must go by the laws of evidence.

4186. *Mr. Abigail.*] Not in a royal commission. It is more like a coronial inquiry.

4187. *His Worship.*] Personally, I do not object. Mr. Bull objects. To prevent any trouble I will let the question be put. (*To the witness*): Your opinion is that he could not have passed? The passage was too small.

4188. What room was there to pass? About 3 feet.

4189. Do you think a man could not pass at a distance of 3 feet without touching the bag? Not in the position it was in.

4190. It think it will be necessary for me to go and see that place.

4191. *Mr. Abigail.*] I think that will be better. (*To the witness*): How long, in the first instance that Quelch came to you, on the Monday or Tuesday previous to the 26th, was the constable there from first to last that afternoon?

4192. *Mr. Bull.*] I object to this. He has been asked to swear he was there an hour and a half.

4193. *His Worship.*] That has been asked before, I cannot allow that.

4194. *Mr. Abigail.*] Quelch admits he was coming through the skillion addition, and when he came to the door you and he collided. If that is so, could he have failed to detect the presence of Newcombe in the main building? No.

4195. *Mr. Bull.*] We have had this from this man. It is simply opening up the whole thing after having had a long chat with this man. I will show you how important this is in a minute when I ask you a question. These people are on their trial to some extent. Anybody can see that? I am not on my trial.

4196. I do not say that you are actually, but I will ask you something in a minute.

4197. *Mr. Abigail.*] Have you ever been suspected of this? Certainly not.

4198. Did Quelch walk calmly out of that door in an ordinary way or did he tumble out?

4199. *His Worship.*] We have had all that. I cannot have that again.

4200. *Mr. Abigail.*] This is supplemental.

4201. *His Worship.*] I decline to hear it.

4202. *Mr. Abigail.*] Is it a fact that he grabbed you or ran into you with his head down? He never touched me.

4203. He did not spring out and grab you? No, when he got about a foot from me he stopped.

4204. *Mr. Bull.*] We have had all this.

4205. *Mr. Abigail.*] When you showed him over the store, as you have alleged in your evidence, did Quelch take up any of the articles and discuss their qualities?

4206. *Mr. Bull.*] Quelch has been asked this, and denies it.

4207. *His Worship.*] It may as well be asked.

4208. *Mr. Abigail.*] When you took Quelch over the store in the loft, and showed him these articles, did he pick any of them up and admire them? He put his hand on some of the things, and asked about their quality.

4209. Was that both upstairs and down? Yes.

4210. And is there any doubt that you showed him over the place? Not the slightest.

4211. Is there any doubt that you asked him to keep a lookout on the place?

4212. *Mr. Bull.*] I object to all this. Your Worship sees what my friend is doing. He is doing absolutely what your Worship has decided he cannot do. This witness has sworn in his examination-in-chief that he did that, and now this question is put to him.

4213. *Mr. Abigail.*] Have you any motive to injure Quelch, or is it your object to injure Quelch in any way at all? No, it is not my object.

4214. Have you any illfeeling towards him? No.

4215. Have you been influenced by anybody, Mr. Dacey included, to strain a point to injure Quelch? No man can possibly do that.

4216.

- Mr. Thomas Coghlan.
4 Nov., 1897.
4216. So far as you are concerned, would any man dare to do it? No.
4217. You have been in the service fifteen years? I have had one break.
4218. Your brother is Dr. Coghlan, is he not? Yes.
4219. And you are a brother of the Statistician? Yes.
4220. You said something about getting promotion? I expect it.
4221. When did you first know Mr. Dacey? When I was sent down by the Chief Clerk.
4222. You called at the Charitable Institutions Office and interviewed the Chief Clerk? Yes.
4223. And you were called into the presence of the Chief Clerk and asked questions by Mr. Dacey? Yes.
4224. Was that before or after his speech in Parliament? Before.
4225. *Mr. Bull.*] Do you remember whilst Quelch was at the store on the day that you mention that you imparted—I do not care to be too inquisitive—some little private circumstance, I mean some little trouble which had overcome you, to him? Yes, I did.
4226. Do you know this: that Mr. Maxted himself made complaint to one of the Police Force, one of the private members of the Detective Force?
4227. *Mr. Abigail.*] Who was he, please?
4228. *Mr. Bull.*] You will get that directly. See if he knows anything about it. (*To the witness*): Do you know that Mr. Maxted himself made complaint to one of the Detective Force that he was not altogether satisfied with the integrity of the clerks that he had in that place, asking that officer to watch that place? Yes.
4229. Do you know that at that time a clock had been stolen out of the place? Yes. [*Exhibit No. 26.*]
4230. It was stolen out? Yes.
4231. And by a brother, too, of one of the then employees? That was not proved, though. I do not think so.
4232. Was it not shown where it was taken out? Was it not shown that it was taken out by one of the employees? I believe the place was broken into.
4233. Do you not know this: a portion of the very property stolen out of that place when it was broken into was found in the possession of the brother of one of the then employees? I believe it was.
4234. Now, I do not care to be too inquisitive, to ask too many questions.
4235. *Mr. Abigail.*] Now, this makes it appear as if he is the brother of the man? I am not the brother.
4236. *Mr. Bull.*] Well, I say that I have no such thing in my mind with regard to Mr. Coghlan. You know that this person is no relation of yours? The inquiry at that time was in connection with an anonymous letter written to Mr. Maxted.
4237. But it had relation to the integrity of the clerks who were there? Yes it was subsequently found out who did it.
4238. Did I understand you to say, Mr. Coghlan, or was it the other witness, Mr. Newcombe, that on the day when Quelch was there there were two women in this place? There was nobody there at all.
4239. I have something of that sort in my mind. Did anyone say that there were two women there? Not that I know of. There were not two women there.
4240. You have heard Constable McIntosh's evidence in this case. You have not been told that by anybody? No.
4241. Do you know that he mentioned the circumstance that there were two women there? He could not.
4242. *Mr. Abigail.*] He certainly did not in this inquiry.
4243. *His Worship.*] I do not recollect it.
4244. *Mr. Bull.*] There are lots of things which we are not likely to remember? Do you mean on the night when the robbery occurred?
4245. Exactly? Oh, well, there were Mrs. Maxted and Miss Keele.
4246. *Mr. Abigail.*] There is a nice insinuation. "There were two women there," and one of them was Mrs. Maxted, a lady of the highest repute.
4247. *Mr. Bull.*] There is nobody insinuating anything against Mrs. Maxted, and the Court knows it? Newcombe telephoned to Mr. Maxted, and Mrs. Maxted came down instead.
4248. I prefaced what I asked you by saying, "Did you, as a fact, have a conversation with Quelch on the Monday about some other matter of your own, and did you impart certain confidences to him, just answer 'Yes' or 'No'?" Did you have a conversation with Quelch about a lady"? I did, possibly.
4249. Now, you see at once that nobody in the realm of imagination could dream that I could be referring to any one of the two ladies whom Mr. McIntosh saw there? No.
4250. I had it in my mind that somebody did mention the fact that there were two ladies at some time or other. Where do you say this bag was? In the passage.
4251. And the passage, I think you told us, was 3 or 4 feet wide? About 3 feet wide.
4252. Was there any investigation by the authorities, or were you people asked to make an explanation with regard to any of your conduct on this particular afternoon or evening of the 26th of June by Mr. Maxted? No.
4253. Were not you asked to report where you were and what you were doing? No. I reported the matter.
4254. I simply asked whether you were asked to report? No.
4255. How far was this hotel that it is mentioned both of you went to to have a drink from "Myall House"? Crimp's, down past the railway bridge.
4256. How far is that away? 200 or 300 yards.
4257. How long were you in there? Not five minutes.
4258. Now, fix the time that you were there? I should say it was—well, to the exact minute, I could not possibly.
4259. You have your own time, fix the time? It is rather difficult after sixteen months to fix a thing to a minute.
4260. But you were only there five minutes, and you went straight back to "Myall House"? Possibly less.
4261. I am only taking what you said yourself. You said "about five minutes," and you went straight back from the hotel to "Myall House"? Yes.
4262. Cannot you tell us now what time it was that you were at that hotel? It must have been close on a quarter past 7.

Mr.

Mr. W. A. Newcombe, Clerk, Charities Department, was recalled :—

Mr. W. A.
Newcombe.
4 Nov., 1897.

4263. *Mr. Abigail.*] Have you any motive or object to injure Quelch? None whatever.
 4264. Have you been influenced by anybody to give evidence to injure Quelch? No.
 4265. Have you been influenced by Mr. Dacey in any way as to what evidence you should give? No.
 4266. Now, was this skillion addition to the main store so dark as to render it impossible because of the position in which that bag of stuff was for Quelch to walk through from the entrance to the wicket-gate at the rear without falling over it? He must have knocked his foot against it.
 4267. There were only about 3 feet? Yes, about 3 feet.
 4268. *His Worship.*] Supposing he did knock his foot against it, was it not so dark that he could not see what it was?
 4269. *Mr. Abigail.*] Then would he not stoop down and feel?
 4270. *His Worship.*] I do not think it is material at all if he did knock against it. Now, what interval was there between the bag and the other side of the passage? A couple of feet.
 4271. *Mr. Abigail.*] But the bag was right in the entrance of the door, as it were, just 3 feet in? Right in front of the door.
 4272. And if a man had walked in and just opened the door, especially in the way that door was being held up by the lock, and walked through, could he have escaped the bag in any way? He could not have escaped it.
 4273. He would have tripped over it? Yes.
 4274. *His Worship.*] You say there was not room to pass it without touching it? Oh, yes, there was room to pass it.
 4275. Then must he absolutely fall over it, for that was what you said in the first instance? He might possibly fall over it.
 4276. *Mr. Bull.*] I suppose if a man said he did not you would be rather inclined to believe him, he would know better than you? Certainly.
 4277. *Mr. Abigail.*] Could he have walked straight through that door without falling over it? Well, if he knew the bag was there he could.
 4278. But in entering the back there, and the bag being in that position and in the dark, could he have gone through there without falling over the bag? He must have stumbled against it. I do not suppose he would fall.
 4279. But he would have stumbled? Yes.
 4280. That goes this far, it acquaints Quelch with the presence of the bag, and if he had been in search of the alleged criminals of course he would have immediately stooped down and seen what it was.
 4281. *Mr. Bull.*] It was dark in this place? Oh, yes.
 4282. I suppose it would be so dark that one could not distinguish another person's features 10 or 12 feet away? You could not.
 4283. *Mr. Abigail.*] Now, your Worship, I want to draw your attention to some evidence, and to the statement given in the *Daily Telegraph*.
 4284. *Mr. Bull.*] I object to any remarks my friend wants to make.
 4285. *His Worship.*] I will hear all the evidence you like to bring, but I will not hear inferences from that evidence. It is for me to draw inferences.
 4286. *Mr. Abigail.*] I am told here that this is an inquiry which will not allow the freest investigation.
 4287. *His Worship.*] I did not inform you anything of the kind. I am not going to have comparisons drawn between certain statements. It is for me to draw comparisons, not you.
 4288. *Mr. Abigail.*] I have asked your permission to tell to you on this charge what is substantially my case, and in order to do that I have requested —
 4289. *Mr. Bull.*] I object to this. By a side wind my friend is endeavouring to do what you have said he shall not do.
 4290. *Mr. Abigail.*] For this reason: I will be afterwards accused of neglect of duty. I have a strong case here, and I want to get my facts before your Worship. My friend naturally objects—it is his business to object.
 4291. *His Worship.*] I will not have any comparisons made, nor any conclusions drawn.
 4292. *Mr. Abigail.*] What I want is to put before your Worship what I say is our case, and to draw your attention to a variance between the evidence of Quelch, on oath, and the statement given by him to Somerville on the next day after, the report of which statement appeared in the *Daily Telegraph* of 27th June, 1896.
 4293. *His Worship.*] I decline to hear it.

Charge 1—(continued).

George Henry Smithers, Esquire, Stipendiary Magistrate, Sydney, was called and sworn :—

G. H.
Smithers,
Esq., S.M.
4 Nov., 1897.

4294. *His Worship.*] What is your name? George Henry Smithers.
 4295. You are a Stipendiary Magistrate? Yes, in Sydney.
 4296. *Mr. Abigail.*] You were sitting here in a case in which Quelch was prosecuting—a case at the "Somerset Hotel"? I cannot remember it by name.
 4297. It is commonly known as the "keyhole case"? I only saw the place once.
 4298. I understand, Mr. Smithers, that there was some contest in the case as to whether the senior-constable prosecuting really could see all he was supposed to see? Yes; the question was whether he could see the defendant drinking, at a particular place where he said he was standing, through the keyhole.
 4299. And also whether he could see Constable Swan? I cannot remember now.
 4300. There was some considerable doubt in your mind about it? I wanted to see the place for myself. I wanted to see whether what the constable said he could see could be seen from that particular point.
 4301. And you paid a visit to the hotel? I did.
 4302. And did you test the possibility of vision through this keyhole? Yes, I looked through the keyhole.
 4303. Had you anybody there to place somebody in the position described by Quelch? I do not know who did. Somebody did that.

G. H.
Smithers,
Esq., S.M.
4 Nov., 1897.

4304. *His Worship.*] In the positions described by Quelch? Yes.
4305. *Mr. Abigail.*] Could you see all the constable deposed to having seen? No, I could not, through the keyhole. You could see up to about there [*indicating his top waistcoat button.*]
4306. Could you have seen a man in the act of raising a glass to his lips? You could not actually see up that far. You could not possibly see the face of the person through the keyhole.
4307. Could you see the table in the room? I cannot say now. There was a table there, but I could not say I did see it.
4308. It is so long ago now that you cannot bring to your mind whether you looked at the table? I cannot remember whether I looked at the table.
4309. You went there in the daytime? I adjourned the Court at 1 o'clock and went there during the adjournment. I had a lot of work to do, and did not want to spare the time.
4310. You closed the door, and had the gas lit in the room and the blinds drawn, and the room put in as much darkness as you possibly could to get as true a test as you possibly could? Yes.
4311. Then after your inspection you came back and dismissed the case? Yes.
4312. Do you know what remark, if any, you made at the time? I do not know what remark. I did not think it was a case in which I was called upon to say much.
4313. Is it not a fact that you said that you gave the defendant the benefit of the doubt? I cannot remember it.
4314. If there had been merely a question of giving the benefit of the doubt about the case you would not have gone to the trouble of inspecting the premises? That followed.
4315. After all the true test in that case was whether you could believe the constable when he swore he could see all he deposed to seeing? Exactly, it was my duty to see whether he could.
4316. You went to the trouble? As a matter of fairness to both sides.
4317. It would have been your duty as a magistrate to get at the truth? And was.
4318. And you assumed that the only way to get the truth was to go down to the premises and see for yourself? It was only fair to both sides.
4319. *His Worship.*] Do you not think that if you saw a man raise a glass as far as that you would draw the conclusion that he was drinking? You could draw your own conclusions. You could not see whether he was drinking or not, but draw your own conclusions.
4320. *Mr. Abigail.*] Do you know that Constable Swan is a tall man? I do not know.
4321. He is taller than Quelch? He was not a short man.
4322. Could you have seen the face of the man? No.
4323. Quelch's evidence was that it was Swan who was standing there and Swan who was drinking there.
4324. *Mr. Bull.*] Supposing that there were a number of men at this table—did you see the table? I cannot recollect. I fancy there was a table there.
4325. It was sworn by Quelch, and it was not denied in the evidence before you, that there was a table at which some people were sitting, and to which two rounds of drink had been served. Would it not have been possible, supposing a man had been drinking at that table, and, having drunk from a glass, put it forward on the table so [*indicating, leaning forward*], would it have been possible for Quelch to have seen that? I remember now that there was a table there. Of course it is almost certain there would have been a table in the room.
4326. You do not profess to remember the actual evidence in the case, do you? I have not seen it since.
4327. Do you not know that long before Quelch swore that he had seen Swan drinking, he had also heard Swan's voice in the place? I think so.
4328. Do you remember that Quelch gave this evidence that "he was watching the house from 12:30 until about ten minutes past 1? Only by the depositions. I see in the depositions that that is correct.
4329. You may assume that I am reading from the official copy of the depositions. [*Exhibit I.*] "I remember the 7th instant. I was on duty near the defendant's hotel at half-past 12 a.m. I saw his parlour fully lit up; the hall in Phillip-street was fully lit up, and a glimpse of light showing through the bar-door. I listened; I heard the voice of a female in the bar. I heard the drawing of corks, the rattle of glasses, the beer-engine working. I went to the Pitt-street parlour-door and looked through the key-hole. It is in a parallel line with a door from the bar into the parlour, also the door leading from the hall into the parlour. The bar-door was open. I saw the female hand some drinks into the parlour. I heard four or five different voices in the parlor. I recognised one voice as Constable Swan's, of Redfern Police Station. I waited, watching outside until ten past 1 a.m. I saw two or three rounds of drink supplied. At ten past 1 o'clock Swan addressed a conversation to the licensee by name. I saw the licensee immediately afterwards. Swan said, "Mr. Brull, I had better be getting home." Brull said, "Don't go yet, Mr. Swan, we are not going to bed yet, sit down." Swan then stood up right abreast of the door that was shut. Another round of liquor was supplied by a female. All the glasses except one were handed to men sitting at the table. The glass of beer was handed to Constable Swan, who drank it and put the glass down as if on the table. The bar door was open before the drinks were supplied. Swan remained standing for several minutes longer. At 1:30 a.m. Swan and two other men were let out." Would you say that this could not be seen, "I saw the female hand some drinks into the parlour"? Of course, through the keyhole you could see that.
4330. You could see a person passing at the height of the hand? Oh, yes. Of course, it follows if anybody were passing, so long as it was not above a certain height, it could be seen.
4331. "I saw two or three rounds of drink supplied." You say that could have been seen if they were supplied from the bar to the persons at this table? Yes.
4332. "Swan then stood up right abreast of the door that was shut. Another round of liquor was supplied by a female. All the glasses except one were handed to men sitting at the table." That could be seen? Yes, within a certain range of the keyhole, of course.
4333. "The glass of beer was handed to Constable Swan, who drank it and put the glass down as if on the table." Would you stand there and say, from the observations you made, that that could not have been seen by Quelch? Of course, that could be seen.
4334. And, having drunk from the glass—taking it so, and passing it down to the table, that glass leaving, certainly not the body of the man, but the face or head of the man—that could be seen, of course? Of course, taking it from a certain place.
4335. Do you notice that that is all the evidence that Quelch gives about that, except this: He says, "The bar

G. H.
Smithers,
Esq., S.M.

4 Nov., 1897.

bar door was open before the drinks were supplied. Swan remained standing for several minutes longer. At 1:30 a.m. Swan and two other men were let out of the side gate in Phillip-street." Now, that is Quelch's account of what he saw inside. You could see the man's arm yourself, could you not? Oh, yes, you could see the arm.

4336. Bent as if something was lifted to the head? Yes, exactly. I got whoever stood there to do that.

4337. I am finding no fault with the test that you made. I have no doubt that you made the very best test that you could. But there is no doubt about that, that so much of the body of the man could be seen by you, and the arm could be seen in that position whilst the glass actually being drunk out of might not have been seen? Quite so.

4338. But immediately the vessel, the glass, would leave the topmost portion of the man's anatomy, it would be at once in view of Quelch until it reached the table? Of course, putting it down naturally, it would be so.

4339. *Mr. Abigail.*] That is providing, supposing, that this man who was drinking, Swan, was in the position described by Quelch? Yes; of course.

4340. *Mr. Bull.*] Do you remember saying this? Will you say you did not say it: "I think, under all the circumstances, having seen the place, the policeman might be mistaken; but I give the defendant the benefit of the doubt?" I would not like to say I did not say it; but, so far as I recollect, I said that I had viewed the premises, but I would not like to say that I used the words "benefit of the doubt."

4341. Would you like to say you did not use that expression: "I give the defendant the benefit of the doubt"? I would not like to say it. It is four years since.

4342. *His Worship.*] I suppose in many cases you do give the benefit of the doubt? Yes; but I do not say it. You know we do give the benefit of the doubt; but we do not say it always.

4343. Have not you often said so? Yes.

4344. Where there is one witness on one side and two or three on the other you do not like to brand either side, and so you give the benefit of the doubt? Yes.

4345. *Mr. Bull.*] Was it not admitted that Swan was there? I cannot say that.

4346. Had you any doubt, from first to last, that Swan was in that hotel? If your Worship wishes me to give my reasons I will do so.

4347. *His Worship.*] Did you make any remark about Quelch's evidence. Did you condemn it in any way? No.

4348. *Mr. Bull.*] Did you make any insinuation that his evidence was false? No; there was no necessity for it.

4349. I will read Charge 1 [*read it*]. Now, from first to last, have you ever insinuated, by anything you did or said, that Quelch spoke falsely? No. I had no occasion to do so. I was simply dissatisfied and dismissed the case.

4350. Do you remember a question with regard to the depositions? No I do not.

4351. Do you remember who, as a fact, appeared for Brull, the publican? No.

4352. Do you remember that Mr. Carter Smith appeared? Does the mention of his name now bring back something to your mind with regard to the depositions? No, I do not remember the case.

4353. Do you remember that the police officer drew your attention to the fact that the depositions which had been taken previously on the Tuesday, the 14th, had been taken out of Court by Mr. Smith into the yard, where his witnesses were, on the 16th? I remember something about it.

4354. Do you remember Mr. Lawless, or the officer of police drawing your attention to that and your catechising Mr. Smith for having done so? Now you speak of it I remember there was something.

4355. Do you remember Mr. Smith saying that he had, and justifying himself by saying that he had mislaid the full notes which he had taken of the case on the Tuesday? Something of the kind, but I cannot remember it.

4356. This is a newspaper report of the proceedings, the very next day. Do you remember this? [*Exhibit No. 25.*] "Mr. Carter Smith, solicitor for the defence, enlivened the proceedings somewhat by securing the depositions which were taken on Tuesday and reading them in the yard at the back of the Court to his witnesses, who had not yet been examined. Inspector Lawless said he considered it gross impertinence, and called the attention of the Magistrate to the fact. Mr. Smith was thereupon called into Court and ordered to deliver up the papers, being told he had no right to do such a thing. He explained that he considered he was perfectly in order in doing so, but would not have done it had he not left a full note of the proceedings which he himself had taken at the time in another court." Now, does that bring it back to your recollection? I remember that I had to speak to Mr. Smith about taking depositions out of Court, but I cannot say whether it is in connection with this case. I remember on one occasion I had to speak to him pretty sharply, perhaps in connection with this case.

4357. *Mr. Abigail.*] I would just like to ask you one question in this case. The only evidence given in support of the alleged drinking that you had before you was that evidence given by Quelch when he said he saw certain things through the keyhole? Yes.

4358. As against that, Brull, the licensee and defendant, was called and denied it; Charles Cook, a man who came all the way from Wagga Wagga, and who was the traveller lodging at the hotel at the time, denied everything; Walter Griffiths, who was there, also denied it; William Richard Swan, who was the constable there, also denied it; and Mrs. Brull, the licensee's wife, denied it.

4359. *Mr. Bull.*] Denied what?

4360. *Mr. Abigail.*] What Quelch said with regard to Swan.

4361. *Mr. Bull.*] No.

4362. *Mr. Abigail.*] That evidence having been given, you naturally went to see whether it was possible to see, even if Swan was as placed by Quelch, whether Quelch could see all of this? Yes.

4363. And you satisfied yourself that he could not see it? I felt satisfied on the evidence that a glass had been raised; but I could not say to what person's face.

4364. And that being so, you were not satisfied that it was Swan who raised the glass? I do not know whether I am called upon to give my impressions. I do not know what my impressions were at the time. It is four years ago.

4365. It was after you had this view—after you were satisfied that Quelch did not see all that he swore he saw—that you dismissed the case? Of course. I think I have convicted when Quelch's evidence was the only evidence against six or seven, and the same thing applies to other people. It all depends upon the nature of the evidence.

4366.

- G. H. Smithers, Esq., S.M.
4 Nov., 1897.
4366. *Mr. Bull.*] Was this not absolutely sworn in the case: that no drinks of any description had been supplied to anybody? I take it that is so from what you say.
4367. *Mr. Abigail.*] A look at the depositions will show that that is not so.
4368. *Mr. Bull.*] It was sworn by Mr. Brull and his wife that no drinks were supplied to anybody after 11 o'clock.
4369. *Mr. Abigail.*] [*Exhibit No. 7.*] [*Read the depositions of Mr. Cook and Mr. Griffiths in the "Somerset Hotel" case*], and the evidence was, as your Worship sees, that Cook and Griffiths were boarders.
4370. *Mr. Bull.*] [*To His Worship*]: There is a probability that has not been pointed out to you. It is said that Cook had made an appointment with his friend Swan, and that while he had drink—everybody else drinking—Swan refused to drink, he being dry? Is that probable?

Charge No. 7.

"That Constable Lambert was on duty one night, and heard a noise at Biron Pogson's grocery shop. He came up to the place to see what it was. He found the door open, and Senior-constable Quelch inside with a bag of groceries. Quelch said, 'Someone has broken into the place.' What I wish to draw particular attention to is that this attempted robbery of the grocery store has not been reported at headquarters. That is a significant fact, Quelch was the officer to have reported it, but he has not made his report."

Constable John Lambert was called and sworn:—

- Constable J. Lambert.
4 Nov., 1897.
4371. *His Worship.*] What is your name? John Lambert.
4372. You are a constable stationed at Redfern? Yes.
4373. *Mr. Abigail.*] I am calling you to tell us all you can about this case of Quelch with reference to Pogson's grocery store, I cannot fix the date in any other way at present; do you remember the date you were on duty? Yes.
4374. What date was this? About 2:40 a.m., on the 28th July, 1895.
4375. You heard a noise, did you not? I was on duty in the Botany Road, Waterloo, at that time.
4376. That is where Pogson's shop is situated? Opposite.
4377. And you were on duty at the opposite side of the road? Yes.
4378. You were attracted to the grocery store by hearing a noise? I heard somebody moving about in the shop.
4379. And you walked across to see what it was? No, not at that time.
4380. What did you do? Waited about five minutes until I heard the door open and some person come out. I concluded it was a burglar, so I drew my revolver and rushed across the roadway.
4381. And whom did you find it to be? I found Senior-constable Quelch.
4382. It was Senior-constable Quelch? Yes.
4383. Did you say anything to him, or he to you—who spoke first? He was wearing a waterproof cape, and he was in a stooping position locking the door when I got there.
4384. *His Worship.*] Was he in uniform? Yes, wearing a waterproof cape. I said, "You are a lucky man I did not shoot at you, I thought you were a burglar." He said, "I found this key in the door and I went in and had a look through the store." At this time I noticed a bag full of something on the doorstep.
4385. *Mr. Abigail.*] Outside? Yes; and I noticed on the top of the bag there was a sugar bag, about 6 lb. of sugar I should think, in the same paper as sugar is usually made up in.
4386. In a paper bag? Yes. I said, "What's this stuff?" pointing to the bag; and the senior-constable said, "They must have been disturbed; I found this bag ready made up in the store." I said, "What are you going to do with it now?" He replied, "I am going to take it to the station." I said, "What do you want it at the station for if you found it inside the store?" I do not remember what reply he made to that, but he unlocked the door and put the bag back again.
4387. He unlocked the door and put the bag back again? Yes. He then locked the door and came back in the roadway with me. He said, "That will be all right, Lambert; I will call Mr. Pogson, and report the matter to the station." So I resumed my beat and went back to the station.
4388. Did you report it? Not when I went in that time. When I went in at half-past 4, I mentioned the matter to the constable, Kidd, who was in charge of the station, merely in a conversational tone, not in the way of an official report.
4389. You had a certain opinion about this? I thought it was curious, and I subsequently mentioned the matter during that week to Serjeant Houlahan and Constable Moore. I had no further conversation with anyone.
4390. You took no further step? Until the following week, when I went on day work. I was passing Mr. Pogson's store; and he is a man we generally speak to and pass the time of day with, and I said to him, "You are a nice man, to leave your key outside the door," and he said, "It was no key of mine." I had no further conversation with anybody about the matter.
4391. Was this waterproof cape part of the uniform that night? Yes; it was winter. I had my coat on, he had his cape. It is usual to wear a coat in the winter.
4392. But he had a macintosh cape on? Yes.
4393. *His Worship.*] Had it been raining? No.
4394. *Mr. Abigail.*] Those are only worn during the rainy weather? Sometimes a man puts on his cape in the cold weather if he requires it. The duty men are required to wear a coat.
4395. Was Quelch on duty that night? He was on duty.
4396. Do you know whether he made a complaint about this at the station? This is the reason I can fix the date exactly by seeing his entry.
4397. *His Worship.*] Did you see the entry of the case? Yes.
4398. When? Some time afterwards.
4399. *Mr. Abigail.*] I want the Occurrence-book. I call for the Occurrence-book as part of my case.
4400. *Mr. Bull.*] It happens to be here, and I decline to give it to you. I insist on drawing your Worship's attention to this charge, and then I will hand my friend the book.
4401. *His Worship.*] I think Mr. Abigail has a right to see the book. 4402.

4402. *Mr. Bull.*] I ask your Worship's attention while I read this charge and then I will hand it to him. Now, this is the charge:—"What I wish to draw particular attention to is that this case . . . has not been reported at headquarters; that is a significant fact. Quelch was the officer to have reported, *but he has not yet made his report.*" Now my friend can have the book.

Constable
J. Lambert.
4 Nov., 1897.

4403. *Mr. Abigail.*] Do you know Quelch's handwriting? I would not swear to it.

4404. Just look at this book and tell me whose writing this is? To the best of my opinion that is Quelch's.

4405. Is it usual for him to make, or is it usual for the constable in charge of the station to make, the reports in the Occurrence-book? If ever I report, I report to the officer in charge of the station, and he makes the entry.

4406. Is it usual in making all these reports for the officer in charge of the station when he receives the complaint to put down at the top or at the bottom of the complaint the hour at which he receives it—you see it is done in all these other instances, but it is not done in this instance of Quelch's? Yes.

4407. Was this the 28th [*indicating the entry*]? Yes.

4408. *His Worship.*] What is the one immediately below it?

4409. *Mr. Abigail.*] 8:10 p.m. of the 27th. There was no complaint in that station for eleven hours except that reported by Quelch. He might have put it in when he found that this man had told Kidd. [*Mr. Abigail read the entry. Exhibit No. 27.*]

4410. *His Worship.*] You do not say that he took the bag out and put it on the doorstep? No; I saw it on the doorstep when I went over.

4411. When you heard the noise there was nobody outside? No; I could not see anybody.

4412. There was nothing on the doorstep when you first heard the noise? I could not see it until I went over.

4413. And when you went over you saw Quelch stoop over to lock the door up, and you saw this bag? It was an ordinary hempen bag with two handles, one on either side.

4414. What sort of a bag was it? Those bags that poor people generally take to market.

4415. An ordinary lunch bag? Yes.

4416. Like a carpet bag? Yes.

4417. *Mr. Abigail.*] I ask your Worship in order that that bag be brought. It is part of my evidence that he has had the bag ever since that pigeon case.

4418. *His Worship.* Every second man has a bag of that sort.

4419. *Mr. Abigail.*] How peculiar that a burglar should take a little bag like that! (*To the witness*): On the top of this little bag, which was filled with groceries, you say there was a brown-paper sugar-bag with 6 lb. of sugar in it? I do not know what the bag contained, but sugar is usually made up in that way.

4420. This was on the doorstep, and it was only after you drew Quelch's attention to the fact that he should not take it up to the station that he took it back? He said he intended to take it to the station.

4421. And you said, "You have no right to do that"? No, I did not. I merely said, "What do you want to take it to the station for if you found it inside the store," because it is an unusual thing to do.

4422. *His Worship.*] Did he say he found it inside the store? He did not say that, he said, "I found this ready packed for removal."

4423. *Mr. Abigail.*] He did not say he found it outside the store? No.

4424. He did not say where he found it, inside or out? No.

4425. When you put the question to him did he then immediately take the bag back? He unlocked the door and placed the bag just inside.

4426. And left it? Yes.

4427. Did he take the key of the door? Yes.

4428. Do you know what time that entry was made in the book? No.

4429. *Mr. Bull.*] Do you remember where you went after you left Quelch? Yes.

4430. Where? I went to the station along my beat.

4431. Do you remember whom you saw there? At 3 o'clock there are quite a number of men there.

4432. Do you remember seeing Serjeant Vane? In all probability he would be there; I cannot say.

4433. Do you remember seeing Senior-constable Proctor? I cannot remember who were there.

4434. I want you to try pretty hard? No, I do not remember it.

4435. When you went to the station would it not have been your duty to have at once reported what you had seen? No.

4436. Did you make any report when you went to the station? No.

4437. Did not you report "All correct"? Yes.

4438. Did you find out whether Quelch had been to the station when you went? No.

4439. Did not you know he had been before you went, and reported "All correct"? Well, I do not know; but I do not think it is likely he was.

4440. Did not you know that he had been, as a fact, and that in Constable Kidd's presence he wrote in this book himself? No.

4441. I usually begin by asking something about a man. How long have you been in the Force? Nine years.

4442. You are friendly disposed towards Quelch? Yes; I have never had a quarrel of any kind with him.

4443. Have you never seen this entry here, made by Quelch? Yes, I saw it.

4444. When did you see it? I only saw it lately.

4445. Since Mr. Dacey saw you? No; I saw it when I heard about this affair—I saw it in the book.

4446. You heard the matter had not been reported by Quelch at all, did not you? Well, I believe it was the general rumour.

4447. And I suppose to satisfy yourself whether it had or not you had a look at this book. Who showed it to you? I saw it at the station.

4448. You looked purposely to see whether it had been reported? No.

4449. Can you say whether any complaint of any description had been made to anybody in that lock-up between ten past 8 p.m. on the night of the 27th, and half-past 7 a.m. on the morning of the 28th, the same morning? I could not possibly say, because I was away on my beat.

4450. And you do not know of any? No.

4451. Do you notice that this is entered in the proper course of ordinary things? Yes.

4452. Is this entry consistent with what Quelch told you at the time. Did he tell you that he found the place open? He said, "I found this key in the door."

4453.

- Constable J. Lambert.
4 Nov., 1897.
4453. But you said that what he said in the first place was, "I found this place open"? No.
4454. "I found this key in the door"? "I found this key in the door."
4455. "And I went in to see that all was right"? "I looked through the store."
4456. Did you report to Serjeant Vane and to Senior-constable Proctor, when you went to the station, that which you describe you saw? Did you not report "All correct"? I reported to Senior-constable Shaw in the station, "All right."
4457. Were Vane and Proctor there? Yes, they would be in charge of section three, and they would be all bound to be there at 3 o'clock.
4458. Do you remember what time you made that report? I say I spoke of it in a conversational tone.
4459. What time was it when you went to the Police Station? At half-past 4 I went there again.
4460. When you made this report of "all correct" to Shaw? At 3 o'clock.
4461. I suppose you had never found this place open at any time? No, I don't remember that I did.
4462. Do you know that it had been on a previous occasion found open? I cannot swear.
4463. Do you know that on page 35, Senior-constable Bourke—do you know him? Yes.
4464. You would not like to insinuate anything against him? I do not insinuate anything against anybody.
4465. I am not asking whether you are or not. I am asking whether you would like to insinuate anything against Senior-constable Bourke? No.
4466. Now, are you surprised that on page 35 of this Rough Book, the very month before—I suppose it can be easily shown where Quelch was then, whether he was on night or day duty at this time? Oh, yes.
4467. At the time of this second entry [*Exhibit No 28*]? Yes.
4468. *Mr. Bull read the entry.*] You never saw that entry? No.
4469. *Mr. Abigail.*] All those things would aid the design of the man, and assist him in doing what he is charged with doing?
4470. *Mr. Bull.*] Did you see the entry before this one of Quelch's? No.
4471. I see they report anything, even a horse found straying in the street? Yes.
4472. And yet you did not report such a thing as that? It was not my duty. It was the duty of the senior officer to report it.
4473. *Mr. Abigail.*] It would have been insubordination on your part to have reported it instead of your senior officer? He told me he was going to report it.
4474. *Mr. Bull.*] He told you he was going to take the bag to the station? Yes, and then I say in my evidence that he said, "That will be all right, Lambert; I will call Mr. Pogson, and report it at the station."
4475. Do you know whether he did call Mr. Pogson? I cannot swear, but I believe he did.
4476. And did he report it at the station? Yes.
4477. Do you remember some instruction that Quelch gave you at the time of this conversation between you? Nothing further than that that I remember.
4478. Do you remember his telling you to go to the station and get fresh instructions as to your beats? It is not usual. I do not remember that I got any instructions of any kind.
4479. Will you say that he did not do that? I will distinctly. He knew I was going to the station.
4480. Did not you make that statement—that Quelch had given you that instruction—to your own Superintendent? No.
4481. I see, in this very month of June, there was a complaint against yourself for neglect of duty? Yes.
4482. Rather a serious complaint, was it not? Not when I explain it.
4483. What was it. Were you charged as a fact with neglect of duty in not attending to a complaint made to you respecting a man who had assaulted his wife? Yes.
4484. Is it a fact that a man named Shedbolt reported the circumstance to Ingram, the constable? Yes.
4485. Was the man afterwards convicted and sent, without the option of a fine, for a month in gaol? Yes.
4486. And the neglect of duty I suppose was failing to report it? Failing to arrest.
4487. I see the language of the report is "neglect of duty in not attending to a complaint made"? Yes.
4488. And I see you were fined a day's pay? Yes.
4489. Do you want to make any explanation? Yes. I was coming to the station for duty at twenty to 10 on this night, and this man reported to me that a man had assaulted his wife down there and she was at his place. I asked him the usual questions, if she was seriously injured, and if he thought she would give him in charge, and he said he did not believe so, but he wanted to avoid any trouble as she was at his house. "Well," I said, "in that case, as I am going to the station in a hurry for duty, I will mention it to the constable in charge of the station, and the man coming down the beat on duty will attend to it." I reported it to Senior-constable Proctor. In common with myself he knew that this man had been quarrelling with his wife for several years back. I have been called to the place before, and she invariably refused to give him in charge, merely asking the police to speak to him and quieten him. I concluded that I was required for a similar errand. Senior-constable Proctor did not consider it serious enough to direct the man on the beat to attend to it.
4490. I suppose you made all this explanation to your Superintendent? It is all on paper.
4491. And that explanation was not considered sufficiently satisfactory to exculpate you from the complaint? Yes. I told Senior-constable Ingram about it, and he did not consider it worth going about either. It was on his beat also. So, as he was passing this man's door, the man asked him if he was the man coming from the station to attend to it. Even he would not go into the house by himself. He waited until the constable on the beat came along to assist him with the arrest. When he got the man on the beat he got the man and arrested him.
4492. The fact is, that you gave the fullest information that you could to your Superintendent? That I could on paper.
4493. You could write as much on paper as you could say by conversing? A man can always show a thing better in speaking than on paper.
4494. You made an explanation? Yes.
4495. And the result was as I described? Yes.
4496. There is no doubt your superior officer was wrong, but the result is the same; you were fined a day's pay? Yes.
4497. Then we have three other charges against you—one is, "Permitting a prisoner to escape from you"? I can explain that.
4498. And you were found sitting down on a doorstep on another occasion gossiping? Yes. 4499.

4499. Then you were charged with neglect of duty, "neglect of duty in failing to discover property on a body" which you found? Yes.
4500. Was not the punishment in that case "Severely reprimanded and cautioned"? Yes, of course all these would not look so bad if I could explain them.
4501. They are not serious; you are still in the Force? Considering that I am in Redfern, I am fortunate to be in the service.
4502. *Mr. Abigail.*] You can take it as a compliment to you, as a witness of truth, that my friend has put these questions to you. These charges were all trivial, were they not? They were trivial.
4503. And if his Worship think it at all necessary you are willing to give the fullest explanation? Yes.
4504. I suppose there are very few police in the Redfern Division who have not been reprimanded after nine years' service? I do not think you could get a man there of twelve months' service who has not been punished.
4505. Even the immaculate Quelch has been punished? Yes, I believe so; I cannot swear it, but I believe he has been punished for neglect of duty.
4506. He has certainly got a record sheet against him? I cannot swear only from what I hear.
4507. Have you ever heard that Inspector-General Fosbery said that he was a man of such a character that he could not retain him in the Water Police Force? I heard it.

Constable
J. Lambert.
4 Nov., 1897.

Senior-constable W. E. Quelch was recalled:—

4508. *Mr. Bull.*] You have read this charge No. 7? Yes.
4509. And you remember the evening? Yes.
4510. As a fact, what beat were you working that night? I was working the westward section.
4511. Which included the street in which Pogson's shop was? Yes, that side of the road, not the side that Constable Lambert says he was on.
4512. And what other police officers would be working beats upon the same street on the opposite side? Serjeant Vane and Senior-constable Proctor, and Senior-constable Shaw would be on duty in charge of the station.
4513. At what time had you gone on duty? 10 o'clock.
4514. How were you dressed that night? As I always dressed—night-cap, coat and macintosh.
4515. Do you remember seeing Pogson's store? Yes.
4516. What time did you first see it? I suppose between 10 and 11.
4517. How many times had you passed or been in the vicinity of this store before the circumstance that has been spoken of here, finding it open? Finding it open the second time?
4518. From 10 o'clock about until about 3, you had not passed the store? No.
4519. Now, will you please describe what you did find? At 1 o'clock I went over to Darlington; I visited the men in Darlington, as is my general practice.
4520. Darlington is again to the west? Yes, after I visited the men in Darlington ——— [*Interrupted.*]
4521. You mean the men on their beats? The three constables who patrolled on the beats, 6, 9, 10, and 11.
4522. Were you on patrol then? Yes. My general rule is to pick up the man on 11 beat last, that would be somewhere after 11 o'clock; and I then in my custom have accompanied that man along Wilson-street to the boundary of the district; that would be Forbes-street, "Ivory's Hotel." The constable then on the beat would go up Forbes-street on his side to the Newtown Road. I would leave the constable then and cross the railway premises, the usual track the public used to take until the Commissioners stopped it. I would cross then on the Alexandria side for the purpose of picking up the Alexandria men. The non-commissioned officers always adopt that practice on account of the large scope of the ground they have to cover. They could not very well visit the men otherwise. After visiting the men at Darlington, and crossing the railway and visiting the men on the Alexandria side, I walked up Raglan street towards the Botany Road. It would be near about time for me to work up to the station for the relief going off at 3 o'clock. At 3 o'clock there is an alteration in all the beats, and the senior-constables out on patrol then have to also arrange at that time to allot off the men who have to be called for duty at 6 a.m. On coming up Raglan-street I saw Constable Lambert at the corner of Raglan-street and Botany Road, almost opposite Mr. Pogson's shop. The other constable on the opposite corner, Constable Castle, would then go up Raglan-street on that morning to his starting point. Perhaps on another morning, if we were short of men, Castle would join with Lambert, if he were there, and they would work up to the station together. Some mornings, perhaps, three constables would be there and go up together. That is a general rule, and all constables know that, especially the senior-constables. On coming up Raglan-street, I noticed Constable Lambert under the lamp at the corner; and Constable Castle was then leaving the corner, going up Raglan-street, when I got to the corner by the "Cricketers' Arms Hotel." Constable Lambert was then going up on the other side of the road. He passed Pogson's door, and was some 20 or 30 yards higher up on the other side of the road. I came along under the verandahs, which are very shady. The lamp in Pogson's verandah throws a dark shade under the verandah. Mr. Pogson's shop doorway goes back in a bow window about 3 or 4 feet from the footpath. As usual, I shoved the door, and I went in with the door, and it made a noise, and Constable Lambert then came across the road when he heard my noise. He had his big coat on; but I saw no revolver drawn, as he says now. I had my cape on. I said, "Mr. Pogson's shop door is open." I said, "You remain here while I fetch Mr. Pogson," after I saw all was correct. Just inside the door the whole place was stacked with groceries.
4523. What quantity of groceries would you suggest was stacked up? I suppose a cartload.
4524. *Mr. Abigail.*] Do you infer that they were stacked up ready for removal? Inside the door always, of a daytime, it is always stacked with groceries. There is a counter, and then all in front of the counter is stacked up with all different species of groceries. On the outside of the shop during the day all kinds of things are put out for exhibit, and then, on shutting up at night time, Mr. Pogson takes all this that is outside and stacks it on top of all this other that is inside. Boxes, brushes, brooms, soap-boxes, bags, and oatmeal, and all kinds of articles are stacked up inside. I said to Constable Lambert, when he came across—of course, I just saw him going up there, and I called him across—I said to him, "You remain here, and I will go and fetch Mr. Pogson." I went round myself to Mr. Pogson's private house, in Wyndham-street, and I roused up Mr. Pogson, and he said he would be there in a moment. I said, "Do not be long, I have to be at the station at 3 o'clock. He said, "I won't be long," and I then returned to the shop. I said to

Senior-
constable
W. E. Quelch.
4 Nov., 1897.

Senior-constable
W. E. Quelch.
4 Nov., 1897.

Constable Lambert, "Mr. Pogson is coming, go up to the station, you will be required for your fresh beats and calls," I said, "and report where I am and the circumstances." He said, "Very good," and crossed over again on to his own side of the road, and went away up to the station. The fact of me telling him about going to the station for his fresh beats and calls has since been related by me to Superintendent Read in his office. Whilst the constable was going up on the other side, he might be just past Chapple-lane—that is, a little higher up than Mr. Pogson's shop—Mr. Pogson came down from his residence *via* Chapple-lane to the shop, and went into the shop behind the counters, looked all round the shop everywhere, struck a light, you know, and came out to me and said—in fact, I was in the shop with him at the time—everything was all correct, as he had left it the night previously. He secured the door.

4525. *Mr. Bull.*] How did he do that? He locked the door again with the key. He had his key. He said, "It is very curious my door gets found open so often."

4526. Was there a key there? I did not see any key at all. I used a remark, "These doors must be opened with a key or something else, because I had heard certain inferences about certain places—of course Mr. Flynn's place is next door where I have caught the employee with a bag of stuff. I said "How many times has your place been found open?" "Well," he said, "I think Brewin found it open once." I said "Yes, has it been found open since?" He said "I think another one of your officers has found it open too." I said "Who may it be?" He said "I could not tell you." He went home and I went immediately to the station and made an entry in the book, the entry between the watch-house keeper who was on duty that night, Senior-constable Shaw, and the same officer who made an entry the following morning at 7:30 a.m.

4527. It was your duty to report that? Yes.

4528. And did you report it? Yes. That morning at 3 o'clock Serjeant Vane would be at the station, Senior-constable Shaw and Senior-constable Proctor. If any constable had anything under his observation to report he should have reported it. Any instance, no matter whatever occurred, if he found a door open, or saw anything that came under his observation, it was his duty to report it. That same night Inspector Lawless was on parade. Serjeant Vane was on parade, Senior-constable Proctor was on parade, and all the officers I have mentioned were on parade, and no such report as stated by Mr. Dacey was ever heard, ventilated, or anything heard about it, and until the things were published in *Truth* I never heard about it myself.

4529. Was it ever insinuated by anybody in any sense or way that you were there robbing that store that night? I never heard any such thing. I know well myself that not only that night, but every night in the year, as the beats are laid down, there must be two or three constables, and perhaps a serjeant and a senior constable, in that vicinity at that very time.

4530. *Mr. Abigail.*] Not when the senior-constable is in charge of the section? There is Serjeant Vane and another senior-constable out besides me at that time.

4531. *Mr. Bull.*] Well, go on? This entry was, after this case started, for some days, disputed as ever being entered. Not even the officer in the station could find it; it was never found until found by Inspector Lawless. I can give the date he found it. It was days and days after.

4532. That is the charge there—that something took place, and you never reported it? Yes.

4533. *Mr. Abigail.*] No, the charge is that he is a burglar. [*Mr. Bull then read Charge 7.*]

4534. *Mr. Abigail.*] Mr. Dacey says he charges him as a burglar.

4535. *Mr. Bull.*] Are you taking the two together—charges 7 and 9?

4536. *Mr. Abigail.*] Yes, that is the inference that Mr. Dacey drew from these two charges.

4537. *Mr. Bull.*] The gravamen of Charge 7 is, "What I wish to draw particular attention to is, that this case of attempted robbery of the grocery store has not been reported at head-quarters. That is a significant fact. Quelch was the officer to have reported it; but he has not yet made his report."

4538. *Mr. Abigail.*] The remainder of the charge is this, that he is a burglar, and it is only one element in the charge that he did not report it.

[At 1 p.m. the Inquiry was adjourned for luncheon.]

On resuming after the adjournment for lunch,

Charge 6 (continued)—

Senior-constable John Wilson was called and sworn:—

- Senior-constable John Wilson.
4 Nov., 1897.
4539. *His Worship.*] What is your name? John Wilson.
4540. You are a senior constable? Yes.
4541. Stationed where? Redfern.
4542. *Mr. Bull.*] You are a plain-clothes officer? Yes.
4543. And you do duty in what division? Redfern.
4544. Do you remember hearing of an attempted burglary at "Myall House"? Yes.
4545. Do you remember whether you took any part in any investigation in regard to that? Yes, I made an investigation for two or three days following. I went there the following morning.
4546. You went there the morning after the burglary was reported? Yes.
4547. Did you ever report to anybody that in your opinion Quelch was the burglar? No, sir.
4548. *Mr. Abigail.*] I object to this.
4549. *Mr. Bull.*] You know Mr. Dacey? Yes.
4550. Have you had any conversation with him since this commission started? I did, with Mr. Abigail and Mr. Dacey on Monday last.
4551. Did Mr. Dacey accuse you of having made a report with regard to Quelch? No, sir.
4552. Did he ask you? Yes, he said, "Is it a fact?"
4553. What was it Dacey said to you? He said, "Is it a fact?"
4554. *Mr. Abigail.*] I do not object to this if your Worship thinks it is material, but I do submit that what Mr. Dacey did say he had a perfect right to say in order to get information relative to this charge to put before you, but finding that this witness could not give us any information we did not call him. Now, what materiality is there in what Mr. Dacey and I said to this witness to see if he knew anything about it?

Witness:—

Witness : The first thing Mr. Dacey said was, "I sent for you this morning." He said "I heard you were sick, and I was sorry afterwards I disturbed you." He said "Did you make any inquiries over that 'Myall House' robbery?" I said "Yes, I did." He said "Is it a fact that you wrote a report suspecting Quelch of having committed this robbery, and that you for some purpose did not forward it?" I said "No, sir, it is not a fact."

Senior-
constable
John Wilson.
4 Nov., 1897.

4555. *Mr. Bull.*] "Is it a fact that you wrote a report suspecting Quelch?" And he said, "Mr. Abigail has been informed that such is the case." I said, "Well, it is a lie; no such thing ever took place."

4556. Whether either Mr. Abigail or Mr. Dacey had been so informed the truth is no such report ever existed? That is it. It is entirely false.

4557. *Mr. Bull.*] Was any such thing done by you? Not by me, no. No such thing. I never dreamt of such a thing.

4558. Never wrote such a thing? No.

4559. And so far as you are concerned, by no effort of yours did ever such thing exist? No.

4560. Was anything savouring such a thing ever handed to Mr. Lawless? No sir. I never wrote such a thing. I never had such an idea in my head.

4561. I think you made your investigation the very next morning? The next morning and the two or three following days, with other work; I did not do that exclusively.

4562. Do you remember, being stationed as you are in the Redfern district, reports being made from time to time to the Police Station with regard to burglaries in the vicinity of Cleveland-street and about Pitt-street, Redfern? Yes; there have been several reports.

4563. Do you remember Glover's premises, for instance? Yes, I remember that.

4564. Poole's and Stedman's? Yes.

4565. Do you remember reports were made from time to time that burglaries of different descriptions, and attempts at burglary, had been perpetrated and attempted in and around this district? Yes; I remember several round that district.

4566. In the vicinity of "Myall House"? Yes. Of course, it could not be in front of it, because the Park was there—at the back of it.

4567. *Mr. Abigail.*] Well, then, by what peculiar process of inspiration did Quelch know that Mr. Dacey had asked you any questions touching the evidence that you could or could not give in this case? I never spoke to Quelch.

4568. How did he know? I had a conversation with Mr. Lawless, and reported the matter to him.

4569. You reported it to Mr. Lawless? I had a conversation with him.

4570. And you told Mr. Lawless that Mr. Dacey had been putting questions to you? No, sir; I just told him that this conversation took place.

4571. And you told Mr. Lawless? I told several.

4572. And you told Mr. Lawless? Yes.

4573. And when you were asked these questions you were actually here in attendance on a summons? No, sir.

4574. You were sent for to give evidence here? That is right, I was sent for by Mr. Dacey.

4575. We asked for a subpoena for you. You do not know how it got to Quelch's ears? No, I spoke to several about it.

4576. And you also spoke to your Inspector? Yes. I think I spoke to four people.

4577. Give us the names of them all? I told Constable Bannan, and there were two present when I said it.

4578. Who were they? It was in the Police yard, in the station yard.

4579. *Mr. Bull.*] Do you mean two other police officers? Yes.

4580. *Mr. Abigail.*] You were merely asked for information? Yes.

4581. You were not influenced at all. You were asked in the most open, free, and frank way, and immediately you said you had not done it did I not say it was no use calling you? Yes. I will tell you another one I told too, Senior-constable Harrison.

4582. Can you remember anyone else? No, I know there were two others present.

4583. How long have you been an officer at Redfern? About six years.

4584. You have been there the whole time that Quelch has been there? No, sir.

4585. Quelch has been there the whole time that you have been there? Yes.

4586. And you know there are sides taken at Redfern Station over this matter of Quelch's? I do not understand.

4587. There are sides taken? You mean for and against Quelch?

4588. Yes? No.

4589. You took Quelch's side? No.

4590. Be careful? I have not spoken to him for about three years.

4591. Why? We had words about three years ago.

4592. And you have never spoken to him since? Only as a matter of duty.

4593. Now, did not you tell one of your own personal friends—now, I want you to be perfectly fair to him as well as to you—that having made inquiries over this "Myall House" case, you had written out a report, but that afterwards you thought rather than be worried with the thing you would tear it up? No, sir.

4594. Did you never tell anybody that? Never, positively no.

4595. Did you start to make out a report? No, sir.

4596. Or get anybody to do it for you? No; I can report myself; I do not require to ask anybody.

4597. You never did? I never had such an idea.

4598. You will admit this: that at the station Quelch and Dukes are both known as pets of Mr. Lawless, and that that epithet is applied to them? No.

4599. You do not know that? No, I do not.

4600. Would you be surprised to hear that Senior-serjeant Bell knows it and says it is current rumour? I do not know.

4601. You do not know it? No.

4602. As a matter of fact, you had the strongest disinclination to be drawn into this at all; you wanted to be kept out of it, did you not? For one reason I did. I did not want to come. Quelch and I have not been the best of friends these three years, and I told you the truth, I did not like to be called.

4603.

Senior-constable
John Wilson.
4 Nov., 1897.

4603. And you carefully abstained in this manner from remarking on one side or the other personally? I have not.
4604. You have carefully kept out of it? Yes.
4605. But know that remarks have been made in the station for and against Quelch in this matter? Not in my presence.
4606. But you know as a matter of common repute? I could not swear it.
4607. Why this necessity for careful caution on your part? I simply had nothing to do with the matter, and had no conversation with anybody about it, and did not want to.
4608. But you knew perfectly well that there were conversations between other officers? No doubt there have been; I believe there have; but I have not heard it.
4609. And there is a great division amongst the constables as to Quelch's alleged guilt? I do not know that.
4610. Was that not common talk in the station? As a plain-clothes constable I am very little amongst the men, and do not hear these things.
4611. Did you not say this actually yourself, that you personally would not stand in Quelch's shoes for £500? No.
4612. Did you not say that you had your own opinion about him, but that you would not express it because it would be said that because you were both at loggerheads you were merely saying this to maliciously injure him? No; I do not remember saying any such thing.
4613. Will you swear you did not say it? I will swear I did not say it.
4614. Is it a matter of recollection, or a matter of absolute denial, that you never said it? I never said that I would not stand in Quelch's boots for £500.
4615. The second question was this: Did you not say that you had your own opinion about him, but that you would not express it because it would be said that because you were both at loggerheads you were merely saying this to maliciously injure him? No; I will tell you what I did say.
4616. Tell us what you did say? Someone said, "Now you are mixed up in this."
4617. Who was it? I do not know.
4618. Was it a constable at Redfern? Yes. I said, "No; and I am glad, too, as Quelch and I are not the best of friends and it is a miserable thing to be mixed up in."

Senior-constable W. E. Quelch, recalled:—

Senior-constable
W. E. Quelch.
4 Nov., 1897.

4619. *Mr. Bull.*] At the adjournment I was reading to your Worship the charge, and we wish to draw attention to the charge that the matter was not reported by Quelch. (*To the witness*): Now you were there as a fact when Mr. Pogson came? Yes.
4620. You heard Lambert say that there was a key in the door at the time that he was there? I never saw such a thing.
4621. Was there a key in the door? Not at all.
4622. Had you any key in your possession? Only my patent latchkey and my handcuff-key.
4623. A Yale lock key? Yes, and my fire alarm key, and my whistle.
4624. Did you really ask Lambert to stop there whilst you went up and apprised Pogson? Yes, I did.
4625. And he did not leave until you came back? No.
4626. You heard the statement made by Lambert with regard to the bag, or some property, which he says was outside. Yes.
4627. What do you say to that? I say I never saw such a thing in my life—not outside the shop.
4628. Had you either of the doors open, or were either of the doors open when Lambert was there? Not at all.
4629. You have heard him describe that there was a sack—this inevitable sack—a sack or hempen bag with something contained in it, and on the top of it a packet or parcel apparently a 6-lb. parcel of sugar. Was anything of the sort on the outside of the premises? I never saw such a thing as that there; I saw a bundle of empty hempen bags inside the door, like what would be hung up outside a grocer's shop for sale. They were lying just inside the door, with brushes and other kinds of groceries.
4630. Did you see a 6-lb parcel of sugar anywhere there? Not at all; I saw no parcel there whatever. The majority of the things that were packed up inside were tins of herrings or meat, bars of soap, tins of honey, and bags of oatmeal, and half a dozen of these kit-bags, all tied together with a loop on, like you would hang it up with, and a bundle of little brushes, and one or two little brooms, bottles of sauces, and things like that.
4631. The usual character and description of grocery goods? Yes.
4632. *Mr. Abigail.*] This reminds me of the quotation, "Methinks the lady doth protest too much."
4633. *Mr. Bull.*] You struck a light when you were in there? I did not strike a light.
4634. Who struck the light? Mr. Pogson struck a light.
4635. *His Worship.*] Then you say there was nothing taken out by you and put back again? Nothing at all; I never saw a bag full of things.
4636. *Mr. Bull.*] You heard Lambert say that you remarked that you were going to take something to the Police Station? Not at all.
4637. Was there any property at all of any sort that you were going to take to the Police Station? Not at all.
4638. You had nobody in custody? No?
4639. You saw nothing of this description there, in the possession of anybody whom you were taking to the police-station? Not at all.
4640. There would be no object in taking property unless it was to be identified? No.
4641. That is the only reason for taking property, when somebody is arrested with property near them, or under circumstances indicating that it is in the possession of that person—then the property is taken too? Quite so.
4642. You see the first part of this charge, that you never made that report? Yes.
4643. That is untrue? Quite untrue.
4644. And you produce the report [*Exhibit No. 27*]? Yes.

4645.

4645. You also produce, do you not, a report made by Senior-constable Bourke [*Exhibit No. 28*] the month before with regard to this same shop being found open? Found opened by Senior-constable Bourke, and entered in the book by Senior-constable Bourke. Senior-constable W. E. Quelch.
4646. Were you on duty, or on that beat at that time, or during that portion of that day? I was at home in bed asleep. 4 Nov., 1897.
4647. Not on duty at all? No.
4648. And the place was apparently found open by Bourke and was reported? Found open by Bourke at twenty minutes to 1 in the morning. Well, that would be after three constables had passed that very shop door that night, the constable on the beat twice, the constable going down at 10 o'clock to take up the next beat, and the constable on the beat passing the door at 9 o'clock that night, that would be Constable Ridley, Constable Walker, and Constable Hill. I think all three passed the door.
4649. *Mr. Abigail.*] Now, you see, in this case as in the "Myall House" case and the other cases, you have denied categorically and particularly the evidence given by the witnesses—whom I shall call for convenience' sake incriminating witnesses? Yes.
4650. Now, you will admit that Lambert, if he is to be believed, is an incriminating witness against you? He is against me—of course, he is.
4651. And you see that in every possible way you have denied from first to last all that Lambert has said? I do.
4652. The whole of the circumstances related by Lambert? I do.
4653. As to how he saw you, what he saw you doing, the conversation that he had with you, and you with him, are all denied by you from first to last? Yes.
4654. Now, I ask you, Quelch, is there any reason why a man like Lambert should go into that box and perjure himself for you? I tell you that Constable Lambert is one of the most discontented, grumbling constables in Redfern. I will put witnesses in the box to prove it.
4655. Is not he a truthful man? I do not think he is.
4656. Is it not your duty to the public as well as to the service to unmask him, then? I must catch the fellow first.
4657. Can you give me an instance of his untruthfulness to you to justify your impression? I can give you an instance this very day. I told Constable Lambert this very morning to go to the station and report the circumstance, as he would be required.
4658. That is where you are at issue? I told him to go to the station and report the circumstance, as he would be wanted for his fresh beats and calls. He did not report the circumstances. The question was put to him this morning in this court whether as a fact I did not tell him to go to the station for his fresh beats and calls and he denied it.
4659. And so you say he is untruthful simply because your version ought to be believed and not his? I think I will put some witnesses in the box to show you.
4660. Is not that so, that this is the only instance you can show, and that simply because you contradict him your statement is to be believed and not his, that he is the liar and not you? He is a constable that is always grumbling and discontented.
4661. I am asking who is the liar between you? He is.
4662. Can you give me any other instance in your experience of him as a constable in the force why he should be disbelieved? I can.
4663. What is it? He tried to say he was not guilty in the case with Constable Ingram.
4664. Did not you hear him say to-day that he had never had an opportunity of personal explanation of that until to-day? He had every opportunity of explaining it personally or in writing to his Superintendent, and could not do it.
4665. Is there any grievance between you two as men? There is a grievance.
4666. What is it? He is a most discontented, grumbling man.
4667. Have you ever had to come into collision with him as his senior officer? No.
4668. Can you give me any reason why you should say he is a liar, and that his story in the box should not be taken, and that he should be regarded as an untruthful witness? If he thought that I was doing anything wrong, or that there was anything wrong, or if he saw anything wrong certainly in the first instance it would be fully established in his mind. Why did not he report it at the station?
4669. Does not he tell you this that he spoke in a conversational way to Kidd on that very morning when he first returned and told him what was in his mind? I never heard of such a thing until to-day.
4670. You see Lambert says that when he went over to you you were fastening the door with a key? Yes.
4671. That you were in a stooping position fastening the door with a key, and that you had a small hempen bag filled with groceries, and a 6 lb. sugar bag on top. Is that untrue? Absolutely untrue.
4672. There is no foundation for that? Not at all. Mr. Pogson's door is very low, and you have to stoop to close it, to get to the handle.
4673. Then you were stooping? I had not a key.
4674. But you have admitted that you had your own private house-key upon you? Yes.
4675. And your fire alarm key? Yes.
4676. And a whistle? Yes.
4677. Were you trying to fit or had you succeeded in fitting the key of your private house in Pogson's door? Nothing of the sort, and I will challenge you or anybody else to try to open Mr. Pogson's door with my key. It is a five chambered latch-key for a patent lock.
4678. You say you did not see him with any revolver in his possession? No.
4679. And it is not true that he had this conversation with you: "It is lucky for you; I might have shot you as a burglar"? Never such a word was uttered.
4680. Do you also say that there was no bag of sugar on the bag? I say the bag was not outside at all.
4681. Was the bag inside? No.
4682. Not a little hempen bag? No.
4683. Had you been inside at all? No; I had not been inside.
4684. Now, you have heard him swear that when he went across the road he saw you coming out. He did nothing of the sort.
4685. You were then in the act of closing the door with the key. Is not that so? I was not inside the place at all. I came round the corner 31 paces away from this door, that is all the corner is. 4686.

Senior-
constable
W. E. Quelch.
4 Nov., 1897.

4686. Now tell me this : Is it a fact that he said to you, "What are you going to do with this," touching the bag, and you said you were going to take it up to the station? I never used any such remark.
4687. Was there any conversation about taking the bag to the station? There was no conversation about any bag whatever.
4688. Was the bag put back again? No; if the bag was put back again the proprietor of the shop would have found it.
4689. Now you say this : that all that Lambert has sworn is absolutely untrue? Not all.
4690. This conversation about your locking the door and being inside? That is untrue.
4691. And about him covering you with his revolver and telling you you were lucky? He had his overcoat fully buttoned up and I think I could see if he had his revolver out then.
4692. Then all those things are absolutely untrue? It is.
4693. You have admitted you can discover no motive for this man deliberately perjuring himself to injure you? I have explained to you — [Interrupted.]
4694. You have heard him explain to-day that he has no complaint against you? It is just the same with them, behind your back they are different altogether at Redfern.
4695. You have sworn that everything the incriminating witness has spoken to is an absolute lie although you cannot give any reason why he should perjure himself, and in the "Myall House" case you have sworn that three witnesses are liars?
4696. *Mr. Bull.*] I object to this, you are making a speech cross-examination.
4697. *His Worship.*] I cannot allow this. What you are putting now is all down, you have put it all before.
4698. *Mr. Abigail.*] I want to know do you see the peculiar coincidence of these things that I have referred to, that in this instance you out-swear Lambert by contradicting all he says, you out-swear three witnesses in the "Myall House" case by contradicting them and stigmatising their evidence as perjury, and yet you cannot discover any motive for one of these four witnesses injuring you by perjury? I do not see any coincidence in it at all.
4699. You cannot see that out of five men, you included, you want his Worship to believe that you are the only truthful man, and the others are liars and perjurers. Don't you see that your evidence drives you to that fearful extremity? I think I put the case before the Court in a straightforward manner, and single-handed, and I have not approached a witness.
4700. Cannot you see that what I have pointed out is a peculiar coincidence? No; I cannot see it.
4701. You went round to Pogson's and brought him down? Yes.
4702. How long were you inside with him? Where? I never went inside his house at all.
4703. In the shop, I mean? I suppose about a couple of minutes; it might have been three minutes.
4704. And in a couple of minutes all this long time ago, the 28th July, 1895, you can recollect all you saw in that shop, and with such a particularity as to how it was stacked up, and where it was stacked? I could see it every night in my life.
4705. You could not see last night what you saw six months ago? I can see it every night.
4706. You have told us where the herrings were, where the soap was, where the bags were, and you say there were five or six hempen bags? I can tell you what the shopkeeper does.
4707. Did you see what you have just described in Pogson's shop on the night of the 28th of July, 1895, during the two minutes that you were in there? Years before, and since.
4708. How could you see what you said you did see on the 28th of July, 1895? I see similar articles every day.
4709. Then you describe what you say you saw on the night of the 28th July, 1895; so long as you are certain about one article, that will do for me. Are you certain that on that night, July the 28th—the night of this occurrence—there were five or six hempen bags hanging up? I did not say they were hanging up at all.
4710. Where were they? They were lying down.
4711. And they were usually hanging outside the shop in the daytime? Yes.
4712. They were hempen bags, were they not, like the one you had in the court the other day in the pigeon-case? I think they were different. I think they were different material and different handles.
4713. But they were like that [*producing a bag*]? Bigger than that.
4714. How much bigger than that? It may be a couple of sizes.
4715. You will admit that if a man has a waterproof cape on, a bag a couple of sizes bigger than that can be conveniently concealed under that cape and his coat? I do not think so, not if he is going amongst policemen in a police-station.
4716. How far is Pogson's from your house—the shortest cut. Your house is on Pogson's side of the police-station? I know it is.
4717. How far is it? I should say half a mile.
4718. Now, Quelch? It might not be, hardly half a mile.
4719. Is it a quarter of a mile by the shortest cut? Over; I am positive about it.
4720. By the back gate? I could not get in the back of a night-time, not unless I went home.
4721. Supposing that night you left the back gate open? I never do.
4722. But supposing you did, you could get in, could not you? Yes, I could only get into the back yard though, not anywhere else.
4723. How far is it from your back gate to Pogson's by the shortest cut? About 800 yards. Of course if I flew like a pigeon over the houses it might be a little less. Then at that time I would be almost walking alongside a constable going up Raglan-street on this beat.
4724. Do you know that one of the other charges is that you were removing a bag of sugar which you called sand from this very shop? No.
4725. "About six months ago, Constable Hill, when on duty on the Botany Road, saw a man crossing the Botany Road in a slouch hat, and with a bag of something on his back. Hill approached the man and was surprised to find that he was his senior officer, Quelch, who said 'It is all right Hill, I have been getting some sand for my canaries'?" Hill never saw me near Mr. Pogson's shop.
4726. You know that there is that charge against you? I do, well.
4727. And you know that that charge connects you with Pogson's shop? I do not know anything of the sort.

Senior-
constable
W. E. Quelch,
4 Nov., 1897.

4728. Do you mean to tell me that you do not know that the complaint against you in connection with that eighth charge is that instead of sand it was sugar, and that you were coming from the rear of Pogson's shop round the lanes? You never saw me, nor did Hill see me round the lanes. If you infer that it was sugar, I shovelled it off the public streets, as I have done for the last eight years.
4729. You must have a lot of conspirators there in that Force to ruin you? There are, there, in Redfern, I can tell you.
4730. Do you know that this charge 8 is that you were going from the rear of Pogson's shop carrying what you are accused of carrying, sugar; but you call it sand? No.
4731. I am only telling you what the charge means? No.
4732. Now do you mean to say that Lambert could be by any possibility mistaken when he said he stood right over you, up against you, and saw you deliberately lock the door? I most decidedly say he was mistaken.
4733. Taking the key out afterwards, and yourself sending him to the station while you said you would go and rouse up Pogson? I did not say any such thing.
4734. Do you say he is wrong? I do say he is wrong.
4735. Was there any reason why he should not go to the station when you told him to go and report it? I never gave him any reason not to do it. I told him to do it.
4736. Did you, when you went to the station, inquire at the station whether the man you had sent to report it did report it? I found by the book that he had not reported it.
4737. Did you make any complaint against him for neglect of duty? I did not.
4738. Did you ever speak to a soul about his negligence in not obeying your commands as a senior officer? No.
4739. Notwithstanding that you, a strong disciplinarian, who never fails to make a report of disobedience, made the report yourself? Most decidedly I did.
4740. Who was the officer in charge? Constable Kidd.
4741. And you will admit that it was his duty as officer in charge to write the report down and get you to sign in the usual way? No.
4742. Is not that the usual way? No.
4743. Is not the officer in charge specially commissioned, as a matter of duty, to enter the reports, and the party from whom he receives them initials them? Not that book.
4744. What book? The Occurrence Book.
4745. Is that in this? It would not be in it.
4746. Why would it not be in it? It is not my duty.
4747. Can I take it from you that you have gone through the Occurrence Book and have discovered that that entry of yours has not been entered up in the Occurrence Book? It would not be.
4748. Now give me July, don't give me June? I will give you any book you like. [*Handed books to Mr. Abigail.*] Never such an entry was ever made in the Occurrence Book.
4749. You admit yourself that your complaint is not in the Duty Occurrence Book, which you say is compiled by the sergeant in charge, and should be entered up from this Rough Occurrence Book? No, it has nothing to do with it.
4750. Are not these entered up anywhere? Only robberies, or anything appertaining to that department, such as bills or anything else, are entered up.
4751. Now, you see this complaint immediately preceding yours. Is that in there? That would not be in there.
4752. Well, see? I am sure it is not in there.
4753. Can you give me this: "Horse lying struggling on the ground"? That would not be in this book.
4754. Who wrote this? The watchhouse-keeper after he got up.
4755. Who is the watchhouse-keeper? Senior-constable Shaw.
4756. Well, then, your complaint about seeing this shop open is sandwiched in between two complaints written by the watchhouse-keeper? Yes.
4757. Who was on duty at the station? No, he was in bed.
4758. Do you mean to say that at any time the station has no one in charge? The senior-constable goes to bed at 3 o'clock, and Constable Kidd gets up and writes the routes in the Route-book.
4759. He also writes up the complaints by the constables reported to him? Not at all. Not by the senior-constables. There is Senior-constable Proctor's handwriting, Serjeant Houlahan's, and other constables, see that [*indicating to Mr. Abigail.*]
4760. At any rate you will admit this, that although you gave strict injunctions to Lambert to go to the station, post-haste, and make a complaint about Pogson's shop being found open, and to use your own language "to say where you were" and to describe the circumstances under which you were at Pogson's, he never did so? No.
4761. You went to the station subsequently, after being relieved by Pogson, and then you found that there was no complaint lodged in the Occurrence Book, and you immediately lodged it? I put the record in the book.
4762. And have you never, from then to now, made the slightest complaint to anybody about Lambert's negligence? Of course not.
4763. But you will admit that it was negligence? You do not suppose the senior-constables report the men for every little thing.
4764. You will admit that you did not, in this particular instance, report this constable? No decidedly not; Inspector Lawless will tell you that we do not report them for every little thing.
4765. Was it not a usual thing on a clear night to wear an overcoat on duty instead of a macintosh? I never wear my overcoat on night duty.
4766. When do you wear it? Never, I always wear my macintosh; Serjeant Vane always wears his macintosh.
4767. Are not coats part of your uniform? It is part.
4768. Is there not a uniform uniform, if I may be allowed the expression? Not altogether; some constables wear their capes.
4769. Are they allowed to do that? Yes.
4770. Is not there a rule that they should be attired alike when on duty? Some constables you will see with a macintosh, and some with a coat.

- Senior-constable
W. E. Quelch.
4 Nov., 1897.
4771. Is it a matter of choice? It is a matter of choice; I never wear my overcoat.
4772. Now, you will admit this, that Lambert did see you at Pogson's door? Outside, yes.
4773. And that you sent him away, and that from then until you got to the station there was nobody had any conversation with you, or saw you, except Pogson? No.
4774. So that you will admit that, if Lambert is to be believed about this bag being outside, and your putting it back again, and if you are to be believed that—when you went for Pogson, and Pogson came back with you and certified that everything was all right, and nothing had been moved—that there was time for you, had you been disposed, to have moved the bag and put the groceries back, and put back the bag? I never went inside the shop.
4775. But there was time? No, there was not.
4776. You did not have time to do what I have just asked you, while Constable Lambert was returning to the station, and before you had gone for Pogson? No, there was no time. I remained outside of Mr. Pogson's house. I think I knocked once or twice—I might have knocked three times for all I know.
4777. Will you admit this: that there was time, after Lambert went to the station, presuming that you had a key, for you to have locked the door and put the key in your pocket, or, rather, having locked the door, to have unlocked the door, put the key in your pocket, and then gone to Pogson's? Not at all, because I never sent Lambert away until I came back from Mr. Pogson's.
4778. Yes; but before Pogson had come up? Constable Lambert was only a few yards past Chapple-lane when Mr. Pogson came down Chapple-lane. He said that I sent him to the station; but it was after I came back from Pogson's.
4779. He said he left you at the door, and you said you would go round to Mr. Pogson's? I went round to Pogson's first. When I came back Mr. Pogson was then about starting from his house, and I instructed Constable Lambert to go to the station and report where I was, as he would be wanted for his fresh beats and calls.
4780. *His Worship.*] Did Lambert remain there while you went to Pogson's? Yes.
4781. So that Lambert saw you, you were not there by yourself to do anything? No.
4782. *Mr. Abigail.*] But on your own admissions you say that you came back from Pogson's and that you sent Lambert away, and that you waited at Pogson's shop until Pogson came up? Pogson came down on the same side of the road as his shop from Chapple-lane. There was no waiting at all.
4783. You say that when you got back to Lambert, whom you left waiting on guard outside Pogson's shop, Pogson must have been just then leaving his house. His house is just round the corner? Round in Wyndham-street.
4784. How many yards away? It is the next street at the back.
4785. How many yards? The distance from street to street is somewhere about 90 yards.
4786. From shop to residence! About 150 yards?
4787. You waited there long enough for Pogson to traverse the 150 yards from his house to his shop? Yes.
4788. *His Worship.*] After Lambert had gone? No. Lambert never left the shop until I got back. I sent him away then.
4789. Was Pogson there then? Pogson was coming down the street.
4790. Were you there by yourself after you sent Lambert away before Pogson arrived? I may have been a few seconds, but that is all. A very short time, your Worship. I remained outside on the footpath until Mr. Pogson came down; then Mr. Pogson was the first to enter the shop, and I followed him in.
4791. *Mr. Abigail.*] Do you know Alderman Horne? I do.
4792. Do you know Alderman Hannan? I do.
4793. You know "Hannan's Hotel"? I do.
4794. Kept by a cousin of Alderman Hannan? Yes.
4795. Were not you recently in that hotel at 11 o'clock drinking? No, I was in there before 11 and came outside.
4796. When was it? By appointment with the Mayor of Alexandria I went down to the Borough of Alexandria Council Chambers.
4797. When? I should say it is about a month ago.
4798. *Mr. Bull.*] What is the Mayor's name? Alderman Harden. There I met Alderman Horne and Alderman Hannan.
4799. *Mr. Abigail.*] By appointment, too? Not Alderman Hannan. I went down to see Alderman Horne. I was told he would be there that night to see the Mayor over some municipal business. I went down to see him, and after being there some time we all four of us left.
4800. How long were you there altogether? In the Council Chambers?
4801. In the hotel? We were not there very long.
4802. How long? About a quarter of an hour or twenty minutes, perhaps half an hour.
4803. Were you there half an hour? About half an hour.
4804. More or less? I do not think it was more.
4805. What time did you leave the hotel? About five minutes to 11, and while standing on the footpath Serjeant Vane passed and Brewin passed. Brewin stood watching us round the corner.
4806. Now, you went down there begging for characters, applying for characters. That was the appointment was it not? I was requested to go down there by the Mayor.
4807. You went down there to get a character? I suppose that was what it was for.
4808. You know what you went for? I was requested by the Mayor to go down there.
4809. Was he going to present you with a certificate of character unasked? I asked the Mayor how long he had known me in the district in my capacity both private and public, and then the Mayor said, "You come down to the Council Chambers, Alderman Horne will be there; he wants to see you." I never approached Alderman Horne that much (*indicating*).
4810. Is not that what I asked you before? Did not you go down there to ask for a certificate of character? Not to ask.
4811. What did you go down for? I had met the Mayor elsewhere.
4812. Did not you go down for a certificate of character? I had the Mayor's signature several days before this.

4813. What did you mean by saying just now "I suppose so" when I asked you "Did you go down there for a character"? It did turn out when I got there.

4814. Did not you know what you went down there for? When I got there I knew. I have not been like your client, Mr. Dacey, going to my wife's relatives about me. Mr. Dacey has been round to my wife's relatives asking to try and fossick out what he could about me, and if you want it I will bring them here.

Senior-
constable
W. E. Quelch.
4 Nov., 1897.

Mr. Biron Pogson, Grocer, 44 Botany Road, Alexandria, was called and sworn :—

4815. *His Worship.*] What is your name? Biron Pogson.

4816. And what are you? Master Grocer.

4817. At where? 44 Botany Road, Alexandria.

4818. *Mr. Bull.*] You know Quelch, the senior-constable? Yes.

4819. How long have you been in the Redfern district? About twenty years.

4820. You are a resident of the district of twenty years' standing? Yes.

4821. How long have you been in business? About fifteen.

4822. Do you remember July of 1895, Quelch coming to you one morning with regard to your shop? Yes, I do.

4823. Can you say about what time in the night or morning it was, so far as you remember? Well, I have not much idea. It may have been 2 or 3 o'clock or 1 o'clock.

4824. Were you awakened at your private house? Yes.

4825. What time did you give up business the night before that morning? It may be between half-past 8 and 9 o'clock, as near as I can remember.

4826. And how are your premises fastened up? Locked up in the ordinary way back and front.

4827. Is there a lock attached to the door, a padlock or what? Just an ordinary lock, no padlock.

4828. To the front door? The same.

4829. Are they double doors in the front or single? Double doors.

4830. And one door is fastened back in the usual way by bolts on the inside? Yes.

4831. And the other door is locked to that when fastened?

4832. Having been awakened by Quelch, tell me what you did? Well, I came round to the shop with Mr. Quelch. Of course when we got there the front door was a little ajar. Of course we went through the premises and lit a candle, and had a look round, and we also went to the back, and I believe, to the best of my knowledge, that was open also.

4833. You went to the front of the premises when you came down? Yes.

4834. The doors were pulled to but ajar? That is it.

4835. In other words, not locked? They were not locked.

4836. Did you have a light inside? Yes.

4837. And you went, you say, through to the back of the premises, and to the best of your recollection or belief the back door was open? I am almost sure it was, but I am not positive.

4838. How would that be fastened? In the same way, with a lock and key? Yes.

4839. With regard to the back, would the keys of the back and front doors, would either or both be left on the premises? The back door key would be left on the premises.

4840. Inside the premises in the lock? Yes.

4841. What would become of the other key? Oh, I always took that home with me.

4842. And you had it with you when you came down that morning? Yes.

4843. Well, tell us what you say with regard to the premises. First of all did you find any property had been taken? Well, certainly I had a good look round, to the best of my knowledge; of course, I could not say whether there was anything interfered with or not. Of course, in an establishment like mine it would be very hard to miss it.

4844. Did you notice that anything particularly had been interfered with? No.

4845. I understand that you do expose a quantity of goods for sale outside? Yes.

4846. All you people do the same thing; and at night, when your premises are being closed, where are they put? They are put in their different departments. We have what you call bins and shelves, and we generally put all things in these when we bring them in at night, generally.

4847. Were there any goods exposed in the front of the shop? There always is something just inside the door.

4848. Did you notice, so far as you can remember, any goods of any description disturbed, taken from their ordinary places? Well, I could not say.

4849. You missed nothing? Not to my knowledge.

4850. Were the premises locked up? Yes; of course, Mr. Quelch and I came round through the place, and I locked up and went home again.

4851. Was there any key in the door when you got there? No. Except in the back door. The back door key was there.

4852. Is that the first time, or the only time, that you received a similar intimation about your place? No; that was the third time.

4853. And do you remember who it was on any previous occasion gave you any intimation with regard to your place being found open? Well, I believe it was Constable Bourke and Mr. Brewin—what we call the night-watchman—and the other occasion it was a little further back, and I never could call to mind who it was.

4854. Do you remember whether Bourke's case was a month before Quelch gave you this information? I could not say positively about that.

4855. I suppose an entry by Bourke in the Police Occurrence Book would probably be accurate if he nominates a time in June, this time when Quelch woke you up being in July? I should not think the two occurrences took place that near together.

4856. You do not think so? To my knowledge.

4857. I may, just as a fact, tell you that Bourke has made an entry in the Police Occurrence Book himself, in his own handwriting, and he did acquaint you on one occasion of this place being found open? Yes; that is right.

Mr. Biron
Pogson:
4 Nov., 1897.

- Mr. Biron
Pogson.
4 Nov., 1897.
4858. And, on that occasion, did you accompany Bourke back to the place? Yes.
4859. Did you find anything disturbed then? To the best of my knowledge, no.
4860. This is the entry. [*Exhibit No. 28.*] [*Read entry of 6th of June, 1895.*] That is his entry in the Police Occurrence Book? Yes.
4861. Your recollection is, that there was a longer time than a month or six weeks between the two occurrences? Of course, the peculiarity about this thing is, that it robs a man of any memory by thinking. This occurred a long time ago; it may have been a month, or it may have been three.
4862. You see this matter that Quelch is being asked to explain was in July, 1895, which would be two years and three months ago? Yes.
4863. Was there anything in Quelch's manner when you came back to the shop, or during the time that Quelch was with you, which would lead you to suppose that he was doing any other than acting as a policeman? Well, no, I could not say there was.
4864. Did it flash across your mind, from any manner of Quelch's, or from any conduct or demeanour of his, that he had opened this place?
4865. *Mr. Abigail.*] I object to this; there are two questions of the same nature.
4866. *Mr. Bull.*] Was there anything in his manner which you then noticed—fluster, or excitement, or anything of that sort—which would induce you to think that he was the burglar? I could not say.
4867. He seemed to be giving you information of something that he had found? Yes.
4868. I suppose, when Quelch told you that he had found this place open, calling you out at that time to come down and look at your property, you quite believed what he said? Yes, certainly.
4869. Was there anything happened during the time you were there with him, until you locked up the place, which in any sense disturbed that belief? Well, no. It was only a momentary affair. I just jumped out of bed and ran round. It only took five minutes to do the lot.
4870. We are told that your place of residence is only about 150 yards from your place of business? Yes, about that.
4871. *His Worship.*] Did you find anything packed in a bag in the store, in one of those canvas bags? No.
4872. Did you see a parcel of sugar done up amongst the goods inside the store? No.
4873. *Mr. Bull.*] Are you quite sure with regard to Quelch and yourself coming back to the store together? Oh, yes, I am positive.
4874. There is no doubt about that? Well, Mr. Quelch naturally woke me up and came round with me.
4875. How many times did he knock for you? I could not say.
4876. *His Worship.*] When you got to the store was Lambert there? There was no one there this night, when Quelch woke me up.
4877. *Mr. Bull.*] Is there any reason in the world to suggest why Quelch should rob you? No, I do not see it.
4878. Have not friendly relations existed all along between you as a business person and him as a police officer? Well, up to that time I did not know Mr. Quelch from Mr. Lawless, or anyone else.
4879. You knew him as a Police officer? I knew him by sight, but did not know his name.
4880. *Mr. Abigail.*] I suppose you will admit that since then, since this time when you were awakened by Quelch in July, 1895, you have never been awakened by Quelch or any other constable? No.
4881. That whoever the burglar is he has given your place best? Yes.
4882. And that prior to this your place had frequently been found open? On three different occasions.
4883. And you began to regard it as a most extraordinary occurrence? Oh, yes.
4884. But the wonderful thing is that since July, 1895, your place has never been broken open? No.
4885. *His Worship.*] Has anything been stolen at any time from your place? Well, I have not actually missed anything.
4886. *Mr. Abigail.*] It is pretty difficult for a retail grocer with a big stock like you keep, especially as you keep it in quantities, as I saw it when I went to see it, it is very difficult for you to miss a bag of sugar, or two bags of sugar, or a chest of tea? Yes.
4887. You do not take stock? No.
4888. You keep no stock-books? No.
4889. Your business is something like my father's was? Yes.
4890. A retail grocer's with a large stock? Yes.
4891. Stacked up all over the shop? That is it.
4892. And you are continually hauling down six bags of sugar at a time, and emptying it into a bin? Yes.
4893. Probably every day? Yes.
4894. And taking down six chests of tea? Yes.
4895. And you always keep a weighed-up stock of tea and sugar, 4 lb., 6 lb., 2 lb., and 1 lb., do you not? Yes.
4896. Are you quite sure that you walked back with Quelch to your shop that night? I am positive about that.
4897. Quelch says that you did not, that he woke you up, and that he got back to the shop just about the time that you started from your house. Now, there is a disparity between your evidence and his. Who would most likely be right, you or he? I was always under the impression that I walked back with him.
4898. *His Worship.*] You may have followed him? Yes.
4899. *Mr. Abigail.*] You see, Quelch knocked you up, you were in bed asleep? Yes.
4900. Is yours a two-storied house? It was a cottage at that time.
4901. Did you come out, or open the bedroom window to see what was the matter? I opened the door.
4902. Just as you jumped out of bed? Yes.
4903. Quelch told you at once what was wrong? Yes.
4904. Did he say, "I will go along; you had better follow me as soon as you can"? I am a bit uncertain about that, whether I just followed behind him or went with him.
4905. It would not be a likely thing that a policeman would have left your shop open, and waited until you came down with him, because, in the meantime anybody could get in and take some of the stock away; you are not quite sure about it, are you? I am not sure.
4906. You will admit that Quelch's memory is superior to yours? I am very uncertain about that.
4907. Well, he is certain; you will admit that there was nobody in charge of the door you did not see Constable Lambert there? No.

4908. Did Quelch tell you that Constable Lambert had been there? No, I do not think he mentioned any other constable.
4909. Did he tell you that he had left any officer in charge of the place? No.
4910. You are pretty sure he would tell you that if it were so? I believe he would.
4911. Has Constable Lambert's name been mentioned to you before in connection with the occurrences of this night? No, I do not think so.
4912. Now, as a matter of fact, anybody who opened that front door to get in must have used a key? Certainly.
4913. From the outside? Yes.
4914. There was not a bolt inside the door, it was a door locked by the ordinary key merely? That is it.
4915. And having opened that door he could have easily closed it and walked through to the back and unlocked that, because the key of the back door was in the door? Yes.
4916. So that could have been done with ease? Certainly.
4917. Do you remember on this night that you had some hempen bags hanging up for sale? Yes, we always keep a stock of them.
4918. Do you remember how many you had? I could not remember how many we had, of course; I always get a gross of them.
4919. Were they all sizes? All sizes.
4920. And on this night you had some? Oh, yes.
4921. But if one of these had been spirited away you would not have known, would you? I would not have missed twenty of them.
4922. Now, has Quelch interviewed you recently about this case? Well, accidentally one day I met him, and he just spoke to me about it.
4923. Did he tell you he was going to subpoena you? I do not think he mentioned that.
4924. He served the subpoena on you—the summons to attend here? Well, I could not say who it was particularly, it was left in the shop.
4925. However, he has spoken to you about this matter? Yes.
4926. And refreshed your memory, has not he, of the occurrences of that night? He just said what I said now.
4927. He said to you, did he not, "Do you remember that night I came round and woke you up, and I did so and so"? Did he refresh your memory in that way? Well, he did just mention it.
4928. Is that within the last three weeks? I think it is later than that.
4929. About a month? Yes, as near as I can think.
4930. Now, Brewin was watching your place at one time, was he not? Yes.
4931. As far as you know, is he a man of good character? As far as I know, I never heard anything against him.
4932. Do you believe now that he is a man of good character? I have heard nothing against him.
4933. Was he ever charged with assisting an employee of yours to rob you? Was ever a complaint made to you by Quelch that he caught an employee coming out of your place with a bag of stuff? No.
4934. Brewin was watching your premises for some time? Yes.
4935. Is he still? No, not now.
4936. *Mr. Bull.*] How long is it since he ceased to be watching your premises? I am sure I could not say.
4937. Give us an idea? It might be a couple of years or so.
4938. My friend has asked you whether Quelch did not have some conversation with you. Quelch did not suggest to you that you were to say anything but the truth here, I suppose? Mr. Quelch simply just said, "You remember the night I came and knocked you up?" and I said, "Yes I do."
4939. Do you remember was it in August last? All I remember is that it was a very cold night, I put on a coat and went round.
4940. You are speaking of the night now when you found the shop open? Yes.
4941. That would be a cold night because it was in July. Can you tell us whether Brewin has been employed by you as a night-watchman since the middle of last year? Oh, no. It is further back than that.
4942. There is no doubt about that? I think so.
4943. It is about eighteen months ago, is it not, since he last acted as a night-watchman for you? Of course he may know better than I. It is only from recollection—it is about eighteen months or two years.
4944. Have you anybody watching your place now? No.
4945. Do your premises adjoin Flynn's? Yes.
4946. Your back yard runs to his? They run parallel.
4947. Is there any dividing fence between the yards of the two premises or are they all one yard? It is only a little space about as wide as this room here; there is no fence at all now, there has not been this last four years.
4948. Did you hear as a fact that Quelch found a man leaving Flynn's place with some property in his possession which he reported to Flynn? Yes, certainly.
4949. Do you know as a fact that that man was dismissed by Mr. Flynn? Yes.
4950. And these premises of Flynn's, as you say, immediately adjoin yours? Yes.
4951. *Mr. Bull.*] I should like to put in the Duty Book of June, 1895, the entry No. 5,386. I will read the entry and then your Worship may consider this book in. I only want to show the relation of this evidence to the charge which my friend is making.
4952. *Mr. Abigail.*] I object to this.
4953. *Mr. Bull.*] I put in this book. [*Exhibit No. 29.*] [*Read the entry.*]

Senior-constable W. E. Quelch, recalled:—

4954. *Mr. Bull.*] What does that mean [*indicating entry*]? From 6 to 10 in the morning I was on duty.
4955. Two to 6 p.m., that is another four hours, that is eight in the day? Yes.
4956. The next entry, "Friday, 7/6/97, charge of relief, 10 a.m. to 1 p.m." The entries show that he was on till 6 on Thursday, and never went on again until 10 on Friday, so that at the time that this was reported Quelch, on his oath, says he was on duty. [*Exhibit No. 29.*]

Senior-constable
W. E. Quelch
4 Nov., 1897

Senior-constable

Senior-constable W. D. Shaw was called and sworn:—

- Senior-constable W. D. Shaw.
4 Nov., 1897.
4957. *His Worship.*] What is your name? William David Shaw.
4958. What is your rank? Senior-constable, stationed at Redfern.
4959. *Mr. Bull.*] You are an officer of the New South Wales Police, stationed at Redfern? Yes.
4960. Do you remember the morning of the 28th of July, 1895? I could not say that I do.
4961. [*Book passed up to him.*] Will you see the first and third entries on the right hand page? Yes the first entry is mine and the third entry is mine.
4962. When were they made? The first entry was made at ten minutes past 8 on the evening of the 27th of July, 1895, and the third entry in the page was made at 7.30 a.m. on the 28th July, 1895.
4963. You see an entry between your two? Yes.
4964. Whose handwriting is that? Senior-constable Quelch's.
4965. Was that entry in the Occurrence Book before you were making your second entry? Certainly it was.
4966. And it must have been entered in that book before the morning of the 28th? It must have been between 3 and half-past 7 or between 3 and 6.
4967. What time did you leave that morning? I may say at 10 as near as I can remember. I should get away at 10, I might be a little earlier or a little later.
4968. Now, you know Lambert? Yes.
4969. Do you remember his coming to the station that morning about 3 o'clock? I do not remember that he did come to the station that morning at 3 o'clock.
4970. *Mr. Abigail.*] You were in bed asleep? Just after 3 o'clock.
4971. *Mr. Bull.*] What time did you leave? In the morning at 10 o'clock as near as I can tell.
4972. What time did you go on duty? At 10 o'clock the previous morning. I might explain that we had twenty-four hours on duty and twenty-four hours off.
4973. So that you would have been on duty from 10 o'clock on the 27th to the 28th at 10 a.m.? Yes, bar two hours for meals.
4974. Do you remember Lambert making a report in the morning about 3 or 4 o'clock? He did not make a report to me or it would have been entered in the book.
4975. Not a report of occurrence, I mean a duty report? It would have been entered here.
4976. When would Lambert have gone on duty, you know he was on night duty that night? I think he was on from 10 o'clock in the evening till 6 in the morning.
4977. Would not it necessitate his being down at the station at 3 o'clock in the morning? That depends upon what beat he was on.
4978. He was on 3 and 5? Yes, he would come to the station at 3 in the morning.
4979. He would not only come as a matter of duty, but being on these beats, do you remember that he did come? There is no doubt he came because I would have wanted to know why he did not come.
4980. Do you remember would it be necessary for him, as a matter of duty, when he did come in at 3 to report himself? Yes, he would report.
4981. What would he report? He would say "All right, senior," or "All right."
4982. Do you remember that he did that? He must have said so or else there would have been something — [*Interrupted.*]
4983. If an occurrence had happened, for instance, if he had been with Quelch when something happened and he came to the station at 3 o'clock to give a duty report, would he or would he not as a matter of duty make some report to you of that occurrence? If he considered it his report, no doubt he would have reported it to me.
4984. Suppose this: that he had gone, as a matter of duty, from one side of the road to the other, and seen something suspicious happening in front of Pogson's store; he took out his revolver, as if to present at somebody whom he thought was committing some offence, the somebody turning out to be Quelch, fastening, opening, or doing something with the doors of Pogson's store—would that be a matter that he would report to you? Yes, I consider it would.
4985. Suppose that he sees this or that which, in his mind, is so suspicious as to necessitate him simply blowing his whistle in the street to attract some other officer on duty, should not he report even a small circumstance of that description? I hardly think he would report such a thing as that.
4986. I say, suppose he saw something which, in his opinion, was so suspicious as to necessitate his giving the alarm to some officers on the same beat, necessitating his blowing his whistle, would not he report some of those circumstances when he came in to you at 3 o'clock? I should say he would.
4987. You Police officers do not blow your whistles, when you do blow them, for mere amusement? No.
4988. *His Worship.*] If he had known that a store was open on his beat, should he have reported that? Yes.
4989. *Mr. Bull.*] If he had found this Pogson's store door open, and somebody—Quelch, or anybody else—acting in what he says he considered was a suspicious manner, would it not have been his duty to report it to you? Yes.
4990. Did he report any such thing to you? No, he did not, or else it would have been here.
4991. Do you know of any such circumstance where an officer, for fear of something, failed to report such an occurrence as his *Worship* has suggested, and as I have suggested to you, finding a store door open, unprotected at 3 in the morning, somebody, anybody, acting in a suspicious manner at that door? I scarcely remember any such circumstance; because, if he had, he would prevent himself getting into trouble.
4992. And if, as a fact, he was in fear of some other officer, would not the fact of his not reporting some such circumstance militate far more against him? I do not follow you.
4993. *His Worship.*] Before this inquiry was mooted, did you ever hear any suspicion cast upon Quelch in connection with this matter of Pogson's store? No, nothing until it began to be talked about.
4994. *Mr. Bull.*] You know these rules [*indicating*] possibly as well as any man in the Redfern police? I cannot say that I know them. I know some of them.
4995. You know of their existence? Yes.
4996. And I suppose you know of this one—Rule 218 [*read it*]? Yes, that is correct.
4997. You know that police officers are not allowed to amuse themselves by the indiscriminate blowing of their whistles? Especially at night.
4998. And the object and purpose of the whistle is just as this rule says, "to intimate the necessity for immediate assistance"? Yes, that is correct.
4999.

4999. When first did it come to your knowledge that there was any insinuation against Quelch, that it was he who had broken into that store of Pogson's on that morning in 1895? I never knew anything about it until this affair began to be mooted a very little while ago; it always stood as it is here [*indicating the book*].

5000. Would this statement be true: "That Constable Lambert was on duty one night and heard a noise at Birou Pogson's grocery shop. He came up to the place to see what it was. He found the door open, and Senior constable Quelch inside with a bag of groceries." Now, if that constable found such a condition of circumstances, would it not be his absolute duty to report it to you? He should have reported it to me.

5001. *Mr. Bull.*] Is this true: "Quelch said 'Someone has broken into the place.' What I wish to draw particular attention to is: that this case of attempted robbery of the grocery store has not been reported at headquarters." Is that true? No.

Senior-constable
W. D. Shaw.
4 Nov., 1897.

5002. And that book, I suppose, was open to the inspection of anybody in connection with the Police Force? Anyone in the station. This is the only entry in reference to Pogson's.

5003. "That is a significant fact. Quelch was the officer to have reported it, but he has not yet made his report." I need not tell you the date of that is a month or two ago. That charge, you say, is untrue? Yes.

5004. The report was made by Quelch personally? Yes.

5005. In his own handwriting, and he signed it? And he signed it.

5006. *Mr. Abigail.*] This is Botany Road [*indicating*]. Pogson's shop is on the right-hand side going to Botany. The beat patrolled by Lambert is on the left-hand side? Yes, the east side.

5007. He hears a noise; he rushes over and he finds Quelch, as he says, locking the door, with a bag of groceries outside, and he says to Quelch "You are lucky that I have not shot you for a burglar." "Oh," says Quelch, "there has been a robbery." "What are you going to do with these things?" says Lambert. "Oh, I am going to take them up to the station," and after a further conversation to that effect, Quelch says, "You go up to the station, you will be wanted on the calls. I will be up after I have roused Pogson up. I will report it." If the Senior-constable had said something to that effect would not the constable have left it to his superior to report it? He would have said something about it.

5008. Supposing you had told Lambert, "Oh, go on and report yourself; you are due at 3. Never mind this, I will report it," would you have complained of your subordinate if he had not reported it? If Quelch told Lambert not to report it; but of course I know nothing about it.

5009. Your answers to Mr. Bull are based upon the ordinary routine of things at the station? Yes.

5010. You are a Senior-constable? Yes.

5011. You will admit that there is a strange corroboration of Lambert's statement which is as I repeated to you just now, that Quelch would report it by the fact that Quelch did report it, and soon after 3?

5012. *Mr. Bull.*] I object to it.

5013. *Mr. Abigail.*] I ask him is it not a strange corroboration? I do not know Lambert's statements.

5014. But if Lambert's statement is as I have stated to you, "Don't you repeat it, go up to the station, I will report it"—to that effect—and Quelch does subsequently report it, assuming Lambert's story to be true, is not that a corroboration?

5015. *His Worship.*] Under these circumstances, was it incumbent upon Lambert to report when Quelch had told him that he would report? I should have thought he would report anything serious, and if he saw this action and pulled out his revolver he would have said something.

5016. *Mr. Abigail.*] But would he have made a report to you about it, or merely spoken about it in a conversational way? If he had mentioned that I would have entered it. Supposing he had said, "Quelch is going to report it when he comes in," then I should not have taken it. But I have no proof that he told me that.

5017. You have no proof that he did not tell you? I say that if he had told me that I would have entered it.

5018. You have been asked certain questions? I think I have explained before that between 3 and 6 o'clock, although I was in the station, I was not in the charge-room.

5019. You have been asked certain questions by Mr. Bull, and you have answered this that what he says Quelch told Lambert is true. Now I am asking you this question, assuming that Lambert was told by Quelch to go up to the station and never mind about this, and he (Quelch) would go to the station afterwards and report it, is it not the most natural thing that subordinate Constable Lambert would say nothing about it and leave it to his superior officer to report it, as he said he would? I should almost have thought he would have said something about it.

5020. Do constables always, with such particularity, do what they ought to do? None of us do.

5021. You are on twenty-four hours at a stretch, are you not? Yes.

5022. And about 3 a.m. after the relief goes out you generally snatch a couple of hours' sleep? Yes.

5023. And during this couple of hours who is in charge of the station? Constable Kidd would be in the station with the instruction that if anything is required he should call me up.

5024. What time should Lambert come in after 3? He should return at half-past 4.

5025. At half-past 4 you would be asleep? Yes.

5026. And Constable Kidd would be in charge then? Yes.

5027. *Mr. Bull.*] If such a circumstance is related by Lambert to Kidd some entry should be made in that book? Supposing Lambert had not returned to the station until after Quelch had made this entry, then I do not suppose that Lambert or Kidd would have made another entry of the same kind.

5028. But supposing he went there at 3 o'clock, and that entry was not made by Kidd until after 3, what then?

5029. *Mr. Abigail.*] Did you ever say this, that you would call it unfair to you that you should be asked to take upon yourself the blame of certain things in order to screen Quelch? Did you ever say that to anybody at any time? I do not wish to screen Quelch.

5030. Did you ever say that to anybody? Not that I am aware of.

5031. Did you say it to Senior-constable Corcoran that you thought it very unfair that you should be asked to take upon yourself the blame of certain things in order to screen Quelch? I have no recollection of saying it.

5032. Will you swear that you did not say it? I will not swear at all; I have no recollection.

5033. But if Corcoran swears you did you will believe him? I will still say I have no recollection of saying such a thing.

5034. *Mr. Bull.*] Mr. Abigail has asked you a question of whether you have said this; but now has Quelch in any sense or way attempted to impose anything upon you to screen himself? He has not. 5035.

- Senior-constable W. D. Shaw.
4 Nov., 1897.
5035. Is there anything that you know of, or could suggest which has been attempted to be placed upon your shoulders by any officer in the Redfern Division for the purpose of screening Quelch? No, I do not know that there is.
5036. Is there anything that you have in your mind or that you can recollect, having such a complexion as would justify Mr. Abigail asking this question? No, I do not know that there is.
5037. *Mr. Abigail.*] Has anybody, from Inspector Lawless down, asked you to take upon your shoulders the blame of certain irregularities in order to relieve Quelch from the blame of such irregularities? I understand you to ask me this, has anyone asked me to bear Quelch's blame for Quelch's errors?
5038. No, to screen him? Certainly not.
5039. Have you been asked to take upon yourself the blame of certain things to screen Quelch? No; Quelch is quite able to take care of his own actions.
5040. *His Worship.*] I suppose there is a good deal of diversity of opinion among the police about this matter? I do not know that there is; of course, some men say one thing, and some another, but I have never been asked to say a certain thing—nothing of the kind.
5041. *Mr. Bull.*] Is not there some speculation out there as to whether Quelch is to be turned out of the Police Force or promoted? [*Witness did not answer.*]

Constable Archibald Kidd was recalled and sworn:—

- Constable Archibald Kidd.
4 Nov., 1897.
5042. *Mr. Abigail.*] Do you recollect the morning of the 28th July, 1895; were you in charge of the Redfern Station at that time? Yes.
5043. Do you remember Constable Lambert giving you any verbal reports about anything that had occurred on his beat when he came in in the morning at 3 o'clock? Not at 3 o'clock.
5044. When was it? 4:30 it was.
5045. Do you recollect what statement he made? I could not say the exact words, but he said something about finding Pogson's door open, and Constable Quelch there, but I cannot remember the exact words he said; I know I took the book down to make an entry, and I saw Senior-constable Quelch had made an entry.
5046. Did he make any statement, any suspicious statement, as regarded Quelch? No.
5047. Simply that Pogson's door was open, and that Senior-constable Quelch was there? Yes.
5048. Can you really remember what Lambert did say to you? I cannot remember the exact words.
5049. Did he say that he nearly shot Quelch; took him for a burglar, and nearly shot him? No, he did not say that.
5050. Would you positively swear that, or simply do not remember it? I will swear he did not say it.
5051. Did he say that Quelch was coming up and that Quelch had sent him on to the station? I think as near as I can remember, "Quelch found Pogson's door open this morning."
5052. *His Worship.*] Did he say anything about there being a bag of goods outside? He said there was a kit of goods found packed ready to be taken away in the shop or somewhere about the door.
5053. Did he say what was done with that? No.
5054. *Mr. Bull.*] But he certainly did not mention such a circumstance as that he said to Quelch, "My word, it is a good job, So-and-so; I might have shot you with my revolver"? No.
5055. Nor did he lead you to suppose that he had presented his revolver at Quelch? No.
5056. Nothing like it? Nothing like that.
5057. If this condition of things existed, I want you to say whether it would have been this man's duty, Lambert's duty, to have made some report to you. Suppose that, being on the opposite side of the road on his own beat, he heard some noise which attracted him to the opposite side, to Pogson's store door. After hearing that noise he approached the door and saw somebody meddling with the door; that he at once took out his revolver, and immediately disclosed Quelch. Do you think it would have been his duty as a police officer to have reported some such circumstance to you? Certainly.
5058. *His Worship.*] Do you recollect whether he said the goods were outside or just inside the door? I do not remember. I think he just simply said there was a bag of things ready packed to be taken away.
5059. *Mr. Abigail.*] At any rate, when Lambert told you what he did, you thought it sufficiently important to turn up the Rough Occurrence Book to make a report of it? Yes.
5060. And immediately you did you found out that Quelch himself had already written out the report? Yes, he was in there a little while before that.
5061. Were you in the station when Quelch wrote out that report? I say he was in there a little while before that, and wrote it out.
5062. Had Quelch told you what it was? I do not think so.
5063. Was not that the usual course events should have taken, that Quelch should have told you, and you should have written the report in the Occurrence Book? No, the non-commissioned officer should have written it himself.
5064. The usual thing would be that he would have told you? Sometimes he would mention it to me, but he usually wrote it himself.
5065. He did not tell you, did he? I do not remember.
5066. He did not tell you that he had left Lambert in charge there while he had gone to rouse Pogson? I do not remember whether he did or not. I do not think he did.
5067. Because if he did that would have impressed the occurrence on your mind, would it not? Well, I should think so.
5068. At any rate there can be no doubt about the fact that Lambert did speak to you about a bag of goods at 4:30? Yes.
5069. Stating that they were ready packed for removal and standing somewhere about the door? Yes.
5070. That is your recollection of what he said, that they were somewhere about the door? As near as I can remember Lambert said, "Quelch and I found Pogson's door open, and there was a bag of goods packed ready to be taken away." That is as near as I can remember.
5071. What time did Quelch come into the station to make this report? It might have been very near 4 o'clock.
5072. And was he still in the station at the time that Constable Lambert was there? No. 5073.

Constable
Archibald
Kidd.

4 Nov., 1897.

5073. Had you told Lambert before Lambert had conversed with you about this that Quelch had been in and had made a report about it? No.
5074. As a matter of fact you did not know until you looked up the Occurrence-book that Quelch had reported it, did you? I do not think I did.
5075. You looked up the Occurrence Book to enter up Lambert's complaint and you found Quelch had been there with a report? I think so.
5076. So that you really did not know that Quelch had actually reported it in the Rough Occurrence Book until you looked it up after Lambert told you? As far as I can remember I do not think I did.
5077. Don't you think it was really something out of ordinary that Quelch should have come there and quietly got this book and entered this in, and never said a word to you about the occurrence. Don't you think it is something out of the ordinary? It might be.
5078. It is a bit unusual? Well, of course, some non-commissioned officers would say more than others.
5079. Well, Quelch is not a secretive individual, he is a man to talk if he has made a discovery? I think he is just the opposite.
5080. You were the only officer in the station at the time he came in? Yes.
5081. Is it likely or probable that he came into the station, never said a word to you, took the book from the desk at which you were sitting, wrote the entry, and walked out without saying a word to you about the occurrence? He has done that before and since.
5082. Now, you certainly yourself would have spoken about it, would you not, if the positions had been reversed? Yes.
5083. How could Quelch have taken that Occurrence Book away from the desk at which you were sitting, and upon which it was, and have written this report, and yet your attention not be attracted? Well, I would be writing at the desk, and the Occurrence Book would be away to my right, as if up in the wall there [pointing] right at my back.
5084. It could not be written there? No, but he would be away at the table to my right.
5085. If he had written it, would it not have been his duty to have put it in front of you, and let you see what it was, as the officer in charge? I was simply the officer in charge, the non-commissioned officer in charge was, of course, resting at the time.
5086. But it would have been your duty if there had been a serious complaint to have called Shaw? Yes.
5087. There might have been a diversity of opinion as to whether the complaint was serious or not between the two officers; was it not his duty to put it before you so that you might decide as to whether it was necessary to call Shaw, who was asleep? He would have done that himself.
5088. *His Worship.*] Of course, the book was open to your perusal at any time you were there? Yes.
5089. *Mr. Abigail.*] Before there was any suspicion of the inquiry, you did hear, did you not, that Lambert had nearly shot Quelch? No; I have heard it lately.
5090. How long ago? I suppose a few weeks, perhaps.
5091. Did you hear it before Mr. Dacey's speech in the House; was it not generally talked about? No, it was not.
5092. You heard it though? I heard it.
5093. It was before Mr. Dacey's speech? I would not be certain that it was before Mr. Dacey's speech.
5094. At any rate, it was weeks ago?
5095. *Mr. Bull.*] Mr. Dacey's speech was on the 17th of August—three months ago.
5096. *Mr. Abigail.*] No, ten weeks? It might have been about the same time, or a little after.
5097. It might have been a little before or a little after? It might have been; but I do not think so.
5098. *Mr. Bull.*] Don't you know that the long articles in *Truth* appeared before Mr. Dacey's speech? I have only read it.

Senior-constable W. E. Quelch was recalled:—

5099. *His Worship.*] You still state that there was nothing packed ready for removal in the store? I never saw such a thing.
5100. Nothing apparently taken away? Nothing apparently taken away, and nothing reported taken away.
5101. *Mr. Bull.*] And you have heard Mr. Pogson's statement that no such bag as was described by this man Lambert was inside the door or about the premises? No; no such bag was ever in view.
5102. *Mr. Abigail.*] But you have heard Mr. Pogson's statement that there were empty bags there? Yes.
5103. And do you still persist that there were no bags there, notwithstanding the fact that within an hour and a half of the occurrence Kidd says that Lambert told him that there was a bag there? I know nothing of what Lambert or Kidd say?
5104. Do you still persist that there was no bag there, notwithstanding what Kidd says? There was no bag there. Mr. Pogson viewed the place, and I also went through the place, and I saw no bag; and the bags at Mr. Pogson's place, hempen bags, are of a different material from that bag [indicating the bag produced].
5105. *His Worship.*] You say you never saw such a thing? Never saw it.
5106. *Mr. Abigail.*] Is it a fact that you went into that Police Station, never said a word to the officer in charge, took down the Occurrence Book and made this entry, and walked out again and never said a word about it to anybody? Well, I do not suppose I brought it under his notice particularly. If I had my duty to do I would simply walk in and do it and that is all. If I failed to do it I was answerable.

Senior-constable
W. E. Quelch.

4 Nov., 1897.

Serjeant T. Vane was called and sworn:—

5107. *His Worship.*] What is your name? Thomas Vane.
5108. You are Serjeant of Police at Redfern? Yes.
5109. *Mr. Bull.*] Do you remember the morning of the 28th of July, 1895? I do not know that I can remember that. I must have some circumstance to make me remember that.
5110. Do you know Constable Lambert? Yes.
5111. Do you know Pogson and his store? Yes.

Serjeant
T. Vane.

4 Nov., 1897

5112.

- Serjeant
T. Vane.
4 Nov., 1897.
5112. When did you first hear of Pogson's store being found open on the morning of the 28th of July, 1895? I saw it in the Rough Book after it was entered.
5113. The same morning that it was entered? No.
5114. When? The next night when I came on duty.
5115. Then you saw the entry in the Rough Book on the 28th? I could not say the 28th.
5116. If it was open on the morning of the 28th? I saw it on the evening of the same day.
5117. Were you, or would you, in the course of your duty, be in the station at 3 o'clock on that morning? Yes, I took the relief in at 3 o'clock and went off duty.
5118. Do you remember Constable Lambert coming in that morning and reporting himself at 3 o'clock? I do not remember seeing him that morning, he was not in my relief.
5119. He was not in your relief? I do not recollect whether he was or not.
5120. But you remember your being in the station when Lambert did come in? Yes.
5121. Will you tell us what time that was? Just before I left the station.
5122. Just about 3? Just about 3.
5123. Because you were relieved at 3 o'clock and went home? Yes.
5124. Would it have been Lambert's duty to make what is called a "duty report"? He reported "All right."
5125. Have you any doubt about that? No, I have not. If there was anything else, he would have reported otherwise. If there is anything to report he reports it, and if there is nothing to report he reports, "All right, serjeant."
5126. Supposing Lambert during that morning, before 3 o'clock, before his going to the station on duty on his beat, saw something suspicious happening on the opposite side of the road, and accosted that person whom he saw acting suspiciously, and pointed his revolver as if to shoot him until the person disclosed himself, would that be a portion of the duty which that man should report? It was his duty to report the matter fully to me, and get instructions from me how to act.
5127. He made no such report as that to you? No.
5128. He never has made such a report as that to you, has he? No, he has not.
5129. *Mr. Abigail.*] None of this is in issue. He admits himself that he made no reports except "All right," and gave as a reason that his senior officer told him not to.
5130. *Mr. Bull.*] Then there is an issue between the two as to whether or not this man told the truth or Quelch?
5131. *Mr. Abigail.*] And all the witnesses corroborate Lambert, showing he is a witness of truth—that he did not make a report of that.
5132. *Mr. Bull.*] It is given in evidence that he, as a Police officer, should have reported this.
5133. *His Worship.*] He said something to Kidd.
5134. *Mr. Bull.*] At half-past 4; but not when he reported "All correct" at 3 o'clock, and that was admittedly after this episode which he has described with regard to Quelch. He is the only man who speaks of the bag outside ——. [*Interrupted.*]
5135. *Mr. Abigail.*] I object to my friend's speeches, unless I am entitled to reply.
5136. *His Worship.*] It is a question now as to the credibility of certain witnesses.
5137. *Mr. Bull.*] His own statement is that there was no statement made with regard to the bag. [*To the witness.*] Tell me this: When first did you hear anything insinuated against Quelch with regard to this shop of Pogson's? The first I heard of it was by seeing it in *Truth*.
5138. Never before had any insinuation or accusation been made against Quelch with regard to that? Not in my hearing.
5139. And, speaking of Quelch, he has been under your observation, and under you, until quite recently, in active service. Yes.
5140. Speaking of Lambert, what sort of a man is he? Well, he is a very steady constable; but when you say that, you have done. He is very discontented.
5141. Is he a grumbling, discontented fellow? Yes, he is. He is always very hard done by.
5142. Is he one of those who fancies he ought to be an inspector-general before he is even a senior-constable? That is just it.
5143. *His Worship.*] Is he a man on whose word you have implicit reliance? I cannot say. I have not had much to do with him.
5144. *Mr. Bull.*] Speaking of Quelch, in all the many years of your observation have you always found him a man upon whom you could implicitly rely? I have never found him out in an untruth. There have been some hundreds of cases he has had with me, and I have had good opportunity of judging whether he tells the truth or not.
5145. Is he an honest man? So far as I know he is.
5146. Is he a man likely to commit a burglary of a little bag of 6 lb. of sugar? No, I could not believe such a thing.
5147. *Mr. Abigail.*] You like Quelch don't you? I like him the same as the rest of the men.
5148. There is a preference on your part for Quelch? I have no more liking for him than for any other constable.
5149. You like him because Mr. Lawless does? I do not. I show no favour to anyone.
5150. You know that Mr. Lawless is charged with showing favour? No.
5151. You do not know that this man Quelch is called Mr. Lawless' pet, and that Dukes is called Mr. Lawless' pet, too? No.
5152. Do you mean to say that you yourself have not charged your inspector with favouritism? No.
5153. Do you remember that raid being made on Rowan's tobacconist's shop? Yes.
5154. Do you remember Mr. Lawless putting in charge of the raiders, of whom you were one, plain constable Dukes, and did not he do this, did not Dukes actually station you, a serjeant, at a certain position, and did not you bitterly resent it afterwards—come into the station and bitterly resent it, and say it was an unfair thing for Mr. Lawless to put a constable in a position to dictate to you, an officer of twenty years' service? Constable Dukes laid an information and he got an order to execute upon Rowan's tote shop. When I came into the station Mr. Lawless told me to assist him. Dukes told me that he wanted me to take charge of the door. I took charge of the door, and did as he told me, and that is all I know about it.
5155. The natural order was reversed, you having to obey the constable, instead of the constable having to obey the serjeant. You came back to the station and bitterly resented it? No; I may have said I thought I should have had some instructions before I should be told to go there. 5156.

Serjeant
T. Vane.
4 Nov., 1897.

5156. Did you say you that you thought Mr. Lawless should not have humiliated you? No.
5157. Was not Serjeant Houlahan in the station at the time? On reserve, he never goes out of the station.
5158. He was in the station at the time? Yes.
5159. And you will admit that when Dukes stationed you at this door, that is a duty that the youngest constable in the force could have done? It wanted somebody who had some experience in charge of the door.
5160. If so did not the whole raid want somebody of experience—if this part of the duty wanted an officer of experience did not the whole raid require the experience of a mature officer? Yes, it did.
5161. Instead of which a constable was placed in charge and you were placed there to assist him? I was sent there to assist him.
5162. Who sent you there to assist him? Mr. Lawless.
5163. *His Worship.*] Perhaps on some special information? Dukes laid the information against the house, and had the warrant in his possession, and it was kept a secret from everyone else to the very minute it was to be done.
5164. Did you object to go to the door? I was asked to take possession of the door, and see that nobody entered or left.
5165. And what did Dukes do? He executed the warrant, and arrested everybody inside.
5166. Did you feel aggrieved at the time? No; I did not. I am always willing to obey every instruction in every way—obedience is part of my duty.
5167. *Mr. Abigail.*] Do you mean to say that you, as a serjeant sent there to assist this constable, were actually kept in the dark as to what you were going to do there? As I said before, the information was laid by the man, and it would not do for him to say what he was going to do, or else he would not catch the men in there.
5168. Don't you see what you are saying, that if you knew you would have told Rowan, and no one would be caught? No.
5169. Do you mean to say that this was kept so secret that nobody knew what was going to be done except Dukes? Yes.
5170. Do you mean to say that you were not told the object of the raid? I might have been told had I been there sooner.
5171. Now, has Constable Lambert been on duty under you? Yes.
5172. How long ago? It might be 8 or 9 months.
5173. He is rather an outspoken constable is he not; if he has anything on his mind he lets you know it? No, I think he keeps it in. He is a man that tries to do his duty as easy as possible.
5174. How can he be a discontented, grumbling constable if he is not always outspoken in his complaints? He is always grumbling at not being promoted.
5175. He is not one of the pets? I could not say.
5176. Have you not heard that epithet applied to Quelch? No. I have not heard anyone use that phrase except yourself.
5177. Are you surprised that Senior-serjeant Bell has heard that? No.
5178. And that he has complained about favouritism being shown? I do not know what he has done. I am on the opposite relief to him.
5179. You would not say that Lambert is a man who would come into this box, he still being a constable in the Force, and swear deliberate perjury? I could not say what he would do.
5180. Do you think he would? It is not for me to give an opinion.
5181. Do you think he is a liar? I will not say anything of the sort.
5182. You know that that would require some justification? I would have to have proof.
5183. And you have no proof? No I have not. I do not wish to give an opinion on that subject.
5184. May I take it that if you had proof the task would be an exceedingly refreshing one to you? I would call no man a liar without proof.
5185. If you could you would in this case? No, I would not.
5186. As a matter of fact, have not you taken sides with Quelch in this inquiry? No.
5187. You have frequently been in conversation with him at his house? No, I have not more than I have told you.
5188. And assisted him at this inquiry? No. All that I have done is to serve summonses when they have been sent to me.
5189. Do you know that there are sides taken amongst the policemen at the Redfern Station about this matter? Of course, you can hear discontent amongst them.
5190. Over this matter? Yes.
5191. Some say one thing and some say the other? Yes.
5192. Some say Quelch is guilty and some say he is not? I do not believe it until I see it proved.
5193. *Mr. Bull.*] With regard to this raid upon Rowan, Dukes was the very man possessed of the warrant? Yes.
5194. He was specially authorised, assisted by other police officers, to execute the warrant? Yes.
5195. Do you remember, as a fact, that there were two batches of police officers went down there How many police officers in all were there at the raid? There might be twelve or fourteen.
5196. Was not Quelch, himself a senior-constable, one? I could not say, it is so long ago.
5197. He would be Dukes' superior officer? I could not say whether Quelch was there at the time.
5198. Look here, I will not bother about Quelch, do you remember that Inspector Lawless himself and Senior-serjeant Bell were there? Senior-serjeant Bell was not there.
5199. Was the inspector there? I do not recollect. The inspector was at the station, but I do not recollect whether he was there.
5200. Are you actuated in any sense by any favour or feeling of favour towards Quelch? No, I am the same towards him as any other constable or senior-constable. I will show no favour to anybody, but will try to do my duty properly.
5201. *Mr. Abigail.*] But you have actually said you would give £20 towards getting him out of it? No. What I did say was that I did not believe such statements, and that I would certainly give him a pound to pay his expenses.
5202. And yet you have not taken sides? No. That was when *Truth* first published this matter.

- Serjeant
T. Vane.
4 Nov., 1897.
5203. *His Worship.*] I suppose money is raised on the other side in the same way.
5204. *Mr. Bull.*] There is no such thing as Mr. Abigail has suggested to you—that you were willing to pay £20? No.
5205. Is not this the fact: Quelch was attacked by the *Truth* newspaper? Yes.
5206. Was not there some talk amongst the officers about bringing a civil action against *Truth*, and was not this £1 offered as a contribution towards the cost of that civil action? Yes.
5207. Did Quelch in any sense or way ask your assistance or sympathy in that direction? No, he has not.
5208. *Mr. Abigail.*] Will you tell me this: did Quelch tackle *Truth* and take the twenty shillings? I do not know.
5209. *Mr. Bull.*] How could he, this Commission was asked for by Mr. Dacey in the House on the 27th August last, and the man has been on the relief service ever since?
5210. *Mr. Abigail.*] The first article in *Truth* was months and months before this inquiry was first thought of.
5211. *Mr. Bull.*] Quelch reported the matter to his Department on the 20th of August, 1897. In that letter he said this [*read the letter, Exhibit No. 44*] and then this matter turns up about this Commission.
[At 5.15 p.m. the inquiry was adjourned until 2 p.m. next day.]

FRIDAY, 5 NOVEMBER, 1897.

[*The Commission resumed its sittings at 2 p.m. in the Licensing Court, at the Central Police Station.*]

Present:—

MR. WHITTINGDALE JOHNSON, S.M. (SOLE COMMISSIONER).

Mr. J. R. Dacey, M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, Solicitor, appeared to support the charges; Mr. Charles Bull, M.L.A., Solicitor, appeared to defend Senior-constable Quelch.

Charge No. 7 (continued).

Mr. Edward Watts, Watchman and Special Constable at the Eveleigh Railway Works, was called and sworn:—

- Mr. Edward
Watts.
5 Nov., 1897.
5212. *His Worship.*] What is your name? Edward Watts.
5213. What is your occupation? Watchman and special constable at the Eveleigh Railway Works.
5214. Who employs you? The Commissioners.
5215. *Mr. Bull.*] Do you know Senior-constable Quelch? I have known Mr. Quelch these last three years, casually, I think.
5216. With regard to your watching, is it day or night duty? Well, one week, this week, I am on from 6 in the morning to 2 in the afternoon, and next week I am on from 2 in the afternoon to 10 and the week after next I am on from 10 at night till 6 in the morning.
5217. It is day and night? Yes.
5218. You do not go through the whole twenty-four hours? No, there are three watchmen.
5219. There are three watches, and you do what is called an eight hours' watch? Yes, straight off.
5220. In this range of duty of yours, do you cover the whole of the works on the Alexandria side of the line? No, sir, only on the locomotive side, not the carriage side.
5221. But that is the Alexandria side of the rails, is it not? Yes.
5222. And round and about the running sheds? All round the running sheds.
5223. Now, whilst you have been on duty on the nightwatch have you often seen Quelch? I have very often seen Quelch.
5224. You know Wilson-street? Yes.
5225. Have you seen Quelch of a night doing duty and crossing from Wilson-street through to Alexandria? Generally from Boundary-street to Wilson-street I have seen him.
5226. Where is Boundary-street? Well, it is on the eastern side of the works—Cornwallis-street or Boundary-street.
5227. I suppose any of the police officers wanting to reach the eastern from the western, that is, Wilson-street, vicinity of your round, usually and naturally would cross the railway premises? They can. I have generally seen them. I have seen Serjeant Vane and several other constables crossing from Wilson-street on to the Alexandria side.
5228. And I suppose it is a fact in the course of your own duty night after night you see Quelch? Yes, I have seen him often.
5229. You have occasion from time to time to make reports to Quelch with regard to your own observations? Not with regard to my duties. I may have told him perhaps that the youngsters were troublesome, and any case that I have had on I might have told him; but of course I could not swear that I did; I may have done so.
5230. And I suppose you know as a fact that very frequent complaints have been made from the Commissioners to the police at Redfern with regard to matters which they complain of, robberies from the railway premises, and damage to different sorts of railway property? I have heard so.
5231. I see in June of this very year, the 15th of June, "Railway Commissioners complain of damage to trucks and stealing brass plugs from Alexandria side, and request police protection"? Yes, very likely so.
5232. We will just take this as one instance out of many. It is on page 161 of the Complaint Book. Quelch's name is amongst seven different officers who have apparently been instructed to make inspections in regard to complaints such as those. (*To the witness*): In that three years' knowledge you have had of Quelch have you ever heard anything insinuated against the man's honesty? No, sir, I do not think so.
5233. Have you ever heard it insinuated or suggested by anybody that he was not a straightforward or reputable police officer? Well, I cannot say that I have. 5234.

5234. I would like you to say if you have at any time? Not until this came up.
5235. I mean, of course, outside of this charge, or what you may have heard during the last three months? No, sir, I was surprised when I heard of this case.
5236. I suppose you realise and recognise, and you know as a fact, that Quelch has been particularly active with regard to the prosecution of publicans? No, sir, I do not.
5237. *Mr. Dacey.*] Where do you say your duties take you? Is it on that piece of ground that was resumed by the Railway Commissioners last, and is within the boundary of the borough of Alexandria? Do you know the piece of ground I am alluding to—the piece of ground bought of Anderson and Landor at the time, where the Alexandria goods siding is at present? I do not go down there now. There is another watchman there on duty.
5238. *His Worship.*] Have we not evidence that Quelch on both these occasions was within his ordinary beat at the time these burglaries are alleged to have been committed?
5239. *Mr. Abigail.*] That is what I thought. I would like to know the materiality of this evidence.
5240. *Mr. Bull.*] Quelch yesterday said that his duty took him along Wilson-street, on the western side of the railway, as far as a certain point, and to prevent himself going a whole course round from Wilson-street to reach the other beats and sections he had to patrol, he went across the railway premises directly across from Wilson-street to the Alexandria side of the line, and that is the particular district in which this officer does night duty. My object was to corroborate Quelch's statement in that respect.
5241. *Mr. Abigail.*] The Duty Book would have done that.
5242. *Mr. Bull.*] The Duty Book could not possibly show anything with regard to this officer, because he is not an officer of the police.
5243. *Mr. Dacey.*] You have seen Mr. Quelch crossing from Wilson-street? Generally from Cornwallis-street to Wilson-street.
5244. Do you know Rowley-place? Do you know the old toll-bar on the Henderson Road? No.
5245. *His Worship.*] Was Quelch within the sphere of his duties when these alleged burglaries took place?
5246. *Mr. Bull.*] Yes, he was.
5247. *Mr. Abigail.*] Unless I ask this witness certain questions about the "sand" case which comes after this, I may not have the opportunity of asking him, because he may not be called in that.
5248. *Mr. Bull.*] Mr. Watts is here in no other case than this; but if my friend wants to ask him questions he is welcome to. It has been absolutely sworn that on the two nights of the "Myall House" and Pogson's Store cases Quelch was not only on police duty, but was then patrolling beats in charge of other persons. I wanted to get Quelch's statement corroborated. It may be the absolute duty of a police officer to keep along the actual route of the beat. Quelch said he left that course because it was necessary to save a long round, and crossed the railway premises. It may be that burglaries and all sorts of things have been committed on the railway premises, and I wanted this officer who had seen him cross to corroborate his evidence.
5249. *Mr. Abigail.*] Had Quelch any authority to be on the railway premises at all? I could not say.
5250. The police do not patrol the private premises of the railway; do they? As far as that goes, I may say that Mr. McKelvey always crosses the line.
5251. He does not go in the railway premises; does he? Oh, yes.
5252. In the shops and that? No.
5253. You do not know what was Quelch's duty? No.
5254. Nor what his beat was? I do not.
5255. You only know that you saw him there occasionally? That is all that I do know. I have spoken to him occasionally.
5256. At the place described by Mr. Bull? Yes.
5257. Have you seen other constables there? I have seen constables going backwards and forwards to duty.
5258. Have you seen constables who were on duty in the same place where you have seen Quelch, when he was supposed to be on duty? No, not in front of the workshops, but I have in other parts of the works.
5259. Have you seen other police officers in uniform on duty at the same place as you saw Quelch? I have seen them going on duty in the same place.
5260. *Mr. Bull.*] They would not be on duty at all when you saw them crossing the railway.
5261. *Mr. Abigail.*] That was the nearest cut from their homes to the station? Yes.
5262. But it is not the shortest cut for Quelch, because he does not live in that direction at all? I could not say.
5263. Well, if he lives near the Redfern Police Station, about 80 yards from it, that is not in the direction of the railway works, because they are at Eveleigh? Yes.
5264. *Mr. Bull.*] You have been asked whether this particular course through the railway premises is a portion of the police beat; you know it is not; it is the railway property? Yes.
5265. Have you seen Serjeant Vane? I have seen him crossing from Wilson-street to Alexandria similarly when on duty.
5266. It is, there is no doubt in the world about it, a short cut? Yes; that is why I understood they went there.
5267. And is it not a fact that members of the general public take exactly the same route? They do, although they are supposed not to.
5268. They make it an easy manner of getting from one point to the other by a short cut? Our duty is to caution them not to.
5269. Would you tell me this: you know Wilson-street, do you not—you know this particular portion of your beat on the Alexandria side of the line? Yes.
5270. Through this short cut in the railway premises what distance would it be? I could not say.
5271. You have some idea of distance? About 150 yards.
5272. Now, the route round by the ordinary public streets, how much distance does the short cut save on that? It would save at the least 50 yards or more.
5273. *Mr. Abigail.*] I would like to put this proposition to my friend to draw out the materiality of these questions and their application to this case. If a constable has a regular beat, what does it matter whether there is a short cut. Surely he should take in the most regular routes, not the shortest cuts but the roads around which there is the most habitation. Surely a constable has no right to go round his beat by the short cuts.

Mr. Edward
Watts.
5 Nov., 1897.

- Mr. Edward Watts.
5 Nov., 1897.
5274. *Mr. Bull.*] My friend is mistaken about this beat. Quelch is a senior-constable on patrol. He is not tied down to a specific beat.
- Witness:* I may say that we like to see the police there occasionally on night duty because we may want their assistance.
5275. *His Worship.*] You are not afraid they will loot the premises? No.
5276. *Mr. Bull.*] You do not suppose for a moment that any police officer by taking this short cut lessens the property of the Railway Commissioners? I should think the other way about.
5277. Do you remember one circumstance, a matter in which Quelch was instrumental in supplying the Commissioners with information with regard to some 6 or 6½ tons of their property, and that they rewarded him with a special reward of £5 for his services? Was it cast-iron?
5278. Different classes of material.
5279. *Mr. Dacey.*] Whose case was it?
5280. *Mr. Bull.*] I will give you all the information I can. You do not know of a letter sent by the Secretary for Railways, Mr. McLachlan, to Quelch?
5281. *Mr. Abigail.*] How could he know this? This is only to get it on the notes.
5282. *Mr. Bull.*] I will get all I can on the notes. His Worship asked this witness whether he was glad to see the police on the railway premises or otherwise, and the witness has given his answer. I shall recall Quelch with regard to this, so that I shall get at it as I want it. (*To the witness*): Were you a night-watchman in October of 1892? I must have been, I am one week in three.
5283. Were you a night-watchman in October of 1892—that is, five years ago? I could not exactly answer that question without looking at my cards.
5284. Get your cards and see when you were sworn in as a special constable? [*Looking at card.*] Yes, sir.
5285. Do you remember a number of men who were charged with stealing property from the railway premises, consisting of old iron, springs, and a lot of other different classes of property, belonging to the Commissioners, amounting to some 6 or 7 tons in weight? I cannot remember.
5286. *Mr. Abigail.*] I should think the constable on the beat should be told by the senior-constable of these things. The object of your questions is to show that Quelch was justified in being on the premises, because of these robberies from the railway works.

Inspector Edmund Lawless was recalled:—

- Inspector E. Lawless.
5 Nov., 1897.
5287. *Mr. Bull.*] You are aware, are you not, of numerous complaints made at the instance of the Railway Commissioners to you and to the other officers at Redfern with regard to speculation and thieving on the railway premises? Yes.
5288. And that particularly in connection with the railway works at Eveleigh towards Alexandria? Yes.
5289. Do you remember the case I have referred to here in questioning Mr. Watts? I remember it, I do not know the date of it.
5290. You remember that it was reported to you that a large quantity of the property of the Railway Commissioners had been stolen? Yes, I went down to have a look at it myself.
5291. You remember that you put that in the hands of several plain-clothes constables? Yes.
5292. *Mr. Abigail.*] That was in 1892. What has that to do with the charge of 1895?
5293. *Mr. Bull.*] My friend has made a charge against Quelch in 1895, but I am not to adduce evidence to show what was Quelch's character previously.
5294. *His Worship.*] I do not think it is necessary to go into that question. (*To the witness*): A senior-constable in patrolling his district is not bound to follow the exact beats of the other constables? Certainly not.
5295. He can take any short cut he likes from point to point? Yes, and he was instructed to pass through the railway particularly, in consequence of the complaints, and I have instructed Constable Shaw to pass through the railway, and pay particular attention, and see if he could detect any of these people stealing any of the railway material, at the request of the Railway Commissioners.
5296. *Mr. Bull.*] The fact is that Quelch was instrumental in bringing to committal persons who stole large quantities of stuff from the railways? Yes.
5297. And do you not know that he received special recognition of that from the Railway Commissioners? Yes.
5298. *Mr. Abigail.*] With reference to this Constable Lambert, upon whose statement this charge depends to a considerable extent, what sort of an officer is he. Is he a truthful man? So far as I know, I have never discovered him in any untruth that I know of.
5299. In fact you have recommended him on more than one occasion for promotion? I recommended him once when he made an application. I thought he was a sober, steady man.
5300. This is what you said in respect to his application: "Constable Lambert is sober, steady, and attentive to his duties?" Yes.
5301. Then, again, you said, "Constable Lambert is sober and steady and has done duty in the various strikes?" Yes.
5302. And unless he was a steady man and truthful in all ways you would not have recommended him for promotion? Certainly not. If I had detected him in any untruth I would have reported him.
5303. You will admit this, that a reputation for truth is a *sine qua non* of —? Of everybody I should imagine.
5304. Of a policeman, especially of a policeman who is so frequently called into the box to give evidence against people whom he prosecutes? Yes. I can only speak of him as I find him.
5305. He is a man whom you would believe from your experience of him as his inspector? I should, under certain conditions.
5306. *Mr. Bull.*] Will you tell me this: When first did you hear—with regard to the circumstances of Pogson's store being open—when first did you hear it said that a bag of material was on the outside of the place ready to be removed? I never heard anything about it till this inquiry was started. This is the first I heard of it.
5307. *Mr. Abigail.*] But you know, do you not, that until a month ago, although nearly every man in the station was industriously searching that Rough Occurrence Book for the supposed entry, nobody could find it,

it, and only recently it was unearthed by Quelch himself? I never knew anything about it. I made inquiries, and they could not see it, and I then pulled down the books and I found it myself. I was under the impression there was no such entry until I searched myself, carefully, and found it and called the senior-constable's attention to it.

Inspector
E. Lawless.
5 Nov., 1897.

5308. *Mr. Abigail.*] It is just possible the senior-constable did not make a report until he found the importance of making it.

5309. *His Worship.*] That is absolutely upset by the statement of the other constable who made the other entries.

5310. *Mr. Bull.*] Shaw said that when he made that third entry Quelch's entry was there.

5311. *Mr. Abigail.*] Shaw's evidence, from my recollection of it, was that he, having made the first entry and the third, and Quelch's having been sandwiched between the two, that Quelch's must have been there.

5312. *Mr. Bull.*] No, that is not it. He said, "I saw that entry there when I made that third entry on that page." He said, "I do not know what time it was made. I do not think it could have been made before 4 o'clock." I have a number of witnesses to bring with regard to the different officers leaving Wilson-street and crossing the railway premises, if your Worship thinks it is necessary to call them.

5313. *His Worship.*] Is there no witness with reference to the actual fact of finding the door open?

5314. *Mr. Bull.*] There can be nobody else.

5315. *Mr. Abigail.*] Now, as it is a matter of credibility, I will call Serjeant Houlahan.

5316. *Mr. Bull.*] I will object to this. My friend is calling this witness to give evidence that you ought to believe Lambert more than Quelch.

5317. *His Worship.*] From some fact.

5318. *Mr. Abigail.*] And that is the fact that I want to put before your Worship to assist your deliberations.

5319. *His Worship.*] I do not want witnesses' opinions, and that is why I say I presume "from some fact."

Serjeant John Houlahan was called and sworn:—

5320. *Mr. Abigail.*] What is your name? John Houlahan.

5321. You are a serjeant? Yes.

5322. Stationed at Redfern? Yes.

5323. And under the command of Inspector Lawless? Yes.

5324. Quelch is a brother officer of yours? Yes.

5325. And Lambert is a subordinate constable of yours? Yes.

5326. Have you known Lambert long? I have known him since he came to the station.

5327. That is about seven years? Yes.

5328. You have been in the Service, how many years? Twenty-three years.

5329. Have you had frequent opportunities of observing Lambert as a Police officer, and as a man? Yes.

5330. And, from these observations, and your own experience of him, what conclusion have you come to with regard to his reputation for truth? I never knew him to tell a lie in my life. So far as I know, he is a very truthful man.

5331. Is he a good officer? Is he a good constable? You should ask Mr. Lawless.

5332. Is he an efficient, well-conducted constable? He is a well-conducted constable.

5333. Now, while you are in the box, let me ask you this: There is a good deal of dissension in the Redfern Force over this matter of Quelch's? There is no doubt there is now, at the present time.

5334. There was before this inquiry commenced, was there not? Well, there is always dissension where there are a lot of men together. Some think they are badly treated.

5335. Is it not a fact that you yourself have ventilated your own grievances? I have, unfortunately.

5336. And is this not a fact, that you have complained, and not only you, but others—such as even Senior-serjeant Bell—that you have been overlooked by your inspector, and that constables have been unduly promoted? Well, of course, it is for the authorities to say that. It is not for me to say that.

5337. *His Worship.*] Are there constables in the Force of as long, or longer, standing than Quelch that have not been promoted? Oh, yes.

5338. *Mr. Abigail.*] Is it not a fact that Quelch is frequently alluded to by the other constables, and not only by constables but by serjeants and senior-constables, as "Mr. Lawless' Pet"? I do not know about that, but I have heard the constables in the yard complaining amongst themselves, but they always will complain when they are together. I never took any notice of them.

5339. Will not you say this: that you yourself have complained, and recently, about the treatment you have received from Inspector Lawless? Well, we had a row, I must confess.

5340. *His Worship.*] You think you have been overlooked too? No, I do not.

5341. But you think that some have? We had a row the other night. He accused the serjeant at the station about giving information.

5342. It was not before the appointment of the Commission? No.

5343. *Mr. Abigail.*] You and Senior-serjeant Bell were both accused the other night with making a breach of some rule of the service by giving information to Mr. Dacey? Yes. And while I am here now I wish to say that I have never given any information to Mr. Dacey or anybody either directly or indirectly respecting any entries in this book in connection with this inquiry. In justice to myself in case of anything afterwards, I wish to state that.

5344. You know that right through the struggle Quelch, since he has been relieved from duty, has been in constant consultation and communication with his inspector? There is no doubt about that.

5345. And do you know that Inspector Lawless is interesting himself all he possibly can to assist Quelch in this matter? I believe he has; but, perhaps he has a reason for that.

5346. What I want to get out from you, if possible, if in accordance with the facts, is this: is it not a fact that Mr. Lawless is not preserving a strict neutrality? I want to get out from you, if in accordance with the facts, an answer in the affirmative to this question, is not Inspector Lawless interesting himself in a more than usual sense, for a superior officer, in this matter of Quelch's? Well, really, that is a question I can hardly answer.

5347. Is Inspector Lawless preserving a strict neutrality in this matter? There is no doubt he is not.

5348. *Mr. Abigail.*] I want to show that Inspector Lawless thinks he is on his trial because of this close confederation between him and Quelch.

5349.

Serjeant John
Houlahan.

5 Nov., 1897.

- Serjeant John
Houlahan.
5 Nov., 1897.
5349. *Mr. Bull.*] Can there be any doubt about it that Inspector Lawless is on his trial ?
5350. *Mr. Abigail.*] Of course there can.
5351. *Mr. Bull.*] Then all these things my friend has said to witness after witness are not worth anything. My friend has said that he would show the rottenness of the whole division under Mr. Lawless.
5352. *His Worship.*] That is not included in the Commission. Things may come out that may reflect upon others, or may not ; I do not know.
5353. *Mr. Abigail.*] And apropos of that, if I can show that Quelch is unduly favoured by his inspector, surely that will go against him in this inquiry.
5354. *Mr. Bull.*] You know, I suppose, as an old serjeant, that the business of the office is not to be given, or information is not to be given, to the public? Yes, I do.
5355. You know it is one of the strictest rules and regulations of the Service? Yes, and we must conform to those strictly.
5356. And this charge that you make against Mr. Lawless was in respect of some information which somebody no doubt had given, which possibly he was accusing you or somebody else in the station of having given? He said, "The serjeants in charge of the station." I was the only serjeant in the station in charge of it.
5357. Do not you know that since his Worship, Mr. Johnson, has issued a minute or order asking that the fullest information should be given to Mr. Dacey, or to anybody making the inquiry, every information, every entry, every facility has been afforded by Mr. Lawless? Yes, since we got those instructions.
5358. Can you tell his Worship how that information could have been obtained without these instructions? I could not suggest. I have not the slightest idea.
5359. *His Worship.*] You thought you were unjustly blamed? I thought I was unjustly blamed, there is no doubt about it.
5360. *Mr. Abigail.*] You know that Quelch, before the Commission started, spent weeks not only looking through these station books, but taking extracts and copies, do not you? Yes.
5361. Day after day? Yes.
5362. Before there was any order from the Commissioner about it at all? Yes.
5363. While he was under suspension pending this investigation into his alleged conduct? Yes.
5364. *Mr. Bull.*] I see here a letter to the Department on the 1st of September [*Exhibit No. 45*], respectfully applying to the Superintendent for permission to be allowed his testimonials, and to be allowed to go through the books at the Redfern Station for information in connection with this inquiry. There is an absolutely honest application by Quelch to his superior officers. It was complied with.

Senior-constable G. H. Harrison was called and sworn:—

- Senior-constable G.
H. Harrison.
5 Nov., 1897.
5365. *His Worship.*] What is your name? George Henry Harrison.
5366. You are a senior-constable of police? Yes, stationed at Redfern.
5367. *Mr. Abigail.*] How many years have you been in the service? Nearly fourteen.
5368. How many years at Redfern Station? All that time, with the exception of about eight or nine months, when I did supernumerary at No. 2. It was the one station.
5369. Do you know Constable Lambert? Yes.
5370. Have you had him under your command? Yes.
5371. Have you had opportunities of observing him, and forming an opinion as to whether he is a man of truth? I cannot say otherwise.
5372. Is he a man of truth? I cannot say that he has told any untruths.
5373. *Mr. Bull.*] Your Worship said some time ago that you would allow this evidence to be given if some evidence was given of a fact.
5374. *His Worship.*] From your official connection with him you have no reason to suppose that he would deliberately tell a lie? There is no case that has come under my observation where he has ever told a lie.
5375. Did he ever mention this matter of Pogson's to you? No.
5376. He never mentioned anything to you about the fact of seeing these goods piled up outside the door? No, because I was not on his beat then.
5377. I suppose you saw him? I saw him at the station.
5378. Did you hear any conversation among the men at the station about the matter at that time? Not until it cropped up in *Truth*? It was then general conversation.
5379. There was no official entry of that statement in the books at all? I did not look in the books.
5380. *Mr. Abigail.*] Do you happen to know that he spoke to Kidd on that very night? I do not know.
5381. And Kidd never told you that? No.
5382. And Quelch never told you that? No.
5383. It would not be the duty of either Quelch or Lambert to tell you anything about it?
5384. *His Worship.*] Was it said to be a dark night at the time of this Pogson case? I do not know anything about it.
5385. The police do not carry lanterns? No.
5386. *Mr. Abigail.*] I suppose they are all smokers, and they carry matches? Most of them are smokers.
5387. And grocers' shops usually contain matches and candles? I suppose so.
5388. *His Worship.*] You heard nothing about this alleged statement until it was published in *Truth*? No.
5389. *Mr. Abigail.*] Has Lambert the reputation of being a straightforward man and officer? Yes. I do not know anything against him. As far as I am personally concerned, I know nothing against him.
5390. *His Worship.*] Do you know anything about Quelch in the same way? No; I do not.
5391. You would believe Quelch's word as much as you would Lambert's? Of course, it is this way—from what you hear of the one and what you hear of the other.
5392. *Mr. Abigail.*] Now, whose word would you take first? I would not say.
5393. Now, Harrison, is it not that you do not like to say, for fear of hurting somebody's feelings? I do not want to hurt anybody's feelings.
5394. Is not this the fact: that you would not like to hurt Quelch's feelings? I would not like to hurt anybody's feelings.

Senior-
constable G.
H. Harrison.
5 Nov., 1897.

5395. *His Worship.*] From what you know of both parties, have you any reason to doubt their evidence, either one or the other? I never have been in a position to doubt either.
5396. *Mr. Abigail.*] Quelch was rebuked by you in the presence of the men on one occasion; was he not? Yes.
5397. What was that for? That was a matter of seniority, not of untruthfulness.
5398. He was officious? Of course; he overstepped his bounds in a matter of seniority.
5399. And you rebuked him? Yes.
5400. *Mr. Bull.*] Did you ever tell anybody that? Yes; I told the inspector.
5401. *His Worship.*] It was a personal matter? Yes, about myself.
5402. Then you will admit that there is some jealousy as regards Quelch's promotion over other officers? In my case I was his superior officer by several years, and he assumed seniority in that particular instance. I drew his attention to it, and it did not occur again.
5403. And there are several constables there senior to Quelch in length of service who have not been promoted to be senior constables? Yes.
5404. And of course that causes some discontent amongst them? I cannot say whether it causes some discontent.
5405. Has it been spoken about? Not in my hearing.
5406. *Mr. Abigail.*] Did not you say you would rather not say? In the first instance.
5407. And then did I not follow that up with another question, "Was it not true that you would rather not say, because you did not want to hurt anybody else's feelings? I said I would rather not say.
5408. *His Worship.*] Say what? Under the question he asked me.
5409. *Mr. Abigail.*] You would rather not say which of the two you would believe? I said at the time on account of several things appearing in papers and becoming public property—and the other man there was nothing against—I would rather not say.
5410. Who is the man there is nothing against? Lambert.
5411. And on account of several things appearing in the papers about Quelch you would rather not say? Yes, and personally myself I would rather not say.
5412. *His Worship.*] Will you admit that you have been influenced by what you have seen in the papers? Yes.
5413. *Mr. Abigail.*] Do I understand you to say this: that, personally, you would just as soon believe Lambert as Quelch, or Quelch as Lambert, or do I understand you to say that you personally would rather not say which of the two you would believe? Yes, owing to what has occurred.
5414. *Mr. Bull.*] Did not you mean this: that in the papers, and from other sources, you have heard these insinuations and charges against Quelch? Yes.
5415. You have not heard similar insinuations or charges against Lambert? That is it.
5416. But, outside of these insinuations and charges that you have seen in the papers and heard, is there anything personally that you could accuse Quelch of? No, except what occurred between us—a bit of a barney.
5417. A little circumstance of his assuming seniority? Yes.
5418. That would not induce you to say that Quelch is a liar? Oh, no, I would not say that.
5419. *His Worship.*] Can you say or not whether there is a personal feeling or not amongst the Force against Quelch? I know, amongst the non-commissioned officers, that very few of them speak to him, and he speaks to very few of them.
5420. Then there is personal feeling against him? Personal feeling.

Senior-serjeant R. Bell was recalled:—

Senior-
serjeant
R. Bell.
5 Nov., 1897.

5421. *Mr. Abigail.*] You know Constable Lambert? Yes.
5422. You have seen him nearly every day? Yes.
5423. You have done so during the last seven years? Between seven and eight years.
5424. From your observation of him and from official experience of him as one of his senior officers, what opinion have you formed of him as a man of truth?
5425. *Mr. Bull.*] I object to that because his *Worship* has long ago said that he does not want people's opinions.
5426. *His Worship.*] Have you any reason from your experience of him to doubt his word? No, I have not. I think he is a very sober, steady, clean, truthful man, so far as I know.
5427. *Mr. Abigail.*] Is he a straightforward officer? I believe he is, and attentive to his duties.
5428. Is he a man who goes straight? Yes.
5429. And a man against whom there has never been any suspicion of dishonesty? I never heard of it.
5430. Nor any suspicion of perjury? I have never heard of it.
5431. Nor any suspicion of burglary? I never heard of it.
5432. *His Worship.*] Have you any reason to doubt Senior-constable Quelch's word? No.
5433. You have no reason, from what you know personally, to doubt the word of either of them? No.

Senior-constable J. Ingram was called and sworn:—

Senior-
constable
J. Ingram.
5 Nov., 1897.

5434. *His Worship.*] What is your name? John Ingram.
5435. And you are a senior-constable of police stationed at Redfern? Yes.
5436. *Mr. Abigail.*] How many years have you been in the Force? Eighteen years in this service on the 4th of January next.
5437. How many years stationed at Redfern? Ten years the 20th of next January.
5438. So you have been there longer than Quelch? No, he was at Redfern before me.
5439. You are a senior-constable of longer standing than Quelch? Yes.
5440. You are his senior by length of service? Yes?
5441. Do you know Constable Lambert? Yes, I do.
5442. Do you know him well? Yes, I was at the station before him.
5443. Has he been under your command? Yes.

5444.

- Senior-constable J. Ingram.
5 Nov., 1897.
5444. Have you had ample opportunity of observing the kind of man he is? Yes.
5445. Have you ever had any reason to doubt his word? No, I have never doubted his veracity at any time.
5446. Has he the reputation, and is it within your own experience that he is a straightforward, straight-going man? Yes.
5447. Is he a truthful man? Yes; I may say I have had occasion to report him twice during the time he has been on the station.
5448. Notwithstanding that, you say he is a truthful, straight-going, straightforward man? Yes I do.
5449. Have you ever reported Quelch? Yes.
5450. How many times? I have reported him once or twice.
5451. *His Worship.*] What for? I reported him once for not working his beat.
5452. *Mr. Abigail.*] Anything else? Well, I had occasion to speak to Mr. Potter several times about him.
5453. What about? About irregularities in the working of his ground.
5454. Is that his beat? Yes.
5455. Was he not on duty when he should have been according to the routes? I could not find him.
5456. So that he must have been absent if you could not find him? Yes.
5457. It was your duty to find him? Yes.
5458. And in the discharge of your duty you industriously endeavoured to find him? Yes.
5459. And you did not find him and immediately reported it? Yes.
5460. And what followed the report? He was punished.
5461. What was the punishment? I think he was fined half day's pay.
5462. That was when Redfern was put in No. 2 Division? Oh, no.
5463. *His Worship.*] He was not a senior-constable then? No, he had not a stripe on his arm.
5464. *Mr. Bull.*] You say that he was once punished for neglect of duty on a complaint made by you? Yes.
5465. You reported him twice? Yes.
5466. The first time he made an explanation, did he not? To Mr. Potter, yes.
5467. And Mr. Potter was satisfied? Yes, I think so.
5468. Mr. Potter took his statement notwithstanding that you made a complaint? Yes, I believe so.
5469. Mr. Potter believed the statement that he made? I presume he did.
5470. Or else he would have been punished? I suppose so.
5471. Do you not know that you made a charge that he was not on a particular portion of the beat, and he produced an alderman of the particular municipality or ward to show that he was working his beat, and was in conversation with him at a certain time? I do not know that.
5472. At any rate he satisfied Mr. Potter? I suppose he did.
5473. You would not accuse Mr. Potter of favouring him rather than you? No.
5474. In fact you all hold Mr. Potter up as quite the model of an inspector? Yes, I do.
5475. You all hold a very high opinion of Mr. Potter? Yes.
5476. This complaint that you made was when he was an ordinary common constable? Yes.
5477. Is there any jealousy from you to him now? Not the slightest.
5478. And the matter that you speak of is certainly eight or nine years ago? Yes, it is all that.
5479. Quelch, as a fact, is a very active man? Yes.
5480. As a fact he has succeeded in getting more convictions at Redfern than any other man? I could not say that.
5481. Will you tell us this: how many times have you prosecuted, or have you informed in prosecutions, against publicans, securing convictions, since you have been in the Redfern Division? I have not prosecuted in any case except two.
5482. So that, as a fact, you have not been chosen by the inspector to do special duty so far as public-houses are concerned? I have not.
5483. You know that Quelch has? I do not know that.
5484. Do you not know that Quelch and Senior-serjeant Vane have to all intents and purposes been the only two officers? They have been thrown together.
5485. Those are the only two who have done special duty so far as publicans are concerned? That is not so, there are more than that.
5486. Just mention the names? Senior-serjeant Bell, and several other constables he takes with him from time to time.
5487. But we have it from Senior-serjeant Bell that he never does duty after 3 in the morning. That is true, I suppose? I know that perfectly well.
5488. And I suppose you do know that the generality of charges against the publicans out there is selling drink in public in prohibited hours, and that is principally before 6? Yes, and on Sundays.
5489. Do you remember at the time of the Butler craze here? Yes.
5490. Was not Quelch, as a fact, specially chosen by the Department and placed in charge of ten or eleven men to go up to the mountains during that craze? I did not know that; I know he was away.
5491. You do not seem to interest yourself very much in the whereabouts of your fellow officers? No.
5492. You have no feeling against Quelch? No, not the slightest.
5493. And you have no bad opinion about him? No. He is a man I do not associate very much with.
5494. *His Worship.*] You are not friendly with him? I never had any words with him.
5495. Have you any reason to doubt his word any more than Lambert's? Yes, I have.
5496. For what reason? I was in a publican's case with him on one occasion, and he got over the fence himself, opened the gate, and we went in between 2 and 3 o'clock in the morning. We caught the publican. He asked me not to tell Mr. Potter that he got over the gate, as Mr. Potter did not like that sort of thing.
5497. *Mr. Bull.*] But he did not tell you to tell a lie about it? Certainly he did. He told me not to tell Mr. Potter that he got over the gate.
5498. What age are you? Forty-five years of age.
5499. Old enough to know better. Did you actually put him over the fence? I did not—no; he got over the fence himself.
5500. And you saw him get over? Yes, I did see him; and I made no secret about it.
5501. *His Worship.*] What evidence was given in the case? The case broke down; but not on that point.

Senior-
serjeant
J. Ingram.
5 Nov., 1897

5502. Was evidence given that he did get over the fence? No, it was never asked; and I told him I would not be a party to telling a falsehood.
5503. *Mr. Bull.*] What you say was that Quelch asked you not to let Inspector Potter know that he had got over? Yes.
5504. That is the only instance? That is the only instance.
5505. He told you not to tell Inspector Potter that he got over the fence? Yes, and that would have to be sworn to in the court. If we told Mr. Potter that, it would come out in examination.
5506. Did you tell Mr. Potter that he had got over the fence? I did.
5507. Then I suppose if you had been asked on oath you would have sworn to it? I would.
5508. Did you? No, I was never asked. The case broke down.
5509. *His Worship.*] Then Mr. Potter was aware of it? Yes, from me.
5510. Did you tell him that Quelch had told you not to tell him? No, I did not.
5511. *Mr. Bull.*] And Mr. Potter never asked the question of Quelch? I do not know. I was not in the court.
5512. Have you not, just a while ago, said that fact never came out in court? I said the case broke down.
5513. Did not you say the case broke down, but not on that point; it was never raised? I believe that is a fact, too.
5514. Can you tell us how the case broke down? I do not recollect exactly.
5515. You must know? I was not in the court.
5516. You must know why it broke down, surely Mr. Potter told you. He had charge of the matter, he must have told you why you were not wanted as a witness? The information was wrongly laid; it broke down on a mere technicality.
5517. In fact you made the blunder? You gave the information authorising the laying of the information? No doubt.
5518. And it turned out that the information you had given was mistaken? Very likely.
5519. Wrong? The information was wrongly laid.
5520. You know nothing else against Quelch? No, that is the only instance.
5521. Except that you do not speak to him? Only on police duty.
5522. Nor associate with him? No.
5523. *Mr. Abigail.*] He is not a man who is generally associated with by his brother officers? No, I do not think so.
5524. There are only a few of the officers who are on speaking terms with him? I believe that is so.
5525. *Mr. Bull.*] Can you tell me when that was? No, I forget the date.
5526. Can you tell me the name of the publican? The "Hereford Hotel."
5527. *His Worship.*] When he went over the fence did he obtain entrance to the hotel? He opened the gate and we walked in together.
5528. *Mr. Bull.*] You were satisfied, as a senior-constable, that an offence was in the act of commission? Yes.
5529. And you had authority to enter the place? I had no authority.
5530. But you did enter? I did. It was a very bad house.
5531. It was very badly kept? Yes.
5532. *Mr. Abigail.*] Neither you nor Quelch were authorised to enter the house under the Licensing Act? No.
5533. *Mr. Bull.*] You did not give him a leg over? No.
5534. You will admit that you never told Mr. Potter? No.
5535. If he had told that to Mr. Potter, is there the slightest doubt that Mr. Potter would not have laid the information at all. This man had no right to enter there, Quelch had no right to enter there, Quelch was doing duty under his superior officer, and he admits that that was the way entrance was got into the place by himself.
5536. *Mr. Abigail.*] He said he told Mr. Potter. (*To the witness*): Did you not say that you told Mr. Potter that you had got in that way? Yes. But not that Quelch requested me not to tell him.
5537. *Mr. Bull.*] I suppose you told Mr. Potter that you found the gate open? No, I did not.
5538. *Mr. Abigail.*] You told him the truth? Yes.
5539. The whole truth? Yes.
5540. *His Worship.*] Were you a senior-constable at the time? Yes.
5541. Had you authority to enter? No.
5542. Neither of you had? No.
5543. *Mr. Abigail.*] And the information was technically incorrect? Yes.
5544. And upon Quelch's evidence it was withdrawn? There was a technicality, and it broke down.
5545. I suppose there was an attorney appearing for the defence? Yes.
5546. And after Quelch gave evidence the point was taken, and the information either withdrawn or dismissed? Yes.
5547. You did not have an opportunity of going into the witness-box? I was not in the box at all.
5548. And you were outside the court during the hearing? Yes.
5549. *His Worship.*] That is the only reason you give for doubting his word? Yes.
5550. *Mr. Abigail.*] You have lost confidence in him? That was sufficient to make you, as between man and man, lose confidence in Quelch? As a truthful man, yes.
5551. *Mr. Bull.*] Do you think he would be capable of committing a burglary?
5552. *Mr. Abigail.*] I object to these questions.

Senior-constable P. Corcoran was called and sworn:—

5553. *His Worship.*] What is your name? Patrick Corcoran.
5554. And you are a senior-constable at the Redfern Police Station? Yes.
5555. *Mr. Abigail.*] How long have you been a senior-constable? About four years.
5556. Do you know Constable Lambert? Yes.
5557. How many years have you been stationed at Redfern? About nine or ten.

Senior-
constable
P. Corcoran.
5 Nov., 1897

- Senior-constable P. Corcoran.
5 Nov., 1897.
5558. How many years have you been in the Force? Fifteen.
5559. So that you have been stationed at Redfern all the time that Lambert has been there, because he has been there seven years? Yes.
5560. Have you had an opportunity of observing his conduct as a constable? Yes.
5561. And as a man? Yes.
5562. Have you ever had any reason to doubt his word? No.
5563. Is he a truthful man from your experience? As far as I know.
5564. And is he a straight-going, straightforward officer? Yes; he is a steady, respectable man, as far as I know.
5565. Not a man who would be capable of doing a mean or dirty act against a brother officer? Not that I am aware of.
5566. *Mr. Bull.*] If I remember rightly, you and Quelch were promoted on the same day? Yes.
5567. Put in double harness as senior-constables? Yes.
5568. I suppose you have always worked cordially and agreeably with Quelch? Yes, always.
5569. And I suppose, having given Mr. Lambert a good character, you could say the same thing of Quelch? I could not say anything against him. I have never had any cause.
5570. Then you speak as highly of both persons? Yes.
5571. *Mr. Abigail.*] But you have had Lambert more immediately under your observation and experience? I cannot say.
5572. As a constable, you would have him more under your observation—more than a senior-constable? Well, yes, perhaps.
5573. *Mr. Bull.*] Having been promoted to the position of senior-constable, would not you be brought into contact with your equal officer, Quelch, more often than you would with Lambert? Well, I have been working with him on both night and day duty.
5574. Whilst Lambert would be on his beats anywhere? That is correct.
5575. Would not you, as a matter of actual official police duty, see more of Quelch, and be more in his company than the other man? I would be with him more, certainly.
5576. I suppose you do patrol, just the same as all the superior officers? Yes.
5577. You are a non-commissioned officer? Yes.
5578. *His Worship.*] Did you ever hear anything of this insinuation against Quelch before this inquiry commenced or was published in *Truth*? I did not until quite recently, and I never heard anything until what I saw in the paper, and it was spoken of between us.
5579. You never heard the other police talking about it? No.
5580. Do you know anything about what Lambert said about the Pogson matter? What I did hear was indirectly.
5581. Did Lambert ever speak to you about it? No.
5582. You do not know that no official report was ever made by Lambert in the matter? No, I do not.
5583. *Mr. Abigail.*] Not that he reported it to Kidd in the station? Not that I am aware of.
5584. You would not interest yourself in it. It was not on your beat, was it? It would not be part of his duty to talk to all the senior officers in the Force about it? When a constable is under the command of a senior-constable, and he hears or sees something which he subsequently has to report, to whom should he report it, to every senior-constable in the Force, or to the officer in charge of the station? To the senior-constable over him on the section, and afterwards to the officer at the station.
5585. That is exactly what he did; but it would not be his duty afterwards to go round and gossip about these things to other senior constables? No.
5586. In fact he would be guilty of impertinence, would he not, if he did it? Would not he be reprimanded for his gossiping propensities? I do not understand why he should go round and discuss it with others.
5587. Is this a fact, that Senior-constable Shaw said to you that he thought it very unfair that he should be asked to take upon himself the blame of certain things in order to screen Quelch? No, it is not so, sir.
5588. Did he say anything like that. I want to know whether there was ever any conversation between you and Shaw which was to the effect that he had been asked to take the blame of certain things in order to screen Quelch? Certainly not. Of course we at different times talked.
5589. Did not Shaw say to you that he felt aggrieved or hurt that he was being dragged into this matter? He never said anything like that.
5590. What did he say? He always deplored that it ever occurred.
5591. What occurred? The fact of him or anyone else being dragged into this inquiry.
5592. How did he say he was being dragged into it? I could not say.
5593. This conversation took place before this Court sat? Yes; but it was a very trivial conversation. It was in anticipation of being dragged into it.
5594. Did he tell you what evidence he thought he would have to give? No.
5595. How could he tell you that he was being dragged into it? The fact of being on station duty, of being station serjeant—of course he would naturally come more in contact with the men than the senior-constable on the street.
5596. Did not he do this: did he not say to you that he had been asked to take some blame on his shoulders which certainly belonged properly to Quelch? No, sir. He never did.
5597. *Mr. Bull.*] If such a thing was ever mentioned to you, you are not likely to forget it? No.
5598. *Mr. Abigail.*] Have you not told somebody at the station that he did say so? No, sir; I have not.
5599. *Mr. Bull.*] Have you ever told anybody anything of the purport that my friend has been asking you: that Mr. Shaw had said that he was very much annoyed indeed, that he had been asked to take upon his shoulders some misconduct of Quelch's? Nothing of the kind.
5600. Neither said nor insinuated? No.
5601. But is not this really and actually what you mean: that Shaw had expressed his dissatisfaction that the station, meaning the institution as a police station, was being brought into investigation or inquiry? Yes; that is what he really meant.
5602. *His Worship.*] I suppose everybody naturally was talking about the matter at the station? Yes.
5603. *Mr. Abigail.*] I want to recall Lambert as to a conversation he had with Kidd after he left the box yesterday.

5604. *Mr. Bull.*] I object to that. I submit that this investigation will simply be interminable if my friend is allowed to call witnesses back who, after they have given evidence, gossip and talk outside to one another.

Senior-
constable
P. Corcoran.
5 Nov., 1897.

5605. *Mr. Abigail.*] My friend has not stated it truly at all. I propose to call, amongst others, Lambert to prove that after Kidd left the box yesterday he met Lambert, and they had a conversation, and he distinctly told Lambert something which I think your Worship ought to be told, which discounts a portion of his evidence on a most material point. Surely that is a proper thing to put before the Court.

5606. *His Worship.*] The only part of his evidence that affects the case is that Lambert did say something about a bag and a parcel being outside.

5607. *Mr. Bull.*] That is not Kidd's evidence. It is that he said that there was a bag there ready to be taken away near the door, but he did not say it was outside.

5608. *His Worship.*] I decline to hear any further evidence from Kidd and Lambert on that matter.

[The Commission then adjourned until Wednesday, 10th of November, 1897, at 10 a.m.]

WEDNESDAY, 10 NOVEMBER, 1897.

[The Commission resumed its sittings at 10 a.m., at the Central Police Court.]

Present:—

MR. WHITTINGDALE JOHNSON, S.M. (SOLE COMMISSIONER).

Mr. J. R. Dacey, M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, Solicitor, appeared in support of the charges on behalf of Mr. J. R. Dacey, M.L.A.;
Mr. C. Bull, M.L.A., Solicitor, appeared on behalf of Senior-constable W. E. Quelch.

Charge No. 7 (continued)—

Mr. Bull.] I should like to recall Quelch for a moment with regard to Ingram's evidence. Ingram gave evidence with regard to some request of Quelch's to him not to mention to Inspector Potter that he had given him a leg over the fence. Ingram said that the case went on and Quelch gave evidence but that Ingram himself did not, and it was on Quelch's evidence that the case was dismissed. I have the papers to show that no evidence was given by anybody, and that all the informations were withdrawn and that Ingram laid the informations himself.

Mr. Abigail.] Ingram said that he was not in Court and was not called.

Mr. Bull.] He said that Quelch had given evidence in the case and the case was dismissed.

Senior-constable W. E. Quelch was recalled:—

5609. *Mr. Bull.*] You heard Senior-constable Ingram speak with regard to some matter affecting what hotel? The "Hereford Arms Hotel" kept by Thomas Harris.

Senior-
constable
W. E. Quelch.
10 Nov., 1897.

5610. You heard him say that you had asked him not to mention to Inspector Potter some circumstance with regard to getting over the fences? I never did anything of the sort.

5611. *His Worship.*] Did you get over the fence? I got over with the assistance of Senior-constable Ingram.

5612. *Mr. Abigail.*] I want Ingram called.

5613. *His Worship.*] I am not going to call him; there has been quite enough about it.

5614. *Mr. Bull.*] Did you as a fact ask Ingram to do that? No. That was about 11.15 p.m.

5615. You have a copy of the application by Ingram for a summons? Yes, against the publican and the three men for drinking.

5616. *His Worship.*] You say you did not ask him not to mention that fact? No.

5617. In fact you were helped over? Yes.

5618. You opened the gate to allow him to enter? Yes, and he walked straight into the bar. If he had mentioned such a circumstance to Mr. Potter the summons would never have been issued.

5619. *Mr. Abigail.*] Did Mr. Potter ever speak to you about this matter? Never mentioned a word to me.

5620. Have not you and Ingram been on strained relations ever since he alleges this occurrence took place? I do not know that I have spoken to the man only in connection with my duties.

5621. You were perfectly friendly up to this time, but, excepting matters of duty, have never spoken to each other since? No; he to me nor I to him.

5622. Did you know he had made a complaint to Potter? I did not.

5623. Well then, what was the reason of these strained relations? He reported me.

5624. To whom? To Inspector Potter, and I proved that his report was false.

5625. *His Worship.*] What report? He reported me for not working a portion of my beat.

5626. *Mr. Abigail.*] That was after this occurrence? No.

5627. But you admit that you were perfectly friendly at the time of this occurrence? No; I was simply on the beat, and he took me as my senior officer to try and catch this publican.

5628. But why did not you report him to Inspector Potter for assisting you over the fences? No; I have seen too much of reporting senior officers.

5629. Was it not your duty? No.

5630. It was not your duty when you knew it was wrong to have reported it to your senior officer? No; I had no witnesses.

5631. What did you mean just now when you said no, you would not report your senior officer, you had seen too much of that, unless you had witnesses? I have seen too much of constables reporting their superior officers because the constable has been single-handed.

5632. And wherever the constable has been single-handed in his report the senior officer has always won? Not in all cases.

5633. It was sufficient to strike terror into your heart? Yes.

5634. The usual luck of the subordinate officer reporting his senior was sufficient to deter you from doing your duty? Most decidedly.

5635.

- Senior-constable W. E. Quelch.
10 Nov., 1897.
5635. Is it not a fact that in every case where these other men have wanted to make a complaint against you they were similarly deterred, having in view the fate which invariably attended the report of a senior by a subordinate? There is a difference between reporting a thing in writing and reporting a thing at the station to be entered in the books.
5636. You admit that the result is the same? No. It is different to report a senior-constable officially to reporting in the book.
5637. You are not at all surprised now, are you, in the light of your own evidence in answer to my question just now, that Lambert felt it rather an unpleasant and delicate matter to report you over this Pogson's shop affair? He had no occasion to report me over that. His duty was to report the circumstances that took place, not to report me.
5638. Assuming that he saw all that he alleges that he saw, you will admit that it was an extremely delicate position for a subordinate to find himself in to have to report circumstances which would reflect discredit upon you? Not at all, because there were three of his superior officers in his presence five minutes afterwards.
5639. Not at the time? Five minutes afterwards he was in the presence of three.

Charges Nos. 8 and 9.

"That, about six months ago, Constable Hill, when on duty in the Botany Road, saw a man crossing the road in a slouch hat, and with a bag of something on his back. Hill approached the man, and was astonished to find that it was his senior officer, Quelch, who said, 'Its all right, Hill, I have been getting some sand for my canaries.'"

Constable Edmund Hill was called and sworn:—

- Constable Edmund Hill.
10 Nov., 1897.
5640. *His Worship.*] What is your name? Edmund Hill.
5641. What are you? Ordinary constable, stationed at Redfern.
5642. *Mr. Abigail.*] I call now for a report, if your Worship pleases, by Constable Hill, with reference to this case, and all the replies and minutes appertaining to it. [*Exhibit No. 30.*]
5643. Just take your memory back to about 4:20 a.m., on the 16th February last. Were you in Regent-street Yes.
5644. And were you in conversation with Constable Whitehair? Yes.
5645. And he was on the opposite side of the street. Yes.
5646. And you were talking across the street? Yes.
5647. Did you see Quelch in the vicinity? Yes.
5648. Where was he? He came from behind where I was standing.
5649. Where were you standing—outside whose premises? Outside a vacant allotment of land.
5650. And he came from behind you? Yes.
5651. So that he came through the vacant allotment of land? Yes.
5652. What would be the street at the rear of this vacant allotment of land through which he would have to come to get into this vacant allotment of land? Spence's-lane.
5653. And he would have to come down Spence's-lane and cross the vacant allotment? Yes.
5654. He was on the footpath when you first saw him? Yes, I heard footsteps behind me.
5655. What did you see? I saw a man with a bag on his back.
5656. You saw Quelch? Yes.
5657. How was he dressed? He was not in uniform. He had a grey slouch hat on and a sort of thing a sailor wears.
5658. Like a sailor's jumper? Yes.
5659. What did he have on his back? He had a bag on his back.
5660. Did he say anything to you? Before I recognised him, when I first saw him, I said, "Hullo, what have you got in the bag?" I recognised him as I spoke.
5661. What did he say? He said, "It is all right, I have been getting some sand for my canaries."
5662. Did you know that he kept canaries at that time? I believe he did.
5663. What did Quelch do? He let the bag fall on the footpath.
5664. What sort of a bag was it? Like a chaff bag, like an ordinary bag used for chaff.
5665. Did you have any conversation with him? He told me that he had got a man on the railway to fill up two small bags of sand, and he had put them in this bag to take them home.
5666. The railway premises would be at the rear? It is all along at the rear both ways.
[*Mr. Abigail produced a map of the locality, Exhibit No. 31.*]
5667. The railway premises would be here [*pointing*]? There.
5668. And which is Spence's-lane? This.
5669. There are two ways of getting from the railway to Botany Road, are there not—right down Margaret-street and through this lane, Spence's-lane, and right across Botany Road? Yes.
5670. And then the other way is through Garden-street, right across and up Boundary-lane, across Wyndham street, and up the continuation of Boundary-street, and then through Spence's-lane, and right up through that vacant allotment? Yes.
5671. You know where Quelch lives? Yes.
5672. He lives over here, does he not, in George-street? Yes.
5673. This is Quelch's house? Yes.
5674. And now, if he wanted sand for his canaries, is there not a sand-hill there within a few hundred yards of his house? Yes, within a hundred yards.
5675. And if he got the sand from where he says he got it—from the railway—he would have to go all this way, and up to the station, instead of just across there, which would only take him five minutes.
5676. Would it not take a man at least three-quarters of an hour to go in the direction from which you saw him come, and right along the by-lanes, and through these short cuts, as they are called, which are always the longest way round, and across this vacant allotment? No, not that long.
5677. How long? I should say nearly half an hour.

5678. And it would only take him a few minutes to go to this sand-hill, which is near his own house? Yes, about twenty minutes, I should think. Constable Edmund Hill.
5679. While you were in conversation with Quelch, did Whitehair leave you? Yes, he went up the road. 10 Nov., 1897.
5680. Did Quelch ask you to assist him to carry this bag across the road? He did.
5681. Was it heavy? It was pretty heavy—I should say it was a good hundredweight in weight. It was heavy enough for him to ask me to help him.
5682. You were satisfied, were you not, at the time that it was sand for his canaries? Yes, I believed it was sand at the time.
5683. Will you tell me what other conversation you had with him? Did you have any with him as you were carrying the bag across the road? No, not then; I saw him next night.
5684. You left him when you got across the road, did you not? Yes.
5685. He went in the direction of his home, and you continued along Regent-street to Botany Road? Yes.
5686. Along your beat? Yes.
5687. Did you meet Brewin? When I got to the corner of Boundary-street, which would be about 30 or 40 yards further on, I saw Brewin, and a man working at Jones' produce store, Bath. I did not speak to them about it.
5688. They were talking together? Yes, and I went by.
5689. You hurried past? Yes.
5690. And did you again see Quelch later on, early in the morning? Yes.
5691. At what time? I saw him when I was coming round my beat, coming up the last time in Cornwallis-street.
5692. What time? About half-past 5, and I saw him at 6.
5693. Was he then in uniform? Yes, he took the relief off duty that morning.
5694. Was he, or should he have been, on duty at the time that you saw him disguised in the slouch hat, and the jumper, and carrying these bags of sand as he alleges? Unless he was doing some special duty he should have been in uniform.
5695. This is the Duty Book, is it not, for Tuesday, 16th February, 1897? Yes.
5696. Do you see an entry in the Duty Book of Tuesday, 16th of February last, showing that Quelch was supposed to be on duty, and in charge of the relief from 12 to 6 a.m., and from 10 to 12 p.m.? Yes, 10 to 12 p.m. would be the same day, but the night following.
5697. Then from what you see recorded in the Duty Book, Quelch had no right to be dressed as he was, and carrying sand for canaries, or for any other purpose? He had no right to be carrying sand.
5698. And no entry is made of that in the Duty Book? No.
5699. And had he been relieved from duty for the purpose of carrying sand or doing anything else it would have been entered up in the Duty Book? Yes.
5700. And would it not have been shown who else had taken up the relief? Yes, if it had been taken up.
5701. And you see nothing about that here? No.
5702. I will put this book in. (*To the witness*): Now, you had a conversation the following night with Constable Fitzgerald? Not with Constable Fitzgerald. I remember I had another conversation with Senior-constable Quelch.
5703. Tell us what that conversation was? Amongst other things, he spoke jokingly about Constable Fitzgerald having reported to him that morning, or the morning before, when he went off, that Constable Fitzgerald had told him that a man working at Jones' produce store had seen two men cross the road carrying a bag. Senior-constable Quelch was laughing about this, and, amongst other things, speaking about the canaries, he said if I liked he would give me a canary. He offered it two or three times afterwards before I did take it. Eventually I did take it. Two or three days afterwards I went round and he gave me a canary.
5704. Now, about 5 p.m. on the 18th of August last, did Quelch call upon you? Yes.
5705. At your house? Yes.
5706. Did he say anything to you? Yes.
5707. Tell his Worship what it was? The first thing he said when I came to him was: "Did you tell anybody about that bag of sand?" I said, "I did." He said, "I always thought you were a friend of mine?" I said, "Well, that has nothing to do with it." He said, "If you are asked, if you should be asked about this, say it was a morning when I went off early." I said, "Constable Whitehair knows you did not go off early; besides, how were we to know you were not on some special duty?" I did not want to tell any lies about him. He could do that himself. He said, "Whitehair did not see us cross the road together." I said, "No, but he saw you on the vacant allotment and spoke to me; and, although he did not see you cross the road, he asked me afterwards who was the man with the bag, and I told him it was you."
5708. That was the day after Mr. Dacey's speech in Parliament? It was some time after. I do not know for certain what day it was.
5709. Mr. Dacey spoke on the 17th of August? Then it would be the day after.
5710. It was reported in the paper on the morning of the 18th instant, and he came to see you at 5 p.m. on the same day? Yes; we were on night duty together and he could have seen me on night duty.
5711. And from the time that he had given you the canary had either of you ever spoken of the occurrence. From the time that you saw Quelch carrying sand you had never spoken to each other about it except the occurrence when he gave you the canary and the joking remarks which Quelch made to you about Fitzgerald? Yes.
5712. So that for all those months he never said anything to you until the report of Mr. Dacey's indictment appeared in the paper? No, I never remember any.
5713. And then he came to your house, you did not go to him? No.
5714. Did you afterwards think it advisable to send in a report about the occurrence? The following morning I reported it in the station to Serjeant Houlahan and Senior-constable Shaw. They were together. I was very loth to be mixed up in it. I did not know what to do and I spoke to them about it.
5715. And in consequence of their advice you sent in a report? Yes.
5716. You merely reported this. [*Exhibit No. 30.*] "Constable Hill respectfully begs to report for the information of his Superintendent that about 5 p.m., the 18th instant, Senior-constable Quelch called at his residence and asked him in the event of the constable being questioned regarding a certain matter which the senior-constable anticipated would be the subject of a future inquiry, to make certain false statements to shield the senior-constable?" That is the report you made? Yes. 5717

Constable
Edmund Hill.
10 Nov., 1897.

5717. And "The facts in question were as follows :—That about 4.20 a.m. on February the 16th, 1897, the constable met Senior-constable Quelch in plain clothes, coming from a vacant allotment on to the Botany Road, carrying a sack which he said contained sand ; the senior was in sole charge of the division at the time, and at 6 a.m. he was in uniform and took the relief off duty. Constable Whitehair, who was directly opposite, saw the constable stop Senior-constable Quelch. When the senior-constable called at the constable's house he asked him to say, if he was questioned about this matter, that he, Senior-constable Quelch, was off duty at the time, which would be telling a deliberate lie. And he added, ' If you will stick to me I will stick to you ; say this for me, Ted.' Under the circumstances the constable considers it his duty to acquaint the Superintendent of these facts. Edmund Masham Hill, constable, No. 5426." Now this was forwarded to Mr. Read, and by Mr. Read forwarded back to Mr. Lawless. I want Quelch's report on that.

5718. *Mr. Bull.*] There was no explanation of that asked for.

5719. *Mr. Abigail.*] "Forwarded to the Superintendent, I was not previously made aware of this matter. E. Lawless, Inspector, 21/8/97." "Forwarded to Mr. Lawless for Senior-constable Quelch's explanation in writing. G. Read, Superintendent, 21/8/97." Mr. Lawless informs me that he has just obtained that paper from Superintendent Read's office, and that it has never gone out to Redfern for an explanation by Quelch. Seeing that an inquiry was about to be held, the Superintendent held the matter back. (*To the witness*) : Did Superintendent Read send for you when you made that report? Yes, he sent for me—on the following day, I think it was.

5720. You say Superintendent Read, after you sent in that report, sent for you? Yes.

5721. Did you have any conversation with him? Yes.

5722. From the railway works to this vacant allotment out of which Quelch came on the night of the 16th February is how far? To his residence?

5723. From the locality where this sand is alleged to have been obtained by Quelch on that night to his house would be how far? A good quarter of a mile.

5724. And you have to go down by-ways and lanes, have you not. It is a most circuitous route? It is not as straight as it might be.

5725. And you know that he has to go through rights-of-way and through gates, and all that sort of thing? It is not quite as straight as it might be.

5726. And it would be more difficult to carry a bag down those rights-of-way than through any ordinary street? It would be easier to carry it down the main street.

5727. From Quelch's house to the sandhill near the school is only a minute's walk? Yes. They have been carting away sand from there for some time.

5728. Do you know Mrs. Robinson? Yes.

5729. Does she live opposite the Police Station? She does.

5730. Has she had a conversation with you about an alleged conversation? I have not spoken to her.

5731. Do you know these localities, the sandhill in Margaret-street and this sandhill here? Yes.

5732. Is the sand at the end of Margaret-street on the railway premises clean or dirty? Very dirty.

5733. Is that sand at the sandhill near Quelch's house clean or dirty? That is clean, because the people are carting it away.

5734. When you picked this bag up, this chaff-bag, in which Quelch said there were two smaller bags of sand, did it appear to have the same weight as two small 70 lb. sugar bags? I should say it would be fully 1 cwt.

5735. Will you show me along this route on this map where Pogson's shop is? Yes.

5736. You see Pogson's store is marked "A"? Yes.

5737. If, as I allege, for the purposes of this prosecution, this sand was sugar and obtained from Pogson's store, would Quelch have come along Spence's lane or right along here, and got through that vacant allotment? Yes; he could come that way. It is a dark lane.

5738. Of course, as he says that he got the sand from the railway premises at the end of Margaret-street, that would be in a different direction from Pogson's? An opposite direction.

5739. And he would only come down Spence's-lane in an entirely different direction from what he would if he were coming along the lane from Pogson's store? Directly opposite.

5740. And he would still come through this vacant allotment? Yes.

5741. But if he were coming from Pogson's store along Spence's-lane to get on to that vacant allotment he would have to cross Boundary-street? Yes.

5742. Now, if he were coming from the bottom of Margaret-street, in the way that he alleges he came, he would not cross Boundary-street? No; he would not come within 20 or 30 yards of Boundary-street.

5743. *Mr. Bull.*] This, you say, was on the morning of the 16th of February? Yes.

5744. How did you fix that date? Because I noted it down, and so did Constable Whitehair.

5745. What did you note it down upon? On a slip of paper.

5746. Have you got the slip of paper? No; I have not.

5747. Did you in any conversation with different persons say that you could not fix the date? Never.

5748. Did you ever tell Quelch, for instance, that you did not remember the morning, and you could not fix the date? No.

5749. And that that was the only doubt you had? I have no doubt about it. He never spoke to me about it until he came to my house and tried to make me tell a lie. He has dragged me into this, and tried to make me tell a lie. It is very unpleasant.

5750. Did not you tell anybody that at the time you had no doubt it was sand? Yes.

5751. Have you any doubt in the world that it was sand? I have doubts now, since I have been to Mr. Read's office.

5752. Since you have been speaking to Mr. Dacey? No. I can give you my reason for the doubt.

5753. *Mr. Abigail.*] Let us have the reason.

5754. *Mr. Bull.*] Answer my question. You never had any doubt that it was sand until this inquiry began or until something was said in August last? Yes, until something was said by Bath at Jones' store.

5755. Did you not tell Robinson that it was sand? I told him I believed it was sand.

5756. Did not you tell him that you felt the bag and you knew it was sand? Certainly, I felt it and I believed it was sand.

5757. Will you swear you did or did not tell him you had no doubt it was sand? I might have. I do not remember having any particular conversation with Mr. Robinson more than anyone else. 5758.

Constable
Edmund Hill.
10 Nov., 1897.

5758. I suppose it was quite daylight that morning? It was dark that morning.
5759. Dark? About twenty minutes past 4.
5760. Nobody could detect anybody at a distance of 3 or 4 yards? There is an electric light just opposite where I was standing.
5761. Dark at twenty minutes past 4 on the 16th February? Yes.
5762. Sure of that? Yes, quite sure it was a dark morning.
5763. You actually carried this bag across? Yes.
5764. Did not you suggest to Quelch that it was *infra dig.* to see your superior officer carrying sand? No.
- 5765-6. Anything like that? No. He complained about the weight of the bag, and the pain in his back with carrying it, and asked me to assist him.
5767. Did you put it on your back? We both got hold of it. As far as I could judge it would be about 1 cwt.
5768. And you took it across the road? Yes, into that lane.
5769. I suppose you really know the difference between the feel of sand and sugar? There is not a great difference between two thicknesses of bags. I would not say that I believed it was sugar, but I say I have doubts as to whether it was sand.
5770. Since this inquiry. You know Margaret-street? Yes.
5771. Has not sand accumulated there, washed by the rains and left there? Yes, there is plenty of sand there.
5772. You say that if he were coming from Margaret-street on this morning that you saw him he could come and would be as a fact upon that vacant piece of land if he was resting himself? It would be a little out of his way but not much.
5773. But if he was coming from Margaret-street it would be terribly out of his way to pass Pogson's store? Of course it would.
5774. Have you seen any report, or would you like to take it upon yourself to swear that there is any report from Pogson or anybody referring to Pogson's store that that store was entered on the morning of the 16th of February? I do not know. I have only seen my own report that I sent in.
5775. It would be a likely thing for Mr. Pogson to miss two bags of sugar taken from there? He has informed me that he would not miss it.
5776. Has there been any police complaint or any complaint by Pogson? You asked me if it would be likely that he would miss it.
5777. Has Pogson made any complaint or report? Not that I have heard of.
5778. And you do not know that there is any complaint by Pogson of his store being entered or being found open on the 16th of February? No.
5779. How long have you been in the Force out there? A trifle over ten years.
5780. Have you yourself looked at the Occurrence Books; do you happen to know that there is report after report of Pogson's store being found open and broken into? I have not looked up the books.
5781. Did you ever see this entry in the book? I do not remember seeing any entry in any book.
5782. "Mr. Pogson's place broken into on three occasions during the last three weeks. On the 22nd ultimo and 1st and 3rd instant—and on the first occasion ten shillings' worth of coppers stolen. Not identifiable; no person suspected; 3.45 p.m., 4/3/93. Attended to, Sutherland and Moore." [*Exhibit No. 32.*] You know the meaning of that, do you not—if a complaint is made or a report is made of an offence or of a place being found open, usually certain officers are told off to make inquiry? Yes.
5783. You know Sutherland and Moore? Yes.
5784. They were officers in the Redfern Division? Yes.
5785. Speaking of this sandhill, it is Mr. George Hudson's property? I believe so.
5786. Is it private property? Yes.
5787. Is it fenced? Yes.
5788. And with a barbed wire on top of the fence all round? Yes.
5789. How would you suggest Quelch is to get into that—through the gate? I think every policeman knows Mr. Hudson.
5790. I do not know that? I do.
5791. How would you suggest that Quelch should get into that at 3, 4, or 5 in the morning? Not in the morning, in the daytime I would suggest.
5792. On that particular morning it would be impossible? It would not be a very easy job.
5793. You do not suggest that Quelch had a right to go into Mr. Hudson's property, and take sand out without Mr. Hudson's permission? Certainly not.
5794. The sand which is upon the railway premises is all protected too, is it not, the place is all fenced? It is fenced, but there is a gate leading into the railway.
5795. But you would not suggest that Quelch should go into the railway and take the sand, would you? That is what he told me, that a man in the railway filled it up for him.
5796. Have you got sand from Margaret-street? No.
5797. I suppose you will admit that sand washed by water is infinitely clearer than that which you will get in a bank? I am not an expert on sand.
5798. You do not profess to know that? I suppose it would be cleaner, but I do not think it is very much different.
5799. Do you not know that as a rule 40 per cent. of sand is loam; taking sand out of a hill, digging it out with a spade in its ordinary state, do you not know that 50 per cent. of that would be loam? It would certainly be dirty, I think.
5800. You know Pogson's? Yes.
5801. Do you know Pogson's back premises? Yes.
5802. How would you suggest that a man could get out of that with a hundredweight bag of sugar or sand on his back? He could open the gate from the side and get out.
5803. Unlock it? I do not know that there is a lock on it.
5804. To do all that he would require to have keys of Pogson's store? If it is locked, certainly.
5805. Have you any doubt in the world that Pogson's store is locked every evening after business? Certainly; but you asked about Pogson's back gate. I do not know whether it is locked.

- Constable Edmund Hill.
10 Nov., 1897.
5806. Do you happen to know that Mr. Pogson has described that the back gate is locked on the inside in this inquiry? No.
5807. *Mr. Abigail.*] The back door, not the back gate.
5808. *Mr. Bull.*] Is there a back entrance indicating a means of getting into the back of the premises? Do you not know that everything is taken in at the front, right through to the back, and that there is no means of getting in the back—no gate? There is a gate there; I believe so.
5809. You know the premises. I am asking you? I believe so. Pogson can tell whether there is a gate or not.
5810. You have never, in any report that you made to the Department, insinuated or dared to say that it was sugar and not sand that Quelch was carrying? No; I did not think it was.
5811. I suppose, when you make a report to your superior officer, you go as near the truth as you can get? I tell the whole truth.
5812. So that, if you had any suspicion that it was not sand when you made that report, you would have mentioned it? Certainly.
5813. Would you like to say that this was not the 18th of February? It was not.
5814. How many times have you been in Quelch's place? Only once.
5815. When was that? When I went for the canary.
5816. When was it? It was before the Saturday following.
5817. What day of the week was this that you say you saw him with the sand? The 16th.
5818. I am asking you what day of the week it was? I only had the date down as the 16th; but, by looking at the almanac—Mr. Read asked me that question—by looking at the almanac I know it was Tuesday.
5819. I suppose it often happens, or does it happen, that a man leaves a little earlier, possibly, than it is intended he shall, and he is booked up to a certain hour, when, as a fact, he has not been on duty all that time? I do not think so. It would be a very lax way of doing things.
5820. Do you remember a man named Connors being charged with being drunk and disorderly, in Raglan-street, Alexandria? Yes; I think I do. John Connors, I think, it was.
5821. John Connors? Some name like that.
5822. Do you remember when that was? No.
5823. Do you remember that was on the 10th of August last year? I can remember the time I locked him up was some time before the public-houses close.
5824. Some time before 11 o'clock? Yes.
5825. Now, you would have to attend at Court the next morning; would you not? Yes.
5826. Do you remember, as a fact, what your time of duty was during that night? No; under ordinary circumstances, I should have gone off at 5; but sometimes we are not allowed to go off when there are too many men going off.
5827. Do you remember whether you did go off a little earlier? No; I have not the slightest recollection. I only remember Connors' name because he is a bad larrikin.
5828. Was Quelch your senior on that relief, do you remember? I do not remember.
5829. You do not remember whether, as a fact, you did leave earlier than you should have left that morning whilst you were booked up to 6 o'clock? No.
5830. I suppose if you went off a little earlier you would still report yourself at 6, would you not? You would either go off at 5 and have your hour's allowance or else you would go off at 6.
5831. Do you remember when it was you had the conversation with Robinson? I do not remember.
5832. Did you jot that down? No.
5833. That would be rather an important circumstance? I can tell you when the first conversation that I ever had about it was, after Mr. Dacey's speech.
5834. I am simply asking you if you have a recollection of when it was that you had the conversation with Robinson? I have a recollection of about the time.
5835. Can you tell me what month it was in? It was after this affair cropped up.
5836. After Mr. Dacey had spoken in the House? Yes.
5837. And after the *Truth* newspaper articles, I suppose? Yes; I suppose so.
5838. Was it after Mr. Dacey had had a conversation with you on your beat? No; it was not. Mr. Dacey never spoke to me until weeks and weeks afterwards.
5839. You cannot remember the date you had a conversation with Robinson. Tell me the first time you had a conversation with Dacey? I have no recollection; but it was weeks and weeks afterwards.
5840. You have a recollection, if you will try. Fix the time when you say you first had a conversation with Dacey about this bag of sand? I was off duty for about a fortnight with an injured heel, and I suppose it would be about four or five weeks afterwards.
5841. Can you say when it was when you first had a conversation with Mr. Dacey? About six weeks ago, I should say.
5842. Was that in September or October? Either at the end of September or the beginning of October.
5843. Do you remember that it was on the 23rd of August that you had a conversation with Robinson? It might be about that time. I believe it would be about that time. He was in company with Constable McSweeney, in Regent-street, and I was passing, and he sang out something to me about it. He said, "Oh, you saw Quelch carrying a bag, didn't you?" I told him to mind his own business, or something to that effect.
5844. Do you remember that it was on the 15th of September that Dacey spoke to you on your beat, at 9 o'clock at night? I do not remember the date.
5845. Do you remember his being with you on your beat one night at 9 o'clock? Yes.
5846. Where was that? At the corner of Redfern-street and Regent-street.
5847. Was not that after you had had a conversation with Robinson—long after? It would not be long after.
5848. *His Worship.*] After, at any rate? Yes; I had a conversation with Robinson two or three days after that again, and he called to me, and warned me to go down to Mr. Read's office. He said, "Who told Mr. Dacey?" and I said, "Who told you?" I said, "You asked me about it the other day, and I said to you to mind your own business." He said he did not. I said, "Probably the same person who told you told Mr. Dacey."

Constable
Edmund Hill.
10 Nov., 1897.

5849. *Mr. Bull.*] You have been, as a fact, punished occasionally for neglect of duty? Yes.
5850. And for being drunk? Yes. I have had a clean sheet now for over two years.
5851. I notice the last is the 11th of September, 1895; that was for being under the influence of drink on duty? Yes.
5852. *Mr. Abigail.*] You have taken the pledge and kept it ever since? Yes.
5853. *Mr. Bull.*] Is that so? Yes.
5854. How long since you took the pledge? I can tell you. It was very shortly after —
5855. You see that is a circumstance in your life, having been used to taking a nip, that would impress itself upon your recollection? It was in January two years ago. I left it off when I was reported.
5856. Whilst you were punished in September you really did not take the pledge until the following January, four months afterwards? I left off drinking, but I signed the pledge in January.
5857. And you have kept it ever since? Yes.
5858. But I suppose you will admit that you were fined for being drunk more than once? I was not fined for being drunk that time.
5859. The explanation is that you took too much? I was sent out on a beat — [*Interrupted.*]
5860. I suppose you will admit that you were fined £3 for being drunk on duty? Yes. He said it was for not coming into the station after I was told.
5861. And besides being drunk on duty three times, you were found in hotels when you were on duty? I do not think so.
5862. Have you any reason to question the report of the Superintendent's office? Not the slightest. I was reported for coming out of an hotel after hours. I was not on duty at the time.
5863. On the 17th May, 1889, were you fined 20s. for being found in an hotel when on duty? No; I was off duty. I was in plain clothes. I did not have to go on duty until 6 o'clock the following night. That was on a Friday night, and it was 6 o'clock on Saturday before I had to go on duty again.
5864. Do you say you were not fined 20s. for being in an hotel after hours? It was after 11 o'clock, and I was not on duty.
5865. Do you remember this circumstance: do you remember being asked for, or giving Mr. Lawless a report about these circumstances that you have been speaking of? Yes.
5866. Do you remember omitting any date at all from the report, and Mr. Lawless questioning you with regard to that? No. Mr. Read asked me down there. He thought I had omitted a date, but when he came to look at the report he found the date was not omitted. Mr. Lawless never spoke to me about it at all.
5867. I see in the last complaint in September, it was Senior-constable Hogg who reported you? Yes.
5868. This is the official entry, I may tell you, of that complaint: "Being under the influence of liquor when on duty at 8:45 a.m.; also, insolence and disobedience of orders at 9 a.m." Now that is the official entry against you, and you were fined 20s.? I can explain that. That was about the only case that I was ever unjustly treated in.
5869. Do you deny, as a matter of veracity, that you were charged with being drunk three times when on duty? The second time I was charged with being under the influence of drink, not drunk.
5870. Of course that is another way of putting it? If they can just see signs of drink on a man, or fancy they see it, he is reported. I remember hearing a report, five years ago, being read out to me, "Charged with being under the influence of drink." I did not look at the report; but I remember that was the reading perfectly well, and I know on that occasion Serjeant Vane said to me, "Don't admit being drunk; I do not think you were drunk, and I will tell Mr. Lawless so."
5871. I notice a peculiar distinction between two charges following one another: "May 27th, drunk when on duty," Serjeant Bradwell's report; and the next, "Being under the influence of liquor when on duty," Senior-constable Bourke's report? Yes.
5872. *Mr. Abigail.*] Notwithstanding the black list upon which you have been industriously cross-examined by Mr. Bull, you are still considered by no less an authority than Superintendent Read to be a good enough man to be a policeman? I believe so.
5873. And to be a good enough man to give evidence in cases where you are officially prosecuting? I believe so. I have no reason to doubt otherwise. I know all my officers will give me a good character for efficiency, every one of them. They have told me so.
5874. Had you any reason to doubt that it was sand? You were going to give a reason, and Mr. Bull did not give you a chance. Now give it in answer to me? I never had the slightest reason to doubt that it was anything but sand until after I had been to Mr. Read's office, until the first time I spoke to Henry Bath in the matter.
5875. Henry Bath is the man, is he not, who told you he saw Quelch coming from Boundary-street through Spence's-lane? He told me he saw a man the same morning that he saw me.
5876. And it was the same man he saw you speaking to? He did not know it was I speaking to him at the time.
5877. At any rate, he is the man who says he saw somebody pass Boundary-street from Spence's-lane. Yes, he saw the man come down Spence's-lane from the direction up behind Pogson's shop, behind his hay and corn store, where he puts his horses in every morning directly after 4; and when he came down to Botany Road.
5878. *Mr. Bull.*] I object to this hearsay evidence.
- Witness:* That was the only reason—he told me he came in entirely a different direction to what I had been told.
5879. *Mr. Abigail.*] From what you have since been told by Bath you have a doubt? Yes.
5880. You were perfectly satisfied at the time to believe your senior-constable's word that it was sand? Yes, I believed so.
5881. And you did not critically feel to see whether it was sand or sugar? I did not have any suspicion.
5882. If you had had any suspicion you would in all probability have felt to satisfy your mind whether it was sand or sugar? Yes, and I would certainly have called Constable Whitehair across.
5883. But the question of suspecting your senior-constable at that time did not enter your mind? No, I never spoke to Bath until after I had been to the Superintendent's office.
5884. And you know it is a very dangerous thing to make a complaint against your senior officer unless you have corroborative evidence? Unless you have good grounds.

- Constable Edmund Hill.
10 Nov., 1897.
5885. Do you not know that when a senior-constable reports a constable, the constable is never acquitted of the charge, or very seldom? It is a matter of discipline that the senior-constable's word must be taken.
5886. *Mr. Bull.*] I object to this.
5887. *His Worship.*] It simply comes to this: that when a subordinate officer charges his superior he simply takes the risk of proving his charge.
5888. *Mr. Abigail.*] Hogg was a senior-constable? No.
5889. He was not attached to the Redfern Division when he made this complaint about you? No.
5890. But is it a fact that throughout the service a senior-constable from another district is always on duty so far as the constables are concerned? Yes.
5891. And he reported you for being drunk? Yes.
5892. And you retaliated by calling one or two of the inhabitants on the way up to prove that you were sober? When he first made the charge against me he said, "Come into the station with me." I said, "What for?"
5893. *Mr. Bull.*] I object to this.
5894. *Mr. Abigail.*] You were reported for being drunk? Yes.
5895. You went off to the station with this man? No.
5896. He wanted you to go up with him; instead of going up directly with this Senior-constable Hogg to answer his complaint at the Redfern Station you spoke to one or two of the residents? I appealed to one of the men standing at his shop door step at the time. I said, "This is a Sydney man. He is reporting me for being drunk. I want you to take notice of me as he says I am drunk, and he will say I have sobered up in going to the station." Immediately afterwards I met Senior-constable Bourke. I told him what had happened. He said, "I cannot see anything wrong with you."
5897. *His Worship.*] What was the result? I was fined 20s. Mr. Read did not intend to deal with me in the matter of drink, although it is entered against me.
5898. *Mr. Abigail.*] As a matter of fact, this man, Hogg, when he got you to the station, did not make a charge of drunkenness, but altered the charge to one of insubordination for not going to the station immediately? Serjeant Houlahan said he never said one word about my having used insolent language until he found I was not drunk. I also got a doctor's certificate, and he said he could not even detect drink upon me.
5899. *His Worship.*] Yet you were fined 20s. for being drunk? For insubordination.
5900. *Mr. Abigail.*] You keep canaries, don't you? The first one I had was the one Senior-constable Quelch gave me.
5901. Do you not know that you can buy 28 lb. of shell sand for a shilling? Yes. I have never bought any, but believe so.
5902. And that shell-sand is the sand ordinarily kept for canaries to peck at? I believe shell-sand is good for them.
5903. Did Quelch say why the sand was put in two bags? No, he did not say why it was put in two bags. He said he put them in the big bag to carry them.
5904. Did he say to whom the two little bags belonged? He said the man on the railway filled them up, and he put them in the big bag to carry them easily.
5905. Do you remember the "Myall House" case? Yes.
5906. Were you shown the chaff bag in the "Myall House" case? No.

Constable Frederick Whitehair was called and sworn:—

- Constable F. Whitehair.
10 Nov., 1897.
5907. *His Worship.*] What is your name? Frederick Whitehair.
5908. You are a constable stationed where? Police constable, stationed at Redfern.
5909. *Mr. Abigail.*] Do you remember the 16th February last? Yes.
5910. Were you on duty at Botany Road that night? Yes.
5911. Between the hours of 4 and 5? Botany Road is a continuation of Regent-street; yes on that road, Regent-street.
5912. Did you see the last witness, Constable Hill, on that night? On that morning.
5913. And have a chat with him across the road? Yes.
5914. Did you see a man come out from the vacant allotment behind where Hill was standing? Yes.
5915. Did you hear any conversation between that man and Hill? No, I did not.
5916. Do you know who it was? No, I have no idea who it was.
5917. Did you see this man put something off his back? Yes, I saw him put something on the footway.
5918. Did you see Hill afterwards help this man over with this something? No, I did not see that. They were in conversation and I left.
5919. Did you see Quelch that night in uniform prior to 4 o'clock? At 3 o'clock.
5920. He was in charge of your relief? Yes.
5921. Did you see Quelch again in uniform between 5 and 6? Yes, prior to 6 o'clock.
5922. Was he supposed to be on duty from 12 till 6—from 12 midnight on the 15th to 6 o'clock on the morning of the 16th? Yes, he was on.
5923. He took the men in that morning? Yes. Senior-constable Quelch did.
5924. That would be at 6 o'clock? Yes, about 6 o'clock.
5925. That would be the men who had been on duty from 12 to 6 would be taken in at 6 and formally discharged? Yes.

Henry Bath, carter for Messrs. Jones & Co., Regent-street, Redfern, was called and sworn:—

- Henry Bath.
10 Nov., 1897.
5926. *His Worship.*] What is your name? Henry Bath.
5927. What are you? Carter.
5928. Employed where? Jones & Co.
5929. Produce store? Yes.
5930. *Mr. Abigail.*] That is in Botany Road or Regent-street? Boundary and Regent Streets, Redfern.
5931. You are employed by Jones, who has his store at the corner of Boundary and Regent Streets, Redfern? Yes.
5932. *Mr. Bull.*] Which is Boundary-street? It is off Regent-street.
5933. Near what street? It runs right up to Wyndham-street, and across Wyndham-street. 5934.

5934. *Mr. Abigail.*] It is the boundary between Alexandria and Redfern? Yes. Henry Bath.
5935. Do you remember February last, the 16th of the month? Yes. 10 Nov., 1897.
5936. You have to get up pretty early? Yes, we have a stall in the markets, and three mornings in the week we have to get up early, that is Tuesdays, Thursdays, and Saturdays.
5937. Is that why you knew this to be Tuesday? Yes.
5938. Did you see somebody coming down Spence's-lane that morning between 4 and half-past? Yes, it must have been a little after 4. We have side-doors at our store. We stable our horses at the back of the store, and I opened the side doors to let my horse out, and as I opened the doors I saw a party come out of Spence's-lane.
5939. *His Worship.*] One person? Yes.
5940. *Mr. Abigail.*] He crossed Boundary street? Yes, and went through the back of our store. There is a right-of-way that leads off into Margaret-street, I believe. He then crossed Boundary-street.
5941. And up Spence's-lane, and then through this right-of-way? Yes.
5942. That would be through that vacant lot? Yes, through the vacant allotment.
5943. He would get then on to Botany Road? Yes, or Regent-street. Of course, I did not see him go into Botany Road.
5944. You did not see him cross the vacant allotment into Regent-street? Yes.
5945. You saw him go into the vacant land? No. He came out of Spence's-lane, across Boundary-street, into—I could not say what is the name of the other place.
5946. That is still Spence's-lane? Then I closed the side doors; of course, I had let my horse out in the meantime. I had to close my doors on the inside, and walk down from the store; and, as I came out of the front door, I saw a policeman pass on the opposite side. I remarked to myself at the time that I thought it was suspicious. Then I went to the next yard, and put my horse in the van, and as I came out I heard two persons talking across the road, and I backed my van into the gutter in front of the store, and we usually ask for the things to take to the markets, such as potatoes and onions, and after a few minutes I saw two persons cross the road, one carrying a bag.
5947. How was the person dressed? In black, with a sort of soft felt hat on.
5948. Did you see what sort of a thing he had on him? No, I only saw the dark clothes.
5949. Was it a big bag? It was a chaff bag.
5950. Did it appear to be full? No, about half-full.
5951. That was all you saw? Yes. In the meantime, about a minute or two afterwards, the night-watchman passed, Brewin, and I asked him —. [*Interrupted.*]
5952. You had some conversation with Brewin about what you had seen? Yes, I mentioned the fact to him, and as I was talking to Brewin Constable Hill passed. Of course, after Brewin left me, he went on down the Botany Road, the same way as Hill.
5953. Then you had a conversation with some other constable since then? With Constable Hill.
5954. About this? Yes.
5955. *Mr. Bull.*] When do you say Constable Hill spoke to you about anything that had happened or that you had seen? I could not fix the date.
5956. Give us some idea? It may be three weeks or a month ago.
5957. It is not more than five or six weeks ago? No, I should hardly think so.
5958. You say you go to the markets on Tuesdays, Thursdays, and Saturdays? Yes.
5959. My friend gave you a date straight off—the 16th. Why do you fix the 16th? I did not fix upon any date.
5960. You would not like to swear that what you say you saw was on the 16th of the month? No.
5961. But it was on one of the mornings that you go early to your work? Yes.
5962. And in the month of February? Yes.
5963. And, in fact, every month. It is not a question of February? Yes.
5964. All the year round? Yes.
5965. They are the market mornings? Yes.
5966. Which markets? Belmore Markets.
5967. Do you remember what sort of a morning this was? It was no different to any other morning.
5968. I mean with regard to the light? It was dark.
5969. *His Worship.*] Would he be coming from the direction of the railway? I could not say what direction.
5970. *Mr. Bull.*] You know Margaret-street; don't you? Yes.
5971. That would take you down to the railway fence? Yes.
5972. Boundary-street would take you down to the railway fence? Yes.
5973. Do you know Chapple-lane? Yes.
5974. That will take you to the railway fence? Do you mean Chapple-lane the other side of Boundary-street?
5975. Yes? Yes; there is a right-of-way there.
5976. Do you know that that is called Chapple-lane? I did not know that.
5977. I may tell you that it is. Will that take you to the railway? Yes; take you right down into Garden-street.
5978. *Mr. Abigail.*] Chapple-lane is near the back of Pogson's store? Yes.
5979. *Mr. Bull.*] Do you know Chapple-lane particularly? Yes; I do.
5980. I mentioned that as one of the ways by which you could reach the railway? Yes; you can reach the railway that way.
5981. Do you know these premises of Pogson's that we hear so much about? Yes.
5982. Do you know the rear of these premises? Yes.
5983. How can they be approached at the rear? From three different ways, from Raglan-street, from a vacant allotment, and they can be approached from Wyndham-street, through McNamee's-lane, and they can be approached through Spence's-lane.
5984. How do you get into the premises at the rear of Pogson's? I could not say. I know at the next premises there are two large double doors.
5985. Do you know how the place is fenced? There seems to be a sort of shed at the back.

- Henry Bath. 5986. Are there any gates, or anything of the sort, giving entrance into Pogson's from the rear, that you know of? I do not know of any.
- 10 Nov., 1897. 5987. *Mr. Abigail.*] You have been asked about how many ways there are by which you can approach the railway. Do you know where Quelch lives? No.
5988. He lives in George-street, near the public school. If you wanted to get the quickest way to the bottom of Margaret-street, would you think of going right round here, up into Spence's-lane, and round that way? It would be rather a roundabout way.
5989. But if you wanted to get to Margaret-street from where Quelch lives, you would get into Botany Road, and round here, and up that part of Spence's-lane which runs into Margaret-street which is altogether in a different direction to Pogson's shop, and right round to the end of Margaret-street, where the railway premises are? Yes.
5990. The railway premises run right along here, through the municipalities of Redfern and Alexandria? Yes.
5991. So that if Quelch wanted to get sand at Margaret-street, and assuming it was Quelch you saw, he would be going the longest way round? Yes; he would be taking a long way. He would have to go into Garden-street and down Chapple-lane, and get into Spence's-lane and out again, and cross Boundary-street, and cross that vacant allotment, and then into Regent-street.
5992. He would be doing what lost men are accused of doing, walking right round and round, and round, not knowing where he was? Yes.
5993. *Mr. Abigail.*] I am instructed to inform your Worship that this red line is drawn to show the route taken by you in your inspection on Monday last. [*Exhibit No. 31.*]

Constable Maurice Fitzgerald was called and sworn :—

- Constable M. 5994. *His Worship.*] What is your name? Maurice Fitzgerald.
- Fitzgerald. 5995. Where are you stationed? Redfern Police Station.
- 10 Nov., 1897. 5996. *Mr. Abigail.*] Have you been there long? About eleven years and five months.
5997. Do you remember February last? Yes.
5998. Were you on duty in Botany Road? On Regent-street.
5999. That is the other name for it; did you see two men carrying a bag across the road, one of them a constable? No, sir, I did not.
6000. Was a complaint made to you that two men were seen carrying a bag across?
6001. *Mr. Bull.*] I object to that; I object to what anybody said to him on the street.
6002. *Mr. Abigail.*] It is a complaint made to him as a police officer.
6003. *Mr. Bull.*] I object to any conversation he had with anybody else.
6004. *His Worship.*] Was any complaint made to you? By Constable Whitehair.
6005. *Mr. Abigail.*] Now, what was the complaint? Between 4 and 6 in the morning, about the middle of last February I met Constable Whitehair in Regent-street. He said, "There has been a burglary upon your beat; Jones' man said he saw a man carrying a bag."
6006. *Mr. Bull.*] Now, I object to this. Now, it is hearsay evidence.
6007. *Mr. Abigail.*] My friend has put in statements that Pogson's store was found open right back to 1892.
6008. *Mr. Bull.*] They are official reports.
6009. *Mr. Abigail.*] This is an official report too.
6010. *His Worship.*] We cannot have that.
6011. *Mr. Abigail.*] Did you see Quelch? I saw Senior-constable Quelch on the opposite side of the street.
6012. At what time? Just as Constable Whitehair had told me this.
6013. What time was this? I made no note of it, but it was between 4 and 6 in the morning.
6014. What did you do? I approached the senior-constable and I merely reported to him what Constable Whitehair had told me, and Senior-constable Quelch replied, "He knows about that."
6015. Who knew? I inferred Constable Whitehair.
6016. *His Worship.*] Was any report made at the station about it?
6017. *Mr. Bull.*] Did you make any report? I merely reported it to the senior-constable. In these cases I always report the matter to the senior-constable or serjeant on duty.
6018. *Mr. Abigail.*] Quelch was your senior-constable that night? Yes.
6019. And you did your duty by reporting to him? Yes.
6020. And if it should have been entered it was his duty to enter it in the books? Yes.
6021. *His Worship.*] Was Quelch on duty that night? Yes.
6022. It was part of his round? Yes.
6023. *Mr. Abigail.*] Is it a fact that Quelch was the officer in charge of the men that night? He was on duty when I reported that matter.
6024. He was in charge of the relief? Yes.
6025. He discharged you at 6 o'clock? I have not a distinct recollection of it. What I can say is that I reported it to Mr. Quelch.
6026. Is it not a fact that you do night duty once in six months under the same senior-constable? It is altered now.
6027. *His Worship.*] At the time Quelch was seen carrying the bag, he was supposed to be on duty? Yes.
6028. If he were seen at the hour stated by Hill, ought he then to have been on duty? Yes.
6029. *Mr. Bull.*] What date do you say this was? I made no entry of the date of the occurrence. All I remember distinctly is that it was about the middle of last February.
6030. You cannot say whether it was the 16th or 18th of February? I cannot say positively.
6031. You cannot say what date it was? No. The nearest I can recollect is that it was the middle of last February.
6032. You and Whitehair and Hill were on pretty well the same beats all that month? Pretty well.
6033. How many times would you meet Whitehair as a matter of actual duty before 6 o'clock supposing you were both doing your rounds? About twenty minutes or so past 4 would be the regular hour, and then from that time about ten minutes to 6.
6034. That would be twice? Yes.

6035. You know what is called the Bank corner, the corner of Redfern and Regent Streets? Yes.
6036. Were you doing duty on that beat that night? Yes.
6037. Was that a portion of your beat? Yes.
6038. Now, speaking of Hill, what time should Hill be at that corner after 3 o'clock that morning, working seven and eight beats? About half-past 4 would be the regular hour, and a few minutes to 6 o'clock coming off duty.
6039. He reports at that point? If the non-commissioned officer meets him at that point, otherwise not.
6040. If there is nobody there to report to he does not report? No.
6041. But he would in the ordinary course of his duty on that beat meet the other officer? Yes.
6042. *Mr. Abigail.*] You know where Quelch lives? Yes.
6043. You know the sandhill, Hudson's sandhill? There is one at the back of Hudson's house, I believe, between Mr. Hudson's house and Pitt-street.
6044. During the day-time carts are carting the sand away? Sometimes they are.
6045. There is no gate up, is there? I believe a gate has been erected there.
6046. Recently, has it not? Yes.
6047. In February last there was no gate there? I cannot say positively.
6048. *Mr. Bull.*] Speaking of this sand, this is private property enclosed? I do not know who the property belongs to.
6049. Do you not know that the whole thing is enclosed by a fence, and barbed wire, and locked up with gates? At the present time there is a fence around it, and a gate.
6050. Has it not been so for some years—two years, certainly? I cannot really state the time.
6051. Do not you know that Hudson has stored that sand, and uses that particular sand from there in the carrying out of his own buildings. He is a contractor, is not he? He is a contractor.
6052. Would you like to say that any sand has been taken out of that place since Wright's Terrace was built by Mr. George Hudson? I cannot say.
6053. *Mr. Abigail.*] I can say that, for I saw a cartload taken out on the afternoon when I was out there.
6054. *Mr. Bull.*] I am speaking of the place being open and people carting sand out. Would you say that that has taken place during the last two years? I believe it has; sand has been taken out, but I do not know by whom.
6055. When people are not drawing sand out of the place is it not safely locked up? I believe it is.

Constable M.
Fitzgerald.
10 Nov., 1897.

First-class Constable James Christison was called and sworn :—

6056. *His Worship.*] What is your name? James Christison.
6057. And what are you? Constable, stationed at Redfern.
6058. *Mr. Abigail.*] How long have you been in the service? Eleven years now.
6059. How long have you been at Redfern? All the time.
6060. I see you have a stripe, what is that for? First-class constable.
6061. Do you remember one morning in February? I do.
6062. You heard something? I did.
6063. You got a complaint from whom? From Special-constable Brewin.
6064. And did you see Quelch about the complaint? I did not speak to him, but I was going to. I saw him about three minutes to 6 in the morning.
6065. Was he in uniform? He was.
6066. Was that the same morning that Brewin had told you about this? The same morning.
6067. You cannot recollect the exact date? It was the middle of the month of February.
6068. Did you go up to Quelch and speak to him? I was just about to when Constable Whitehair told me it was all right.
6069. And you did not speak to Quelch? I did not.
6070. Did you make a note of the date? I did not.
6071. Do you know that it was between the 13th and the 20th of the month? I do. I know it was about the middle of the month.
6072. Now tell his Worship why you know it? Because he was the only senior-constable out at the time after 3 o'clock.
6073. That is out on duty? Yes.
6074. Is there any other reason? Well, for one reason, because I have been reported.
6075. You were reported by him on the 13th? I was.
6076. And the report was to be heard on the 20th? It was.
6077. And was it during that week that this alleged occurrence took place? It was.
6078. What was the result of this report against you? For meeting another constable and gossiping with him for about five minutes, and walking along the middle of the street.
6079. That was what Quelch complained about? It was.
6080. What was done with you? I was reduced for one week for that.
6081. *Mr. Bull.*] You do not seem to have the kindest feeling towards Quelch? I never had any other feeling but kindness until that occasion.
6082. He reported you on a third occasion didn't he? He did; yes.
6083. On one occasion you were severely reprimanded? I was not severely reprimanded; I was told to go.
6084. Let me tell you I have the official report here signed by the Superintendent. You have been reported by other officers for being in public-houses when on duty, and for neglect of duty? I have.
6085. On this very occasion when Quelch reported you, did not he report you not only for gossiping but for drinking beer with your comrade on the beat? He reported me for being seen near a bottle of beer.
6086. Did not he produce a bottle of beer which had been found near where you were, and which the other constable actually put down after you had each had your drink? No.
6087. At any rate, that complaint was investigated by the Superintendent? It was.
6088. You made your explanation? Yes.
6089. Did the other officer make his? He did.
6090. Who was he? Constable Begg.

First-class
Constable J.
Christison.
10 Nov., 1897.

6091.

- First-class Constable J. Christison.
10 Nov., 1897.
6091. Notwithstanding you each made your statements, and put your own complexion on what you had to say, you were punished? We were.
6092. As a fact you were suspended, were you not? We were not.
6093. Well, then, I notice the whole three have relation to liquor? I know nothing about the liquor.
6094. In this very year, 1897, 12th January. "Being in a public-house when on duty." You were severely reprimanded? I did not hear those words used.
6095. Have you any reason to suppose? I know I was reported.
6096. February 13th, "Idling and gossiping with Constable Begg when on duty from a quarter past 12 to twenty-five past 12; suspended from rank for a week"? That is the one I refer to.
6097. "Being in a public-house when on duty." You were again suspended from rank for a week? Yes.
6098. Do you mean to tell the Commissioner that you have a kindly feeling towards Quelch because he did his duty in that respect? I have no bitter feeling against the man.
6099. When did you first hear of any insinuation or charge against Quelch of having stolen sugar from Pogson's store? I could not tell you. It must have been after the case about the sand. I never heard anything until then.
6100. In fact it is only within the last month or six weeks? That's all.
6101. So that the date you fix is between the 12th and the 20th? It was about the middle of the month I should say.
6102. *Mr. Abigail.*] It is most peculiar that every witness that I have put in the box who has a list against him has had the list yanked out without any trouble at all, clearly showing that the evidence of every witness I have called has been anticipated by Quelch, and he has been prepared with a black list against him. (*To the witness*): Notwithstanding this black list, your Superintendent has thought that you were good enough to be not only a constable but a first-class constable? Yes.
6103. And you are still allowed to do duty, and are continued in the Force? Yes.
6104. That fact speaks for itself. Now, as a matter of fact, in these complaints that have been made against you by Quelch—have either of you been put upon your oath about them? No.
6105. Merely a verbal explanation was made? Yes.
6106. The subordinates are always handicapped by the fact that the complainant is the senior-constable? Yes.
6107. As a matter of fact you requested the Superintendent to put you and Quelch on oath? Yes, both I and the other constable were not allowed that protection.
6108. You were silenced and practically told to leave the room. Being obedient you left.
6109. *His Worship.*] When you first heard of Quelch being seen carrying a bag of sand did you think there was any other charge against him, except the fact of being in plain clothes, when he should have been in uniform on duty? When I first heard this complaint against Quelch the party did not know it was Quelch that was carrying it.
6110. Did you hear any insinuation then that this was sugar that he was carrying? Not at that time.
6111. *Mr. Bull.*] You have been eleven years in the Force? I have.
6112. Where a complaint has been made by an officer against a man under him, have you ever heard of the investigation by the Superintendent being on oath? I never heard of such a thing.
6113. *His Worship.*] The Superintendent has not power to take evidence on oath.
6114. *Mr. Abigail.*] The police can be prosecuted in court, and that is the proper place.
6115. *Mr. Bull.*] That is where some member of the public complains to the Superintendent with regard to the misconduct of a police officer. The Superintendent authorises the issue of the summons, and the man is prosecuted before a magistrate. I am not speaking of that sort of case at all. You have never heard of complaints like this being investigated on oath, have you? No.
6116. To whom did you detail the circumstances which my friend has so glibly asked you here, that you were told to walk out, and go about your business. Have you ever told Mr. Dacey that that was the course of procedure at this investigation of yours? I have not.
6117. Was it the course of procedure? Were you not given an opportunity of making an explanation to the Superintendent? Certainly we were, but we asked if it were possible that we could be examined on oath.
6118. Did not Begg produce a diary. Did not both of you raise a question as to whether the moon had risen or set? Did not Begg produce a diary? He did.
6119. So that there was a real investigation into this charge? Yes.
6120. Was Begg also charged with gossiping? In company with myself.
6121. He was with you? Yes.
6122. And I suppose he was present at this investigation in the Superintendent's office? He was.
6123. I suppose you have undergone some such examination several times; the same course was pursued in each one? Yes.
6124. Nothing different? No.
6125. *Mr. Abigail.*] You have to be on duty at night time? Yes.
6126. And the senior-constable can go into the station and boil his billy while you are out in the street; and the charge is that you and your brother officer were having lunch in the street? Yes, and that is not correct.
6127. *Mr. Bull.*] Have you ever known an instance where Quelch has boiled his billy in the lock-up when you have been outside, and he should have been outside? I have never seen him do it, but I have been told so.
6128. I suppose you know the senior-constables have some advantages over the ordinary constables? They have not to work the beats like we have.
6129. *His Worship.*] Are they supposed to be on duty during certain hours? Yes.
6130. *Mr. Bull.*] When you heard that the senior-constable was seen at a certain hour of the morning carrying a bag, no matter whether it was sand or sugar, what did you think the offence was? I came to the conclusion that the offence was neglect of duty.

Constable John McIntosh was recalled :—

6131. *Mr. Abigail.*] Do you remember the 16th February last? I cannot say that I do.
 6132. Do you know that there is a good deal of talk about two men being seen carrying a bag across Botany Road in February last? Yes.
 6133. Who was your officer during that week? Would you know from the duty book? Yes.
 6134. [*The Duty Book was shown to the witness.*] "Week ending Saturday, 20th February, 1897." Now, do you see Tuesday, the 16th? Yes.
 6135. And you see from Monday the 15th until Saturday the 20th that Senior-constable Quelch was in charge of the relief from 12 till 6 a.m., and from 10 to 12 p.m.? Yes.
 6136. The whole of that week? Yes.
 6137. Were you on duty on the 16th? I do not think I would have been. I would have been on the night shift.
 6138. Then it is not you I want.

Constable
 J. McIntosh.
 10 Nov., 1897.

Senior-constable George Proctor was called and sworn :—

6139. *His Worship.*] What is your name? George Proctor.
 6140. What are you? Senior-constable of Police, stationed at Redfern.
 6141. *Mr. Abigail.*] Just look at this, is this your handwriting? It is.
 6142. Do you look at an entry in the Duty Book on Tuesday, 16th February, 1897? Yes.
 6143. Were you the officer in charge of the station that night and day? I was.
 6144. And the entry you see there, that W. E. Quelch was in charge of the relief from 12 to 6 a.m., is in your handwriting? Yes, that is correct.
 6145. Did Quelch bring the relief in that morning and discharge them? I could not positively swear; I do not remember.
 6146. It would of necessity follow, would it not, otherwise a note would have been made in that book? He should have done. I should have been informed if otherwise.
 6147. Would it not have been improper for him to go off duty between 12 and 6? I should have been informed.
 6148. He should have been on duty between 12 and 6? Yes.
 6149. Were you informed? No.
 6150. If he had been on any special duty requiring the disguise of a jumper and a slouch hat you would have been informed. I should have been informed.
 6151. Were you informed? No.
 6152. Did you have any conversation with Quelch about whether he was on or off duty this morning. Have you had any conversation since? Not that I am aware of.
 6153. *Mr. Bull.*] Were you on station duty in the place of Houlahan in February? Yes.
 6154. From the 3rd to the 18th? I think I went off on the 16th. I finished on the morning of the 16th, and then I went on the streets after that.
 6155. Then you started night duty on the night of the 17th? Yes.
 6156. Do you remember whether Quelch had any cases at the Court during that fortnight from the 3rd to the 16th? I believe he had.
 6157. Do you remember that he had to remain on duty up till 6 notwithstanding that he had those cases in the Court? He had time due to him.
 6158. Could his Court time allowance be taken into consideration until you resumed your duty on the streets on the 17th? It is not usual for it to be done.
 6159. Do you know whether Quelch did, after you resumed on the 17th, take any time off in the morning? Yes, he did after I went on.
 6160. What do you mean by that? Notwithstanding the fact that he would be booked up till 6 o'clock he would be off earlier than that? No, he should be booked off at 4.
 6161. Do you remember an inquest which you had charge of on the 27th. I think it was a charge of abortion against somebody? I remember the charge you refer to, but I could not remember the date.
 6162. That was in Pitt-street? Yes.
 6163. Do you remember what time you left duty that morning to attend the inquest? Did you not leave very early in the morning? Really I cannot remember.
 6164. Try to remember? I cannot remember what duty I was on.
 6165. You were on night duty? I am booked to 6 a.m.
 6166. Do you remember the morning of the inquest leaving very much earlier than 6? There is no doubt I went off on that morning for the inquest, but I cannot swear it.
 6167. You have no doubt that you did leave very much earlier than 6? I believe I did, but I am not sure.
 6168. Are you not booked up for 6? Yes.
 6169. Is it not a fact that when you have duty during the day, notwithstanding that you are booked up for duty until 6 o'clock, it is invariably the custom to leave somewhat earlier? It happens occasionally.
 6170. How many times has it happened to you? I could not remember really, but there is no doubt it has happened.
 6171. Suppose that Quelch had cases coming on in the Court to-day at Redfern and he was on duty from 10 till 6, would it not be a customary thing for Quelch to leave before 6 so as to be able to attend his Court cases? It would, providing there were two non-commissioned officers out at night to remain on with the men.
 6172. You are a non-commissioned officer? Yes.
 6173. And you went on duty on the 17th? I did.
 6174. Who else beside you would be on night duty on the 17th? Senior-constable Quelch and I.
 6175. Who else? I could not tell you, we are the only ones out from 3 till 6 in the morning.
 6176. Then you would be there on the 17th and 18th and right through February? Right through the month.
 6177. Then if, as a fact, he had cases, and it would be necessary for him to leave before 6 on the morning of the 18th, you would be the other officer on duty? I would.

Senior-constable
 G. Proctor.
 10 Nov., 1897.

- Senior-constable G. Proctor.
10 Nov., 1897.
6178. It was suggested by my friend a while ago that you, when on patrol duty, get back to the station in the early hours of the morning to boil your billies to get a cup of tea on the quiet. You know what I mean? Yes, certainly.
6179. Have you ever seen Quelch do that? Have you ever done it yourself? I do it myself.
6180. Would that be considered neglect of duty? Well, we have never had any order not to do it. It is the usual thing among the men.
6181. I suppose so much notice is not taken of your boiling a billy of tea in the lock-up as going to one of the hotels and having a nip. That certainly is not allowed? Well, we never had any order not to do it.
6182. And you know that it is occasionally done? Yes.
6183. *Mr. Abigail.*] I do not see why it should not continue.
6184. *Mr. Bull.*] You say no doubt it has happened that when you or any non-commissioned officers have duty at the courts, it is the habit to leave somewhat earlier. I suppose you go to bed then? Yes.
6185. So that really whilst you are supposed to be on duty occasionally you are asleep? Well, we should not go off without informing the station-serjeant, so that he can mark the book to that effect.
6186. Does not the station-serjeant usually go to bed at 3 himself? Yes.
6187. Well, you could hardly report to him between 3 and 6 o'clock. Who would you report to? The serjeant is generally up in the morning; he is generally up to see the men in.
6188. Take this instance: Do you remember whether you ever reported to anybody the fact that you left off? Were you not booked up to 6 o'clock, and is not that the entry in the book itself? I do not remember.
6189. I suppose it would not be considered a very great breach of duty if you did not? I should think it would. There is no doubt there is a mistake in the entry in the book. There is no doubt the serjeant knew.
6190. I may tell you that all those red ink entries there [*Exhibit No. 33*] are instances where the time is entered up and the officers have not performed that duty, Swan, Edwards, Harrison, Hill, Quelch, Walker, Proctor, Walker, Quelch. These are extracts from book No. 31? There are occasions when the books are entered up in the night before 3 o'clock in the morning. Well, it is possible that a constable after 3 o'clock may arrest somebody, and of course he would go off, and the time would not be looked to, and the alteration might not be made in the morning.
6191. *Mr. Abigail.*] Is it the habit for a constable to go off, say for an hour, to take off part of his uniform, to put on a jumper and a slouch hat and walk a quarter of a mile away from the police station off his beat and to carry something to his own home and then to resume duty with his uniform on? No constable should do that.
6192. And if he did would not that be considered so gross a dereliction of duty that in all probability he would be dismissed the Force? I do not know what the result would be, but he should certainly be reported for it.
6193. Suppose a constable had a case on in the Court this morning at 10 a.m., and he was on duty from 3 to 6 this morning, do I understand you to say that it has been done although it is unusual, for that constable to get off a little after 3 and go to sleep so as to be prepared for his case at 10 a.m.? He should by rights have his time allowed him.
6194. That is he ought to apply to the senior-constable in charge? Certainly.
6195. But you have never heard of an instance where a constable got off for an hour between 4 and 6 a.m., got off duty and came back again within the hour? No, I have never heard of such a thing.
6196. And if he did you would esteem it your duty to report it? I should certainly bring it under the notice of somebody.
6197. Because you yourself would esteem that a peculiar thing to do? It is a thing I never heard of before.
6198. And it would call for immediate explanation? I suppose so.
6199. *Mr. Bull.*] Supposing the constable was allowed to leave duty by his senior officer at 4, or half-past 4? That is the course they generally pursue.
6200. Then would he not as a matter of fact have to come in with his relief at 6 o'clock? I never heard of such a thing.
6201. *His Worship.*] You never heard of that? No.
6202. *Mr. Bull.*] Do you know Constable Swan? I do.
6203. There is an entry here on the 7th January, 1894? Yes.
6204. I see an entry here, "Beats four and six, 10 a.m. to 2 p.m." There must be some special reason for his being left off from 2 p.m. to 5 p.m.
6205. *Mr. Abigail.*] That is the week ending 3rd January, 1894.
6206. *His Worship.*] Have you any entry referring to this particular matter of the 16th February, 1897?
6207. *Mr. Bull.*] I do not know of any. I am asking this to show that there is an irregularity. I see it says, "Beats four and six, 10 a.m. to 2 p.m." The usual practice would be to go on from 6 to 10? In all probability, the constable had some overtime due to him where he had done some work on a previous case. He may have been doing some special duty or duty on the streets, making a special inquiry.
6208. And that would be in the nature of an allowance? Yes.
6209. Would not there be some mention of that? Sometimes they do, and sometimes they do not; but that may account for that four hours.

[*The Commission then adjourned for Luncheon.*]

The Commission resumed at 2.5 p.m.,

Senior-constable John Ingram was recalled:—

- Senior-constable John Ingram.
10 Nov., 1897.
6210. *Mr. Abigail.*] You have been a senior-constable for some years? Nearly ten years.
6211. Would it be necessary for a senior-constable, who was in charge of the relief from 12 midnight to 6 the following morning to ask the leave of the officer in charge of the station before he could go off duty? Undoubtedly.
6212. And if that were done would it of necessity be marked in the Duty Book? I presume so, I certainly would not leave out that.
6213. Have you ever known an instance of an officer getting off without asking? No.

6214.

6214. Have you ever known an instance of a senior-constable who is the only senior-constable in charge of the relief ever getting off duty without permission, say between 4 and 5, just for an hour, and going back on duty? No, I never knew such a thing. Senior-constable
John Ingram.
6215. Even where a constable has a case, say, to be heard at the Court at 10 o'clock this morning, and he is on duty from 12 midnight to 6 this morning, would he be allowed off in order to get sleep and to enable him to attend the Court without special permission? No, certainly not. 10 Nov., 1897.
6216. And even if he had that case to attend to, is it even remotely probable that he would be allowed off for one hour between 4 and 5, seeing that there was no other constable to take his place? If there were no other constable to take his place he would not.
6217. Would he be allowed off for one hour between 4 and 5? No, I never knew an instance of that.

Mr. Biron Pogson, Grocer, Redfern, was recalled:—

6218. *Mr. Abigail.*] You are carrying on business at Botany Road? Yes.
6219. You are a retail grocer, but you have a very large stock at times? Yes. Mr. Biron
Pogson.
6220. Stacked right up the ceiling? Yes. 10 Nov., 1897.
6221. Especially a large stock of sugar? Yes.
6222. Could two or three 70-lb. bags of sugar be taken away from your stock without attracting your attention? Well, certainly it could.
6223. On some occasions I suppose eight or ten could be taken without your knowing? Yes.
6224. Could it be taken away in a night without your knowing? Without my attention was specially drawn to it.
6225. You see that is your shop there marked "A" on the plan. I want you to explain how you get into the back from Spence's-lane? I would have to go through other people's property.
6226. Explain how? At that time it was much easier than now.
6227. I want you to explain it? You would have to go down the back lane.
6228. *His Worship.*] Is there a lane at the back? No.
6229. How could a person get in the back? There was only a fence.
6230. *Mr. Abigail.*] There was only a low fence? Yes. My end is on a slope, and my fence is about 3 feet or 2 feet 6 inches below the earth at the back. My place has been dug down into the earth, and from the back into my place it is very low; but getting back from my place outside it is a little higher.
6231. It is easy for a big strong tall man? Yes.
6232. With a chaff bag on his back? He would have to be a pretty strong man.
6233. You have seen Quelch? Yes.
6234. He is pretty muscular? Yes.
6235. Do you think he could do it? Speaking the honest truth, I dare say he could, because I have always got boxes in my yard; it would assist anybody. It is very little trouble to get on the top of the fence, and then he could drop them down the other side.
6236. Then, you would come right along Spence's-lane to Boundary-street? Yes.
6237. Now, if you proceed past Boundary-street and still continue along that lane, do you remember that vacant bit of land that they are now building on? Yes.
6238. You could at that time have gone right through that, and got into Botany Road? Yes, there was no building there at all.
6239. And in doing that you would have to pass Jones' stables? Yes.
6240. They are right at the rear? Yes.
6241. *Mr. Bull.*] You never reported to the police or to anybody else the loss of two bags of sugar in February last? No, sir, I did not.
6242. And no investigation of yours before or since has led you to the conclusion that two bags of sugar were stolen out of your place on the 16th of February? Well, I do not think there was.
6243. I suppose you would be the person most interested in the loss of any property there? There is no one else to be interested.
6244. Have you the slightest reason in the world to suppose that on the night or morning of the 16th February, or at any time that week, two bags of sugar were stolen out of your place? No, I have not.
6245. The other day you gave evidence with regard to an allegation against Quelch of something having been removed by him from your store. How many times since you have been in business there have your premises been actually found open? I think it is three different occasions.
6246. Three different occasions? Three altogether.
6247. Now, are you not somewhat mistaken about that. You see I read you the other day two, do you remember? Yes.
6248. Are you aware of this: I find an entry in the Police Occurrence Book, a report [*Exhibit No. 32*] "Mr. Pogson's place broken into on three occasions during the last three weeks." The entry I may tell you is dated the 4th March, 1893. "On the 22nd ultimo," which would be the 22nd February, 1893, "on the 1st," the 1st March, "and on the 3rd instant, and on the first occasion 10s. worth of coppers stolen"? That is a mistake altogether. The place was never open three times in succession following so close, otherwise I would have sat and watched at night.
6249. Here is the police report? That is wrong.
6250. The entry is made by Senior-constable Corcoran and attended to by Sutherland and Moore. You know Senior-constable Corcoran? Well, I do not really happen to know him, not by name.
6251. Well, are you surprised that the police actually reported that they had found your place open three times within three weeks? I am greatly surprised.
6252. Are you greatly surprised that Sutherland and Moore were told off to make inquiry? You mean to tell the Commissioner here that you have no knowledge of these circumstances? No, I was not told.
6253. You are a little careless in the conduct of your business there, I think I understood you the other day to say that you did not take stock? I have always got a bit of money in hand; and what about taking stock in a small place like that.
6254. It would be a check upon the persons in the store? I do the indoor work and the men do the outdoor work. I think where people take stock they are cutting things very fine.

- Mr. Biron. 6255. What you mean is that you can always afford to leave a margin for losses? That is it.
 Pogson. 6256. Is it a fact that you have to pass through different persons' properties to get into your place—of
 10 Nov., 1897. course I do not mean people flying over the gates or fences—in fact you have no back gate, have you? No.
 6257. Can you take a horse and dray into your back premises? Not through my own property.
 6258. Can you by any means? I can do it by going through other people's property.
 6259. Have you done that? No.
 6260. Are all your goods taken in through the front entrance to the rear? Not always.
 6261. When they are not, and when they are brought by horse and vehicle, how do you get them into your
 place? I just use Mr. Flynn's place, my next door neighbour. I can only do it while Mr. Flynn is there.
 6262. If anybody wants to obtain access to your back premises they can only do it during the day time
 while Mr. Flynn is on the premises? That is from the front.
 6263. What do you mean by that? From the Botany Road side.
 6264. You know Flynn's side entrance? Yes.
 6265. Are not there large double gates 8 feet high? You mean the front.
 6266. I am speaking of the Botany Road frontage? Yes, there are. That is the front.
 6267. I take it that those gates are locked—you may tell us when? About half-past 6 or 7 o'clock at night.
 6268. And unlocked, when? They start work earlier than we do—about 5 or 6 o'clock in the morning.
 6269. Now supposing you do not go from your place through Flynn's, but that you go over the fences out
 of your place, out into McNamee's lane, do you not go from your place in that case into private
 property? Yes.
 6270. Whose property would that be? Mr. Bunting's, I think.
 6271. Is there not a 7 feet gate with barbed wire across the top of it opening out from these premises of
 Bunting's into McNamee's lane? Yes.
 6272. Are they double gates? I think they are.
 6273. What is your experience with regard to those gates—how are they locked? I could not tell you
 hardly for certain whether there is a lock on them or not. They are closed generally. I am not one to look
 about much in things like that.
 6274. Have you any reason to suppose they are left open at night time? I could not say.
 6275. Don't you know that every night, without any single exception, those gates can be found locked? I
 cannot speak on that because I do not know.
 6276. You will not say that they are not? No.
 6277. So that you suggest that a strong man might get over the low fence into your yard and carry away
 184 lb. weight of sugar over all these fences? There is a much easier way of getting out than that way.
 6278. Which way is that? Well, of course, Mr. Flynn only twelve months ago put a new back to his place.
 6279. Was that this year? It was about twelve months ago.
 6280. What do you mean by that, putting up some new premises? Are not there stables on the two angles
 of that property? No, they are not up next to Bunting's property.
 6281. Are not there stables at the end of Bunting's abutting on Flynn's stables? Cartsheds.
 6282. But are not those stables the whole width of Bunting's yard across at the end and down near Flynn's
 place? Oh, yes, they are there now.
 6283. How would you suggest that anybody could get—would they have to get over that? Well, Flynn's
 gateway I think is only just a latch that you have to lift up and down. I do not think that the back is ever
 locked.
 6284. Anybody getting through there, where would they find themselves? In a vacant allotment.
 6285. The land is fenced? No. It is fenced on both sides, but each end to the back lane and the street is
 completely open.
 6286. That opens on to McNamee's lane, does it not? Yes.
 6287. When you speak of a low fence, on which side of your land is that. Do you know the W.C. on your
 premises, is that the fence you speak of? Yes, it is a low fence.
 6288. Your land dips under the fence? Yes.
 6289. What height would there be from the level of the ground to the top of the fence on the inside of
 your property? About 5 feet 6 inches, from my recollection.
 6290. Of course the two ordinary bags weigh 140 lb., two ordinary 70-lb. bags? Yes, that is the weight.
 6291. Is not there somebody sleeping on Flynn's premises? Well there is, but they are sleeping in a
 peculiar place.
 6292. Do not they sleep in this shed or stable right at the rear of Flynn's? Yes.
 6293. Abutting on this vacant land? Yes; but of course Mr. Flynn has about 50 feet of land, and they
 would sleep more that end than this.
 6294. Your place is opened into Flynn's? Yes.
 6295. Flynn and you in common use the one back yard? Well, it is open, we do not actually use it.
 6296. Of course, your land is immediately behind the store, and Flynn's is alongside it. When did you
 hear it suggested first that you had lost two bags of sugar in February last? Have you ever heard that
 you had? Well, the first I ever heard about the sugar was in the paper.
 6297. You mean in *Truth*? Yes, I would not be certain whether somebody did not mention something
 about some sugar.
 6298. Are you sure that something was ever said in the newspapers with regard to sugar being stolen from
 your place? I do not know.
 6299. Have not you been asked some questions with regard to this investigation during the last five or six
 weeks? Who has waited upon you, as a fact, even with regard to the statements that you made to-day?
 Well, I saw Mr. Dacey once.
 6300. Did you ever tell Mr. Dacey that you had missed two bags of sugar from your store on the night of
 the 16th February? No, I do not think so. I do not think that sugar was mentioned in the paper when
 I saw it.
 6301. As a matter of recollection, I may remind you that it was not mentioned in the paper at all? It said
 a bag of groceries.
 6302. But I suppose you can in all candour say that you did not lose two bags of sugar in February? Well,
 I could not say that I did lose them.

6303. Tell me this, do you remember what time you went to your store on the morning of the 17th, or on the morning of the 19th? What time do you usually go to your store? I generally go there about half-past 7.
6304. And inasmuch as you do all your indoor work, I take it you lock up your place? Yes, myself.
6305. What do you do with the key? I generally carry it in my pocket.
6306. Take it with you? Yes.
6307. And going as you do every morning to the business you unlock the place? Yes.
6308. Speaking of last February, can you recollect any one occasion when, on your going there, you either found the door open, or the place disturbed in any way? Oh, well; I have never found the door open on any other occasions beyond those mentioned before.
6309. I have gone beyond that. I say I want to know whether you have found either the door open or the place in any way disturbed? Well, not at that time.
6310. I suppose you see Quelch on duty at all hours, night and day? I do not say that I have seen him much at night, but I have seen him more in the day.
6311. You shut up your place between 6 and 7, and go home some little distance away? Yes.
6312. You are not much out of a night, are you? No.
6313. *Mr. Abigail.*] You could not say that you lost two bags of sugar on the 16th? No.
6314. And you could not say that you did not, because it was almost impossible for you to miss six bags? Well, of course, you may think it is carelessness; but I generally get 2 tons of sugar in at once. Well, that is sixty-four bags, and I never let my stock run down, so that I will have about seventy there. Of course, I may weigh up ten to-day, and may not weigh up any for a day or two.
6315. *His Worship.*] You cannot say whether you lost two bags of sugar or not? No.
6316. *Mr. Abigail.*] I do not want to ask you whether carts could get through, but I want to ask you whether a pedestrian could get through there at all hours of the night? Oh yes; through Spence's-lane.
6317. You would not be surprised to hear that I and another gentleman walked through there at 12 one night? No.

Mr. Biron
Pogson.
10 Nov., 1897

Mrs. Catherine Robinson was called and sworn:—

6318. *His Worship.*] What is your name? Catherine Robinson.
6319. *Mr. Abigail.*] You are a widow? Yes.
6320. Where do you live? George-street, Redfern.
6321. You live near the Police Station? Yes; opposite.
6322. You know Constable Quelch? Yes.
6323. You cannot read or write; can you? No.
6324. Did he come to you some time ago with a paper, which he asked you to sign? No.
6325. Did he ask you anything about a bag of sand? Yes, I gave him a bag of sand over the gate.
6326. When was this? I cannot tell you.
6327. Will you tell his Worship all he said about this bag of sand? He asked me for a bag of sand to give his canaries.
6328. How long ago? I do not know.
6329. Six months ago? It must be, I think.
6330. It would not be before last February? I could not tell you.
6331. How much was there in the bag? I do not know.
6332. One pound? I do not know.
6333. Ten pounds? I expect —. [*Interrupted.*]
6334. Would it be 20 lb.? I could not tell you.
6335. Where did you get the sand from? It was taken from the watch-house.
6336. You say it is about six months' ago? I could not tell you.
6337. It would not be about twelve months' ago? I do not think it.
6338. Do you remember Mr. Quelch coming to you and asking you something about that sand shortly after that? He said, "Did not you give me a bag of sand?"
6339. What did he say? "Did not you give me a bag of sand?" that is all he said.
6340. Did not he ask you to sign a paper to say so? He knew well enough I could not sign it.
6341. Did not he ask you? No.
6342. Did not you say you could not read or write and could not sign it? No.
6343. *His Worship.*] What time was it he came to you and asked you about the bag of sand? I could not tell you.
6344. Six or seven weeks ago? I did not take any notice; it might be six or seven weeks ago.
6345. What did you say to him? I said nothing.
6346. Did you tell him yes you did remember? Yes, I told him I did remember giving him a bag of sand.
6347. What did he say to you? No more.
6348. Did not you afterwards go over to the station and see Serjeant Houlahan, or one of the serjeants at the station, and say that Quelch wanted you to sign a piece of paper and you would not? I did not.
6349. Did you see somebody recently call Quelch and beckon to him like this and call him into the Police Station? No.
6350. Do you remember Quelch asking you to put your mark to a piece of paper? No, he did not.
6351. When did you speak to him last? I spoke to him yesterday evening.
6352. Where at? In my own yard.
6353. Did he come to your yard to speak to you? No, I was standing at the gate and he spoke to me as he came past.
6354. What did he say to you? I do not know what he said.
6355. You knew you were coming here as a witness? No.
6356. *His Worship.*] Did he speak to you about this case, about the evidence you should give? No.
6357. *Mr. Abigail.*] Did not he ask you about coming here to-day? No, he did not.

Mrs. C.
Robinson.
10 Nov., 1897.

Senior-constable

Senior-constable William Edward Quelch was recalled :—

Senior-
constable
W. E. Quelch.
10 Nov., 1897.

6358. *Mr. Bull.*] You know this charge which is now being made against you, "That, about six months ago, Constable Hill, when on duty on the Botany Road, saw a man crossing the road in a slouch hat, and with a bag of something on his back. Hill approached the man and was astonished to find that it was his Senior-officer Quelch, who said, 'It is all right, Hill; I have been getting some sand for my canaries,'" You live where? George-street, Redfern.
6359. How long have you been living there? About three years.
6360. What canaries have you? I have an aviary standing about 9 feet high.
6361. And in February last what number of canaries had you? I had a number of them.
6362. How many would you say about? I suppose I had about forty then.
6363. It has been a hobby of yours, the same as it is a hobby with other members of the police? Yes.
6364. Mention some of the others who keep canaries. Serjeant Vane has 200; Serjeant Houlahan has a lot.
6365. That forms a pastime? Yes.
6366. And for the purpose of cleanliness, and other purposes in connection with your aviary, you obtain sand, do you not? I do. I always have a large box about that long and about that deep. It is half full down in the yard now.
6367. About 2 ft. 6 in. by 2 ft. and 18 in. deep? Yes.
6368. Sand is essential, is it not, both for the birds and the cleanliness of the aviary itself? Yes; you want a well-washed, gritty sand.
6369. You heard Mr. Abigail suggest this morning that gritty sand could be purchased—did you ever do such a thing? No; because if you purchase sand for your canaries you might as well do away with the canaries at once.
6370. Why? Because there is no profit in them.
6371. *His Worship.*] I suppose there is some profit made in them? Oh, yes. If you do not keep a good class of bird you might as well throw them away altogether. If you do not look after the birds and study and train them as they should be, you would not get more than 2s. 6d. for them. A good bird you can get 30s. or £1 for.
6372. *Mr. Bull.*] Have you occasionally sold some of your birds? Yes; and given them away sometimes.
6373. You know Margaret-street? I do.
6374. Now, in February last, did you obtain sand for your canaries? I did.
6375. How frequently do you get this stock of sand in? About four times a year. I went again in May and got another supply.
6376. In February you got some? I did.
6377. You say you got some more in May? Yes.
6378. Just relate the circumstances of your getting sand in February? When was it? On the morning of the 18th of February.
6379. What day of the week? Thursday.
6380. You have heard a good deal said with regard to the 16th February? Yes.
6381. Were you carrying a bag on your back on the morning of the 16th February? I was not, I was on duty.
6382. Where were you doing duty on the 16th February? In the whole of the district—I was from the 3rd up to the 17th.
6383. What duty were you on in the morning or the night of the 18th? I was on night duty, and having had cases in the Court, on account of my opposite number being on the station I could not get off. I had to attend to the cases, and my time allowance was extended. Senior-constable Proctor came on duty at 10 o'clock, and as soon as he started on night duty it allowed me an opportunity of going off. I went off at 4 o'clock on the morning of the 18th, and also on the morning of the 20th.
6384. Well now, on the morning of the 18th, tell his Worship what you did? On the morning of the 18th, when I went off the station, Senior-constable Proctor remained on duty until 6 o'clock on the morning of the 18th. By reason of my time allowance that I should have had I went off at 4 o'clock.
6385. Where did you go or what did you do? I went home to my house and shifted myself first.
6386. What do you mean by that? Took off my uniform and put on my plain clothes, my soft felt hat, and old jumper.
6387. Where did you go or what did you do? I just had a cup of tea that is generally left made for me on the gas stove, and I went out the back way then.
6388. You do not mean to say that you have a gas stove in your house? One of those little gas rings—then I got my three bags that I generally get the sand in, that is the chaff bag and two littler bags inside.
6389. Where did you go? I went out the back way down Bullanaming-street, through Burns-lane into Botany-street, along Botany-street to the Salvation-lane, out into Regent-street, and along Margaret-street, going, that is crossing from the lane over to Margaret-street, going.
6390. That was the way you went? Yes.
6391. Having the bags with you? Yes, having the empty bags. Then I got the necessary sand then, that I generally carry, about a cwt. I suppose.
6392. What sized bags are these two small bags? There are two smaller kinds of bags than the chaff bag, similar material but smaller, and I generally put the sand in these and put them in one on top of the other, and tie them down tight.
6393. And carry them down tied? Yes.
6394. The larger bag assists you in carrying? The larger bag gives you that much of a grip of the stuff. I retraced my steps until I got to the church at the corner of Margaret-street and William-lane. William-lane is the right name, not Spence's lane.
6395. What time would that have been? That would have been about a quarter to 5, I should think.
6396. Now, on your way, did you see anybody? I walked through the lane until I came to the vacant ground, and on the vacant ground I generally used to have a spell, after carrying it from the bottom of Margaret-street. Whilst I was so spelling, sitting on the bags, Constable Hill passed down the street by the opening out from this vacant ground. Two-thirds of the opening in front was galvanised fencing and the other third was open but there was no fence at the back.
6397. The galvanised fencing is on what street? On the Regent-street front. 6398.

Senior-
constable
W. E. Quelch.
10 Nov., 1897.

6398. You were in this vacant land sitting down on the bags? Yes, with the electric light showing in through the opening. Constable Hill saw me and came in to me.
6399. Now relate the conversation that took place between you and Hill? I told him I had been getting some sand, so of course he could see that I was pretty well winded, and he said, "I will give you a lift," so I said, "I would rather you did not."
6400. He was in uniform? Yes. I said "I would rather you did not." Without any more to say he picked up the bags himself and carried them over to the Salvation Army-lane across the road. I walked alongside him. He dropped the bags then and returned on to his own side of the road.
6401. What did you do? I stood there a second and could see some one about 70 or 80 yards up on the the same footpath going up towards the station way, but who it was I could not tell. It was impossible to identify anybody at that time of the morning. I took the sand home and went to bed.
6402. The sand which you had in that bag you gathered as you described down at Margaret-street? Yes; the sand washes out of all the yards there down to the railway fence and it cannot get through, and then all the heavy rains come down and wash it through the fence like a sieve. Just inside the fence there is a gutter about 2 feet deep, and it thoroughly washes and drains the sand there.
6403. Have you some of that sand here? Is that a sample of the sand? This is a sample of the sand alongside the railway at the bottom of Margaret-street.
6404. That is what you call the washed sand. Is that the description of sand? [*Producing sample of sand.*]
6405. *Mr. Abigail.*] I have no opportunity of knowing where that was got from.
6406. *Mr. Bull.*] You swear that that was a portion of the sand actually got by you from this place? Yes.
6407. When was that got? In May.
6408. Not got specially for this, but a portion of the sand you got from this place, and you have some more in your yard now? Yes; I have half a hundredweight there now.
6409. At any rate, this sand is there even now for anybody to see? Anybody can see it.
6410. There was an accumulation of sand there when Mr. Johnson was there? I showed Constable Hill the sand the day that he came to the place.
6411. You have in that bag another sample of sand. What is that? This is some of the sand from the good old lady who just got out of the box. [*Another sample of sand produced.*]
6412. You did, as a fact, get a bag of sand from the old lady? Yes, I did. I got her grandson to cart it down, and gave him a shilling for doing it.
6413. You can describe what that sand was? Yes. I wanted my yard bricked, and I rooted up the asphalt myself, and built up the back lane, which was a source of annoyance there, with all my spare asphalt, and then I asked a gentleman named Lawson whether he would kindly lay some bricks.
6414. You got some bricks laid by Mr. Lawson? Yes. And I ordered—I think there were £2 4s. 8d. worth of bricks, at 25s. a thousand.
6415. That would be 1,700 bricks? 1,786 bricks from the Warren Brick-works; that is, Bakewell Brothers.
6416. When were those bricks got by you? On 8th July, 1896, I paid for them, and it was the first week in July when they came. As they were brought I carried them through from the front to the back, and these two gentlemen laid them.
6417. *His Worship.*] You say you got the sand for the brickwork? I bought half a cask of cement from Mr. Charles Roberts in Cleveland-street, Redfern, to mix with this sand. I have the cask and the balance of the cement still in my yard this day which I did not use.
6418. *Mr. Bull.*] This sand was some that had been tipped into Mrs. Robinson's yard? A man was charged with stealing sand. He was convicted; and in those cases or with stray horses the Redfern police always put them in her yard. This drayload of sand was also put in her yard, and after the man was convicted he tipped this load of sand in her yard; and as I wanted some sand, and it appeared good sand, I asked the old lady if she would be good enough to give me a bag of sand. She said, "You can have the whole lot," and I asked her grandson, as he was there doing nothing, whether he would be good enough to cart it down. The lad carted it down, and I gave him a shilling for it.
6419. And this sand is a sample of that which you got from the old lady? Yes.
6420. I want you to explain to Mr. Johnson when next you were on duty on the morning of the 18th? I was not on until 10 o'clock on the night of the 18th.
6421. You gave me instructions how long ago in this matter? On the 18th August, in the afternoon, that was the day following Mr. Dacey's speech in the House.
6422. You gave me certain information then? I did.
6423. And you gave me certain dates? I did.
6424. Have you ever spoken of the 13th February as the time when this particular circumstance happened? Never in my life.
6425. Or the 16th? Never in my life.
6426. From then up till now, and until now, the whole of your statement has had relation to the 18th, has it not? Yes.
6427. *Mr. Abigail.*] I object to that.
6428. *Mr. Bull.*] Then, if the circumstances which have been deposed to really occurred on the morning of the 16th, undoubtedly you were on duty all that night, and up till 6 o'clock? I was on duty right up till 6 o'clock, and, as far as I can recollect, I saw Constable Hill at the Bank corner, where he should be at half-past 4.
6429. On the very morning of the 16th? Constable Hill had no right whatever, according to his evidence, to be down where he was at 20 minutes past 4.
6430. On the morning of the 18th, Thursday, you were not on duty at all after 5 o'clock? No.
6431. Until what time at night? 10 o'clock.
6432. Now, just turn me up the entry of your hours of duty on the 18th? "Charge of relief, 12 to 6 a.m. and 10 to 12 p.m. "Charge of relief on Wednesday night, 17th, from 10 to 12. Charge of relief on the morning of the 18th, 12 to 6 a.m. Charge of relief, 10 to 12 p.m."
6433. *Mr. Abigail.*] It is the same all that week according to that book? No, it is not.
6434. *His Worship.*] What about the 16th? It says similar to what I have said.
6435. *Mr. Bull.*] It is not the same entry; in fact, it is from 10 to 6 on the morning of the 16th? Yes.
6436. *Mr. Abigail.*] Then on the 18th, 10 to 12 and 12 to 6? Yes. [*Exhibit No 37.*] 6437.

Senior-
constable
W. E. Quelch.
10 Nov., 1897.

6437. *Mr. Bull.*] What is the entry there with regard to your duty on the morning of the 18th? 12 to 6.
6438. He says that on the whole of the morning of Tuesday he was never off duty a moment, and was back with his relief at 6 o'clock. On the 18th he left at 4 o'clock, and never went back until 10 at night. That is his statement.
6439. *Witness.*] There is a discrepancy in the book. If you look at the 16th February, there you will see Constable Walker booked right up till 6 o'clock. That constable was off at court; he had a prisoner in named Florence Ward.
6440. You heard me ask Proctor? Yes.
6441. With regard to that one entry with regard to Proctor, you remember that Proctor was identified with that inquest? Yes, he went off very early that morning. It was a case of abortion.
6442. What time did he leave? About half-past 3.
6443. And in that book he is entered up till 6 o'clock? Right up till 6 o'clock.
6444. For the information of the Commissioner, you have made extracts from the book there of circumstances within your knowledge? Within my knowledge.
6445. Not matters that you searched the books for, but circumstances within your knowledge? I came to the conclusion, when I saw the discrepancies in this case here, that I could have found a dozen more. I found two instances there where I have been booked off under this new order about closing shops. I went off two mornings at 4 o'clock, and it is booked up there right up to 6 o'clock. The serjeant in charge of the station goes to bed at 3 o'clock. He makes up that book before he goes to bed; so, after 3 o'clock, when he has gone to bed, he does not know what takes place. One of the senior-constables might take their time off, and, naturally enough, having made up the book to the night before, he never looks at the book any more, and never alters it. It is quite reasonable. I should, perhaps, be subject to the same irregularities myself.
6446. Now, on the night of the 17th, Proctor went on duty? Yes.
6447. He had been from the 3rd to the 17th in charge of the station? He had been the serjeant in charge of the station. Serjeant Houlahan had been on leave for a month or three weeks. He came back and took up his usual running, and Senior-constable Proctor was my opposite number out at night time. He came on, and, of course, I, having my time due to me, then took my time off that was due to me.
6448. *His Worship.*] What time did the senior-constable go off duty on the 16th? He would not go off until 10 o'clock.
6449. *Mr. Abigail.*] Who was the officer in charge of the station on the 18th? He would be Serjeant Houlahan, I think—either Senior-constable Shaw or Serjeant Houlahan.
6450. *Mr. Bull.*] Hill had every opportunity, had he not, of finding out what you were carrying? Yes.
6451. Do you remember any remark that he made at the time, either whilst you were sitting on the bag or whilst he was carrying it across the road? The only remark he made was something about it being heavy, and something about "You cannot carry that far."
6452. *His Worship.*] You did not bring the relief in on the morning of the 16th? Yes; I did. I was on right up to 6 o'clock.
6453. On the morning of the 18th did you bring the relief in? No; I did not.
6454. Who was there on the morning of the 18th? Senior-constable Proctor.
6455. But you say that, although he had made the entry, he was not actually there? He would be out in the streets then, and would march the relief off, and the other serjeant would be in bed then, and there would only be a constable in the station—unless, in consequence of some order, Senior-constable Shaw was there.
6456. You say you did not bring the relief in on the 18th. There must be somebody in the station that could say whether you brought them in or not? That would be Serjeant Houlahan in the station on the morning of the 18th, and he would be in bed.
6457. Whom would the relief report to? Who would muster them? Senior-constable Proctor.
6458. *Mr. Bull.*] You say that at 6 o'clock Houlahan would be in bed? Yes.
6459. I asked Proctor distinctly with regard to the relief on the morning of the 16th. There is no dispute in the world that Quelch was the officer in charge of the relief on the 16th. You heard the statement made by Bath? Yes.
6460. Did you understand where he said he had seen you, or he had seen a man? I understood well.
6461. What was the nearest point that you were to Pogson's store during the time that you were going for and returning with that sand on the morning of the 18th? The vacant allotment of ground.
6462. Whether the morning was the 16th as they say it was, or the 18th as you swear it was, were you near Pogson's store that morning? Not at all.
6463. Is there any foundation in the world for this insinuation or allegation that you were carrying in that bag then two 70-lb. weight bags of sugar? Nothing in the world.
6464. This is not the first time the allegation or insinuation was made? It has been insinuated in every charge before the Commission.
6465. And you heard my friend this morning say that whether it was sand or sugar, it did not matter which, you had committed a distinct neglect of duty by going off and going on again? Yes.
6466. *His Worship.*] You did not pass the store did you? No, I did not go near it.
6467. *Mr. Bull.*] You have described the course you took and the way you went to and fro? Yes.
6468. Now, did you afterwards have a conversation with Hill. You explain to his Worship, Mr. Johnson, what these back premises of Pogson's are. You have made an examination of them since? Yes.
6469. And you have formulated a plan? I have.
6470. And does this truthfully show the location? Exactly as it is now.
6471. Was it in the same condition in February? Yes.
6472. You show here the condition of those premises in February last? Yes.
6473. *His Worship.*] Mark on that plan [*Exhibit No. 31*] the track you took? [*Witness marked on the plan in blue the track he took from his residence to the foot of Margaret-street, and in red the course he took on the return journey with the sand from the foot of Margaret-street to his residence in George-street.*] This is the public school. There is a terrace of houses here. That is my house. [*Marked B on plan.*] I came out at the back lane there. That is the private lane that I built up. I proceeded by the private lane by Bullanaming-street, down Bullanaming-street to Burns lane, round Burns lane into Botany-street, across Botany-street to the opposite side, up Botany-street to a lane right opposite the Salvation Army Barracks.

There

There is a lane then goes right through into Botany Road or Regent-street. From there I went to Curtis's Presbyterian Church, at the corner of Margaret-street, then straight down Margaret-street to the sand. After obtaining the sand I retraced my steps again until I got to William lane, behind the Presbyterian Church, along William lane to Absalom's vacant land, where I rested. [*Vacant land marked C on plan, blue cross where Quelch rested.*] This is the end where the opening is. All this end is galvanised fence to there. That is the frontage to Botany Road or Regent-street. There Constable Hill saw me. He would be coming down this street, Botany Road. Constable Hill should be at this corner of Redfern-street and Botany Road at half-past 4 that morning. When Constable Hill came in he picked up the bag and carried it out right across this private lane leading from Botany Road into Botany-street. I then picked up the bag and carried it the remainder of the way home, retracing my previous steps.

Senior-
constable
W. E. Quelch.
10 Nov., 1897.

6474. Here is Pogson's store, here? Yes.
6475. The nearest point that you would be to Pogson's store at any time would be at the corner of that lane and Botany-street, would it not? Oh, no; you see I would have to come round here, a long way round.
6476. The nearest point, as a matter of actual distance, that you would be to Pogson's would be at the corner of this lane—Burns-lane—opening into Botany-street? Yes.
6477. But, to reach Pogson's, you would have to still traverse Botany-street, and down Raglan-street, and up Botany Road to Pogson's frontage? Yes.
6478. Then you were not at any point south of this vacant piece of land? Not a bit.
6479. From Botany Road to Pogson's? Not a bit—not a foot.
6480. And now, how often, would you say, have you gone to this place in Margaret-street for sand? About four times a year.
6481. How many times do you think you have got sand from there? I should say I have got it about fifteen or sixteen times.
6482. And those fifteen or sixteen times have extended over how many years? Between three and four years.
6483. Now, with regard to the sand which old Mrs. Robinson was asked about, when was it that that sand was obtained from her? In July, 1896.
6484. There is no doubt in the world about that? No doubt about it.
6485. It was got for that job which you have described those bricks were obtained for, and the work itself was done in July? Yes.
6486. And that sand was used for that cement, and with those bricks? Yes.
6487. It has been suggested to you that there was some sand in some property of Mr. Hudson's nearer to your house? It is a different sand altogether, on private property, fenced in with a barbed wire fence and a locked gate.
6488. During the whole time you have been there have you ever obtained sand there? Not a handful.
6489. Is it a natural sand? There was a paddock where he has a terrace of about ten houses adjoining his large private house, and Mr. Hudson has rented this paddock from the F. A. Wright family, and he runs his horses, poultry, and cows in this paddock, and there has been a little sign up "Key with Mr. James, close by." When Mr. Hudson bought this ground he built this terrace, and when mixing the mortar for that terrace they dug certain holes out to get the cleanest sand for the terrace. That is the only thing I have seen the sand used for. I do not think he would sell you the sand.
6490. It is an excavation? Yes.
6491. It is not a sand mound, is it? No. Mr. Hudson had to search to get good sand for his buildings. The terrace was built for sale and sold.
6492. Have you ever on any occasion either asked for or obtained sand free from that place of Hudson's? Never asked for any at all.
6493. For the purpose of your canaries? Not at all.
6494. When did you have a conversation with Hill? I came straight from your office on the afternoon of August, the 18th, the day after Mr. Dacey spoke in the House.
6495. Where did you see Hill? In Union-street.
6496. Up to that day, the 18th August, did Hill ever fix the day as the 16th? Never.
6497. You had never seen any date fixed by him? Never; I asked him.
6498. And in the conversation you had with him that day, what did you say to him? I asked him whether he could give me the date that he saw me fetching some sand for my canaries. He said he could not give me the date. He then asked me what I wanted the date for. I told him I had just come from my solicitor's office, and by what I had heard pass in the House it appeared to me that some individual was not very particular what they said, or what they accused me of, but I wanted him to give me the date that he saw me, and he said, "What do you want to trouble about it for? What is there in it." He said, "Big-mouthed McSweeney came to me and asked me about it."
6499. Is that a police officer? Yes.
6500. Is that a nickname of his? No; that is how he expressed it; "And I told him to go and mind his own business, that he was only a mischief-maker amongst the men. What harm is there in it? A bit of sand, and you were off duty, and in plain clothes. I know that, and no one else can say any different." I then said to him, "Well, I want you to remember the circumstance as much as ever you can, as no doubt there will be an inquiry into the matter, and I will have to call upon you as a witness," so he had better stand up like myself. He then said in answer to that, "Well, I can only tell you the same, or anybody, as I have just told you now." I believe the next day Constable Hill gave in a report. [*A report was handed to the Commissioner, Exhibit No. 30.*] That is not the report. The night of the 18th August going on duty at 10 o'clock I brought the circumstance under the notice of Inspector Lawless before starting out on the streets.
6501. What time would that be? 10 o'clock.
6502. You drew the inspector's attention to certain circumstances? To having interviewed Constable Hill.
6503. And did you relate the conversation to Lawless that you had had? Yes, that I interviewed Constable Hill, and I related the circumstances to him. That same night at 11:15 p.m.—at that time I was going off sick, I was bad with my head, I suffered with my head and my bowels; I have a head complaint and a bowel complaint. I am subject to inflammation of my bowels, and it affects my head. I met Constable Lambert

Senior-
constable
W. E. Quelch.
10 Nov., 1897.

- Lambert at the corner of Botany-street and Raglan-street at 11.15 p.m. I then had a conversation with Constable Lambert with reference to Pogson's shop. I asked Constable Lambert whether he recollected the time that I found Mr. Pogson's shop door open, he said, "Yes." I told him then the same as I told Constable Hill about having consulted my solicitor, and I was going to call on him as a witness. Constable Lambert then said, "It is in the book, and I am prepared to go on my oath and corroborate you in that part." Not another instance did he mention with reference to Mr. Pogson's shop. Not another sentence did he utter.
6504. You have a plan there which you say is accurately drawn showing the location of the premises there? Yes.
6505. I want you to describe what these premises are and what facilities a man carrying two bags of sugar weighing 140 lb. would have to get out. First of all, is there a back entrance into Pogson's? None whatever.
6506. How do people obtain back entrance into his premises? The only way they could obtain admittance into Pogson's from McNamee's-lane is either by getting over Mr. Flynn's fences, about 6 or 7 feet high into Mr. Flynn's yard, and then by Mr. Flynn's yard into Pogson's yard.
6507. How many fences would they have to get over? A 7-foot double-gate barbed-wired and locked; and that would bring them over into another private yard, a cottage yard, and from that private yard they would have to get over another private fence to get into Mr. Pogson's yard. That is coming from McNamee's-lane. Then getting sideways from Mr. Pogson's yard they would have to get over two 6-foot fences to allow them to get into the second cottage, and then if that back gate was locked they would have to come out still in Botany Road, four doors from Mr. Pogson's shop. Then to come out of Spence's-lane you can get in the cottage yard at the back, and if the gate was unlocked there you could pass through that gate into the same lane, and you would still have to get over a 6-foot fence. After you have got over those fences there and these fences here you can pass through the side of this cottage, and that would bring you out into some vacant ground partly built upon adjoining the back of those cottages on to some vacant ground here. Then there is still another back gate 8 feet high, locked, that brings you out into Spence's-lane. Each side of that gate—this side there is a large two-storied stable, and that side is a stable which I suppose is about 20 feet, and about 10 to 12 feet high.
6508. Those are the obstacles which are in the way of people getting in and out? Yes.
6509. Now, you have heard Mr. Pogson's statement? Yes.
6510. Has Pogson ever made any statement to you, or have you heard any statement made by Pogson with regard to his shop having been looted on the night of the 16th or 18th? I have never heard such a thing. I have had many a most friendly conversation with Mr. Pogson since then, night and day.
6511. Now, it has dawned upon us, up till now, at any rate, that there is not the very best feeling towards you amongst some of the men up at Redfern? That is quite feasible. That is fully shown here.
6512. Take the last witness, Christison. Do you remember my asking him with regard to some complaint made by him? Yes.
6513. You heard him insinuate that a charge upon which he was convicted by the Superintendent was unfounded, and that he asked that the evidence might be taken on oath? I remember something about the taking of evidence on oath, but each constable was given the fullest opportunity in writing to explain their case and everything else, and they were also given the fullest opportunity in the Superintendent's office. I found these two constables gossiping together off their beat with a bottle of beer, drinking. As soon as they saw me coming, Constable Begg dropped the bottle of beer behind the corner. I picked it up.
6514. *Mr. Abigail.*] You see the unfairness of this, your Worship.
6515. *His Worship.*] I think you had better stop all that.
6516. *Mr. Bull.*] You heard me asking whether as a fact he had not been found not only gossiping, but with his friend Begg having a draught from a bottle of beer? Yes.
6517. *His Worship.*] You heard the evidence of Bath. Did you pass the place where he keeps his horses? No.
6518. You heard his evidence that he saw you pass there? He saw a man.
6519. Carrying a bag. You say you did not pass that way? No, your Worship.
6520. He could not have seen you? No, your Worship.
6521. Could he have seen you from his place? He could not have seen me at all from the direction I came, because behind these stables—I think he swore that his stables come up to Spence's-lane, they do not—there is a double-fronted cottage behind the stables at the corner of the lane, a weatherboard cottage.
6522. You say you did not pass within sight of his stables? No, your Worship.
6523. *Mr. Bull.*] On the mornings of Tuesday, Thursday, and Saturday there were numbers of people passing at all hours, carrying all sorts of things? Going on Botany Road Tuesdays, Thursdays, and Saturdays you will see all sorts of people carrying all sorts of things—baskets and bags, and all sorts of things.
6524. What time do the fish markets open? Every morning.
6525. What time? Four o'clock. There are two markets within 200 to 300 yards away, Mr. McFadyen's and Hudson's Fish Markets.
6526. Then the Belmore Markets are at the Haymarket? Yes.
6527. Was there any necessity in the world for your being down where Bath says he saw a man carrying a bag? Not at all. If I had gone down in that direction I would have to have gone, I suppose, about half a mile out of my way.
6528. Suppose, for the sake of argument, you had got what you had at Pogson's, how far would you have had to carry that by the road they say they saw you? A good deal further. Carrying it the way they say I went, I would have had fully 300 yards to go.
6529. I suppose you usually pick the nearest way home if you have anything to carry? Most decidedly that is the nearest way home that I took. The only difference would be this: that coming down this way would enable me to have a rest in the vacant allotment.
6530. *Mr. Abigail.*] You will admit at once that, if for the sake of argument, it is assumed that you were coming along Spence's-lane and crossing Boundary-street, that it would be right, and just, and probable to call upon you for some explanation of why you were in that locality? If I were there, decidedly.
6531. You were the constable in charge of the relief all that week? Yes; all the week.
6532. You knew exactly where the men ought to be on different stations on that beat? I do; the whole distance.
6533. So that, if Constable Hill should have been there, as you say now he should have been, at the corner of Redfern-street, near the Australian Joint Stock Bank, at half-past 4, and you wanted to avoid him, you would have best avoided him by coming down here and resting there to give him time to pass? There was nothing to be afraid of.

Senior-
constable
W. E. Quelch.
10 Nov., 1897.

6534. You can see, assuming what I say to be correct, you could have escaped in that way had you wished to? If I wanted to escape Constable Hill, of course I could. I could have gone half a dozen ways to escape him.
6535. Why did not you, knowing that Constable Hill had done wrong in being outside that vacant allotment and talking to a constable, why did not you report him for being here outside that vacant allotment instead of up there at 4.30. You see you are such a stickler for gossiping and neglect of duty, why did you not report him for neglect of duty. You did not report him; did you? I never saw him gossiping. I never saw Constable Whitehair.
6536. Why did not you report Constable Hill for being outside this vacant allotment when he should have been up there at 4.30? Senior-constable Harrison lives out in the Beaconsfield Estate. That senior-constable has to be called for duty at 6 a.m. The constables on this ground are allowed a certain privilege in order to be on that corner earlier. We generally give them half an hour. That would give them to 4 o'clock. This very week in particular Senior-constable Harrison was not to be called. He was doing special duty. He did not come on until 9 o'clock. He was on special duty collecting the school returns, therefore Constable Hill had no right to be on that corner until half-past 4.
6537. That is what I say. You knew that and did not report him? I have only found out this since.
6538. When you came out of that vacant allotment and chatted to Hill, why did not you then immediately look at your watch. Why did not you say, "Hill, you ought not to be here"? I was off duty. I do not report men when I am off duty.
6539. Who was in charge? Senior-constable Proctor.
6540. In charge of the division? Yes.
6541. Were not you in charge of the relief also? That is what I say. I was home. Senior-constable Proctor remained on.
6542. You admit that it was quicker for you to have gone this way, when you got to Botany Road to have gone right across Botany Road by the Presbyterian Church? Yes.
6543. When you went that way you had the empty bags, nothing to carry? Yes.
6544. Why did you on your return take the longest way round with the full bags? To have a spell.
6545. Could not you have had a spell in the Botany Road or Boundary-street? It is not usual for a police officer to be seen carrying things early in the morning.
6546. That is what we say. Why did not you stop here behind the church. It would have been away from the public gaze. Why if you wanted a place to spell at did you not spell there, just at the back of the Regent-street church? Because the railway men nearly always pass down there, and I wanted to get away from the public gaze.
6547. Then why did you not come a little way down here in this lane and spell there? I carried it as far as I was able.
6548. From this point there right down there in that lane to where you have put your blue cross [*marked C on map*] is much farther than if you had gone round here and got to there? Very little further.
6549. Now, if you wanted to get out of the public gaze why did not you take this road, and when you got out of the public gaze in that lane (Salvation Army-lane) why not take your spell there? No. It is very much used, and right at the very bottom of it there is an electric light.
6550. But you know that Hill says here that where he was standing there was an electric light, which shot its rays right across that vacant allotment? Oh, no; it does not. Nothing of the sort. It shoots its light diagonally across.
6551. Now, you had been on duty from 10 to 6 the previous night? Yes.
6552. You went on duty at midnight, and worked up to what hour—that is, assuming that you are correct about the 18th? Four o'clock.
6553. Now, this was at 4.20; do you say that in twenty minutes you could have got from the station to your home, had your tea—which you say was prepared by the aid of the gas-ring, put your uniform off, your slouch hat on, your jumper, got your bags, went right down here, filled your sand up, and came back, and you were very tired, and had to spell, and you did all that in twenty minutes? I did not say that.
6554. But the others do? The others say it. It was near 5 o'clock, and that is what Constable Hill told me on the night of the 18th of August; that would bring him right from his starting point.
6555. That is a little thing that escaped your attention? Nothing escaped my attention.
6556. That is what we say. You were so tired that you did not want to go on for another two hours duty; you wanted to be relieved, so as to do your court case in the morning. Why did you choose this particular hour of the morning to go for the sand? I always chose that time.
6557. Do you always take the same route? Yes.
6558. And always spell exactly in the same place in the paddock? Yes.
6559. Have you ever been seen there before? Yes.
6560. Whom by? Civilians have seen me.
6561. Can you produce a policeman who has seen you there before? No; I can produce plenty of civilians who have seen me there.
6562. And yet you say you rested there because you did not want to be seen. Can you produce one civilian who has ever seen you, or give the name of any civilian who has ever seen you? If I had known such a thing as this was coming to the front, I would have had plenty of them.
6563. Can you produce a policeman? No.
6564. The fact is you never had collided with these police officers before? No.
6565. Do you remember that Hill has sworn here that when he saw you he said, "Hallo, what's the matter?" and that you said that you were getting some sand for your canaries? I said, "Oh, I have got some sand for my canaries."
6566. Did you say you had got the men down at the railway to fill it up for you? That is absolutely a fabrication.
6567. You were on friendly terms with him. You actually gave him a canary? Whom could I get at that hour of the morning to fill them up for me?
6568. That is not an answer. Have you brought your bags here? No.
6569. Have you got them at home? Yes.
6570. Then you say that that is pure fabrication when Hill says you told him that? It is.
6571. Are not you changing your ground now? No; I never said such a thing.
6572. Do you know of anybody who has seen you getting sand in Margaret-street abutting on the railway premises? I do not know of anybody.

Senior-
constable
W. E. Quelch.
10 Nov., 1897.

6573. How much sand do you say you had in these bags? About 1 cwt.
 6574. Would a bag 2 feet by 3½ feet hold that weight? Yes, it would.
 6575. Why did you think it necessary to go to Mrs. Robinson's and remind her that you had got some sand from her? When I see certain officers belonging to the Redfern police over there trying to coax her about something — [interrupted].
 6576. You thought you would go over and see? Yes.
 6577. And you reminded her that once upon a time you had got a bag of sand there? I admit I got a bag of sand there.
 6578. Why did you think it necessary to remind her about that when you say now you had bought that in 1896? I knew the woman was going to be subpoenaed as a witness.
 6579. But, at that time, you did not know there was going to be an inquiry? When I went to Mrs. Robinson's this Commission had almost started.
 6580. When did you go? I suppose about four or five weeks ago. I went into the station the other night and brought the serjeant out to see one of these "sand" men yarning to this old lady.
 6581. Is it not a fact that finding you were cornered about this Margaret-street sand you thought you must have two strings to your bow and must run poor old Mrs. Robinson in? No.
 6582. Did not you try to mystify the old woman so that you might bring her here? No.
 6583. You have been there to Margaret-street for sand fifteen or sixteen times? Yes.
 6584. When were you there last? May.
 6585. Have you been since? No.
 6586. And yet you say you go four times in the year, although for six months you have not gone for a fresh supply of sand? No.
 6587. But you see on your own showing you were there in February and in May, and should have been there three months ago? Yes.
 6588. And three months ago there was no hint about a commission? It was hinted pretty straight to me long since.
 6589. Is that why you did not go there? I won't go any more, I will get somebody to fetch it for me.
 6590. You got enough sand in May to last you six months? I have had enough to do to attend to other matters without attending to the birds. I have had to trust to my wife and my little boy.
 6591. The birds have had to look after themselves? Yes.
 6592. Have you ever been on this sand hill of Hudson's? Before it was fenced in?
 6593. How long ago was that? Years.
 6594. How many years? It might have been five or six years ago.
 6595. How do you know that the sand there is not good enough for canaries? It is a dirty class of sand.
 6596. Can you remember it since years ago? Yes.
 6597. But you know it was used for building purposes? I do.
 6598. You know it must be pretty good to be good enough for that? No, they had to dig pits to find sand fit enough.
 6599. Was not the vegetation barely taken off—the top layer—and then beautiful sand laid open? There was no beautiful sand about it; I can bring witnesses here that will tell you that they had to dig holes to get at good sand.
 6600. Is not this gate of Hudson's like a railway gate, that anybody can get through? Not at all.
 6601. Why did you think it necessary, after reading this speech in the paper, to go and see Mr. Bull—you did not waste any time about it? No.
 6602. And immediately you came from Mr. Bull's office you met Hill? Yes.
 6603. Did not you go deliberately to see him? I went down that way.
 6604. Why don't you say straight that you wanted to go to Hill, and you went to Hill's street; you know he lives in Union-street? He lives at the corner of Union-street.
 6605. You had a chat with him? Yes.
 6606. You went down to see him? I did.
 6607. Why did you think it necessary if there was nothing in it to go down and have a chat about it? Did not you go down to make a friend of him? No.
 6608. Because you had given him a canary? No.
 6609. Did not you tell Mr. Bull that? Since I told him.
 6610. Will you tell me why it was that Hill was not asked a question about this alleged conversation that you deposed to, where you said, "Can you fix me the date?" and he said, "No, I cannot," and he said, "Why do you want to trouble about it, there is nothing in it"? Why did not he give it in his own evidence?
 6611. Why did not you ask him about it? Because Mr. Bull did not choose to ask him.
 6612. You met Constable Lambert? Yes.
 6613. Is that the same Constable Lambert who gave evidence against you in that case of Pogson's? Yes.
 6614. So that you thought Hill and Lambert were truthful enough men to be called in your behalf as witnesses? Yes.
 6615. But finding that they could not give the evidence you wished them to give for you, you now wish to insinuate that they are not witnesses of truth? I do.
 6616. You have had no quarrel with Hill? No.
 6617. And you have had no quarrel from that time until to-day? No, I cannot say I have. I have not spoken to him.
 6618. Do you think it at all likely, is it a reasonable or proper thing to believe that Hill would come into the box and tell a distinct lie to injure you? I do.
 6619. What is his motive? I do not know. He has said certain things.
 6620. You think he would tell a distinct lie to injure you, and you do not know what his motive could be? I do.
 6621. You say you did not come along here, but you heard Bath say he saw somebody come along there, and you say, "Oh, there were plenty of fishermen about," and you insinuate that it was a fisherman? There are plenty of people pass there in the morning.
 6622. Have you ever seen fishermen carrying big bags on their backs? Yes.
 6623. Chaff bags? Yes.
 6624. Full of fish? Yes, I have seen them carrying fish.

Senior-constable George Proctor was recalled :—

Senior-
constable
G. Proctor.

10 Nov., 1897.

6625. *His Worship.*] You have the Duty Book for the 16th, 17th, and 18th February? Yes.
6626. You see that in the 16th, 17th, and 18th Senior-constable Quelch is entered there as on duty from 12 to 6 a.m.? On the 16th, 17th, and 18th, yes, sir.
6627. Do these entries absolutely represent the time that he would be at the station? They do.
6628. Would you be at the station when the relief came in at 6 o'clock on these mornings? I am not positive that I was up and saw them in on these mornings.
6629. You are not positive that you were there on Thursday, the 18th, at 6 o'clock, to see the relief brought in by Senior-constable Quelch? I think I was bringing them in myself on the 18th.
6630. Did Quelch bring them in on the 18th? We would be both together most likely.
6631. Do you recollect the fact, whether you did or not? Would you mind my looking at the book to see if I was on myself on that morning. [*Book was handed to witness.*]
6632. It has been said that the entry might be made before you left? On the 18th I should have brought in the relief with Quelch, or myself.
6633. Are you certain whether Quelch was there or not? I will not swear it.
6634. But on the 16th he was? He should have been.
6635. Do you recollect whether he was there on the 16th? I would not swear, and I would not swear he was not there.
6636. *Mr. Bull.*] Do you remember Quelch being off one morning early? Yes; he was.
6637. Can you say what morning that was? That was one or two mornings after I started night duty.
6638. When did you start night duty? On the night of the 17th I went on at 10 o'clock—from 10 to 12. That brought me out from 12 to 6 on the morning of the 17th. On the morning of the 18th I was on station duty till 10 a.m.
6639. *His Worship.*] Are you in a position to say that he mustered the watch at 6 a.m. on that morning? I had done station duty on the morning of the 16th, from 12 to 6 a.m. I did not come on again that day, but on the next day I came on from 10 to 12 o'clock at night, starting night duty, and then that brought me out from 12 to 6 a.m. on the morning of the 17th.
6640. You are not in a position to state that he was there with the relief at 6 a.m.? I would not swear that.
6641. *Mr. Abigail.*] You would swear that he was not? I would not swear that he was not. I have no recollection.
6642. *Mr. Bull.*] Do you remember the circumstance that he was off duty one morning, and immediately after you went on night duty again? I know that.
6643. Do you remember the circumstance of you going off yourself early on the morning of the 19th? Yes, I went off one morning early.
6644. Do you not remember that Quelch went off again on the 20th? He went off one or two mornings that month I know.
6645. *His Worship.*] Did you see him on duty at 6 a.m. on the 16th? I would not swear that he came in or did not.
6646. But it was his duty to do it? It was his duty to do it.
6647. That entry was made before 6 o'clock that morning? Yes; there is no doubt that I did bring the relief in on the morning of the 18th.
6648. *Mr. Bull.*] Do you remember, then, that on the 19th you were off and he was on, and he was off on the 20th and you were on? I am not sure, but I know he did go off one morning after that: "18th February, 1897, charge of relief 12 to 6 a.m. and 10 to 12 p.m.;" "19th February, 1897, charge of relief 12 to 6 a.m. and 10 to 12 p.m.;" "20th February, 1897, charge of relief 12 to 4 a.m. and 10 to 12 p.m.?" That is correct.
6649. You now say that there is no doubt in the world about it that you had charge of the relief on the morning of the 18th? I believe that.
6650. You will venture upon oath about that now? I would not like to venture upon oath, but I quite believe it is correct.
6651. Now I refer to the entry of Saturday, the 20th. Does this bring the matter to your recollection that on the morning of the 18th Quelch was off, and the 19th you were off, and on the 20th he was off? "18th February, 1897, S.C. Quelch, charge of relief 12 to 5 a.m. and 10 to 12 p.m.;" and "19th February, 1897, S.C. Proctor, charge of relief 12 to 5 a.m. (off for Court) and 10 to 12 p.m.;" and "20th February, 1897, S.C. Quelch, charge of relief 12 to 4 a.m. and 10 to 12 p.m.?" There is no doubt that is correct.
6652. *His Worship.*] Then that entry there might not actually be a fact although it was made? There is a possibility that it was a clerical error.
6653. *Mr. Bull.*] Did not you say in answer to me some time ago when you were called that the serjeant in charge makes up his books up to the time when he goes to bed, which is 3 a.m.? It is generally. Serjeant Houlahan and myself—we do generally when we are there. Senior-constable Shaw does not.
6654. *His Worship.*] They are made in anticipation? Yes.
6655. And there might be some alteration in the morning? Yes.
6656. *Mr. Bull.*] Can you see an alteration here in the book where it has come to the knowledge of the officer that the man has been off duty and the entry has been altered accordingly? I know, for my part, when I am on station duty and I find that a man has locked up a prisoner after the books are made up, and that he goes off, I make the correction afterwards before I go off.
6657. You really believe that on the morning of the 18th you attended to the relief yourself? I might say this, I being the senior officer would be in charge of the relief even though Quelch was there. I would have the responsibility of the relief. I am not sure whether Quelch was there that morning. I could not swear one way or the other.
6658. *Mr. Abigail.*] You would say you did not know he was off duty, or else a note would have been made.
6659. *Mr. Bull.*] Your evidence is that one or two nights after you went off duty Quelch went off duty? Yes, that was so.

[The Commission then adjourned.]

MONDAY,

MONDAY, 15 NOVEMBER, 1897.

[The Commission resumed its sittings at 10 a.m., at the Central Police Court.]

Present:—

WHITTINGDALE JOHNSON, ESQUIRE, S.M. (SOLE COMMISSIONER).

J. R. Dacey, Esquire, M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, Solicitor, appeared in support of the charges on behalf of Mr. J. R. Dacey, M.L.A.;
Mr. C. Bull, M.L.A., Solicitor, appeared on behalf of Senior-constable W. E. Quelch.

Charge No. 8 (continued):—

Mr. Abigail: Whitehair is going to be called because he made a note of this particular date.

Mr. Bull: I object to this. My friend has called every witness he could call with regard to this charge. I gave him no information at all of what date I intended to show it was. Now that we have shown that they must have been mistaken in the date, my friend wants at this stage to do what I submit was never done in the course of judicial investigation before—hear our case, get evidence showing that it must have been the 18th and they must have been mistaken, and then call a witness who has already given evidence to produce evidence which might be fabricated, and put him now in the box at this stage, with what object in the world?

Mr. Abigail: My object is to get at the truth. It will be for your Worship to say whether this piece of paper has been fabricated, or whether this man did truly and honestly make a note of the date on a piece of paper which he has kept since.

Mr. Bull: I object to this evidence being called at this stage. I can show a conversation between Mr. Dacey and himself after the adjournment here on the last day, and does not your Worship see how dangerous this would be?

His Worship: I want everything that will throw light on it.

Constable Frederick Whitehair was recalled:—

- Constable F. Whitehair.
15 Nov., 1897.
6660. *Mr. Abigail*.] Do you produce a memorandum which you made with reference to this sand case? Well, in reference to a man carrying a bag, yes.
6661. And appertaining or having relation to the evidence you gave here the other day in this case? Yes.
6662. Just produce it to his Worship? [*Witness passed Exhibit No. 34 to his Worship.*]
6663. *His Worship*.] That is the man you saw carrying a bag at this particular place? It was reported that there was a man evading me in a paddock, and I asked the constable who it was.
6664. Was the man that you saw Quelch? I could not say that.
6665. *Mr. Abigail*.] Constable Hill said that he was speaking to this man on the other side of the road when Quelch came over, and Whitehair immediately left after seeing a man and Hill carrying this bag of sand. Then your Worship remembers that you have the other evidence to clear up any doubt as to whether it was Quelch or not that Hill spoke to, but Quelch says it was on the 18th and not the 16th. (*To the witness*): You deposed to seeing Constable Hill and a man on the 16th February last, carrying a bag of sand across the road? No; just talking at the gateway.
6666. And you saw the man that Hill was talking to with a bag? Yes.
6667. Did you make an entry? Yes.
6668. Hand that to his Worship again? I asked Hill who this man was at a quarter to 6.
6669. You had a conversation subsequently with Hill about what you had seen? Yes.
6670. And in consequence of that did you make this written memorandum? On the 16th, yes.
6671. And did you make that memorandum on the day that it bears date? Yes.
6672. What date was that? The 16th February.
6673. Did you make that after you had spoken about the matter to Christison? After I went home. I was on night duty then.
6674. *His Worship*.] Did you show it to anybody? Not at the time, not up till latterly.
6675. This is the memorandum you made—"On the morning of the 16th February, 1897, Constable Hill stopped Senior-constable Quelch dressed in an old Water Police jumper and a felt hat, carrying a bag which he said contained sand for his canaries. Jones, the produce merchant's man, also saw him coming out of Absalom's paddock, supposed he was a burglar. (Signed) Frederick Whitehair, constable. Special constable Brewin also near at hand. F. Frederick Whitehair."
6676. *His Worship*.] Did you speak to Quelch? No, sir.
6677. *Mr. Abigail*.] You say you made that out on the 16th? Yes.
6678. On the very morning that you saw Constable Hill speaking to the man with the bag? Yes.
6679. In Botany Road? Yes.
6680. And you made it out after you had had a conversation with Hill? Yes.
6681. From whom you heard that the man was, as he alleged, Quelch? Yes; as he said.
6682. And you have already deposed that you had suspicions in your mind when you went on your beat again? Oh no, I had no suspicions of Quelch at all.
6683. What did you say? Of course after I saw this man I did not see Hill until a quarter to 6, but previous to that I heard of this man in the paddock from a night-watchman, and I thought if a robbery had been reported Mr. Lawless was sure to call the men on the adjoining beats together, and I made a note of that to explain it.
6684. *Mr. Bull*.] What robbery? There was no robbery.
6685. *Mr. Abigail*.] He heard from Brewin that a supposed burglar was about. Brewin did not know who the man was; and he heard that a man came from the paddock, and thinking that Mr. Lawless, hearing of the robbery, would be bound to call the men together on the adjoining beats, he made that note. (*To the witness*): Did you have this paper with you in the Court the other day? Yes.
6686. You had had no previous chat with me? No.
6687. You had not seen me in the matter, had you? No.
6688. *His Worship*.] When did you hand in that report to Brennan? Not to Brennan; I never spoke to Brennan about it at all. I merely wrote that for my own protection in case Mr. Lawless called me up.

6689. *Mr. Abigail.*] But if you see anything suspicious are you not supposed to report it? I only heard that from Hill; but afterwards, hearing it was Quelch, I did not report it. It was on Hill's side of the beat. Constable F. Whitehair.

15 Nov., 1897.

6690. You say it was the 16th? I have no doubt it was the 16th.

6691. Now I am going to throw some light on this from the book itself. It is a thing that escaped my attention until I had my attention particularly drawn to it. You look upon the Duty Book during the week ending Saturday, 20th February, 1897; you see an entry, "Saturday, 20th, W. E. Quelch, senior-constable, charge of relief, 12 to 4 a.m.," not 12 to 6 a.m.," as in other cases? Yes, I see that.

6692. You see the previous entries, from the Sunday to the Friday, inclusive, show that Quelch's duty was from 12 to 6 a.m.? Yes.

6693. What I am submitting that for is to show that if he were off at all that week he was off that day.

6694. *His Worship.*] It is sworn he was off both days.

6695. *Mr. Abigail.*] In so far as the book can help me, I submit that the only entry showing an alteration in the duty is that entry of the 20th, and not of the 18th.

6696. *Mr. Bull.*] Quelch had no conversation with you, either on the morning of the 16th or the 18th, had he? In reference to this, no.

6697. Neither with regard to sand or canaries? No.

6698. And at the time when you saw this person, whom you say was carrying a bag, you had no knowledge that it was Quelch? No knowledge whatever.

6699. Not any? No.

6700. And it was only in consequence of something that was said to you afterwards that you came to the conclusion that it might be Quelch? Well, I would not have come to the conclusion had I not asked Hill.

6701. It was only in consequence of something said to you by somebody that you came to the conclusion that it was Quelch;—when did you write this? On the 16th, between 6 and 7 in the morning.

6702. Really after you had gone off duty? Yes.

6703. You had spoken to nobody, nor said anything to anybody with regard to this at that time? That it was Senior-constable Quelch—no; I never said that at all.

6704. You made no such report to anybody? No.

6705. When was the first time that you showed this to anybody? I could not say exactly, but it was this month.

6706. So you kept that in your pocket all that time? Yes.

6707. *His Worship.*] But when you went off duty that morning, did you know then that it was Quelch? Only from what Hill said.

6708. Did you know then it was Quelch? Before 6 o'clock.

6709. *Mr. Bull.*] "On the morning of the 16th February, 1897, Constable Hill stopped Senior-constable Quelch dressed in an old Water Police jumper." Hill told you this, of course? Yes.

6710. You did not observe that? No.

6711. "And a felt hat, carrying a bag, which he said"—which Quelch said—Quelch had no such conversation with you? No, none whatever—not with me.

6712. "Which he said contained sand for his canaries"—something which Hill told you? Just as Hill told it to me.

6713. "Jones, the produce merchant's man, also saw him"—Hill told you that? No; Brewin told me that.

6714. "Carrying a bag out of Absalom's paddock, supposed he was a burglar"—this was what somebody told you? Yes.

6715. Where did you get this piece of paper? At home.

6716. Was it a spare piece of paper at the time that you wrote upon it? It was rather bigger than that. It is worn out.

6717. It was a waste piece of paper? Yes.

6718. Nothing of other writing on it? Oh, yes; there was.

6719. It was not a waste piece of paper then? Well, it was amongst a lot of old pieces of paper.

6720. Was it a waste piece of paper? Yes; it was.

6721. It did not contain a memorandum of anything already written upon it? No.

6722. It was a piece of paper amongst a number of other pieces of paper? Yes.

6723. And this was not written upon it? No.

6724. Has not this been cut from something else? Yes; I will explain that.

6725. Do not you see that there has already been writing on the piece of paper from which this has been torn? Yes.

6726. You see a capital there? Yes.

6727. Well then, your statement that this was a waste piece of paper was not true? Well, I did that the same morning. I will explain that.

6728. It is not true, as you said a while ago, that this was a waste piece of paper taken from amongst a number of other papers? No.

6729. You say now then that this was cut from some other piece of paper on which there was writing already? I wrote what was on the top as well the same morning.

6730. Well then you cut this from some other memorandum that you had made? Of course I cut off the top part of it, but what was written on top, I wrote the same morning.

6731. It had no relation to this entry? It only had relation to this — [Interrupted.]

6732. It had no relation to this entry? Not to the sand at all.

6733. Have you the other piece of paper from which this was cut? I could not say.

6734. Do you think you could find that anywhere? No; I do not.

6735. Do you think you could if you tried? I do not think I could.

6736. If you have in your mind what it related to, you can perhaps find it for us? I can tell you what was written on it.

6737. I prefer the piece of paper? I do not think I can find it.

6738. Did you tear it up? I might have; I laid it aside somewhere.

6739. It was a memorandum you made the same morning? Yes.

6740. Would it have borne some date? The same date.

6741. You do not think you could find that piece of paper? I do not think so.

6742.

Constable
F. Whitehair.
15 Nov., 1897.

6742. Do you want this Court to believe that this was written on the 16th February last, all that writing on this piece of paper? Yes.
6743. All that writing between those two crosses? Yes.
6744. Everything was written, as a fact, on the 16th? Yes.
6745. I notice a peculiar piece of writing which you have got on this;—"Signed Frederick Whitehair, Constable. Special-constable Brewin also near at hand, F. Frederick Whitehair";—When did you write that? The same morning. Of course I was only scribbling. I never intended it to be seen by anybody.
6746. *Mr. Abigail.*] You say that you had written something on top of the paper first? Yes.
6747. What had it relation to? Hill was about a quarter of an hour before his time, and I said I would report him for it, and I scribbled that down on this too.
6748. You were going to give an explanation of something to Mr. Bull just now;—what was that? Hill was a long way ahead of his time, and when I saw him I said, "Hallo, you are early," and in leaving him I said, "I will have to report you for this," and I was just scribbling this down on a piece of paper.
6749. Have you any doubt that Hill spoke to you on that morning? I have no doubt he spoke to me.
6750. Have you any doubt that on that morning, the morning of the 16th February, 1897, Hill spoke to a man? Yes; he spoke to a man.
6751. Whom he afterwards told you was Senior-constable Quelch? Yes.
6752. *Mr. Bull.*] I object to any further examination of this witness.
6753. *His Worship.*] Did Jones personally speak to you about it? No; I never spoke to him.
6754. Now, how did you hear on the 16th that Jones had seen him? Brewin came to me the same morning, and he told me that Jones (Bath?) had seen the man.
6755. *Mr. Abigail.*] That was on the 16th too? Yes.
6756. Now, you were on duty on the 17th and 18th? Yes.
6757. The same week? Yes.
6758. Is it a fact that this occurred on the 17th or 18th? No; this bag of sand business occurred on the 16th.
6759. There can be no doubt about that? No doubt about that.
6760. *His Worship.*] Who mustered the watch on the morning of the 16th? Senior-constable Quelch.
6761. Anybody else? No other constable.
6762. *Mr. Abigail.*] Who was at the station on the morning of the 16th? I could not tell you that.
6763. The man in charge, I mean? I think it was Proctor; I am not sure.
6764. *Mr. Bull.*] Who mustered the relief on the morning of the 18th? That I could not tell you.
6765. *His Worship.*] I mean, who was present when the relief came back in the morning of the 16th—the men collected at the station after the beats were over? The Senior-constable collects the men.
6766. Who was there on the morning of the 16th? I do not think there was anybody there.
6767. Was Quelch there? He takes us in from the meeting point.
6768. He took you in? Yes; he came in with the relief.
6769. *Mr. Bull.*] Quelch said he was on duty on that morning, but not on the 18th.
6770. *His Worship.*] Do you recollect who was there on the 18th? That I could not say. I never see the duty books.
6771. *Mr. Abigail.*] Your memory has only been impressed with what occurred on the 16th by making this entry of the conversation you had, and what you saw? That is all.
6772. And there can be no doubt that it was the 16th, can there? No; it was the 16th.
6773. Beyond any question or possibility of doubt, is that so? Yes.
6774. *Mr. Bull.*] You were on all that week? Yes; and all that month, I fancy so.
6775. *Mr. Abigail.*] The fact was, that it was the peculiarity that Quelch was off duty and doing something not part of his duty that impressed it on your mind? Well, it did.
6776. *His Worship.*] When did you suspect that this was sugar and not sand? I never suspected that at all, your Worship.
6777. *Mr. Abigail.*] It is not for him to suspect it. I will show it was that.

Inspector Edmund Lawless was recalled:—

Inspector
E. Lawless.
15 Nov., 1897.

6778. *Mr. Bull.*] You know Constable Hill? Yes.
6779. You remember some matters of report with regard to a complaint or allegation against Quelch with reference to his carrying this bag of sand? Yes.
6780. Now, first, did Hill make any report to you with regard to what he alleged he had seen? I cannot remember the date, but I think it was on the 18th.
6781. Of what? I think it was on the 18th of last month. It was just after the publication in *Truth*.
6782. Do you remember Quelch seeing you after having called upon me? Yes.
6783. You have heard Quelch say that he saw me on the 18th August? Yes.
6784. You were giving Quelch some advice then? Yes.
6785. Do you remember seeing Hill the next day? I think it was the next day.
6786. That would have been August, not last month? Yes; on the month after that was published in the paper.
6787. Mr. Dacey spoke in the House on the 17th, and the matter was published and appeared in the newspapers of the 18th? Yes.
6788. Was it not in consequence of what Quelch said to you that he spoke to Hill, or that you saw Hill? Hill, first of all, gave me a report.
6789. When was that? I think it was on the 18th.
6790. Or 19th? 18th or 19th.
6791. Hill gave you a report subsequently to Quelch's speaking to you? Yes. I read that report.
6792. You read that report which Hill supplied you with? Yes, and I returned it to him, and I said, "This is very indefinite; there are no dates or anything in it. You had better give me another report, and mention the particular dates when this took place." So I handed it back to him.
6793. You have not heard Hill say, but I may tell you that Hill has sworn — [Interrupted]? Of course I was not in here.

Inspector
E. Lawless,
15 Nov., 1897.

6794. *Mr. Abigail.*] I object to a question like that.
6795. *Mr. Bull.*] I am going to ask if this statement is true.
6796. *His Worship.*] He can ask if a statement made to him by a witness is true.
6797. *Mr. Bull.*] Did Hill, as a fact, give you a report in which no dates of any description were mentioned? Yes.
6798. You called his attention to the report being indefinite, and fixing no dates? Yes.
6799. If Hill says that he gave you no such report, is that statement true? Certainly not.
6800. He did give you a report in which there was no date. What did you do with that? I handed it back, and said I could not forward an indefinite statement such as that.
6801. When next did he make any report to you? I think it was on the following evening. He then gave me another report in which the dates were fixed. I then spoke to Constable Whitehair.
6802. Hill then gave you, about a week afterwards, a report in which a date was mentioned? Yes.
6803. And then you say you spoke to Whitehair? Yes. I said "How do you fix the date?" and he said "I made an entry in my book." I said "Where is it?"
6804. Did Whitehair produce any book? He then produced a memorandum book, and he showed me what appeared to me—it was dusky in the yard—I was standing in the door of the station, and he said "here it is"—and it appeared to be written in rather large characters in the book, but not one word was said about a piece of paper.
6805. Do you mean a pocket-book? Yes; generally constables carry a pocket-book.
6806. A note book? Yes.
6807. Did Whitehair in any conversation that he had with you produce such a piece of paper as is produced to-day, or make reference to it in any way? No. I may say that previous to my giving evidence I had spoken to the Commissioner while Hill was giving evidence.
6808. Was it anything like that which Whitehair produced? No; I never saw that paper.
6809. This is the first time you have seen that piece of paper. [*Exhibit No. 34.*]? Yes.
6810. And when making the remark to you he certainly made no allusion to a piece of paper like that? No.
6811. And showed you a book in which you saw there was some entry, and it was dusk? Yes. I made a remark to the Superintendent — [*Interrupted.*]
6812. When did you make that remark? In reference to Hill's report, I stated that I had handed him back his report in the first instance, that it was not definite enough, and I got another.
6813. There is no doubt about this, this is the very first time that ever you have heard Whitehair say, or produce such a piece of paper as is produced there? Certainly.
6814. Were you in Court the other day when he was being examined? No; I think not.
6815. Of course you have appreciated long before now that these charges against Quelch are as much an attack against the administration of the Police Department at Redfern as against Quelch?
6816. *Mr. Abigail.*] I object to this question. This has nothing whatever to do with this Commission, or the text of it.
6817. *His Worship.*] I certainly thought you had intimated that all along.
6818. *Mr. Bull.*] You were here, were you not, when Mr. Abigail, in the initiation of this Commission, made the distinct statement that, in addition to an attack upon Quelch's honesty and veracity, they also intended to attack the administration of the Department at Redfern.
6819. *Mr. Abigail.*] I did not say that. I said that it was to enter into the want of subordination in the Redfern Police Force in particular.
6820. *Mr. Bull.*] Is not that the administration of Mr. Lawless' division? [*Witness.*]: Which I may say has been the outcrop of this inquiry. There has been greater disorganisation than ever I had seen before. There seems to be a sort of agitation going on among the men which I cannot stop.
6821. Is it not a fact that since this inquiry began, and many of these men have been called, they have taken more "side" than before? I never knew them take "side" before. This has been a most impertinent inquiry on one side, and, as far as I can see, a religious inquiry, and I make no doubt about it.
6822. *Mr. Abigail.*] Now I want the meaning in full of your last observation that this is a religious inquiry;—what do you mean by it;—under what instructions or upon what facts have you been influenced in coming to such a ridiculous conclusion? Because I find that the principal complainants—the principal men who have given evidence in this—appear to be of different religious opinions.
6823. What are they—Wesleyans, or what? No; they are not.
6824. What are they? As far as my information goes they are Catholics.
6825. What sort of Catholics are they? They call them Roman Catholics.
6826. What is Quelch? I believe Quelch is a Protestant.
6827. And what is Lambert? I believe Lambert is a Protestant.
6828. Then you see the religious fervour has not reached Lambert, because he is a Protestant and Quelch is a Protestant;—what religion is Hill, Mr. Lawless? I do not know.
6829. Is he not a Protestant? He goes to the Catholic Church, I am told. I do not know whether he is a Protestant or not.
6830. *Mr. Bull.*] He is a Protestant turned Catholic.
6831. *Mr. Abigail.*] Is he not the son of a Protestant clergyman? He may be.
6832. Do not be in a hurry to get away? Well, sir, I am not in a hurry at all.
6833. Now, what is Whitehair? I believe he is a Catholic.
6834. Now, do you not know that he is a Protestant? I do not.
6835. Do you know him to be a Catholic? I believe him to be a Catholic.
6836. What reason have you to believe him to be a Catholic? I believe there is an entry in the book to that effect.
6837. Did you turn it up? No; I have not turned it up.
6838. You have simply come to the conclusion that there is a good deal of sectarian interest in this inquiry, simply from the fact that so many of your subordinate constables are against the senior officer? Yes.
6839. I suppose you will admit that a Roman Catholic is as capable of telling the truth as a Protestant, or even as an Orangeman? Certainly.
6840. Is this man Quelch an Orangeman? I do not know.
6841. Do you not know it, sir? No.

- Inspector
E. Lawless.
15 Nov., 1897.
6842. And are you not assisting to fan this sectarian feeling? I do not know he is an Orangeman, he may be; possibly he is.
6843. *Mr. Bull.*] He is not an Orangeman.
6844. *His Worship.*] We will have no more of this sectarian business.
6845. *Mr. Abigail.*] What is Senior-serjeant Bell? I do not know.
6846. Is not he a Protestant? He says so.
6847. Do you not believe him to be a Protestant? I do not know. I do not know anything about his belief.
6848. But you say you believe so-and-so to be Roman Catholics? I am allowed to believe what I like.
6849. Won't you mention your belief about Senior-serjeant Bell? I do not know.
6850. Are you so timid about your belief, simply because he comes here and says you are a liar? No.
6851. Is that the reason why you are so timid or so fearful in coming to an opinion about Senior-serjeant Bell's religious belief? I do not know. I do not know anything about his religious belief.
6852. What are you? I am a Church of England Protestant, but I do not attend the Church of England.
6853. You are a Church of England Protestant, but never attend church? I generally go with my wife to the Wesleyan.
6854. You are frequently called upon to defend your subordinate officers? Yes.
6855. And it frequently happens that the oaths of policemen are assailed on the grounds of untruthfulness? Yes.
6856. And you defend them? Yes.
6857. And you do it irrespective of their religious beliefs, do you not? Certainly.
6858. Now, as a matter of fact, you know Mr. Duncan, the *Herald* reporter? I do.
6859. Did you not tell him this: that you personally never recommended a Roman Catholic for promotion, and never would? I never said such a word, because I have done it, and the man himself gave evidence to that effect in this Court, Senior-constable Corcoran. I gave him as good a recommendation as I could give to anyone.
6860. Is the question of religion ever inquired into in matters of this kind? Never.
6861. And who told you in this inquiry anything to justify you in coming to the conclusion that there was some sectarian bitterness in this inquiry? Nobody has told me.
6862. So it is just from your own observation? I have formed that opinion.
6863. *Mr. Bull.*] Is Mr. Dacey a Protestant? I do not know.
6864. Is it not a fact that most of the publicans out there in your division who complained with regard to Quelch's conduct are Roman Catholics?—
6865. *His Worship.*] I think the police under their rules are not allowed to belong to the society of Orangemen? To no political society, but to a benefit society.
6866. *Mr. Abigail.*] It is a fact is it not, that the majority of the publicans in your division who make complaint with regard to Quelch, and in fact the two publicans who are mentioned in the charges here with regard to Quelch's adopting certain disguises, are of the nationality or religion that you speak of, Roman Catholics? I could not say.
6867. Neither of them are.

Constable Frederick Robinson was recalled:—

- Constable
F. Robinson.
15 Nov., 1897.
6868. *Mr. Bull.*] Are you a first-class constable? No, an ordinary constable.
6869. You know Constable Hill? Yes.
6870. And I understand that recently you had a conversation with Hill with reference to this charge which is made against Quelch with respect to a bag of sand? It was two or three months ago that I had the conversation.
6871. Where was it that you had the conversation? It was in front of Hill's house in Phillip-street.
6872. How did the conversation come about? Constable Connor had been sent down to me with some message, and Hill came outside on the footpath, and then this subject cropped up.
6873. And you had a conversation with Hill about it. Tell us if you can remember precisely what the nature of the conversation was that you had with Hill? Yes. I can remember it precisely as I made a note of a portion of the conversation at the very time.
6874. Have you got a note-book with you? I have, with the note that I made at the time.
6875. Where is your note-book. I understand that you write shorthand, do you not? Yes.
6876. Can you tell us without referring to that? Yes, I see it is on Monday, the 23rd August last, at 10-15 a.m., he said that he had helped Senior-constable Quelch with the sand, to put it on his back or some way or other, and that he felt the sand, and it felt—his words were, "it felt like sand." It felt like two bags, one inside the other, and it did feel like sand. Well, I jocularly said to him, "Now, remember you are on your oath, will you swear that it was not sugar?"
6877. You commenced a cross-examination? Yes; just in fun.
6878. Have you ever had a suspicion in your life with regard to this being sugar? Not the slightest.
6879. Go on? Hill replied, "Yes; I swear it was not sugar, for it felt like sand."
6880. Well, do you remember, will you kindly read the note that you have made of that? The note that I have in my book is—"Monday, 23rd August, he said he felt bag of sand that Quelch had, and it felt like a bag of sand, and like two bags, one inside the other. Constable Connor was present. This was at Hill's house, at 10-15 a.m."
6881. That is the whole of that entry? That is all that I entered at the time.
6882. Had you any conversation with Hill with any relation at all to this matter? Well, yes; I have had other conversation with him.
6883. In any of these conversations which you have had with him has he ever insinuated or said — [Interrupted]? I have a note.
6884. Have you got a note there of some other conversation? I have.
6885. Give us the date of that;—in any conversation that you had with Hill since, has he asserted that this was sugar, and not sand? No; he did not say for certain that it was not sugar; but he said a few nights ago almost the same thing—that it "felt like sand."
6886. When did he say that? A few nights ago.
6887. *Mr. Abigail.*] Do you make notes of every conversation you have with everybody else? I frequently make notes.

Constable
F. Robinson.
15 Nov., 1897.

6888. Can you turn up in your note-book a note you have made of a conversation you have had with any other constable about something independent of your duty;—you have got a shorthand note there, and you can write shorthand? I have notes I have made conversing with several constables.
6889. *Mr. Bull.*] Turn up any one note, just an indiscriminate entry.
6890. *Mr. Abigail.*] Can you remember making a note of any other conversation of any other police officer or any civilian except on matters appertaining to your duty? I cannot recollect anything at present.
6891. How long have you had that book? I have only had this book a few months.
6892. How many months—six months? Two or three months.
6893. What is the date of the first entry, and the date of the last entry? In this book. I have notes made at the beginning of the year.
6894. What is the last? But those notes are not in this book.
6895. I want to know the date of the first entry and the last entry in that book? The first entry in reference to this case?
6896. The first entry in that book? Is the 23rd August.
6897. Give me the date of the first entry on page 1 of the book? These are all private matters.
6898. When was that written on the first page of that book? I cannot say. They are the names of people that I had to take for riotous behaviour, and so forth.
6899. Well, when does it refer to? There is not any date here. There is, "Thomas Smith, 11, George-street, Waterloo."
6900. What is that? That is the 21st November, 1889, but that is nothing with reference to the police business.
6901. There is the 29th April, 1897? Yes.
6902. I presume you are still using it? Yes.
6903. I will see if Mr. Garlick can read the entry you have just read. Otherwise I will not admit it. Mr. Garlick, will you kindly read this?
6904. *Mr. John Garlick, L.S.W., Vic., (Sworn Shorthand Writer to the Commission)* read:—"Monday, 23rd August. He said he felt bag of sand that Quelch had, and it felt like a bag of sand, and like two bags, one inside the other. Constable Connor was present. This was at Hill's house at 10.15 a.m."
6905. *Mr. Abigail.*] Were you as friendly with Quelch on the 25th August as you were with Hill? I have never been friendly with Senior-constable Quelch.
6906. Why did you make a note of this? I have made notes of different matters—for no particular reason.
6907. And yet you cannot show me an entry you have made outside your official duties of any other occurrence? I think not.
6908. When did you tell Quelch this? He did not know this until I handed him my evidence in writing to give to Mr. Bull.
6909. Did he ask you for it? He did not.
6910. And although you were not on friendly terms with him you actually handed him your written evidence so that he could give it to Mr. Bull? Yes.
6911. When did you do that? When this inquiry started.
6912. Since the inquiry started? Yes.
6913. Why did you, on the 25th August, if you had no suspicion in your mind that it was not sand, why did you jokingly and facetiously put Hill on his oath, and say, "Will you swear it was not sugar"? I cannot give any reason.
6914. Did not you want to make out, as all the other policemen in the district wanted to make out, that it was sugar, and not sand? No.
6915. In putting that question to Hill were not you influenced by the common rumour that this was sugar, and that Quelch had taken it from Pogson's? I never heard any rumour at all.
6916. You only did that as a joke? Yes.
6917. Why did you not say "tea," "rice," or "flour"? Because sugar and sand are something similar.
6918. And it is very difficult to tell t'other from which, is it not, when you are feeling through three bags? No.
6919. Have you ever tried it? Yes.
6920. You have been in trouble, too, haven't you? No.
6921. Did you not have to refund 5s.;—did you not ever get a 5s. fine which you alleged you had paid to Bell? I did.
6922. When you were asked for the fine did not you deny that you had received it? I did not.
6923. Did not you afterwards, when McIntosh said he saw you take it, suddenly remember you took it, and say you had handed it to Castle? I did not.
6924. Did not you say you handed it to Mr. Underwood? I said Mr. Underwood first of all.
6925. Did not he deny, and then did you not have to refund it? I did have to refund it because the mistake was on my part.
6926. *Mr. Bull.*] Underwood is not the clerk now? No.
6927. He left shortly after? He had to leave shortly after.

Constable G. H. Edwards was recalled:—

6928. *Mr. Bull.*] You know Constable Hill? Yes.
6929. Do you remember Wednesday, the 27th of last month? Yes.
6930. Do you remember having a conversation with Hill, or his making some statement to you? Yes, he said something to me.
6931. Where was that that he said that to you? Out in the yard.
6932. Out in this yard here (Central Police Court Yard)? Yes.
6933. What was it Hill said to you? He said that possibly Quelch might want me to swear that I was left in charge of Pogson's shop.
6934. I want your Worship to take particular notice of this. (*To the witness.*): Hill said to you that possibly Quelch might want you to swear that you were left in charge of Pogson's shop, and that, of course, he knew you were not, and you would tell the truth and say you were not? I said I do not think Quelch would ask me to swear any such lie.
6935. Had Quelch at that time insinuated or asked anything of the sort? He never mentioned the case to me at all.

Constable
G. H.
Edwards.
15 Nov., 1897.

Constable
G. H.
Edwards.
15 Nov., 1897.

6936. Has it been said from first to last that Quelch did leave you in charge of Pogson's store? 'That is the first I heard of it.
6937. Showing the interest which Hill had in the matter, that is what he suggested to you? Yes.
6938. He thought it might be possible that Quelch might ask you to swear that, a lie—something which Hill himself knew to be a lie? Yes.
6939. He suggested that Quelch might ask you to swear that lie? Yes.
6940. And did he ask you to tell the truth with respect to that? Yes.
6941. And the truth would have been that you were not so left? Yes; I was not left.
6942. *His Worship.*] At the time Lambert was there?
6943. *Mr. Bull.*] I suppose so. (*To the witness.*): Did you say this to Hill;—did you tell him that you would not tell a downright lie like that for any man? Yes; not even for my brother, I said.
6944. And did you also tell him that you were perfectly certain that Quelch would not ask you to do any such thing? Yes.
6945. Was that during this inquiry, after this Commission began? Yes. I think it was the first day.
- NOTE:—His Worship asked Inspector Cotter to see Constable Whitehair and ask him for the note-book which Inspector Lawless stated that Whitehair had shown him. After inquiring of Constable Whitehair, Inspector Cotter informed his Worship that Constable Whitehair stated that Mr. Lawless must have been mistaken, and that he had never made an entry in a note-book, but that the entry which was shown to Inspector Lawless was that on the piece of paper produced in the Commission. [*Exhibit No. 34.*]
6946. *Mr. Dacey.*] Did Mr. Quelch ask you for this note that you handed him with regard to the conversation you had with Hill;—you have handed in a statement here to Mr. Bull, written? Yes.
6947. How did you come to do that;—did Quelch ask you for it? No; he did not ask me for it.
6948. Then you gave it spontaneously? Yes.
6949. You are taking no interest in this matter? No.
6950. You have had several conversations with Quelch? Well, I have had one or two conversations with him, such as they were, and I will tell you what they were for, to get certain dates.
6951. Before this inquiry started, with reference to the evidence you were to give? Never with regard to any evidence.
6952. Will you swear in that box that you did not have a conversation with Quelch;—have you the effrontery to stand before me and say that you did not have a conversation with Quelch before this inquiry started with regard to the nature of your evidence? No; not with regard to the evidence. I never arranged with Quelch or anyone as to what evidence I should give.
6953. You did not state you did not know on which side you were to give evidence on? I might have stated that to some of the men; I would not swear that.
6954. You said it to some of the men? I have no recollection. I might have done. Everybody was talking about the case when it came on first, and I might have said so. I do not deny it.
6955. *His Worship.*] You mean to say you did not know on which side you were to be called? I did not say any such thing, but it might have meant that.
6956. *Mr. Bull.*] You really did not know which side was going to call you? No.
6957. *Mr. Dacey.*] You did not know which side you were going to give evidence on?
6958. *Mr. Bull.*] You are subpoenaed by both sides? Yes.
6959. Since this inquiry commenced, and whilst the inquiry has been sitting, have you seen Mr. Dacey outside speaking to the witnesses? Well, I have seen him talking to some of the men.
6960. Some who were called and some who were to be called? Yes.
6961. I do not say there is any harm in it, but it only shows that conversations are carried on. Are you certain that you never said to Mr. Dacey that you did not know in whose favour to give evidence? I do not remember saying that to Mr. Dacey.
6962. I suppose Mr. Dacey has importuned you like he has all the other police officers? —
6963. *Mr. Dacey.*] He has not.
6964. *Mr. Bull.*] Do you remember a conversation with Mr. Dacey on the Sunday before this inquiry commenced with regard to the evidence you were going to give? Yes.
6965. Where was that? That was in Redfern-street.
6966. He saw you and spoke to you whilst you were on your beat? Yes.
6967. The 17th of last month—October? Somewhere thereabouts; it was last month.
6968. Well, perhaps you will tell us what transpired between you and Mr. Dacey then; did he make some reflection or some insinuation against your statement at that time and ask you how you were going to give your evidence, and whether you were going to be a friendly witness or not? I remember him saying he thought I was going to be a friendly witness, and my answer was that I was partial to neither side, and I was going to speak the truth whether it was for or against.
6969. Did not he tell you that he was informed that you would be a friendly witness—friendly, of course, meant a witness against Quelch? I do not know whether he said he was informed or not. I would not be certain as to that.
6970. Do you remember some gesticulation of Mr. Dacey's, tapping his chest in some demonstrative way, and making a statement to you—I mean with regard to what you were going to say? [*Witness did not answer.*]
6971. *His Worship.*] Do you recollect anything? I do not recollect that, your Worship.
6972. *Mr. Dacey.*] Do you remember on the Sunday in question my telling you that all I wanted you to do was to speak the truth? Yes, Mr. Dacey.
6973. *Mr. Bull.*] That is all you have done? What?
6974. Told the truth? That is all I am doing as far as I can.
6975. I think I got from Whitehair this fact. I do not want to call evidence upon the matter if your Worship remembers it. I think Whitehair has admitted that he made no report that morning at the police-station. I am doing exactly what Mr. Abigail has done on one or two occasions. I want to get from your Worship whether you are satisfied up till now that Whitehair made no report of the matter before 6 o'clock that morning, or at 6 o'clock?
6976. *His Worship.*] He stated himself he did not.
6977. *Mr. Bull.*] Has he not said to-day that he spoke to nobody about it until somewhere about 7 o'clock and after that conversation he wrote something down?
6978. *His Worship.*] Yes.

Senior-constable W. E. Quelch, was recalled :—

6979. I do not want to go over the ground with regard to whether this was the 16th, or 18th ; but I want you to speak with regard to the days in addition to the 18th when you were off duty? On the morning of the 3rd August, 1897, I went off duty to the Summons Court. I had a lady named Mrs. Murphy summoned under the new order for keeping her shop open. On Tuesday, the 3rd August, 1897, I went off duty at 4 o'clock to attend the Summons Court. Senior-constable
W. E. Quelch.
15 Nov., 1897.
6980. You mean 4 in the morning? Yes.
6981. What is the entry with regard to that? I am booked up to 6 a.m.
6982. *Mr. Abigail.*] We will admit that there are inaccuracies in the book.
6983. *Mr. Bull.*] I may tell my friend that we have taken from the books,—I have here in red ink, taken from the books, these absolute instances of the inaccuracies of the entries where officers who have been told off early in the morning are still entered up to certain hours, and I will give evidence of this unless my friend admits it. [*Exhibit No. 33.*]
6984. *Mr. Abigail.*] I will admit all that.
6985. *Witness.*] On the 16th May, 1897, I was booked off at 3 o'clock in the morning but was on duty till 6. I was the only senior-constable out.
6986. *Mr. Bull.*] Actually the only senior-constable on duty? Yes, in May, this year. There it is, Sunday, 16th day of May, 1897, "Charge of relief 12 to 3 a.m." I was on duty until 6 o'clock that morning. I was the only senior-constable out. I have another entry here where a constable is booked off to the Police Court on a Sunday morning. [*Exhibit No. 33 was then handed in.*]
6987. *Mr. Bull.*] All that is evidence to show that at any rate these books cannot be relied upon.
6988. *Mr. Abigail.*] That ends the main charges with this exception, I want to recall Constable McIntosh with regard to a conversation—we were only instructed about this this morning—with regard to a conversation he had with Quelch on this point: Your worship will remember that Coghlan has sworn that on that first day, Monday or Tuesday that Quelch came in, he was shown all round the place and was told to keep an eye on it and Quelch has sworn that that is not so. Constable McIntosh, I am instructed, will swear that Quelch told him that morning that he was told to keep an eye on the place.
6989. *His Worship.*] Very well.

Charge No. 6 (continued).

Constable John McIntosh was recalled :—

6990. *Mr. Abigail.*] I want you to take your memory back to the night of the attempted robbery on "Myall House." I think you gave evidence in that case? Yes. Constable
J. McIntosh.
15 Nov., 1897.
6991. You were on duty outside? Yes, I was.
6992. Did Quelch meet you that night? Yes.
6993. What time? Between twenty minutes and ten minutes to 9.
6994. What did he say to you? I reported "All right" to him. I met him at the corner of Pitt and Cleveland streets, and he said that the Government store had been broken into, and he said, "Do you know where 'Myall House' is?" I said "Yes." "Well," he said, "Round at the back of that." I said, "I did not know there was a store there," and he said, "For all the years that I have been in Redfern I did not know myself until a few days ago, until I was shown over it." And then I went up with him to the place.
6995. Did he tell you that Coghlan had told him to keep an eye on it? He did not say that to me.
6996. What did he say? He just simply said he did not know the place was there until he was shown over it.
6997. Did he tell you that Coghlan, the clerk there, had told him to watch the place when he was there the previous Monday? No, he did not say that.
6998. Did he say that he had been there the previous Monday? He said that he had been shown over it.
6999. Now, Quelch swears that he never was shown over it.
7000. *Mr. Bull.*] Quelch swore that he was never taken upstairs in that place. He swears that from where he was standing certain articles were pointed out to him.
7001. *His Worship.*] He did not tell you that he was asked to keep a watch? No, he did not say that to me; he said he was shown over it.
7002. *Mr. Bull.*] Do you know that there was a report at the Redfern Station, "Stolen, between midnight, the 31st ultimo, and 8 a.m., the 1st instant"—which means 1st January, 1892,—"from 'Myall House'" — [*Interrupted*]? I was not in the police for years after then.

Charge No. 11.

"Drunkenness in the Redfern Police Station."

Constable John Cubitt was called and sworn :—

7003. *His Worship.*] What is your name? John Cubitt. Constable
J. Cubitt.
15 Nov., 1897.
7004. What are you? Constable.
7005. Stationed at Redfern? Yes.
7006. *Mr. Abigail.*] Do you remember the 14th November this year, about 5:40 p.m., having your attention called by a civilian to Senior-constable Quelch whilst on duty—by Mr. Spearman? I remember the occurrence, but I do not remember the date.
7007. Did a Mr. Spearman call your attention to Senior-constable Quelch? He did.
7008. Tell us what was said and what you saw.
7009. *Mr. Bull.*] I object to anything that Spearman said to this man if Quelch was not there.
7010. *Mr. Abigail.*] Spearman pointed out Quelch to you? He was not close beside us.
7011. *Mr. Bull.*] Could Quelch hear a word that was said? No.
7012. *Mr. Abigail.*] Your attention was called to Quelch? Yes.
7013. And a complaint made about his state, was it not? Yes; I was coming down Redfern-street, I think, to the best of my belief, at that time, and Spearman was standing on the opposite side of the street.
7014. *His Worship.*] Who is Spearman?
7015. *Mr. Abigail.*] A resident there.

Constable
J. Cubitt.
15 Nov., 1897.

7016. *Mr. Bull.*] An ex-policeman and an ex-publican? He said, "Hullo," or "Hi, Cubitt, do you see Quelch drunk?" I made no reply. I saw the senior-constable walking ahead of me, along the Redfern Park fence in the street.
7017. Along Redfern-street? Yes.
7018. *Mr. Abigail.*] Near the Park? Yes.
7019. Did you go over to him and talk to him? I kept my own side of the street to, I think it was, opposite Mr. White's, the baker, to the best of my belief. I reported to him.
7020. Did you notice his state? I did.
7021. Was there any justification for Spearman's complaint? Well, in my opinion, he might have had a glass.
7022. Was he hanging, clinging to the fence when you saw him? No; he was not. He was walking along.
7023. *His Worship.*] Was he on duty? On duty.
7024. *Mr. Abigail.*] Tell me this:—He was your senior-constable on that beat? He was.
7025. And he was on duty? He was.
7026. And you say, in your opinion, he had had a glass—that is the way you put it? Yes.
7027. And you reported to him what Spearman had said, did you not? I did not.
7028. How did you report it to him;—what do you mean by reporting it to him? I reported my duty as "All correct."
7029. And was it then that you noticed that he had had a glass? Yes; I thought that.
7030. Why did you think so? Well, I formed an opinion.
7031. From what you saw of him—from your observation of him? Yes.
7032. And from your conversation with him? I had no conversation with him. I reported, "All right."
7033. He never answered you? Yes, certainly.
7034. You did have some conversation with him? That is all.
7035. And from your conversation and your observation of him you concluded that he had had a glass? He said, "All right, Cubitt." That was all the conversation.
7036. *Mr. Bull.*] He said, "All right, Cubitt"? Or words to that effect, Mr. Bull.
7037. *Mr. Abigail.*] Did you see him up at the police station afterwards? I did at 6 o'clock.
7038. What state was he in then? He was sitting down.
7039. Was he crying? Yes; he was sobbing.
7040. He was still on duty? Well, they were going off at 6 o'clock.
7041. Up till that time he was on duty? Yes.
7042. And in his uniform? Yes.
7043. And sitting down sobbing? Well, going off at 6 o'clock.
7044. Did Spearman come to the station when you were there? He did not.
7045. Did Margoschis, the pawnbroker, come to the station at the time you were there? He did not.
7046. *Mr. Bull.*] What time would this be? 6 p.m.
7047. *Mr. Abigail.*] Was Sergeant Houlahan there? Yes.
7048. Was Constable Moore there? Well, I did not observe Constable Moore.
7049. Was Constable Edwards there? Yes; he went off on the relief with me.
7050. Were Constables Ridley and McSweeney there? They might be; I could not say.
7051. Was Sergeant Vane there? He was.
7052. Did you hear any conversation with Sergeant Vane and anybody else? I did not.
7053. Did you not hear somebody (one of the officers) say, "Hallo, what's up with Quelch," and did not Vane say, "Oh, it's all right, poor fellow; his wife is dead"? I did not hear the remark.
7054. *Mr. Bull.*] You did not hear Vane say, "All right; his wife is dead"? I did not.
7055. *Mr. Abigail.*] Was Quelch not only sobbing, but boohooing, as a man would when drunk? I did not hear boohooing. It was a low crying and sobbing.
7056. He was sitting down, with his head like that [*indicating*], sobbing? I did not take particular notice of it, because we were going off duty, and I got "Right turn; dismiss," and I took no particular notice.
7057. How long have you been in the Force? About eight years in New South Wales.
7058. Anywhere else? Yes.
7059. Where? The city of Glasgow, Scotland.
7060. How long? Very nearly three years.
7061. In the whole of your police service have you ever seen a senior police constable before in the state in which you saw Quelch, sitting down in the police station with his uniform on, and sobbing like a child? Well, I might not know the circumstances of the case.
7062. Have you ever seen it before in your life? I did not know the circumstances.
7063. *Mr. Bull.*] You do not fix this date that my friend has given you, the 14th February? I do not remember the date. I remember the occurrence, but I did not make any note of the date.
7064. You did not write anything in a pocket-book or up your sleeve or on a spare piece of paper? I did not.
7065. Do you know whether it was known in the station at that time that Mrs. Quelch was ill? Yes, I knew it; he had a lot of trouble at home.
7066. Did you know as a fact that at that very time, not only was she (Mrs. Quelch) almost at the point of death, but that a child of his was also very ill? Yes.
7067. Do you know that at this very present moment, and during the time that this inquiry is going on, every day possibly means Mrs. Quelch's death—a repetition of an old illness? I know she is ill.
7068. You know she is dangerously ill? Yes, and she was seriously ill at that time.
7069. I suppose if a communication was given a man during the night when he was on duty that she was worse than usual, and probably would not live till morning, it might have some effect on him? It might.
7070. It would, certainly, with a man who is fond of his wife;—it would trouble you? Yes.
7071. *Mr. Abigail.*] Would you fly to drink? I cannot say.
7072. *Mr. Bull.*] You heard the question put to you by Mr. Abigail;—was he hanging on to the fence, clinging to it? He was not.
7073. From the morning that you saw Quelch, when Spearman spoke to you, and during the whole of that morning, was there any approach to anything of that sort? He was walking along the street.

7074. As if sober? On his duty.

7075. And when you met him and reported to him he intelligently took your report and gave you an intelligent answer? And walked away.

7076. Was he near his home at that time? No, he was not; he was nearer to the station.

7077. But his home is only a very short distance from the station? Yes.

7078. You do not know whether that very morning, between 4 o'clock and 6 o'clock, a report had been sent him in regard to the danger of his wife's life? No; he may have got it.

7079. At any rate, it was a well-known fact and circumstance in the case that for weeks before she had been so ill that she might die any day? Yes; she was dangerously ill at that time.

7080. Do you know as a fact, that one of his children, his eldest daughter, is now lingering and has been ill for months, and possibly may die to-day? Yes, I know that.

7081. Is it not a fact that that sort of trouble has been over Quelch for some time? Yes.

7082. *Mr. Abigail.*] That will do. When you have trouble may you have a friend.

7083. *Mr. Bull.*] You have trouble now, your wife is very ill? Yes.

Constable
J. Cubitt.
15 Nov., 1897.

Sergeant Thomas Vane was recalled:—

7084. *Mr. Abigail.*] Do you remember the 14th February last? I remember it.

7085. Do you remember your attention being called to Senior-constable Quelch's state whilst in uniform and on duty at the police station, and it was alleged that he was drunk, and your attention was called? No, he was not.

7086. It was alleged? Nobody called my attention to him.

7087. Did you see him there? I saw him there, yes.

7088. Was he crying? I was on reserve that afternoon and Sergeant Houlahan just relieved me and the relief came in, Senior-constable Harrison, I believe.

7089. What time was this? 6 o'clock.

7090. In the afternoon? Yes.

7091. Well? He came in with the relief and went round in the dock and put his head down on the rails of the dock and began crying.

7092. And did not somebody say to you, "Hallo, what's up with Quelch; look at him?" No; there was no one as I recollect spoke; we all looked at him. We did not know what was the matter with him.

7093. Was not your attention called to it Sergeant Vane, and did not you say, "Oh, his wife is dead; he has just heard his wife is dead, poor fellow"? I did say that. We all looked at him, and I said "I suppose his wife is dead."

7094. Did not somebody say "Why! he's drunk"? No, there was no one mentioned such a thing.

7095. And did not he say then that he had taken an overdose of laudanum for neuralgia? No, he never spoke.

7096. After that you left? I left him there with Sergeant Houlahan.

7097. Did Margoschis come in and report the occurrence afterwards? Not while I was there.

7098. Did not he meet you in the street and report it to you? No, I never saw him; I was in the station all that afternoon.

7099. Just think again. When you were off duty, on your way home, did not Margoschis see you about Quelch, and say he had seen him in the street drunk in his uniform, and he was a disgrace? I do not recollect seeing Margoschis.

7100. Did not you say to Margoschis, "It is all right. His senior officers have seen him, and you need not make a complaint"? I do not recollect seeing Margoschis.

7101. You will not admit that you saw Margoschis and had a conversation with him about the matter? I do not remember seeing the man that day at all. I knew he had had a lot of trouble, and we all thought that that was the thing, and that his wife was dead. He had been complaining about his head that day.

7102. Are you sure it was not pains in the stomach he was talking about, and not pains in his head? I did not see him at all that day.

7103. Did you not see him going out on duty at 2 o'clock? Oh, yes.

7104. And then you did not speak to him since? No.

7105. Now you look upon the duty-book for the week ending 15th February, 1895, and the entry Friday, the 14th February, 1896, and you see Senior-constable Quelch was in charge of the relief from 6 till 10 a.m. and from 2 to 6 p.m. on that day? Yes, Harrison was out with him.

7106. *Mr. Bull.*] It matters little when it was, whether it was this year or last year, but you remember the circumstance? Yes.

7107. *Mr. Abigail.*] Since February, 1896.

7108. *Mr. Bull.*] It was, I suppose, the circumstance that whilst Quelch was in the station at the time of relief at 6 in the evening, there is no doubt in the world about it he was crying? Yes, he was crying.

7109. And making, what my friend has asked the last witness, a drunken boo-hoo in the station? No, he walked in as well as the rest of the relief, and when he came in he laid down his head and started crying.

7110. And when he walked in he put his head on his arm, so, and started crying? Yes.

7111. Were you there when he came in? Yes.

7112. Would you say that Quelch was in any sense drunk? No, he was not drunk.

7113. Did it appear to you that he was even under the influence of liquor? I never had the slightest thought about that. When I saw him the thought struck me that his wife might be dead, and that was his trouble.

7114. Do you know that his wife had then been ill for weeks, dangerously ill, so ill as to be near death? Yes, I know he had been up with her night and day for weeks.

7115. Is it a fact that on the 27th, 28th, and 29th he had actually been off duty, sick himself, in consequence of his continuous attendance upon Mrs. Quelch? Yes; I knew he had been suffering from his head.

7116. Half the 26th, the whole of the 27th, and 28th, and 29th of January last year? Yes.

7117. You were his superior officer for some time? Yes.

7118.

Sergeant
T. Vane.
15 Nov., 1897.

- Sergeant
T. Vane.
15 Nov., 1897.
7118. And you were also doing duty with him as a senior-constable;—do you not know that he frequently complained of his head? At that time he did.
7119. In the early part of last year? Yes.
7120. And also of an inflammation of the bowels; almost a chronic inflammation of the bowels? I could not say anything about it.
7121. Do you remember this;—do you know this as a fact, that the police doctor ordered some special head dress or hat which Quelch was to wear to relieve the aches and pains in his head? Yes; I recollect that.
7122. You know he wore that for some time? Yes.
7123. Have you ever seen him drunk on duty? No; I have not. That was the only time that I ever saw anything approaching the influence of drink.
7124. The only time you ever saw anything on his part through which people might say he was approaching the influence of drink? Yes.
7125. And that, when he has had very long duty—special duty? Yes.
7126. At any rate, you say that when he came in at 6 o'clock, he came in as right as anybody else? I would not have noticed him had he not laid his head on the rail and begun crying.
7127. *Mr. Abigail.*] The station is only about two minutes' walk from his house? About that.
7128. And this was at 6 o'clock, the hour that he dismissed the men? Yes.
7129. So that if his wife was so dangerously ill, he showed his concern by sitting down there crying? I do not know how long he stopped there.
7130. When you left, you left him there? He was there.
7131. Mr. Bull asked you was he drunk, and you said, with a peculiar inflection of your voice, "Oh, he was not drunk";—now, did not you mean to infer that he was not dead drunk? I had not the slightest evidence that he was under the influence.
7132. Will you swear, from what you saw—and remember that there are others that are going to be called who saw what you saw, and more;—will you swear that you did not know and did not believe him to have had some drink? Not that day, I did not.
7133. When? On the following day, finding that his wife was not dead, I thought he might have been under the influence of drink, after what I had heard.
7134. Then you came to the conclusion that he must have had some drink? Oh no; I never smelt it on him, and I could not say it was drink.
7135. You thought he might have had some drink, by his actions? By his actions, I thought he might have had some.
7136. And you still think so? I do, yes.
7137. Do you not know that at one period of his police existence he was on strike duty at the mines at Clifton? I do not know anything about that; I know he was on strike duty, but I was not there.
7138. Do you not know that he earned a reputation there for the amount he consumed? No; I do not.
7139. And that, on one occasion, the other police officers actually had to tie him down, he was so drunk—they were afraid he would hurt himself and others? No.
7140. Do you not know that that was current report? This is the first I heard of it.
7141. *His Worship.*] Is there any record of drunkenness against him? No.
7142. *Mr. Abigail.*] Do you know Senior-sergeant Bradwell? I do.
7143. Do you not know that he states that Quelch was so mad drunk down at Illawarra, Clifton, that he was actually put in irons? Senior-sergeant Bradwell never speaks to me, and it is not likely he would tell me any such thing.
7144. Do you know a man named Wilson? I know Senior-constable Wilson and Constable Willson.
7145. Did you ever tell him that you would give £20 to save Quelch in this inquiry? No, I did not.

Mr. Alexander Margoschis, pawnbroker, Regent-street, Redfern, was called and sworn:—

- Mr. A.
Margoschis.
15 Nov., 1897.
7146. *His Worship.*] What is your name? Alexander Margoschis.
7147. What are you? Pawnbroker.
7148. *Mr. Abigail.*] Carrying on business where? Regent-street, Redfern.
7149. You have been a resident there how many years? Seventeen years.
7150. Carry your memory back to February, 1896, the 14th? Yes.
7151. Did you see Senior-constable Quelch on duty on that day? Not that I know of.
7152. Do you remember making a complaint to anybody about his state? Yes.
7153. Whom to? To Sergeant Houlahan.
7154. Where did you make the complaint? At the station.
7155. Did you go up to the station purposely to make it? Yes.
7156. Prior to going to the station, what did you see? I did not see anything; it was mere hearsay.
7157. You heard something? Yes.
7158. And went and made a complaint. What was the nature of the complaint? I heard that Quelch was drunk in the street, and I went up and asked him if it was true and if he had come into the station in that way, and Houlahan said the Inspector was there, Mr. Vane. So I asked Houlahan—there were more than Houlahan in the station—I asked him if he saw him himself, and he said, "Yes." I asked him if there was any chance of any information being laid. He said, "Inspector Vane considered the man was all right." I said, "Did you see him?" "Yes," he says. I said, "Would you go in the witness box and swear that he was sober?" and he would not answer me, and I asked him if there were any others present, and he said, "Yes."
7159. And you spoke to Vane? No; I asked him if there was any chance of any information being laid, and he said "No." Mr. Houlahan referred me to Mr. Lawless, and I told him it was no use going to see Mr. Lawless.
7160. *His Worship.*] You simply acted from what you heard? Yes.
7161. *Mr. Abigail.*] And from a sense of public duty? Yes.
7162. This was a matter of public duty? I would not say that. I consider the man ill-treated me; that is the truth, and there is no use denying it.

7163. What was the ill-treatment that you complained of? In the first place, he laid an information against me, and I saw Mr. Lawless, and he said that there should be no summons issued, and I came down to Mr. Read and there had been a summons issued. Of course, I broke the law, and I was fined for it. This man strung his duty very high.

Mr. A.
Margoschis.
15 Nov., 1897.

7164. *Mr. Abigail.*] You thought it was a good opportunity of showing what sort of man the constable was? Yes.

7165. And if Houlahan had been at all frank with you, you would have laid the information, would you not? Yes.

7166. Why did not you go to Mr. Lawless? Because I knew it was no use.

7167. Why? Because he had not kept his word with me with regard to the information laid by Quelch against me about having taken a pledge not according to the Act. I knew it was no good going to Lawless. It is known all through Redfern — [Interrupted.]

7168. What is? Why, Quelch. His name stinks there because of his over-officiousness. People will not come because they are afraid to come; they are afraid of Lawless. The police are afraid of Lawless themselves. They know if they speak against this man what they know they have a good chance to get discharged.

7169. Is that the reputation that Lawless and Quelch have in that neighbourhood? It is—the two of them.

7170. And is it a further matter of common report that even the police are afraid to make a complaint about Quelch and Lawless? Yes; if it is put to each constable, and he tells the truth, he will say so.

7171. Quelch is so capable and upright, and God-fearing and honest, that he has got this reputation? I do not know about his honesty and the God-fearingness, but he is disliked throughout the district.

7172. Can you give me an instance of any other man in the Force except Lawless — [Interrupted]? I do not dislike him. The man has not interfered with me for the last two years. I did not wish to come here.

7173. *Mr. Bull.*] You admit frankly that you went up to the station because you had heard something, and you were very anxious to drag him down by prosecution if you could get an information? I thought he was a man who had done wrong and ought to pay for it.

7174. Was not there a little feeling in your mind that you would like to pay him out for prosecuting you? Certainly.

7175. You know he had charged you with using insulting words to him? Yes.

7176. You were defended by Mr. Levien? Levien pleaded guilty. You were there, too.

7177. Did you not plead "Not guilty" at first, and then, when he called a number of civilian witnesses to prove the language, did not you withdraw your plea of "Not guilty" and plead "Guilty"? Mr. Levien did.

7178. Your solicitor did? Yes.

7179. And you were fined £2 for using this insulting language to Quelch? Yes.

7180. And you had to pay the civilian witnesses? Yes; he smiled at it. It is a treat to that man to sit on anybody. It is a fact.

7181. Do you not know this: That he had complained — [Interrupted]? I got him a £5-note reward. Did he tell you that? Before Lawless came there he was a good man.

7182. Do you not know this: That the pawnbrokers in the same district complain that people that they turn out of their places, and refuse to take pledges from, go to you, and that you insist on taking these pledges? No.

7183. Do you not know that, in consequence, Quelch and other police officers were told off to simply overlook your business? I do not think so.

7184. Were not you, as a fact, on the 24th April, 1895, charged with taking in pledges during prohibited hours—at forty minutes to 7 in the morning? Forty to 8. That man used to go down with me to have a drink, and act as a friend to me. Everything must be looked at. That is right; you are perfectly correct.

7185. You were fined for taking in pledges just as a publican is fined for opening before hours? Yes; I am the only one that has ever been fined in the Colony. Look at him (Quelch) smiling now. That is the way for a man. He looks it. The man has no business to be a constable—not at Redfern, at any rate.

7186. Would you like to see him out of Redfern? What was he removed from the Water Police for?

7187. I may tell you that Mr. Abigail is here to attend to this business, not you? The man shows it himself. He cannot look at anybody who is speaking.

7188. What you said a while ago is that you know nothing about his honesty? I do not.

7189. What you do say is that he suffers from over-zeal? Is it zeal to carry fish up the street in uniform?

7190. I suppose, if a man's wife was ill, and she liked a little fish, there would be no harm in his taking a fish in his hand for her?

7191. *Mr. Dacey.*] It is against the regulations.

7192. *Mr. Bull.*] Would you like to say that he was on duty at the time that he was carrying this fish in his hand? I do not know.

7193. That is the character of information that Mr. Dacey has got hold of.

7194. *Mr. Dacey.*] That man is unsophisticated, you can see it.

7195. *Witness.*] I think the police are afraid to speak.

Constable Edmund Hill was recalled:—

7196. *Mr. Abigail.*] Do you remember a complaint from a Mrs. Brown on the 14th February, 1896? No.

Constable
E. Hill.

7197. I think I have made a mistake, this is not the witness I wanted.

15 Nov., 1897.

Constable Nicholas Moore was called and sworn:—

7198. *His Worship.*] What is your name? Nicholas Moore.

7199. You are a constable of police, stationed at Redfern? Yes.

7200. *Mr. Abigail.*] How many years? Six and a quarter.

7201. Were you in the Police Force prior to that? I was nearly nine years in the city of Liverpool Police Force in England, and held the position of sergeant for four years?

Constable
N. Moore.

15 Nov., 1897.

7202.

- Constable N. Moore.
15 Nov., 1897.
7202. Can you carry your recollection back to 14th February, 1896;—do you remember something that occurred then? I do. I did not take notice of the date. I could not recollect the date. I know it is early in 1896.
7203. You know the circumstances I am referring to—Quelch's alleged drunkenness? Yes.
7204. Were you on duty at the police station on that occasion? I arrived at the police station at about ten minutes past 6 to a quarter past. I had been at the superintendent's office.
7205. Did you see Quelch there? Constable Quelch was sitting in the prisoner's dock.
7206. What was he doing? He was crying.
7207. Loudly? In an extraordinary manner.
7208. Was it a boo-hoo? Yes.
7209. Was it a cry of anguish or a cry of drunkenness? I could not describe the cry; it was a most peculiar way of crying; and when I arrived at the station, I asked the sergeant, Sergeant Houlahan, what was the matter with him. He said, "They tell me his wife is dead." Naturally I went over to him. I bent over—there is a rail in front—and I told him that I was very sorry to hear that his wife was dead. He did not deny it. He looked up at me. I do not know now what he said, but I saw that there was something the matter with him.
7210. What did you see was the matter with him? I took him to have been taking drink.
7211. From what you saw and from what you smelt? Yes; I stooped right over him and I did not take notice of that, because under the circumstances I thought a man would feel grieved.
7212. And it was the general opinion of the men there? Yes; every one sympathised with him in the station.
7213. Was anybody else there? The sergeant was there; I think only the sergeant.
7214. What sergeant? Sergeant Houlahan. When I arrived I spoke to him and he mentioned that his wife was dead; that he was informed by Sergeant Vane that his wife was dead.
7215. How long did he stay there after you got there? I had work to do; I had to do various things, and of course I had to leave the station. I think I went into the cells, and shortly after went to my tea.
7216. Leaving him there? I left him there, but he must have gone out shortly after.
7217. He had been on duty from 2 to 6; you found him in this state that you described at a quarter past 6? From ten minutes to a quarter past 6; it would be earlier than 10.
7218. So that he could not have been home until ten past 6, if he went off duty at 6;—you spoke to him, and he did not deny that his wife was dead, and notwithstanding that he still remained crying in the station? Yes.
7219. Up to the time that you left did he do what you would suppose any man would reasonably have done—did he go home to see whether it was true or not? If a man was in great anguish he might not act in the same way as another one.
7220. He stopped there? Yes.
7221. After you went out did you meet Constable Edwards, later on? I did. I am not positive, but I believe that Constable Edwards met me going to my tea out of the gate.
7222. Did he say anything to you about Quelch? I did not speak to him about Quelch but he came to me and he said — [Interrupted.]
7223. *Mr. Bull.*] I object to that.
7224. *Mr. Abigail.*] Did you receive a complaint about Quelch—do not tell us what it was—from Edwards that very night? I did not receive a complaint from Edwards. I was in the station when Mr. Margoschis called at the station—of course the sergeant was in charge, and I was there at the time he came and complained at the station.
7225. Was Mr. Lawless there? I did not see Mr. Lawless. He was not there at the time that I was there.
7226. *Mr. Bull.*] You did not hear Quelch say that his wife was dead? No, I did not.
7227. I suppose it was known then in the station that his wife had been very ill, and was then very ill, if not dead? Senior-constable Quelch had told me previously that his wife was ill, and it did not astonish me then.
7228. And I suppose, having that in your mind, and then some other person in the station saying, "We understand his wife is dead," you attributed his then condition to that? I thought that he had taken drink owing to his affliction, and I sympathised with him.
7229. Do you know, as a fact, that he had been ill himself for some months before that, suffering from serious pains in his head? I could not say that.
7230. Do you know that he had been unceasing in his attention to his wife when off duty? I know that he had spoken to me about his wife being ill.
7231. Do you know that in consequence of his wife's illness and the affection of his head he had been absent on the 26th, 27th, and the 28th of the previous month? I could not say; I know he was off.
7232. Do you know that he was then complaining of neuralgic pains in the head? Not at that time.
7233. Do you know that Dr. Paton had actually ordered him some particular make or shape of hat to relieve his head? No.
7234. You did not see him coming in? No.
7235. You did not see him leave? I did not.
7236. You did not know that Margoschis was there making some complaint? That was not the same day. I think it was a few days after.
7237. You say it was not the same day? No.
7238. Are you quite sure of it? I could not swear, but I believe it was the next time I came on duty.
7239. That would be two days after? Yes.
7240. The day of Margoschis coming there was not the same day of your mentioning these circumstances? I won't swear that positively, but that is my impression.
7241. You see you have actually volunteered that information;—did you see Margoschis there on the day that you have been speaking of? I think Mr. Margoschis called on the next time after I came on duty, but I would not be certain.
7242. When would that be? Two days after.
7243. You would be off the next day? Yes, and the following day I would come on again.
7244. You think it was when you came on again that Margoschis called? I believe that was the time.

Constable George Henry Edwards was recalled:—

7245. *Mr. Abigail.*] Do you remember Valentine's Day, the 14th February, 1896;—we are now inquiring into the alleged drunkenness of Quelch? Yes.
7246. Were you on duty on that day? Yes.
7247. Were you in the police station when Quelch was there? Yes.
7248. At 6 o'clock. Yes.
7249. You were part of the relief then that was dismissed at 6? Yes.
7250. By Quelch? Well, we were not dismissed by Quelch, we were dismissed by the sergeant in the station.
7251. By Sergeant Vane? No; the man in the station. Whether it was Sergeant Houlahan or Senior-constable Shaw I would not be sure.
7252. Did you see Senior-constable Quelch? Yes.
7253. What was he doing? He was sitting down in the station.
7254. That is in the little prisoner's dock? Yes.
7255. What was he doing? Sitting down holding his head.
7256. Was he crying—sobbing? I could not say he was crying. I do not know. He had his head down.
7257. He was sitting down holding his head? Yes.
7258. Did you not go over to him and ask him what was the matter? No.
7259. Did you have any conversation with him? Yes; out in the street, I think.
7260. That was prior to coming in to be dismissed? Yes.
7261. What did he say? He said he had a lot of trouble; his wife was very sick, and his head was bad.
7262. *His Worship.*] Did you consider him drunk or sober? At that time I must say I considered him under the influence of drink. It might have been the sickness, the suffering in the head.
7263. *Mr. Abigail.*] And immediately you got into the station you saw him then sitting down? Yes.
7264. He did not tell you his wife was dead, did he? No.
7265. And he did not tell you that he heard that his wife was dead? No.
7266. And all the while you were there you did not hear any message that his wife was dead? No.
7267. And did he sit down there immediately he came in after being dismissed with the other relief;—did he sit down where you saw him and put his hands to his head? That is before we came in.
7268. Yes, before? Yes.
7269. In fact, did not you say that he had been talking such damn rot to you that you had made up your mind he was under the influence? No; I did not say that "he talked damn rot."
7270. As a matter of fact, you say this: That he spoke to you in the street, and you must say that at that time you had made up your mind that he was under the influence of drink? I thought at the time he was.
7271. *His Worship.*] Did it appear to you that something was troubling him? He appeared to be troubled. He was crying outside, but he was not crying in the station when I saw him. I did not see his face.
7272. *Mr. Bull.*] My friend has fixed the 14th February last year;—you are really going to pledge your oath that this took place then? I do not remember the date.
7273. You remember being on special duty at Prince Alfred Hospital? Yes.
7274. Do you remember watching a man who had attempted suicide? Yes.
7275. A man named Davey? Yes.
7276. Now, on the 14th February were not you there the whole time on duty at the Prince Alfred Hospital watching Davey? I could not say; I did not make a note of the time.
7277. Whilst you were there at the hospital watching Davey were not you there from 6 in the morning to 6 at night—special duty? I would not be sure whether it was 6 at night till 6 in the morning, or 6 in the morning to 6 at night.
7278. Here it is in the book, "6 a.m. to 6 p.m."
7279. *Mr. Abigail.*] Does not that bear out what he says;—he says he came into the station at 6 p.m. when he was dismissed?
7280. *Mr. Bull.*] What time would you leave the hospital when you were coming off? About 10 minutes to 6.
7281. Where would you go to then? Straight to the station.
7282. *Mr. Abigail.*] You would get there at 6 o'clock.
7283. *Mr. Bull.*] You would walk all the way to the station? Yes.
7284. It is a deuced good walk? Yes; I would get there about ten minutes past 6.
7285. I suppose at this time you knew that Quelch's wife was ill;—did you not know it was a matter of general talk in the station how ill she was and had been? I did not know.
7286. *Mr. Abigail.*] You had a conversation with Quelch when he came out of the station? No.
7287. Before? Yes.
7288. What time? About a quarter to 6.
7289. *Mr. Bull.*] How could that have been if you were on duty at Prince Alfred Hospital;—it shows at once that you are making a mistake in the date? I was on my beat that day.
7290. *His Worship.*] There is no doubt he saw the occurrence. There is a mistake in the dates. There is no record against Quelch of drunkenness. These witnesses all state that he appeared to be under the influence of drink. Under the circumstances he may have had some drink. I want the evidence of the superior officers as to what they saw and what they thought of it.

[The Commission then adjourned until 2 p.m. the next day.]

Constable
G. H.
Edwards.
15 Nov., 1897.

TUESDAY, 16 NOVEMBER, 1897.

[The Commission resumed its sittings at 2 p.m. at the Central Police Court.]

Present:—

WHITTINGDALE JOHNSON, Esq., S.M. (SOLE COMMISSIONER).

J. R. Dacey, Esq., M.L.A.; Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared in support of the charges on behalf of Mr. J. R. Dacey, M.L.A.
Mr. C. Bull, M.L.A., solicitor, appeared on behalf of Senior-constable W. E. Quelch.

Charge No. 11—continued.

Mr. Edward Spearman, livery stable proprietor, Redfern, was called and sworn:—

- E. Spearman. 7291. *His Worship.*] What is your name? Edward Spearman.
 7292. What are you? I am a livery stable proprietor.
 16 Nov., 1897. 7293. Where do you live? 32, Redfern-street, Redfern.
 7294. *Mr. Abigail.*] You have been a policeman? Yes.
 7295. What station were you attached to? Redfern.
 7296. When did you leave the Force? Over eight years ago now.
 7297. How long were you in the Force? About thirteen months.
 7298. Since that you have been a publican? Yes; I have been in a hotel.
 7299. Will you carry your memory back to 14th February, 1896, with reference to a complaint you made about Senior-constable Quelch to a constable of the name of Cubitt? Yes; I remember it well.
 7300. Just tell His Worship, will you, did you see Quelch prior to seeing Cubitt? Yes.
 7301. Where? At the corner of Redfern and Elizabeth streets, about twenty minutes to 6 in the evening. I saw him going along. I had a stable just at the "Albert Hotel," and I was waiting for a sulky to come in, and saw Senior-constable Quelch coming along, and thought he seemed very peculiar. I just walked up to a man named Lenten, who was standing at the corner, and had a conversation with him, and called his attention to Quelch.
 7302. You called his attention to Quelch? Yes; I looked again, and saw Quelch catching hold of the fence.
 7303. What fence? The park railing.
 7304. Describe how he was catching hold of it? Just like that [*indicating.*] He would walk along about 2 or 3 yards, and then stop and catch hold of it again.
 7305. Did he do that once or several times? Several times during the time that he passed the length of the park.
 7306. Was he in uniform? Yes, he was in uniform. Constable Cubitt was standing over under Mr. Abel's, the grocer's.
 7307. You made a complaint to him? Yes, I made a complaint to him.
 7308. How far were you away from Quelch? Well, I was about 100 yards.
 7309. You were on one side of the road, and he was on the other? Yes.
 7310. And did you make a complaint to anybody else? That was all.
 7311. Only to Cubitt? Yes.
 7312. *Mr. Bull.*] Did you notice whether, when you say he took hold of the fence, he laid his head down on the fence? He did not put his head on the fence.
 7313. He just took hold of the fence so? Yes.
 7314. And then you say he walked along? Yes.
 7315. You mean he let go of the fence, and then walked on a little way? Yes.
 7316. How far had you seen him walking before he took hold of the fence at all, as you described? About 50 yards.
 7317. Mr. Abigail has fixed the 14th February;—are you swearing to that date? No, I am not swearing to that date.
 7318. You take the trouble to swear to anything? No.
 7319. Mr. Abigail has fixed you to the 14th February;—what day do you say it was? I do not say it was the 14th February. I remember the 14th February. I do not say it was on the 14th February.
 7320. Are you swearing to that;—do you say that this which you describe you saw—do you say that you saw that on the afternoon or evening of the 14th February? I will swear that I saw Constable Quelch about twenty minutes to 6 o'clock at night in the month of February.
 7321. You are not confining yourself to the 14th? Not to the date.
 7322. You will find that on the shorthand deposition which is being taken, you fixed yourself to that date? I did not understand that; I could not swear to that date.
 7323. You did not take the trouble to hear Mr. Abigail's question? I did not take notice of the date.
 7324. Mr. Garlick, will you kindly turn back and read Mr. Abigail's question, and the answer?
 7325. *Mr. J. Garlick, L.S.W., Vic. (Sworn Shorthand Writer to the Commission)* read:—"Will you carry your memory back to February 14th, 1896, with reference to a complaint you made about Senior-constable Quelch to a constable of the name of Cubitt?" "Yes, I remember it well."
 7326. *Mr. Bull (To the witness).*] Now you say it was some time in the month of February, but you do not confine yourself to any particular day? I would not swear the date.
 7327. It was about 20 minutes to 6 in the evening? Yes.
 7328. You and Quelch have not been friendly for some time, I take it? Well, we have not been friendly altogether.
 7329. How long have you had an unfriendly disposition towards Quelch? Since the time that I joined the Police Force.
 7330. You mean eight years ago? Yes, I mean nearly ten years ago.
 7331. And you have carried that disposition towards Quelch right up to to-day? Well, I have had good occasion to.
 7332. But you do, as a fact? Well, I do not know.

7333. Are you kindly disposed towards Quelch? I am not kindly disposed towards him. E. Spearman.
7334. You know Margoschis, do you not? Yes; I know Margoschis. 16 Nov., 1897.
7335. Have not you and Margoschis and a few more out in the Redfern division been striving your utmost for some time to hunt Quelch, or, at any rate, to bring some disgrace upon Quelch to get him out of the district? I have not lent my hand to anything to try to get him out of the police. I have no occasion to be afraid of Quelch or any other police.
7336. Outside any question of feeling, did not you charge Quelch on one occasion with having used insulting or other language to you? Yes.
7337. What was the result of that? The case was dismissed.
7338. And you appealed, did you not? Yes.
7339. Did not the matter come on to the Sessions? Yes.
7340. And you were unsuccessful there, were you not? I may tell you that I did not appeal.
7341. Did the matter come on to the Sessions? It was not through me that it went to the Sessions.
7342. Who took it there? Mr. Crick.
7343. He was your solicitor? Yes; but it was not through my wish.
7344. If Mr. Crick acted for you and that matter went there, I will take it for granted that it was at your instance;—the matter went before the Judge and was decided against you, and you had to pay all costs? No.
7345. Are you sure? Yes.
7346. Quite sure? Quite sure.
7347. *His Worship.*] How did the case go to the Quarter Sessions if it was dismissed?
7348. *Mr. Bull.*] The fact is that there was a dismissal and costs granted against him, and against that portion of the order Mr. Crick appealed, and the result was that the appeal was either disallowed or was withdrawn or lapsed, and Spearman had to pay the costs which had been awarded against him by the Magistrate.
- Witness:*] Quelch had to pay his own costs.
7349. Had not you to pay the costs which were allowed by the Magistrate against you? I had to pay 1 guinea.
7350. You paid 2 guineas, which were allowed by Mr. Smithers, the City Magistrate? I think it was 1 guinea.
7351. You will find it was 2 guineas;—you have identified yourself with this matter against Quelch a good deal, have you not? No, I have not.
7352. Where are your stables? At Elizabeth-street, Redfern.
7353. Have not you taken every opportunity, and do you not take every opportunity whenever you see Quelch on the road, or on the street, to make insulting remarks or insulting gestures to him? I think it is all the other way.
7354. Do you not? No, I do not.
7355. *Mr. Abigail.*] Does he? Yes, on more occasions than one.
7356. *Mr. Bull.*] You remember the publications in *Truth*, and you remember *Truth's* reference to these charges and statements made by Mr. Dacey in the House? Yes.
7357. Did you post a copy of *Truth* on the outside of your stables for the general information of the people passing there? Yes, I did.
7358. I suppose that is an evidence of your disinterestedness;—why did you do that—you might just as well be candid and tell us? Well, I thought it was a thing the public should see.
7359. I suppose you know that Mr. Norton makes this assertion, that his newspaper, *Truth*, has the largest circulation of any other newspaper;—have you read that in *Truth* itself? No, I have not.
7360. Did you post up more than one copy of *Truth* on your stables, just think? Yes, two.
7361. Who supplied you with those? Myself.
7362. Do you mean to tell me that you went to the expense of buying two copies? Why wouldn't I.
7363. Did you? Yes.
7364. Why did you? To read it.
7365. You have told us already that you thought it was a matter that the public should have notice of? Yes.
7366. Is that the reason why you posted both copies on the outside of the place? It was not the outside.
7367. I do not care whether it was—it was to enable the general public to see it? Oh, no; it was not.
7368. Have not you already sworn it was—was not that your answer to me? It was not in the street.
7369. Where was it? It was on the stable door.
7370. I suppose when you shut up your stables the people from the outside could see what was posted on it? No, they could not.
7371. Now, you know Mr. O'Donnell? Yes.
7372. A gentleman who is identified with a charge against Quelch? Yes.
7373. Did you take one of the persons identified or connected with the *Truth* newspaper to the door? Well, I did not take him.
7374. Were you along with a fellow who did? Yes, I was with them.
7375. You might just as well blurt the truth out because I will get it out from you you know? Yes.
7376. Who was with you? I forget who it was.
7377. You took him down to Mr. O'Donnell? No, I did not take him; he came to me to introduce him to Mr. O'Donnell.
7378. You accompanied him? Yes.
7379. And you went into O'Donnell's along with the editor of *Truth*? That is right.
7380. And that was in relation, I understand, to some charge which was intended to be made against Quelch of embezzling or sticking to Government moneys, was it not? Yes.
7381. Is that the only interest you have taken in this matter? Yes.
7382. I do not want to annoy you very much, Spearman? I am not annoyed very much. I can tell you the gentleman's name—Mr. Forder the sub-editor of *Truth*.
7383. When was that? He came to my house one night and asked me if I — [Interrupted.]
7384. I have simply asked you when that was that you accompanied Forder to Mr. O'Donnell's? I could not tell you the date.
7385. Was it after you posted *Truth* up outside, or before? I could not tell you.
7386. Do you not know it was afterwards? I think it was afterwards. 7387.

- E. Spearman. 7387. I suppose you will admit that when you were a publican you had not a clean sheet? Well, I was fined once—I was fined twice.
- 16 Nov., 1897. 7388. What were you fined for? I was fined once for using obscene language.
7389. And were you not fined also for Sunday selling? Yes; twice.
7390. I suppose your language was very choice? I could not tell you.
7391. Were you drunk when you made use of it? I had had a few drinks.
7392. I suppose you really do not remember making use of the bad language? I did not. It was a little family affair, and I had had a few drinks.
7393. You were so drunk that you did not remember what you said? I had had a few drinks.
7394. You do not accuse Quelch of that prosecution, do you? No.
7395. And the Sunday selling—when you were fined £3 with costs;—was that at Quelch's instance? I think Quelch was with Sergeant Vane at the time.
7396. I suppose you know that Vane and Quelch used to do duty together? Yes; I know that.
7397. *Mr. Abigail.*] They are known as "The Twins," are they not? The "Siamese Twins."
7398. *Mr. Bull.*] You really accused Quelch, at any rate, of being along with Vane at the time the information was laid? I never did.
7399. But you say it now. You believe Quelch was along with Vane—Vane at any rate was the prosecuting officer? Yes.
7400. And you believe Quelch was with him? Yes. I believe he was, but I could not swear that he was.
7401. I see since you have left the hotel and have been keeping a stable, you have been fined too? Yes.
7402. That was a repetition of the language? That was under great provocation.
7403. And whether that was so or not the Magistrate took that view of the matter, and fined you exactly the same as you were fined in the first instance? £1.
7404. And 4s. 10d. costs? Yes; but it was under very great provocation. It was the policeman's fault there is no doubt about it.
7405. You mean that the policeman had provoked you? Yes.
7406. Who was the policeman? Senior-constable Corcoran.
7407. I suppose he had said something to you which annoyed you and excited you, and then you said this offensive thing? Well — [Interrupted].
7408. You ought to know better than that, you have been a policeman for eight or nine years? It was under great provocation.
7409. Showing a further interest of yours in this prosecution against Quelch, you have been in frequent conversation with Mr. Dacey over this matter? I have seen Mr. Dacey once or twice.
7410. Well, showing the interest that you take in the matter, you yourself personally drove Mr. Dacey on the day when the Commissioner visited the district? Yes; I did.
7411. You accompanied Mr. Dacey wherever he went? Yes; I did.
7412. I suppose that was to see that Mr. Dacey did not make a mistake in going to the wrong place;—what was your object in going? I thought I would like Mr. Dacey to go and see where the sand came from, up over the hill.
7413. But you have not given any evidence about that, you know nothing about it, do you? Very little.
7414. My friend has not asked you anything about that.
7415. *Mr. Abigail.*] I am — [Interrupted].
7416. *Mr. Bull.*] I suppose you will if you think he knows anything.
7417. *Mr. Abigail.*] You make no secret of it, you are interested in this. You are only too glad to get a chance to show Quelch in his true colours? Yes; I think it is time that somebody showed him in his true colours.
7418. And apart from the interest that you take in the matter do you not esteem it to be part of your public duty as a citizen? Yes.
7419. *His Worship.*] I think that is a very unnecessary question to ask in the face of his evidence. The whole of the evidence shows that it is a private grievance so far as he is concerned.
7420. *Mr. Abigail.*] Whether you are prompted to come here to give evidence of this occurrence from private spleen or personal vindictiveness towards Quelch, is there any doubt that what you have deposed to—so far as the occurrence that you have related goes—is there any doubt of the truth of it? So far as the occurrence goes it is true.
7421. Was he drunk or sober? He was drunk, and I called Constable Cubitt's attention to it.
7422. What did he say to you?
7423. *Mr. Bull.*] I object to that.
7424. *His Worship.*] You said that you saw him walking 50 yards before he came to the fence? Yes.
7425. Was he staggering and walking in a drunken way? Yes, he was.
7426. *Mr. Abigail.*] As your description, graphic as it was, of his drunken vagaries, cannot be photographed on the depositions, just describe in words how he was going;—you described he was lurching on the fence? Yes.
7427. Was he lurching, moving about, to the fence and from it? That is what drew my attention to him. He was rambling through the street, and just as he crossed Elizabeth-street I came up to the corner. The stable was about 20 yards from the corner. I came up, and just as I came Senior-constable Quelch was getting hold of the fence just like this — [Indicating].
- 7427½. He ought to know, he has been a policeman and a publican.
7428. *Mr. Bull.*] You have been drunk? I have been sober this last two years.
7429. Are you prepared to say whether it was actual drunkenness or whether it might have been caused by illness? I should say it was drunkenness.
7430. *Mr. Abigail.*] Do you think if he had had a pain in the big toe, or a pain in the head, it would have caused it? I do not think so.
7431. Or do you think it was an overdose of laudanum? If he had had an overdose of laudanum he would have sat down.
7432. You make no secret of the fact that you are rather glad to have an opportunity of being able to fasten guilt upon him? Well, yes; I think it is fair to the public.
7433. It is fair to you also to get out some explanation of the cause of your ill-feeling towards him; what caused it? Well, in the first instance, of course, I joined the police, and I was on duty in Botany-road, and Sergeant Vane, then a senior-constable, sent me over to arrest a man behind the "Balaclava." There was a man who said there were two men getting into his house. 7134.

7434. *His Worship.*] This evidence is quite unnecessary, and I will not have the depositions cumbered with it. E. Spearman. 16 Nov., 1897.
7435. *Mr. Abigail.*] I am not contesting the fact that he is prompted by vindictiveness or ill-feeling, but I want to show that he is perfectly justified. *To the witness:* While you were in the Police Force he tried to borrow some money from your wife? Yes.
7436. And your wife refused? Yes.
7437. And there has been a good deal of ill-feeling since then? Yes, there has.
7438. With reference to this appeal, did you appeal? I did not.
7439. You did not appeal? No.
7440. Did you know anything about the appeal until you were told to go to the Court? Well, yes, I knew.
7441. As a matter of fact, did you give evidence then before the Judge at the Sessions? No.
7442. Was there any evidence taken at the Sessions? Not a word.
7443. As a matter of fact, the appeal was withdrawn? Yes; the appeal was dismissed.
7444. For want of a prosecution; you did not prosecute? The appeal was dismissed.
7445. *Mr. Bull.*] The Judge ordered that the appeal could not proceed because it was on a question of costs. *To the witness:* You were asked to resign, were you not? Yes.
7446. And you did? I did so. I would like to tell your Worship what Sergeant Vane said yesterday, referring to me coming down in the tram with a constable.
7447. *His Worship.*] I will not hear it.
7448. *Mr. Abigail.*] Why should Mr. Bull get out a certificate of demerit against a witness, and then the witness be disentitled to give an explanation of it,—why should a certificate of bad character go down in the depositions? It is insinuated that he had to resign. *To the witness:* Why were you asked to resign? Because I assaulted the senior-sergeant's brother. Sergeant Vane yesterday made very serious imputations against my character. He said he had got the record of all my history. Through Mr. Vane and through Quelch I lost £500. I think I have just as good a character as Vane or Quelch.
7449. *Mr. Bull.*] You see what my friend is letting this Commission drift to. He wants to get something that was said by Vane outside.
7450. *His Worship.*] I decline to hear any more about the matter.
7451. *Mr. Abigail.*] If Vane said that to him it was in the nature of an intimidation, "Don't give evidence because we have got your record," and this is a peculiar thing, and I meant to refer to this before, but I did not feel justified, but now I do. When the subpoenas were applied for your Worship said very properly and to save expense that as a number of the witnesses subpoenaed by us had been subpoenaed by the other side the police should serve the subpoenas. Now, it is a peculiar and significant thing that for every witness I put in the box, Quelch has a record already prepared, and it is very clear that Quelch has been handed a list by Mr. Lawless, and the two have produced all the evidence they can.
7452. *His Worship.*] I cannot go further into this.
7453. *Mr. Abigail.*] I directly accuse Inspector Lawless of doing all he possibly can in a partisan way to get Constable Quelch out of his trouble, and I will go further, and at the conclusion I will conclusively show in such a way that the Inspector cannot get out of it, that he is hand and glove with the senior-constable.

Sergeant John Houlahan was recalled:—

7454. *Mr. Abigail.*] I want you to take your memory back to the month of February, 1896, and I might tell you that this Court is now inquiring into the alleged misconduct on the part of Senior-constable Quelch, referring to a charge of drunkenness on his part whilst in the Redfern Police Station. J. Houlahan. 16 Nov., 1897.
- Now, can you locate the date? No; I could not tell the date.
7455. *His Worship.*] You remember the occurrence? Yes.
7456. *Mr. Abigail.*] Do you remember something occurring? Yes.
7457. Of the nature of which I have described? Yes.
7458. Now tell his Worship all that you know about it? I went to my dinner at 2 o'clock, and was relieved by Sergeant Vane at the station. I came back, leaving Sergeant Vane in charge of the station, a few minutes before 6. Senior-constable Quelch was in the dock crying very loudly, with his face buried in his hands. I asked Sergeant Vane what was the matter with him, and he told me that his wife was dead or dying, I could not be sure which, but I think it was dead. I sympathised with the man, of course, and took no notice of him. The relief went in and came back. Mr. Lawless came in. I took no particular notice of him, and he left some time after that.
7459. *His Worship.*] Quelch left? Yes.
7460. Did you see him leave the station? Well, I never noticed him leave the station until he was passing the window. At that time, when the relief is going in and out, there is always a great deal of noise, and I did not take particular notice.
7461. Did he walk like a sober, or a drunken man? He seemed very peculiar. I only just got a glimpse of him.
7462. *Mr. Abigail.*] Was he crying like a sober, or a drunken man? He was crying in a peculiar way.
- 7462½. Let us have your candid opinion. Let us have what you know in your own mind what was the state of this senior-constable on this occasion. Was he drunk or sober from what you saw of him? Personally, I would not like to swear that; but if what I heard afterwards was true—[*Interrupted*].
7463. *Mr. Bull.*] You were asked to give evidence of what you heard and saw that day? Personally, I did not take any notice of him, because I was thrown off my guard from what Sergeant Vane told me.
7464. *His Worship.*] Did you know of any circumstances that would affect him? I heard his wife was ill, and on that account I had great sympathy with the man.
7465. *Mr. Abigail.*] How long did he remain in the station crying? About ten or fifteen minutes, I think. I could not tell how long he was in before I came there.
7466. He did not seem to be at all anxious to go and see if it was true that his wife was dead? —
7467. *His Worship.*] He was not told his wife was dead.
7468. *Mr. Abigail.*] If he was sober, and was told his wife was dead, would he not have run across home at once, but if he was drunk and cute enough to sham the sick man, would not he have done what he is said to have been doing? —
7469. *His Worship.*] Did you ever see him drunk before either on duty or off? No. That is the only time I ever saw him in that state. 7470.

- Sergeant J. Houlahan.
16 Nov., 1897.
7470. *Mr. Abigail.*] Did you ever see any other constable in the whole of your life act as he did? No.
7471. You say he was crying aloud? Yes.
7472. Was he boo-hooing? He was.
7473. *His Worship.*] I suppose you want to make out he was crying drunk.
7474. *Mr. Bull.*] Whilst the witness has sworn that he did not take any notice of it. He said he did not take very much personal notice of it.
7475. *His Worship.*] It does not follow that because a man is crying from anguish of heart that he is drunk. He may or may not be. If he was in the habit of getting drunk he would be very careful not to cry out.
7476. *Mr. Abigail.*] I have not been in this world half the time that you have, but I have a greater experience than you, yet I have never seen such a big man as that crying like that, except he was drunk.
To the witness: Do I understand you to say that you did not take particular notice of him personally? Yes; I took no notice of him personally.
7477. But from the slight notice you did take of him, you came to the conclusion that, to say the least, his conduct was very peculiar? I did.
7478. That is the term you used? Yes.
7479. *His Worship.*] There is no doubt there is something to be explained.
7480. *Mr. Abigail.*] Do you know who had told Sergeant Vane that Mrs. Quelch was dead? I could not tell who told Sergeant Vane. He told me that, and that threw me off my guard so as not to look at him at all.
7481. *His Worship.*] Was it not your duty, if you thought he was drunk, to have reported him to the Inspector? Sergeant Vane was in charge of the station, and he put me off my guard altogether. If I thought he was drunk myself it would have been my duty.
7482. *Mr. Abigail.*] You did not even take the trouble to examine personally? No.
7483. You had a particular reason for that? Yes.
7484. Because Sergeant Vane was there? Yes.
7485. You will admit, will you not, that the utmost good feeling exists between Sergeant Vane and Quelch? I believe so.
7486. A feeling that might be properly described as being somewhat paternal? There is no doubt about it; yes.
7487. Is it not a fact that the good feeling existing between Sergeant Vane and Quelch is more than the ordinary feeling between superior and subordinate officer? Well, really, I could hardly say; it is not a thing for me to answer; there is not the slightest doubt about it that they are rather intimately friendly.
7488. *His Worship.*] Was it your duty or Sergeant Vane's duty to have reported him if he was drunk? Sergeant Vane's, because he was in charge of the station.
7489. *Mr. Bull.*] If you thought he was drunk, would it not have been your duty to have reported Sergeant Vane as well if he did not report him? Yes.
7490. *Mr. Abigail.*] You did not want to incur the displeasure of reporting either? No. If he was drunk he had a better chance of noticing him, because he came into the station whilst Sergeant Vane was on duty. If he had come in while I was in charge I would have taken particular notice of him.
7491. Because Sergeant Vane did not report Quelch for being drunk, Quelch could not have been drunk. You would not say that, would you? No.
7492. *Mr. Bull.*] Are you and Vane friendly? Yes; we have been together for twenty years.
7493. There has always been the very kindest feeling between you two men? Yes.
7494. Now, is not this the fact, that you did not take particular notice of Quelch during the ten minutes that you were in the station? I did not personally.
7495. You could not do in it any other way. It would be a good deal like seeing somebody with your own eyes? It was the crying I took most notice of.
7496. Something was said to you by Vane, and what you say is that that induced you to take no further notice of it? No; I sympathised with the man.
7497. *His Worship.*] Then Vane would be likely to know more about it than you do? Yes, Vane was in the station.
7498. *Mr. Bull.*] Whilst you were in the station about ten minutes Vane would have been there much longer? He was there from half-past 2 until 6.
7499. You did not say it was the 14th February? I do not know the date.
7500. Did anybody tell you yesterday that it was not the 14th? No; nobody ever spoke a word to me. I did not want to speak about the matter to anybody at all.
7501. *His Worship.*] I do not think the date is material; the fact is there.
7502. *Mr. Bull.*] Would you be surprised at all to know that you were not on duty at all at 6 on the 14th February? I can tell by the books.
7503. *His Worship.*] The date is not material as to what occurred in the station.
7504. *Mr. Abigail.*] I will admit that your client ought to know whether he was drunk on the 14th, 15th, or 16th.
7505. *Mr. Bull.*] Did you know as a fact that Quelch had been for some time, just immediately preceding these circumstances that you speak of, off sick, suffering from his head? Really, I could not tell you now, but if you look at the occurrence-book you will see it. I have no knowledge of it.
7506. Have you heard him complain of pains in his head? No.

Constable Eaton Ridley was called and sworn:—

- Constable E. Ridley.
16 Nov., 1897.
7507. *His Worship.*] What is your name? Eaton Ridley.
7508. What are you? Constable, stationed at Redfern.
7509. *Mr. Abigail.*] How long have you been in the Force? Eleven years last May.
7510. Do you remember the month of February, 1896, in connection with this charge against Quelch for drunkenness in the station? I could not say whether it was in February. I remember the occasion.
7511. Were you on duty on that day? I came on duty at 6 o'clock at night.
7512. Were you in the station when Quelch was there? He was sitting in the dock when I came in the station.

Constable
E. Ridley.
16 Nov., 1897.

7513. Just tell us what you saw, will you? When I first came in the station I heard somebody sobbing inside in the station. I went to the window and looked in, and saw Senior-constable Quelch sitting in the dock. He was crying. He had his face in his hands. I asked what was the matter, and some of the men waiting there to fall in told me that his wife was dead. That was all.
7514. Did you see him? Only sitting in the dock.
7515. Did you notice his condition, whether he was drunk or sober? Well, I did not see him standing up, and I did not see him except with his hands to his face.
7516. From the crying did you come to any conclusion? I could not swear that he was drunk, but I inquired at the time.
7517. Would you say that he was sober? I did not think he was at the time, but I could not swear.
7518. *His Worship.*] Did he seem in great distress about something? Yes.
7519. *Mr. Abigail.*] Crying loudly? Yes.
7520. Was it the cry of a man suffering from extreme anguish, or the cry of a man who had suffered from overloading himself with too much liquor? I could not say.
7521. *His Worship.*] Have you ever seen him in a state of intoxication before or since? No.
7522. *Mr. Abigail.*] You were satisfied, when you heard that his wife was dead, as to his condition? Well, you see, I had heard something before I came in.
7523. What had you heard?
7524. *Mr. Bull.*] I object.
7525. *Mr. Abigail.*] Had any complaint been made to you? No.
7526. You had heard something about Quelch before you came into the station? Yes.
7527. And then when you saw him, in the light of what you had heard, did you then think he was drunk or sober? I did not think he was sober, but I thought he was suffering from the effects of his wife's illness, and, of course, combined with what I had heard.
7528. Did you think it was partly due to over-indulgence and the shock of his wife's death? That is what I thought it was.
7529. You thought it was partly due to one and partly to the other? Yes; but from what I heard myself I could not swear that he was drunk.
7530. *Mr. Bull.*] From your own personal observation you came to no conclusion? No.
7531. *Mr. Abigail.*] Then after you left the station you heard something else? Yes.
7532. Then did you come to any conclusion of his state from what you had seen, and from what you subsequently heard? Well, of course, from what I had heard; I could not form a conclusion on what I saw, and as what I saw was — *[Interrupted]*.
7533. *Mr. Bull.*] Inconsistent with what you heard? Oh, no; but I did not see sufficient to form an opinion.
7534. *His Worship.*] I suppose you will say that a man may be crying from distress of mind without being drunk? I think so.
7535. *Mr. Abigail.*] You certainly say that from what you saw, superadded to what you heard, you think he was suffering from the effects of liquor?
7536. *His Worship.*] You say it might have been one or the other, or both combined? From the conclusion I came to at the time, I did not think he would have cried in the manner in which he did unless he had been drinking, but I did not see sufficient to lead me to conclude that he was drunk.
7537. *Mr. Abigail.*] Was it a peculiar kind of crying, peculiar to drunken people? No; I could not say that.
7538. *Mr. Bull.*] You are not a senior-constable? I am not.
7539. You have been working very hard for eleven years in that direction, have not you? It does not look like it.
7540. What do you mean? I suppose the first promotion you would get would be that of senior-constable? First-class.
7541. You are not even a first-class constable yet? No.
7542. I suppose there is an amount of jealousy in the Redfern station towards Quelch? I do not know that there is any jealousy.
7543. Do you not think there is? No, I do not think so; as far as I am personally concerned I am not jealous.
7544. Are you very much in Quelch's company in official duty? As little as possible.
7545. What do you mean—that you are not friendly disposed or kindly inclined towards him? I have no ill-feeling as regards him privately, but officially I have as little to do with him as possible.
7546. In fact, I suppose the truth is he has reported you occasionally? He has.
7547. *Mr. Abigail.*] It makes you careful.
7548. *Mr. Bull.*] He has even reported you for being under the influence of drink? No.
7549. For being in a hotel? Yes.
7550. I suppose these little things tend—it is only human after all—to make things unpleasant? There is no doubt it makes things unpleasant.
7551. Tell me this—Can you fix a time at all for this occurrence that you are speaking about? I cannot. I should say it is about two years ago.
7552. If it was in February, 1896, it will not be two years until next February? I say “about.”
7553. Do you remember at that time whether Quelch had been off on sick-leave? I could not say.
7554. I suppose the books would be better evidence than your recollection? Undoubtedly.
7555. You have really no recollection of whether he had or not? I never heard of it.
7556. *Mr. Abigail.*] You have been asked about jealousy, and say you have as little to do with Quelch as possible; that is the experience of most of the police there? I could not say anything about the experience of other men.
7557. Do you not know as a matter of common report that the other constables say plainly that they have as little to do with Quelch and another officer as they can? For their own safety.
7558. They have as little to do with him for their own safety as possible? Yes.
7559. Beyond Sergeant Vane and this good old sergeant here, who would not quarrel with anybody—that is, Sergeant Houlahan—and Inspector Lawless, and Constable Dukes, the experience of all the other police is exactly as you have expressed it? I could not speak for the experience of the other police.
7560. As a matter of common repute there, is not that so? Amongst the men, as far as my knowledge goes, he has not many friends.

- Constable
E. Ridley.
16 Nov., 1897.
7561. Even amongst those who are his seniors in rank? Yes.
7562. So that there could not be any jealousy there? No.
7563. He has, it is a matter of notoriety in the Police Force at Redfern, been most successful in securing promotion? Yes.
7564. *Mr. Bull.*] That is the cause of the whole of this inquiry.
7565. *His Worship.*] Then he must have some friends.
7566. *Mr. Abigail.*] Any man can get promotion if he will sacrifice his manhood.

Senior-constable William Edward Quelch was recalled:—

- Senior-constable
W. E. Quelch.
16 Nov., 1897.
7567. *Mr. Bull.*] You have heard a good deal in this inquiry directed to the 14th February, 1896? The case was centred on that right up till last night. Something has cropped up since.
7568. The whole of the investigation and inquiry up till 1 o'clock yesterday had relation to some misconduct of yours on the 14th February, 1896? Yes.
7569. And up till the time that the inquiry ceased yesterday every one of Mr. Abigail's questions and all statements made by witnesses had relation to that date? Yes, to the 14th February.
7570. You heard Mr. Abigail say over and over again, "Do you remember the 14th February? Yes. So there is no mistake about the time? He gave the date at the opening of the charge.
7571. You have the conduct-book? I have the record-book of duty.
7572. You have the conduct-book? I have the record-book of duty.
7573. Just take Constable Edwards as one instance? He was on duty at Prince Alfred Hospital on that day—so he was for the whole month.
7574. For the month of February? Yes.
7575. Just give us from what date to what date? Constable Edwards was on duty at the Prince Alfred Hospital watching a man named Davey, who had attempted suicide, from the 8th day of February, 1896, up till the 9th day of March.
7576. *Mr. Abigail.*] At what hours?
7577. *His Worship.*] Would he not be on duty on the street at that time? Not at all. He relieved his man at the hospital at 6 o'clock in the morning, and would be relieved at 6 o'clock at night.
7578. *Mr. Bull.*] Would he go straight home after being relieved at the hospital? No; he would report at the station from the hospital; but that would take at least half an hour to walk.
7579. Now, you have the conduct-book, duty-book No. 40, there showing where the different officers were employed on the date fixed by Mr. Abigail? Yes.
7580. And those facts are set out in the books themselves? Yes.
7581. First of all, do you know Spearman? Yes.
7582. Do you remember any circumstances mentioned by Spearman at about twenty minutes to 5 one evening;—you heard his statement that he saw you rambling along the road past his stable? Never saw him in my life, not like as he describes—particularly that man.
7583. And that, having walked about 50 yards along the street, he saw you take hold of the railing? Yes.
7584. Now, first of all, did such a thing happen? Never.
7585. Do you remember the afternoon or evening that you were upset or distressed in the station? I do.
7586. When was that? On Friday afternoon, the 7th day of February, 1896.
7587. Now, previously to the 7th, had you been ill and off duty? Yes.
7588. When had you actually been off duty? The latter end of January.
7589. You have already given dates—half of the 26th, the whole of the 27th, 28th, and 29th? Yes.
7590. What were you suffering from then? My head.
7591. Just describe what it is you suffer from? As far as my knowledge of the medical phrase goes, it is neuralgia and vertigo. I do not know what that is.
7592. Who has attended you for this ailment? The police doctor and my own doctor.
7593. You mean Dr. Paton? Dr. Paton and Drs. McMurray and Marshall.
7594. And during February, 1896, was your wife ill? Yes.
7595. Very ill? Yes.
7596. When off duty, was your time to any extent taken up in attending to her? All night and all day, and I had the sanction of the inspector to call in when on duty.
7597. To see how she was from time to time? When on duty—yes.
7598. Now, on that afternoon, on the 7th, had you called in at the house? The doctor visited my wife on that day, and he told me that he had doubts as to her recovery; she was as ill as she could be, but he would do his best.
7599. Who was that? Dr. McMurray. He would do his best. She would have to take a wonderful change to recover. I was upset enough before that. As soon as I got that news, having been left previously with two children—lost my wife and left with two children — [Interrupted.]
7600. You mean that you already had suffered the bereavement and loss of a wife? Yes; as soon as that came in my mind, of course, losing her and leaving me with six; the eldest of them has been strapped on her back for six months, and was given up by Dr. McMurray — [Interrupted.]
7601. And she was ill at that time? Yes, and has been for years, and the same child was given up last Friday by Dr. McMurray, and there is no hope for her.
7602. And this reminiscence coming to you of your former trouble — [Interrupted]? Yes, the doctor gave me a prescription to get made up as soon as possible, and coming on duty at 2 o'clock, having no one to go down to the doctor, who prescribes the medicine and dispenses it too, I asked the inspector if he would be good enough to allow me to come down to the doctor.
7603. That is when you went on duty at 2? Yes. He said, "Most decidedly, I have no objection to allow you to go down as your wife has taken a bad turn." Inspector Lawless was always kind that way to the men.
7604. *Mr. Bull.*] So it is said. Mr. Abigail says "kind to a fault."
7605. *Mr. Abigail.*] I did not say it, but I will father the statement.

Witness: A statement was then, that afternoon, to come down to the Superintendent, a letter to the Superintendent. Inspector Lawless said, "As you are going down to Liverpool-street you may as well take this letter down yourself."

Senior-
constable
W. E. Quelch.
16 Nov., 1897.

7606. *Mr. Bull.*] He took advantage of your coming down on your own private business and asked you to deliver a letter? My coming to Lyons'-terrace here, and I brought the letter down and delivered it to the Superintendent's office and went to my doctor and got the medicine. I then went home.
7607. Back to your house? Yes, and I did what was necessary in my home, and I was regularly bewildered in my head; and then the wife asked me, seeing that I was so upset—[*Interrupted.*]
7608. *Mr. Abigail.*] I object to this conversation.
7609. *His Worship.*] Did you take any stimulant of any kind? I had a glass of ——. As soon as I had attended to my wife and I was coming away again I had a glass of whisky, and I came out on my beat and did my duty.
7610. *Mr. Bull.*] What time was that? About 5 o'clock.
7611. You went out then on your beat? Yes.
7612. You worked till when? Till about ten to 6, and then went to the station and sat down. The relief paraded. It was paraded by Sergeant Houlahan that night, the 7th not the 14th—that is the night the sergeant was on. Sergeant Vane was in the station all that afternoon, the 7th and not the 14th. Constable Moore was on that afternoon, the 7th and not the 14th. Constable Edwards was on duty on the street on that afternoon; on the 14th he was at the hospital.
7613. He was actually on duty on the streets on the 7th? Yes. Constable Cubitt was off duty that afternoon, and came on at 6 o'clock.
7614. He was not on duty between 2 and 6? Not on the 14th; but he was on the 7th.
7615. And the 7th that you speak of he was on duty during the afternoon? He was.
7616. Then, having arrived at the station, what did you do? I sat down, and being troubled in the head and troubled with being left with the children—I naturally thought the doctor's statement to be true, knowing the state of the wife—I got upset, and no doubt I did cry. I know what I had to go through when I was left with the two. The relief was paraded then at 6 o'clock by Sergeant Houlahan, marched out, and the other relief came in to which I belonged and was dismissed also. Inspector Lawless was there. After the men had all gone away, and I had recovered a little bit, I got up and walked home.
7617. You have heard my friend ask whether you did not boo-hoo and roar out with some peculiarity, as of a man who was drunk;—you say you really were overcome? I was overcome, and I could not tell you what I did.
7618. And is this glass of whisky which you took in the house after you got back from the Superintendent's office and the doctor the only stimulant you had taken that day? That is the only one I had taken.
7619. Are you in the habit of taking stimulants? No.
7620. You do suffer still, do you not, from some stomachic weakness? I have two complaints—the only things I have suffered with in my life—that is, my bowels and my head.
7621. I suppose you know, without being a medical man, that an affection of the bowels affects your head as well—you have that experience? I have that experience—I know it too well.
7622. You say, as a fact, you are an abstemious man? Oh, yes; I never trouble about it.
7623. Have you ever heard Houlahan, who is kindly inclined towards you, and Ridley say that they had never seen you under the influence of drink? I have seen it in my own pantry in my own house for months and never touched it.
7624. You have heard them all say they have never seen you in this condition before or since? I will tell you this: I have had a bottle of rum in my safe for the last seven years, and never touched it and never looked at it.
7625. *His Worship.*] There is no record against you for drunkenness? No.
7626. *Mr. Bull.*] Have you ever been reported for being in a condition or state of intoxication? Never.
7627. That is your account of this remarkable occurrence of February, 1896? Yes.
7628. Speaking of the witness Margoschis, you have had, have you not, in your capacity as an officer, to complain of the manner in which his business was conducted? His fellow-businessmen complained to me.
7629. The other pawnbrokers in the district? Yes.
7630. The nature of the complaint was? That Ulakey, a licensed pawnbroker in the same street, a few yards from his own, refused to pledge before the business hours, and Margoschis—[*Interrupted.*]
7631. *Mr. Abigail.*] I object to this. That has been admitted in cross-examination, so why should we go through this?
7632. *His Worship.*] There is no doubt that he gave evidence because of the ill-feeling he had towards Quelch.
7633. *Mr. Bull.*] Now, Spearman was, as a fact, as he told us, a police officer? Yes.
7634. *Mr. Abigail.*] I object to your bringing this out again. This is a waste of time.
7635. *His Worship.*] Have you assisted in Sunday-selling prosecutions against Spearman? No, never gave evidence against him in my life, and never assisted in a prosecution against him.
7636. *Mr. Bull.*] You heard me ask Spearman a question with regard to his conduct towards you recently? It is up to to-day.
7637. What is the man's manner and conduct to you whenever he does see you? I cannot pass him without he jeers and jests at me; and he won't mention any names, but he jeers and laughs.
7638. There is no doubt that he has great personal dislike to you? Oh, yes; on account of my being in the company of Sergeant Vane. After he obtained the license I used to go in the company of Sergeant Vane, and do my duty; and of course I am not the only one. In fact, I believe it was reported to Sergeant Vane by another young constable that if he came in the yard he would put him in the water-butt.
7639. That is, that he had said that of some young police officer? Yes. That was going to be given in evidence against him at the annual Licensing Court.
7640. He is not now a publican? No.
7641. He is a livery-stable keeper? He is.
7642. *Mr. Abigail.*] You will admit, won't you, that you did have a glass of whisky? Yes.
7643. Will you admit, too, that it is somewhat peculiar that after you had a glass of whisky and went out on street duty that Spearman, of all people in the world, should have had an opportunity of seeing you in the condition which he describes;—it is rather peculiar? It is peculiar.
7644. And you will further admit that he could not by any process of reasoning or imagination, so far as you know, have discovered that you must have had whisky inside when you were on duty—that you must have had spirits, intoxicants? I say I had a glass of whisky.

Senior-
constable
W. E. Quelch.
16 Nov., 1897.

7645. You won't, in the face of those facts, notwithstanding the personal dislike which both of you have for each other, say that Spearman has come here and perjured himself, will you? I say he has come here and perjured himself if he says I acted as he says I did.

7646. You say you had whisky? I had one glass.

7647. It is peculiar that on this very occasion Spearman should have seen you, as he says, rambling along and lurching up against the fence? Yes.

7648. If it had been a week after, or a week before, there might not have been so much peculiarity? I daresay there might have been.

7649. Did you see Spearman at all that afternoon? I did not.

7650. Was it because the one glass of liquor had had such an effect upon you that you could not see him? No; I could have seen him, and I always did look out for him in that locality.

7651. Do you want to catch him? No.

7652. You are not surprised, then, that he is on the lookout to catch you? I knew that well. He tried it once.

7653. You will admit, won't you, that having this glass of whisky, and being in the peculiar state of mind you were in, it is most peculiarly unfortunate that he should have seen you on the very afternoon that you say you had whisky? Yes, I suppose it is.

7654. I suppose you put it down to your ill-luck;—is that simply another coincidence? I was not in the condition as indicated by Mr. Spearman, not in the least.

7655. You have admitted the peculiarity of his seeing you on the very afternoon that you had whisky;—now, is that merely another coincidence? I say Spearman never saw me in the condition he said.

7656. You are like an ostrich, aren't you—because it sticks its head in the sand and cannot see the hunters, it thinks they cannot see it—you admit that Spearman saw you and you could not see him? I did not see Spearman.

7657. Will you swear that Spearman did not see you that very afternoon on which you admit you had whisky? I do not say he did not see me. I say he did not see me in the position indicated by his evidence.

7658. Will you swear that Spearman did not see you in the locality that he describes? I do not say at all he did not see me.

7659. Do you think that that man would have deliberately called over another constable, and would have drawn his attention to your state, if it were not so? If I was in the same position and the same state that Spearman swears he saw me to-day, Spearman would have been the first man to have gone to the police station to see the inspector.

7660. Do you not understand that he did something better than that? He, seeing another constable on the beat, who could corroborate him in what he wanted to allege against you, it would be the very best thing he could do to call that very constable and say, "Now, you see we both see him and he is drunk"? You have heard the constable's evidence, and, until you called him into the witness-box, I never knew a word that Constable Cubitt was ever going to be called on that charge.

7661. Did not you ask him? Never spoke to the man in my life about it. Never knew he was going to be called.

7662. You heard Cubitt swear here that Spearman called his attention to you? I did.

7663. Will not you yourself admit that it is most peculiar that you should have been down town, that you should have been worried so much, that you should have taken this one glass of whisky, and gone out on duty, that Spearman should have seen you and called Cubitt's attention to you, and that Cubitt should have gone over to you, and should admit that you were peculiar, that you should have gone back to the station, and that all these other constables should have seen you in the police station;—do you not think that it is very peculiar that all that should have occurred on that particular afternoon that you took this one glass of whisky? They could not see me any other afternoon.

7664. Did not you instruct Mr. Bull that it was an overdose of laudanum? I never said any such thing.

7665. Did you instruct Mr. Bull to set up a defence here that it was not drink, but laudanum and your wife's illness? I never did.

7666. So that Mr. Bull has merely put the questions out of his own head? I told Mr. Bull the same as I said just now.

7667. Did you tell him anything about the whisky? I do not believe I did.

7668. But the first time you told us anything about the whisky was just now when you stepped into the box? It is the first time I told you. It is the first time I told you with reference to the date.

7669. Did you ever tell anybody else that you had had a glass of whisky that afternoon? I do not know.

7670. Did you tell your inspector? I do not think I did.

7671. Did you tell Sergeant Vane? I do not think I did. I may have done so.

7662. You will admit that February was a particularly hot month; you will remember that February last twelve months was very hot? I cannot remember it.

7673. Did you walk or did you ride down to the doctor's? I rode down in uniform.

7674. You say you rode down? Rode down and rode back in uniform.

7675. How long were you at home that day off duty? I was not off duty at all.

7676. Off street duty; you were relieved from your street patrol? No, I was not.

7677. Did not you say that the inspector told you that you could call in at the house? Yes.

7678. How many times did you call in? I may have called in twice or three times.

7679. You remember other things minutely, on other occasions, why cannot you on this occasion;—do you not know how many times you called in in the morning? Well, say twice.

7680. How many times in the afternoon? Say twice.

7681. That is four times in the day? Yes.

7682. Now, is it not a fact that you had your whisky each time? No.

7683. And that you only remember taking it once? No.

7684. You only had it after you came back with the prescription? I was on duty all the forenoon.

7685. Do you really keep whisky in the house? No.

7686. You had rum? I have had a bottle of rum there for the last seven or eight years.

7687. You have been a sailor? Yes.

7688. Rum has not a particular fancy for a sailor, nor has a sailor for it? It has for some.

7689. You say you have had that bottle of rum in the house for seven years, but you do not keep whisky? No.

7690. Was the whisky for your wife on this occasion? No.

7691.

Senior-
constable
W. E. Quelch.
16 Nov., 1897.

7691. And when the doctor came in, you asked him to have some? No; I never made such a fool of myself.
7692. You had it alone? I had it myself after I came home from the doctor's. If you want to know how it came in the house I can tell you.
7693. I am more anxious to know how it went out of the house, whether you took it with you, and whether you concealed it in the way that a man ordinarily does? No.
7694. You say this was on the 7th? Yes.
7695. Why have you gone through so much elaboration in showing that Constables Edwards and Cubitt were not on duty on the 14th;—do you think to evade the occurrence in that way? No; I recollect the afternoon I was so bad. Sergeant Houlahan and Constable Moore were not on duty on the 14th.
7696. You will admit that you were bad? I was bad with my head, not with drink.
7697. Who told you your wife was dead? Nobody.
7698. Have you not heard it sworn here that Sergeant Vane said that your wife was dead, and that was what you were crying for? I never told Sergeant Vane.
7699. Nobody told you that? No.
7700. Why were you crying? For the news I got.
7701. What news did you get? I told you in the evidence.
7702. Did you get it at 2 o'clock;—did not you swear here that you saw the doctor; then he gave you a prescription, and that prescription was dispensed about 2 o'clock, and that you asked the inspector's leave, and you had to take a letter? Yes.
7703. You went down and took the letter down and got the medicine dispensed and then rode back? Yes.
7704. What time did you get back? I should say it might have been just after 4.
7705. Did it take you all that while, nearly four hours, to do all that? How can it be four hours—2 to 4.
7706. Did not you go before 1? No; I did not go on duty until 2.
7707. You say you got back about 4? Just after 4, perhaps.
7708. Then you got the medicine, saw the patient, and had a whisky, and walked out on duty? No, I did not; I remained at home a little while.
7709. How long? I could not say how long.
7710. I want to know what time you got on the streets again? It must have been about twenty past 4 or twenty to 5.
7711. *His Worship.*] You received no further information about your wife at the station? Not at the station.
7712. *Mr. Abigail.*] From the time you left your home, from twenty past 4 or twenty to 5, till you got to the station you received no intimation concerning your wife? No.
7713. Then you walked out in the street, you came back and were present when the relief was dismissed, and then you deliberately sat down in the station and started boo-hooing? Who says I did not cry in the street?
7714. Did not Spearman swear he saw you lean against the railings? He saw me walk about 50 yards, he says.
7715. Tell me this: How it was that you chose to start crying only when you got to the station if your heart was so torn with your anguish over your domestic affliction—why did not you cry at home or cry in the street, or why did not you come straight up to your inspector, who you say was so kind to you—and was properly so on this occasion—why did not you say, "Mr. Lawless, my wife is given up; I have gone home with the medicine; I am heart-broken as to her condition; for God's sake let me go and attend to her"? Inspector Lawless was not in the station then.
7716. Why did you not ask the next officer in charge? I am doubtful as to his authority.
7717. Had you any doubt on that occasion? I had, and have the same doubt now.
7718. Did not you assume that you had the inspector's permission to stay at home? No.
7719. You did not go back on duty until twenty to 5;—why did not you remain there until 6 and then report yourself at the station? I was going off at 6 altogether.
7720. You cannot evade the peculiarity of the circumstances, can you? You started crying—you received no intimation of the state of your wife's health from the time you left home until you got to the station;—did not you feel the effects of the whisky on you? No.
7721. Did not you feel that you had to get some excuse to evade your guiltiness? No excuse at all.
7722. And did not you start boo-hooing and crying in order to make people think you were blubbering or sobbing, and in order to conceal the effect of the liquor? I do not know what you call boo-hoo crying.
7723. You ought to know; you did it; I will call it crying;—did not you do it so that your officers would not see that you had been taking liquor? There was only one officer in the station, Sergeant Vane.
7724. If your breast was so torn with anguish, you were free from duty at 6, why did not you immediately go home and cry there—why did you remain in the station when your wife was probably dying;—why did not you make a bee-line for home? I waited until I calmed down, and then walked home.
7725. Did you stop crying in the station? I do not think I did.
7726. *His Worship.*] I think it is very cruel to go on in this way.
7727. *Mr. Abigail.*] If I find that I have unintentionally done him any wrong I will give him the best apology I can. *To the witness:* You say that you cannot pass Spearman without Spearman says something to you? He always does.
7728. Is it not equally true that you cannot pass him without you saying something to him? I never speak to the man as long as there is any breath in my body.
7729. But do you ever speak at him? No; if I saw him on the one side of the road I cross over to the other; that is my action.
7730. You will admit that there is as much ill-feeling on your side against him as there is on his against you? No. I have never given evidence against the man in my life—never prosecuted him.
7731. Why would you walk over the other side to escape talking to him if there is no ill-feeling? I go over the other side to escape his insults, not to escape talking to him.
7732. Is there any truth in what has been stated here by Ridley, that he only sees you officially as little as possible? His duty carries him that way.
7733. You know the insinuation there, that he does not care to talk to you officially unless it is absolutely necessary? He knows that I will do my duty, and his duty is different from mine, and that takes him apart from me.
7734. And you will do your duty whatever it is? Yes.
7735. However cruel it is? I will do my duty as long as it is straightforward and honest. I will shirk nothing towards him or anyone else.

Inspector Edmund Lawless was recalled :—

- Inspector E. Lawless.
16 Nov., 1897.
7736. *Mr. Bull.*] You are the Inspector in charge of the Redfern division, Quelch being a senior-constable under you ;—do you remember the circumstance of Quelch's wife being very ill in the early part of last year ? I cannot say that I do. I have heard of it. I do not know.
7737. Have you any recollection with regard to Quelch obtaining permission from you on one occasion to attend the doctor and get some medicine which had been prescribed by Dr. McMurray for his wife ? I remember that circumstance.
7738. Can you fix any time for that ? No.
7739. I suppose if any man under you were similarly placed and made the same request, you would grant the same permission ? Yes.
7740. Do you know as a fact that, in addition to Mrs. Quelch being ill, Quelch himself, from time to time, has been off on sick-leave, suffering from some illness in the head ? He has been on the sick-list. I could not tell you the times or how long.
7741. Do you remember this circumstance that so much has been made of about Quelch being in the station one evening sobbing or crying ? I do not.
7742. It is said by at least one witness that you were there ? I possibly might have been there.
7743. Have you ever seen Quelch under the influence of liquor since he has been in the Force ? No.
7744. Have you ever seen anything in Quelch's manner or conduct that would induce you to suppose that he was in a state of intoxication ? No.
7745. Speaking of him in contrast to some of the men who are under you there, would you say whether Quelch is amongst the most abstemious men that you have there ? I should take him to be a very sober man.
7746. You know that a number of men have been reported to you from time to time, and have been dealt with by the Superintendent for different conditions of intoxication ? Yes.
7747. And speaking of Quelch, has he ever been reported to you in that condition, for instance ? No, never.
7748. Have you any reason to suppose from any observation of your own, or any information that has ever been afforded you, that Quelch has been intoxicated when on duty ? Never yet until this inquiry.
7749. You know Sergeant Vane ? Yes.
7750. Is he the kind of man to show anybody any particular favour ;—is he the kind of man to overlook a man's fault if he had one ? I do not think so.
7751. Is he not rather a severe man ? Well, he has always been very straightforward, and always reports things as he sees them.
7752. Do you think it likely that, seeing Quelch in a state of intoxication, he would overlook it, and not report it to you ? I do not think so.
7753. Would you say the same thing of Houlahan ? I should think that he would report it to me.
7754. If he had seen Vane in such a condition as would entitle him to think he was in a state of intoxication, do you suppose for a moment that he would neglect to report it to you ? I do not think so for a moment.
7755. You have had no complaint against either Vane or Houlahan that they have neglected to do their duty in that respect ? No.
7756. *Mr. Abigail.*] You have confidence in Cubitt and Edwards and Moore and Ridley ? I do not understand you.
7757. You, as their Inspector, have confidence in them as police officers, have you not ? In a trustworthy sense ?
7758. Yes ? Certainly, so far as I have observed them.
7759. You do not think them to be persons who would be liable to come here and either stretch their imaginations or tell what is wilfully untrue ? I should think not.
7760. In fact, if you thought they were persons who would wilfully commit perjury you would esteem it to be your duty to recommend their dismissal from the Force ? I should certainly report the matter.
7761. Will you be surprised to hear that the constables I have named have been called here, and their evidence certainly shows that this man was under the influence of liquor.
7762. *Mr. Bull.*] There is no such evidence.
7763. *Mr. Abigail.*] Edwards swore that he was under the influence of drink.
7764. *Mr. Bull.*] In answer to his Worship he said this : That it might have been attributable to great depression of mind.
7765. *Mr. Abigail.*] We have coupled with that Quelch's own admission that he did have whisky ;—at any rate, if these witnesses come in the box here and say that Quelch was in the station crying in a peculiar manner, and if one witness says—any one of these officers says—it was partly due, or might have been partly due, in his opinion to distress, and partly due to the influence of an intoxicant, you would not say that man was saying what was untrue ? I could not say so unless I had other observations to guide me to compare with his.
7766. You were not in the station at the time of this occurrence ? I do not think so. I do not remember it.
7767. *His Worship.*] It was not reported to you officially ? No ; and I think it is very remarkable that the constables that you speak of did not say something.
7768. *Mr. Abigail.*] Is it not more remarkable that the senior officer in the station did not say something ? Yes.
7769. You will admit that it was his duty to say something ? Yes ; and then I could have examined him myself.
7770. Assuming that the sergeant failed to do his duty, you would not expect a constable to come and tell you ;—would not that be rank insubordination ? No ; it would not. If he thought that the sergeant had neglected his duty, and he was a conscientious man, he might say something that would cause me to make inquiries. It is not the usual thing.
7771. Will you admit at once the difficulty that a constable would labour under ? The constable would think at once that as his officer took no notice he need not.
7772. If the constable found on reporting to you that the superior officer had reported, what would become of the constable then ? If he reported that the senior officer did not report, that would be making a complaint against his superior officer. I should not think he would do that unless he had something very serious to complain of.

- 7773. He would experience a difficulty in knowing whether a complaint had or had not been made? He must have some particular motive. Inspector
E. Lawless.
- 7774. *Mr. Bull.*] Would you think it a great stretch of duty if a constable reported having seen a senior-constable drunk on duty? I should certainly inquire of the other officer why. 16 Nov., 1897.
- 7775. Supposing he had seen the senior-constable drunk on the street, and you knew that he had seen him and had made no report to you, it would be a serious matter of complaint against the ordinary constable? If he was reported for it he would have to explain certainly.
- 7776. *Mr. Abigail.*] Would it not be first his duty to go to the sergeant-in-charge of the station and report? Yes.
- 7777. Is not that the ordinary course? Yes, and if the sergeant took the report he would report it to me.
- 7778. It would come to you filtering through the proper officers? Yes.
- 7779. You will admit that it is a very rare thing for a constable to report a superior officer? It is not very common, I will admit.
- 7780. And you will admit that it is rarer still where conviction follows upon such complaint? I could not say because I cannot recollect any instance.
- 7781. *His Worship.*] I admit that it is a risky thing for a subordinate to do.
- 7782. *Mr. Bull.*] You cannot say the same, nor can the same thing be said of Quelch that can be said of some men on your division, I mean with regard to drunkenness. You do know that even some men who have given evidence in this investigation have been often charged and punished for drunkenness? Some of them.
- 7783. *His Worship.*] Some of them have admitted it themselves.

Senior-sergeant Joseph Bradwell was called and sworn:—

- 7784. *His Worship.*] What's your name? Joseph Bradwell.
- 7785. What are you? Senior-sergeant, stationed at Woolloomooloo.
- 7786. *Mr. Abigail.*] Do you know Senior-constable Quelch? Yes.
- 7787. Was he under your control or not, at Clifton, Illawarra? Yes.
- 7788. Was that in 1890, in the strike time? Yes, I believe it was.
- 7789. Was he under the influence of liquor whilst there? Yes.
- 7790. Was he badly so? Yes.
- 7791. May I say madly so? Yes.
- 7792. Was he, as a matter of fact, put in irons? Put under arrest.
- 7793. Did you order him to be placed under control? Yes.
- 7794. What sort of control was it? I ordered him to be taken to his quarters from the canteen at Clifton.
- 7795. *His Worship.*] Was he then in the Water Police? No.
- 7796. *Mr. Abigail.*] He was in the Police Force then under you? Certainly; he was there on special duty.
- 7797. *Mr. Bull.*] I suppose you have been drunk in your time—it is only pot calling kettle black? Yes.
- 7798. It is a happy thing to get drunk? It is a very good man that never does wrong; I am always careful.
- 7799. Were you drunk yourself at Clifton? No.
- 7800. What? No.
- 7801. Were not you charged with being drunk down there, and wanting to fight? No; I will swear I never was. I will swear that I never was charged with intoxication at Clifton under any circumstances.
- 7802. You were boss of the show there? I was not boss all the time there.
- 7803. Do you mean to say that you were not intoxicated during the time you were there? No.
- 7804. Were you not wanting to fight one of the sergeants of the artillery down there? No.
- 7805. Did nobody tell you you were so drunk that you wanted to do that? No.
- 7806. Do you remember your wife bringing a bottle of rum from Sydney? Yes.
- 7807. Did you break it? No.
- 7808. Did you drink it? No; Providence intervened in that case.
- 7809. And broke it? Yes. It was put on the table, and I was going to serve it out as far as it would go, and I went out for some water and the bottle collapsed on the table.
- 7810. *Mr. Abigail.*] You did not keep it seven years, then? No.
- 7811. *His Worship.*] Was Quelch reported for this drunkenness? He was.
- 7812. Was he punished? No.
- 7813. *Mr. Bull.*] Why? I do not know.
- 7814. Who reported him? I did.
- 7815. Whom to? Superintendent Ryland.
- 7816. Did you report him to Ryland? Yes.
- 7817. *Mr. Abigail.*] I will call for the papers.
- 7818. *Mr. Bull.*] You say you did report it? Yes.
- 7819. And nothing was done? Mr. Ryland came down from where he was stationed, at Bulli, and told me to tell Quelch to apply for a transfer to Sydney, and to make some excuse; anything would do, and Quelch did so, and he was sent on down to Sydney.
- 7820. You were all down there at the same time as the military? There were military there.
- 7821. I was there, too. Do you remember that I was prosecuting many of these men for intimidation? I think I do now; Mr. Levien was there.
- 7822. The times were rather exciting there? There was not much excitement at Clifton.
- 7823. Was it not at Clifton that a lot of the free-labourers had been met and beaten back to the South Clifton side? That was the case that you referred to where you were prosecuting.
- 7824. That was fairly exciting? It was not much.
- 7825. *His Worship.*] As a matter of fact, he was not punished for that alleged drunkenness? I believe not.
- 7826. *Mr. Bull.*] Do you say he was transferred to Sydney? Yes.
- 7827. Do you not know that he applied for special leave to see a child that was at that time ill? That was the application that he made, that one of the children was ill.

Senior-
sergeant
J. Bradwell.
16 Nov., 1897.

- Senior-sergeant J. Bradwell.
16 Nov., 1897.
7828. Will you say this, and do you not know it, did he not actually receive a telegram from the Department granting that leave, and was not that why he left Clifton and came to Sydney? I cannot say anything about a telegram. My instructions were to tell him to apply to them to go to Sydney.
7829. You were removed from Redfern? Yes.
7830. That was over Constable Guilfoyle? No.
7831. Were not you mixed up in a case with Constable Guilfoyle;—did not that bring about your removal? No.
7832. Are you sure of that? Yes; I can explain satisfactorily.
7833. You are a Mason, are you not?
7834. *Mr. Abigail.*] Is that fair; we have not asked "Are you a Roman Catholic, or a Protestant, or a Christadelphian"?"
7835. *Mr. Bull.*] Are you a Mason? I have been a Mason.
7836. Were there some complaints with regard to your going home, dressing in evening dress, and attending these Masonic banquets? No.
7837. Any such charge as that? No; I never attended any lodge meetings without I had the full concurrence of the officer-in-charge.
7838. How many times were you reduced for misconduct of any sort? I was reduced once for being the author of a poem.
7839. I see the report is "Circulating a scurrilous paper, of which he was believed to be the author, tending to bring Sergeant Dale into contempt, and to damage the discipline of the Force"?" I never heard that charge before.
7840. I may tell you that this is the defaulter's sheet, signed by Superintendent Read;—that is on the evidence of Constables Dillon, Sprowle, and Forsythe? I can recite the scurrilous poem now.
7841. You were reduced to the rank of first-class constable from a senior-constable? Yes. It was not for that I was reduced. I know what I was reduced for.
7842. *Mr. Abigail.*] There are some funny things — [Interrupted]? Any amount of them. I should like to explain now. There were more engineers in Redfern than Guilfoyle. He had nothing to do with it. There were more underground engineers than Guilfoyle. That is twenty-six years ago that occurred. I have been over thirty years in the Service, and am as open as a book.
7843. *Mr. Bull.*] As a fact, you were reprimanded even the year before last? Yes.
7844. Charged with being drunk on duty one night? Yes.
7845. And reprimanded for that? Yes. With reference to that charge, I went to several medical men in College-street, and I could not get any of them there; I went to the Hospital and was inspected by two medical men; and then I went to the police surgeon, and saw him at his residence, and could have easily have got out of that charge because the medical men were quite prepared to prove the contrary, and I thought the easiest way was the best, and I did not want to fight the police authorities, and I pleaded guilty.
7846. The charge was really made by Sub-inspector Robinson? I do not know.
7847. And three witnesses were called to prove this? I did not know of this. I could bring three medical men.
7848. *Mr. Abigail.*] I see the defaulter's sheet my friend has referred to. The first charge on it is:—"June 21st, 1868, neglect of duty"?" I do not recollect it. I have been up for a lot of things. I have never done anything to disgrace the Police Force, or disgrace myself and family. I am able to hold my head up in Sydney where a good many cannot.

Senior-constable Arthur Stocks Cook was called and sworn:—

- Senior-constable A. S. Cook.
16 Nov., 1897.
7849. *His Worship.*] What is your name? Arthur Stocks Cook.
7850. What are you? Senior-constable, and clerk to Inspector Lenthall.
7851. *Mr. Bull.*] You know Senior-constable Quelch? Yes.
7852. I understand that in 1890 you were down doing special duty in strike time at Bulli or Clifton? Yes.
7853. Was Quelch there at the same time? Yes.
7854. What was Quelch's conduct whilst he was down there on this special service? I know nothing against him. His conduct was all right, so far as I know.
7855. Did you at any time see him so drunk as to necessitate being put into irons? No, I did not.
7856. What work was Quelch doing down there? He was acting with me in the cook house; we were cooking for 150 men, and we used to be up in the morning at half-past 5 to get the men's breakfasts ready, and then again at 10 we used to have to get another breakfast, and then we used to prepare for the dinner, and then prepare for the tea.
7857. You were pretty hard worked? We were sometimes working until 10 o'clock at night.
7858. The other men who were supposed to be on duty had better times than that? They could sit about.
7859. Was Quelch ever intoxicated whilst he was working with you? No.
7860. Did you ever hear that Bradwell had reported him to Inspector Ryland for intoxication down there? No.
7861. Have you ever heard that until I suggested it to you? Yes, I have.
7862. When did you hear it? I heard it from Mr. Dacey.
7863. He spoke to you? He sent for me.
7864. Tell us the conversation which you had with Mr. Dacey? Mr. Dacey said he sent for me to ask me if I knew the general conduct of Quelch during the time that we were together in Clifton on strike duty, and if I had been ordered to put Quelch in irons by the sergeant-in-charge, and also to rope him up. I said no; I had received no such instructions. Nothing had been said to me about it.
7865. Nor did any such necessity arise? Not so far as I know.
7866. *His Worship.*] Was he drunk at all? No.
7867. *Mr. Bull.*] Do you remember some word coming down with regard to some sickness of one of his children? I heard from himself that his wife was suffering, and also one of the children, and not expected to live and heard that he had applied to Inspector Ryland to allow him to come back to Sydney on that account, and shortly after he came back he was promoted.
7868. Did you know that he was transferred or sent back because of intoxication down there? No; if that had been the case he would not have been promoted.
7869. He could not have been promoted? No; more likely have been dismissed. 7870.

7870. Was Mr. Ryland a man likely to overlook anything of the sort? No; very strict.
7871. Possibly the strictest man in the Force for twenty years? Yes.
7872. And in consequence of his work down there, and his efficiency, Quelch got promotion? I believe it was.
7873. *Mr. Abigail.*] You know Senior-sergeant Bradwell? Yes.
7874. Would you be surprised to hear that he says that he ordered him to be taken from the canteen for drunkenness? If he did it was not I that he ordered.
7875. I suppose he could have done that without you knowing anything about it? I should have heard it in the camp; these things are talked about amongst the men.
7876. Is it not likely that you would have been off duty? I was never off duty.
7877. You would not take the responsibility of saying that what Bradwell says is untrue? I do not think it is feasible.
7878. Would you say that Senior-sergeant Bradwell came here and said what was untrue? I say that he never told me to put the man in irons.
7879. If Senior-sergeant Bradwell says that Quelch was drunk—badly drunk and madly drunk—and that he ordered him to be removed and sent to his quarters, because he was so badly drunk, are you going to say that Senior-sergeant Bradwell is wrong? I could not say that. If he did, it would be on record in the Police Superintendent's Office.
7880. You have been on the carpet? Yes; so has every man in the Force.
7881. Recently? No; not this last ten years.
7882. Have you not recently—very recently—been taken in by Superintendent Read and spoken to about this very matter? No.
7883. You and Freeman? No. I was not on the carpet. I was simply sent for and asked if I had given any communication to the Commission regarding the conduct of Quelch. I said, "No." That was the first I heard of it.
7884. Were not you asked by Superintendent Read if you had given any information to Mr. Dacey? No; Mr. Dacey's name was not mentioned.
7885. It was "to the Commission"? Yes.
7886. You said, "No"? Yes.
7887. Were not you asked further, directly, was there any truth in this allegation against Quelch that whilst he was in the camp there he was under the influence of liquor, and had been reported by the senior-sergeant, and did not you say, "I cannot remember anything about it"? No. I said that, on one occasion, when he was disappointed at not getting permission to return to Sydney to see his wife and child, he was very excited. He was awfully excited. He is of a very excitable temperament.
7888. *Mr. Abigail.*] I think I must leave this. He has a charmed life. It is a mass of coincidences.
7889. Was he under the influence of drink? I do not think so. He was very excited over not going back to Sydney.
7890. He was not drinking? He was not drinking. He would take a glass, but he was not drinking to excess.
7891. But you say on this occasion he was very badly excited? Very much excited on this occasion about not being able to go to Sydney.
7892. Do you think that that was the occasion that Senior-sergeant Bradwell had him sent back to his quarters? I could not say.
7893. *His Worship.*] However, he was not punished? No.
7894. *Mr. Abigail.*] Did you hear that he had been told to send in an application for removal? No.
7895. Where an officer wants to be removed from one station to another it is necessary to urge some reason for it, is it not? If he had misconducted himself the Superintendent would show him why.
7896. Supposing there was a wish that that should be avoided? If he wished to be transferred he would apply and state his reasons.
7897. Supposing he was being charitably dealt with or looked after he could not expect to get a bare application for removal without reasons granted? He would not get it.
7898. But if he took advantage of what was known to be correct—namely, the illness at home—that would be a sufficient ground for removal? No, not under those circumstances.
7899. He had a telegram? I do not know anything about that. Someone came up and saw him on that occasion who informed him as to the state of his wife.
7900. *Mr. Bull.*] As a fact, did not he work with you the whole of the time that he was there? He did.
7901. From the day he went there until he left? Yes.
7902. I suppose grog was served out to you people there? There was a canteen, and each man was allowed a pint of beer for his dinner.
7903. And I suppose many of them took more than their allowance? They took what they paid for.
7904. And the officers who were fond of it took what they wanted? They took what they wanted.
7905. Was not Superintendent Ryland there almost daily? Not every day, but nearly daily.
7906. He scarcely missed two days during the whole time? No.
7907. As a matter of fact, you got down to the camp after Quelch—Quelch was there first in the kitchen? I think he was there two days before I got down.
7908. *His Worship.*] Was Sergeant Bradwell immediately in charge then under Ryland? Yes; and there were several others. Senior-sergeant Fowler was there.
7909. *Mr. Bull.*] Senior-sergeant Fowler came from Berrima, did he not? Yes.
7910. Did you people work all night and all day pretty well? Yes.
7911. There was not much work for the others until the police were called down to Kembla;—you remember that, do you not? Yes.

Charge No. 12.

"Misconduct in connection with the 'Salutation Hotel.'"

Mrs. Annie Brown was called and sworn:—

7912. *His Worship.*] What is your name? Annie Brown.
7913. What are you? Married woman.
7914. Living where? In Waterloo.
7915. In a hotel? In a private house.

Senior-
constable
A. S. Cook.
16 Nov., 1897.

Mrs.
A. Brown.
7916. 16 Nov., 1897.

- Mrs. A. Brown.
16 Nov., 1897.
7916. *Mr. Abigail.*] With regard to this witness I ask for all the latitude the conditions of this inquiry will allow me. *To witness:* Are you related to Mr. Quelch in any way? Well, I do not know whether you would call it a relation. I could not say myself.
7917. Are you related to Mrs. Quelch? Yes; by marriage.
7918. Do you remember July, 1895, something occurring in the "Salutation Hotel"? Yes; I do not know the day of the month.
7919. Do you remember being in the "Salutation Hotel" about 4 a.m.? I did not know it was that time; but in the morning. I was there and intended to stop there all the night. I was there all the evening.
7920. You had been there in the early part of the evening? Yes.
7921. You were a friend of the licensee? Yes, and he was a friend of mine.
7922. And you were on intimate relations—you knew each other intimately? Very.
7923. You remember Mr. Quelch coming into the hotel? I remembered the face, but I did not know it was Mr. Quelch.
7924. Do you remember a policeman, whom you now know to be Senior-constable Quelch, coming into the hotel about 4 o'clock in the morning? Three of them.
7925. And he was accompanied by two other constables? Yes.
7926. Do you know who the other constables were? I do not.
7927. What room of the hotel did they come into? Into a side room. I do not know which way they came in.
7928. Could that be seen from the footpath;—was it a room abutting on the footpath? Not in Botany-road.
7929. In Retreat-street? Yes; the bar parlour was in Retreat-street.
7930. I want you to describe what took place when the constables came in. Do not allow any notions of delicacy to deter you from telling His Worship what took place, and the position you were in. Were you standing up, sitting down, or lying down? I was going to lie down.
7931. You were going to remain? Yes.
7932. And the licensee was about to make a bed up for you? Yes.
7933. He had gone for the bed-clothes? No; he was there.
7934. With the bed-clothes? No. We were both in the room. It was raining.
7935. When the three constables came in? Yes.
7936. What did Quelch say to you? I do not think he spoke at all. He said, "Hullo, what's this?" That is all I remember.
7937. Anything else? He said, "Come along with me." Mr. Ryan looked at me and I looked at him.
7938. Then what was done? Nothing at all.
7939. Did you say anything? I did not. I cried bitterly, and Mr. Quelch said he was surprised at me.
7940. Anything else? I walked to the station.
7941. Did he charge you with anything? No.
7942. What became of the other two constables? We walked along Botany-road and he dismissed them at one of the cross streets.
7943. Did you go to the station? Yes.
7944. What did he do when he got to the police station? He told me to sit down on the corner of a form in the yard while he went into the office or stood at the door of the office at the Redfern Police Station.
7945. Did he talk to somebody there? I did not see anybody; I never raised my head.
7946. You were cut up about this? I was and am still.
7947. You were very much affected? I know I had no business to be there, but it appears that Mr. Quelch had no business to get into the place, but still I did not know.
7948. You went to the station and sat on the form as you described while he went into the police station? As I was told.
7949. What did he tell you after that or what did he do? He lives near where I live and he walked down the street with me.
7950. And did not make any charge against you? He never spoke to me until he called me by my name and said he was surprised at me.
7951. What did he call you? I do not know whether he called me "Mrs. Brown" or "Annie."
7952. He passed his place and went to your place? Left me at the entrance of where I live and said "good morning" to me, and I said "good morning" to him.
7953. I hope you will not think this is bitter but I am bound to put it. Did he make any overtures to you? No; no more than Mr. Ryan had promised to pour out a drink, some schnapps, and as we were walking along he said something about schnapps; but of course I had been drinking schnapps.
7954. Did he say this to you, "Now, I will let you go home if you will give me what you promised Ryan"? No.
7955. Did you never tell anybody that? No; I never did. I have been asked by one constable, I do not know his name.
7956. Did you ever tell anybody that Quelch said to you, "Give me what you promised Ryan and I will let you go"? No, sir. I think Mr. Quelch more a gentleman than to speak to me in such a manner.
7957. Have you changed your opinion of him? I never had any wrong opinion of him in my life.
7958. You spoke to him to-day? I saw the man when he was going out to Mr. Lawless. I said, "What do they want me for?" and he said, "About the hotel affair," and that was all that passed between us.
7959. And did not he tell you not to bother him? No, sir, he did not.
7960. Did not he tell you that he had no time to talk to you? No, sir, he did not.
7961. But he said he did. Will you not change your mind now? No. I just said to him, "What do they want me for?" and he said, "About that hotel," and that is all that passed between us.
7962. You knew all about it then, when he told you it was about the hotel affair? Certainly, after I got a summons; and this gentleman [*indicating Mr. Dacey*] has been to my house and he called upon me to see about Mr. Quelch, and he told me he would come again, and that I had been drinking whiskey.
7963. It was true, was it not? Yes, I had, in my own house.
7964. And Mr. Dacey refused to see you because you had been drinking whiskey, and said he would come again? No. He came again on Saturday. He came twice, and he served me with this summons.
7965. You asked him to come in? I was washing and I asked him in as a woman need not be afraid to do, if I did act wrongly when Mr. Quelch caught me. My husband was in the house.
7966. What was the wrong;—drinking a glass of schnapps? I decline to answer you. 7967.

Mrs.
A. Brown.
16 Nov., 1897.

7967. Whatever wrong you were doing Mr. Quelch took you home instead of making a complaint against you at the station? He did not take me home. He was going home, and I suppose, having respect for me, no doubt he was sorry, he told me to hurry up before the next lot of policemen got in.

7968. He did not make any charge against you or want to get you locked up? He never told me—no.

7969. Would you be surprised to hear that he actually tried to get a charge against you, and the sergeant-in-charge would not take it? I do not know.

7970. And that then he took you home merely to find out your address? He knows me quite well, and he knows all belonging to me and where I live. He knows I belong to a respectable family.

7971. When he came out of the hotel he said, "Come along with me"? I do not know. I was as innocent as I could be.

7972. Did you not think that Quelch had you in charge—that you were in custody? Well, I suppose my own wickedness would make me think so.

7973. Do you not think it is a peculiar thing that, when he took the trouble to take you all the way to the police station——? It is not very far.

7974. That he should let you go without charging you with anything? I do not know. I do not understand the law or how things would be. I did not know whether Mr. Ryan would get a summons, because I was innocent.

7975. Innocent of what? I do not know.

7976. Had you been guilty of any wickedness? I decline to answer. I have known Mr. Ryan for years.

7977. You saw Sergeant Vane about coming here on your summons? Never spoke to him, sir.

7978. Did not you ask him? Never spoke to him.

7979. Did not you ask him whether Mr. Dacey could compel you to come here and give evidence? Never. I have never breathed it to a soul but my own heart, and nobody knows it but my God above me.

7980. Did not Sergeant Vane tell you that you could snap your fingers at Mr. Dacey and that you need not come? Never did. Ask the gentleman yourself. He lives in my neighbourhood.

7981. Have you spoken to him since you were served with the summons? No, sir, I have not.

7982. Did you ever tell anybody you did? No; I have not.

7983. That you need not come here for all the Daceys in the world? I did not know this gentleman's name [*indicating Mr. Dacey*]. I did ask him if he was a reporter for the *Truth*. He had plenty to say.

7984. *Mr. Bull.*] Perhaps my friend will say what the misconduct that he complains of against Quelch is.

7985. *Mr. Abigail.*] The misconduct is this:—My charge under instructions was that, without rhyme or reason, he got over the fence of this hotel, got through the back way into the hotel simply because he saw this lady with Mr. Ryan in the dining-room near a sofa: that he took this woman up then to the station and that he endeavoured to lay a charge against her, leaving her outside on a form.

7986. *His Worship.*] A charge of what? I do not know. The officer-in-charge refused to take a charge, and he then said, "I will take her home just to see where she lives."

Witness: That is false. Mr. Quelch knows all belonging to me. I live in George-street. He knows that I am a respectable woman.

7987. *Mr. Abigail.*] We say first that he had no right to break and enter this hotel; and we further say that this woman was falsely arrested, and wrongly arrested, by him, and then we want to draw certain inferences.

7988. *His Worship.*] It is for her to complain if she was wrongly arrested.

7989. *Mr. Abigail.*] We can complain too.

7990. *Mr. Bull.*] Will your Worship kindly look at this entry in this book [*Exhibit No. 35*] "At 5:30 a.m. Senior-constable Quelch brought to the station a woman named Ann Brown, of Pitt-street, Waterloo, found in the parlour of the "Salutation Hotel," where she had been detained by the licensee for an immoral purpose. The back of the hotel was open, and a light outside of the front door burning all night. Senior-constable entered with Constables Edward and Castle and found the licensee having connection with the woman in the parlour.—S. C. Quelch. 30/7/95 (page 82, rough book). Attended to. Constable Jackson for inquiry and report. This woman is married and living with her husband at above address."

Witness: Mr. Quelch acted as a gentleman. He told me I ought to have known better. That is over two years ago.

7991. *Mr. Bull.*] Certain things were reported to Quelch by one of the officers. Quelch, with that officer and another, went to the hotel, found the back gate open, and saw the whole place lit up—in fact, the licensee was so amorous that he had forgotten all about his lights.

Witness: Yes he did.

7992. *Mr. Bull.*] And the three policemen on entering made certain observations. The woman, there is not the slightest doubt, was taken out of the place for her own personal protection.

7993. *Mr. Abigail.*] I am submitting this that even if he saw the licensee in the position described he had no right to enter the hotel.

7994. *Mr. Bull.*] Was not the gravamen of this charge that not only did Quelch prevent this woman doing something, but that on the way back he made improper overtures to her. Quelch has never had any conversation with this woman about it? [*Witness*]: He never has. As far as I know my husband knows nothing about it.

7995. *Mr. Abigail.*] Your husband knows all about it? He would kill me dead if he did.

7996. It is because this woman has talked about these things in her cups, that it has got to other people's ears, and is reported to me, and I get my instructions the way I do. But, apart from that, we are not charging him with surprising these two in some act of wickedness, but we say that, even if he saw this, he had no right to force an entry into this hotel.

7997. *His Worship.*] It is for the licensee to complain. The book there shows that the hotel was open.

7998. *Mr. Bull.*] You heard a question put to you by Mr. Abigail; I ask you to think seriously over this, and say whether there is an atom of foundation for any such thing; he asked you whether, on the way from the hotel to the lock-up, Quelch had said to you, "Now, I will let you go if you will give me what you promised Ryan"? No, sir. I swear it solemnly; so help my God.

7999. Did he take you into the lock-up at all? No, sir.

8000. Did not he ask you to sit down on a seat in the yard? Yes, sir.

8001. Did not he ask you to wait there until the relief, and then he would see you down as far as your place? No, sir. He told me to hurry up the street; to walk quicker to get away before we met those men.

- Mrs. A. Brown.
16 Nov., 1897.
8002. Had you any idea in your mind except this—that what Quelch was doing he was doing in your own protection? I did not know what to think. I did not know what I was going to be done with.
8003. Is it a fact that the place was lit up? Yes.
8004. In fact, Ryan had forgotten about the lights? Yes. I made an attempt to come out, and it was raining, about 1 o'clock, and I saw a fair policeman, and I went in and said, "Jim, you have not put out your lights, and it is raining; I will not go. I must have a shake-down, and get away early in the morning."
8005. You had been drinking there? Yes, sir, I had. It is more to my shame to say so.
8006. Have you been upbraided by your husband for any allegation of misconduct on that night until now? No, sir; he would not live with me again.
8007. Is it not a fact that so far as you know at present your husband has no knowledge of your misconduct? No, sir.

Constable G. H. Edwards was recalled:—

- Constable G. H. Edwards.
16 Nov., 1897.
8008. *Mr. Abigail.*] Out of compassion for this unfortunate who is bound to be affected if this is printed, I will be willing to have this expunged from the records if Mr. Bull can show me officially that Quelch had a right to be there, and a right to be legged up over the fence at the back of the hotel.
8009. *Mr. Bull.*] We can only explain our conduct by evidence. I will show that there was no such thing as being legged up, and that the place was open and they walked in.
8010. *Mr. Abigail* (to witness.)] You were in company with Senior-constable Quelch and Constable Castles on the night of July, 1895, at the "Salutation Hotel"? Yes.
8011. About what time? I think it was about 4:30 in the morning.
8012. Were you on duty? Yes.
8013. It was part of your beat? Yes.
8014. Where did you meet Quelch? I met him outside this hotel.
8015. Then he was outside when you came up? No. I was standing there, and he walked down the road.
8016. Where did you meet Castles? Castles came down after we were together.
8017. Now, what was done when Quelch got down there? I drew Quelch's attention to the fact that there was something going on inside, and that there were evidently drinks being served. I had heard the clinking of glasses and so on, and on two or three occasions Mrs. Brown was trying to come out, and when she saw me she went back. I also heard groans inside the hotel.
8018. Sighs? Something I thought to be groans, and sounded like groans, and the lamp outside was alight, and the light in the bar was alight and we discovered that a part of the window was broken, and the Venetian blinds were also broken, and we went and looked through it, but we did not see anything, but we heard groans again, or some sounds representing groans; and Quelch said to me, "You had better give me a leg over the fence. I will see what it is." I went to the lane there and gave Quelch a leg up, and he got over, and Castles came down while we were at the window, and he remarked something to the effect that there was something cronk there, and he had been watching as well.
8019. Did you tell Quelch it was Mrs. Brown? No; I did not know who it was.
8020. Did he see her? Yes, inside.
8021. Before he got a leg over? No.
8022. When you legged him over the fence, how did you get in? He undid the side gate.
8023. And you got in that way? Yes.
8024. You and Castles went through to the back? Yes.
8025. And got in through the kitchen? The back door was open.
8026. That is the kitchen door? Yes.
8027. You walked right through to the bar parlour? Yes; and when I got there I struck a match according to instructions from Quelch, and upon striking the match the licensee was in the act of buttoning his trousers up, and the woman was on the sofa with her clothes partly down as if they were pulled up in a hurry.
8028. You went in under instructions from your superior officer? Yes.
8029. Simply because you thought there was drinking there? I did not know what there was.
8030. Did not you go in for that reason? Partly.
8031. You know that none of you were authorised to go in there, do you not? We did not know what the matter was inside. The man—the publican—was a widower, I believe.
8032. You had seen him and the woman there, and you had seen some act of indecency;—did you not say so? Apparently. It was suspicious.
8033. You saw sufficient to make you believe that there was about to be an act of indecency? Yes.
8034. *His Worship.*] Was it a public part of the hotel? It was the parlour.
8035. *Mr. Abigail.*] The parlour down Retreat-street? Yes.
8036. But before you legged Quelch over you told him that a woman was there? Yes. I did not say "Mrs. Brown."
8037. And with the licensee? I do not know whether I said "with the licensee."
8038. Or publican;—you told him that there was something suspicious going on there in the shape of indecency? No; I do not think I did.
8039. Did not you say, "There is something going on in here"? Yes, I did.
8040. What did you mean by that? I heard the clinking of glasses and some noises representing groaning.
8041. You did not connect the groaning and clinking of glasses with drinking in prohibited hours? They were both at different times.
8042. Why did not you knock at the front door or knock at the bar-parlour door? I did not know that it was necessary to do that.
8043. Would not that have been an easier way of getting in? Yes.
8044. Would it not have been the best possible way of attracting the attention of those inside, knocking at the very door of the room in which they were? Yes; but that would put them on their guard, and we would not have seen anything if we had done that.
8045. When you got inside what was done? Quelch said something to the publican to the effect that it would be reported to Mr. Lawless, and I believe it was entered in the book. He took the woman, to the best

- best of my belief, and Castles and I walked a part of the way up with him, but when we got to Raglan-street we hung back because we were a bit too soon to go up. We went towards George-street.
8046. What did he do then? He went up to the station.
8047. Was that the shortest way to the station? Yes.
8048. Would that be past Mrs. Brown's house? Towards Mrs. Brown's house.
8049. Did you see him go into the station? I think he took us off that morning.
8050. Did you know whether any charge had been laid against this woman? There was no charge laid; I know for a fact, because I was going to lay hold of the woman, but he said, "Don't lay hold of the woman, because there is no charge against her."
8051. She went with him? Yes; they walked along together.
8052. Did you two constables walk along the same way, behind them or with them? With them as far as Raglan-street.
8053. There was no doubt the woman was in custody? No; she was not in custody.
8054. Why should she be taken to the station? I do not know whether she was or not. It is only what I hear.
8055. If she were taken to the station and a complaint entered up in the rough book, or a report made, would not you assume that she was in custody? No, I would not. There are complaints laid in books up there, but no one is in custody at the same time.
8056. If she was not in custody or under arrest, why should she be taken to the police station? I do not know that she was.
8057. Assuming that she was taken there, why should she be taken there if not in custody? I do not know.
8058. *Mr. Bull.*] I suppose there was quite enough indication to you on the outside of that place to lead you to suppose that it was certainly not closed to business? Well, I heard glasses going in the bar.
8059. Did you not hear more than that? I heard bottles popping, and so on.
8060. How long had you been near the house? I had been there on two or three different occasions when I had been round on my beat.
8061. Each time did you hear the noise of glasses? Yes.
8062. Did you hear corks pop, as if drawn from bottles? On one or two occasions.
8063. Did you hear people talking inside—a man's voice and a woman's voice? Yes; but I could not make out what they were saying.
8064. And when Quelch came down, he really came down on his business and duty as a senior-constable to you on the beat? Yes.
8065. And then you reported what you had seen? Yes.
8066. Do you remember that Castles was there? Yes.
8067. Do you remember his saying in your presence and Quelch's that he had also been watching the house? Yes.
8068. Do you remember his describing what he had seen and heard? I do not remember that.
8069. Saying that he had heard noises in the house, and the lamps were kept alight all night? Yes.
8070. Did these groans indicate anything to you—that a person was in some distress or trouble? I would not say they were groans. They were like groans.
8071. Did you want to find out the meaning of them? If I heard anyone in the road groaning like that, I should certainly go and see what was the matter with them.
8072. Did you tell anybody that Quelch had made improper overtures to this woman? No; I did not.
8073. Did you tell anybody that as he walked along the road he asked her to let him have what she had already promised Ryan? No.
8074. You have not made a statement of the circumstances to anybody, have you? No.
8075. *Mr. Abigail.*] Before you gave Quelch a leg up over the back gate, did not you suspect that an act of immorality was being committed? No.
8076. Did Quelch, from what he had seen? No; I do not think so.
8077. *His Worship.*] I presume you thought that drinking was going on in the hotel—that the law was being disobeyed in that hotel? Yes.
8078. *Mr. Bull.*] And something else, because if he had heard the same groans in the street anywhere, it would have been his first business to go and see what caused them.

Constable
G. H.
Edwards.
16 Nov., 1897.

Constable Nicholas Moore was recalled:—

8079. *Mr. Abigail.*] You were the officer-in-charge of the station in July, 1895? Yes; I was on reserve duty.
8080. On the 30th July? Yes.
8081. Did Quelch bring Mrs. Brown to the station in the early hours of the morning? Between 4 and 5, Senior-Constable Quelch brought the woman to the station.
8082. Just tell us what he said? He stated that in passing the "Salutation Hotel" he saw a light, and that, on looking through the window, he saw this woman, and the publican with the woman having connection with her. He said he turned her out, and he said he had brought her up to the station. I suggested that there was no charge against the woman for it, and he told her to sit outside, and he dictated that entry in the book.
8083. *Mr. Abigail.*] I will put this in. Page 82 of the rough occurrence book. [*Exhibit No. 35.*]
Witness: In the ordinary way I should have called the sergeant, but there was no charge.
8084. *Mr. Abigail.*] Was it said that the senior-constable thought that they were drinking within prohibited hours? No; he said the place was lighted up, and he said he caught them in the act of having connection.
8085. The report says nothing about any suspicious circumstances—about drinking—does it? No; he did not say anything about drinking. This entry of mine is from his dictation.
8086. Did he really wish to lay a charge against this woman? No. He brought her to the station. Under the fact of him bringing her to the station I surmised that there might be some charge, and I drew his attention to the fact that there was nothing that the police could interfere with, so far as charging the woman, and he sat her down and told me, "I will see her home."
8087. Did he tell you he knew her? I could not say that.
8088. And then he left with her? Yes; he left with her.

Constable
N. Moore.
16 Nov., 1897.

- Constable N. Moore.
16 Nov., 1897.
8089. Did she ever make any complaint do you know about this? From hearsay, not directly.
8090. There was a good deal of talk in the neighbourhood about it? No; I heard it from the men in the station; one man in particular spoke to me.
8091. *Mr. Bull.*] Who was that? Constable Christison, on the next night when I was on duty, came to me and told me that she had made a complaint, and asked me was it a fact that this woman was brought up to the station. He said that he was on the beat and that she had complained.
8092. *His Worship.*] To him? To him.
8093. The woman had? Yes; the woman had to him.
8094. Did the constable say that a complaint was made at the time by her? Constable Christison said that the woman complained to him that Constable Quelch had made an improper proposal to her at her house, and asked me if it was a fact that she was brought to the station.
8095. That was afterwards? That was not the following day, but the day afterwards—almost twenty-four hours. I am off twenty-four hours. I might state that I have never mentioned this matter to Constable Christison since that date.
8096. Did you speak to Quelch about it? No. There was a considerable amount of talk in the police station. They were laughing at it, because it was an unusual entry. It is really not police duty in my opinion and in that of every one who read the report. The plain-clothes men were laughing about it. Of course, I did not take the blame in the matter. I may have said something to them at the time, that is all.
8097. *Mr. Bull.*] I suppose it would be a fair comment for the information of the Licensing Bench when the publican came for the renewal of his license. Would it not be necessary to have some report of that to verify the statement made by the police officer? There is a book for that purpose.
8098. Would it not be necessary? Certainly; I think so.
8099. In view of the fact that it is indisputable that the house was lit up as if during ordinary business hours, that there were corks being drawn, that glasses were jingling as if drinks were being served, and male and female voices were heard in the place, would not that indicate, at any rate to an officer who was doing public-house duty, that the house was being kept open for some purpose? Of course, I did not know about the popping of corks.
8100. You did not know that Edwards had made a complaint to Quelch before Quelch's entry into the place in this case? I did not.
8101. That would alter the position? It would not alter the position in bringing the woman to the station.
8102. Would it not be a necessary police duty to find out whether—the man being an unmarried man, that is, a widower; a woman being in the house who had come to the door on several occasions in the police officer's presence to get out, and had gone back again—would not that excite some suspicion in the minds of the police officers? I should certainly have put it in my book.
8103. And hearing groans of tribulation or some distress or something else? I do not know anything about that.
8104. Hearing all these things, I suppose you will concede at once it would be necessary for the policeman to do something? As the case was brought to me, there was nothing I could do. Senior-constable Quelch had the right to call the sergeant, and I did not see the necessity to call the sergeant up when there was nothing in the case.
8105. This woman was not brought to the lock-up? Yes.
8106. She was put in the yard? She was not arrested—not put in the lock-up. She was brought to the station.
8107. And you saw her sit down upon a seat in the yard? When I made the entry he ordered her to sit in the yard.
8108. And he said in your presence that he would see the woman home? He did.
8109. Up till that time that woman made no complaint of any immoral proposition by Quelch? I never saw the woman from that day to this.
8110. Up to that time she did not make a complaint? No.
8111. Did you notice whether she was sober or under the influence of liquor? She was sober.
8112. She told us she had been drinking schnapps pretty well all night? She was sober. Had she been drunk I would have called the senior-constable's attention to it.
8113. As the woman's residence was known, if she had been drunk, as a matter of kindness, she would have been taken home? I believe, had she been drunk, she would have remained there.
8114. All this is necessary as a matter of observation in an application by the publican afterwards? All this would be recorded.
8115. *Mr. Abigail.*] But in the observation book? Yes.
8116. Not in this rough book? It may be. Anything and sundry goes in this rough book.
8117. Anything extraordinary like this, and only appertaining to publican's licenses, would be put in the observation book? All these things are first of all put in the rough book, and then they are drafted out into the Inspector's books.
8118. And this has never been drafted out? I do not know.
8119. *His Worship.*] Is the same publican keeping that house? No.
8120. *Mr. Bull.*] I am told it was not copied out because this man left very shortly after this occurrence. He sold out of the hotel. I suppose he did not care to face the music.

First-class Constable William John Castles was called and sworn:—

- First-class Constable W. J. Castles.
16 Nov., 1897.
8121. *His Worship.*] What is your name? William John Castles.
8122. What are you? First-class constable, stationed at No. 3, Darlington.
8123. *Mr. Abigail.*] You were stationed at Redfern in 1895? I was doing temporary duty there in 1895.
8124. Do you remember the morning of the 30th July, 1895? I do not.
8125. Did you go to the "Salutation Hotel" and meet Quelch and Edwards there one morning? Yes; I was coming on my beat. I saw Senior-constable Quelch and Edwards.
8126. What was done;—did you have your attention called to anything? I think it was the time before. I was looking through the window myself. I saw the publican feeling a woman about through the window. I went away, and next time I came back—that is, I suppose, it would be the next round—it might be after 3 o'clock, I went to have a look through the same window again, and Senior-constable Quelch and Constable Edwards were at the back gate.
- 8127.

First-class
Constable
W. J. Castles.
16 Nov., 1897.

8127. Did you tell them what you had seen? I think we all saw it.
8128. Did you tell them that you had seen it on the previous occasion? Yes; I think I did.
8129. Then what took place? It is a long time ago.
8130. Did you get inside? Yes, we went inside.
8131. How;—did Edwards leg Quelch over, and then did he open the back gate? They were inside the gate when I came.
8132. Did you all go inside? I went inside and looked through the window inside.
8133. Did you all look through the window inside? Yes.
8134. You could see nothing there? Yes; the indecent behaviour.
8135. When you went through the gate into the back yard you got round to the window of the same room? I think Senior-Constable Quelch went down and came through the bar, and we waited at the door, and we went into this parlour and saw a woman lying down on a couch and the publican standing over her.
8136. What did Quelch say? He told the publican it was very bad conduct, being the licensee of the hotel, and something about it would go against him at his license over it.
8137. Is that all? And then I think he told the woman to go out. The woman went out with Senior-Constable Quelch.
8138. Did he say, "Go out," or "You will have to come along with me"? I do not know.
8139. Did she go with him? Yes.
8140. Where to? Up towards the police station.
8141. Did you assume they were going to the police station? No, sir, I did not.
8142. You would not have gone into that hotel, seeing what you saw? Not by myself.
8143. Nor if you had a constable under your command then? It is hard to say.
8144. You know it is not your duty to go and enter into my house or anybody else's house, or licensed premises even if you saw anything like that? I would not venture by myself.
8145. You would not venture in company with anybody else, as a policeman, would you? If I had a non-commissioned officer with me I would go in.
8146. Do you not know it is not within the province of a constable to enter a house? Circumstances alter cases.
8147. *His Worship.*] Did what you saw lead you to suppose that the law was being broken by persons drinking in the house after hours? I did not hear any drinking going on, but the place was lit up. There was no light in the bar, but the room where this woman was lying on the couch was alight; in fact, he was feeling her.
8148. Did you think the house was open for the sale of liquor? No.
8149. Did you believe this supposed disorderly conduct was being carried on? There was no noise, but you could see through the window how this man and woman were behaving.
8150. *Mr. Abigail.*] You and the others went in there simply to tell the publican that you had seen this act of indecency? I never went in.
8151. That was what Quelch went in for? I would suppose so.
8152. You had not seen any breach of the Licensing Act? No.
8153. Or anything to suggest a breach of it, had you? No.
8154. Neither seen nor heard of it? No.
8155. You did not hear any popping of corks, did you? No.
8156. Or clinking of glasses? No. There was no drinking at all going on.
8157. *His Worship.*] Did you hear popping of corks? No.
8158. You came up last? Yes.
8159. *Mr. Bull.*] Quelch and Edwards were there when you came up? Yes; they were at the gateway.
8160. *Mr. Abigail.*] You refused to give Mr. Dacey a statement? I did.
8161. Did you give Quelch a statement? I never spoke to Quelch.
8162. But you gave it to Mr. Bull? Never, sir.
8163. He informs me that he got a statement of yours. Will you swear that you have not dictated, or by any other means, supplied or furnished to Mr. Bull, or somebody for either Quelch or Mr. Bull, a statement of your evidence? I will swear it. I never spoke to Senior-constable Quelch or Mr. Bull on this case; and Mr. Dacey asked me for a statement and I said, "No; if you want a statement of me, put it through the proper channel."
8164. And you have not spoken to anybody else? No.
8165. Do you know that Constable Edwards has? I do not know what the constable has done.
8166. *Mr. Bull.*] As a fact, Edwards was there with Quelch when you came up? When I came up, I was looking through the window, and Senior-constable Quelch said, "Sh, sh! hold your noise." The two were then at the gate.
8167. Do you know that at the time Edwards came up there was a light in the bar? I could not say.
8168. If there had been a light in the bar when Edwards came up, it was put out when you got there? It was put out when I got there.
8169. What portion of the place was lit up? In the back parlour in Retreat-street.
8170. Had you been doing duty in the immediate vicinity of that house at any time before you saw Quelch during the same night? Yes.
8171. You were not with Edwards? No. I may have spoken to him.
8172. So if Edwards says he saw and heard certain things, you were not there at that time? No; I was there at 1 o'clock, and then afterwards.
8173. *Mr. Abigail.*] Was the place lit up at 1 o'clock? No.
8174. And it was not lit up in the bar when you came in? There was only the light in the back parlour; that was all the light I saw. By standing on the window-sill you could look in and see this man and woman.
8175. You had actually to stand on the window-sill? You might not know whether it was not a burglar in the house.
8176. *Mr. Bull.*] Did you hear any groaning? No.
8177. *His Worship.*] In view of Moore's evidence, I think Constable Christison should be called.

[At 6 p.m. the Commission was adjourned until 2 p.m. next day.]

WEDNESDAY,

WEDNESDAY, 17 NOVEMBER, 1897.

[The Commission resumed its sittings at 2 p.m., at the Central Police Court.]

Present:—

WHITTINGDALE JOHNSON, Esq., S.M. (SOLE COMMISSIONER).

J. R. Dacey, Esq., M.L.A. ; Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared in support of the charges on behalf of Mr. J. R. Dacey, M.L.A. ;
Mr. C. Bull, M.L.A., solicitor, appeared to defend Senior-constable Quelch.

Charge No. 12—continued.

Constable J. Christison was recalled:—

- Constable J. Christison.
17 Nov., 1897.
8178. *Mr. Abigail.*] Just take your recollection back to July, 1895? I would not be positive of the date.
8179. Did you receive a complaint from a Mrs. Brown? Well, I do not know that it was a complaint, but it was a conversation.
8180. Did you have a conversation? I had.
8181. Just tell His Worship what it was? I had heard something previous to this, and I know this woman, have known her for years, and I met her one day in Raglan-street, Waterloo. So she said, "I suppose you heard all about it," and I said, "What do you refer to." "Oh!" she said, "You know the other morning when I was taken out of the public-house."
8182. *Mr. Bull.*] Of course I have objected already to any conversation said to have been had behind Quelch's back, but I understand that Your Worship is desirous that this witness should be called.
8183. *His Worship.*] I do not see how I can object to this being taken.
8184. *Mr. Abigail.*] This is an inquiry, not an ordinary Court.
8185. *His Worship.*] I will take it for what it is worth.
8186. *Mr. Abigail.*] *To witness:* Go on? From that I knew what she meant, because I had heard something before that. She then proceeded to tell me how Constable Quelch had taken her out of Mr. Ryan's public house down at the toll-bar, and brought her up to the station; she said she did not know for what. She said she had done no wrong. She had simply slept there for the night, and she said, "On the way coming to the station he made indecent proposals to me." Those are the words she used, or words similar to them.
8187. *His Worship.*] Something to that effect? Something to that effect. That was the most of the conversation between her and me, but afterwards I asked Constable Moore if such was the case. I did not know that it was the case.
8188. *Mr. Bull.*] This I do object to.
8189. *Mr. Abigail.*] You cannot, for the same reason. This is an inquiry.
8190. *His Worship.*] Constable Moore only knows that he went with the woman to the station. *To witness:* There was no information given you as to what Quelch said? No. Only that he made indecent proposals. I afterwards asked Moore if that was correct that this woman had been brought to the station that morning.
8191. *Mr. Abigail.*] You did not speak to Quelch about it? I did not. In fact, I was not on Senior-constable Quelch's relief at all.
8192. Was this occurrence the subject of considerable remark at the station? Well, it was, amongst the men.
8193. *Mr. Bull.*] I object.
8194. *Mr. Abigail.*] Could it have failed to have reached the ears of Senior-constable Quelch? Well, I could not say. Of course I never mentioned it to him.
8195. Do you think it would have been probable that he would have heard it? I think so.
8196. Did he speak to you about it? He did not.
8197. *His Worship.*] You never mentioned it to him, and he never spoke to you? No.
8198. I do not think this throws much light on the matter.
8199. *Mr. Bull.*] I object to it.
8200. *Mr. Abigail.*] If you put any more of these absurd objections to me I will walk out. *To His Worship:* I only called this man in deference to what your Worship said, and further, to show that the epithet urged against me yesterday, that I was cruel, was not justified, because your Worship can see I have had to go on instructions which went to show that this woman had actually made a complaint. Of course, now, for the poor unfortunate woman's own sake, she cannot call in question her own chastity. She can only come in here and deny it.
8201. *His Worship.*] It only goes to show the woman is a liar both ways.
8202. *Mr. Bull.*] Did this woman, in conversation with you, say that Ryan had criminal intercourse with her? She did not; in fact, I never asked the question.
8203. Are you a married man? I am.
8204. You were not inquisitive enough to go so far as that? Not on that occasion.
8205. Nor on any other? No.
8206. You know Constable Moore? I do.
8207. Were you in conversation with him last night? I was; in fact, that was the first intimation I had that I had to come down here.
8208. Did Moore tell you that she had actually admitted here that she had misconducted herself with Ryan in the hotel? He did not.
8209. What did he tell you? He told me that I would be required down to-day on this case of Mrs. Brown's.
8210. Did you ever tell Quelch that this woman, drunk or sober, had made an accusation that he had made improper overtures to her? I did not.
8211. Did you make any official or other report in writing of any such statement made by the woman? I did not.
8212. And when was this? Well, about a couple of years ago or over.
8213. A couple of what? A couple of years or over.
8214. Is that your recollection? I do not remember the occurrence exactly. 8215.

8215. Was the woman drunk or sober at the time that she made this revelation? She appeared to be sober. Constable J. Christison.
8216. *His Worship.*] Did you tell her her proper place to make a complaint was at the police station? Well, your Worship, it was hardly a complaint—it was only a matter of conversation that she told me this; but I made it my business to ask Constable Moore if ever such a thing had occurred, as I had heard something of it, you know. 17 Nov., 1897.
8217. Of course he knew nothing? He told me that Senior-constable Quelch had brought her up there.
8218. *Mr. Bull.*] A funny thing for an officer to do who had made an improper overture to a woman, to bring her straight to the lock-up, where she might tell something.
8219. *Mr. Abigail.*] But it is not a peculiar thing for the woman to attempt to hide her peccadillo.
8220. *His Worship.*] Now you are lapsing into deductions—I have to deal with those.

Constable Edmund Hill was recalled:—

8221. *Mr. Abigail.*] You know Mrs. Annie Brown? Yes; I have known her for some years. Constable E. Hill.
8222. Did she have a conversation with you in July, 1895, or lately? Lately, yes.
8223. With reference to Senior-constable Quelch? Yes. 17 Nov., 1897.
8224. And the "Salutation Hotel"? Yes.
8225. Tell His Worship what the conversation was. I do not know what it is your Worship? This woman has lived near me for some years, and has frequently spoken about this affair.
8226. *His Worship.*] Spoken about what? About the "Salutation Hotel" trouble, and amongst other things she told me that when Senior-constable Quelch took her home from the police station after taking her up there from the hotel she said he said, "Now, you ought to let me have what you were going to let Mr. Ryan have."
8227. Then did she deny to you that she had had any connection with Ryan? I never asked her about that.
8228. *Mr. Bull.*] That would not interest this officer.
- Witness:* I told her I considered it a very cowardly thing for him to do to take her up to the police station when he had no charge. I might mention that for about seven years we have been neighbours, within a few doors.
8229. *Mr. Bull.*] You have never made such an overture to her? No; and I have never been charged with anything of the kind since I have been a married man.
8230. And you know that Quelch has not either up till now? I do not know anything about it.
8231. You are a happy lot up at Redfern, a beautiful lot.
8232. *Mr. Abigail.*] I have got an expression of opinion now from my friend which justifies my diatribe.
8233. *Mr. Bull.*] Did Mr. Dacey see you last night? Not last night.
8234. Monday night? I am not quite certain. I saw him to-day.
8235. What a wonderful recollection you have. Tell us how long ago this conversation took place. How long do you say it is since Mrs. Brown imparted this solemn accusation? She did not seem to think it was very solemn. She was laughing about it.
8236. How long ago? Just about two months ago. I was talking to Mrs. Brown last night.
8237. I have no doubt if you have an opportunity you will talk to her every night. When was it that Mr. Dacey was speaking to you this week? To-day.
8238. At 10 o'clock on Monday night did you see Mr. Dacey? Yes; either Monday or Tuesday.
8239. Which was it;—don't you see how glib you are as to a matter of conversation of months ago; you spit it out as if it came naturally from your stomach? I see Mr. Dacey almost every day.
8240. I ask you whether you saw him on Monday night? I saw him on Tuesday night as I was coming to the station.
8241. Was Tuesday night last night? It has gone out of my head what to-day is.
8242. *His Worship.*] Did you mention this to Quelch or anybody else? What.
8243. What the woman had said? It has been common talk amongst all the men at the station about this.
8244. How long? For a long time past.
8245. On account of what the woman said? Yes; I heard long ago that she complained the night after to Constable Christison. It was spoken about at the time, and has been commonly spoken about.
8246. *Mr. Bull.*] You say that she said that Quelch made an improper overture to her? When she got to her gate.
8247. You never took the trouble to ascertain whether her husband was in the house at the time? I do not know, but I believe she mentioned it.
8248. Her mother also? No.
8249. Do you think it a probable circumstance that a constable taking a woman home to her house would make that overture? It is hard to say what some men would do.
8250. You mean it is hard to say what Quelch would do;—that is what you mean? Yes.
8251. And that, of course, shows your disinterestedness in this proceeding? I consider I have some interest in this—I have my word at stake. He denies what I say.
8252. *His Worship.*] Had you heard at that time that she had had connection with Ryan? Yes.
8253. *Mr. Bull.*] Who told you that? The first time I had actual proof of it Senior-constable Dukes was in the station, and someone remarked one day, and was laughing over the book, and he said "Look at that," and showed me the entry in the book.
8254. *Mr. Abigail.*] There are some jocular remarks in the book there.
8255. *Mr. Bull.*] "Attended to by Jackson."
8256. *Mr. Abigail.*] That is a joke at Jackson's expense.
8257. *Mr. Bull.*] "Attended to. Constable Jackson for inquiry and report. This woman is married and living with her husband at above address." *To witness:* How many times might you have had a conversation with this woman? A great number of times—we have been neighbours for seven years.
8258. You never knew she had lent herself to Ryan on this night? I believed she had. I had no proof. I know she drinks.
8259. Is that the opinion that you have of the woman—that she is a woman who lends herself? I do not know that it is fair for me to answer that.
8260. You said you believed she had lent herself to Ryan that night; and then I choose to ask another question? Your Worship, I ask whether I am obliged to answer that. I am sorry I said what I did before. 8261.

- Constable E. Hill.
17 Nov., 1897.
8261. Very well, I will take it that way;—do you happen to know that the woman absolutely swore yesterday, in answer to my friend, that she had never told a soul, nor was it a fact that Quelch had ever made an improper overture to her? Yes, I was told so.
8262. Were you not told also that she admitted yesterday that she had, as a fact, had improper intercourse with Ryan on that same morning? I was not told that she had admitted it yesterday. I was told she admitted it before yesterday.
8263. But not that she had sworn here distinctly yesterday? No.
8264. Are you surprised to know that she said here yesterday, on oath, that neither her husband nor anybody belonging to her had ever got from her an admission of such misconduct on her part; and that even yesterday the woman broke down in her anxiety lest it might be carried out of this place;—do you know that? No.
8265. Then do not be the first to go and tell Brown? I am not likely to.
His Worship: I am afraid he will find out somehow or other.
8266. *Mr. Bull.*] Are not these things matters of conversation with you every half hour in the barracks? No doubt.
8267. *Mr. Abigail.*] Is there any justification in my friend's insinuation that you require an admonition from him not to go and tell Brown? I have never been accused of a cowardly act in my life, and it would be most cowardly to do that.
8268. Is he justified in the insinuation that you would, in all probability, be one of the first to tell Mr. Brown? No.
8269. *Mr. Bull.*] Do you know, as a fact, that this woman is related to Quelch? Yes; she told me so herself.
8270. *Mr. Abigail.*] Do you know that a messenger was sent from Senior-constable Quelch's house this morning to Mrs. Brown? I was told so.
- 8271.] *His Worship.*] Do you know it of your own knowledge? No. I was told he was round there this morning; somebody called at my house this morning and told me.

Senior-constable William Edward Quelch was recalled:—

- Senior-constable W. E. Quelch.
17 Nov., 1897.
8272. *Mr. Bull.*] You know the "Salutation Inn"? I do, well.
8273. And you remember that it was kept by a man named Ryan? I do.
8274. And that he was keeping it in July, 1895? Yes; July 30th, he was the licensee of that hotel.
8275. Do you remember being outside the hotel on the morning of the 30th with Constables Edwards and Castles? It was my duty, as senior-constable on that section, to visit the constable on the outlying district at half-past 4—that was Edwards.
8276. And, on that morning, did you meet Edwards in the vicinity of this hotel? I went down to the Waterloo Terminus, and met him at the corner of Retreat-street and Botany-road.
8277. Did he make some report to you? When I got to the hotel I found the lamp outside was alight and a glimmer of light in the bar. Constable Edwards said, "Each time through the night since 11 o'clock, senior, that I have come here I have heard voices and the jingling of glasses and the popping of corks, as if trade was being done." I said, "In what direction did you hear the noise?" He said, pointing to it, "That parlour there." That would be the public parlour in Retreat-street. I went to the parlour window where the constable directed me. I found that the upper portion of the glass of the lower sash, the upper corner, was broken and the cordage of the venetian-blinds was broken and the venetians hanging down. I looked through the particular space which the constable had looked through, in the direction of the parlour, which was in total darkness. I could see nothing. At the same time I listened. I heard groaning sounds. I said to the constable, "There is someone groaning inside." I said, "Have you seen anybody about the hotel lately?" "Well," he said, "I did see a woman making to come out of the hotel, but when she saw me she went back again." I think he said, "once or twice," that he had seen her. I said, "The licensee is a widower, of this hotel." I said, "What can the groaning sound be?" We listened, and still we heard the groaning sound and could see no form of any person. Seeing that the observations were brought under notice by the subordinate officer, and in case the licensee should be in any critical condition wanting assistance, I decided that I would go into the hotel and see what was wrong. At that time Constable Castle came up, which made two subordinate officers present. Constable Castle said, "I have been watching this hotel, senior, each time I have come down," and I think his actual words were, "I think there is something cronk here." I said, "Yes; I have just decided to see what it is in case any assistance is wanted." With the assistance of Edwards I got over the fence and opened the gate, and the two constables walked in through the gate. The doors at the back, all the back premises of the hotel were open. We walked through the hotel, through the bar, and when we got to the parlour door Constable Edwards struck a match. Then the licensee was just in the act of getting from the female, buttoning up his trousers. The female was lying on a couch, or something, in the back, with her clothes partly up, and I said to the licensee, "What's this, Mr. Ryan?" and he did not make any answer, and looked at the woman and the woman looked at the man, the licensee. I said, "Who is this person you have here?" I did not recognise her at the time. He said—the words, I think, were, "A friend of mine." I said, "Does she belong here?" and she said "No"; and I said, "She had better be getting home, then." The female left the hotel then, and we afterwards went out of the hotel. The licensee, I believe, then put the lights out.
8278. Was there a light in the bar at that time? The light was alight in the bar, but turned down; but in the parlour there was no light. It was total darkness; you could not see anything.
8279. Where he and the woman were? Where he and the woman were. We all left the hotel. I told the licensee that I should make a report of the circumstances, and that I should bring it under the notice of Inspector Lawless, as it was a serious complaint, he being the licensee of the hotel and using his public house for that purpose. I walked alongside the woman. I asked her to come to the station, and she said she would. I then recognised who it was. I went up to the station. I asked her to sit down on the form in the yard in the police station while I went inside and got the entry made in the book. I then said, "I will see you down as far as you live." I saw her down to Phillip-street, to the back entrance where you go into her house. There is a back entrance turns off Phillip-street. As soon as she got there she went in. Her mother was residing there and her brothers.
8280. And her husband? And her husband.

8281.

8281. You recognised her after you came out of the hotel as Mrs. Brown? I recognised her after I came out of the hotel as Mrs. Brown. Although I knew the person referred to I have never had any conversation with her with reference to anything. She thanked me as she was going away for being so kind to her, and told me that she had wanted to get out of the hotel before, but the licensee would not let her go. I mentioned the fact to my inspector, and he told me to keep it in my memory for the annual Licensing Court. Shortly after that the licensee transferred his license.

Senior-
constable
W. E. Quelch.
17 Nov., 1897.

8282. And he has ceased to be the licensee of the hotel for some time? Yes.

8283. Is he, to your knowledge, holding a license anywhere now? No; from that to this until yesterday, when I went to the Superintendent's office, I had never opened my lips to utter one solid word to that woman from that day until she got up from the seat as I was passing her, and asked me what she was called for. I told her I believed she was called over some hotel case, and by Mr. Dacey, and that is all.

8284. On your way from the hotel to the lock-up, or on your way from the lock-up down seeing her home, was any improper overture made use of by you? Not a syllable.

8285. Was any such thing in your mind? Not a syllable; especially such a person as that.

8286. You would realise that she was lending herself to the hotel-keeper? Most decidedly.

8287. There is no doubt about that? She admitted it to me.

8288. And the police information enabled you to know that she had been there some hours? Yes; she frankly admitted and told me she ought to be ashamed of herself, especially when she found out it was I.

8289. Is there an atom of truth in that statement, made by anybody, that on the way down to the lock-up, or on the way to her home, you said this to her, "Now, I want you to give me what you promised Ryan";—did any such word leave your lips? No; not a word of it. It was broad daylight. At 5:30 a.m. my entry was made. The thoroughfares were full of people. It was broad daylight.

8290. *His Worship.*] That would not prevent your speaking to her? No.

8291. *Mr. Bull.*] "Now let me have what you promised Ryan," meaning that he was there and then to bustle her in the street;—was any such thing on your mind? No such thing ever happened.

8292. Have you ever shown any amorous disposition to this woman? Never in my life. By marriage I have been brought into connection with the family, but I have never had a word to say to the woman, and other relations I have nothing to do with, and to this day they never visit my place, and I never go to their place.

8293. And now you say that after conversation with those two officers, you decided to enter? I did; I know what the result would be if it had been found in the morning that the publican was dead or seriously ill, and it had been brought under my notice. I naturally thought it might have been the licensee, seeing it was an unusual thing for the lamp to be left alight all night, and the light in the bar alight, and to hear the groaning noise; I naturally fancied that the licensee might have been ill and wanted assistance.

8294. Did you anticipate finding him having intercourse with anybody? Not in the slightest. Never dreamt of such a thing.

8295. And there is no doubt that the light which was exhibited inside to enable you to see what was going on was a match struck by Edwards? That is all.

8296. You heard him called yesterday? Yes.

8297. You heard him swear that he struck a match? Yes.

8298. Who was in the office when you made that entry? Constable Moore.

8299. Did Moore give you any advice as to what you were to do, or what was to be done, or as to any charge which you either insinuated or intended to make against this woman? It is not likely I would take any advice from him.

8300. Did he give you any advice? Not in the least.

8301. *His Worship.*] Why did you take her round by the police station;—was that the shortest route? No. She lives up in Pitt-street, and going up to the station you would have to turn to the right and go up to Pitt-street, and, seeing that I had gone so far, I asked her to go to the station while I made an entry to show that I had done my duty to the extreme, because the two constables followed me all the way, and it was rather early for them to work up to the station, and they said, "We had better hang behind, senior." I said, "Yes, I will take her up and get the entry made, and then I will see her home safely."

8302. *Mr. Bull.*] You heard Edwards say yesterday that they found it was rather early to go on, and that they hung back, letting you go on to the station with the woman? Yes.

8303. Did you ever hear those conversations which Hill has spoken about; and has anybody chaffed you in the station, for instance? I have never heard a word there with reference to that until it came from the lips of Constables Christison and Hill.

8304. When? To-day.

8305. You have not been present, at any rate, when this jocularly went on in the station? Never heard a word of it. I have not been present when that went on in the station.

8306. And whether it was a mere matter of jocularly and joking between Hill and his comrades, you have not been present? Not at all. They must have minutely searched the books to have given this information in all these instances. They could not get it from anybody but those in the station, and they must have secretly done it too, and there is never a man but would admit it, unless Mr. Dacey got outside with Rontgen rays and the books.

8307. *Mr. Abigail.*] I give your Worship my assurance that neither Mr. Dacey nor myself knew that that entry was in that book at all until yesterday. I did not call for it; your Worship remembers that Mr. Bull got it out, and I looked at it then and showed it to Mr. Dacey for the first time.

8308. *Mr. Bull.*] There is nobody accusing you of anything, but it is an absolute certainty that before these charges had been made that information had been got from that station by somebody, and from that book, and that is one of the things that Mr. Lawless thought fit to complain of.

Witness: It could not have been got from anybody else than the book. There were only so many officers interested.

8309. *Mr. Abigail.*] Why, if you did not arrest this woman, and if your own common sense told you that you had no charge upon which you could arrest her, why did you take her out of the ordinary way, past her own street up to the station, and keep her there until you had made the entry in the book, and then take her home, passing your own house to do it? I did that as other police officers have done thousands of times.

Senior-
constable
W. E. Quelch.
17 Nov., 1897.

8310. Did you do it as an act of charity? What charity was there in it? It was duty, not charity.
8311. Then it was your duty to take the woman all the way to the station, keep her waiting until you had made your entry in the book, and then take her home? Yes, my duty.
8312. How was it your duty? It was my duty as a public officer to take her to the station to show that I was frank in my duty.
8313. Why did you say at the hotel, "You will have to come along with me"? She had to come that way up to her home.
8314. You know what that means when a police officer in his regimentals says it;—you know what that phrase conveys to the ordinary mind—"You are under my arrest; you are in custody"? No. There is nothing in it. I think, on this occasion, I would not be positive, but I said to Constable Edwards, who was going to put his hands on her, I said, "Don't you put your hands on that woman, Edwards."
8315. Will you tell me this: What induced you to go into the hotel;—you see you have given us three different reasons; you say there was a glimmer of light in the bar, although Castles says there was none? Yes.
8316. You say there was a jingling of glasses, although Castles and Edwards were silent on that.
8317. *Mr. Bull.*] I object to my friend saying this. There is no such evidence by Edwards. He swears point blank there was.
8318. *His Worship.*] Quelch acted upon information given to him by the other constables? Yes.
8319. *Mr. Abigail.*] You did not hear the jingling of glasses yourself? No.
8320. Why did you go to this particular spot, you said, "I looked through this particular place"—that was where there was a peculiar corner of the glass, which was broken, and a peculiar corner of the blind, which was broken;—why did you look through there, as it was dark, and you could not see? I did not say I looked through the peculiar corner. I said I looked through the upper portion of the lower sash, which was broken, and the webbing of the Venetian blind was broken. You could look through. You could see that the bar was lit up, but in a dim light, and that the parlour was in total darkness.
8321. You have said you looked through, and the place was in total darkness? Yes.
8322. What attracted your attention to this particular place, where the corner of the glass and the corner of the blind were both broken? Because the light from the bar was showing through that.
8323. The light from the bar shone through the room sufficiently to enable you to detect this spy-hole, and take advantage of it;—did it not show sufficient light through that to show what was going on? Not in the least.
8324. Would you be surprised if Edwards said he saw what was going on? I will swear that when Constable Edwards brought it under my notice the room was in total darkness; the bar was partly lit up—that is, that the gas was alight, but turned down; and that it was impossible to see with the ray of light then in the bar into this parlour whatsoever. When we got into the hotel we could not see until Constable Edwards struck a match.
8325. Which of the three reasons you have given was the actual reason which induced you to go into the hotel;—was it the suspicion that there was a breach of the Licensing Act being committed? No.
8326. Was it the suspicion that an act of indecency was being committed? There was no suspicion of any act of indecency on my part from start to finish.
8327. You swear that Edwards did not tell you? I never knew of any act of indecency until I got inside.
8328. Will you swear that Edwards did not tell you before you got into the hotel that an act of indecency was being committed? He never told me before we got into the hotel.
8329. Did you hear the groans that Edwards detected? I heard groans—that I heard myself.
8330. Groans on such an occasion are rather peculiar, are they not? I do not know; I am only telling you the facts.
8331. You will admit the peculiarity here that Edwards says they were groans and you say they were groans? It was a groaning sound as if some person was in trouble.
8332. You will admit, will you not, that if you had actually thought that business was being done in prohibited hours there, you yourself would have no power under the Licensing Act to have made an entrance into the hotel? I say myself if there had been an act of the law being broken then and the hotel was lighted up, I would not have entered.
8333. Can I now take it that you mean that you would have had no power to have done it? I would have had no power.
8334. Therefore, you having done it, are you not driven to the extremity of justifying that entry by saying that you heard groans? No.
8335. And is it not a fact that Edwards is sufficiently friendly to you and interested in this inquiry to corroborate you on the point of groans? There is the constable's evidence. He is not interested at all, or friendly. I will explain it.
8336. You are not here to explain, but to answer my questions? I decline to answer any more questions for you until I explain it.
8337. *Mr. Bull.*] Quite right too. Let him explain it.
8338. *His Worship.*] Let him explain it.
8339. *Mr. Abigail.*] Ever since my friend has been cross-examining my witnesses he has deliberately stopped them explaining. He has said, "Mr. Abigail will get it out."
8340. *Mr. Bull.*] That is an absolute untruth. I have always said "Very well. Explain it."
8341. *Mr. Abigail* (to witness).] What is your explanation? Constable Edwards has done his duty and he has told the truth. He reported certain facts to me, and it was my duty as his superior officer when it was again brought under my notice by another subordinate to do as I did.
8342. When Castles said to you, "I think, senior, there is something cronk here," did not you know that he meant to infer that a breach of the Act was being committed? No.
8343. Was not that your opinion? No; you could hear nothing with reference to glasses or anything at that time.
8344. When you went in did you see the woman? Not till Constable Edwards struck a match.
8345. Then you saw her? Yes.
8346. Then you had the place lighted up while you had a conversation? No.
8347. Did you go into the bar to see this peculiar glimmer? We had to pass through the bar to get to this parlour.
8348. Was there any light in the bar then? Yes.

Senior-
constable
W. E. Quelch.
17 Nov., 1897.

8349. Much of a light? Only a glimmer.
8350. When you went into the hotel did not you see the woman's face? No.
8351. Well, did you strike a light? No.
8352. Was there only one match struck? That is all.
8353. And yet, if you could not see the woman's face, you could see it was a woman lying down, with a part of her body exposed and her clothes up, and you could see the man in the act of getting away from the woman, to use your own choice language? After the match was struck.
8354. After the match was struck did not you see the woman's face? No.
8355. Although by the light of the match you could see all you have alleged you did see? The woman made every attempt to conceal her face.
8356. Did the other constables come into the room too? Yes.
8357. Did you hear Castles say that he and Edwards waited outside while you went in first and struck a match? No; we all went in together. I would not have gone in by myself.
8358. Can you give me an instance in your police experience where you have done anything similar to what you have alleged you did with this woman as a matter of duty? Yes.
8359. Did you ever take a woman to the station and then go home with her, passing your own house? I can give you an instance where I took a lad into the station.
8360. I mean a woman—a "female."
8361. *Mr. Bull.*] Give the instance you were going to.
8362. *Mr. Abigail.*] A "female"? I may have taken many.
8363. Can you remember one? I cannot. I can remember an instance, six months ago, where I took a lad into the station, an entry was made, I took him home to his house, and subsequently a prosecution took place, and the man was fined £3 over that same entry.
8364. You see at once the difference between male and female in a case like this? It is a difference you want to make.
8365. Do you not see the difference in the application of my question with regard to a female and a male, if not you must be dense? Yes, of course; and so would you be if you did not see it too.
8366. Do you say that you never heard any of the rumours about the station about the "Salutation Hotel"? Never a word.
8367. And that you did not know that this matter was the subject of comment and chat and talk and gossip in the station? Never a word.
8368. Dukes is a friend of yours? Yes.
8369. A personal friend? He is a friend.
8370. You are frequently with him? No.
8371. You were at that time? No, never.
8372. At any rate, you would see him every day? No; I might not see him perhaps for a week.
8373. Do you mean to say he never spoke to you about it? Never; he is like myself.
8374. What is that, one of the favoured ones? No.
8375. What is he? One of the unfortunates; one of *Truth's* criminals. They have just gone through Dukes, and they are going through me now.
8376. They will find you harder than Dukes? With the assistance, perhaps, of Mr. Abigail.
8377. Do you mean to say that Moore is telling an untruth, when he says that you asked what charge you could put against this woman? I deliberately say he is telling a wilful untruth.
8378. A wilful lie? Yes. His own common sense would tell him that. If I had a charge against the woman, would not I take her straight away into the lock-up?
8379. Would not you put her into the dock at the station? Yes.
8380. Would not you do that first, before you put her in the lock-up? Yes.
8381. Tell me this: You say that Edwards is not interested; did not he actually write out a statement for you, and give it to you;—did not he write it out in pencil? It is a fact.
8382. When did he give it to you? Some time ago.
8383. How long ago? I suppose it may have been the first week this Commission started.
8384. And it might have been earlier? No; it was not.
8385. It was after he was summoned to attend here as a witness? Yes.
8386. You will admit this, that, all through, contrasting this case with the others, you do seem to be the victim of a cloud of suspicion? Eh?
8387. And that you wish to penetrate the gloom by swearing that all the incriminating witnesses against you are liars and perjurers? I do not admit to any suspicion at all.
8388. That is the character of your defence? That is what I have relied on (*tapping Duty Book*), my duty. Look at every book you like to look at.
8389. Did you go down to Mrs. Brown's house recently? I went down this morning at about 9 o'clock to warn her to be here to attend this Commission to-day.
8390. Did you see her? I did not. She was not at home.
8391. Was she sent for yesterday from your house? I am sure I could not say.
8392. I am sorry to have to ask you this, but you force me to it;—do not you know that your wife sent a lad down to Mrs. Brown's yesterday morning? What my wife did was not my business.
8393. Do you not know it;—be candid for once? I did hear from the same lad I left the message with this morning, and if you speak to that lad he will tell you the words that I said. When that message was sent down, Mr. Abigail, I was down here in this Court getting my papers right, and I knew nothing about it until I went home.
8394. You knew it then? What was the good of it then.
8395. Why did not you, when I asked you just now—why did not you, if you are the truthful man you want his Worship to believe—say, "Yes, Mr. Abigail, I did know immediately I went home"? There is nothing to be afraid of. I have never approached a witness. I have never told a witness not to have anything to say to me half a dozen times, like Mr. Dacey has.
8396. It would have been much better for you if you had answered me that question;—if you knew there was nothing in it, why did not you answer it straight out? I did not know it until after I had gone home from the adjournment here last night.
8397. *His Worship.*] That was the question asked you? Of course, I knew it. I will tell you every word of what I said this morning; but you know very well there was nothing in what I said this morning.

Inspector Edmund Lawless was recalled:—

- Inspector E. Lawless.
17 Nov., 1897.
8398. *Mr. Bull.*] You know the "Salutation Inn"? Yes.
8399. Do you remember when it was kept by Ryan? I cannot remember the exact dates, but I know there was a man Ryan there. It has been transferred a great number of times.
8400. When first did you know as a fact that an entrance had been made to the hotel by Quelch and other officers, and some misconduct of the licensee brought under their attention? I never knew anything about it until this inquiry took place.
8401. You are about the police station at Redfern pretty frequently in the course of your duties, are you not? Yes.
8402. Have you heard any chit chat, or conversation, or any jest or joking, attributing an accusation to Quelch of having asked some woman who was in the hotel that night whether he might have improper intercourse with her? Never.
8403. Has the matter come under your observation in any sense or way? Never.
8404. Suppose that this happened: Suppose that a subordinate officer reported to you (a senior-constable), that for some time, some hours, before his report to you he had seen the bar of the hotel lit up, and had heard noises of glasses, the jingling of glasses, and the popping of corks, and groans inside the licensed premises; and suppose that, whilst reporting that to you (a senior-constable), another subordinate officer came up and endorsed the statements then being made to you by the first subordinate, what would you do? I should have directed him to go down immediately and see what they could get.
8405. Would it not be the senior-constable's duty, when that was reported to him by his subordinates, to ascertain, if he could, what the noise was, or what the circumstances that they reported to him were? Certainly; I should think so.
8406. Have you heard that certain things were seen by the three police officers who were in the hotel, and that a woman was taken as far as the lock-up by Quelch, where certain entries were made in the occurrence book, and then that the woman was taken to her home by Quelch? I have, subsequently to this Commission.
8407. Can you see anything savouring of misconduct on the part of Quelch, as a police officer, in doing that? No.
8408. *Mr. Abigail.*] Would it be equally your duty, as a senior-constable, assuming that all those things you have been asked about were facts, to take the woman from the hotel and bring her up to the station, and endeavour to make a charge against her, and finding that no charge could be laid against her, to take her away to her home? I should think it would be very improper for a senior-constable to endeavour to make any charge.
8409. I am asking you this, assuming that all Mr. Bull says were facts, and adding to these circumstances this, that then the senior-constable took the woman from the hotel up to the station, endeavoured to lay a charge against her, the officer-in-charge not taking any, would it be equally his duty, as senior-constable, to take the woman home? Certainly not, unless she asked him.
8410. Did I understand you to say this: "I never heard anything about this matter until this Commission"? That is so.
8411. Now, is it a fact that Quelch reported this to you at the time? No; I do not remember anything about it.
8412. Is it a fact that you told him to make a note of it, and to keep it for the Licensing Court? Not that I remember.
8413. *Mr. Bull.*] But would it be natural for Quelch, finding the public-house lit up, it being reported to him by his subordinates that the jingling of glasses was heard, and other noises indicating trade, to mention that matter to you? He might, and he might also make a record in the book.
8414. And I suppose it would be just as natural for you to say, "Well, make a note of that, so as to raise the question at renewal time"? Certainly. There is a book kept for that purpose, although I do not remember the incident.
8415. How many men have you in the Division who make reports to you from time to time? There are forty-seven.
8416. You would be cleverer than my friend wants to give you credit for if you could remember all the things reported to you by the whole of the men in your charge? I remember certain important facts.
8417. *Mr. Abigail.*] Do you remember it when I say that Quelch said here that he did do so? I do not remember it. He may have done so. I have no recollection of it.
8418. *Mr. Bull.*] Can you say from any knowledge you have whether this book in which this entry is was the only book in use for entering anything in the shape of occurrences at the time;—do you not know this: That an observation book has been formulated since the observations by the Sydney Magistracy? Yes; that would be the only book in use at that time with the exception of the book for publicans.
8419. *His Worship.*] Are you aware of the circumstances under which this woman was found at the hotel? I have been since this inquiry.
8420. Are you aware now? Yes, I am.
8421. Would you think it any breach of duty on part of the senior-constable, knowing the person who was found in that way at that hour of the morning, in seeing her safely to her home? I should not.
8422. It seems a very humane thing to me.

Charge No. 13.

"Misconduct in connection with one Crosby."

Louis Crosby, driver, was called and sworn:—

- L. Crosby.
17 Nov., 1897.
8423. *His Worship.*] What is your name? Louis Crosby.
8424. What are you? Driver.
8425. Where do you live? 67 Pitt-street, Redfern.
8426. *Mr. Abigail.*] Do you remember about April last? Yes.
8427. You and Miss Kerrigan were working at Kahla's drapery shop? Yes.
8428. Did you and several other people—Mr. Fraser, Miss Crosby, and Miss Rosina Crosby—leave the shop at a few minutes past 11 p.m. one night in April? Yes.
- 8429.

8429. What date? I think it was April or May. I think it was the first Saturday in May. I would not swear. It would be the last Saturday in April or the first Saturday in May. L. Crosby.
8430. You all proceeded to your house—your father's residence—did you not? In front of it; in the vicinity. 17 Nov., 1897
8431. You and Miss Kerrigan then left the others, opposite your house? Yes.
8432. Where did you go to;—you turned into Redfern-street, and then went through the Redfern Park into Elizabeth-street, Redfern? Yes.
8433. And then you had to go along Elizabeth-street to the back of Mount Carmel? Yes, opposite Mount Carmel.
8434. And then you went up the steps opposite the church? Yes.
8435. Is that near Miss Kerrigan's house? Yes.
8436. And then you went through the gate, near the second flight of steps, leading to the church door? Yes.
8437. Then you went along inside the fence towards Pitt-street, Waterloo—there is another gate there? At the foot of the hill there is a gate.
8438. That is in Pitt-street? Yes, at the corner of Pitt-street.
8439. Then you left the park by that gate, did you not? Yes.
8440. Before leaving the park, did you sit down on a seat close to Pitt-street? Yes.
8441. How far were you from the footpath? The first seat from the gate.
8442. How far would that be;—would it be as far as from you to Mr. Bull? Further than that.
8443. How much further? It might have been a chain.
8444. About the width of an ordinary road? Yes.
8445. What sort of a night was it? Dark night.
8446. What time do you think it was? A quarter past 11.
8447. Did you sit there for some little while? Yes.
8448. What did you do then? I suppose I sat there for about—it might have been near ten minutes, and then went to leave.
8449. Got up to leave? Yes.
8450. Did you move towards the gate? Yes.
8451. You were in the act of going out of the gate with the young lady when you heard something;—what was it that attracted your attention? The sound of the constable running.
8452. Somebody running? Yes.
8453. Did you look and see who it was? Yes; I turned round.
8454. What did you see? Constable Quelch caught hold of the girl.
8455. You saw Constable Quelch catch hold of the girl? Yes.
8456. Whereabouts? By the arm.
8457. What did he say? He asked me if I was finished.
8458. What did you say? "Quite."
8459. Did you realise the insinuation in his remark, "Have you finished"? I did not understand it.
8460. You got on your dignity then, and quietly and shortly said, "Quite"? Yes.
8461. What did he say then? He ordered me out of the park. He told me to get about my business and leave the park.
8462. And was the constable still holding the girl? Yes; still holding her wrist.
8463. And did he tell you to get about your business, but still hold the young lady? Yes.
8464. You naturally resented that? I did not go. The constable caught hold of her again and held her tight.
8465. By both wrists? Yes. He first asked my name.
8466. What took place then—what did he say to you; you say the constable caught the young lady by the two wrists and told you to go and you refused;—what did he say to the young lady when he caught her by the two wrists? To come along with him.
8467. What did Miss Kerrigan say? She sang out to me.
8468. What did she say? "Oh, Mr. Crosby."
8469. Did she seem to be in great distress? Yes.
8470. You caught hold of Quelch then by the shoulders, did you not? Yes.
8471. What did you say to him? To let her go.
8472. Something happened then, did it not? A whistle blew.
8473. What did Quelch do immediately the whistle was blown? He did not do anything. He let her go, and I got hold of her by the shoulder.
8474. And when the whistle blew what did he do? We went to go outside the gate.
8475. Did he let you alone? He still stopped with us.
8476. And let you walk off? I said we would go, and we walked out of the gate together.
8477. Did he follow you out of the park? Yes; the three of us walked out together.
8478. Coming through the gate, did he let go Miss Kerrigan's hand? Yes.
8479. Up to that time he had hold of her hand? He let go when we started to walk out.
8480. Did he ask you to give him Miss Kerrigan's name and address? Yes.
8481. But you refused? Yes.
8482. Was that in the park? Yes.
8483. While he was holding her by the wrists? Yes.
8484. When you reached her street, did Quelch say anything to you? He told me to go about my business again.
8485. What did you do? I said I would stop there with her.
8486. You knew you had done no wrong and you were on your dignity? Yes.
8487. In fact, you resented this police interference? I did.
8488. Then did you cross the road, cross over Pitt-street? To John-street.
8489. Did he follow you? He was still with us.
8490. As we say, trying to provoke him to make some breach of the peace to give cause for arrest. *To witness*: You stood at the corner of Pitt and John streets? Yes.
8491. Did he stand too? Yes.
8492. And did Miss Kerrigan then have a conversation with you in his presence? Yes. She asked me to go home and she would go by herself.

- L. Crosby. 8493. She was terribly upset? Yes.
- 17 Nov., 1897. 8494. And why did she ask you to let her go home by herself; from what you saw there, why did she ask you to let her go home alone? She used to stop me every time I went to say anything. She was frightened.
8495. Did she say you had better go because she was afraid that Quelch might lock you up? Not then.
8496. Did she afterwards? Yes.
8497. How far is it from the corner of John-street to Pitt-street, to Mrs. Kerrigan's door, the mother of the girl? About a chain.
8498. Then did Miss Kerrigan walk from this corner to her mother's house alone? Yes, with Senior-constable Quelch behind.
8499. Did he follow her? Yes.
8500. And you stayed at the corner? I stayed at the corner.
8501. Did you object to Quelch walking with her? Yes; he followed her.
8502. Did you make any objection? Yes.
8503. What did you say? I told him he was not to walk with her.
8504. Instead of that did he persist in following her? He said, "I will see where she lives."
8505. Then did Miss Kerrigan go inside her house? No; she stayed at the gate.
8506. Got inside the gate and stopped there? I could not swear whether she was inside or not from where I was.
8507. You stayed watching? Yes.
8508. Did you see Quelch do anything to her when she got to her own gate? No.
8509. You could not see that far? No.
8510. But you were there until Quelch came back to you? No. I stayed there about ten minutes.
8511. Was he still talking to Miss Kerrigan? Yes.
8512. Then you left? Yes.
8513. Now, do you remember the following Monday night? Yes.
8514. Did you, in consequence of something which Miss Kerrigan had told you had taken place between Quelch and herself on Saturday night, did you leave with her and go somewhere? I caught up to her on the Monday night.
8515. Where did you meet her? Just about on John Hunter's corner.
8516. Then you caught up to her there at the corner of Pitt-street and John-street? No, of Regent and Redfern streets.
8517. What time was that? About five past 9.
8518. What state was Miss Kerrigan in? She was crying.
8519. Did she tell you something? Yes.
8520. Did she tell you why she was crying? Yes.
8521. Why? She was afraid to go home because Constable Quelch had made an appointment to meet her at Parry's Mills corner at 10 o'clock.
8522. Did you see her home? Yes.
8523. Then did you return to Parry's Mills? Yes.
8524. Did you see a constable there? Yes.
8525. Did he see you? No, I do not think he saw me, because as I passed he walked away.
8526. Did you go across? Yes.
8527. What time was that? About a quarter to 10, I daresay.
8528. As you went towards him, did he walk across the street again? Yes.
8529. You suspected it to be Quelch? Yes.
8530. And you went up to see? Yes.
8531. Did you walk up in front of him? Yes.
8532. Did you stop him? Yes.
8533. Was it Quelch? No.
8534. Who was it? Robinson.
8535. Did you say anything to Robinson? Yes.
8536. *Mr. Bull.*] I object.
8537. *Mr. Abigail.*] When you caught up to him, then you found out it was not Quelch? Yes.
8538. And you said something to him? Yes.
8539. Did you tell him that you would like to tell him something? No.
8540. What did you say to him? I asked him was he as good a man as he was on Saturday night.
8541. What did you do that for? I wanted an explanation from him.
8542. You did not know at that time it was Quelch? It was not Quelch.
8543. But at that time you did not know who the constable was who had stopped you on the first occasion? No; I did not know him.
8544. What was said then? He asked me what I was talking about, and I asked him if he had forgotten his actions on the Saturday night in the park. He asked me, "What actions." I asked him whether he had forgotten what he had done in the park, and he told me then I was talking to the wrong man.
8545. Did you also tell him that you would like to tell him something, but you were afraid? No; he told me he would like to tell me something, but he was afraid.
8546. Did you ask him who the constable was who was on duty there on Saturday night? No; he told me.
8547. Who did he say it was? Constable Quelch.
8548. Robinson told you it was Senior-constable Quelch who was on duty at the park on Saturday night? Yes.
8549. Did he also say not to let on that he told you? Yes.
8550. *His Worship.*] We cannot have the conversation.
8551. *Mr. Abigail.*] What did you do after that—do not tell us the conversation—what did you do after that;—did you ask him whether it was he that had blown the whistle on the previous Saturday night? No; he told me that.
8552. What did he say?
8553. *Mr. Bull.*] I object to this.
8554. *His Worship.*] We cannot have the conversation. Call Constable Robinson if you want to, and then he will state the facts.
- 8555.

8555. *Mr. Abigail.*] What time was it that the whistle blew? About twenty or twenty-five past 11.
8556. *Mr. Abigail (to Mr. Quelch).*] If you will tell me that there is no entry of this occurrence, I will not ask any questions.
8557. *Senior-constable Quelch.*] There is no entry of this in the rough occurrence book, or anything appertaining to it.
8558. *Mr. Abigail (to witness).*] Were you doing anything in that park to justify any police interference at all? No.
8559. Were you misconducting yourself in any way at all, in the slightest? No; not in the slightest.
8560. You made this pretty public; you were not afraid of it? Yes; published it in the paper.
8561. As a matter of fact, you went to the *Truth* office and reported it? Yes; I did not go to the office, I met Mr. Norton in the street.
8562. And you gave him all the details? Yes.
8563. And you had so little to lose by the publication that you stimulated it? Yes.
8564. *His Worship.*] Was there an article in the newspaper about it? Yes.
8565. What paper? *Truth*, and also a letter in the *Police Times*—a report about it in the *Police Times*.
8566. *Mr. Abigail.*] How did it get there? It was sent there.
8567. Who sent it in? A friend of mine.
8568. From your dictation? I gave the account.
8569. *Mr. Bull.*] When was that? I suppose it may have been a week after it happened.
8570. *Mr. Abigail.*] And before it appeared in *Truth*? Long before it appeared in *Truth*.
8571. Before it appeared in *Truth* you got a friend of yours to make a report of it from your dictation? Yes.
8572. That appeared in the *Police Gazette*? It went to the office, and I was seen about it.
8573. Did it appear? It went to the Superintendent.
8574. Did it appear in the *Police Gazette*? I do not know.
8575. At any rate, you say you sent in a report, and it went to the Superintendent? Yes.
8576. Did you go further than that—did you actually put all these facts which you have related upon declaration, and hand them to Mr. Norton, proprietor of *Truth*? Yes.
8577. Statutory declaration? Yes; statutory declaration.
8578. How soon after the occurrence did you make that declaration? I could not exactly say; it might have been a month.
8579. It would not have been more, would it? It may have been; I would not swear.
8580. Was it soon after you sent in your report to the Superintendent? Yes; shortly after that.
8581. Do you know the result of the report you sent in to the Superintendent? I was seen about it.
8582. Who saw you? Inspector Lawless.
8583. And that is all you have ever known about the matter? Yes; I was to have gone up to the station to identify the man, and the day I was to have gone up my sister died, and I did not go, and let it drop, and never bothered any more about it.
8584. What did you tell Lawless when he asked you to come to the station and identify him? The first time he asked me I said I did not know the man. He came again and asked me would I go up, and I said, "Yes"; and the third time I told him it was Constable Quelch, and he has never bothered me afterwards.
8585. Nor have you heard one word about it since? Never heard a word about it.
8586. *Mr. Bull.*] You and this girl Kerrigan were working together? At Kahla's.
8587. He is an Assyrian storekeeper? He may be.
8588. Isn't he? I do not know.
8589. Don't you know? I do not know.
8590. And how long had you been working there? Two years.
8591. How long had this girl been working there? About nine months.
8592. And of course you had known her all that time? Yes, I have.
8593. You have a sweetheart, have you not? Yes.
8594. Dollie M'Namara? It is not for me to tell you who it is.
8595. We are here in an inquiry? Never mind; I decline to answer.
8596. *His Worship.*] He need not reply to that.
8597. *Mr. Bull.*] Don't you know that Miss M'Namara has been subpoenaed here? I decline to answer that.
8598. Did Miss M'Namara know that you were going to walk out with Miss Kerrigan that night? I did it every Saturday night for nine months. I do not say that it is walking out with her.
8599. After the place was shut up? Yes, walked out to her place. Never kept her company.
8600. How many times had you taken her in this park during the nine months that you had been walking out with her? Never before.
8601. That was the first time? Yes.
8602. And the last? No, it was not the last.
8603. Have you been there since? Yes. It has nothing to do with you though.
8604. *Mr. Abigail.*] Have you ever seen Mr. Bull there? I might, perhaps.
8605. *Mr. Bull.*] I have a park in my own neighbourhood, thank you. You did not even kiss the girl that night? It has nothing to do with you.
8606. *His Worship.*] You can refuse to answer if you like.
8607. *Mr. Abigail.*] If you will take my advice you will not decline to answer. You answer them and do not give them a chance.
8608. *Mr. Bull.*] Do you decline to say whether you kissed the girl? I do not decline to. (*To His Worship: Is it necessary?*)
8609. *His Worship.*] You can answer it if you like? Well, I did.
8610. *Mr. Bull.*] How many kisses? I did not count.
8611. Did you have your arm round her? No.
8612. After walking all the way from Regent-street to the park you sat down with her;—were you sitting on the ground? No.
8613. Well, you be careful? Careful enough for you.
8614. Are there a number of plantations in this park? Yes.
8615. Were you near a plantation? Yes.

L. Crosby.
17 Nov., 1897.

- L. Crosby. 8616. Were you behind one? No.
 17 Nov., 1897. 8617. Was the seat behind a plantation? I could not swear exactly. It was in the vicinity of one. If you like to go up there you can see.
 8618. It is about a chain away from the path? Yes.
 8619. I suppose you know the park is not intended for lovers to disport themselves? There is no case of lovers about it.
 8620. You and Miss Kerrigan are not lovers? I do not think so.
 8621. Then she is not your sweetheart? No.
 8622. You did not even have your arm round her? No; I did not.
 8623. Of course, my friend had suggested to you that there was nothing in the nature of impropriety;—you know what that means? Yes, I do.
 8624. Nothing approaching that? Nothing approaching that. You must have been through it to see it all.
 8625. I decline to answer that question, like you. When the officer came on the scene, she, the young lady, was very much excited? Certainly she was.
 8626. Have you told us all she said? I have.
 8627. Do you remember her clinging to your arm, saying, "Oh, Mr. Crosby, it's all your fault"? No, I do not.
 8628. Will you swear she did not? I will.
 8629. Will you swear she did not say, "It is all your fault; oh, don't lock me up; I will never come here again"? I will.
 8630. She thought you were going to be locked up? What more could she think when the man caught hold of me.
 8631. In view of that fact you really thought that Quelch was going to lock both of you up? I did not.
 8632. Why? I was determined not to go; I resisted him.
 8633. You would have resisted the police officer? Yes.
 8634. You would have got into hot water? Well, then, I would have got into hot water.
 8635. Do you say that Miss Kerrigan did not say that or anything like it, "Oh, Mr. Crosby, it is all your fault; don't lock me up; I will never come here again"? I will swear she never said that.
 8636. Did you offer the officer any money, or did you say, "Don't lock us up"? No, I did not.
 8637. Why are you laughing at that? Because I do not get my money easy enough to give it to him; I do not chuck it away for nothing.
 8638. Do you know a young man named Marr? No.
 8639. You do not know anybody by the name of Marr? No.
 8640. You do know Robinson, the police officer? Yes.
 8641. *Mr. Abigail.*] Commonly known as "Robbo"? I do not know whether it is Robinson or Robertson.
 8642. Call Marr, please.
 [*Mr. Marr entered.*]
 8643. *Mr. Bull.*] Do you know this man Marr? No; I do not.
 8644. Did you send him or instruct anybody to send him to see Robinson about this matter? I instructed nobody.
 8645. Are you aware that he came with a message from you, offering Robinson £2 to have the matter hushed up? No; I am not.
 8646. You know whom I mean by Constable Robinson? The man whom I met.
 8647. And whom you thought was Quelch, and whom you were going to take it out of? How do you know I was going to take it out of him?
 8648. I take that for granted? You can have that.
 8649. You give me that in? Yes, I give you that in.
 8650. Did you ever have a conversation with Quelch about this? No; I never saw him.
 8651. Do you recognise Quelch as a man whom you spoke to on one occasion in Regent-street when in plain clothes? I could not recognise him.
 8652. Do you remember having a conversation with Quelch, telling him this, for instance, that it was the watchman, Brewin, who had run you to do what you did? No, I did not.
 8653. Did you have a conversation with Brewin? I did.
 8654. Having had a conversation with Brewin, do you remember having had a conversation with Quelch explaining to Quelch, not knowing possibly that it was Quelch, that you had been run on to do what you had done by Brewin, the watchman? I am not in the habit of talking to people I do not know.
 8655. Did you say this to Quelch;—did you tell Quelch—did you mention, for instance, to this officer who was in plain clothes that you had already seen Inspector Lawless? No, I did not.
 8656. Do you remember the circumstance of speaking to some plain-clothes constable about the fact of your having seen Mr. Lawless? I never remember speaking to any constable.
 8657. Do you remember saying this to anybody whom you did not know to be a constable, that it was the watchman, Brewin, who had run you on to do what you had done, and you did not think or see what a fool you had been until you saw Inspector Lawless? Nothing like that. I did not.
 8658. Now that I have mentioned the fact to you, do you remember the circumstance of speaking to somebody in plain clothes in Regent-street? Well, I think every man who walks up the road is in plain clothes if he is not a policeman.
 8659. Do you remember speaking to anybody under the circumstances I am detailing to you;—I suppose you are glad to speak to anybody and tell everybody the adventure you had with the "copper"? You may. I do not.
 8660. One of your duties would be outside usher? No; it was not.
 8661. At any time? Not unless I chose.
 8662. For instance, if you chose you would go out and speak to any young lady you knew outside; I am sure that would happen to a gallant young fellow like you? It may.
 8663. Would not your duties be in standing outside sometimes inviting customers, and so on? Yes.
 8664. Now, you went a long way round this night that you walked out with Miss Kerrigan;—did you arrange before you left the place to take her for a walk to the park? No.
 8665. Did she know you were going to take her for a walk to the park behind this plantation? No.

8666. Did you see Quelch in Pitt-street whilst and when you were on your way with this girl, or did you see a police officer in uniform? No. L. Crosby.
8667. Tell his Worship what distance you think it would be from this shop where you left with the girl to the place you sat down, by the route that you took? I do not know; 79 Regent-street, is pretty near Redfern-street. 17 Nov., 1897.
8668. Start from John Hunter's corner? I did not start from there that night.
8669. That is the way you went? No, that is not the way we went that night.
8670. Did you go by one of the back streets? I went by the nearest approach to my own home.
8671. Which is that? Wells-street.
8672. That is farther on? No; it is closer.
8673. Wells-street runs through to Castlereagh-street? Yes.
8674. When you left the shop you went that way? Yes.
8675. You crossed Pitt-street? Yes.
8676. And into Castlereagh-street? No. Into Redfern-street then.
8677. Into Pitt-street and then up into Redfern-street? Yes.
8678. Round Friend's hotel corner? Yes.
8679. In George-street? No. I told you I went into Pitt-street.
8680. What direction did you go;—did you go through the Redfern Park? Yes.
8681. Are there other girls engaged in the shop? Yes.
8682. And they were with their young male friends? No; they were all with me until we got to this place.
8683. Then they were all with you until where? At the door where they live, within a few yards of it.
8684. Why did not you let this girl Kerrigan go into her home? Where was her home to go into, we had not got to it yet.
8685. Why did not you go on home instead of going into the park to sit down with the girl? We went through the park to go home.
8686. *Mr. Abigail.*] That was quicker.
8687. *Mr. Bull.*] It is not quicker to go into a park to sit down behind a plantation;—why did not you take the girl straight home? I took her straight home.
8688. You did? Yes. I went to the park because I wanted a spell, and sat there.
8689. And she wanted a spell? Yes.
8690. And you both sat down spelling? Yes.
8691. Then, wanting a spell, you kissed her whilst you were there;—how long were you sitting down? About five minutes.
8692. Have not you already said in this investigation that you were sitting down about ten minutes? No; I have not.
8693. Then where were you at the time you heard the whistle? Half way out the gate.
8694. How far would you have gone from where you had been sitting down when you heard the whistle? About 10 yards.
8695. So that you were 20 yards from the gate, is that it? Yes, about that.
8696. Then when you got to the gate did you see Robinson? No. Robinson was not there to see. If he was there I would have seen him.
8697. You heard the whistle when you were 10 yards from the gate? Yes.
8698. What direction did the whistle come from? I could not say.
8699. It was not Quelch? No.
8700. It was somebody blowing a whistle or a policeman blowing a whistle? Yes.
8701. Did you not see Robinson at all that night? No; I did not.
8702. Not anywhere? No.
8703. Then you described that there was some conversation between you and Quelch and the girl and you left the girl;—how far was that away from her home? A chain.
8704. Quelch saying he was determined to see where she lived? Yes; he said, "I will see where you live."
8705. Now, so far as you know, you have told the whole story of what did take place? Yes.
8706. You were rather anxious, were you not, to get your version of the matter made public? I was.
8707. *Mr. Abigail.*] Tell me this, are you in the habit of talking to strangers in the street about your private affairs? No. I am not.
8708. Are you in the habit of accosting people in the street and telling them all about this trouble that you had? No. I am not.
8709. Did you ever accost this man or any other man in plain-clothes and tell him, without being interrogated, all about this? No; I have not.
8710. I think you have already sworn that you never saw Quelch about this matter? Never saw him about it.
8711. *Mr. Abigail.*] Now, I call for the complaint, the report he made to the Superintendent, and all the other reports on it. [*Exhibit No. 36.*]

Miss Mary Kerrigan was called and sworn:—

8712. *His Worship.*] What is your name? Mary Kerrigan.
8713. Where do you live? In Pitt-street now.
8714. *Mr. Abigail.*] Do you remember the last Saturday in April or the first in May being taken home from Kahla's by Mr. Crosby? Yes. Miss
M. Kerrigan.
8715. You live with your parents? Yes. 17 Nov., 1897.
8716. Where was it you lived then? In John-street.
8717. You left the drapery store where you were employed with Mr. Crosby, the two Misses Crosby, and Mr. Fraser? Yes.
8718. And did you all go together as far as Mr. Crosby's residence? Yes.
8719. And then you split up? Yes.
8720. You and Mr. Crosby then went on towards your home? Yes.
8721. You went into Redfern-street? Yes.
8722. And through the Redfern Park into Elizabeth-street? Yes. 8723.

- Miss M. Kerrigan. 8723. And that was Waterloo? Yes.
 17 Nov., 1897. 8724. And then you went along Elizabeth-street to the back of Mount Carmel? Yes.
 8725. Then you entered Waterloo Park, did you not? Yes.
 8726. That is, by the gate near the second flight of steps? Yes.
 8727. And then you went along the fence towards Waterloo? Yes.
 8728. That was in the park and along the park fence, along the asphalt path which goes right side by side with the fence? Yes.
 8729. Then there is another gate there—at the corner of Pitt-street? Yes.
 8730. Did you leave the park by that gate? Yes.
 8731. But before leaving the park you sat down? Yes; on a seat.
 8732. Tell me, will you, how far was this seat from the gate leading out of the park? It was further than from here to that corner [*pointing to corner of Court diagonally opposite witness-box*].
 8733. Much further? Not much.
 8734. Was it about the length of this Court from wall to wall? I think it was further than that.
 8735. A little further? Yes.
 8736. About as far as across a street? Yes.
 8737. How long did you sit on the seat? Not more than ten minutes, if it was that.
 8738. Did you hear anything;—what happened? We sat down on a seat, and we got up and went towards the gate, and when we got up and were walking towards the gate, and when we were near the gate we heard someone running. It was Quelch that was running, and he came up and caught me by the wrist. He said, "Are you finished," and Mr. Crosby said "Quite," and he told Mr. Crosby to go home and go about his business, and then Mr. Crosby refused to go, and he caught me by the two wrists. Then I said, "Oh, Mr. Crosby," and then he said, "You had better go home, Crosby," and then Mr. Crosby caught hold of Quelch.
 8739. *His Worship.*] What happened then? Then, Mr. Quelch said, "Where do you live?" I said, "John-street." He said, "Well, I will see if you live there," and we went towards the gate, out Pitt-street way, and then Mr. Crosby told him to leave go my hands, and as we went in through the gate he left go my hands, and then we went over to the corner of John-street, and I went home, and Quelch told Crosby to go home again. I said to Mr. Crosby, "You had better go home," and I walked on, and Mr. Quelch walked behind me, and when we got to our gate Mr. Quelch caught hold of my hands, and he said, "Have you been walking with Crosby long?" I said, "Yes, about nine months." He said, "Did he ever come home with you before?" I said, "Yes, he comes home with me every Saturday night."
 8740. *Mr. Abigail.*] Did he say anything about the park? Yes. He said, "Did you ever go into the park with him before," and I said, "No." He said, "Oh, that's what all you girls say; you all say the same thing." And then he said, "Are you going out with him to-morrow night?" He asked me was I going out with Crosby on Sunday night, and I said, "No," and then he asked me would I go with him, and I said, "No," I was going to church with my mother. He said, "Come a little walk down George-street." I said, "No; I live here." He said, "We won't be long." I said, "No; I live here." And he said, "Well, I don't know what to do."
 8741. What else did he say;—anything about a summons? He said I would be going into the park once too often with Mr. Crosby, and that I would be getting into trouble, and he said that if he let me go I would be getting into trouble, and subpoenaing him as a witness, and then he would get into trouble for letting me go, and he said then, "It would be in all the papers, and a nice showing up it would be; a nice disgrace."
 8742. *His Worship.*] Did he ask you to meet him? Yes; he said, "What time do you come out of work." I said, "Half-past 9," but we came out at 9. He said, "Well, if you meet me at Parry's Mills at 10 o'clock I will let you know what I will do."
 8743. That is about summoning you? Yes.
 8744. "I will tell you what I am going to do," to frighten the girl? That is all he said to me.
 8745. *His Worship.*] Did you go and meet him? Oh, no.
 8746. That is all that happened? Yes.
 8747. *Mr. Abigail.*] Did you tell him "All right," you would meet him? Yes.
 8748. What did you do that for? Because I wanted him to go.
 8749. And that is why you led him to believe that you would meet him? Yes.
 8750. Were you afraid of him because he was a policeman? Yes.
 8751. Were you afraid of him because you thought it would probably happen as he said, that it would be in all the papers, and would be a disgrace? Yes.
 8752. Did he threaten to tell your parents about it? No.
 8753. Did he say this to you, "Now I will have to take you inside if this is where you live and tell your parents"? No.
 8754. You were crying? Yes.
 8755. You were upset about it? Yes.
 8756. He frightened you a lot? Yes, he did frighten me when he ran up and caught hold of me.
 8757. And from the seat could you actually see your gate from where you sat? I do not think so.
 8758. It was very near it? Yes.
 8759. That seat is under 200 feet away from your own home? Yes.
 8760. Did you meet him on the Monday night? No.
 8761. But in consequence of what Quelch said, did you ask Mr. Crosby to see you home that night? No. I said I was frightened, and Mr. Crosby came home with me.
 8762. Did you do anything improper on the seat? No.
 8763. Tell me, did anything improper take place between you and Mr. Crosby? No.
 8764. How old are you? Eighteen.
 8765. I suppose after working all day Saturday and being up from early hours in the morning until late at night you are pretty tired? Yes.
 8766. You answer me frankly and never mind about any offence that this may give to Mr. Crosby or Miss McNamara. Is it not true that there was a little bit of jealousy which prompted you to ask Crosby to take you round that way that night to pass Miss McNamara's house? I did it to vex her. I was going to tell her of it the next week.
 8767. And that is why you got him to take you round that way? Yes.
 8768. And why you sat down in the park? Yes.
 8769. *Mr. Bull.*] Where was she? We went past her place.

Miss
M. Kerrigan.
17 Nov., 1897.

8770. She was not in the park? No.
8771. *Mr. Abigail.*] As a matter of fact he kissed you, did he not? No.
8772. He did kiss you in the park? No.
8773. But he tried to? I do not know.
8774. Would you rather not say? Yes.
8775. Did he kiss you at all;—think again. Do not let any modesty prevent you from telling us all, because Mr. Bull will take advantage and use it. He did kiss you? I do not know.
8776. There is no harm in being kissed;—did you kiss him or did he kiss you—he has told us that he did? Yes, he did.
8777. *Mr. Bull.*] Why did you hesitate;—perhaps you will tell us how old you are? Eighteen.
8778. Are you eighteen past? Eighteen in September.
8779. A couple of months ago? Yes.
8780. So that in May last you were in your seventeenth year? Yes.
8781. Do you remember telling anybody that you were nineteen years old at that time? I do not.
8782. Have you ever told anybody that you were nineteen years old at that time? No.
8783. My friend suggested that your people at home could see you from your own door.
8784. *Mr. Abigail.*] I did not, but that she could see her home, but it appears it is just round the corner.
8785. *Mr. Bull.*] You could not see the front door of your home at all from where you were sitting with Mr. Crosby? No.
8786. You were really sitting down in a dark place, were you not? It was not so dark.
8787. Was there a moon? I do not remember.
8788. Do you not know there was not any moon? I do not.
8789. Is this park lit up by lamps? No; it is not.
8790. Anybody going into the park from the street would have the lamps behind them? Yes.
8791. How far were you sitting from the gate;—have you been to the park since with Mr. Crosby? Not with Mr. Crosby.
8792. Have you been to the park and sat down with somebody else? With my friend, Miss Loffatt.
8793. You have not been there with Crosby since? No.
8794. Are you quite truthful in that statement? Yes.
8795. If he has sworn you have been is he telling the truth? No; he is not.
8796. *His Worship.*] If there was no impropriety the constable had no right to interfere.
8797. *Mr. Bull.*] You say that Quelch took hold of both your hands or wrists? My wrists.
8798. You were very much terrified—very much frightened? Yes.
8799. What did you think the policeman was going to do at the time? I thought he was going to take me up.
8800. Lock you up? Yes.
8801. What did you think was going to happen to Mr. Crosby? He seemed to leave him out altogether.
8802. Mr. Crosby tells us that he thought he was going to be locked up? I did not.
8803. Do you remember whether you were clinging to Mr. Crosby during a portion of the time;—did you have your hands upon his shoulders, or your arms round his neck, or were you holding on to him? No.
8804. What? No.
8805. Well, Mr. Crosby says you were? I never did.
8806. Were not you clinging to Crosby and did you not say this to Crosby, clinging to his arm, "Oh, Mr. Crosby, it is all your fault," and "Oh, don't lock us up" to Quelch;—did you implore the policeman not to lock you up? No; I did not.
8807. You never said that to the policeman? No; I did not.
8808. You never asked him not to lock you up? No; I did not.
8809. Did you tell the policeman you would never go there again if he let you go? No.
8810. Have you a recollection of what took place? Yes.
8811. Did you ask him not to complain to your mother? No; I did not.
8812. You did not even do that? No.
8813. Now, do you remember this, that when Quelch brought you out of the park he brought you over to a lamp? At the corner of John-street; yes.
8814. Well, it is at the corner of Kellick-street? No; at the corner of John-street.
8815. At any rate, it was to a lamp? Yes.
8816. Was it there that he asked your name? No; he asked me my name in the park.
8817. Did he ask Crosby his name in the park? No; I said, "Oh, Mr. Crosby."
8818. Why did you say, "Oh, Mr. Crosby";—you told us a little while ago when I asked you, that you did not? I did not say, "It is all your fault" too.
8819. But you did say, "Oh, Mr. Crosby"? Yes.
8820. Why did you say that? Because I was frightened.
8821. I asked you a moment ago whether you were frightened;—you remember the answer that you gave me? I said "Yes, I was frightened."
8822. How far had you to walk after you came out of the park, the whole three of you came out of the park together? Yes.
8823. You and Mr. Crosby together, and Quelch following you immediately behind? Yes.
8824. Did you see any persons about the street at all? No; I did not.
8825. The place was very quiet? Yes.
8826. On your way through the park, and before you sat down, did you see any persons in the park? Up near the steps, when we were near the gate, up towards Mount Carmel.
8827. Was that before you went in? No; after we came out.
8828. When you were going in first? No; I did not.
8829. And you think you were sitting down about ten minutes? About that.
8830. Are you quite sure that you were sitting down upon a seat? Yes; I am quite sure.
8831. A wooden seat? Yes.
8832. Was that near a plantation, do you remember? I do not remember.
8833. Do try and remember, will you? You see you have often been in the park since? Only between particular hours.
8834. You have often been in since? Yes.

- Miss
M. Kerrigan.
17 Nov., 1897.
8835. At night time? Yes.
8836. Is not this park terraced? Yes.
8837. Which were you on—the lower flat? I think the second one.
8838. How many are there? Three, I think.
8839. Are you quite sure you were not on the lower flat? I was not.
8840. Did you cross over these terraces walking from the path down;—is that the way you reached where you sat down, walking over these terraces;—did you go by way of the terraces before you sat down? No.
8841. But you went by way of the terraces when you came out? Yes.
8842. Did you hear a policeman's whistle blow? No; I did not hear it.
8843. You were with Crosby all the time that he was in the park? Yes.
8844. How far did you accompany him after you came out? To the corner of John-street.
8845. How far would that be from the gateway or opening of the park, a few hundred yards? Not far.
8846. You never heard a policeman's whistle? No; I did not.
8847. *Mr. Abigail.*] Did you hear any whistle at all? No.
8848. You were too much agitated, were you not? Yes.
8849. *Mr. Bull.*] Do you remember Quelch saying in Crosby's presence, and to you, that he was determined to see where you lived? He said "I will see if you live there."
8850. You at first said where you did live? Yes; he asked me.
8851. *Mr. Abigail.*] Do you know that a letter was sent in, Miss Kerrigan? Mr. Crosby told me.
8852. And it was a fact, was it not, as stated in the letter;—"he probably," that is Crosby, "will give you particulars, though she does not wish to be mixed in things of the kind for reasons easily understood";—that is a fact;—you did not want the world to know you were sitting in the park at this time at night? No.
8853. *Mr. Bull.*] They are sweethearts; they have known each other for nine months? We are not.
8854. *Mr. Abigail.*] As a matter of fact, you are not sweethearts, are you? No. Mr. Crosby is engaged to another young lady.
8855. I have put this letter and report in;—were you interviewed by anybody about this matter? No.
8856. Mr. Lawless did not come to you? No.
8857. And you did not have any conversation with a gentlemen in plain clothes in the street who happened to turn out to be Quelch afterwards? No.
8858. *Mr. Bull.*] Did you walk out with Mr. Crosby every night from this place, every Saturday night;—are you still employed at this place of business? No.
8859. The shopkeeper has left? Yes.
8860. Then during the months you were there? Yes.
8861. Were you in the habit of walking out with Crosby every Saturday night? Only home.
8862. *Mr. Abigail.*] Did Sergeant Vane come down and see your mother about this? Yes.
8863. Is your mother here? Yes.
8864. How soon after this occurrence did Sergeant Vane come to you? It was after Mr. Dacey saw me. It was the same day.
8865. When did Vane come down to your mother's house? The same day that Mr. Dacey came down.
8866. *Mr. Bull.* Were you subpoenaed? Yes.
8867. Who left the subpoena at the house for you? Mr. Dacey brought it over to the shop.
8868. Do you not know that Sergeant Vane was down to serve a subpoena upon somebody of the name of McNamara? No; Mr. Dacey did.
8869. Did what? Served Miss McNamara with a subpoena.
8870. Vane was not down to serve a subpoena? No; I never saw him.
8871. Did he have any conversation with you? No.

Mrs. Margaret Kerrigan was called and sworn:—

- Mrs.
M. Kerrigan.
17 Nov., 1897.
8872. *His Worship.*] What is your name? Margaret Kerrigan.
8873. Where do you live? In Pitt-street now, and formerly in John-street.
8874. *Mr. Abigail.*] You are the mother of this young lady? Yes.
8875. Do you remember Sergeant Vane coming to see you? Yes.
8876. When was this? It was the Monday before this came on—Monday or Tuesday—I would not be sure which day.
8877. What did he come for? I was standing outside the gate, and he came and said he wanted to know if Mary Kerrigan lived there, and I said, "Yes." He said, "Did Mr. Dacey come here and subpoena her?" and I said, "Yes," and I said, "What is it about?" I said, "Her name is in here; you come here and I will show it to you." He came into the dining-room, and I said to him, "What is it about?" and he said, "Don't you know?" I said, "No." Of course, I knew that the child was through the park, but I did not know any more, and he said it was "improper intimacy with Crosbie on the park," and I said it was false. I said, "My child is a virtuous child," and he said, "Oh, all mothers think their children are virtuous." I said, "Well, I do not think, because I am sure of it."
8878. Tell me, there could be only one meaning to be put on what Vane said to you? Yes, he did mean it.
8879. He was making a deliberate charge of want of chastity against your little daughter? Yes.
8880. And you being the parent, indignantly repelled it? Of course I did.
8881. Did he not tell you that there would be a great exposure? Yes. I said, "Well, my daughter won't go into Court to have her good name taken." He said, "It will be in every paper," and I said, "She will not go," and he said, "Well, I will be down here to-morrow and see you," and I said at once, "She won't go. I will go at once to Mr. Crosby." He said, "Don't go near him," I said "I will go to Mr. Dacey," and he said, "Don't go near him." He said, "You take my advice, Mrs.," and then when he was going down the steps, "Of course it has nothing to do with me, but it will all come out." He said, "All mothers think their girls are good." He said, "Many's the time I've taken little girls off the park." I said, "You have never taken my child off the park." He said, "I do not know," and I said, "I do."
8882. Did you take his meaning to be that if you allowed your daughter to come to the Court that she would be disgraced by this being in the papers? Yes.
8883. It frightened you? No.
8884. As a matter of fact, you tried to stop your daughter going? Yes.

8885. And it was only when Mr. Dacey saw you again that you consented to her coming? Yes.
8886. *Mr. Bull.*] You would not let your daughter go on the park with anybody as late as half-past 11 at night? No; I would not.
8887. You would be very much annoyed if she did? Yes.
8888. Do you happen to know that she was in the park with young Crosby as late as half-past 11? I do not.
8889. You would not have allowed it if you had? No; I would not.
8890. You were not aware even that she was there sitting with him, and he was kissing her in the park? I would hardly believe it.
8891. I may tell you it has been sworn to. That surprises you, does it not? Yes.
8892. And it has been sworn that she has been with him in this park at night more than once? I do not think so.
8893. I may tell you that it has been sworn to? I do not believe it.
8894. They were there? I do not believe it.
8895. Evidently this lady does not know? Don't I know. I have kept my child in. I have never allowed her on the street.
8896. There is nobody accusing you of anything? She has never been to a dance, or a fair, or anything. We have kept her unspotted from the world.
8897. Your daughter has sworn that she has been frequently on that park late at night with girls? I do not believe it. I will make you prove it.
8898. These questions must be asked you. You come here without knowledge? I know my daughter. I do come here with knowledge.
8899. *His Worship.*] You are quite right in defending your daughter.
8900. *Mr. Bull.*] I am not making insinuations? You are.
8901. I am only telling you what has been sworn to here by your daughter herself? She did not. I would not believe it. My daughter was never on the park alone with Mr. Crosby only that one night. I would not believe it if you went on your knees and swore it.
8902. I never was there? Don't try to take any girl's character away.
8903. My daughter is quite as old as she is? You are a father yourself. If you rear your daughters as well as I did her, and kept her unspotted from the world, you would do. There would be nothing to fall back on until a blackguard like Quelch—if I had been there that night he came I would have broken his back with a broom.
8904. *Mr. Abigail.*] I may tell your Worship that, if it has any weight, we can produce a doctor's certificate regarding this young lady. You know what that means. I need not say more.

Mrs.
M. Kerrigan.
17 Nov., 1897.

Senior-constable William Edward Quelch was recalled:—

8905. *Mr. Bull.*] What night was it? Saturday night, 1st of May. I started from the station about 10 o'clock.
8906. What time did you go on duty that night? About 10 o'clock. I was at the station until 10 had struck.
8907. Just relate the matter in your own way? At 10 o'clock it was my duty on that section that night. I went and visited the constables that I would have to visit, and about a quarter past 11 Constable Robinson would be coming round Kellick-street, and then round into Pitt-street, and would meet me.
8908. That is from Kellick-street into Pitt-street? Yes.
8909. He would come round and meet you;—that would be at a quarter past 11? Yes. Between that he would have to be up on the corner of Phillip and Pitt streets at the half hour. He is up there at the starting-point at the half hour. I went along Pitt-street to meet him, and I saw a young couple ahead of me going along the footpath. I stood at the corner of Buckland and Pitt streets, having no necessity to go any further; knowing the constable would come that way, was bound to come that way, I waited. As he had not come round I went up then towards Kellick-street, for the purpose of reversing the beat, to meet him, which would be my duty. When I got between the streets I heard a whistle blown. Knowing it should be the constable's time, and seeing the same young couple that was going ahead of me go into the park I went up in that direction also. When I got up to the lamp-post at the corner of Kellick-street and Pitt-street—that is, on the opposite corner of the park—I could not see Robinson coming; I naturally went into the park, thinking something was wrong, and knowing the character of the park, no lights, and everything else.
8910. You know the people who resort to it? Yes.
8911. What sort of people resort to this park at night? Larrikinesses and young fellows. You can see them come in there, and they are in there about five or seven minutes, and you can see them come out again. The park is terraced, and is very dark.
8912. Are there any lamps in it? There is not a single light in the park. We term it—the police—"The Waterloo brothel." Any night you like you can go there, and you might as well say it is a brothel.
8913. At any rate, young people who are respectable certainly do not know the risk they run in going into such places? No, they do not. I went into the park gate. Of course it is like any other park; there is the outside fence and then there is a plantation and an inner fence to protect the trees. Just inside the park, to the right, on the lower terrace, there is a tree with a square plantation fence round it and no seat. I saw a black form, as I thought, to the right of this plantation. I went along towards it; when I was a few yards off of it, I noticed a young fellow seemed to be rolling off the top of a young girl. I went up to them and asked them what was their conduct in the park at that time of the night. I asked them to go out of the park. They went out of the park, and when they got to the gate I asked them for their names and addresses. I took them under the lamp-post at the corner, the light there at the corner, and Crosby gave me his name.
8914. What name did he give you? The name of Crosby.
8915. *Mr. Abigail.*] He must have been very much afraid when he gave you his correct name? Then I had a look at him more; "Oh," I said "I am sorry to see you in the park at this time of night."
8916. *Mr. Bull.*] Whom did you say this to? Crosby; I recognised him then. He was generally stuck outside the Assyrian draper's looking after the draperies. I asked the young lady her name.

Senior-
constable
W. E. Quelch.
17 Nov., 1897.

Senior-
constable
W. E. Quelch.
17 Nov., 1897.

8917. *Mr. Abigail.*] Do you notice the elaborate detail of all this "The Assyrian draper's"; why does not he say "outside Kahla's, the draper's" or "outside Abigail's the grocer's," or "outside Bull's the lawyer's"; but he says, "Outside the Assyrian draper's? It is the usual topic for that shop, "The Assyrian draper's."

8918. *Mr. Bull.*] Customers and other people speak of it as "The Assyrian draper's?" Yes. I then asked the young girl her name; she was clinging on to Mr. Crosby. I asked her name, and she refused to give it. She said, "Oh, Mr. Crosby, it is all your fault." She said, "Don't lock me up"; she said "I won't come here any more." I said, "Give me your name, and where you live; I am not going to lock you up and be mixed up with your habits." I said, "If anything happens to you as I am brought upon the scene, I will be the first one you will subpoena as a witness at the Police Court," I said, "If it was earlier in the night I would lock you up, but as it is not, and I am the only witness here," I said, "The Bench has ruled or has passed remarks that it is not fair for us to bring them before the Court, seeing that we are the only ones that witness it at such times at night." I heard the Bench repeatedly pass that remark.

8919. *Mr. Abigail.*] Did you say this to them? Yes; I told them if it was not so late at night I would lock them up.

8920. *His Worship.*] Unless it was a charge of public indecency, you mean? Yes, your Worship; I asked her two or three times to give me her name, and it was only by telling them that, that I did not intend to do anything on that account, being so late at night, and I the only witness, she eventually gave me her name. "And now," I said, "tell me where you live." She said, "I live in John-street." I said, "There are a great many houses in John-street, and as John-street is not very far away, show me where your house is." She walked on to John-street; I followed her and Crosby followed too. She went down John-street some 90 yards down, I should say; she went in then to the front garden of a cottage. Crosby was then just a few yards higher up. After she got into the gate she stopped. I said, "Go and knock at the door. I want to see whether you do live there." She then came to the fence, and said, "Don't you tell my mother, will you?" I said, "I am not going to tell your mother at all." I said, "Knock at the door and that will satisfy me that you live there." She went and knocked at the door; the door was opened; she walked in and closed the door. I went away in a westerly direction, and Crosby went back again in the westwardly direction. I went round and picked up the other constables on their beats.

8921. Now you heard the statement made here by her that you asked her whether she was in the habit of meeting Crosby late at night, and whether she would meet you on some following night, Sunday or some other night? Yes.

8922. What do you say to that? I never made such an insinuation at all, and as for saying that I could meet her at 10 o'clock, it is impossible for me to do it.

8923. Why? I am parading at 10 o'clock at the station.

8924. When? The whole of the month, and that is three-quarters of a mile away from the station—more than that.

8925. Which is? This spot. There is the duty book there. That shows I parade at 10 o'clock at night there.

8926. Was there any such thing in your mind as your wanting to meet this girl for improper purposes? A girl like that? I may say at the time I asked her her age, and she told me she was 19 years of age.

8927. That you doubted? Yes; I did doubt it.

8928. You simply did what you did that night in the girl's own interest? I did. I told her what the result would be; in fact, I believe I mentioned to her the great number of young girls that we had, led astray.

8929. Outside of all this fuss with regard to what you did, have not you frequently and often advised young girls under similar circumstances? Any amount.

8930. Not to frequent such places? Any amount.

8931. Do you not know, and is it not a fact, that in the Redfern Division, this place called "The Brothel" is the resort of almost all the young girls in the place? Redfern, Waterloo, and Alexandria; and I have hunted them off the park at 1 o'clock in the morning.

8932. Has there ever been a complaint while you have been in the Redfern Station, of any attempt on your part to take advantage of any woman in the place? No, never.

8933. What is the age of your eldest daughter? Thirteen years of age.

8934. *His Worship.*] You observed them, as it were, one rolling off the other? Yes.

8935. Were their clothes disarranged in any way? The park was so dark that I could not see.

8936. Had they time to arrange their clothing before you walked up and spoke to them? Yes.

8937. *Mr. Bull.*] They were in an amorous position? Yes.

8938. Do reputable people about the district walk into that park for the purpose of having ordinary conversation? Not at all.

8939. Do any people that you know of walk into that part of the park at all? Not at all. It would have to be daylight. You might go there every night in the month at half-past 11 at night, and you would not see any decent person sitting there. You might see a larrikin and larrikiness pass in for about five minutes at the most, and you might see them come out again. Alexandria Park is just the same. Of course, they have lately put three lamps in there.

8940. There are no lamps in the park? Not a light; and if you go over to Dowling-street at night-time you will see them walking into Moore Park by the thousands, and I have often remarked it, if a policeman stands near the corner of the entrance, directly they see the policeman they cover their faces. I have known this girl for a long while. I see her every day almost that I am at home, passing down in front of my house, going home to her dinner. It is her nearest way. She goes down George-street past my front door and round John-street, and that is her nearest way home, and this is the way they have rigged up that they went this night, I may as well say, three parts of a mile out of their course.

8941. *Mr. Abigail.*] Now he says they have "rigged up." Your Worship sees the same character and nature of defence. All these people are perjurers, and he, the immaculate Quelch, is the only person who tells the truth? I say, no matter what end it comes to, this young couple were never up at the top of Mount Carmel that night.

8942. How do you know? I know it, because I followed them right along.

8943. *Mr. Bull.*] You were there on patrol? Yes.

8944. *His Worship.*] How long were they there before you recognised them in this position? They could not have been in the park longer than, say, about three to four minutes at the most. I stood at the

the corner of Buckland-street. As the constable did not come round, I edged up a little bit, thinking that something was wrong, and the whistle blew. I think I can explain a little bit that with reference to the girl McNamara. I applied for the subpoena for this young lady (Miss Kerrigan). There was a subpoena issued by mistake for Dollie McNamara. She was served with a subpoena, I believe, when the mistake was made, and I think, by what I hear, there was a bit of a tiff between Crosby and her over it. The mistake was made, and an order came up that Sergeant Vane was the man who should serve these subpoenas on everybody. Vane was instructed to serve these subpoenas, and I think certain names on the subpoenas were underlined, which he should not serve.

Senior-
constable
W. E. Quelch.
17 Nov., 1897.

8945. *Mr. Bull.*] There is no doubt in the world about this: You have heard Crosby say that on the Monday night he saw somebody in the street whom he went up to with some intention. There is no doubt that person was not you? Positive. I can easily explain that.

8946. You heard me ask Crosby whether he had spoken to you upon the matter? Yes.

8947. Whether, as a fact, he recognised you as having spoken to you on one night in Regent-street in plain clothes? Yes.

8948. Did he speak to you? Yes.

8949. Tell his Worship what he said? I was not dressed as I am now; I had no collar on, and I do not think I had a vest on. He was outside, as I generally used to see him, of this draper's shop, looking out for all the goods that were exhibited outside. I merely said, "Good evening," and got into conversation, and I knew he did not know me, and never recognised me. We got in conversation. My object was I had heard something.

8950. *Mr. Abigail.*] I object to his object.

8951. *His Worship.*] I see no objection to his giving his reason for the conversation.

8952. *Mr. Abigail.*] I submit we cannot have his object.

8953. *Mr. Bull.*] You had heard something? Yes.

8954. And your object in speaking to him was what? With reference to the man named Brewin, to see whether it was correct. I had a conversation with Crosby outside the shop, and he said he was very sorry that ever he had opened his mouth about it at all; but if it had not been for Brewin he would not have made himself such a fool; that he had a conversation with Brewin, and Brewin had run him to do this. So he said, "As a fact, I do not know who the constable is. I could not identify him. I did go and stick up another constable, but I found out I had made a mistake."

8955. *Mr. Abigail.*] Do you not see the cleverness? He knows all the reports, and he has a mind imaginative enough to supply all the details.

Witness: After that, I think about a day after or so, it came under the notice of another constable, and seeing that, for the constable's own protection, he reported the circumstances to one or two of the non-commissioned officers. They mentioned the matter to me. I instantly said —

8956. *Mr. Abigail.*] I object to this.

8957. *His Worship.*] I will not have this.

8958. *Mr. Bull.*] Some report was made by somebody? Yes.

8959. Was that report made by Robinson? Yes; and after that instance was brought to my mind by my superior officer, I said, "Robinson has nothing to fear about that, because it was not Robinson that caught them in the park, it was I."

8960. He had confused Robinson with you? Yes.

8961. And your explanation to your officer was that Robinson had nothing to fear in the matter, because you were the person who had seen them? Yes.

8962. My friend asked whether, as a fact, this girl did meet you at 10 o'clock on the following night? Yes.

8963. How frequently have you seen this girl since then? Well, I have seen her any amount of times.

8964. I suppose you have seen her in the evening? Yes.

8965. Have you attempted to accost her in any way? Never.

8966. Have you seen her with male friends as well as female? Yes.

8967. *Mr. Dacey.*] You say you have seen her with other male friends;—who have you seen her with? I do not know who they are.

8968. Did not you come down from the north-west corner, where the lamp is;—did not you run down the hill to look whether they were going out of the gate? I was not up that hill that night, and I do not believe I go up that hill any night during the month.

8969. Did not you say you went up Kellick-street to meet Constable Robinson? I went up to the corner of Kellick and Pitt streets to meet Constable Robinson.

8970. Where is Kellick-street? It runs from Elizabeth-street into Pitt-street.

8971. What do you call the street alongside the fire station, in Waterloo? Kellick-street.

8972. Where does it run to? Morehead-street.

8973. And you say this Kellick-street runs into Pitt-street? Yes.

8974. From where? From Elizabeth-street. You come up the steps from Elizabeth-street up to Mount Carmel; then right down into Pitt-street.

8975. *Mr. Abigail.*] You say that this park is very dark? Yes.

8976. You know the gate you went out of? The corner of Kellick and Pitt streets.

8977. No, the top gate that you went out of the park by to go to this young lady's house? No; I was never near the gate.

8978. Is not that the gate? No.

8979. Then you see you contradict them, do you not? I think you are out of it altogether. Your witnesses' evidence is that they went in the top gate and walked down to this gate, where they came out of.

8980. Do you admit that you went out of the gate described by Crosby and Miss Kerrigan? If they referred to the top gate, I do not admit it at all.

8981. The gate nearest their house? That is better.

8982. Did you go through that? That is the gate at the corner of Pitt and Kellick streets.

8983. That is the gate nearest their house? Yes.

8984. Now, you say the park was very very dark? Yes.

8985. How did you then see the dark form, as you describe it, roll off a woman? With my eyes.

8986. But the park was very dark, you know? Well, surely you will credit me with having eyes in my head.

8987. I suppose you have only got the eyes of an ordinary man—you cannot penetrate the darkness? Yes; most decidedly.

Senior-
constable
W. E. Quelch.
17 Nov., 1897.

8988. Is not this a fact, and have not you purposely forgotten to mention it, that at that gate there is a lamp which throws a stream of light into the park? There is a lamp on the opposite corner.
8989. And was it not by the aid of the light from the lamp that you saw those two people sitting down on the seat? Not at all. There was no seat where they sat down. There is no seat on the bottom plantation in the park. I do not believe there is one there to this day.
8990. Is there a seat near it? Yes; on the next terrace.
8991. On the second terrace? Yes.
8992. Did you not hear that young lady say she was on the second terrace? She was not.
8993. You will admit that there was a seat there? Yes.
8994. And in the locality described by these people? Yes.
8995. So that, in order to get them off the seat, you have to take them down to the bottom terrace? They were not on the second terrace at all, and they were not on the seat.
8996. To put them on a seat you would have to admit that they were on the second terrace? I do not admit much. The seats are behind the plantations on the second terrace.
8997. But if this is true, assuming it for the sake of argument, that they were on the second terrace, and not on the third, it is probable that they could have been sitting on the seat, as the seat is there? They may have been, but you see they were not sitting on the seat.
8998. That is what you say? I am positive about it.
8999. You say that they were lying down? They were.
9000. What was their position when you went over to them? He was just getting off the young lady.
9001. Were his clothes disarranged? I cannot say they were. As soon as he saw me coming he jumped up.
9002. Did you assist the lady up, or did he? No. He did.
9003. Now, as a matter of fact, did you accost them until they were walking nearly to the gate? I did.
9004. Until they had actually got up to the gate? I did.
9005. Did not you then get hold of the girl? No.
9006. Then they are wrong there? They are.
9007. Is it a fact that you said to them, "Are you finished?" and that Crosby said, "Quite"? I never heard such a remark. As soon as they got up I ordered them out of the park and followed them.
9008. Is it a fact that Crosby caught you by the shoulders? He never laid his hands on me. I would not allow him.
9009. Is it a fact that the whistle blew while you were still engaged in conversation with the young lady? No. The whistle blew before ever I entered the park. If it had not been for the whistle I would not have entered the park.
9010. Is it a fact that you saw any act of indecency? No.
9011. Did you, from first to last, charge these young people with anything? Not at all.
9012. Why did you want to see the girl home to her mother's? I wanted to see if she was telling me the truth.
9013. Did not you tell me that for a long time past you have known this girl, and known her well? But I did not know where she lived.
9014. But you knew where she was, and knew where you could find her address? I knew where I could find her, at the draper's shop, Kahla's.
9015. Why did you think it necessary, having no charge against this girl at all, to satisfy your curiosity and follow her, to see whether she lived where she said she did? I considered it my duty.
9016. Is it your duty, having no justification to interfere, to follow people to see if they give you correct addresses? It is my duty in a public park if I see any case which I consider should not take place in a park, it is my duty to prevent it.
9017. Why did you not do so in the case of the pigeon-stealers, who were running about and warming themselves at 4 o'clock in the morning;—did you have this conversation with Crosby and the young lady—at any rate, you admit that you did follow the girl to the house, and had some conversation with her at the gate? I admit that I followed her to the gate. She went in, and she asked me not to tell her mother.
9018. Did you say this, "Do you work with Crosby"? No, decidedly not; I knew she did.
9019. Did not she say, "Yes"? No.
9020. Did you say, "How long have you been working with him"? No.
9021. Did not she say, "Nearly nine months"? No.
9022. Did you say, "Did Mr. Crosby ever come home with you before"? No.
9023. And did she say, "Yes; he comes home with me every Saturday night"? No.
9024. Did not you say, "What were you doing in the park"? No.
9025. Think again? I never asked her that.
9026. Did not he say, "Nothing"? I never asked her that.
9027. Did you say, "You will be getting into trouble going into the park with Mr. Crosby"? Yes; I said, "You young girls will be getting into trouble going into the park at this time at night."
9028. Did not you say, "Are you going out with Crosby to-morrow night"? No.
9029. I think you said that the only conversation you had with the young lady was, "No; I won't tell your mother; knock at the door, and I will be satisfied";—now, you have admitted one bit more in striking corroboration of part of the conversation deposed to by her and contradicted by you;—now, having got that admission from you, will you go a bit further? Anything you like to ask.
9030. Did not you say this to her, "Are you going out with Crosby to-morrow (Sunday) night"? No.
9031. Did not she say, "No"? No.
9032. Did you say, "Meet me to-morrow night"? No.
9033. Did not she say, "No; I am going to church"? No.
9034. Did not you say, "If you cannot meet me to-morrow night, will you come now for a walk along George-street"? No.
9035. It is pretty dark in George-street? No; it is all built upon, and lit up.
9036. Towards the Waterloo mills? Yes, right to M'Evoy-street.
9037. Is there not a vacant piece of land there? That piece of land is built upon and lit up.
9038. Does not George-street go into a vacant piece of land? George-street terminates at the back of M'Evoy-street, and then it is fenced off. One side of M'Evoy-street is all built upon, and part of the other side is built upon.
- 9039.

Senior-
constable
W. E. Quelch.
17 Nov., 1897.

9039. Does not it go into the mills there? There is one entrance into the mills, but that is not the entrance into the mills.
9040. But you can get in there? Yes. It is private property, and the man has his house in the centre of it, and a watchman on the grounds.
9041. It is dark there, is it not? Yes.
9042. Did you say this to her, "Oh, we won't be long"? No.
9043. Did not she say, "No"? No.
9044. Did not you say, "Well, I don't know what to do"? No such conversation ever took place with that young girl.
9045. Did not you say, "You will be summoned, and it will be in all the papers"? No.
9046. Did not you say, "You will be pretty well disgraced"? No, not a word of it.
9047. Did not you say, "Were you ever in the park before with Crosby"? No.
9048. And did not she say, "No";—and did not you say, "Oh, that's the way with all you girls; you all say that; you will be going into the park once too often with Crosby"? I may have said that.
9049. There is another bit;—did not you say, "You will be getting into trouble if you don't look out"? I may have said that. I have said it to so many.
9050. Did not you then say, "You will be subpoenaing me as a witness"? Yes.
9051. "And I will be getting into trouble for letting you go?" No.
9052. Did not you ask her then what time she left off work? No.
9053. Did not she say, "9:30"? No. I know the time they shut up.
9054. What time does she leave work at night? Between 9 and half-past, week nights.
9055. Every night? When Kahla was there.
9056. Is not Kahla there now? It is an empty shop now.
9057. Do not you know that she used to leave there every night at 9 except Saturday? No; between 9 and half-past.
9058. Did you say this to her: "Does Crosby come here with you on week nights"? No.
9059. Did not she say, "No"? I never asked her the question.
9060. Did not you say this: "If you will meet me at 10 o'clock at Parry's mills-I will tell you what I am going to do"? It is impossible for me to say such a thing.
9061. You see you admit only part of that conversation, and only the least incriminating part? Yes; I see you have asked me a lot of questions to the detriment of that young girl.
9062. *His Worship.*] Just answer the questions.
9063. *Mr. Abigail.*] The incriminating part of the conversation this young lady has sworn to you carefully contradict? Yes.
9064. I want to know from you whether you will go to the extent you have in the former charges;—will you say that this is pure imagination on her part, or is it a wilful and wicked lie? I believe it is just what you say it is—a wicked, wilful lie of Mr. Brewin. Why don't you bring him here as a witness?
9065. You heard this young lady swear that you said all these things, and now you say they are wicked and wilful perjury on her part? I did not hear that young lady swear all that you have just asked me.
9066. I can assure you she did? I took no notice of it then.
9067. Assuming that she did, is that, on her part, wicked and wilful perjury? Yes, it is.
9068. Now, you have contradicted the evidence on oath, given by Crosby;—is the part of his conversation which you have contradicted wilful and wicked perjury on his part? Yes.
9069. How many people in this inquiry have you charged with wicked and wilful perjury? I could not say.
9070. Is it not a fact that every witness that has come into the box to incriminate you;—have not you said in those cases exactly what you have said in this, that they are all liars and perjurers? I did. Why, you put in half-a-dozen men to swear to a certain day, and then the next day they backed down because they had a little information.
9071. I ask your Worship to believe this because the facts given in evidence entitle me to do it. I ask you to believe that this man is not the only truthful man in this case. *To the witness:* Now, tell me this: do you really wish His Worship to believe that when you came up to these two young people, and found them in the position that you have described, that you asked Crosby for his name, and he gave you truthfully his name? Yes.
9072. That is rather peculiar for a man caught in the act? Naturally enough he would give me that because he knew I knew him.
9073. If he knew you knew him it would be equally natural to say that he knew you? Most decidedly.
9074. And yet you say that afterwards, when you, in plain clothes, saw him he did not know you? He did not know me in uniform, let alone when I was in plain clothes.
9075. You have heard him say that he told the Inspector afterwards who you were? After he was told.
9076. Now tell me this: do you want His Worship to believe that when you spoke to these people, and got Crosby's name you went into all this elaboration of detail, and that you said to this young lady, "You had better give me your name," and she refused to give it, and then you said, "I am not going to lock you up and be mixed up with your habits"? Those words of mine, "I am not going to lock you up," were when she said, "Oh, Mr. Crosbie, it is your fault."
9077. That is, when you came upon them at first to surprise them, do you want His Worship to believe that you used those words, "Now I am not going to be mixed up in your habits"? After we got outside."
9078. Did you further go on to tell them, "And as I am the only witness, and the Bench has over and over again ruled that it is not fair to lock people up under such circumstances, and being in the dark, I will let you go." Do you really want His Worship to believe that you, surprising these people in this act that you describe, went into that long and elaborate detail before them? I do not see that that is very long and elaborate.
9079. Don't you think it is elaborate for you, detecting offenders, to say that, "I am not going to lock you up, because I am the only witness and the Bench has ruled that it is not fair"? With that kind of crime I could fill the lock-up every night.
9080. If other people told you that would you believe that tale? Yes, I would; I know there are plenty of police officers who drive these girls off the park.

Senior-
constable
W. E. Quelch.
17 Nov., 1897.

9081. And you went into the matter in an argumentative way, and explained in detail that the Bench had ruled that you should not lock them up, and notwithstanding that, you followed them up;—is not that unfair? I do not see that it is unfair. If we catch them it is a matter of duty with us, but I have heard certain strictures on the Bench that when nobody sees it, and it is late at night, we might pass them by.
9082. *Mr. Bull.*] In other words, when other senses are not offended? Yes.
9083. *Mr. Abigail.*] You say you said this to them? Yes. I did. I gave her good advice.
9084. To sum the whole thing up—you have heard the evidence given by Mr. Crosby and Miss Kerrigan, and you know your own evidence? Yes.
9085. Now contrast your evidence with theirs. You see the wonderful contradictions between your evidence and theirs? I cannot see many contradictions.
9086. You see it is a flat contradiction? Most decidedly it is.
9087. In one part of the case against you, Crosby is corroborated by the evidence of this young lady.
9088. *Mr. Bull.*] I object to that. That is only a speech to Your Worship.
9089. *His Worship.*] I do not think you should go into that. You are drawing conclusions.
9090. *Mr. Abigail.*] With great respect I am not? I might say that only yesterday afternoon I saw Crosby coming along the street with what I took to be his evidence, rehearsing it.
9091. You have flatly contradicted the evidence of Crosby, although his evidence is corroborated by Miss Kerrigan? Yes.
9092. In the face of that, do you still wish to adhere to your evidence? Yes, I do, and I say that if Crosby had had any respect for that young girl he would never have taken her on the park at that time at night.
9093. I say that if you had had any respect for the girl you would not have asked her to go down George-street? I was a good Samaritan to that girl on that occasion.
9094. Did Mr. Lawless ever speak to you about this matter;—did you know that a complaint had been sent in into the station about it? No.
9095. And that Mr. Lawless had spoken to the constable on the beat? No.
9096. Did not you know that Robinson had been spoken to? No.
9097. Did you know that any officer had been spoken to? No.
9098. Did not you say that your superior officer had been spoken to about it, and you said that Robinson need not mind because you were the man? I referred to Sergeant Vane.
9099. Did he speak to you? He spoke to me about this man sticking Robinson up, and then I said that Robinson need not be afraid, that it was I that found them in the park.
9100. And notwithstanding you told Sergeant Vane that, you did not hear anything about it? No.
9101. Is it a fact that this is the first time you have seen this report? Yes; this is the very first time. Since this started I found that that did take place, and that an appointment was made by the Inspector with this man, and he never turned up. I have never seen that in my life. I do not know what it contains now.

[The Commission then adjourned.]

THURSDAY, 18 NOVEMBER, 1897.

[The Commission resumed its sittings at 2 p.m. at the Central Police Court.]

Present:—

WHITTINGDALE JOHNSON, ESQ., S.M. (SOLE COMMISSIONER).

J. R. Dacey, Esq., M.L.A., and Senior-constable W. E. Quelch.

Mr. J. W. Abigail, solicitor, appeared in support of the charges, on behalf of Mr. J. R. Dacey, M.L.A.;
Mr. C. Bull, M.L.A., solicitor, appeared on behalf of Senior-constable W. E. Quelch.

Charge No. 13—continued.

Senior-constable W. E. Quelch was recalled:—

Senior-
constable
W. E. Quelch.
18 Nov., 1897.

9102. *Mr. Bull.*] Do you remember my asking Mr. Crosby yesterday whether he had sent somebody to make an offer of £2, or whether he had offered £2 under any circumstances to have the matter hushed up to anybody? I recollect that circumstance.
9103. Did anything of the sort take place so far as you are concerned? Yes, on the night in question.
9104. Did he, as a fact, make an offer? He said he would give me £2 if I would say nothing about it.
9105. *His Worship.*] Who said that? Crosby did.
9106. *Mr. Bull.*] Crosby was asked the question whether he had ever offered, or whether he had authorised anyone to offer, £2 on his behalf to hush the matter up, and Quelch contradicts Crosby on that point, and it is for Your Worship to determine who is telling the truth. *To the witness:* Now you heard the statement made by both Crosby and the girl yesterday as to the route that they took? Yes.
9107. And after the Commission was over last night, did you pursue, on foot, the course which they described they took? Well, there is no doubt I took a nearer course, because I left out the portion from the Town Hall, Redfern, in Pitt-street, to the house where Crosby said he went with his sisters—I left that portion out. I took the nearest route through the Redfern Park, that would be from the corner of Castlereagh-street and Redfern-street, straight across diagonally to the corner of Phillip and Elizabeth streets.
9108. Now, how long, as a fact, did it take you;—did you walk leisurely as they were walking? I walked the pace that a person would ordinarily walk along the street.
9109. How long did it take you? Twenty minutes, leaving out the portions I mentioned.
9110. To reach which point? To reach from the draper's shop to the park gate in Mount Carmel Park.
9111. Was anybody with you? No. I started inside the park and went up alongside the fence.
9112. You heard them describe the course which they themselves took? Yes. The nearest seat to this gate is fifty-five yards from the gate, off the track.

9113.

9113. I gave you certain instructions yesterday? There is no seat on the second terrace whatever.
9114. I am going to ask Your Worship to visit this park if there is any trouble in the world on this matter. Senior-constable
W. E. Quelch.
9115. *His Worship.*] I do not think it is necessary, because it is admitted that there is a seat only on the second terrace. 18 Nov., 1897.
9116. *Mr. Bull.*] Quelch says there is no seat on the second terrace at all.
9117. *Mr. Abigail.*] We do not know whether he is describing the locality? *Witness:* Yes; and there is not a single asphalt path in the park.
9118. *His Worship.*] There is no seat on the second terrace? No.
9119. And none on the third? There is one on the third, and 55 yards from the gate. There is a flat, there is a terrace comes up about 4 feet, and then it runs flat again for several feet back, and then it runs up again in another terrace, and then just up above that terrace there is a square plantation and a seat in front of it, and that is the nearest seat to the gate.
9120. *Mr. Abigail.*] That is the seat they say they were sitting on.
9121. *Mr. Bull.*] The girl describes it and says they were sitting on the second flat.
9122. *Mr. Abigail.*] That might be a mistake about the terrace. They say they were sitting on the seat nearest the gate. What does it matter about what flat they were on, because you will admit that your client himself is wrong, because he admitted yesterday that there was a seat on the second flat.
9123. *Mr. Bull.*] He says there is no seat where he said he saw them, and there is no seat where they say they were sitting. *To witness:* Did you tell us the time that it occupied you in walking the route that you say you took? It took me without the least reflection or stoppage twenty minutes.
9124. And you started with an object, and you finished with an object? I timed myself at the start.
9125. Having all the time that object in view? That is to see what time it would take me walking at an ordinary pace.
9126. *Mr. Abigail.*] You did not take anybody with you? No.
9127. To test it, or corroborate your statement? No.
9128. The distance, or, in fact, the locality upon which this seat is? No.
9129. Have you seen Robinson since yesterday? In connection with what?
9130. In connection with this case? Yes.
9131. *Mr. Bull.*] What was the object? I was passing along Elizabeth-street during this route, and I was somewhat ahead of Constable Robinson. I said to Constable Robinson, "I cannot stop now. I am retracing their steps as sworn to in the evidence to-day." I never stopped with Constable Robinson. I went straight on. If I did I would have had to have gone back again and started again.
9132. You have had no conversation with him? No.
9133. *Mr. Abigail.*] You have not seen him since? No.
9134. Nor had a word with him? No.
9135. Has he given you a statement of his evidence? No.
9136. Has Mr. Bull got one? No.
9137. Do you know what he is going to swear? I have got a statement. I have had a statement in Court here for the last weeks and weeks.
9138. Who gave it to you? Constable Robinson.
9139. Since this Commission sat has Robinson supplied you with a statement of his evidence? Yes.
9140. When did he? Some three weeks or a month ago or more.
9141. Have you seen him since with regard to it? No.
9142. Have you talked to him since he gave you the statement? No. I might have casually had a few words with him.
9143. About what;—about his evidence? No; I had it there.
9144. Since he gave you that statement, have you had a conversation with Robinson, any conversation with Robinson? No; not with regard to his evidence.
9145. Have you had any conversation with Robinson since he gave you the statement? Yes.
9146. How many? May be four or five here at the Court.
9147. When was the last;—did not you see him yesterday and talk to him? I did. We all generally go up to the tram, and generally have a conversation while on the way, all the police.
9148. I am not complaining about your doing it; I want the fact, but you seem to be afraid of the fact. How many times have you met him in Phillip-street in the last five or six weeks? If I have met him once in Phillip-street it is as much as I have.
9149. *Mr. Bull.*] Where is Phillip-street? The boundary of the constable's beat.
9150. *Mr. Abigail.*] Did you ever tell anybody else until to-day that Crosby had offered you £2? Yes.
9151. Whom? I have mentioned it several times.
9152. Can you tell me anybody? I believe I have mentioned it several times to Sergeant Vane, several times to Constable Robinson, and several times to Constable Edwards. Of course, I cannot take my memory back to everybody I told it to.
9153. Why did not you mention it yesterday? I was not finished in my examination.
9154. I cross-examined you yesterday, and then Mr. Lawless was put in the box? I cannot recollect it.
9155. Do you mean to say you cannot recollect the doings of yesterday afternoon? I have so much to recollect, I cannot think of everything.
9156. Do you really mean to answer my question in the way you have;—that you cannot recollect that you gave your evidence yesterday? I cross-examined you, and Inspector Lawless was afterwards called? I cannot recollect everything.
9157. Can you recollect that? I cannot recollect it.
9158. *His Worship.*] I think this is most irrelevant.
9159. *Mr. Abigail.*] It is to test his recollection.
9160. *His Worship.*] I can see nothing in it.
9161. *Mr. Abigail.*] I can see something material in it.
9162. *Mr. Bull.*] My friend says that Quelch has seen Robinson, and his object is plain, to rouse the suspicion in Your Worship's mind that when Robinson comes in he has been told what to say. How can that be, when Quelch swears that the fact is that I have had Robinson's statement in my hand for weeks. Here it is. I have had it in my hand, and probably my friend has had a look at it.
9163. *Mr. Abigail.*] I have not.
9164. *His Worship.*] You can ask Robinson.

Senior-
constable
W. E. Quelch.
18 Nov., 1897.

9165. *Mr. Abigail.*] Your Worship sees this, that if I can get this man to swear that he has not had a conversation with Robinson, and then, when Robinson goes into the box, can get him to swear that he has, it is a question then of who is the liar. It does seem that as soon as this man explains anything that is against him, you are satisfied.

[With reference to Mr. Abigail's last few questions in cross-examination of Senior-constable Quelch, at the request of Mr. Bull, the shorthand-writer stated that Mr. Abigail was mistaken in thinking that Inspector Lawless had been examined the previous day. At the conclusion of the examination of Senior-constable Quelch, Inspector Lawless was to have been called, but the adjournment intervened.]

Charge No. 12—*continued.*

Mrs. Annie Brown was recalled :—

Mrs.
Annie Brown.
18 Nov., 1897.

9166. *Mr. Bull.*] You have given evidence in this matter, Mrs. Brown? Yes.

9167. And you have sworn as a fact that Quelch made no improper overture to you? Not to me whatever.

9168. What you swore yesterday is absolutely true? So help my God.

9169. Did you tell Constable Christison or Constable Hill that at any time Quelch had made such an overture to you? I never did. I never spoke to Constable Hill. I only know him as a neighbour, bidding him the time of day.

9170. Did you ever make any such statement to either of the policemen? Never. I am not likely. The gentleman—I do not know his name—he has spoken to me several times.

9171. Is he the man that took you to Mr. Dacey? Mr. Hill and him. I know Mr. Hill on account of knowing him as a neighbour.

9172. And then the red-faced man is the other? Yes; that I do know, and spoke to him. He was in the yard the morning I was taken, and he has been trying to drive me and ask me all about the affair, but my shame would not allow me to tell anybody.

9173. He began to ask you questions that morning? No, sir; he was in the yard that morning, and he kept telling me that.

9174. Has he spoken to you since with regard to the circumstances of that morning—that red-faced man (Christison)? Oh, yes.

9175. In any one of these conversations, have you ever descended to the statement to him that Quelch on that morning, either on the way from Ryan's to the lock-up, or from the lock-up to your house, said this to you, or anything like it—? No, sir.

9176. *Mr. Abigail.*] You see you deny before you wait for Mr. Bull to put the question to you. You are primed up for it.

9177. *Mr. Bull.*] You will know in a minute whether she is primed up or not.

9178. *Mr. Abigail.*] She says "No" before you have put the question to her.

9179. *Mr. Bull.*] She has already said it. It has been sworn here that it was said to her—and this is my object in contradiction—it was said to her between the time she left the lock-up and the time she arrived at her residence, and in the other instance it was said that it took place between Ryan's place and the lock-up.

9180. *Mr. Abigail.*] I was endeavouring to object to this, and my voice, as usual, is drowned by the stentorian tones of my friend. Now I shall insist, with respect, upon receiving as much consideration as my friend here in making speeches. Your Worship remembers that when I try to speak my friend's voice is raised like a tornado, and I am talked out of Court.

9181. *His Worship.*] I think there has been quite sufficient on this particular matter.

9182. *Mr. Bull.*] I have a right to recall her, and ask whether the statements made by Christison and Hill are correct. I have asked her a general question, and then I choose to put the very words to her. *To the witness:* Either between the hotel and the lock-up, or between the lock-up and your house on that morning was anything of the sort said? No, sir, only Mr. Quelch told me that he was ashamed of me, and he was surprised at my being in such a locality. That is all that passed between us.

9183. *Mr. Abigail.*] And you do not wonder at any man being ashamed of you, do you, because you said here the other day that you were ashamed of yourself? I think I was.

9184. You do not wonder at this matter being the subject of police gossip? It is nothing against me; I was not charged with anything.

9185. You know it has been talked about? I do not know who by. I never heard it.

9186. Did you not say yourself, "I have had many a talk with the red-faced man about the affair"? No.

9187. *Mr. Bull.*] This witness has not said she has had frequent conversations with the red-faced man about it.

9188. *Mr. Abigail.*] Just attend to me, please. Did you not, just now, say, "I have had many a talk about the affair with Christison"? Not "Many a time"; I said, "Several times."

9189. At any rate, you will admit that you have talked about the affair? Not about the affair, only about Mr. Quelch; not concerning me at all.

9190. Was it about the "Salutation Hotel"? He tried to get out of me what he took me there for, and what I was charged with.

9191. And you told him? Certainly not.

9192. Will you be surprised to hear that he has sworn here in the box that you did? I have not, to anybody.

9193. Will you be surprised that Constable Hill has come in the box and sworn that you spoke to him about it? I have never had an interview and spoken to Hill about it, and I was in the house.

9194. Are you not making a mistake? No, I am not.

9195. And did you not tell Mr. Dacey;—did you not make a complaint to Mr. Dacey about Quelch's conduct? No.

9196. Did you not deliberately, yourself, complain to Mr. Dacey that he had taken you from the hotel to the station, and from the station to your house, and that he asked you and made this overture to you on the way? No; he (Mr. Dacey) never put any proper question to me.

9197. Did not you say to him that he (Quelch) had? I did not. Mr. Dacey wanted to know what he took me to the station for; he told me that he had never a right to take me to the station: and then he did not tell me the business that he came to my house for.

9198. Did you not give him the details? He only just asked me.

9199. To every question put to you by Mr. Dacey you answered? Well, nothing wrong.

9200. You answered the questions, did not you? He only came to me then for me to sign my name to some forms he had.

9201. Did you not tell him? He says, "You sign these, and I won't want you at all"; I said, "I want to know what I am signing, sir."

9202. Have you ever been articulated to a lawyer, because by the way you are trying to fence me, one would think that you had either been living with one for some time or articulated to him? Never, sir.

9203. I am asking you this deliberately and directly;—did you not tell Mr. Dacey that Quelch took you from the police station past his own house to your home? Yes, sir.

9204. Did not you further tell him this, that on the way he said to you, "Well; now you had better give me what you promised Ryan"? I never did, for I never promised Mr. Ryan anything.

9205. Did not you tell Mr. Dacey that? Never did. Mr. Ryan promised to bring me a bottle of schnapps to give me some schnapps.

Mrs.
Annie Brown.
18 Nov., 1897.

Charge No. 13—continued.

Constable F. Robinson was recalled:—

9206. *Mr. Bull.*] Your name is Frederick Robinson? Yes.

9207. Do you know Crosby, the young fellow who was here yesterday giving evidence? Yes.

9208. Do you know a young man named Marr who was called into the Court here for identification yesterday? I did not know him by name until he came on this Commission.

9209. Do you know the young man who was called here yesterday for identification? Yes.

9210. Is that Marr? Yes.

9211. Had you a conversation with Crosby, or did Crosby on some occasion speak to you in the street? Yes; he did.

9212. Can you say about when that was? Yes; I can tell exactly.

9213. When? On the 3rd of May at half-past 9.

9214. When, at night? At night, in Pitt-street, Waterloo.

9215. What transpired between you? I was working the beat, and Crosby came across the street to me and stopped me and said, "What about Saturday night, now?"; I did not know what he meant; I said, "What are you talking about?"; he said, "Is not your name Robinson?"; I said, "It is"; "Well, you are the man," he said; "Explain yourself," I said. He then went on to say something about himself and a girl in the park, a mixed up kind of statement. I did not know what he was talking about, and I said, "You are making a mistake, it is not I"; "Oh," he said, "Yes; your name is Robinson?" I said, "Yes"; just then I thought it would be serious if I got identified with it even although I could prove it was not I—still it is not pleasant to be mistaken in an event of the kind—so I asked him, "When was it?" He told me the time. He said, "It was some time after 11," as near as I can recall his very words. I then was able to prove a conclusive alibi to him. Just then coming in the light he looked at me and he said, "Well, now I see you are not the man; he was something like you, but he had a heavier moustache, and he had some kind of badge on his arm."

9216. A badge distinguishing him from an ordinary policeman? Yes. I said, "It is probably Senior-constable Quelch, then, you want, not me."

9217. Yes? He then asked me when he might expect a summons, as he had consulted a solicitor, who had assured him that he had a very good case.

9218. *Mr. Abigail.*] I ask that Crosby be allowed in Court. He is entitled to hear this.

9219. *Mr. Bull.*] I object.

9220. *His Worship.*] You can call him to rebut anything that you wish.

9221. *Mr. Bull.*] Yes? I told him that if he did not get the summons within two or three days he need not expect one, but that, taking into consideration everything, I said, "It is likely that you won't be summoned at all, as you assured me that the girl is not a prostitute." He then said that he would wait to see if he got the summons, but anyhow he would "set him a go," those are the very words he used.

9222. *Mr. Abigail.*] Yes; he was determined to defend it.

9223. *Mr. Bull.*] Go on? I replied to that, "All right, set him a go then; it has got nothing to do with me."

9224. At any time before this or subsequently, when he was apparently under the impression that you were the person, did he say something to you with regard to letting the matter drop? No.

9225. Was any mention made by him to you with regard to—

9226. *Mr. Abigail.*] I object to your leading.

9227. *Mr. Bull.*] I can put the question direct;—was any offer made to you by Crosby? No. Crosby made no offer.

9228. At any time in conversation with you did he make mention of any sum that it would be worth for the matter to be let drop? No. He did not say anything to me about money at all.

9229. Tell me, when was it Marr came to you? On the Saturday night, or rather it was Sunday morning, as it was a little after 12 o'clock.

9230. Was that before or after this conversation that you have been relating? Before. It was on the Sunday morning, on the 2nd of May.

9231. Did Marr make a statement to you? He did.

9232. Where was that? At the corner of Pitt and Raglan streets, Waterloo, about twenty minutes past 12.

9233. Did he mention any name?

9234. *Mr. Abigail.*] I object to that.

9235. *Mr. Bull.*] I am not asking him to narrate any one thing that he said.

9236. *Mr. Abigail.*] Is not mentioning the name narrating something said;—that is inadmissible for this reason, my friend admits from the peculiar form of his question that he could not get out of this witness the conversation that Marr said to him, but he admits that he wants to get out the most important part of the conversation; and that is, did Crosby say it to him?

9237. *Mr. Bull.* asked the witness to retire. He then said: yesterday I asked Crosby whether he had made an offer of £2 to anybody and he denied that. I said, "Did you at any time send a young man named Marr to make any such offer to either Quelch, Robinson, or any other policemen?" He said, "I did not." I then called Marr in and asked him would he swear that he did not as a fact authorise that person to go to either Robinson or Quelch to offer £2 to hush the matter up. He said he had done no such thing and, in fact, did not know the man whom I called before the Court. Now, I asked him distinctly as to conversations with Robinson, most of which he denied. Now, I purpose asking Robinson did Marr, when he came to him, mention a name as a person who had sent him to him (Robinson.)

9238.

Constable
F. Robinson.
18 Nov., 1897.

- Constable 9238. *Mr. Abigail.*] I object to it.
 F. Robinson. 9239. *Mr. Bull.*] I press it.
 18 Nov., 1897. 9240. *Mr. Abigail.*] I challenge you to call Marr. You know perfectly well that Marr cannot assist you.
 9241. *Mr. Bull.*] My friend may take it for granted that if he challenges me to call Marr I will not call him.
 9242. *Mr. Abigail.*] My friend knows very well that Marr cannot assist him and he is trying to sneak this in in this way. My friend has asked a direct question of Crosby and got a denial, and the question was, "Did you send Marr to Robinson," and the only way to trap Crosby is to call Marr.
 9243. *Mr. Bull.*] That is one way, and my friend wants to drive me to that when he challenges me to call Marr.
 9244. *His Worship.*] Marr should be called.
[The witness was recalled.]
 9245. *Mr. Bull.*] When Crosby was speaking to you about the incidents and circumstances of that night you used this expression, "confused," speaking of a statement which he had made of some circumstances referring to or relating to the Saturday night;—what was the expression you used? I do not know whether I used "confused," but it was a rambling kind of statement; I did not understand it, because I knew nothing about it.
 9246. In other words, he was speaking apparently in conundrums to you? Yes.
 9247. When he was speaking to you did he say that he was speaking on his own behalf or mention anybody else? Crosby said he was speaking about his own matter; but when he started speaking about the girl and himself in the park—I forgot to mention this before—it suddenly flashed across my mind—
 9248. *Mr. Abigail.*] I object to what flashed across your mind. Let us have the facts. We can only have what was said.
 9249. *Witness:* I said to Crosby, "Oh, are you the young man who sent the young fellow to me on Saturday night?"
 9250. *Mr. Abigail.*] You said that to him? Yes.
 9251. *His Worship.*] What did he say to that? He said, "No, I did not send anybody to you."
 9252. *Mr. Bull.*] There were only three people there, your Worship—Crosby, the girl, and Quelch. Quelch did not send him to Robinson.
 9253. *Mr. Abigail.*] Neither did my client.
 9254. *Mr. Bull.*] However, that is what you said to Crosby, "Are you the young fellow who sent a young fellow to me on Saturday night?" Yes.
 9255. To which he said, "No"? Yes.
 9256. Were you in the vicinity of this park on that night of the 1st May, Saturday? Yes.
 9257. Between what hours? I was there early in the evening. I was there at the very time this occurrence is alleged to have occurred.
 9258. What time would that be? Between 11 and 12.
 9259. Do you remember any particular circumstances which happened to yourself, or that you took part in? Yes.
 9260. What was that? At five minutes after 11 I was at the "George Hotel," and there was a push about there, and three or four women, and I had to arrest one of the push for "language," and I had a great deal of difficulty with him. He fought for a long while. However, at last I secured him, and he was taken to the station, and it was on my way back on to my beat that I met this young fellow.
 9261. After you had made this arrest, and before you came back, do you remember did you hear a whistle blown? Yes. The prisoner slipped his handcuffs—he had small hands,—and the push were round him and inciting him to escape, and I blew my whistle.
 9262. Now, how far would that be from the park? About 300 yards from the nearest portion of the park.
 9263. Did you see Quelch at all after you had locked this man up? Yes.
 9264. Where did you see him? At the station.
 9265. What time would that be? Somewhere about 12 o'clock.
 9266. Do you remember seeing Constable Connor? Yes.
 9267. When was that that you saw him? Twenty minutes past 12 a.m. on the 2nd of May.
 9268. What we would call the Saturday night? Yes.
 9269. A.m., meaning immediately after midnight? Yes.
 9270. Had you seen the young fellow just before then? While the young fellow was speaking to me I saw the constable come up on the other side.
 9271. A young fellow, not Crosby? Yes.
 9272. The young man who has been called here as "Marr"? Yes.
 9273. I do not ask you what that young fellow said;—did he do anything when he saw you on the Saturday night? He stopped me, and spoke to me.
 9274. After he had stopped you and had spoken to you?
 9275. *Mr. Abigail.*] I object to this, unless they can show before this, by calling Marr, some connection between Marr and Crosby. It is not admissible.
 9276. *Mr. Bull.*] I am asking him what he did, if he did anything.
 9277. *Mr. Abigail.*] My friend cannot get circuitously what he cannot get directly. My friend sees how manifestly unfair it is to bring in some attempt at bribery, some attempt to square somebody, when there is no connection between this young man and Crosby.
 9278. *His Worship.*] You had better let it rest at that.
 9279. *Mr. Bull.*] Was it on the Saturday night that you saw Crosby after you had locked one of the push up? No, the following Monday.
 9280. On the Monday night? Yes.
 9281. Where was it you saw him? In Pitt-street, Waterloo.
 9282. Near any particular place? No.
 9283. *Mr. Abigail.*] Was it near Parry's mills? Yes, in the vicinity.
 9284. *Mr. Bull.*] Do you know the "George Hotel"? Yes.
 9285. Is it anywhere near where you were? I saw him near there afterwards.
 9286. What time did you see him there? About an hour afterwards.
 9287. Was he sober? No; he was under the influence of drink.
 9288. This Crosby? Yes.
 9289. Had you a conversation with him then? Yes; I spoke a few words to him.

Constable
F. Robinson.
18 Nov., 1897.

9290. Tell us what passed between you then? I said to him, "Well, how are you getting on?" or something like that. He said, "I am going to let the matter drop now. My other girl heard of it, and she is performing on me."
9291. *Mr. Abigail.*] There is corroboration for you. Exactly what the other girl said yesterday that she did it for.
9292. *Mr. Bull.*] When was it you first knew his name was Crosby? On the night of the 3rd of May, in conversation with him, he told me that his name was Crosby.
9293. After the matter of Crosby sticking you up in the way you describe, did you mention the matter to any of the officers?
9294. *Mr. Abigail.*] I object to that. That is not evidence.
9295. *Mr. Bull.*] I press it.
9296. *His Worship.*] I do not see any objection to it.
9297. *Mr. Bull.*] Did you mention it to any officer? I mentioned it, but I do not know to whom.
9298. Was it one of your officers, or one of your fellow-policemen? I think it was one of the fellow-police. I think I spoke to several of them about it.
9299. *Mr. Abigail.*] Are you disinterested in this inquiry? Entirely.
9300. Are you really? Entirely.
9301. Do you think it is a disinterested thing to give a statement to Quelch of what your evidence will be if you are called? I sent it to Mr. Bull.
9302. Did Quelch ask you to do it? He did not.
9303. Well, how did you know that Mr. Bull was going to appear for Quelch? Everybody knew that.
9304. When did you send it? It was some time—well, about a couple of weeks ago—I could not tell you exactly.
9305. Was it before the Commission started? I think it was.
9306. That is more than a couple of weeks ago, and you are speaking from your recollection of things that transpired six months ago, and you have made a mistake in what occurred five weeks ago? I do not know.
9307. You are the man that makes shorthand notes;—did you make a shorthand note of this occurrence? Yes.
9308. Turn it up? I have got a note here of meeting with Senior-constable Quelch.
9309. Read it all out? "First meeting, some time in October, at the corner of Cleveland and Baptist Streets. I sent him word that I wanted to see him."
9310. You sent him word that you wanted to see him? Because he never came near me.
9311. You actually wanted to propitiate him, he being your senior-constable? No; I did not want to propitiate him.
9312. He is your senior-constable? He is.
9313. And if you want promotion you must secure his good offices—his good opinion? Promotion had nothing whatever to do with this.
9314. Oh, certainly not; not in your case;—just read out your note? That is all I have got. "At the corner of Redfern and Great Buckingham streets, by Exhibition."
9315. Were you in uniform on each occasion? Yes.
9316. On your beat? Yes.
9317. And you stood talking to him? Yes.
9318. You know that is an infringement of the rules? It is not an offence.
9319. You know that Inspector Lawless puts his foot down on anything like that—gossiping in the street? Not if you have a satisfactory reason for your gossiping.
9320. Is there any satisfactory reason for your interfering in this Quelch inquiry? I am not interfering.
9321. But you were. You see you actually sent for him? Yes.
9322. Go on reading? "The third meeting was in Wellington-street, about Wednesday, the 3rd instant"—that is, the 3rd of this month—"or, rather, a day or two before, as it was on that date that I gave Quelch my evidence, written out, to give to Mr. Bull."
9323. Now will you admit that you are a liar? No.
9324. Did you not distinctly swear to me the first thing before you looked up your little note-book, that you did not give Quelch a statement, and that you had given it to Mr. Bull; and did not I say, "How did you know Mr. Bull was going to appear for Quelch?" and you said everybody knew? I have a note here that I sent it to Mr. Bull.
9325. Did you not say you gave it to Mr. Quelch? Yes.
9326. You knew perfectly well what I asked you.
9327. *His Worship.*] Of course he gave it to Quelch.
9328. *Mr. Abigail.*] Why did not this mountain of truth admit it?
9329. *His Worship.*] The matter is not worth talking about or wasting time over.
9330. *Mr. Abigail.*] Have you got anything else in your note-book there? It was on the 3rd of this month that I sent this to Mr. Bull.
9331. Per Quelch? Yes.
9332. Go on; is there anything else? "On that occasion I met him in Pitt-street, at 7.5 p.m."
9333. Still on duty? Yes.
9334. Anything else? Yes, I have, "On no occasion did Quelch ask me what evidence I could give, and never even suggested that I should give any reply to any questions."
9335. Don't you think that is exceedingly clever? Did you have so little confidence in your own friend, whose case you were so interested in, that you actually sent for him and told him how you could assist him, that you actually thought it necessary to make a note of what he did not do as well as what he did do? He is no friend of mine.
9336. Why did you think it necessary to make a note of what he did not do? Because some were saying that Quelch was "readying me up."
9337. So that actually some of your own police officers were accusing you in that respect? No.
9338. They were saying that Quelch was "readying you up"—that was accusing both of you—that he was doing the "readying," and you were the tool in his hands? Yes.
9339. And that is why you made that note? Yes.
9340. Have you got anything else in this surprising cyclopædia? Yes, a lot of things here.

- Constable F. Robinson.
18 Nov., 1897.
9341. Anything touching Quelch? Yes, a lot. "11:30 a.m.—Saw Quelch, Spearman, Mr. Dacey, Mr. Lawless, and Mr. Commissioner Johnson in Cornwallis-street."
9342. You even made a note of that? Yes.
9343. Did you make a note of Crosby's speaking to you, and accusing you? Yes.
9344. Where is it? [*Witness produced a sheet of paper.*] But in the note-book I mean? I had not the note-book with me.
9345. Is that in shorthand? It is. "Third May, 9:30 p.m., was accused by Mr. Crosby."
9346. Pardon me, let me see it first, please. Give me again the date of the first entry in the shorthand note-book? I have got another book.
9347. But this is the shorthand note-book? I have another.
9348. I want to know about this one first? There is one date there—April.
9349. Last April? Yes, 29th of April.
9350. And the last entry? I write at both ends.
9351. From this end what is the earliest date? Those are private notes.
9352. These notes will refresh your memory? This is about a book I was going to get—"The Day After Death."
9353. What is the date of that? I cannot recollect the date that I went to the library for that book.
9354. Give me the date? Here is another private memo., Monday, 19th of July.
9355. I do not want private memos.? Monday, 19th of July.
9356. What year? 1897.
9357. On the first leaf it is April, 1897, and the last leaf it is July, 1897. I want to know how it was that you did not make a note of this occurrence in your note-book, and why you made it on a separate sheet of paper? Because I had not this note-book at the time. This is the one I had. [*Producing another note-book.*]
9358. Did you make any note in this book? Yes; it is filled up with notes.
9359. About this? No. About other occurrences.
9360. Why did not you make this note in one of the books which you had on you? Because I had not that book with me at the time, and the other book was filled up.
9361. Did you see Quelch yesterday? Yes.
9362. Did you have any conversation with him? Spoke about a dozen words to him.
9363. About this charge? No.
9364. Did not you refer to it at all? He could not stop.
9365. Did not you refer to it? No.
9366. He did? He did not. Indirectly he did.
9367. That is what I asked you. See how you fence me? He said, "I cannot stop. I am tracing their steps."
9368. That is all he said? Yes; that is all he said.
9369. Did you see him this morning about this case? I saw him in the Court shortly before 2 o'clock.
9370. Did you discuss it? No, I cannot say that I did.
9371. You tell me seriously you were not discussing this case? In a general manner.
9372. Make it suspicious by not answering? I do not want to make it suspicious.
9373. You yourself were mixed up with trouble with a woman? No.
9374. Was not a charge made against you at the station? No, never.
9375. Of an act of indecency? Never.
9376. Was not the woman afterwards sent for and interviewed by a police officer, and did not she refuse to identify you? I do not know anything about that.
9377. And did not she afterwards say, "Yes, it is Robinson"? I never heard anything about it until the present moment, and there is no truth in it.
9378. Is it not common talk in the Redfern Police Station? It is not. I never heard about it until the present moment.
9379. And never did? Never did.
9380. You will admit that you whistled on this night? Yes, I did.
9381. Can you tell me about what time you blew your whistle? Yes.
9382. About what time? About twenty past 11.
9383. How far were you away when you were arresting some members of the push that you referred to from that gate leading into Pitt-street? Three hundred and fifty yards.
9384. Was there much noise made when you were arresting this man? Yes; the push made a fair row.
9385. Could it be heard at that distance, do you think? I could not say.
9386. Do you know Miss Kerrigan? No.

Constable G. H. Edwards was recalled:—

- Constable G. H. Edwards.
18 Nov., 1897.
9387. *His Worship (to Mr. Bull).*] Won't you call Marr?
9388. *Mr. Bull.*] After my friend's challenge I am not going to call him.
9389. *Mr. Abigail.*] I say positively that there has been a conspiracy to make this poor lad Marr swear things that he will not as a truthful lad swear. I am prepared to show that the lad never did speak to this last witness, Robinson, as is sworn.
9390. *Mr. Bull.*] Do you know Crosby? Yes; I know him to pass the time of day to. He is not intimate with me.
9391. How long have you known him by the name of Crosby? Something under twelve months. I met him at a friend's house one night when I was out spending the evening.
9392. Have you had any conversation with Crosby with regard to some occurrence or circumstance on a Saturday night in the Waterloo Park? Yes.
9393. Can you tell us about when that conversation took place between you? It was either the following Sunday or the Sunday week, but I believe it was the following Sunday.
9394. Do you mean the day after it occurred? The day after it occurred.
9395. Or that day week? Yes; I would not be sure which, as to the date.
9396. Where was the conversation? In my bedroom.
9397. At your house then? Yes.

9398.

Constable
G. H.
Edwards.

9398. How was the conversation brought about? Well, he came to see me, and my wife opened the door to him and told him that I was asleep and did not wish to wake me. I was on night duty.

9399. *Mr. Abigail.*] Did you hear this or did your wife tell you? She told me.

9400. *Mr. Bull.*] He had said something to your wife in consequence of which your wife aroused you? Yes. 18 Nov., 1897.

9401. And having been aroused, you did see him? Yes.

9402. Was he brought by your wife up to the bedroom? Yes.

9403. Go on? I said, "Hullo, what's the matter?" or something. "Oh," he said, "I am in a bit of trouble." He said, "Who was on the Mount Carmel beat last night?" I said, "Robinson." I said, "Why, what's the matter?" "Oh," he said, "I was in the park with the girl and he followed the girl home, and I am afraid he is either going to summons the girl or myself, or both of us." I said, "Why? Why should he summons you?" "Well," he said, "I don't know whether he saw it," he said, "but he makes out that I had something to do with that girl in the park."

9404. This is what Crosby told you? Yes; this is the conversation. He said, "Do you think I can square him with a couple of pounds?" I said, "I don't know; I do not think he is that sort of man, but it is nothing to me; you may try if you like." And he said he would see Robinson, and I told him where he could be found.

9405. He left me then, and some few days afterwards I met him again, and he informed me that on making inquiries he found it was Quelch instead of Robinson; so he then tried to make out something to the effect that Quelch was trying to "square his nob" with the girl, and that he would show him up; and he said, "What would you advise me to do in order to show him up?" "Well," I said, "there are several ways." I did not believe it when he told me.

9406. *Mr. Abigail.*] Did you tell him so?

9407. *Mr. Bull.*] Did you tell him that you did believe it? No. He said, "What would you advise me to do to expose him?" I said, laughing, in a jocular way, "There are several modes of exposing it; for instance, there is *Truth*." I said, "You can go to *Truth* and expose it."

9408. *Mr. Abigail.*] You see it was not Brewin? He considered a bit and said, "I don't think I will bother about it; the girl is such a respectable girl, and it will give her such a showing up."

9409. *Mr. Bull.*] Do you remember seeing him shortly after that? The third time.

9410. Do you remember a conversation with him, when plainly by his conversation he was confusing one police officer with another—Robinson with Quelch? He must have done that on the first occasion.

9411. But he really was not talking about Quelch that night? No.

9412. When was it he spoke of getting even with Quelch? On the second occasion, when he found it was Quelch.

9413. The night that he said a man was trying to "square his nob" with the girl was he talking of Quelch? Yes, on the second occasion.

9414. *Mr. Abigail.*] You are not a disinterested witness in this case, are you? No.

9415. You are interested with Quelch? No; I am interested to tell the truth whichever party it is for or against.

9416. But you are interested? Only so far as I know of the statements made to me by Crosby.

9417. You gave Quelch a statement, did you not? No, I did not.

9418. Whom did you give it to? *Mr. Bull.*

9419. When? This morning.

9420. Only this morning? Yes.

9421. That was after giving evidence yesterday? No; I was not called yesterday.

9422. But you gave a statement to *Mr. Bull*—why did you not give him the statement yesterday? Because I did not think it was necessary; I did not expect to be called yesterday.

9423. Have not you been subpoenaed on the case? Yes.

9424. Were not you in attendance yesterday? Yes.

9425. You knew you were going to be called? Not yesterday, because I knew there were so many witnesses to be called.

9426. When did you write the statement out? I wrote it out this morning.

9427. Did you have a conversation with Quelch? No.

9428. Yesterday or last night? No. I had a conversation with nobody about it; I thought it out myself.

9429. Do you mean to say you invented it or recollected it? I recollected it as though it were yesterday.

9430. When did this conversation take place? I believe it was the 2nd of May.

9431. Do you remember the day of the week? It was on a Sunday morning.

9432. Have you seen Crosby since beyond his attendance here? No.

9433. You have never seen him since this conversation you had on the 2nd of May and the subsequent conversation? I have seen him casually once or twice.

9434. Have you spoken to him once? Not on this.

9435. You did not let him know whether you believed him or not, did you, when he was asking you the various ways by which a man could be exposed in this sort of thing? I did not say one way or the other, because he was, to a certain extent, a friend of mine.

9436. And he would be more or less inclined to be influenced from that fact? I could not say.

9437. He came to his friend for advice, and he thought his friend would advise him for his own good. You advised him to go to *Truth*; and would you be surprised to hear that that is what he did? Yes.

9438. Did you read it in *Truth*? I saw some account about it.

9439. Did you speak to Quelch about it? No.

9440. Did not you say to Quelch, "Oh, Crosby has come to me and I jocularly told him to go to *Truth*?" No.

9441. How is it Quelch comes to call you in this matter if he did not know? Because I was speaking to Robinson something about it at the time, and possibly he heard it from Robinson. I do not know where he heard it from myself.

9442. Were you on duty that night—the 1st of May? Yes.

9443. Were you near the park? I do not think I was in the vicinity of the park at all.

9444. Do you know that Robinson keeps shorthand notes? I heard he did.

9445. A couple of days ago? Longer than that.

9446. Both you and Robinson are subordinate constables? Yes.

9447.

- Constable G. H. Edwards.
18 Nov., 1897.
9447. And Quelch is your senior-constable? Yes.
9448. You are under him? Yes.
9449. And naturally you do the best you can for him? No, not necessarily.
9450. You want to do what you can for him? No, not necessarily.
9451. You think it wise, do not you? No, not necessarily.
9452. Is it not a fact that you have gone out of your way to assist Quelch in the hope of your getting promotion? No.
9453. Because you want to be on good terms with him? No; that never entered my head.
9454. I want the rough occurrence book for the 7th of May.
9455. If a larrikin had been arrested on the night of the 1st of May, would a report of that be entered up in the rough occurrence book? No; I think not.
9456. Where would it be entered? In the charge book.
9457. I want to put in the charge book, page 67, dated Saturday, 1st May, showing that one James Day was charged at 11:55 p.m. at the station by Robinson with being drunk and disorderly, &c. I put that in to prove the time. [*Exhibit No. 38*].

Mr. Louis Crosby, driver, was recalled:—

- L. Crosby.
18 Nov., 1897.
9458. You know Constable Edwards? Yes.
9459. He was a friend of yours, was he not? Not altogether a friend.
9460. You met him out some evening? Yes.
9461. And after this Saturday night episode you went round to his place? Yes.
9462. For advice? Yes.
9463. Did you say this to him—I may tell you that he swears you did:—"I do not know whether he,"—meaning Quelch—"saw it or not, but he makes out I had something to do with the girl in the park." Did you say that? No; I did not.
9464. What did you go round to him for? To ask who was the policeman on that beat.
9465. As a matter of fact, did he advise you to send in a report to the *Truth*? He never spoke to me about it.
9466. Do you know Robinson? Yes; through accosting him on the street.
9467. You say you do know Constable Robinson, and you spoke to him thinking him to be the man who had stopped you on the Saturday night? Yes; I did not know him then, but I have spoken to him since.
9468. Did you say to him, "When may I expect a summons, as I have consulted a solicitor"? No.
9469. Had you consulted a solicitor? No.
9470. Is that statement deliberately untrue? It is, altogether.
9471. Did he say to you, "You will probably not get a summons, so why expect it"? No.
9472. Did you say, "Oh, well, if it does come, I will set him a go"? No.
9473. Do you know what that means, even? Well, I can come to a conclusion what it means.
9474. What do you think it is? Perhaps I would have as good a chance as he.
9475. Is it a phrase that you use? No.
9476. Have you ever used the phrase? Not to my knowledge.
9477. As a matter of fact, did you use that, or anything like it, to Robinson? No.
9478. But you swear that if Robinson says so it is a deliberate untruth? A deliberate lie—yes.
9479. Now, did you see Robinson about an hour after that at the "George Hotel," and have a further conversation with him? When?
9480. On the Monday night about 10 o'clock? I believe I did see Robinson on the Monday night.
9481. Were you under the influence of liquor? No.
9482. Were you ever under the influence of liquor? No.
9483. You are not a teetotaller? No; I am not a teetotallar, but I was never drunk.
9484. Do you swear that on the night of the 3rd of May you were not under the influence of liquor? I do.
9485. Is there any ground for this insinuation on the part of Robinson? No.
9486. I forgot to ask you yesterday how far was Quelch away from you when you saw him first? About 25 or 30 yards.
9487. Was he walking towards you or running? Running.
9488. Was it the noise of the running that attracted your attention? The noise attracted my attention—yes.
9489. Did you actually get to the gate, just inside the gate, the inside part of the gate, when he caught up to you? We might have been a pace or two off it.
9490. Is it a fact that you were lying down?
9491. *Mr. Bull.*] We have gone through this.
9492. *His Worship.*] We cannot have all this again.
9493. *Mr. Abigail.*] Quelch swears that he was down on the third terrace in the dark. I insist upon asking him. It is only fair to this man and fair to my case that I should ask this man.
9494. *His Worship.*] Go on.
9495. *Mr. Abigail.*] Is it a fact that you were lying down by the side of a plantation in the dark on top of this unfortunate little girl? No.
9496. Is it a fact that you were so in that position, and near a plantation, when Quelch came up to you? No.
9497. And that you were actually in the act of getting away from the girl when he came up to you? No.
9498. Is there a word of truth in that? No, not a word.
9499. As a matter of fact, if you had been there, from where you first saw Quelch, could he have seen you in the dark? It is impossible.
9500. *Mr. Bull.*] Has Mr. Dacey spoken to you during the last hour? I asked him—
9501. Kindly answer my question? Yes.
9502. What did he say to you? I asked him if I would be wanted any more.
9503. Is not this the fact, that Mr. Dacey left the hall here and went out and spoke to you on the outside there, and went out in the yard and spoke to you? No; I detained him when he was walking past me.
9504. What did you say to him? I asked him if I would be wanted any more this afternoon, and he said "I will see."
9505. *Mr. Abigail.*] Mr. Dacey came and asked me, and I said "Yes."
9506. *Mr. Bull.*] I suppose it was the noise which Quelch made upon the foot-paths which attracted your attention? Oh, no, you can make a noise on the grass as well as on the foot-paths. 9507.

L. Crosby.
18 Nov., 1897.

9507. What grass do you say he made a noise on? The grass in the park.
 9508. Not on the foot-paths at all? No, not on the foot-paths at all.
 9509. Did you say yesterday that he made a noise running on the asphalt? No, I did not.
 9510. Have you been out to the park this morning? No, I have not.
 9511. You have not been out to see whether there is any asphalt in the place? No, I have not.
 9512. Do you still persist in swearing that you were sitting upon a seat upon the second flat? I do.
 9513. Now, how far did you say that seat was from the gate out of which you came? It may have been a little over a chain.
 9514. That is only 20 yards? Twenty-two yards.
 9515. Would you be surprised to know that it has been measured—the actual distance to the seat—and it is 50 yards? I would.
 9516. Would you be surprised to know that Quelch made an examination of that very park, and there is no seat on that second flat? There is a seat on the second flat.
 9517. There was then? Yes, and there is now.
 9518. And it has been moved? Oh, no.
 9519. Do you suggest that there was one then and it has been taken away since if it is not there now? I do not say it is not there now.
 9520. Quelch says there is no such thing as a seat upon the second flat of the terrace? I say there is.
 9521. How often have you been in that park lately;—when were you there last? I have never been there since.
 9522. Do you remember what you swore yesterday? Yes, I do.
 9523. Look at this and tell me whose writing this is? I do not know.
 9524. What? I do not know.
 9525. Now you do know? I do not know.
 9526. You may as well tell the truth about it? I do not know.
 9527. Did not you yesterday say a complaint had been made in the name of Willoughby, but that was a fictitious name? Yes.
 9528. Did you notice this, as in the name of Willoughby? No, I did not.
 9529. You never took the trouble to look? No.
 9530. Can you tell us the name adopted in this complaint you sent in? Crosby.
 9531. The name of the girl Willoughby;—what Christian name? It is an assumed name.
 9532. What Christian name, in fiction, did you assume or add to this name “Willoughby”? I did not add any name. I did not write it myself.
 9533. Who told you that the fictitious name of Willoughby had been used? I do not know who it was told me.
 9534. You do know? I do not know.
 9535. Did not you use this expression, “I do not know. I did not write it myself”? Yes.
 9536. Do you not know that that is an anonymous letter? I do.
 9537. When did you first know that? About a week after the occurrence happened.
 9538. And the date is the 17th of May on this letter, so you are a little out in your dates;—when first did you see this letter? I never saw it in my life.
 9539. When first? Just this minute.
 9540. Did not you know it was going to be written? I did.
 9541. *Mr. Abigail.*] He swore that yesterday.
 9542. *Mr. Bull.*] Who did you hear was going to write it? My own sister.
 9543. Is not that your sister’s handwriting disguised? No, it is not.
 9544. Whose is it? I do not know.
 9545. Now, tell the truth about it? I do not know.
 9546. I will get it from you in a minute? You may.
 9547. Did your sister work at this place—Kahla’s? No, not this one.
 9548. One did? Yes.
 9549. What was her name? Rosina.
 9550. Where is Rosina now? At Tumberumba.
 9551. Is she in business there? Yes.
 9552. What business? Drapery.
 9553. Did Mr. Kahla then move from Regent-street to Tumberumba? Yes.
 9554. Is she married or single? Single.
 9555. Is she known there as Miss Crosby? Yes.
 9556. Do you know anybody of the name of Blatcher? No, I do not.
 9557. You do not know anybody who has assumed that name? I know the name of Blacker.
 9558. Who is that? A sister of mine.
 9559. Married? Yes.
 9560. Her married name is Blacker? Yes.
 9561. Well, you say that neither your married sister, Mrs. Blacker, nor Rosina wrote this? I will.
 9562. How did you come to know, a week after this letter was written, that it had been written? It was to be written.
 9563. Who told you that? I told myself.
 9564. Don’t you see, you cannot tell yourself anything. You cannot have a conversation with yourself. I am asking you simply, when did you first know this letter was to be written;—when did you make up your mind that it should be written? About a week after the occurrence.
 9565. Whom did you ask to write it? My own sister.
 9566. Which was that? Tillie.
 9567. Tillie told you, or you asked Tillie to write it? Yes.
 9568. Then Tillie did not write it? No.
 9569. She got somebody else? I do not know who she got to write it.
 9570. I have not asked you that yet. Did Tillie tell you she was going to get somebody to write the letter;—did she tell you whom she was going to get? She told me she was going to write it herself.
 9571. Which is true? She told me she was going to write it herself.
 9572. Did she write it herself? No.
 9573. Whom did she get? I do not know.

- L. Crosby.
18 Nov., 1897.
9574. Do you stand in that box there on your oath and tell this Commission that you do not know whom your sister got to write this letter? I do.
9575. And your sister has not told you? No.
9576. Not until to-day? Never; and she is not likely to tell me now.
9577. Why? Because she is dead.
9578. Did she never tell you? No.
9579. And she really died without disclosing the authorship of this letter? She did.
9580. Did you ever write a letter to the Superintendent? No.
9581. Was not the anonymous letter signed "Mary Willoughby" the letter upon which you acted? Yes.
9582. And do you mean to tell this gentleman that you acted upon a letter that you had never seen, and did not know the contents of? I knew the contents of it, that it was the same as the evidence I have given.
9583. Did you first draft it yourself? I did.
9584. Then the words and the language in this letter are yours copied by somebody else? I will hear it first, and tell you afterwards.
9585. You know there is only one anonymous letter? Yes.
9586. You are very careful to know what is in it before you answer it? No.
9587. You heard Mr. Abigail read it yesterday;—was that letter which he read to you yesterday the one which you drafted? I do not remember him reading one yesterday.
9588. Is that, so far, your recollection; that you do not know what took place yesterday? I do not remember the letter being read. I remember it being produced, but I do not remember its being read.
9589. Where was the letter written from;—where were you living? I was living in Redfern.
9590. Where was Rosina living? In Pitt-street.
9591. Where was Miss Willoughby supposed to be living? Anywhere you like.
9592. And you fixed her in Balmain? Yes.
9593. Will you give me the date of your sister's death? The 18th or 20th of May, the 20th, I think.
9594. Then, as a fact, she died a day or two after this letter was written? She did.
9595. Have you the draft of this letter? No.
9596. Whom did you give it to? To my sister.
9597. Well, now, will you say now that you never saw this letter before it was signed? I will.
9598. And will you also say that notwithstanding you drafted a letter to be sent, and you gave it to your sister Tillie, and she gave it to somebody else, that she never did tell you before she died whom she gave that letter to, and you do not know who wrote it? I will.
9599. I suppose you know there is a certain consequence writing some letters? I do.
9600. Well, you have given us an elaborate account, have you not, of what you say took place on that night when you and Miss Kerrigan were present? I did.
9601. And you have described as vividly as you can all you saw and heard said by Quelch up till the time that you parted company? Yes.
9602. And you heard no offensive remark made use of by Quelch to the girl from beginning to end? No.
9603. Nor did you hear any insulting remark he made use of? No.
9604. Nor did you hear anything criminal suggested by Quelch to the girl? There was no conversation between Quelch and the girl while I was with them.
9605. "Dear Sir, the following case will, I think, be most fairly and best dealt with by you." This was addressed to the Superintendent. You know that, don't you? Yes.
9606. "Some want me to send it to *Truth*"? Yes.
9607. "But I have too much respect for the Police Department to do that. On Saturday night, the 1st of May, at a quarter past 11, a young man and most respectable girl had been in the Waterloo Park a hundred yards from the young lady's residence, when a constable came up and made insulting remarks, took their names, and threatened to summons them for indecent behaviour. He tried to persuade the young lady to go for a walk with him, and he would not summons her. Inquire fully into this matter, and you will find most dastardly conduct by the constable, almost criminal. You, doubtless, know what constable would be on duty at that time. The name of the young man spoken of is L. Crosby, c/o. Kahla, draper, Regent-street, Redfern. He, probably, will give you particulars, though she does not want to be mixed in anything of the sort for reasons easily understood. Yours, respectfully, Mary Willoughby." [*Exhibit No. 36, Part a.*] Is that the letter you drafted? A portion of it is.
9608. They did not adhere to your draft then? No, that is not what I have given them.
9609. I would like you to produce that draft if you can? I cannot.
9610. That is a little different statement to the one you have made on oath? Yes.
9611. It is a bit "strong";—you know what that means? Yes.
9612. *Mr. Abigail.*] It is fuller; more detail.
9613. *Mr. Bull.*] You have already answered me by saying that in your presence the policeman never made use of insulting language to the girl. "A constable came up and made insulting remarks."
9614. *Mr. Abigail.*] "Have you finished?" That is insulting.
9615. *Mr. Bull.*] What did you do with that draft? I wrote a letter, and gave it to my sister to copy.
9616. Your sister heard none of these circumstances except what she may have heard in conversation with you? That is all.
9617. The person whom your sister deputed to write this letter could have only known what your sister said? That may be.
9618. Do you tell His Worship that that is the letter that you sent or caused to be sent to the Superintendent of Police with regard to Quelch;—was there any other letter, fictitious or otherwise? There was only the one letter.
9619. Now, speaking of Edwards, how many times have you met Edwards, the police officer, of an evening, for instance? Well, that I could not say. I have often seen him when he was on duty.
9620. I am asking you how often you may have met him of an evening? I never spent an evening with him in my life.
9621. Were you in the habit of speaking to him when on night duty? I am always at work myself until 9 at night.
9622. You see, you go in for a little diversion after 9, if it is only for a walk in the park. But Edwards tells us you went to his place on the Sunday morning;—is that true? Yes.

9623. Do you remember speaking to Mrs. Edwards, and her telling you that he was in bed? Yes.
9624. Do you remember that she called him up, and then showed you upstairs into his bedroom? Yes.
9625. You had a conversation there certainly with regard to what took place the night before? Yes.
9626. At the time did you know what the name of the constable was? No.
9627. So that his statement that you were then speaking of the man as if he were Robinson is also true? He told me that the constable would be Robinson.
9628. You asked who was on a certain beat, and the information he gave you was, that the man Robinson would be on at a certain time? Yes.
9629. Do you remember my asking you some questions, I think yesterday, about a lad that I called in here? Yes.
9630. I may tell you that Edwards has sworn here that you spoke about money—spoke of the sum of £2 to him.
- Mr. Abigail:* Edwards never did.
9631. *Mr. Bull.*] If Edwards did say that you did speak about a sum of £2, is that true? No.
9632. Did you tell Edwards that she was a respectable girl, and that she did not want to be mixed up in it? Yes.
9633. Do you not notice that in your draft letter you have used exactly the same expression. I will fix you with the draft letter directly;—do not you see that you have used exactly the same expression in that draft letter? I say she is a respectable girl, and she is a respectable girl.
9634. Did you say that to Edwards, and that you did not want her to be mixed up in this trouble? No.
9635. And yet you admit that in this draft that you gave your sister to send in this anonymous way, you used this expression, "Though she does not want to be mixed up in anything of the sort for reasons easily understood," that was her respectability of course? Yes.
9636. How long were you with Edwards up in the bedroom? We might have been ten minutes or a quarter of an hour.
9637. I suppose you really went to Edwards to find out who the policeman was? I did.
9638. Did you speak to Robinson at any time with regard to whether a summons was likely to be issued against you, or both of you? I did not. I had another conversation with Edwards at another time in Regent-street, opposite the shop. He asked me, in Regent-street, in front of the shop, was there any chance for a "meet" with the girl.
9639. *Mr. Abigail.*] That is to meet her? Yes. I told him then that she was a respectable girl, and that is the only other conversation I had with Edwards.
9640. *Mr. Bull.*] You were actually at Edwards' house;—you know he is a married man, with some family? Yes.
9641. Have you ever mentioned this to anybody in your life before? No.
9642. Have you ever breathed it to a soul before this minute? No.
9643. *Mr. Abigail.*] It would not be a thing you would? No.
9644. *Mr. Bull.*] Would it not be a thing he would do when he was making accusations against the police all round?
9645. *Mr. Abigail.*] To sum it all up, you still make the same accusation you made before on oath? I do.
9646. *Mr. Bull.*] I ask permission to recall Edwards, for his own sake?
9647. *His Worship.*] I do not think it is necessary to recall Edwards. It is only prolonging the matter.
9648. *Mr. Bull.*] I do ask you to allow me to call this witness in his own behalf.
9649. *His Worship.*] Very well.

Constable G. H. Edwards was recalled:—

9650. *Mr. Bull.*] You did have a conversation with Crosbie that you have related on the Sunday in your house? Yes.
9651. The witness says that one night after that, in Regent-street, outside Kahla's shop, he spoke to you, and you said to him outside the shop, "Is there a chance of a meet with that girl"? Yes, I did. I will tell you why; I was fishing to try and find out what sort of a character the girl was.
9652. You say you had an object—you wanted to find out the girl's character? Yes.
9653. Had you anything in your mind with regard to a collusion or collision with this girl? No; I might appear to have.
9654. You are a married man? Yes.
9655. How long have you been married? Three and a half years.
9656. Have you any family? No.
9657. *Mr. Abigail.*] Did you think it a part of your duty to make an insinuation like that against that poor, unfortunate girl's character? No.
9658. You said you did just now? I just wanted to know what sort of a girl she was.
9659. You know nothing about her? No; I do not.
9660. Did not you tell him this, "not to let on to her—"? No; I did not.
9661. What, now what? I did not tell him not to let anything on to her.
9662. You anticipate, too;—did you say this—now kindly wait until I complete the question—"Don't let on to her that I am a married man"? No; I did not.
9663. Never said anything to that effect, or "that I have got a wife"? No.
9664. And you were only fishing to see what sort of a girl she was? Yes; I knew nothing against the girl.
9665. How did it interest you? For self-satisfaction, that's all.
9666. Are you in the habit of finding out the character of other people in Redfern? I like to find out as far as I can. I believe that is part of my duty.
9667. Was not your object this, to fish for Quelch, knowing full well if you caught anything for him it would be remembered by your senior-constable? No; I never spoke to Quelch about it at the time.
9668. Was it not your object to get on good terms, not only with Quelch, but with the Inspector, who is on such good terms with Quelch? No; that never entered my head at all.
9669. Do you not know that the nearest way to promotion is to propitiate the senior-constables who are friendly with the Inspector? No; I was not aware of that.
9670. And was not your object to propitiate Quelch because you knew that you would please Mr. Lawless as well as Quelch, and earn your promotion? No; the thought never entered my head.
9671. Have you a wife of your own? Yes.

L. Crosby.
18 Nov., 1897.

Constable
G. H.
Edwards.
18 Nov., 1897.

9672.

- Constable G. H. Edwards.
18 Nov., 1897.
9672. What would you think about a constable making inquiries about your own wife? They have.
9673. Has it pleased you? No; it has not.
9674. Do you think it is a proper thing to do? No.
9675. Then why did you do it with a young lady 18 years of age against whom there was not a breath of suspicion? To find out her character. It is a part of my duty as a constable, as far as I can, to find out the characters of the residents of the district.
9676. Have you made inquiries about other young ladies 18 years of age? I have made inquiries about various people.
9677. Give me an instance of one young lady whose character you have investigated? Larrikinesses, that's all.
9678. A respectable lady? I might have done so without knowing it.
9679. Will you swear that you have made such an inquiry in any case before? I do not remember. I might have done it and I might not.
9680. You are not likely to do it again, are you? Do what?
9681. To make a similar inquiry? I might inquire about anybody; I think I would.
9682. *Mr. Bull.*] You know these rules which were issued by the Police Department, in October, 1895: "The police should never lose an opportunity of enlarging their acquaintance with persons of all classes—they should ascertain who people are that they see, their occupations, &c. This, however, should be done judiciously, so as to give no cause for offence." So far is this rule carried out that is it not a fact that an officer of the police cannot marry until inquiry is made into the very character of the woman he is to marry? Yes.
9683. And has she to be reported upon by an officer of police before you can get your superior officer's consent to marry? Yes.
9684. And this very inquiry was made in your own wife's case? Yes.
9685. *Mr. Abigail.*] *Mr. Bull* did not read this all. "Although the prevention of crime primarily demands the attention of the police, yet it devolves upon all members of the police to make inquiries and take action, when an offence has been committed, to bring the offender to justice. This duty calls for prompt and energetic action, and frequently demands astuteness, patience, and persistent effort." You had nothing whatever to do with any offender, had you, when you were making inquiries? No; but I heard of an offence.
9686. You did not. There was no charge laid against either of these young people? No.

Charge No. 14.

"Appropriation of Government money in connection with one O'Donnell."

Mr. Abigail.] I want the form of application for summons, dated 5th November, 1892.

Senior-constable W. E. Quelch.] There is not one.

Mr. Abigail.] I want the information book for the 5th November, 1892.

Senior-sergeant Robert Bell was recalled:—

- Senior-sergeant Robert Bell.
18 Nov., 1897.
9687. *Mr. Abigail.*] Do you look upon the information book, page 89 [*Exhibit 39*], and do you see an entry on the 5th November, 1892, by Senior-constable Quelch to this effect:—"George O'Donnell, 100, Pitt-street, Redfern; keeping a dog which did attack Constable W. E. Quelch in Turner-street, Redfern, 5.45 p.m., 5/11/92"? Yes.
9688. *Mr. Bull.*] Whose handwriting is that entry? Constable Kidd's.
9689. *Mr. Abigail.*] It is signed "Quelch"? Yes.
9690. It would not be there unless Quelch told Kidd? No; it would not.
9691. *His Worship.*] Was it signed by Quelch himself? Yes.
9692. *Mr. Bull.*] There is no dispute about the signature.
9693. *Mr. Abigail.*] Why was that put in the information book, Mr. Bell—can you tell me? I should think it was put there for the purpose of issuing a summons.
9694. Just tell his Worship what would be the process;—would the constable complaining then get one of these application for summons forms? There would be a slip like that made out. [*Exhibit 40.*]
9695. And would it have the details put in? Exactly what is there.
9696. And then would it be signed here by the officer applying for the summons, or the Inspector? It would be signed by the officer-in-charge.
9697. Based upon the complaint in the information book by the constable? Yes.
9698. And then would it go to the Superintendent's office? Yes, and it would be signed by the Superintendent.
9699. And then sent back? Yes, and the summons would be made out.
9700. *Mr. Bull.*] That is the ordinary course? Yes.
9701. *Mr. Abigail.*] Unless this alleged offence was that O'Donnell was charged with keeping a dog which did attack the constable while on duty, it would not be put in there, would it? I should think not.
9702. And he would not be likely to be on duty unless he had the uniform trousers on? Of course, I do not know.
9703. Did you ever know a senior-constable to be on duty with private clothes on, with part uniform and part plain clothes? No; unless, of course, he was a plain-clothes constable.
9704. Do you know anything about this case of O'Donnell's yourself? No further than this, that I think it was in 1893, I am not sure of the month, and I am not quite sure even whether it was 1893 or not, I was ordered by Mr. Lawless to interview Mr. O'Donnell. I interviewed him about the dog tearing Senior-constable Quelch's trousers, and Mr. O'Donnell's remarks to me were that he had compensated Quelch for the trousers, and that as it was so long since the affair occurred he did not wish to have anything more to do in the matter.
9705. Anything else? I then informed Mr. Lawless what Mr. O'Donnell had stated.
9706. You asked O'Donnell to give you a written statement? No.
9707. *His Worship.*] Do you know anything about the reason why the summons was not issued? I do not.
9708. *Mr. Abigail.*] I suppose that rests to a certain extent in the hands of the Inspector? In the hands of the Inspector.
9709.

Senior-
sergeant
Robert Bell.

18 Nov., 1897.

9709. Is it an unusual or an usual thing in your experience for a constable to compromise a matter of this kind where his uniform has been destroyed? Well, it is an unusual thing, I should think.

9710. You never knew of a case before, did you? No, I did not.

9711. *His Worship.*] Would not the Inspector know from that entry that there ought to be a summons? Yes, he ought to know.

9712. *Mr. Abigail.*] Would Mr. Lawless or you if it had come under your official jurisdiction;—if either of you had been told that these trousers were not official trousers, but private trousers, would you have torn the summons slip up? That rests with Mr. Lawless.

9713. In all probability he would? Most likely.

9714. Assuming these trousers to have been uniform trousers, and assuming that the dog did attack Quelch and tear the trousers, and assuming then that O'Donnell paid some money for these uniform trousers so damaged, would it not have been Quelch's duty to account for the money to his superior officer? Yes.

9715. *Mr. Bull.*] There is no doubt in the world.

9716. *Mr. Abigail.*] Can you tell me the uniform used on the 5th November, 1892? I do not know.

9717. Is there any uniform book to show what uniform should be used? No.

9718. There is a general order about that? Yes; there is a general order about wearing white summer clothing and winter clothing.

9719. *His Worship.*] Men are employed sometimes in plain clothes? Yes.

9720. Are you prepared to say that Quelch should have been in uniform at that time? I could not say.

9721. *Mr. Abigail.*] Do you know that some questions were asked in the House about this matter by Mr. Black? Yes; I believe there were some questions.

9722. Do you know that there was considerable merriment at the station at the manner in which the questions had been put—the peculiar form? I could not say anything about that.

9723. Do you think you could remember that if you could refresh your memory by looking at the questions? The only thing I know of it was that there was some mention made of it in the House by one of the Members of Parliament, and shortly after that Mr. Lawless instructed me to interview Mr. O'Donnell.

9724. This is how the question was asked in the House:—"Is it a fact that this officer, having summoned the owner of a dog which tore his uniform, withdrew the charge on receiving compensation, which he pocketed, for the damage done." Do you remember now whether there was not some merriment made over the fact that it was assumed that Quelch had actually gone to the extent of summoning the owner of the dog, although he had not? I do not know.

9725. And this is the way it is answered: "The constable had his trousers torn by a dog, the owner of which paid 18s. 6d. for the damage. There was no summons."

9726. Do you remember that the form of the question and the peculiar form of the answer caused merriment in the station? I do not; but I think there was some talk about it.

9727. Do you remember that it was also talked about in this way: That advantage had been taken of the peculiar form in which the question had been asked.

9728. *Mr. Bull.*] I object to this. How can the tittle tattle of a number of men in the station be evidence?

9729. *Mr. Abigail.*] You say you think there was some merriment? Yes; I think there was some merriment.

9730. *Mr. Bull.*] Is it admitted that no summons was ever made out?

9731. *Mr. Abigail.*] Certainly; a summons was applied for, but we say the summons slip was torn up; we say the constable had on uniform trousers and the dog rushed out and bit him, and that he immediately went to the station, and laid a complaint, and entered up the complaint in the information book in the ordinary way, and then, following the ordinary procedure, a slip was made out, and the nature of the charge entered in as usual, and sent on to the Superintendent's office. It came back, and in the ordinary course of things it ought to have been initialled by Mr. Lawless, and sent to the Clerk of Petty Sessions. Then we say that Quelch made a communication to the Inspector of some kind, and induced him to withdraw this. He did not tell the Inspector, as we say he ought to, that he was wearing uniform and not private trousers. Then, if we prove that, we say that that is misappropriation of public money.

9732. *Senior-constable Quelch.*] I will admit I was in uniform.

9733. *His Worship.*] If they were white trousers they would be his own.

9734. *Mr. Abigail.*] We do not say they were white trousers, we say they were blue trousers. We say he was coming on at 6 o'clock to do night duty. He would not be in white trousers at night-time.

9735. *His Worship.*] At what hour did this tearing of the trousers take place?

9736. *Mr. Abigail.*] 6.45 p.m. in the information book.

9737. *Mr. Bull.*] Quelch tells me that he was on duty that night from 7 to 3, and that the trousers were torn between 6.30 and a quarter to 7.

9738. *Mr. Abigail.*] Is there a report about this? I call for Mr. Lawless' report and Quelch's report.

9739. *Mr. Bull.*] Quelch says there has been no other report since the questions were asked.

Inspector Edmund Lawless was recalled:—

9740. *Mr. Abigail.*] What was the uniform of the police officers on the 5th November, 1892? Similar to what it is now.

9741. Supposing a man was going on night duty at 6? A jumper and pair of trousers and a helmet.

9742. Is that a dark blue suit? Yes.

9743. He would not be wearing this white pique stuff? White drill; not coming on at 6 o'clock.

9744. If will you pardon the apparent tautology, it would be a uniform uniform;—the uniform would be the same all through? Yes.

9745. Do you remember Quelch making any complaint to you, or did he make any complaint to you about O'Donnell's dog attacking him and tearing some trousers? I cannot remember. I remember making some inquiry afterwards. There is a report, I think, that I sent in on that subject.

9746. As a matter of fact, was any money paid in by Quelch in respect of this alleged damaged pair of trousers? Not to me.

9747. You would know about it if it had been paid in? Oh, of course, I would have to report it and forward it.

9748. And you never did as a fact so report it? No.

9749. If he, being on duty, or coming on to duty, had been attacked by a dog and his uniform trousers torn and damaged, it would have been his duty, would it not, if he had got compensation for that, to have so reported it and to have paid the money in? Certainly.

Inspector
E. Lawless.

18 Nov., 1897.

9750.

- Inspector E. Lawless. 18 Nov., 1897.
9750. Because, although worn by the constable, the trousers are Government property until the year has expired? Of course, I cannot tell you what trousers he wore. If he wore uniform trousers, of course they would be the property of the Government.
9751. Can you tell me whether it was on a special date, on the 5th November, 1892? I could not without consulting the books.
9752. Would the duty book show that? It ought to; I could not say.
9753. If he were on ordinary duty would he be ordinarily attired? Yes.
9754. Did you ever ask him to produce to you the trousers, or did he ever offer to produce them? That I cannot remember.
9755. *His Worship.*] Do you remember whether an application for a summons was ever made to you? I cannot remember. If there was it was never forwarded.
9756. Do you recollect allowing him to withdraw any charge of that nature? No; I have no recollection of that. He may have done so. I could not tell you now, unless there was something very special to recall it to my mind.
9757. *Mr. Abigail.*] This is your information book? Yes.
9758. Do you see the entry on page 89 of this information book, "George O'Donnell. Keeping a dog which did attack Constable W. E. Quelch, in Turner-street, Redfern." Unless the constable had been on duty that entry would not have been made in that information book. It is made there for the purpose of issuing a summons? Unless he had some object. If he intended to prosecute then it would; if he did not intend to prosecute it would not.
9759. Prosecutions are based on the entries in the book? Yes; if it were not to be summoned upon it would be in the rough occurrence book. All we enter in this book, unless for some special reason are entered for the purpose of summoning.
9760. It is kept for your own summonses? Yes; if any constable is out on duty and sees anything which he ought to report it is put in that book, and if it is sufficient for a summons he is summoned.
9761. If it is a private matter? If he wanted to summons someone for keeping a vicious dog, privately, not as a constable, it would not go in this book? No.
9762. That would be his own private business, and he would have to apply to the Chamber Magistrate and state his case and get a summons? Yes.
9763. *His Worship.*] Being there it ought to have been acted upon, unless there was good reason to the contrary.
9764. *Mr. Bull.*] But its not being acted upon can be no evidence against Quelch that he stuck to the money.
9765. *His Worship.*] In a case of uniform trousers torn by a dog in that way, is a constable compensated by the Government? A report is made and a new pair of trousers issued.
9766. And any damage or fine goes to the Government? Yes.
9767. *Mr. Abigail.*] The constable would not be allowed to take compensation money, and with that compensation money buy a pair, because all these trousers are made by one contractor? Yes, and sent to the store and issued from the store.
9768. *Mr. Bull.*] Do you remember some questions being asked in the House? Yes.
9769. Do you remember that you had charge of that investigation? Yes.
9770. Did you not, as a matter of fact, having investigated that matter, find that the trousers which Quelch was wearing were his own private property? That is what I understood.
9771. That is what you ascertained at the time? Yes; and I went to Mr. O'Donnell.
9772. For the purpose of furthering your inquiry? Yes; and that is the information I got from him, and I reported on it.
9773. The information you got from him was that the dog had torn the trousers which Quelch was wearing? Yes; and he had remunerated him for them.
9774. Did you not make inquiry from Quelch? Yes; and I understood that they were his own private trousers.
9775. And you were told so at that time? Yes.
9776. And you so reported—that they were his own property? I reported that the inquiry made was satisfactory.
9777. That is, you were satisfied that the trousers which were torn were not the property of the New South Wales Government? Yes.
9778. The summons book is entered up by the watch-house keeper? Generally.
9779. Always? It should be.
9780. Is not this the routine, that if it is intended to issue a summons at all, a slip is made out by the watch-house keeper, that the purport of that slip and the nature of the charge for summons is entered in the summons book, that the slip is taken to the Superintendent's office the next morning, and when the slip is returned, what is taken to the Clerk of Petty Sessions? The slip.
9781. Authorising the issue of a summons? Yes.
9782. Then, if a slip was issued in this case, would it not appear in the summons book? Certainly.
9783. The fact is that there is no entry here in the nature of issuing a summons for destroying uniform, or for anything else so far as I can see, and if the property was the personal property of the police officer, is there anything in the rules of the Department to prevent him from receiving compensation for his own property? I do not think so.
9784. Although he was a police officer, if he was not actually on duty at the time, would it not be within his province to decline to even prosecute for the dog attacking him? Yes; but it might be that if he wore Government trousers and they were destroyed, he might have to pay expenses.
9785. If he was wearing his own private property, would not he be entitled to be compensated for the loss, and be entitled to decline to prosecute for the offence? Yes.
9786. Is there any information within your knowledge, or is there anything that you can adduce before the Commissioner to show that the trousers which Quelch wore on that night were Government property;—is there any officer whom you can call from the station who can be put in the box to say that the trousers which Quelch wore were not his own? The only person who could do that would be the person who had put the information in the book. He is the only person who would know.
9787. How are these clothes issued to these men;—are not the clothes issued from time to time to the men; a couple of pairs of trousers a year and two pairs of boots each a year? Yes.

9788. And it sometimes happens, I suppose, that a police officer does not require a new outfit during the year? If he is in plain clothes.
9789. And if he does occasionally plain-clothes duty? Then he is compensated some other way.
9790. In what way? He is allowed so much for the less issue that he gets.
9791. What do you mean by that? This money is paid to him by the Department. Supposing he only takes half issue, as he was in plain clothes for half a year, that is entered in the book, and he is paid for it.
9792. Supposing Quelch's hours were from 7 o'clock on the night of the 5th to 3 o'clock on the morning of the 6th; if the fact is that Quelch was on duty that night from 7 o'clock until 3 in the morning, what would that indicate to you? That he could not be on duty at 6.
9793. And that he must have been on what? I cannot tell you without looking at the book.

Inspector
E. Lawless.
18 Nov., 1897.

Senior-constable W. E. Quelch was recalled:—

9794. *Mr. Bull.*] [*Duty book produced.*] Turn up the date 5th November, 1892? On the Saturday night I was on duty from 7 till 12.
9795. You went on duty at 7 o'clock? Yes.
9796. Do you remember this occurrence of this dog attacking you on the evening of the 5th? I do.
9797. Where was that? In Turner-street, Redfern.
9798. What time was that? About between half-past 6 and a quarter to 7 at night. I could not fix the minute.
9799. How were you dressed at that time? I was dressed in my ordinary night dress.
9800. What trousers were you wearing? My own trousers.
9801. Whose property? My own property.
9802. *His Worship.*] Were they uniform trousers? Not police uniform. They were blue material, as I generally wear at night-time.
9803. *Mr. Bull.*] Take this in your hand? This is a pair I wear now on night duty to this day.
9804. How long have you been wearing those? For months.
9805. Are they police uniform—New South Wales Police? No; my own property.
9806. *His Worship.*] They are very heavy? I always wear heavy trousers at night-time.
9807. Summer and winter? Yes.
9808. How long do you say you have been wearing those very trousers? That pair?
9809. Yes? Since last year.
9810. *Mr. Bull.*] Where do you usually get these trousers? Mr. Richard Hannabus and Mr. Yedwohf have made all my clothing since I have been in Redfern.
9811. *Mr. Abigail.*] Do I understand you to say it was a pair like this? It may have been a bit finer than that. If you doubt my the Commissioner can send straight away to my house now and my wife will give him a sample of the stuff similar to police clothes which I have now, a remnant of stuff—I believe the same stuff those trousers were made of.
9812. *Mr. Bull.*] Now, in 1892, who was making your clothes? Mr. Yedwohf and Mr. Hannabus. They have made a lot of clothing for me.
9813. And on this night of the 5th in Turner-street, wearing, with other uniform, your own trousers, tell us what happened? I was passing along the street leisurely and I was passing a narrow passage when a dog rushed out.
9814. What sort of a dog? A fox terrier, and got me by the right leg. He never did any harm to my flesh, but simply made a tear in my trousers. I said nothing, but walked on. There were a couple of young girls there, and I did not know them at the time, and I walked on. I afterwards found out who the owner of the dog was. I laid an information for keeping a ferocious dog. If it had been Government trousers there would have been the following information for destroying the Government trousers. I dare not take money—[*Interrupted.*]
9815. But if you were wearing uniform trousers? It would have been my duty to have laid an information against him for destroying the Government trousers, and then I would have had to have reported to the Department for the sanction of another pair in lieu of them.
9816. But being your own trousers? I could not do that.
9817. Now, tell us what actually took place;—whom did you report to? Constable Kidd was on the reserve at the time. I do not think Shaw was there. Constable Kidd wrote that. I went out on my beat at 7 o'clock.
9818. Now, you know this charge against you of appropriating money in connection with one O'Donnell, is this the only matter which happened pertaining to O'Donnell? The only thing that ever happened from that day to this. I went out on my beat, and I would not be certain whether it was the watch-house keeper, Senior-constable Shaw, but somebody said something about whether I wished to press Mr. O'Donnell. "Oh," I said, "no." I said, "What does he want." "Well," he said, "he is quite agreeable to destroy the dog." I said, "If he destroys the dog I have no desire to press such a man as Mr. O'Donnell, as I am not injured in any shape or form," and then I did not mention anything about the trousers at all; but eventually, somehow, Mr. O'Donnell got hold of it and came to my house, and he asked me what I was going to do about the matter. I said, "Nothing." I said, "Someone has mentioned to me who you are, and that you are willing to destroy the dog." I said, "If you do that I am satisfied." He said, "Well, do I understand my dog tore your trousers?" I said, "That is quite true; perfectly true." He said, "Well, what are you going to do about that?" "Well," I said, "the only thing I can do about that matter would be the same as any other person. I would have to take you before the Court if I wanted to do anything in that matter." He said, "I am prepared to replace your trousers." "Well," I said, "it is very kind of you to do that; if you will replace the trousers that is an end of the matter." He gave me 13s. or 14s., I forget what it was, and I got another pair of trousers made.
9819. From Hannabus? I think Mr. Hannabus made that pair; I think I have worn them out since.
9820. Is there any doubt in the world that what you were wearing were your own trousers? Not the slightest doubt in the world. Fancy going into the police station, in the presence of perhaps seven officers, and then accepting money afterwards. This book is the summons book at the station. An entry is never made in that book only by the officers in the station—that is four officers—either by Sergeant Houlahan, Senior-constable Shaw, Constable Kidd, or Moore. They are the only officers that ever make an entry.
9821. Is there any entry there pertaining to any charge against Mr. O'Donnell for anything? There is no entry whatever. Instantly the summons slip is made out, during the night of the occurrence that a summons is going to be applied for, before ever he lets that go out of his hand, a similar entry is made in

Senior-constable
W. E. Quelch.
18 Nov., 1897.

Senior-constable
W. E. Quelch.
18 Nov., 1897.

that book, otherwise that never comes through the station hand again. They make it out during the night, and when Mr. Lawless comes down at 9 in the morning he brings it down to the Superintendent's office.

9822. These entries should correspond with the summonses? Yes.

9823. *His Worship.*] Why was no summons taken out in this case? I explained to the watch-house keeper, Senior-constable Shaw, and he never made out an application, so therefore there was no summons issued in the case.

9824. *Mr. Bull.*] Was there ever an application for a summons? Never. If there was—[*Interrupted.*]

9825. It must have been entered there? There is not the slightest doubt in the world.

9826. So there can be no truth in the suggestion made in Mr. Abigail's questions that a summons slip was made out and sent to the Superintendent's office, and was afterwards destroyed or torn up in the office at Redfern? That is where it would be [*indicating the summons book*]. It would be in that book hours before it came into the hands of Inspector Lawless to bring down here to the Superintendent's office.

9827. *Mr. Abigail.*] Are you in the habit of having blue clothes of exactly the same colour and the same sort of material as your uniform trousers? I have; I have said so.

9828. Do not you think that is a fearfully monotonous way of dressing;—is it not such a monotonous way of dressing that you should have private clothes of the same colour and the same material? Yes; I go so far as to say that that piece of stuff was white, and I got it dyed particularly.

9829. This particular stuff that you wore that night was not uniform trousers? Yes.

9830. Although you were coming up to go on duty? Yes.

9831. And you were going to do duty in these trousers which were your own? Yes.

9832. Can you mention any instance where you wore your own trousers instead of uniform trousers? Yes; it is all according to a man's own liking. I know men who would not wear the police boots.

9833. Do you know of any other police constable who does what you did that night, wears private trousers of blue, the same colour as his uniform? Yes; I have known—[*Interrupted.*]

9834. Have you got a record? No.

9835. *His Worship.*] Is the supply that you get from the Government insufficient? No.

9836. Why do you supply your own? A pair of trousers has to be very bad before you can get fresh trousers. I have seen a man hold up a cape and run water into it, to show the Inspector that the water ran through, and the men have had to go out in wet weather in clothes like that.

9837. Did you make any complaint to the Inspector at that time that you wanted another pair of trousers? No, decidedly not. It was all the better for the Government.

9838. *Mr. Abigail.*] You have heard what Senior-sergeant Bell and Mr. Lawless said, that this book was for police matters;—why was a complaint made if you did not intend to prosecute? Several people make entries here, and they are never forwarded.

9839. Why was it put in this book of all books, in the book reserved for special police prosecutions? I will show you a number of entries there.

9840. What personal control had you over this charge against O'Donnell, of keeping a ferocious dog, once you had made a complaint? I would be the prosecutor.

9841. Is it not a fact that you had no right—can you give me any reason to justify you in withdrawing this case without asking the advice of your superior officers? If I liked to say, "I request that that be not forwarded," it will not be forwarded.

9842. Without asking your superior officer? Yes; I will show you entries of other officers there.

9843. That summons book would not have an entry in it of the summons until the slip would actually go to the Superintendent's office and come back? Yes.

9844. Why would it? Because I am certain of it.

9845. Is not that the ordinary course—that it is only when the Superintendent says, "Yes; a summons should be issued," and issues a slip, that then the officer in charge of the station endorses in that book, and that slip is issued? That is wrong. The entry is made in that book during the night by the watch-house keeper.

9846. *Mr. Bull.*] They must be initialled by Mr. Read before a summons can be issued, and the summons book remains in the station the whole time? That is correct.

9847. *Mr. Abigail.*] Did you, as a matter of fact, refund this money that you had got from O'Donnell back to O'Donnell, and get it again from him? No.

9848. You say that, when the dog rushed out and bit you, you said nothing, and walked on;—did not you say something to the little girl there? I may have asked her whose dog it was.

9849. *His Worship.*] Did you get any compensation from the Government for the loss of these trousers? None at all.

9850. *Mr. Abigail.*] You reported, subsequently, that that dog had been destroyed? No; I did not report it to anybody. Mr. O'Donnell told me that he would destroy the dog.

9851. You say that you did not report that the dog had, in fact, been destroyed? I cannot recollect any such thing.

9852. Has a constable any right at all, once a charge is laid against a person, without consulting his Inspector, to withdraw that summons on his own motion? I say, if an information is laid—[*Interrupted.*]

9853. Has he the right? Yes.

9854. Did you make any charge against anybody anywhere at all with regard to your trousers? No.

9855. Did you, when you went into the station, and made that complaint, show your trousers to anybody;—did you say to Kidd, "See, there are the trousers; that is where they are torn"? I may have said that.

9856. Did you then claim the trousers as your own? I did.

9857. You say you may have said it, and that you claimed the trousers? Most decidedly.

9858. Did you claim the trousers in so many words to Kidd? I may have said, "A dog up the road tore my trousers."

9859. You say that you never reported that the dog was destroyed, and the answer which was given in your report to the Parliamentary question was this:—"On the 5th November, 1892, a dog tore a pair of the Senior-constable's own private trousers; the dog was afterwards claimed by an independent gentleman, Mr. G. O'Donnell, of Pitt-street, Redfern, who replaced the trousers, and destroyed the dog"? Yes; that is quite true.

9860. Has not the dog only died recently? I do not know what happened to the dog.

9861. Will you swear he has not? How do I know?

9862. But, you see, you reported the dog was destroyed? I say Mr. O'Donnell told me that he would destroy the dog, and I believed him, because of the position he holds.

9863. He never told you it had been destroyed? No.

9864. Although you reported that it had been destroyed?

9865. *Mr. Bull.*] You want to explain something in this book. Just give His Worship one instance where there is an entry made there with regard to a complaint, and an information or summons has never been taken out.

9866. *His Worship.*] I can quite understand that, but all I can say is that the person who enters it has to communicate with some higher authority before it is not acted upon.

9867. *Mr. Bull.*] Just explain that. [*Witness showed His Worship an entry in the summons book—Exhibit No. 41.*]

9868. *His Worship.*] There is a remark in the margin here that the constable requests that this should not be proceeded with.

Senior-
constable
W. E. Quelch.
18 Nov., 1897.

Constable Nicholas Moore was recalled:—

9869. *Mr. Abigail.*] Do you look at this entry in the information book kept at your station, dated 5/11/92—"George O'Donnell; keeping a dog which did attack Constable W. E. Quelch, in Turner-street, Redfern, 5.45 p.m., 5/11/92"? Yes.

9870. What is the duty of the constable who lays that complaint once it is in that book;—has he any right on his own motion to withdraw prosecution without consulting his superior officer?

9871. *Mr. Bull.*] I object to that.

9872. *Mr. Abigail.*] He is a station man? I am only a subordinate in that station.

9873. *Mr. Bull.*] I object to this witness giving an opinion.

9874. *Mr. Abigail.*] You are frequently the officer-in-charge there? In the morning.

9875. *His Worship.*] What is the practice? If a constable comes in and lays an information, it is taken down by either the reserve man, such as myself, or the sergeant. It is entered here as this information is entered, and from this information the station sergeant makes out the information slip.

9876. *Mr. Abigail.*] Who gives him the information? The constable gives the information at the station, not necessarily to the sergeant, he may give it to myself. I enter it as it is entered here. The station sergeant when he makes out his information slip, initials it in the manner that it is initialled there. That is the practice.

9877. You see the initials there "W.D.S."? Those would be Senior-constable Shaw's initials.

9878. Would it be probable that that would be initialled, as you see it initialled there, unless a slip had been sent in to the Superintendent for a summons based on that entry in the information book? Well, what I have always seen in three and a-half years at the station is that the initialling is a check that the information has been made out.

9879. And sent to the Superintendent? Yes.

9880. Who makes it out? The sergeant at the station.

9881. And once it is in there, has a constable any right to, of his own motion, withdraw the prosecution? No, a constable could not. It lies with the officer. I am a constable, and I could not withdraw it.

9882. *Mr. Bull.*] Whose handwriting is this here in the summons book, 5/11/92;—when is this summons book made up? That is made up as the slip is made out.

9883. One follows the other? That is the practice.

9884. Whose entries are those of the 5th? Those are Senior-constable Shaw's.

9885. And he is the same officer who has initialled that entry in the information book? Yes.

9886. *His Worship.*] If a claim was made for damaged trousers would not that form part of that entry? No, I do not see that it would, Sir. Of course they have summoned him for the dog attacking him.

9887. *Mr. Bull.*] If they were uniform trousers, would not there be some entry there? There would be some record of it.

9888. *Mr. Abigail.*] There ought to be? Yes.

9889. *Mr. Bull.*] The initials are Shaw's? Yes, and the writing on this date.

9890. Showing that Shaw was there? Yes.

9891. There must have been some reason why Shaw did not enter it into this summons book? But if the summons is withdrawn, and the information has not been sent in, it is marked in the margin here; the result is marked here.

9892. If there were no form made out at all it would not appear here at all (in the summons book)? If there were no form this (information book) would not be initialled, and it would be marked on here why, in the margin.

9893. *His Worship.*] You think that a form was made out and sent to the sergeant? Undoubtedly a form was made out.

[At 6 p.m. the Commission was adjourned until 2 p.m. on the 22nd November, 1897.]

MONDAY, 22 NOVEMBER, 1897.

[The Commission resumed its sittings at 2 p.m., at the Central Police Court.]

Present:—

WHITTINGDALE JOHNSON, Esq., S.M. (SOLE COMMISSIONER).

J. R. Dacey, Esq., M.L.A., and Senior-constable W. E. Quelch.

Mr. Abigail, solicitor, appeared in support of the charges on behalf of Mr. J. R. Dacey, M.L.A.; Mr. C. Bull, M.L.A., solicitor, appeared on behalf of Senior-constable W. E. Quelch.

Charge No. 14—continued.

Senior-constable William David Shaw was recalled:—

9894. *Mr. Abigail.*] Do you see this entry, page 89 of the information book: "George O'Donnell, keeping a dog which did attack Senior-constable W. E. Quelch"? Yes.

9895. I want you to explain. You see in the margin of that entry, alongside that entry, these initials appear, "W.D.S." Are they your initials? Yes.

9896. I want you to explain to His Worship, first, what is this book kept for;—is it only kept for the entry of charges to be made by police? It is kept at the station for the purpose of entering — [Interrupted].

9897. Police charges? No, not charges—informations for summonses.

9898. Applied for on behalf of the police? Yes.

Senior-
constable
W. D. Shaw.
22 Nov., 1897.

9899.

Senior-
constable
W. D. Shaw.
22 Nov., 1897.

9899. I want you to trace the routine from the time it is entered here right up to the time the summons is issued;—what would be your duty there—I see your initials there? When I see that entry, on the first opportunity I make out an information slip.
9900. *His Worship.*] Do you know, as a fact, that an information slip was made out? I could not say.
9901. *Mr. Abigail.*] That is a slip form, is it not [*producing one—Exhibit 40*]? Yes.
9902. Would it be filled in like that? As near as I can remember that is a copy of what I wrote at the time. Of course, it is only remembering. I cannot say it is a copy.
9903. *His Worship.*] That is sent to the Inspector? Yes, just as I did it at the time; but I cannot swear it.
9904. Who should that be sent to? Inspector Lawless.
9905. Was it? I cannot say.
9906. *Mr. Abigail.*] What we all want to get at is this: that initial there will refresh your memory as to whether you did, in point of fact, make out a slip for the purpose of getting out a summons? I am certain I made out a slip like that. That is a copy, as far as my recollection serves me.
9907. *Mr. Bull.*] I object to that.
9908. *Mr. Abigail.*] You swear, do you not, that you did, in point of fact, make out a slip? I made out a slip, or else my initial would not be there.
9909. And to the best of your recollection it is a copy of it? I won't say it is a copy; but I feel certain for this offence it might be "attacked" or "rushed at," and I cannot say whether I worded it "attacked" or "rushed at."
9910. What would be done with that slip then? I say in the ordinary course I should give it to Inspector Lawless.
9911. Then would it be sent on by him in the ordinary course to the Superintendent? There are several instances—[*Interrupted*].
9912. I am not talking about this one in particular; I want the practice? In several instances, where satisfaction is arrived at afterwards, the information does not get any further.
9913. But in any of these cases, in the ordinary routine, would it be sent on by Mr. Lawless to the Superintendent, and initialled by the Superintendent and returned? Providing satisfaction was not arrived at before he took it down.
9914. And then would it be entered up in this book called the summons book? If it had not been satisfied.
9915. And that is the condition of things? If it had not been satisfied.
9916. If the trousers worn by the constable on the occasion referred to in this entry had been plain trousers and private property would that entry have been made at all? Certainly it would.
9917. Why? Because it attacked the man. There is nothing in that entry about the trousers.
9918. *His Worship.*] The charge is against the man for keeping a ferocious dog, and there is no application made for damages.
9919. *Mr. Abigail.*] But once it is there would the constable who caused the entry to be put there have any power himself personally to stop the issue of the summons? Not himself—he could be the means of stopping it.
9920. But would not he have to report it to his superior officer? To the Inspector.
9921. *His Worship.*] It would have to be done through the Inspector? There would be no doubt about it, from what he reported to me I reported the same to the Inspector.
9922. *Mr. Abigail.*] Your initialling that entry you consider is proof that you made out the statement for the Inspector? There is no doubt that I made it out, or else my initial would not have been there.
9923. It is admitted that if he were wearing his own trousers on that occasion, and he got any money in satisfaction for this damage, that that money would have to be paid into the consolidated revenue? I do not think so.
9924. *His Worship.*] Not his own property.
9925. *Mr. Abigail.*] Perhaps I have mis-stated the question. I will re-state it. Do I understand you to say that if Quelch, on this occasion, had been wearing uniform trousers, and they had been torn, and O'Donnell had subsequently handed him what the two of them considered to be fair compensation for the damage done, would not Quelch's duty be to hand that money to his superior officer? If Quelch had been wearing uniform trousers I do not suppose for a moment that he would have taken any money whatever.
9926. I did not ask for your opinion;—has a constable whose trousers are torn, and those trousers being part of his Government uniform, any right to accept compensation from the owner of the dog for the damage, and pocket that compensation? There is what we term "expired uniform."
9927. Will you kindly answer the question the way I am putting it. Assuming that Quelch was wearing uniform belonging to the Government, and the dog had attacked him and torn his uniform, and the owner of the dog had come along and compensated Quelch by giving him 14s. or 15s. compensation for the damaged uniform, would it not have been Quelch's duty to have handed that money in to his superior officer? If the uniform was recently issued — [*Interrupted*].
- 9928.] I say uniform? It would have to be within a reasonable time.
9929. How long? We are served with uniform once a year. Suppose these trousers he was wearing he had had for fourteen months, it would not be — [*Interrupted*].
9930. Assuming that they are uniform belonging to the Government? Yes.
9931. If they were expired uniform they would not belong to the Government, would they;—will you admit now that if Quelch was wearing uniform belonging to the Government and a dog had rushed out and attacked him, tearing this uniform, would it not have been his duty to have handed that money to his superior officer? If it had been uniform belonging to the Government it would.
9932. *Mr. Bull.*] Is it not a fact that there are three distinct pairs of trousers which a man may wear;—first of all he may wear what are the then uniform trousers? Yes.
9933. He may wear what were served out to him a year and a half ago? Yes; old ones that are out of date.
9934. Or he may wear his own private property? Yes, provided they are blue. Perhaps I might tell your Worship that in this instance I did not know that ever a pair of trousers were damaged. I do not remember seeing that.
9935. *His Worship.*] The trousers are not mentioned.
9936. *Mr. Abigail.*] We say they were uniform trousers, and should have been mentioned; that is part of our charge.

Senior-
constable
W. D. Shaw.
22 Nov., 1897.

9937. *Mr. Bull.*] I suppose men wear trousers which are really their own property, and which appear to be uniform? Yes, at night time.
9938. Going on night duty? Yes.
9939. When did you know that you were required to come here as a witness in this matter with regard to this entry? I believe on Friday—Thursday or Friday.
9940. The Commission closed on Thursday afternoon? I suppose it would be either that evening or the next day.
9941. Have you had any conversation or a word with Quelch since last Thursday? Yes; he told me I would be wanted at the inquiry; nothing further.
9942. With regard to the inquiry, the object of the inquiry, or the reason of your attendance here? No.
9943. *His Worship.*] What I want to know is why the information was withdrawn.
9944. *Mr. Bull.*] Shaw has told you. *To the witness:* Was it not your duty to enter in the summons book at the same time that you made out this information slip? I will try to explain to your Worship. When they first began to cross-question me — [Interrupted.]
9945. Was it not your duty to enter in the summons book at the same time that you made out the slip? Providing the complaint had not been satisfied.
9946. Your opinion is that the complaint had been satisfied, which did not necessitate the entry in the summons book? Yes. I cannot say that I gave the slip to Mr. Lawless, yet I feel confident that I did do so, and that, as the complaint was satisfied, no doubt it never went any further, but I cannot say that for truth.
9947. *His Worship.*] Mr. Lawless was the only person that could act in the matter? I do not think anyone else could act.
9948. *Mr. Bull.*] The matter must necessarily come to his knowledge? Oh, yes.
9949. *His Worship.*] And it could not be withdrawn without his knowledge? No.
9950. *Mr. Bull.*] You know this, that the entry there is with regard to O'Donnell keeping a dog which did attack Quelch himself? Yes; it does not say a word about the trousers.
9951. That would lead you to suppose, would it not, that uniform trousers had not been damaged? Well, you see, that is a question I would not hardly like to say, but there is no doubt that at the time I did not consider they were uniform trousers, or else I should have said something about them.
9952. I suppose it has happened before, even in your time, that the information would appear in that book, and possibly a slip be made out, and yet the matter go no further? In several instances.
9953. I will give you one of your own. So as to remove any shadow of suspicion of this identical one I will give one of Shaw's own.
9954. *His Worship.*] Has Mr. Lawless any personal recollection of this matter?
9955. *Mr. Bull.*] No. No doubt, he said, the matter did come under his observation, and no doubt he had done certain things, but the matter had passed from his mind altogether. *To the witness:* Here is an entry of the character I am speaking of—"Isaac Ashton, 150, Abercrombie-street, Redfern. At 5:15 p.m., 22/8/96. Keeping a ferocious-dog that did attack, in Abercrombie-street, Redfern, Pollard." [Exhibit 42.] That is your writing? Yes.
9956. With regard to these circumstances that you have given evidence of, are you aware that that matter of Ashton's went no further? Certainly I am.
9957. Explain the circumstances of that? Pollard laid this information, and when I asked him whom the dog attacked, Pollard said he was not quite certain, but he would find out.
9958. *His Worship.*] I think there can be no question of the fact that, Quelch having been compensated for the private injury, the case was withdrawn.
9959. *Mr. Abigail.*] Are you prepared to believe the evidence given by Quelch that he was wearing blue trousers, which belonged to him—private trousers?
9960. *His Worship.*] It has not been proved to the contrary.
9961. *Mr. Abigail.*] You have to consider whether what he says is true.
9962. *His Worship.*] It has not been proved to the contrary. There is only his evidence on that side. There is no evidence on the other side that they were uniform trousers.
9963. *Mr. Abigail.*] There is only common sense on the other side.
9964. *Mr. Bull.*] [Showing trousers' material to the witness.] Have you seen trousers made of that material before?
Witness: If a man came to parade, either day or night, with a pair of trousers made of that material, there is not the slightest doubt he would be allowed to go on parade and on duty. It would be so near you could not detect it.
9965. Do you know that that is blue Venetian;—is not that the material and the name of the police uniform? I could not say. I am not a tailor.
9966. Your Worship remembers Quelch giving evidence that he had at home a piece of the material of which the trousers were made, and he would produce it? This is the material referred to.
9967. *His Worship.*] It appears to me that the summons could not be withdrawn without Mr. Lawless' sanction.
9968. *Mr. Abigail.*] That is for them to prove. We raised the case that the sanction was not obtained.
Witness: There is perhaps another thing that I ought to tell you: I generally get back from my tea just before 7, and either that night directly after 7 o'clock I believe I saw Mr. O'Donnell, and he told me that he understood that one of his dogs had attacked one of our men. He said he did not really wish for anything of the kind, and he said he would apologise, and he would destroy the dog, and if the dog had done any injury he said he would compensate him. Having that in my memory I feel certain that I must have told Mr. Lawless, and the information went no further.
9969. *Mr. Abigail.*] Did you ever tell anybody that before? I did not.
9970. Do you not know that it has been common talk about the station, and there have been conversations in which you yourself have engaged before this Commission ever started, when you put a different complexion on the matter? You told me a similar thing the other day.
9971. I said just now, "Before the Commission started."
9972. *His Worship.*] The whole question is whether it is a proper thing to accept compensation and withdrawn a summons of a public nature. I cannot see anything to support a charge of appropriating Government money.
9973. *Mr. Abigail.*] It is a question whether you will believe this man's evidence (Quelch's).

Charge

Charge No. 15.

“False swearing in the case against one Madigan of cruelty to a horse.”

Mr. Abigail.] I call for the original depositions in this case, “Police v. Michael Madigan,” heard on the 21st August, 1894. [*Exhibit No. 43.*]

Owen Crilley, carrier, 81, Darlington-road, Darlington, was called and sworn:—

- O. Crilley. 9974. *His Worship.*] What was the result of the case.
 22 Nov., 1897. 9975. *Mr. Abigail.*] Dismissed.
 9976. *His Worship.*] What is your name? Owen Crilley.
 9977. Where do you live? 81, Darlington-road, Darlington.
 9978. What are you? Carrier.
 9979. *Mr. Abigail.*] Do you remember one Michael Madigan being prosecuted on the 21st August, 1894, in the Redfern Police Court, before his Worship Mr. Delohery, on a charge of cruelty to a horse? Perfectly.
 9980. You gave evidence on that case? Yes.
 9981. Did you swear that you were the owner of the horse? Yes; I was the owner of the horse.
 9982. In question, in that case? Yes.
 9983. Did you also swear that you operated on the horse in the shed with searing-irons? Yes.
 9984. And the horse was suffering from greasy heels? Yes.
 9985. You also swore you tried a lotion, did you not? I had not time to try the lotion; I went over to get the lotion.
 9986. But before this you had tried a lotion? Yes.
 9987. You used the searing-irons because the lotion had not been successful? Yes.
 9988. You have been amongst horses since 1871? Yes.
 9989. And have you frequently performed operations of a similar character? I did before, previous to that one.
 9990. And in the presence of a veterinary surgeon? Under the supervision of Mr. Scott.
 9991. Did you leave the shed with the irons on that occasion? I left the shed after I performed the operation with them in my hands.
 9992. Immediately after? Yes.
 9993. Did you see a constable at the corner of Codrington-street and Darlington-road? Yes.
 9994. How far was that locality from the shed? Forty-two yards.
 9995. And who was the constable? I did not take much notice of him. I found out afterwards that it was Mr. Quelch.
 9996. Is this the man you saw? Yes.
 9997. You did not know his name at the time? No.
 9998. You know that is the man? Yes.
 9999. *His Worship.*] You see him now? Yes.
 10000. Is that the man? Yes.
 10001. *Mr. Abigail.*] You had actually left the shed, and got 42 yards away before you met the constable? He was 42 yards from me at the time I saw him.
 10002. Did you step it out? Yes; I stepped it out.
 10003. In your opinion was it possible for him to have seen the operation? That I cannot say. He said that he did see Madigan performing the operation.
 10004. Did Madigan have anything to do with the operation? No; no more than you that was not there at all.
 10005. He was there? He was the owner of the blacksmith's shop. He is a blacksmith.
 10006. Was he there at the time? Yes.
 10007. Had he anything to do with it? Nothing whatsoever.
 10008. In fact, you cured the horse, didn't you? Yes; I got £25 for him a fortnight afterwards.
 10009. After this alleged cruelty? Yes.
 10010. *His Worship.*] The first time you saw the constable was when you were coming away? Yes.
 10011. You did not know where he was while you were performing the operation? I did not know whether he was about or not, and another thing, it did not trouble me whether he was there or not.
 10012. *Mr. Abigail.*] You were well dressed on the occasion, as well as you are now? Not quite so well.
 10013. You had not got a gold pin or a chain on? Yes; I had a gold pin. I do not usually carry my gold chain.
 10014. You were respectably dressed? Yes.
 10015. And Madigan was in his working clothes? Yes.
 10016. Are you like Madigan or is Madigan like you? No.
 10017. At any rate, one could not be mistaken for the other, either by the way he was dressed or by form or build? Madigan is outside; you can see whether he corresponds with me or not.
 10018. Did you subsequently see Quelch arrest Madigan for this? Quelch had Madigan arrested and the horse when I came down. I went across from the blacksmith's shop to my own stable to prepare a lotion to put on the sole that I had seared. My boy came in and said, “A constable has arrested Madigan and the horse.” I said, “What for?” He said, “I do not know.” I went down and I met my brave Quelch; I met him on the corner of the street.
 10019. *Mr. Bull.*] Did you hear that, your Worship?
 10020. *Mr. Abigail.*] You had better withdraw the accusation of bravery? I would be sorry to call him brave. I asked Quelch, “What's up?” and he said, “I have taken this horse and this man Madigan for cruelty in treating this horse.” I said, “Now, you be careful; I am afraid you will be getting yourself into serious trouble.” He paid no attention to me, and took the horse away to the station.
 10021. Did you tell him he was arresting the wrong man? He took the horse to the station and Madigan, and half an hour afterwards I went up and bailed Madigan out.
 10022. What was done with the horse? He was sent down to the Belmore Barracks and kept there all night.
 10023. And actually the oil which you had been mixing up had not been placed on the horse? Not that night; it was placed on the next morning.
 10024. So he was taken away to the station just after the operation had been performed, and walked all the way to the barracks? Yes, I believe so. I got him there the next morning. 10025.

O. Crilley.
22 Nov., 1897.

10025. *His Worship.*] Was Madigan charged with performing the operation? Yes.
10026. Whereas you did it? Yes.
10027. Was Madigan there at the time you were performing it? Yes, he was.
10028. *Mr. Abigail.*] Do you remember Quelch being recalled after you gave your evidence, and saying: "Crilley said to me, I am the man who sent the horse to be done." Did you say that, making it appear that you were the owner and that Madigan had performed the operation? I said nothing of the kind.
10029. Quelch also swore this: "I swear I was not within a hundred yards of Codrington-street, Darlington, that day"? It was not Codrington-street, it was Raglan-street.
10030. You made a mistake in the name of the street? Yes.
10031. I see Quelch swore this in his statement: "The horse was kicking. Some children were looking through the fence, saying, 'Oh, the cruel man.' Accused could have heard it";—were there any children saying, "Oh, the cruel man"? Well, I did not hear them.
10032. And I suppose that it would be very natural if the children had? I could not hear it.
10033. *His Worship.*] I suppose this operation was performed in an open blacksmith's shed? Yes.
10034. It could be seen by any person taking the trouble to look through the door;—how wide is the door? I suppose it is about 20 feet wide, and there are two windows.
10035. You have not yet stated what the specific charge of perjury is.
10036. *Mr. Abigail.*] We will unfold that in the case. We say it is a tissue of lies all through. First he swore he saw Madigan doing this, and now we produce the man who did do it. We say this, that our charge is this: That Quelch swore that he saw the operation, and that Madigan was the operator, whereas, in point of fact, we say he was too far away to see anything of the kind, and this man was the operator, and not Madigan; and we say that, in order to get a conviction in that case, he purposely swore what he knew to be false.
10037. *His Worship.*] Will you kindly read his evidence to me?
10038. *Mr. Abigail read deposition by Senior-constable Quelch, Exhibit No. 43.*] *To the witness:* What was the operation for? There was a fungus growth.
10039. *Mr. Bull.*] The horse had greasy heels, and it had contracted a fungus, and they were searing and burning that off the horse's heel.
10040. *Mr. Abigail.*] What was the matter with the horse? Some people term it a greasy heel, and other people term it a fungus growth.
10041. The only way to get it off was to burn it? There are two or three remedies.
10042. *His Worship.*] I suppose the magistrate decided that the operation was one that was allowable? A lawful operation, yes.
10043. *Mr. Abigail.*] We will put before you the deposition of the constable, and we want you to see whether you will not come to the conclusion that we come to—that, for the purpose of getting a conviction in this case, and finding that straining was not sufficient, he then imagined that he saw things, and that imagination we say is a concoction, and what he swore to he knew to be absolutely untrue, and he did what he did do because he wanted to get a conviction, and a lie was neither here nor there with him. At first he says, "I never asked who did it," to a point blank question put to him in cross-examination, and then he says, "I inquired who did it." *To the witness:* Did you burn the fetlock off? No.
10044. You did not have to burn the fetlock off? No.
10045. If he had been looking, could he have possibly seen you burn the fetlock off? If he had stood where he said he stood, he could see me.
10046. Could he see you burning the fetlock off? I did not burn the fetlock off.
10047. *His Worship.*] You burnt the heel? Yes.
10048. It is not very far from the fetlock? It grows a little to the back of the heel. You see, first of all I took and cut it off. I do not know whether it is about three or five, about an inch or an inch and a half long of these fungus growths. I tried the lotion first, and found it was no good, and then I clipped them off and then I seared it.
10049. *Mr. Abigail.*] It was not the fetlock. This sort of thing does not grow on the fetlock, does it? Between the fetlock and the heel.
10050. It is like a series of big warts? Yes.
10051. And you cut them off and seared them with a red-hot iron? Yes.
10052. *Mr. Bull.*] You are not a farrier, are you? No, sir; I did not say I was.
10053. What are you? A carrier.
10054. This man Madigan does the farriery work for you? He is a blacksmith.
10055. And a farrier? Well, I do not know whether he is a farrier or not; I know he is a blacksmith. He shoes my horses.
10056. Was he shoeing this horse on that day? He fastened the shoe on this horse on that day after I performed the operation on him.
10057. Did he shoe this horse that day? He fastened a shoe on the horse that day after I performed the operation.
10058. *His Worship.*] Did he assist you in performing the operation? No, your Worship. At the performing of the operation the horse loosed a shoe.
10059. *Mr. Bull.*] Now, listen. Did you see blood on Madigan's hand and up his arm? No, I did not.
10060. Would you like to swear there was none? I would not swear there was none.
10061. What would you like to swear? I would not like to swear there was no blood on him; but I did not see it on him.
10062. You had not a scrap of blood on your hands? Yes, I had. I had blood up to my two elbows and with my shirt-sleeves tucked up—on both my hands.
10063. I think you were fully dressed that day;—you swore a while ago that you were? I did not.
10064. Now, just to see where the perjury may come from, and what a man will descend to swear, you gave evidence in the case there? Yes, I did.
10065. Can you tell his Worship if you have ever said before that you were in your shirt-sleeves, and had blood up to your elbows? Well, it was not required of me.
10066. Did you swear the contrary? What did I swear? You just tell me.
10067. Is that your signature? That is my signature.
10068. And I suppose this deposition was read over to you? I would not be surprised if it was.
10069. Did you say this: "I have a very good memory; I saw Quelch at a quarter-past 4 p.m.; I was dressed as I am now; I had no blood on me";—that is a poser for you—did you swear that? Listen to me ——— [Interrupted.]

- O. Crilley. 10070. Did you swear that? Well, if I have sworn that I have made a mistake. I know this much, with all due respect to you and your bluff, that that man did not see Madigan do it any more than you did.
- 22 Nov., 1897. 10071. Did you swear that? It would not do for you to ask for my opinion of Quelch, for if you want my opinion of Quelch it would not be a very respectable one. I always judge a man by his looks, and if Quelch could look you straight in the face it is more than he could do with me. I have been five-and-twenty years in business, and I know what men are.
10072. When you have done this oration of yours, and thrown all this mud which you think will stick, just listen to me. This is not true, is it, "I have a very good memory; I saw Quelch at a quarter-past 4 p.m.; I was dressed as I am now; I had no blood on me";—that is not true? Well, I could not be dressed as I am now."
10073. Did you swear that? Well, if I have said so I have made a mistake, for I could not be dressed that way.
10074. And you made a mistake when you swore that you had no blood on you;—you made that mistake too? It would be a mistake if I said so, because I did have the blood on me after performing the operation.
10075. You did not see any blood on Madigan at all? Well, not to my knowledge.
10076. Who is Drake? One of my men.
10077. Did he swear this? I cannot say what Drake swore.
10078. Just wait a minute? That was held the same as this one is held, with closed doors.
10079. Drake says, "I am a labourer, employed by Mr. Crilley; accused did not operate on the horse or touch it with a hot iron; he only fastened a shoe"? That is correct.
10080. "Accused had blood on his hands with lifting the foot"?
10081. *Mr. Abigail.*] That is after this man went.
10082. *Mr. Bull.*] You may chime in now if you like. That is not my object in asking that. Now, did not Quelch swear as a fact that you were not there at all? He did.
10083. Did not he say that whilst he was speaking to the men there about what he had seen through the window you came down;—did not he say that you came into the shop whilst he was having a conversation with the men who were there? If he said so he said wrong, for I did not go in the shop.
10084. Did he say so? Yes. He did not speak to me in the shop. It was on the street opposite—
[*Interrupted.*]
10085. Do not talk so much? Well, you have all the talking to yourself.
10086. I am here to talk? What am I here for?
10087. You are only here to answer questions. When you operated on this horse you went to your house? No, sir; I went to the stable.
10088. How far would that be away from this forge? Well, I suppose it would be between 30 and 40 yards.
10089. When you came back, Quelch was there? He was on the street; he was not in the shop, nor yet the horse was not in the shop. Both Quelch and the horse and Madigan were on the street.
10090. Is it not a fact that when you came back he had actually arrested Madigan, and was taking Madigan and the horse down to the police station? Certainly he was.
10091. That is so? That is so. That was not in the blacksmith's shop that he arrested him, and with all due respect to you and what you know about law and Mr. Quelch, he dare not arrest the man on his own premises. I know just as much about that as he does. I am too long in the business. He dare not arrest the man until he came out on the public street, I am informed, and it was on the public street I met him.
10092. *Mr. Abigail.*] Did not you say that he did not arrest the man until after you had performed on the horse? Certainly not.
10093. *Mr. Bull.*] You called Mr. Green, the veterinary surgeon? Yes, and a qualified man too.
10094. One would think you were an Irishman by the way you talk? So I am, and very proud of it too.
10095. Did not you call Mr. Green to show that this operation was a proper one? I called Mr. Green to prove that there was a legal operation.
10096. Did not you call him to prove that the operation was a proper one? Yes.
10097. And that is what Mr. Green said, is it not—listen;—were you in the Court when Mr. Green gave evidence? That I cannot say. I will not take it on myself to say.
10098. I am not binding you to that. This is what he said: "I am a veterinary surgeon, and a Member of the College of Veterinaries. I have a diploma. I remember the horse. I saw it after the 18th inst. It had been suffering from greasy heels, and had a fungus growth which would be best removed by firing. The result of the operation was successful, and relieved the horse from all pain. Before the operation he would be in pain. Cauterising the place was the right process. *To the police:* I did not see the horse before the operation. An unskilful operation would cause unnecessary pain." Done by a farrier, not by this man, who knows nothing about it? Don't you say any such thing, for if you say such a thing you are wrong. Your Worship, I call upon you to protect me. I won't allow such a man as Mr. Bull to make such a statement about me.

Michael Madigan, farrier, Raglan-street, Darlington, was called and sworn:—

- M. Madigan. 10099. *His Worship.*] What's your name? Michael Madigan.
- 22 Nov., 1897. 10100. What are you? Farrier by trade.
10101. Where do you live? Raglan-street, Darlington.
10102. *Mr. Abigail.*] You remember the 21st August, 1894. You were prosecuted by Senior-constable Quelch in the Redfern Police Court before Mr. Delohery? Yes.
10103. And after Quelch gave his evidence, and, peculiarly enough, Mr. Vane—Sergeant Vane—who was called as an expert, you gave your evidence, and you called Mr. Green, Mr. Crilley, and Mr. Drake, and the magistrate dismissed the case? Yes, that is correct.
10104. Mr. Moffatt appeared for you? Yes.
10105. Do you remember Quelch swearing that he saw you cruelly ill-treat the horse? Decidedly so.
10106. And do you remember him swearing that he saw you with the red-hot iron burning the fetlock off one of the animal's hind legs? Yes.
10107. Is there a word of truth in either of those assertions? They are certainly false.
10108. Do you remember him swearing that the shoe of the foot that was burnt was not touched? That is also false.
- 10109.

M. Madigan.

22 Nov., 1897.

10109. Is it not a fact that a shoe was put on the foot by you? Yes.
10110. And that is all you had to do with it? Yes.
10111. And after fastening the shoe on you got some blood on your arm? Yes, I did.
10112. And is that how you got the blood on your arm? Yes, exactly.
10113. When you were charged with merely ill-treating a horse, and were taken by the constable to the station, Quelch says that you muttered some reply;—what did you say to him—it must have been something in your favour, because he forgot it? I cannot remember muttering anything. I generally speak straight out.
10114. Did you tell him that it was not you who performed the operation? Yes; before he arrested me.
10115. Why was that? I told him that I had nothing to do with the horse, and I forget exactly the reply that he made, and he said, "You had better come to the station," and I went to the tub to wash my arms, and he said, "Don't wash that off," and the reply that I made was, "Some of you fellows have hung a man for that."
10116. You were in your old toggery, were not you? Yes; dirty clothes.
10117. In your working clothes? Yes.
10118. Your clothes were a bit torn? Yes; I requested Mr. Quelch to let me go inside to change my trousers, and he refused.
10119. You had specially retained Mr. Crilley to perform this operation? I beg your pardon.
10120. You had specially allowed Mr. Crilley the use of your forge to perform this operation? Oh, yes; he was always getting the use of my forge, at any time; in fact, any man who comes along—a respectable man.
10121. Mr. Crilley performed the operation? Yes. He and his own men.
10122. You were the proprietor of the farriery? I was.
10123. Was the operation performed skilfully? To the best of my belief.
10124. Your veterinary surgeon, Mr. Green, said it was? Yes; and he is a thoroughly qualified man.
10125. Was there any ill-treatment at all? Not so far as I am aware of.
10126. Did you have anything to do with the horse from first to last in this operation except to put the shoe on for him? Nothing more.
10127. And if Quelch swears that he saw you do it, is that a deliberate lie? It is a deliberate lie, a dirty falsehood.
10128. Did you hear any children outside? Yes, they were all in; I had to keep them away.
10129. Did you hear any children outside say, "Oh, the cruel man"? No, I did not hear them say that; there are always a lot of children outside; I have a job to keep them away at any time.
10130. If Quelch had been looking as he says, through the window in Raglan-street, could he have seen all he alleges that he saw—namely, that you were doing this? He could command a view of the shop to a certain extent. I could put ten or twelve men in the shop in different places, but he could not see them.
10131. Would he have a better view of the interior of the farriery from Wolseley-lane? He would.
10132. If he had been looking through there at the time that the operation was performed, is it possible that he could see all that he alleges he saw? He could see everything that was going on.
10133. He could not have seen you perform the operation because you did not do it? No.
10134. If he had been looking through at the time the operation was performed he must have seen Crilley, who was really performing the operation? No. I do not think he could mistake me for Crilley. He had a white shirt on. He was dressed the way he is dressed now, or else he had a brown suit on.
10135. You had your working clothes on? Yes.
10136. You were put to all this trouble and expense, and the humiliation of being dragged up to that Court, and being locked up there until you got bail, and you got nothing out of it? Nothing.
10137. No redress at all? None whatever.
- 10137½. It is one of the pleasures of citizenship.
10138. *Mr. Bull.*] And notwithstanding that this case was heard on the 21st August, 1894, you never moved in the matter;—you were satisfied when the case was dismissed? Was I? That might be your opinion; that is not mine.
10139. We are not here to be insulted by men who come here? I will not be insulted either.
10140. His Worship has exactly the same power with you as he has in any Court, so do not attempt to be insolent. You were dressed how? In my working clothes, the clothes I work all the week in.
10141. I suppose your sleeves were tucked up as farriers' usually are? Yes, about up to here. [*Indicating.*]
10142. How was Crilley dressed? In a brown suit and a white shirt on, to the best of my opinion, and a cap.
10143. How were his sleeves? They were down. His shirt-sleeves were buttoned round here to the best of my belief. [*Indicating his wrists.*]
10144. Did you hear Mr. Crilley at Redfern swear that he had no blood on his hands or arms? I never heard him utter those words; I do not think so.
10145. Do you remember him being asked whether he had any blood on him? I would not like to say anything about that. I am not sure whether he was asked that question or not.
10146. There would be no harm in telling you that he swore at the Police Court that he had not any. He said "I had no blood on me"? Very likely he had not. He never got in a position to get any on him.
10147. If he says he had blood up to his elbows on both arms to-day what do you say to that? I cannot say anything about that.
10148. Would that statement be true? It might be. I am only swearing to the best of my belief in regard to that question you asked me.
10149. You did not qualify it in any way. I read you first what Mr. Crilley said? I did not remember Mr. Crilley being asked that question.
10150. He has already sworn it on his deposition? Perhaps he may have.
10151. Will you explain to his Worship why you have a doubt that there was blood up to his elbows? I said to the best of my belief. I will not bind myself down to anything.
10152. You would not like to swear that he had no blood on him at all? I would not.
10153. Who was it heated the irons? That I cannot say.
10154. Try and remember? I cannot. I was doing my work. I was shoeing two horses. I was working in that corner [*pointing*], and the operation was going on with Mr. Crilley and his men here, in about this position, and I was down in that corner shoeing two horses, and the fire was at this end. Now how could I watch Mr. Crilley performing the operation?

10155.

- M. Madigan. 10155. *Mr. Abigail.*] You did not even hold the horse? I held the horse when I was putting the shoe on.
 10156. But not while the operation was being performed? No.
 22 Nov., 1897. 10157. *Mr. Bull.*] You did nothing to the horse at all? No, no more than fastening the shoe after the operation was performed; being late in the evening, I could not shoe it.
 10158. You did fasten the shoe on? I did.
 10159. Will you explain why the place was shut up? On account of the operation being performed, and the children being there.
 10160. Was not this place absolutely shut up, closed, so that people from the outside could not see what was going on unless they were inquisitive? Certainly not. They could see all round by peeping through the cracks and windows. There are any amount of windows to look through.
 10161. But the shed itself was closed? I usually do close the door when there is anything rough going on, on account of the children going round.
 10162. Anything rough going on? Yes; shoeing young horses, or anything like that.
 10163. How long have you known Crilley? I have been intimate with Mr. Crilley about four years and eight months.
 10164. I suppose you are what would be recognised, not only as an ordinary horse-shoer, but as a farrier? I do a little that way.
 10165. In fact, whether you have that ability or not, you all practice it to some extent? Yes.
 10166. If I sent in my horse with lampass you would burn them out? No.
 10167. Have you never burned the lampass out of a horse? I have done.
 10168. You know that that was the old idea? Yes, it was the old idea.
 10169. When you were a lad serving your apprenticeship it was done in the forge where you served your apprenticeship? Yes.
 10170. How many operations have you seen Crilley perform on horses? Two or three.
 10171. Will you name any circumstance when you saw him operating in your forge before? He had not operated in my forge before.
 10172. Do you do his shoeing? I do.
 10173. And you act as his farrier when the necessity arises? Exactly.
 10174. Do you know Mr. Green, the farrier? He is a veterinary surgeon.
 10175. Do you know him? I did know him when he was alive.
 10176. He is since dead, I hear? Yes.

Senior-constable William Edward Quelch was recalled:—

- Senior-constable W. E. Quelch. 10177. *Mr. Bull.*] Do you remember being in the vicinity of a forge occupied by and operated in by Mr. Madigan? Yes.
 22 Nov., 1897. 10178. Do you remember what day that was? It was on the 18th day of August, 1894. At 2 o'clock in the afternoon I paraded for duty. I went over on the Baptist Estate, in the opposite direction altogether. I worked the first two hours in that portion of the district.
 10179. *Mr. Abigail.*] What do we want that for? I went over Abercrombie-street way between 4 and half past. I arrived along Raglan-street about a quarter past 4.
 10180. *Mr. Bull.*] Tell us what you saw? When I got near to the forge—going towards it—I saw that the forge door was closed, which is an unusual thing. It is a very large door, I suppose about 12 to 16 feet long. I heard some little children who were peeping through—there were several of them there who had just come out of the public school close by—and they were singing out, "Oh, the cruel man." Knowing there was a vacant window in Wolseley lane, just round the corner—[*Interrupted.*]
 10181. A window with no sash in it? Yes; an open window. I went round the lane; that put Mr. Madigan's back towards me. I looked in through the window; I saw a large draught horse. A man was holding it at the head. It turned out to be an employee named Drake, who gave evidence in the case.
 10182. How many persons were in the forge? Three.
 10183. Was this man Crilley one of them? No. I stood there for two or three minutes seeing what was done.
 10184. What was being done? Madigan had a hot iron. He had red-hot the iron in the forge. Then he would burn the horse's hind hoof, near to the foot. When the iron would be cold, he would put the iron in the fire again, and would heat it again, and would burn it again until the iron got cold. The foot was bleeding very freely, and Madigan's arms were all over blood—all up the arm. The horse was kicking, and shaking, and holding its foot up. I went round to the gate then, and I could not get in. Presently the gate was opened, and the man Drake was going to bring the horse out.
 10185. Leading it out? Leading it out. When he got it out on the footpath I stopped him, and asked him what was the matter. He said, "Nothing, boss; only having a shoe fastened on." The only shoe that was touched was a couple of new nails put in one of the front feet. The shoe was not off, but a couple of nails were put in only.
 10186. And nothing was done in farriering or shoeing to either of the horse's hind feet? Nothing at all. They were all good shoes on the horse. I said, "As there is nothing wrong, what are you treating the horse in that way for with the irons?" and then he tried to back the horse into the forge again. I said, "Oh, no; keep it here." I collared hold of the horse myself then. I said to the farrier, Madigan, "I want to speak to you." I asked him what was wrong with the horse, and, to the best of my memory, he replied the same as Drake did. I said, "If you say there is nothing wrong with the horse, and have only put a couple of nails in, come to the station with me." I took him up to the station, and just as I was coming away down came running Crilley to me, and wanted to know what I was going to do with the horse.
 10187. Was that the first you saw of Crilley? That was the first I saw of Crilley.
 10188. How was he dressed then? Similar cut of clothes he has now. He always wears that cut of clothes, but it was a brown suit of clothes, and skull-cap on.
 10189. Had he all his clothes on? Yes, white shirt, and coat, and everything else. He came running down and asked me what he was going to do, and I told him that I was going to take the horse to the station and the farrier too. He followed us up to the station, and at the station I called Sergeant Vane out. The horse's leg was then bleeding freely, and he was holding it up as if in pain, and shaking. Madigan was charged; but Crilley said something to the effect that if anyone was to blame it was he for sending the horse down.
 10190. *His Worship.*] Was the shoe on the foot then? Yes; all the shoes were on the horse. But Madigan was then charged, and the horse was taken to the police depôt for care. On the case coming before

before the Court, evidence was given by Crilley, Madigan, and Drake, and the veterinary surgeon. After the veterinary surgeon had given his evidence, there was a question put to the veterinary surgeon whether his evidence was not questioned by a certain magistrate at one of the other Courts. I forget the answer that took place. After that the magistrate said, "Well, I must dismiss the case, as we have professional evidence here"; but he used some words to the effect that it was pretty clear that the horse was cruelly treated, but he could do no other but dismiss the case. He had his own opinion about it.

Senior-
constable
W. E. Quelch.
22 Nov., 1897.

10191. I understood you to say that when you saw the horse first there was no shoe on that foot? No; there were only two nails in one of the front shoes. The shoe was intact, but loose, and a couple of new nails were put in.

10192. You still hold to your statement that Madigan was the man operating? Madigan.

10193. *Mr. Abigail.*] Your Worship sees that when Crilley went away Quelch came up and saw Madigan putting the front shoe on.

10194. *Mr. Bull.*] Did you hear Crilley in the box? Yes.

10195. Do you remember his being asked whether he had any blood on him? Yes.

10196. What was his answer? No.

10197. Has he ever given such evidence as he gave here to-day—that he had blood up to his elbows? Never in his life. The evidence was that he was fully dressed, as he was to-day.

10198. *Mr. Abigail.*] My friend asked the witness this question, "Was Crilley dressed?" and the answer was, "Oh yes, when he came down to bail these men out he had all his clothes on." That was after the operation.

10199. *His Worship.*] I must go by the evidence given at the time of the case.

10200. *Witness.*] Crilley followed us right to the station, and he also swore that he saw me at the corner of Codrington-street and Darlington-road. I was never within a hundred yards on that day.

10201. *Mr. Bull.*] And he swore before the magistrate then that he had no blood on his arms, and that he was as fully dressed then as he was at the time in the witness-box.

10202. *Mr. Abigail.*] Now, is not this a fact that Crilley came out of the forge and met you, as he says, at the corner of Raglan-street and near Raglan-street, about 42 yards away from the forge, and that you were then walking up to the forge, and then when you got up there you looked through these two points of vantage, and finding that you could not see enough at the first point you went round to this window, and that then you saw a man with his back turned to you and you immediately thought it must be Madigan, because it was Madigan's forge; and you saw then, not Madigan performing the operation, but putting a shoe on, and you immediately jumped to the conclusion that it must have been Madigan who did it, from first to last? I do not jump to any conclusions at all. I say I was not at the corner of Codrington-street and Darlington-road that day; that I did not see Mr. Crilley come out of the forge, and he was not in the forge.

10203. Did you know him before? Years before.

10204. Will you swear that what he swore on that occasion and here was a tissue of lies? Yes.

10205. And the same with Madigan? Yes.

10206. And the same with Drake? Drake has not sworn here to-day.

10207. We have his depositions here;—do not undertake too much? I am not undertaking too much at all.

10208. Won't you swear that what Madigan and Drake swore was a tissue of lies? Yes.

10209. And the only person who swore truly was you? I say I saw Madigan performing an operation and Crilley was not there.

10210. Will you not admit the peculiarity—that whenever you are cornered by incriminating witnesses you call them perjurers. You say they are all liars and perjurers and you are the only truthful man.

10211. *His Worship.*] You cannot expect him to admit that the incriminating evidence is true.

10212. *Mr. Abigail.*] Why does he not admit that he might have made a mistake. Would not that go further with your Worship and with everybody if the man would make that admission. This is an instance of how "strong" this man is, to use Mr. Levien's peculiar term. *To the Witness:* Now, as a matter of fact, you went up there and heard these children talking and made inquiries from the children? I did not speak to a child.

10213. Did not you find out from the children that some naughty man had been burning a horse's foot? No; certainly not. What I swear I saw — [Interrupted.]

10214. Will you swear that Crilley was not there? He was not.

10215. Does not that again go to show that you went up there after the operation, and after he went for the oil, and that you saw Madigan putting the loose shoe on? Crilley was not there the whole time I was there, until I was taking the horse away.

10216. When you were cross-examined by Mr. Moffitt, who appeared for Madigan, you said this, "The accused never said 'I did not do it.'" No.

10217. You have heard him swear he did? I have heard him swear it, yes.

10218. Then you were asked and said, "I never asked who did it"? No; of course I did not.

10219. But after that, in answer to the police, you contradict your evidence in cross-examination by Mr. Moffatt, and you said, "I enquired who did it to see was it necessary." Which is the more likely thing? I asked Drake.

10220. You first said, "I never asked who did it;" and then you say, "I inquired who did it to see was it necessary." Now, which of the two statements, in direct opposition of each other, is true? I asked Drake.

10221. Which of the two is true? They are both true.

10222. You see you will admit that you can never make a mistake? They are both true.

10223. Are you playing with me—are you trying to be funny; How can they both be true;—how can these two directly contradictory statements be true. "I enquired who did it";—is not that asking who did it? I say I spoke to Drake after they saw what I had seen, and they denied it; then I asked Drake.

10224. Is not that a direct contradiction of the first statement you made? I cannot say it is a direct contradiction.

10225. First you say you never did it, and then you say you did;—you cannot see that that is a contradiction? No.

10226. *Mr. Bull.*] You say that you saw what you describe, and then when each of them denied what you had seen, you asked Drake? I saw it before they had ever opened the gate to come out.

10227. *Mr. Abigail.*] You say you saw Madigan's back turned towards you? Yes.

10228.

- Senior-constable
W. E. Quelch.
22 Nov., 1897.
10228. And yet you say you saw him take a red-hot iron and burn off the fetlock? Yes.
10229. Will you swear that they were burning the fetlock? I will swear they were burning the hoofs.
10230. You have said here, "I looked through that and saw the accused with a red-hot iron burning the fetlock off"? I say that it was not the fetlock—it was pretty close to it.
10231. You see, "Burning the fetlock off," you would get the whole leg off? The fungus fills up the gap there.
10232. If you burn the fetlock off, what part of the hoof would be left;—would not the hoof drop to the ground if you burned it off? If you burned it off. I think if you will go down further you will see that I swore I did not know much about horses.
10233. You know much about what you swore? Yes.
10234. You were swearing to something which you swore positively occurred.
10235. *His Worship.*] Quelch has been a sailor, and could not know much about a horse.
- Witness.*] The burning caused a lot of smoke, and you could not exactly see what was burned at the time.
10236. *Mr. Abigail.*] You also swear this: "No shoes were put on the horse. The shoe of the foot which was burnt was not touched"? Yes.
10237. Now did you swear that all the shoes were on? I did.
10238. Now tell me how it was possible to perform this operation without taking the shoe off? Easily.
10239. Do you not know that that is always done? No.
10240. Because then, if the horse kicks out, well, he kicks with less force than if he had his shoe on? No, I do not think the horse could kick out when the operation was being done, because one leg was up, being held well with Madigan, and if he had kicked out with the other foot down would go the horse.
10241. How could he hold the hoof up and perform the operation at the same time? He was holding it up similar to farrying the horse. He had it up on his knee.
10242. You were looking through something, not a keyhole, something intended for a sash? Yes.
10243. You see there is a fatal attraction on your part to anything in the nature of a keyhole, or anything in the nature of a hole in the wall? You seem to think so.
10244. "Somerset Hotel," a keyhole. Pogson's lock, again a keyhole. Then there is this other case of the "Salutation Hotel," the corner of the window; and now there is this again, the bit near the window which was intended for the sash.
10245. *His Worship.*] I suppose, as a matter of fact, you get your information the best way you can? Yes.
10246. You are not particular how you get it? No.
10247. *Mr. Abigail.*] That is about the only time you have ever been candid. You do not care how you get your information? No.
10248. You will also swear to it no matter how you get it? If anybody gives me information, I always like to see that it is correct before I move in it.
10249. Do you remember giving evidence in that case the other day where the attorney objected to the evidence because it was after you had asked for a confession, and you said, "Oh, but your Worship, I asked this before, and he said this before I asked for a confession"? I think you have got hold of the wrong end of it.
10250. You know you have the reputation of going pretty strong when you are in the box? I have got the reputation of being pretty firm and showing no quarter to anybody. I believe in putting the case forward as much as I can.
10251. You know, do you not, that promotion follows your activity in getting convictions? No; I do not know that at all.
10252. You know it has a great deal to do with it? No; I do not know that at all. I do not consider for the manner in which I have done my duty, and the length of service, I am a bit too far advanced.
10253. Not in the matter of giving evidence? No; not in evidence, rank I hold, or anything else. There are plenty of men in the Police Force the same rank as I who have not done the same work as I have. As long as it is my duty I do my duty.
10254. You swear up to it? I do my duty as to what I see.

William Stanger Kelk, deposition clerk, Redfern and Newtown Police Courts, was called and sworn:—

- W. S. Kelk.
22 Nov., 1897.
10255. *His Worship.*] What is your name? William Stanger Kelk.
10256. What are you? Deposition clerk at Redfern and Newtown.
10257. *Mr. Bull.*] Do you remember a case tried before Mr. Delohery, at Redfern, 20th August, 1894—are these your depositions—perhaps you will remember the circumstances;—were these depositions written by you? Yes.
10258. Do you remember any of the circumstances of the case? Slightly, I do.
10259. What is your recollection? I do not know.
10260. A man named Madigan was charged with cruelty to a horse? Yes; some alleged operation I think.
10261. Burning the horse's heel or fetlock? Yes.
10262. Evidence was adduced according to these depositions to show that it was somebody else, not Madigan, but Crilley, and veterinary evidence was called to show that no matter who performed the operation it was a lawful operation and a necessary one;—do you remember that? To that effect.
10263. That is the funny part of it. Would you just look at Mr. Green's evidence there. You see there that Mr. Green swears that cauterising a fetlock with a fungus growth would be the proper treatment? Yes, "right process."
10264. Do you remember the case being dismissed? Well, I do now.
10265. The matter has come to your recollection? Yes, it has, certainly.
10266. *His Worship.*] Mr. Delohery officiated? Yes; that is so.
10267. *Mr. Abigail.*] Your memory has been refreshed on this recently—in fact, no later than a few minutes ago by young Mr. Bull? No.
10268. Did not young Mr. Bull go outside and see you and tell you why you were going to be called? No; he told me the name of the case, I think.
10269. Did he tell you what it was about? No.
10270. No conversation at all about it—about the case? I do not know. There was as to the number of witnesses. 10271.

10271. Did not young Mr. Bull go outside and see you, and remain out with you fully ten minutes? Oh, W. S. Kelk.
no; I stood with him at the time. 22 Nov., 1897.
10272. *Mr. Bull.*] Did you see Mr. Trevor Jones outside? Yes.
10273. Was not my son in conversation with him most of the time? A good deal of the time.
10274. *Mr. Abigail.*] And with you too? I think we were talking about cricket a good deal.
10275. At any rate, your memory was somewhat refreshed? I would have refused to have allowed my memory to be refreshed in the matter.
10276. *Mr. Bull.*] I suppose the conversation was a mere cursory one? Yes.
10277. You know my son? Yes.
10278. You are cricketers together? Yes; if I had anything wrong to say to Mr. Bull I would not have said it with that door open.
10279. With regard to this circumstance, I would not offend you, or offer an insult, by saying anything about it;—tell us what your recollection of the matter is? I remember that expert evidence was called for the defence. I certainly can remember that fact.
10280. Do you remember anything said by the Magistrate at the time of dismissal? I can give my impressions of what was said.
10281. *Mr. Abigail.*] I object to that.
10282. *Mr. Bull.*] Is this your belief? Certainly.
10283. *Mr. Abigail.*] I object to it.
10284. *Mr. Bull.*] I press it.
10285. *His Worship.*] Do you recollect whether, in the course of inquiry, any doubt was thrown upon the identity of the person charged in Quelch's evidence? Not by the Court.
10286. Before the Court, in Quelch's evidence? A witness gave evidence to the effect that the man alleged to have done this was not the man who did it; but beyond that, nothing.
10287. *His Worship.*] That was a question before the Court—the question of identity was a question before the Court? Undoubtedly.
10288. *Mr. Bull.*] Was not the case dismissed, as you say, on the veterinary evidence? Undoubtedly.
10289. That the operation was a lawful one? Yes; there is no doubt about that. Of course, in the ordinary way I cannot read a Magistrate's mind, but I was certainly under the impression something was said to make me believe that it was on the expert evidence.
10290. *Mr. Abigail.*] And not on the question of identity? No.
10291. *His Worship.*] Cannot you recollect;—the Court expressed no opinion as to the question of identity? No; the expert witness gave evidence, and then the case closed summarily on his evidence. I suppose—*[Interrupted.]*
10292. *Mr. Abigail.*] I would like Mr. Kelk to read the depositions.
10293. *His Worship.*] Please read Mr. Madigan's evidence? "This deponent Michael Madigan, on oath, states as follows:—I am a farrier. On 18th instant I never operated on the horse. He had greasy heels and a fungus growth called 'stones.' The proper process is searing. I think it less painful in the long run to operate. The horse is working now. The blood on my hand got on through my fastening a loose shoe. I swear I never performed the operation. I am proprietor of the farriery. Crilley was the man who did the operation. He performed it carefully and skilfully.—Michael Madigan." *[Exhibit. 43.]*
10294. Then the question was raised? Yes; and whatever doubt there was was overcome by the expert evidence. It was a side issue.
10295. *Mr. Abigail.*] Do I understand you to say that undoubtedly this question of identity as to who performed the operation was in contest—in issue—in the case, but then this other question as to the lawfulness of the operation cropped up, and the Magistrate decided on that, and left the question of identity perfectly open? The question of identity must have been at issue, when the witness swore that he did not perform the operation. He must take cognisance of it.
10296. *His Worship.*] Then the Court expressed no opinion on the point at all? No.
10297. *Mr. Abigail.*] How long have you been taking depositions? About eight years.
10298. And I think everybody will give you credit for the correctness of the manner in which you take them. You cannot carry in your recollection all that a Magistrate says in dismissing a case, can you? No; certainly not.
10299. Although I dare say certain cases in which certain police officers are concerned do imprint their incidents on your mind more than other cases? Undoubtedly.
10300. Particularly in cases in which certain police officers give evidence. For instance, do you remember a case against a publican when Quelch was prosecuting, and the attorney defending objected to certain evidence which Quelch was giving on the grounds that it was inadmissible, it having been extracted from the accused as a confession and on a certain promise, and that Quelch immediately, when he saw the point, antedated the evidence to give it strength? Did you ask me whether I remembered a conversation connected with it?
10301. The case? I do remember the case.
10302. Now, what was it? I do not know the name of the case. I remember a very trivial matter that impressed itself on me for the moment.
10303. What was it? It was something to do with a man leaving the hotel with liquor. I think he was the son of the licensee, and Senior-constable Quelch gave evidence that he had seen him leave the hotel with the liquor, and that he accosted the man and told him that he had better come back to the hotel. Well then the defendant made some remark, which Senior-constable Quelch was about to give in evidence, and the lawyer certainly did stop it and objected to its inadmissibility. Of course they explained that the conversation that the man gave was said before he said he had better come back to the hotel.
10304. Although he at first put it *vice versa*? Yes, he did; and I certainly for the moment thought "Well, it is rather strange"; in fact, it was some remark the lawyer made that impressed it on my mind. Really, it is a very trivial matter.
10305. We have heard from a practising solicitor in that Court that Quelch has a habit of going it strongly; in fact, he unduly presses his case;—is that your view as deposition clerk? From the defendant's point of view he does.
10306. From your point of view as deposition clerk, you are independent, what is your experience? Well, I must say whatever else he is, he is a most energetic officer. There is no doubt about that.
10307. Does he unduly press his cases? I could not answer that question; I do not know the facts.

- W. S. Kelk.
22 Nov., 1897.
10308. From your own experience in the Court, and the observations which fall from the Magistrates at times, is it not so;—has he not got the reputation of unduly pressing his cases? It is a very hard question.
10309. *His Worship.*] He is a man very positive in his evidence? He is, decidedly.
10310. *Mr. Abigail.*] Without being offensive to you, he swears up? He has the reputation of swearing up? Swearing up to the truth or beyond it?
10311. Swearing up to a conviction? Well, possibly. I do not believe the man is a liar, if you want to know that.
10312. *Mr. Abigail.*] I did not ask you that.
10313. *His Worship.*] He is an uncompromising witness in the box? Undoubtedly.
10314. *Mr. Bull.*] He does not give much away? No; he would make a good tradesman. I mean that he would attend to his business.
10315. *Mr. Abigail.*] Do I understand that you would give him a good certificate of character? I am appearing in quite a new role in this matter.
10316. *Mr. Bull.*] What do you think? I do not object? I could certainly not give him a certificate of bad character.
10317. *Mr. Abigail.*] Is not that like a constable answering the question "Was he drunk or sober?" with "Well, he was not very sober"? Are you prepared to give him a certificate of good character? I do not think he is as keen on his cases as you are on yours.
10318. That is not the way to put it;—are you prepared to give him a certificate of good character? Well, I have heard lots of things *pro.* and *con.*
10319. What is your own experience of his general conduct and reputation as a police officer? It would depend upon whose point of view you looked at it from.
10320. From your own point of view? He is a nuisance to me, he brings me so many cases.
10321. *His Worship.*] He is an active and energetic officer? Undoubtedly.
10322. *Mr. Abigail.*] Do you know that there is no officer attached to that Redfern police division who so often comes in for abuse on the part of defending attorneys or for observations from the Bench for the conduct of his cases there? If you will let me answer in my own way I will certainly answer you. Granting that defendant's lawyers almost invariably do abuse police witnesses, I may admit that they perhaps abuse Quelch more than the ordinary.
10323. What about the observations from the Bench;—have not you yourself heard observations from the Bench? You mean derogatory observations, do you not?
10324. *Mr. Bull.*] That is what my friend wants.
10325. *Mr. Abigail.*] I want the truth? I would not like to say I have, as to the truth of his evidence; I have, as to the manner of giving it. His mannerisms may jar.
10326. Do you know anything about the Redfern police;—is not there a considerable amount of disorganisation there? I think a terrible lot.
10327. And no doubt about it? No doubt about it.
10328. And does it not arise out of the alleged favouritism by Superintendent Lawless of Quelch and Dukes? [*Witness did not answer.*]
10329. Does not this ill-feeling arise, from what you have heard and seen, from an alleged favouritism on the part of Inspector Lawless towards Quelch and Dukes? [*Witness did not answer.*]
10330. Is it not alleged that the Inspector unduly favours Quelch and Dukes? I certainly have heard allegations to that effect.
10331. Have you ever heard that the ill-feeling arose from any sectarian grounds, except what you might have heard Mr. Lawless say? I certainly have not.
10332. Do you believe, from your observation and experience, that there is any sectarian ill-feeling or bitterness in the Redfern ranks? No, not in the *ranks*, I do not.
10333. *Mr. Bull.*] The very case that Mr. Abigail refers to, in which you say the lawyer took some exception with regard to a statement made, was a charge against Mrs. Graham, was it not? It was a case of mother and son.
10334. The boy was seen leaving the house with a bottle of stuff, and two men had preceded him along some right-of-way? Yes.

Michael Madigan was recalled:—

- M. Madigan.
22 Nov., 1897.
10335. *Mr. Abigail.*] You have heard Quelch to-day swear that he saw you; your back was turned to him, while he was peeping through this sash, and that you were holding the horse's leg up;—is there a word of truth in that? It is utterly false.
10336. Were you holding the horse's leg up? No.
10337. How was it held up? It was held up by a rope during the time of the operation.
10338. *His Worship.*] The hind leg? No sir, the front leg.
10339. You could not be holding up the front leg and performing the operation, that is impossible.
10340. *Mr. Abigail.*] Did you hold the leg up with the operation going on? No. No operation could be performed with the foot on the ground.
10341. Was the front leg near the window? Yes.
10342. Tell me this: As a matter of fact, did you, after the case was over, actually go to the extent of applying for and getting a copy of the depositions? I did.
10343. And did you take your solicitor's advice about a prosecution for perjury? I did not. I went on my own responsibility. I reckoned I had enough witnesses when I had nine at the Court and only three called. I asked the Magistrate to hear all the witnesses, as the case would be detrimental to my business, and I heard a wrangle here a while ago about the observations the Magistrate made. He said the operation was a justifiable and necessary one, and he said people have to go through pain sometimes as well as animals.
10344. You were prepared with nine witnesses;—how many people were in the forge altogether? About the time that Quelch came on the scene?
10345. How many people at the time the operation was going on? There were eight or nine, or might have been ten.
10346. Did you have all the witnesses there? I had them all there.
10347. Now, tell me, had you, at the Redfern Court, on the 21st August, 1894, nine witnesses and yourself to prove that it was Crilley and not you who had performed this operation? Yes sir, that is with the veterinary surgeon.
- 10348.

10348. *Mr. Bull.*] Is it not absolutely certain that the veterinary's evidence must have closed the case.
10349. *Mr. Abigail.*] Did you intend originally to prosecute for perjury? Yes, and I intend after this inquiry.
10350. *Mr. Bull.*: I object to that.
10351. *Mr. Abigail.*] Why did not you? I had not the funds then. I have the funds now.
10352. *His Worship.*] You are rather late in the day? Mr. Quelch has perjured himself on this inquiry, now, if he is on his oath.
10353. *Mr. Bull.*] You are on the list of voters? I am.
10354. *Mr. Abigail.*] Are you in Mr. Dacey's electorate? No, sir. I went to Mr. Dacey; he never came to me.
10355. *Mr. Bull.*] Do you remember Vane calling upon you lately with regard to your name upon the Electoral Roll? On the Jury List—yes.
10356. What did you say to him? "It is no good of your putting me on the Jury List, because I would not listen to a policeman's evidence."
10357. Didn't you say this: "It is no use your putting this on the list, because if a policeman's case came before me I would hang him"? I beg your pardon, I said if a man's life depended on a policeman's evidence I would not listen to the police.
10358. Did you give your reason then? I did.
10359. What was it? On account of the way in which I heard Quelch swear.
10360. You have a good opinion of Vane? I believe he is a gentleman.
10361. But if he came before you in a case, giving evidence, you see what that brings you to;—you have not a good opinion of the police? How can I have?
10362. *Mr. Abigail.*] Your experience of Quelch would not allow you? Certainly not. There are gentlemen among the police, I admit, but how are you going to find them?
10363. *Mr. Bull.*] You have been before the Court before? Yes.
10364. Were they all dismissed? Not all dismissed.
10365. I suppose the policeman in that case swore a lie? Yes.
10366. *Mr. Abigail.*] You were only a witness before? Yes.
10367. *Mr. Bull.*] What was the policeman's name in that case? Mr. Snooshaw; he was a country gentleman, up in the northern district.
10368. *Mr. Abigail.*] He has been in trouble for perjury? Something like that. I have seen it in the papers lately.

Constable James Christison, recalled:—

10369. *Mr. Abigail.*] I want to know are you a Roman Catholic or a Protestant? I am a Protestant—Presbyterian.
10370. Do you know of any sectarian ill-feeling in the ranks at Redfern? Not to my knowledge.
10371. Particularly in connection with this inquiry? No.
10372. *Mr. Bull.*: This is not a charge. If there is anything in this it is likely to introduce sectarian ill-feeling now.
10373. *His Worship*: This does not relate to any specific charge.
10374. *Mr. Abigail*: It has gone on the depositions from no less a person in this inquiry than the very Inspector of the division to which Quelch is attached, and of which Quelch is the alleged favourite. If that is allowed to go on the depositions, while it will not influence your Worship, it is a permanent record, and it is a record of the very blackest kind that could possibly be recorded; besides, if it is allowed to go unchallenged and it is untrue, it will not earn, as it should earn, as I said the other day, the reprobation of every honest and honorable man.
10375. *Mr. Bull*: It was a mere matter of opinion by Mr. Lawless.
10376. *Mr. Abigail*: He distinctly and positively swore before he left the witness-box that this was simply a sectarian inquiry, and then I immediately asked him in cross-examination whether Constable So-and-so was a Protestant, or an Orangeman, or a Roman Catholic, and your Worship remembers that when I was asking him questions, and assuring him that the witnesses were Protestants, he said, "Oh, I do not know," but where he could strain it and say, "Oh, I think they are Catholics," he did so. I think these men should be allowed to state what their religion is, simply to show how little justification there is for their Inspector's observation.
10377. *His Worship*: I do not believe that the question of religion has affected the evidence in any way.
10378. *Mr. Abigail*: There is one other matter that I am instructed to point out, and that is this, that serious complaints have been made that Quelch should have been allowed free access to these defaulter's sheets, and have been allowed the right to copy them out, instead of their being kept in proper custody all the while, and their being called for from proper custody when required, and that only goes to show that there has been undue favouritism.
10379. *Mr. Bull*: I have never recognised, from first to last, in any instructions of mine from Quelch that there has been any sectarian feeling. I have never raised the question, and I have never had instructions to raise it, and I have never dreamt that there was any such thing. With regard to what my friend has said about the defaulters' sheets, I might tell my friend that Quelch has assisted this Commission greatly, and saved this Commission a great deal of trouble. No other man in the police station at Redfern could have assisted the Commission so much.
10380. *Mr. Abigail*: I think there is one duty, and a very pleasant duty, which I have now to perform, and that is to thank your Worship for the way in which you have heard this case, and the indulgence you have given us. In the heat of the case there may be little unpleasantnesses, but now it is over I have to thank your Worship.
10381. *His Worship*: I am afraid I have been a little impatient myself now and then.
10382. *Mr. Abigail*: I must also thank the shorthand-writer, Mr. Garlick, for the way in which he has helped us in the inquiry. He has not stuck us up once, although we have put him to the severest test, and have given him an immense amount of work to do. He has shown himself to be a writer of the highest ability.
10383. *Mr. Bull*: I cordially endorse Mr. Abigail's remarks about both of you gentlemen.
10384. *His Worship*: I thoroughly agree with what you say, and hope that there will be some more substantial acknowledgment of Mr. Garlick's services.

[At 4:45 p.m. the Commission adjourned *sine die*.]

M. Madigan.
22 Nov., 1897.

Constable
J. Christison.

ROYAL COMMISSION *re* SENIOR CONSTABLE QUELCH.

APPENDICES.

Exhibit No. 1.—Part a.

Joseph Brüll, "Somerset Hotel," Redfern.—Complaint against Senior-constable Quelch.

INFORMATION.

New South Wales, to wit. }
Metropolitan }
Licensing District. }

45 Vic. No. 14, Sec. 63.

BE it remembered, that on this 8th day of January, in the year of our Lord one thousand eight hundred and ninety-four, at Redfern, in the Colony of New South Wales, Edmund Lawless, a Sub-Inspector under the Licensing Acts of 1882-3, informs me, the undersigned, one of Her Majesty's Justices duly assigned to keep the Peace of our Lady the Queen in and for the Colony of New South Wales,—that on Sunday the 7th day of January, in the year of our Lord one thousand eight hundred and ninety-four, one Joseph Brüll, being the holder of a publican's license for the premises known as the "Somerset Hotel," situate at Pitt-street, Redfern, in the district of Redfern, in the said Colony, and within the Metropolitan Licensing District, did at ten minutes past 1 of the clock in the forenoon of the date last aforesaid, permit liquor to be drunk on his said licensed premises by persons who were not travellers nor *bonâ fide* lodgers, nor inmates drinking such liquors at a part other than the public bar of such licensed premises, contrary to the Act in such case made and provided; whereupon the said Edmund Lawless prays that I, the said Justice, will proceed in the premises according to law.

Exhibited at Redfern, in the said Colony, on the day }
first above written, before me,— }
C. JESSON, Justice of the Peace.

EDMUND LAWLESS.

Exhibit No. 1.—Part b.

SUMMONS.

To Joseph Brüll, of the District of Redfern, in the Colony of New South Wales.

WHEREAS information has this day been laid before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that, on Sunday, the 7th day of January, 1894, you, being the holder of a publican's license for the premises known as the "Somerset Hotel," situate at Pitt-street, Redfern, in the district of Redfern, and within the Metropolitan Licensing District, did, at ten minutes past 1 of the clock in the forenoon of the date last aforesaid, permit liquor to be drunk by persons on your said licensed premises who were not travellers nor *bonâ fide* lodgers nor inmates drinking such liquors at a part other than the public bar of such licensed premises. These are therefore to command you, in Her Majesty's name, to be and appear on Tuesday, the 16th day of January, 1894, at 10 of the clock at the forenoon, at the Police Office, Redfern, in the said Colony, before such Stipendiary Magistrate in and for the Metropolitan Police District in the said Colony as may then be there, to answer to the said information, and to be further dealt with according to law.

Given under my hand and seal, this 8th day of January, in the year of Our Lord one thousand eight hundred and ninety-four, at Redfern, in the said Colony.

C. JESSON, J.P.

Exhibit No. 1.—Part c.

Mr. Smith for defence.
Plea—Not guilty.
All formalities admitted.

William Edward Quelch, on oath, states as follows:—I am a senior-constable of police; I remember the 7th instant; I was on duty near defendant's hotel at 12:30 a.m.; I saw his parlour fully lit up; the hall in Phillip-street was fully lit up, and a glimpse of light showing through the bar door; I listened; I heard the voice of a female in the bar; I heard the drawing of corks, the rattle of glasses, and the beer-engine working; I went to the Pitt-street parlour door, and looked through the key-hole; it is in a parallel line with a door from the bar into the parlour, also the door leading from the hall into the parlour; the bar door was open; I saw the female hand some drink into the parlour; I heard four or five different voices in the parlour; I recognised one voice as Constable Swan's, of Redfern Police Station; I waited watching outside until ten minutes past 1 a.m.; I saw two or three rounds of drinks supplied; at ten past 1 o'clock a.m. Swan addressed a conversation to the licensee by name; I saw the licensee immediately afterwards; Swan said, "Mr. Brüll, I had better be getting home"; Brüll said, "Don't go yet, Mr. Swan; we are not going to bed yet; sit down"; Swan then stood up right abreast of the door that was shut; another round of liquor was supplied by a female; all the glasses except one were handed to men sitting at the table; the glass of beer was handed to Constable Swan, who drank it, and put the glass down as if on the table; the bar door was open before the drinks were supplied; Swan remained standing for several minutes longer; at 1:30 a.m. Swan and two other men were let out of the side gate in Phillip-street; I went to the side gate and called to the person who let them out; he wouldn't come; he ran inside; the three men were under the influence of drink; when Swan heard my voice he left his two companions, and hurried in the direction of his home close by; I stopped him near his home; the other men remained at the corner; I said to Swan, "Why were you in the hotel at this hour of the morning, drinking, and making yourself like this? you ought to know better, being a constable"; he made no reply; I said, "I shall report you"; Swan was off duty and in plain clothes; when I went back to the hotel I called to defendant; he had the door opened; he was sitting at the table with another gentleman; the female stood at the door; I said to Mr. Brüll, "What conduct is this, letting these three men out this time in the morning under the influence of drink? you ought to know better, especially as regards Constable Swan; I shall report the whole matter to my Inspector"; defendant and the gentlemen begged me to let the matter drop; he said, "Don't report it this time for the sake of the constable"; I said, "I shall do nothing of the sort"; I produce a pattern of the keyhole to show the size of my view or extent of it; at 2:20 a.m. I was opposite; defendant was on his balcony; two constables were passing; defendant addressed them; he said, "Good morning; look out, Quelch is on the other side; he caught me," and then his voice dropped; I heard him add, "and is going to report him."

To Mr. Smith: I reported Constable Swan for being in the hotel at that hour of the morning; it is a breach of the Police Regulations; I never reported that I looked through the keyhole of the bar door; I wasn't at the hotel two minutes past 12 o'clock; Swan didn't see me until he came out; I spoke to him; Brüll, the licensee, asked me not to report the matter for the sake of the constable; I accused defendant of supplying liquor after hours; I didn't knock at the door; the gentleman I saw sitting with Brüll wasn't one of the three who went out; I said nothing to the gentleman sitting with Brüll.

Taken and sworn at Redfern, this 16th day }
of January, 1894, before me,— }

GEORGE H. SMITHERS, D.S.M.

WILLIAM E. QUELCH.

Exhibit No. 1.—Part d.

George Henry Edward, on his oath, states as follows:—I am a constable of police; about 2·20 a.m. on 7th instant I was passing the defendant's hotel; I stood at the corner; defendant and his wife were on the balcony; he said to me, "Good night! look out, Quelch is on the other side; he caught one coming out this morning and is going to report him."

To Mr. Smith: I think I was warned so I would not stand gossiping.

Taken and sworn, at Redfern, this 16th day }
of January, 1894, before,—

GEORGE HENRY EDWARDS.

GEORGE H. SMITHERS, D.S.M.

Exhibit No. 1.—Part e.

Herbert William Hind, on his oath, states as follows:—I am a constable of police; I remember the 7th instant, at twenty past 2 o'clock a.m., I was passing the defendant's hotel; someone on the balcony said, "Good night! Quelch is opposite; he caught one coming out and is going to report him"; I was in uniform and under the light; I had never been in the defendant's hotel; he never said, "Quelch nearly caught one"; I was only three days in the Force then.

Taken and sworn at Redfern, this 16th day }
of January, 1894, before me,—

HERBERT W. HIND.

GEORGE H. SMITHERS, D.S.M.

Exhibit No. 1.—Part f.

DEFENCE.

Joseph Brüll, on his oath, states:—I am a hotelkeeper living at "Somerset Hotel"; I remember the 6th instant; a Mr. Cooke visited me from Wagga; he stayed until last Wednesday; Walter Griffith, a friend of ours, stayed there that night; Mr. Swan was there; he came in to see Mr. Cooke about 10 p.m.; they are old friends; Swan had a drink before 11 o'clock; Griffiths and Cooke came in at 11·30 p.m., and were lodgers; they had a drink and asked Swan to join them; he refused; he gave a reason; I don't think he got anything at any time; about 12·15 a.m. he went to go; he came back and said, "Senior-constable Quelch is at the corner"; he waited; Griffiths went out and came back and returned; he went out with Swan; Cooke never left the parlour; no third man could have come out of my place; my wife would have let the men out; about twenty minutes after the men went out, Quelch knocked at the door; I had it opened; Cooke, my wife, and self were present; Quelch said, "Mr. Brüll, this is a nice hour to let men out of your house, especially Constable Swan"; I said, "Don't be hard on a fellow"; he went away; later I sang out to two policemen, "Good night, look out, Quelch is over there, he nearly caught a man coming out of my place"; Quelch couldn't see the table from the key-hole; he said nothing to me about summoning me; Swan wasn't drunk when he left, nor any of them.

To Police: Cooke was a *bonâ fide* traveller; Griffiths was a friend of ours; I am particular about who I let in; I cannot say how many drinks Swan had; he had more than one; he was never in my place before, after hours; my wife was serving drinks; I swear Swan had no drink after 11 o'clock p.m.; Cooke came from Wagga to-day.

Taken and sworn at Redfern, this 16th day }
of January, 1894, before me,—

JOSEPH BRÜLL.

GEORGE H. SMITHERS, D.S.M.

Exhibit No. 1.—Part g.

Charles Cooke, on oath, states as follows:—I am a baker, living at Wagga; I know defendant; I arrived in Sydney at 7 p.m. on last Saturday week; I put up at defendant's; I went out and returned with a friend named Griffiths, who stayed all night; when we returned I found Swan there; I had made an appointment with him, but was late; he was sober; he refused to have a drink at my request; I gave him a cigar from my pocket; he got up to leave about 12·15 a.m.; he came back and said, "Quelch is there, I don't care to go out"; after he ultimately went, Quelch knocked; he said something "about letting out a constable at that hour"; I was a lodger; I went to the hotel about 7 p.m.; when we returned we had a drink; Swan, I swear, wouldn't have one; I came from Wagga to-day; Swan was quite sober.

GEORGE H. SMITHERS, D.S.M.

Exhibit No. 1.—Part h.

Walter Griffiths, on oath, states as follows:—I am a grocer, living at 49, Cooper-street, Surry Hills; I remember the 6th instant; Mr. Cooke, a friend of mine, came down from Wagga; I met him in Sydney; we ultimately decided I would go with him and stay all night at his hotel; I did so; I saw Swan there; Cooke and I had a drink; Swan was asked, and refused; Cooke gave him a cigar; Brüll had a drink with us; Swan went out, and came back; he didn't say why he didn't go; Swan and I ultimately left; a man was in the lane; Swan was sober; we walked up the street; Quelch said, "A nice time to be coming out of an hotel"; Swan made no reply; I left him; ultimately returned to the hotel, and slept there, as decided upon early in the evening.

To Mr. Lawless: I met Cooke about 10·30 p.m., I think; I arrived at the hotel at 11·30 p.m.; Cooke called for drinks; three were supplied to the landlord, Mr. Cooke, and myself; Cooke asked Swan to drink; Swan refused, and gave some reason, which I didn't catch; we left about ten past 1 o'clock a.m.

Taken and sworn at Redfern, this 18th day }
of January, 1894, before me,—

WALTER GRIFFITHS.

GEORGE H. SMITHERS, D.S.M.

Exhibit No. 1.—Part i.

William Richard Swan, on his oath, states as follows:—I am a constable of police; on 6th instant I was off from 6 p.m. until 10 a.m. next day; I went to defendant's hotel in the evening to see Cooke; I met him at 2 p.m., and made an appointment for 10 p.m.; I went there; Cooke came in at 11·30 p.m.; between 10 and 11 o'clock p.m. I had two glasses of ale; after 11 o'clock p.m. I had no drink; I stayed as I wanted to see him; he came in with Griffiths, and asked me for a drink; I refused, saying, "I won't let anyone say I ever drank in an hotel after 11 p.m."; I was going out at 12·20; I saw Quelch opposite; I thought it would be judicious to wait; I went out at twenty past 1 p.m. with Griffiths; we saw a man come up; Quelch came up and spoke to me, saying, "This is a nice thing, Swan, coming out of an hotel at this hour"; he spoke in such an angry manner that I would not reply to him, for fear of a quarrel; I was perfectly sober; Cooke gave me a cigar; the man that came up when we were outside was not sober.

To Mr. Lawless: I saw Quelch opposite about 12·20 a.m.; I looked at my watch; I know of a rule prohibiting a constable from frequenting an hotel after hours; I know of no rule against going there on one occasion to see a friend I had not seen for years; I was going on duty, just at 2 p.m., when I first met Cooke; I would be very much surprised to learn Quelch was in the station at 12·20 a.m.; he never saw me drinking.

Taken and sworn at Redfern, this 18th day }
of January, 1894, before me,—

W. R. SWAN.

GEORGE H. SMITHERS, D.S.M.

Exhibit No. 1.—Part j.

Margaret Brüll, on oath, states as follows:—I am wife of defendant; I remember the 6th instant; Swan came in about 10 p.m.; I cannot remember what drink he had; he had a drink; Cook was boarding at my place; he came in at 11:30 with Mr. Griffiths; he asked for drinks; Swan refused to have one; one was not supplied him; it was after 11 p.m.; he had no drink subsequently; after 12, midnight, Swan wanted to go; I cannot say I heard his reason for not going; about 1:30 a.m. he left with Griffiths; no one else went out; the men were both perfectly sober; Quelch subsequently knocked at the door; he said, "This is a nice hour of the night to let people out of your house, especially Constable Swan"; nothing was said about a breach of the Act; later in the night I remember my husband saying something.

To *Mr. Lawless*: I supplied Swan before 11 p.m. with a drink; I did not afterwards; Swan came in to-day to see if the magistrate had examined the key-hole; Swan occasionally comes to our place when off duty.

Taken and sworn at Redfern, this 18th day }
of January, 1894, before me,— }

M. BRÜLL.

GEORGE H. SMITHERS, D.S.M.

Lawless v. Brüll.—Case dismissed. Redfern, 18/1/1894.—GEORGE H. SMITHERS, D.S.M.

Exhibit No. 1.—Part k.

Redfern Station, 8 January, 1894.

SENIOR-CONSTABLE William E. Quelch respectfully reports Constable William R. Swan, No. 5,363, of this station, for being found in the "Somerset Hotel," Pitt and Phillip Streets, Redfern, between 12:30 and 1:30 a.m. on Sunday, the 7th instant.

The Senior-constable begs to state that at 12:30 on Sunday morning he was passing the above hotel, and hearing a noise at that hour in the bar and parlour, which was lit up, he waited outside and listened, and recognised the voice of the constable inside; he looked through the door keyhole, where he could see the constable with a glass of beer in his hand. There were several other persons inside also, who were supplied with liquor several times.

At 1:10 a.m. the constable said to the licensee, "I had better be getting"; the licensee replied, "Don't go yet, Mr. Swan; we are not going to bed yet; stop a little longer; sit down."

Defaulter's
Book.—G. READ.

At 1:30 a.m. the constable and two other men were let out the side gate in Phillip-street; the constable and the two men were under the influence of liquor; the constable, on hearing the senior-constable's voice complaining at the gate to the inmate of the hotel, hurried away from his companions towards his home. The senior-constable went to the constable and asked him why he was in the hotel at such a time in the morning. He was in such a condition he made no reply.

The senior-constable went back to the side door, and called to the licensee; the door was opened by a female, and he complained to the licensee of letting the constable and the other men out in such a state and hour in the morning, and informed him that he would report the circumstance to his Inspector.

The licensee begged earnestly of the senior-constable not to say anything about the matter for the sake of the constable, who is a married man with a family, and resides near to the hotel, and went off duty at 6 p.m. the previous evening.

The senior-constable could not say how long the constable had been in the hotel previous to the time stated.

WILLIAM E. QUELCH,
Senior-constable.

George Read, Esq., Superintendent.

Forwarded to the Superintendent, G. Read, Esq., 8/1/94.—E. LAWLESS, Inspector.

Exhibit No. 1.—Part l.

Redfern Station, 8 January, 1894.

CONSTABLE William R. Swan, No. 5,363, respectfully begs to report to the Superintendent *re* attached report by Senior-constable Quelch that he admits leaving the hotel at 1:15 a.m. on the 7th instant. The constable was about to leave at 12:15 a.m. when he saw the senior-constable on the opposite side of the street. Knowing what the senior-constable was, the constable did not go out in front of him. The constable went into the hotel at 10 o'clock to meet a friend who arrived that morning from Wagga Wagga, and is staying at the hotel, but his friend (whose name is Charles Cooke), did not arrive until 11:30 p.m. The constable had not seen Mr. Cooke for over ten years until that night; and the constable thinks it very hard that he cannot have some latitude on an occasion like that, especially as Mr. Cooke was a kind friend to the constable's mother at the time of his father's death. The senior-constable states that he saw the constable drinking, and that he came out of the hotel with two others that were drunk. The constable was not drinking, and it was impossible for the senior-constable to see any such thing through a keyhole of a door, also that he did not leave the hotel with two others, there only being one other person, and that other person's name is Walter Griffiths, a friend of Mr. Cooke's, and he stayed with Mr. Cooke at the hotel that night.

The senior-constable also states that the constable was drunk, and was unable to answer when spoken to. The constable did not answer him; if he had, no doubt there would have been unpleasant words through the rough manner in which the senior-constable spoke, and he would have more to add to his now untruthful report. The constable kindly asks the Superintendent to cause thorough investigation, as the constable intends to bring before your notice the conduct of the senior-constable.

WILLIAM R. SWAN,
Constable.

G. Read, Esq., Superintendent.

Exhibit No. 1.—Part m.

To the Inspector-General of Police, Sydney.

"Somerset Hotel," Corner, Phillip and Pitt Streets,
Redfern, 10 January, 1894.

Dear Sir,

Having been informed that William Swan, Police Constable, of Redfern Division, has been reported for coming out of "Somerset Hotel" on the morning of the 7th instant, at 1:10 a.m., I wish to place the case before you, as far as I know.

I arrived from Wagga Wagga on Saturday morning by the mail train, and went to stay with my friends, Mr. and Mrs. Brüll, of the "Somerset Hotel."

Having met Constable Swan (an old friend of mine), I promised to meet him after he came off duty, or about 10 o'clock p.m.

I did not keep my appointment, having, in the meantime, met another friend named Walter Griffiths, and we went to the theatre.

I invited Mr. Griffiths to come and stay with me, which he did, and arrived at the hotel at about 11:30 p.m., where we met Mr. Swan, who was waiting to see me.

I asked my friends to have a drink, and Constable Swan refused, saying to me, "I would not leave myself open, in case, at some future date, I might have to proceed against the publican, and I would not have him say, 'You had a drink in my hotel after hours.'"

Myself and Griffiths had a drink, which I thought I could have, being a boarder.

Trusting you will give this your favourable consideration,

I remain, yours respectfully,
CHARLES COOKE,
Wagga Wagga.

Mr. Read.—E.F., 11/1/94.

Exhibit No. 1.—Part n.Police Department, Superintendent's Office, Metropolitan District,
Sydney, 17 August, 1897.

Memo.

I AM unable to recall all the circumstances connected with Constable Swan's alleged misconduct; but he was off duty at the time, and the investigation could not be completed in the absence of material witnesses. I therefore permitted the case to stand over.

Senior-constable Quelch has been about eleven years in the service. Before serving in the General Force, he was in the Water Police. He has been efficient, and his conduct has been good. No serious complaint has ever been made against him.

The Inspector-General of Police.

G. READ,
Superintendent.
Exhibit

Exhibit No. 2.—Part a.
J. Brüll, "Somerset Hotel" Case.

"Somerset Hotel," Redfern, 22 January, 1894.

I BEG to bring under your notice a case recently tried against me under the Licensing Act, at the Redfern Police Court, the information being sworn by Inspector Lawless at the instigation of Senior-constable Quelch, of Redfern, charging me with allowing liquor to be drunk on my licensed premises by others than lodgers or *bona-fide* travellers, his principal evidence being having seen drinks served after hours through a key-hole. The case was heard before Mr. Smithers, S.M., and dismissed, remarking that the senior-constable had evidently made a mistake. I wish to draw the Inspector-General's attention to the deposition of the constable, in which he swore that he was watching my place for fully one-and-a-half hour to obtain a case against me, which he thought he did, but did not succeed, by giving false and malicious evidence. Is this the constable's duty? and such annoyance I call great injustice.

Since my case was heard, I found out that the constable's reason for taking proceedings against me was to have a clear case of dismissal against Constable Swan, of Redfern Police. For this reason I beg that the Inspector-General will inspect the depositions of the constable, and his report against Constable Swan, which will differ in many points. As I had to attend two days the Police Court, I was put to a lot of inconvenience and expense, as I had to bring Mr. Cook from Wagga Wagga down as a witness, and especially as I had arrangements made to be an inmate at the Prince Alfred Hospital about ten days ago; and I trust that the Inspector-General may see his way clear for compensation, for the great injustice he received by that constable.

I also beg to mention that I am a subject to great annoyance from the constable, as he has circulated a report to civilians that he will watch me till he has another case against me, also against Constable Swan; so I trust that the Inspector-General will kindly look fully into this matter.

I have, &c.,

JOSEPH BRÜLL.

Referred to Superintendent Read for inquiry and report. I have already expressed my strong disapproval of constables acting as eavesdroppers, or spies at key-holes; the hour-and-a-half could have been more beneficially employed thief-taking. Brüll has been a constable, and is a very respectable man, and I trust that Mr. Read will see that he is not persecuted. I think the senior-constable should pay all expenses, and I doubt his fitness for the rank he holds.—E.F., 23/1/94. Supt. Read.

Exhibit No. 2.—Part b.

Redfern Station, 24 January, 1894.

Sir,

Re attached complaint of Mr. J. Brüll, licensee of the "Somerset Hotel," Pitt-street, Redfern.

Having read the complaint of Mr. Brüll, I certainly feel surprised at the statement made that I swore to the information which he, as an ex-constable, must have known was only an exhibit. With reference to Quelch's watching his house for an hour and a half, the depositions contradict that. Of course I was not aware until after the information had been filed, and I had received the report against Constable Swan, how the matter stood. I told Quelch, when he mentioned the fact of the keyhole, that having no person to corroborate him I did not believe he would get a conviction. As he was so persistent in the matter, I did not consider I had any power to obstruct the Senior-constable in his duty during the hearing of the case. Mr. C. Smith, the solicitor for Brüll, got possession of a portion of the depositions, and took them out into the yard, and admitted to the Magistrate that he had read them to his witnesses who had previously been ordered out of Court, greatly to our disadvantage. He was called to account by His Worship, but the mischief had been done. Quelch practically denies that he has any ill-feeling as against Constable Swan, or that he ever made any comments to anyone about the defendant.

Mr. Brüll has only held the license for about a month or five weeks, and there has been no complaints against the house, except the one referred to in this report.

I have, &c.,

EDMUND LAWLESS,

Inspector.

George Read, Esq., Superintendent.

Exhibit No. 2.—Part c.

Superintendent's Office, Sydney, 24 January, 1894.

MEMO.

Copy of depositions in the case of Brüll herewith forwarded.

SENIOR-CONSTABLE QUELCH has but recently been promoted to his present rank. During the nearly seven years he has served in my district he has performed his duty to my entire satisfaction, and he is considered a thoroughly trustworthy officer. I think it probable but for the extraordinary proceeding of taking the depositions out of the Court, and reading them to the witnesses that the result of the prosecution would have been different, as I am quite satisfied Quelch would not have given the evidence he did unless it was true. The principal reason for giving attention to the house was to place himself in a position to deal with Constable Swan, who, instead of taking his rest, was spending his night in a public house. The Senior-constable acted very wrongly in taking observations through the keyhole, and he would have acted more judiciously, if he thought the circumstances required it, had he procured the assistance of a Sergeant or Licensing Sub-Inspector, and boldly demanded admission into the house; but I should be sorry to see him punished for a little excess of zeal, and fear it might have the effect of permanently discouraging him. I do not believe he has intimated to anyone that he intends to give special attention to Brüll's house, and I have given instructions that he must not be subjected to any exceptional supervision; of course if he break the law he will have to suffer. Observing that Constable Swan was becoming somewhat irregular in his habits, I gave instructions that he should be closely looked after, as it appeared to me that a constable who was found in a public-house between 1 or 2 in the morning was not likely to be in a condition physically to perform his duty efficiently.

GEORGE READ,

Superintendent.

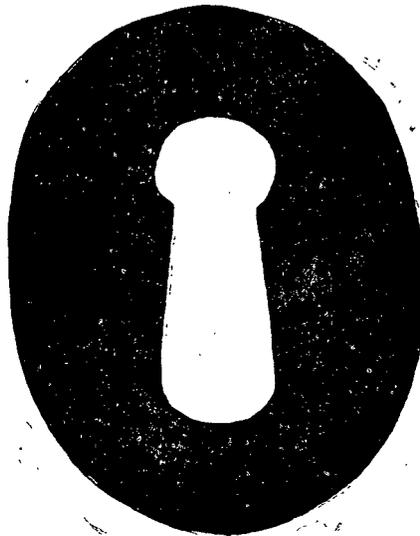

The Inspector-General of Police.

Write to Brüll in the third person, that the depositions do not show that the Senior-constable was watching the house for an hour and a half. The information was not laid by the Inspector, and the claim for compensation is out of the question. So long as he observes the law he need not fear interference by the police.

My minute should be read to Senior-constable Quelch. As he bears such a good character I will take no further action.—E.F. Superintendent Read, 25/1/94. The minutes of the Inspector-General and Superintendent have been read and explained to Senior-constable Quelch.—E. LAWLESS, Inspector. George Read, Esq. Superintendent, 25/1/94.

Noted and returned.—G. READ, Supt., 27/1/94. The I.-G.P.

Exhibit No. 3.

Exhibit

Exhibit No. 4.—Part a.

Sir, Water Police Station, Sydney, 31 January, 1887.
I would respectfully beg to bring under your notice the insubordinate conduct of Constable Quelch towards me on the 29th instant.

I had an occasion on that date to find fault with Constable Quelch and Constable Anderson for wasting two hours longer than was necessary in taking a boy to the "Vernon" in the skiff, as it was reported to me by Senior-constable Skinner that he informed Constable Quelch to make all haste he could, as the skiff was wanted for other duty. Constable Quelch remarked that he should take his time. The abovenamed constable left the station at 9:30 a.m. on the above date, and returned at ten minutes past 1 p.m. I called both men into my office, and asked the reason of the unnecessary delay, as the skiff was required for other duty; and I remarked to Constable Quelch that he told Senior-constable Skinner that he would take his time. Constable Quelch then became insolent in manner and tone, and pointing to Senior-constable Skinner said, "That man there is not telling the truth." I reminded Constable Quelch that he was not addressing Senior-constable Skinner as he ought to do; but he became so excited that I ordered him out of my office, as his conduct was such that he would not listen to any remarks that I had to offer. On leaving the office Constable Quelch stated that he would send an application for a transfer to the Metropolitan Police. I then called him back, and told him I would strongly recommend his application. On the 31st instant, finding that Constable Quelch did not send in his application for a transfer, I called on him for an explanation, when he told me he intended sending in an application to be transferred to the Detective Police. I told him I should not recommend him for that position, as I did not consider him fit for it. Constable Quelch then, as is usual in manner, became very excitable, and said in an insolent manner that he should send a report to the Inspector-General about this matter, and refused to supply me with a report that night, although I told him he could be relieved from duty until he had done so. I find Constable Quelch is a most violent-tempered man, always disputing the orders he gets from the senior-constables. I consider it would be an advantage to this station if he were removed.

JOHN DONOHOE,
Inspector.

The Water Police Magistrate.

Sergeant Garrick states: I was present at the office on 29th January last, on the occasion when Constables Quelch and Anderson were brought in to explain the unnecessary delay in returning from Biloela to the station; Water Police Constable Quelch's conduct and manner then were most excitable, and referred to Senior-constable Skinner, in his presence, as "that man," making other unbecoming remarks; his conduct was insubordinate in the extreme, and in consequence Mr. Donohoe had to order him out of his office; as he was leaving it, he said in an undertone, "he would thank him if he would recommend his transfer to the Metropolitan Police"; he repeated this a second time, and I drew Mr. Donohoe's attention to it; Mr. Donohoe then called him back, and told him if he sent in the application he would strongly recommend it, which he agreed to, and then left the office; with regard to the paddles and oars at the boat-shed, to which Constable Quelch refers in his first report, there is quite a sufficient supply on hand; there were three pairs or sets of paddles there at the time, 10 feet long, properly fitted for the skiffs, independently of two pairs of sculls then in a skiff doing duty at Quarantine Station; Water Police Constable Quelch left the Water Police Station for Biloela on 29th January at 9:30 a.m., to go to the "Vernon," and did not return till 10 minutes past 1; I have been in the Water Police force twenty-three years, and I consider that instead of the trip in question taking three and a half hours, the time should not have exceeded two hours; at this time the launch was under repair, and the services of the skiff would be urgently required to see the mail-boat "Iberia" away from Neutral Bay at 1 o'clock; the general conduct of Water Police Constable Quelch, more especially of late, has been unsatisfactory, in never, after receiving an order, replying to it, so that I never knew rightly whether he understood that order or not, and have had very frequently to call him back to see if he correctly heard it or not; and the senior-constables, Martin, Skinner, and Mannion, have similarly complained of this indifference.

Senior-constable Skinner states: Water Police Constable Quelch has been under me for the last year, and during that time he has been very insolent to me, more than a dozen times, never replying when given an order; the other day (Saturday) I told him to go to the "Vernon" with Constable Anderson, and to make all the haste he could as the skiff would be wanted immediately after for other duty, to which Water Police Constable Quelch replied "that he should take his time"; he left the station at 9:30 and returned about 1 o'clock (three hours and a half), whereas the time ought not to have exceeded two hours; on Mr. Inspector Donohoe speaking to Constable Quelch, I heard him say—pointing to me at same time—"That man there is not speaking the truth," and then turning to Mr. Donohoe, added "I wish you to give me my transfer to the Metropolitan Police," and this was said in a very insulting tone and manner towards Mr. Donohoe, so much so that Mr. Donohoe had to order him to leave his office at once.

Senior-constable Martin states: I have been in the Water Police Force thirty-two years on 26th July; I have been associated with Constable Quelch since his appointment, about a year; I have reason to complain of his conduct generally; he does not obey the orders given him cheerfully—doing everything, as it were, against his will on all occasions; his demeanour and disrespect towards those above him, especially to myself, renders it unpleasant to go on duty with him; I have cautioned him, on one or two occasions, if he did not alter his manner I should have to report him, and latterly he has done so; he is the most disagreeable man I ever did duty with.

Senior-constable Mannion, who has been in Water Police Force for eight years, states: Water Police Constable Quelch has been something over a year in the Service; I have had him on duty under me and have had to give him orders; he never obeys cheerfully, never replies when an order is given, and his demeanour is constantly insulting, ignoring my authority, and a most unpleasant comrade to be associated with; I don't feel comfortable when on duty with him; I don't like taking him with me unless I am compelled.

Exhibit No. 4.—Part b.

Water Police Station, 1 February, 1887.

CONSTABLE W. E. Quelch, No. 5,076, respectfully begs to report to J. M. Marsh, Esq., S.M., through Mr. Inspector Donohoe, on the conduct of Senior-constable Skinner, the senior-constable having accused the said constable of having said the following words, "That he would take his time." The constable denies ever having said such words to the senior-constable, or to any senior or constable attached to the Water Police Station. The senior-constable has been known to pass the following remark at the Central Police Station, whilst waiting at the Superintendent's office, to Constable Tinsley, "That if every man done his duty on our station the same as the above constable done his, there would be no growling between the men." The constable begs to state:—That on Saturday, the 29th of January, the day of the accusation, he was told off in the kitchen by the senior-constable to go with Constable Anderson, his senior member, to take a boy to the "Vernon" in the skiff; the said constable proceeded to the boatshed and launched the skiff, but found that there were no sculls belonging to our Department, and only some temporary oars that we could get; we were only able to use one of them, and with a strong sluicing tide against them, were not able to do the journey in the hot sun as soon as it could be done if things had been favourable with them; the "Vernon" being reached, and having the sail in the boat, Constable Anderson, in charge of the boat, decided to sail back, which meant that we were to beat back the whole of the distance, and being the wrong sort of boat, it meant time, having no keel or centreboard. The constables were back at the boatshed at a quarter to 1 p.m., which could not have been reached any sooner under the same circumstances and heat; had the constables had the opportunity of getting a tow, they certainly would have done so, and would have been back much sooner. On returning to the station, at 1 p.m., the constable-in-charge was remonstrated with as to the length of time we had taken; nothing whatever was said to the constable, being present and in two separate parts of the station, and not one word with reference to the accused constable having said the words before leaving; but after dinner the constable was called in Mr. Inspector Donohoe's office, and was told that he should say the words, "that I would take my time," which the constable most positively denies. The constable begs to state that he has always been an honorable and upright man, which is known to the rest of his comrades; and if the constable had uttered such words he would have owned to it at once. This is the first time that the constable has ever been found fault with, with regard to his duty, having been attached to the Water Police Station thirteen months. The constable, knowing the feeling that the senior-constable has towards the constable, which the constable can prove, and give his reasons for the same, the constable has had to caution the senior-constable that he should keep his place, and ought to know better to mention such things before a young constable. The conduct the constable refers to would have come before J. M. Marsh, Esq., S.M., if the report had been gone into the last time the constable reported the senior-constable for threatening the constable; Constable M'Lean would have satisfied His Worship, J. M. Marsh, Esq., S.M., Constable M'Lean being a witness in the last case. The constable was on the station last Thursday when the senior constable came up to the constable and said, "Have you got a uniform

uniform jacket" in the most uncivil way. The constable, being in a uniform jumper, replied that he had. The senior constable replied, "Go and put one on then when you are on the station for duty." Later on the constable was told off for duty on Circular Quay in company with the senior-constable and two other constables. All four left the station together. The constable was in the same uniform as the senior-constable, but one of the constables wore the same uniform as the constable when he was found fault with, nothing being said to the constable out of uniform the time the constable was found fault with. It was raining hard, but the time the constables went to Circular Quay it was fine. The constable begs to state if he had used the word he has been accused of, the senior-constable would never had let the constable left the station on any account before he had acquainted his superior officer; neither would he have left the constable return without having mentioned the circumstance to the constable. The constable begs to state that since he gave evidence concerning the damage done to one of the skiffs, that the said senior-constable has done nothing else but have a great ill-feeling towards the constable, because the constable would not inform the senior-constable how the boat got broken and on whom the blame was attached; but the constable, knowing the facts of the case, and knowing that the constable in fault was trying to screen himself and place the blame on an innocent man's shoulders, the constable would not inform only his superior, Mr. Inspector Donohoe, and the constable that was innocently blamed with doing the damage to the boat. The constable in fault was doing duty in the same boat the same night with the senior-constable. The senior-constable asked the constable more than one occasion about the damage, but could not get a reply until the case was brought before His Worship J. M. Marsh, Esq., S.M., which proved to turn out as the constable has stated. The constable, being desirous that an investigation be made by his superior, Mr. Inspector Donohoe, but the constable seeing none forthcoming, deemed it advisable to report the circumstance to his Superintendent, J. M. Marsh, Esq., S.M., through Mr. Inspector Donohoe, to the Inspector-General of Police. The constable begs to state that he was suspended from duty without cause, and told to resume his duty a quarter of an hour after. Twenty-four hours then elapses before the constable is spoken to, when the constable was asked whether he was going to hand in an application for transfer to the Metropolitan Police Force. The constable replied that he had no intentions of doing so, when the constable was told that if he did not make one and hand it in that his superior, Mr. Inspector Donohoe, would make one out and forward it for me. The constable replied that his intentions were to make out a report to the Inspector-General, when his (the constable's) superior, Mr. Inspector Donohoe, replied, "You make out a report to the Inspector-General!" The constable was then told by his superior that he was the most saucy man that was ever known, and to go and make out my report and not leave the station until the constable had done so. The constable begs to state that he has been commented on by His Worship Mr. J. M. Marsh and also by Mr. Inspector Donohoe with reference to the manner in which the constable had performed his duty since he had been attached to the station. The constable begs to state that if he desired to be transferred he would hand in his transfer if the constable deemed it advisable. The constable begs that this report will have cause for inquiry, with the object of proving the constable's innocence, and begs that the report will have every consideration from His Worship J. M. Marsh, Esq., S.M., and Mr. Inspector Donohoe.

WILLIAM EDWARD QUELCH.

Exhibit No. 4.—Part c.

Water Police Station, 2 February, 1887.

CONSTABLE W. E. Quelch, No. 5,076, begs respectfully to state, in answer to the report of Mr. Inspector John Donohoe against the constable, of insubordination on the 29th January last:—(1) That he was ordered by S.-C. Skinner to go with Constable Anderson to take a boy to the "Vernon." The constable proceeded with the constable in charge to the boatshed and launched the skiff, the wharf being left at 10 a.m., the constables pulling one oar each, and being a strong tide against them could not gain so much headway, if they had been supplied with the proper service sculls the same as every department under the Crown are supplied with. S.-C. Skinner never made use of the same words before your Worship as he did to Mr. Donohoe. S.-C. Skinner informed Mr. Donohoe that he should say that he informed the constable that the skiff would be wanted for other duty; that is quite correct, and the same words are down in Mr. Inspector's report, but the s.-constable should say in his evidence that he informed the constable that the skiff would be required for to see the "Orient's" boat away, which statement is untrue, and the constable denies the s.-constable may informed the constable in charge.
