INTRODUCTION

This paper provides data from the Australian Bureau of Statistics (ABS) 2021 Census of Population and Housing (the Census) for the 93 New South Wales state electoral divisions (SEDs) as redistributed in 2021. It continues the series of publications from the Parliamentary Research Service that started in 1995 presenting data from the Census by SED. This paper complements and informs interactive tables of Census data by SED available on the [Parliament's website](#).

The information in this paper and on the Parliament's website is the only easily accessible data from the Census for the NSW SEDs as redistributed in 2021. The 2021 Census data presented by the ABS on its QuickStats and Community Profiles pages uses the previous SED boundaries, and data by the 2021 boundaries is only available through the more complex TableBuilder platform.

The paper is structured as follows:

- The **Background** provides information about the variables included in the profile for each SED, changes from previous years, as well as general information about the Census
- The **Definitions** contains details of the definition for each variable, and the electorate population used to calculate it
- The **profiles of each SED** include details of population and other selected variables. For each variable the following information is provided from the 2021 and 2016 Censuses (where 2016 data is available):
 - A count of persons, families or dwellings
 - The count expressed as a percentage of the total electoral division population, or a subset of that population
 - The electorate's rank in relation to all electorates (which for most variables is calculated based on the percentage).

A political party affiliation has been given for each SED. As the electoral districts have been redistributed since the most recent election in 2019, the party affiliation shown is notional only. The affiliation is based on the 2019 election results adjusted by the new boundaries as calculated by Antony Green in [2020/21 NSW Redistribution: Analysis of Final Electoral Boundaries](#), NSW Parliamentary Research Service Background Paper No 01/2021. Where a by-election occurred after the release of that paper in August 2021, the party affiliation has been updated. Where a member of a political party has changed their political affiliation (such as resigning from a party to sit as an independent) the notional party affiliation has not been updated.

The Parliamentary Research Service is able to provide more in-depth and trend analysis of census data on request for members, their staff and parliamentary staff. Please contact DPS.ResearchService@parliament.nsw.gov.au

BACKGROUND

This section contains details of variables that have been added to the electorate profiles in this edition, variables that have been removed from the previous edition and issues regarding data quality and interpretation, both broadly for the Census and for specific variables.

2021 Census data changes: new variables

This December 2022 edition (2021 Census) includes 19 new variables that were not included in the earlier 2022 (2016 Census) edition, including 9 variables that present overall medians and averages. The new variables are:

- Persons who are in an opposite-sex couple in the same household
- Persons who are in a same-sex couple in the same household
- Mortgage repayments are >30% of household income
- Rent payments are >30% of household income
- Not engaged in employment, education or training (NEET) (15-24)
- Persons with one long-term health condition
- Persons with two or more long-term health conditions
- Persons (0-14) with long-term health condition(s)
- Separate house
- Semi-detached housing
- Median age of persons
- Median monthly mortgage repayment
- Median weekly rent
- Median weekly individual income
- Median weekly family income
- Median weekly household income
- Average household size
- Average number of persons per bedroom
- Average number of bedrooms in private dwellings.

Persons who are in an opposite-sex couple in the same household, and **Persons who are in a same-sex couple in the same household** (reported separately as two variables) have been added to this edition. In the 2016 Census, the data reflected both registered and de-facto marriages for opposite sex, and de facto only for same-sex couples. In 2021, the same-sex couples count also includes registered marriages following amendments to the *Marriage Act 1961* in [December 2017](#) to allow the right to marry regardless of sex or gender.

Mortgage and rental affordability (reported separately as two variables) has been added as part of the 2021 Census. These variables measure the number of

households paying mortgage or rent above 30% of household income.

There are limitations in using the ABS mortgage and rental affordability variables as indicators of mortgage and rental stress, due to the way [incomes are imputed by the ABS and the tendency for incomes to be understated](#) in the Census. As such the number of households experiencing mortgage or rental stress may be overstated. Further information on the use of these variables is available in the ABS Census Dictionary (for [both mortgage affordability](#) and [rental affordability](#)).¹

The '**NEET**' variable refers to persons aged 15-24 not engaged in employment, education or training. While there is considerable public interest and debate about employment and education opportunities for young people, one of the common indicators in this area, the youth unemployment rate, only provides partial insight into the economic circumstances facing young people. The NEET variable provides a more complete picture of youth labour force engagement by incorporating education and training with employment.²

Data about **long-term health conditions** was first collected in the 2021 Census. For the sake of brevity, only the number of long-term health conditions per person (that is, one, two or more conditions) has been included in this edition. Data about the prevalence of specific long-term health conditions (such as asthma, diabetes and cancer) is available on request.

The [ABS included](#) long-term health conditions in the 2021 Census to allow for a cross-classification of health conditions with other Census topics, enable a better understanding of health conditions for different groups within the population (such as Aboriginal and Torres Strait Islander people), and for finer geographies.

The long-term health conditions data collected through the Census is [not comparable](#) to other key health surveys such as the National Health Survey ([NHS](#)) and National Aboriginal and Torres Strait Islander Health Surveys ([NATSIHS](#)). Furthermore, the Census health data does not provide for prevalence estimates; this should be sourced from the NHS and/or NATSIHS.

For Census purposes, the identification of long-term health conditions included the [following types](#) only: arthritis, asthma, cancer (including remission), dementia (including Alzheimer's), diabetes (excluding gestational diabetes), heart disease (including heart attack or angina), kidney disease, lung condition (including COPD or emphysema), mental health condition (including depression or anxiety), and stroke. Any other long-term health condition(s) are excluded from the count.

Dwelling structures (including separate houses, semi-detached housing, flats or apartments, and other dwellings) have been added due to public interest and debate around housing mix.

¹ [Another indicator](#) that has been proposed by researchers about mortgage and rental stress is the percentage of households in the bottom 40% of incomes spending more than 30% of incomes on housing costs.

² Australian Institute of Health and Welfare, [Engagement in education or employment](#), June 2021, accessed 10 December 2022.

Community housing provider dwellings were considered for a new addition to this edition. This variable was ultimately not added due to the Research Service's lack of confidence in the census count of this dwelling type.

The community housing dwelling numbers reported in the NSW Department of Communities and Justice's (DCJ) [social housing residential dwellings report](#)³ is a better indicator of community housing provision in NSW. The census count of community housing dwellings in NSW is approximately 45% lower than that of the DCJ.

For reference, the Research Service maintains confidence in the ABS 2021 Census count of public housing dwellings, which is included in this edition.

A number of **medians and averages** at the electorate level have been added to this edition. The selection of medians and averages complements some of the variables reported by the ABS on the QuickStats page (for example, see NSW medians and averages from the [2016](#) and [2021](#) Census).

In addition to these new variables, one census variable (Owner or purchaser dwellings) has been split in two – **Dwellings owned outright** and **Dwellings owned with a mortgage**. Dwellings owned with a mortgage combines two ABS categories: dwellings owned with a mortgage, and dwellings being purchased under a shared equity scheme. Another variable (Dwellings which are caravans) has been replaced with a broader variable, **Other dwellings (e.g. caravans)**, to be consistent with ABS Census publications.

2021 Census data changes: variables that have been removed

Several variables have not been included in this edition. They include:

- Persons of non-Christian religion
- Place of birth
- Prevalence of parents born overseas ([for example](#) count of persons with at least one parent born overseas, or both parents born overseas)
- Weekly family income
- Persons using public transport to travel to work
- Dwellings with an internet connection

Persons of non-Christian religion was removed as the Research Service considered it to be an arbitrary grouping of religions. The count of persons from the majority of religions that traditionally made up the non-Christian grouping (Hinduism, Buddhism, Islam and Judaism) continue to be reported.

Place of birth was [previously reported](#) at the continental/sub-continental level only. This variable has been removed as the Research Service is of the view that country of birth for individual electorates is a more meaningful and better indicator

³ NSW Department of Communities of Justice, Annual Statistical Report 2020-21, [Social housing residential dwellings at 30 June](#), December 2022, accessed 10 December 2022.

of cultural diversity than higher level reporting of continents/sub-continent.

Because of the large number of individual countries of birth in NSW, only the overarching variable **Persons born overseas** is included in this edition. The Research Service is intending to publish detailed data about cultural diversity by SED in 2023. In the meantime, detailed cultural diversity data (including countries of birth, country of birth of parents, ancestry and languages spoken) is available on request.

Previous editions of the electorate profiles have used two measures of income: Weekly family income and Household (equivalised) income. **Weekly family income** has been removed in this edition to avoid having two different data points about income. Household (equivalised) income has been maintained as it is often the income variable used in analyses related to economic wellbeing.

Persons using public transport to travel to work has been removed from this edition. The Research Service was concerned about the [reliability](#) of 2021 Census data in providing an accurate view of work travel behaviours.

The 2021 Census derived data for this variable by asking: 'How did the persons get to work on Tuesday 10 August 2021?'. A number of regions across Australia (particularly south-eastern Australia) were in [lockdown](#) on Census day, and the week preceding it, owing to the impacts of the COVID-19 pandemic. This resulted in a greater than usual number of people working from home at this time.

The ABS notes that the 2021 Census journey to work data 'provides an interesting glimpse into how Australia's working population adapted to stay-at-home restrictions and which modes of transport they utilised when travelling to work'.⁴ While this is true, it does not support meaningful comparisons about travel to work data with previous censuses.

Travel to work data from 2021 can be requested by members and their staff from the Research Service.

Dwellings with an internet collection has been removed, following the removal of this variable by the ABS in their Census topics from 2021.

The 2021 Census of Population and Housing

Privacy concerns

Personal information collected for non-statistical purposes (such as name, address, phone number) was kept to support 2021 Census operations until the end of the Census collection period (October 2021).⁵

Personal information collected for statistical purposes (such as languages spoken, relationship with other family members, education and employment) will

⁴ Australian Bureau of Statistics, [Australia's journey to work](#), 3 November 2022, accessed 10 December 2022.

⁵ Australian Bureau of Statistics, [2021 Census Privacy Statement](#), 'Personal information collected for non-statistical purposes', accessed 15 November 2022.

only be used to produce statistics or for research purposes. It will not be possible for any one person or household to be identified from these statistics or research.⁶

No privacy concerns following the 2021 Census data collection process appear to have been reported by the ABS. It is noted that significant work was undertaken to ensure that the 2016 '[Censusfail](#)' did not occur in 2021.

Data quality

The 2021 Census was conducted at a unique time in Australia's history, with enumeration occurring during the COVID-19 pandemic when much of south-eastern Australia was in lockdown on or about Census night.

In recognition of the importance of Census data, particularly at the time of a pandemic, and the importance of being transparent about data quality, the Australian Statistician established the 2021 Census Statistical Independent Assurance Panel (the Panel) in late 2020 to provide assurance and transparency for the 2021 Census data.

The Panel observed the expected impact of COVID-19 on peoples' movements within, into and out of Australia across a range of census data items, including the expected declines in foreign student populations and the impact of almost no permanent migration for an extended period. In addition, more people were counted at home in the 2021 Census than previously, due to reduced population movement prior to and during the time of the Census. This has enhanced data quality.

The Panel concluded that the 2021 Census data is 'fit-for-purpose, is of comparable quality to the 2011 and 2016 Censuses and can be used with confidence'.⁷

Question changes

Changes were made to some of the questions asked in the 2021 Census. Six of these are relevant to the variables included in this paper. These changes are sufficiently minor that comparison between 2016 and 2021 Census data is still valid.

Sex

The default question of the 2021 Census asked people whether they are male, female or non-binary sex. In 2016 the question asked whether they were male or female, with [special procedures](#) introduced for both the paper and online forms to enable people to report as neither male nor female.

In June 2022 the ABS stated that they would not be releasing a non-binary sex

⁶ Australian Bureau of Statistics, [2021 Census Privacy Statement](#), 'Personal information collected for statistical purposes', accessed 15 November 2022.

⁷ Australian Bureau of Statistics, [Report on the quality of 2021 Census data](#), Executive Summary, 28 June 2022, accessed 15 November 2022.

count in the release of 2021 Census data.⁸ Where a respondent provided a male or female response and a non-binary sex response, the male or female response was used to determine a value. Respondents who selected only non-binary sex (83% of those who chose this option) were allocated to either male or female sex randomly. The ABS subsequently described how the results of the non-binary sex category were not of high enough quality to be used.⁹ Further information on non-binary sex in the 2021 Census is available from the ABS.¹⁰

A formal [complaint](#) was lodged with the Australian Human Rights Commission (AHRC) by national LGBTIQ+ group Equality Australia alleging unlawful discrimination within the design of the 2021 Census. The ABS released a media statement dated 16 September 2022¹¹ confirming full support to the AHRC in relation to any complaint.

Australian citizenship

A question about citizenship has been asked in every Census since 1911. For [2021](#) the options changed from 'Australian' and 'Not Australian' to 'Australian citizen' and 'Not an Australian citizen'. The essence of the question remains the same.

Couples status

This question has been [asked](#) since the 2011 Census for 'de-facto marriages'. In the 2021 Census, an additional variable was added for registered marriages, reflecting amendments to the *Marriage Act 1961* in December 2017.

Ethnicity

The [ancestry variables](#) provide a self-assessed measure of ethnicity and cultural background. In 2021 respondents had the option of nominating two ancestries, and where two ancestries were reported they have equal standing.

The list of most common ancestries was updated and ordered based on the results of this question in 2021. For 2021, the option of having Aboriginal and/or Torres Strait Islander ancestry was moved to the top of the list of possible ancestries to encourage better recording of this ancestry type.

Because of the large number of ancestries for people in NSW, details of ancestry are not reported in this paper, other than for people who nominate Aboriginal and/or Torres Strait Islander ancestry. The Research Service is intending to publish detailed data about cultural diversity by SED in 2023. In the meantime, detailed cultural diversity data (including countries of birth, country of birth of

⁹ Australian Bureau of Statistics, [Analysis of non-binary sex responses](#), 27 September 2022, accessed 10 December 2022.

¹⁰ Australian Bureau of Statistics, [Non-binary sex in the 2021 Census](#), 28 June 2022, accessed 15 November 2022.

¹¹ Australian Bureau of Statistics, [ABS statement on report of a complaint to Australian Human Rights Commission](#), 16 September 2022, accessed 10 December 2022.

parents, ancestry and languages spoken) is available on request.

Language used at home

In the 2021 Census, the question changed slightly to ask does a person *use* a language other than English at home, rather than *speak* a language. The 2021 Census also updated the order of language options to have the most common responses at the top.

Number of motor vehicles

This question has been [asked](#) in a consistent manner since 2011. In 2021, additional instructional text was added to exclude heavy motor vehicles. This was done to better clarify the existing definition of a motor vehicle. According to the [National Heavy Vehicle Regulator](#) (NHVR) a heavy vehicle weighs at least 4.5 tonnes, and includes road trains, passenger buses, semi-trailers and B-double freight trucks.

Undercount and overcount

Following every Census, the ABS conducts a [Census Post Enumeration Survey](#) (PES) to provide an independent measure of Census coverage:

The PES is the largest household survey conducted by the ABS. A random sample of approximately 45,000 households participated in the 2021 PES. From this sample, the ABS collected information from over 117,000 people.

In 2021 the PES used a new public facing name, the Post Census Review (PCR), to better reflect the survey and its purpose in plain language. The ABS conducted the survey via a short interview over the phone or in-person. The survey asked basic demographic details as well as location on Census night. This information was used to determine if and where a person should have been counted in the Census. It also supported the matching of PES person records to Census records to establish the number of times they were actually counted.

Reasons why people may have been missed in the Census (that is, undercounted) include:

- They were travelling and were difficult to contact
- They mistakenly thought they were counted elsewhere
- They did not wish to be included due to concerns about confidentiality or a more general reluctance to participate
- The dwelling in which they were located was missed because it was difficult to find (for example, it was in a remote or non-residential area) or the dwelling was not included on the ABS Address Register.

Reasons why people may have been counted more than once (that is, overcounted) include:

- They were included on the Census form at the dwelling where they usually live, even though they stayed elsewhere and were counted in that place on Census night

- They were overseas on Census night and so should not have been counted at all, but were included on the Census form at the dwelling where they usually live.

Census **net undercount** 'is the difference between the estimate of how many people should have been counted in the Census as determined through the PES and the actual Census count (including imputed persons)'.¹²

The 2021 Census counted 25,417,978 Australian residents who were in Australia on Census night (including people imputed for non-responding dwellings). The PES estimate for the same population was 25,608,022 persons. This represents a net undercount rate of 0.7%, the lowest recorded net undercount rate for an Australian census, and down from 1.0% in 2016.

Nationally, the net undercount rate for capital cities was lower (0.5%) than for regions in the rest of state (1.2%). This was a reversal of the net undercount rates in 2016 (1.2% net undercount in capital cities and 0.5% in regions in the rest of state) and was driven by decreases in the net undercount rate for Sydney, Melbourne, Brisbane and Canberra. Gross coverage error in these capital cities also showed decreases from 2016 indicating higher Census coverage in these areas.¹³

Young adults are more likely to be missed in a census, while older adults are more likely to be counted or overcounted, as observed by previous censuses (both in Australia and overseas). Young children are often mistakenly omitted from census forms, and males are traditionally more likely to be missed than females. This pattern held in 2021:

- More males were missed by the Census than females; the net undercount rate for males was 1.3% compared with 0.2% for females
- Males aged 30-34 years had the highest net undercount rate (3.6%) of all age groups
- Females aged 85 years and over had the highest net overcount rate (-3.0%) of all age groups
- All age groups under 40 years had a net undercount rate over 1.0%, with the highest net undercount rate for the 10–14 year age group (2.3%)
- All age groups 60 years and over had a net overcount with the highest net overcount rate in the 85 years and over group (-2.0%).¹⁴

The 2021 PES estimated that 983,257 Aboriginal and Torres Strait Islander people should have been counted in the Census, compared with 812,505 persons

¹² Australian Bureau of Statistics, [2021 Census overcount and undercount](#), 28 June 2022, [website – accessed 16 November 2022].

¹³ Australian Bureau of Statistics, [2021 Census overcount and undercount](#), 'Capital cities and rest of state regions', 28 June 2022, [website – accessed 16 November 2022]

¹⁴ Australian Bureau of Statistics, [2021 Census overcount and undercount](#), 'Age and sex', 28 June 2022, [website – accessed 16 November 2022]

who were counted. This is equivalent to a net undercount of 170,752 persons, or a rate of 17.4%.¹⁵

Understanding change in counts of Aboriginal and Torres Strait Islander Australians

There was a significant increase in the count of Aboriginal and Torres Strait Islander Australians between the 2016 and 2021 Censuses. In NSW, the increase was 28.6%, or 61,867 people. Nationally, the increase was 25.2%, or 163,557 people. The increase was larger than the change between the 2011 and 2016 Censuses, for both NSW and Australia.

On 4 April 2023 the ABS released a [publication](#) explaining the increased count of Aboriginal and Torres Strait Islander Australians, which relates to a mix of both demographic and non-demographic factors.¹⁶ Demographic factors relate to births, deaths, and migration. The ABS changed its methodology for counting children under 5, relying on Census counts rather than registered births.¹⁷ Non-demographic factors relate to changes in self-identification or coverage by the Census. The Census uses the [Standard Indigenous Question](#), which is based on self-identification. In 2021, a person may have chosen to identify as Aboriginal and/or Torres Strait Islander for the first time, despite having filled out Censuses differently in the past.¹⁸

In NSW, 64.5% of the increased count in Aboriginal and Torres Strait Islander Australians between the 2016 and 2021 Censuses is related to non-demographic changes, and 35.5% was related to demographic changes. Nationally, 56.5% of the change was non-demographic, and 43.5% was related to demographic changes.

Additionally, the Research Service notes that for the 2021 Census, the ABS moved the ancestry response category boxes for the Aboriginal and/or Torres Strait Islander person to the top of the list, which may have had an impact on the number of people selecting the response.¹⁹

Data confidentiality

The personal information provided in Census forms is protected by the secrecy provisions of the [Census and Statistics Act 1905](#) (CSA). This means ABS staff (including temporary Census employees) are required by law to protect personal information and maintain its confidentiality. Under the CSA, the ABS must not release personal information in a way that would allow any person to be identified.²⁰

[Introduced random error](#) is therefore used by the ABS to ensure that no data is released which could risk the identification of individuals. In the case of [TableBuilder](#), which was used to access the data presented in this publication, the ABS maintains [confidentiality](#) by introducing small random errors so that the rows and columns of a table may not always sum to the displayed totals. The ABS also notes that no reliance should be placed on small counts.²¹

Data interpretation

Drawn from relevant ABS publications like the [2021](#) Census Dictionary, the following material provides the reader with a guide for interpreting the data included in the electorate profiles.²²

Counts of persons, families, households and dwellings

All counts of persons are based on their [place of usual residence](#) (the place where a person usually lives), not their [place of enumeration](#) (the place at which a person is counted on Census night). All counts of families, households and dwellings are based on their place of enumeration.

All dwelling counts relate to the total number of **occupied private dwellings**, not the total number of dwellings. In 2021, occupied private dwellings accounted for 90.89% of all dwellings in NSW. The remaining dwellings were either unoccupied private dwellings (8.90%) or non-private dwellings (0.21%).

Percentages and ranks

In many cases, the percentage provided for a variable was calculated in relation to the total number of persons in the electorate. However, for approximately half of the variables, the percentage was calculated in relation to a *subset* of the electorate's total population. For example, the total number of employed persons in an electorate is expressed as a percentage of the total number of persons in the electorate aged 15 and over. The population used when calculating the percentage for each variable is provided in the following section, as well as the

²⁰ Australian Bureau of Statistics, [2021 Census Privacy Statement](#), 'Confidentiality', [website – accessed 16 November 2022].

²¹ Australian Bureau of Statistics, [Confidentiality and relative standard error \(TableBuilder\)](#), 19 November 2021, [website – accessed 16 November 2022].

²² Some total figures reported in this publication may differ slightly from those available using ABS Census publications such as [QuickStats](#) and [Community Profiles](#) publications. This is due to variations in the construction of the total variables used across the series of different publications.

definition of each variable.

All ranks are based on percentages except for the variables of total population, population density, area of the electorate, and the medians and averages. In these cases, the rank is based on the number provided.

Total state population

The ABS divides the total NSW population into the 93 state electorates and two additional categories: 'No usual address (NSW)' (11,371 persons in 2021) and 'Migratory – Offshore – Shipping (NSW)' (0 persons in 2021).

Because people in these two categories are not recorded as living in any of the 93 NSW state electorates, they have been excluded from the total NSW population used in the [interactive tables](#). This exclusion extends to any NSW averages identified in the [interactive tables](#).

Not stated

Recorded as 'Not stated' by the ABS, the [rate of non-responses](#) to a Census question varies by variable. In 2021 in NSW, variables such as dwelling structures (0.3%), type of educational institution attending (0.7%), landlord type (0.8%), age (4.3%), and sex (4.5%) recorded some of the lowest non-response rates. Variables such as count of selected long-term health conditions (8.1%), place of usual residence five years ago (6.9%), and unpaid assistance to a person with a disability (6.7%) recorded relatively high non-response rates.

Income data

The Census [asked](#), What is the *total* of all income the person *usually* receives? (emphasis in original). The respondent is instructed not to deduct tax, superannuation contributions or any other automatic deductions, and include:

- Wages and salaries
- Government pensions, benefits and allowances
- Profit or loss from unincorporated businesses, farms or rental properties
- Any other income from sources such as superannuation, dividends from shares, and workers' compensation.

Some respondents recorded a response of negative or nil income. [Negative income](#) is defined by the ABS as occurring when:

... the operating expenses are higher than the gross receipts (or revenue) of a self-employed person, business or a rental property. A person has negative income if these losses are greater than any income, benefits or allowances received from other sources.

ABS studies of income and expenditure have found that households in the bottom income decile (the bottom 10% of households) and those with negative gross incomes tend to have expenditure levels that are comparable to those of households with higher income levels. According to the ABS:

This suggests that these households have access to economic resources such as wealth, or that the instance of low or negative income is temporary, perhaps reflecting business or investment start up. Other households in the lowest income decile in past surveys had average incomes at about the level of the single pension rate, were predominantly single person households, and their main source of income was largely government pensions and allowances. However, on average, these households also had expenditures above the average of the households in the second income decile, which is not inconsistent with the use of assets to maintain a higher standard of living than implied by their incomes alone.²³

Equivalised total household income has been selected as the preferred income variable for these profiles. The ABS defines [equivalised total household weekly income](#) as the:

... household income adjusted by the application of an equivalence scale to facilitate comparison of income levels between households of differing size and composition. This variable reflects that a larger household would normally need more income than a smaller household to achieve the same standard of living. The 'modified OECD' equivalence scale is used.

Equivalised total household income can be viewed as an indicator of the economic resources available to a standardised household. For a lone person household, it is equal to household income. For a household comprising more than one person, it is an indicator of the household income that would be needed by a lone person household to enjoy the same level of economic wellbeing.

The weighting applied to personal incomes is built up by allocating points to each person in a household (1 point to the first adult, 0.5 points to each additional person who is 15 years and over, and 0.3 to each child under the age of 15) and then summing the equivalence points of all household members.

Equivalised total household income is also useful for these profiles as it is used in the measurement of poverty. As described by the Productivity Commission in its report [Deep and Persistent Disadvantage in Australia](#):

The measurement of relative poverty, as a proxy for disadvantage, requires the choice of a specific threshold or distance from median income. The main threshold used by the OECD is 50 per cent of median equivalised household income — that is, income adjusted for the composition of the household ... The European Union countries most commonly use a poverty line set at 60 per cent of median income (Besharov and Couch 2012). The specific threshold chosen is somewhat arbitrary.²⁴

For [equivalised total household weekly income](#), the ABS sets negative income to zero; this publication therefore has a variable Households with nil income. In the 2021 Census, 56,276 households in NSW recorded nil equivalised total household weekly income, equivalent to 1.67% of all households.

DEFINITIONS

This section contains details of the definition for each variable, and the electorate population used to calculate it.

Definitions

Variable	Definition
Aboriginal and/or Torres Strait Islander ancestry	Persons who identified themselves as being of Australian Aboriginal and/or Torres Strait Islander ancestry
Area	The size of each electorate in square kilometres
Count of families	By place of enumeration
Count of households and dwellings	By place of enumeration
Count of persons	By place of usual residence
Couple family with children	All couple families with children under 15 years of age and/or dependent students aged 15 to 24 years. This excludes couple families with non-dependent children living at home
Couple family with no children	Includes couple families who have never had children and couple families who have no resident children
Dwelling	A structure which is intended to have people live in it, and which is habitable on Census night. Some examples of dwellings are houses, motels, flats, caravans, prisons, tents, humpies and houseboats
Dwellings owned outright	Occupied private dwellings owned outright
Dwellings owned with a mortgage	Occupied private dwellings owned with a mortgage or being purchased under a shared equity scheme
Employed persons in part-time work	Persons who worked less than 35 hours in all jobs during the week prior to Census night
Equivalised total household income (weekly)	Total household income adjusted by the application of an equivalence scale to facilitate comparison of income levels between households of differing size and composition, where total household income is the summation of the personal incomes reported by all household members aged 15 years and over
Family	Two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household
Family income (weekly)	The sum of personal incomes reported by all family members aged 15 years and over
Female labour force/participation rate	Female persons aged 15 and over in the labour force, divided by the total number of female persons aged 15 and over
Flats or apartments	Occupied private dwellings which are in a one or two storey block, a three storey block, a four to eight storey block, nine or more storey block, or attached to a house
Household	One or more persons, at least one of whom is at least 15 years of age, usually resident in the same private dwelling
Household rent (weekly)	Individual dollar amounts of rent paid by households on a weekly basis for the dwelling in which they were counted on Census night

Household size	The average number of persons usually resident in an occupied private dwelling
Households with two or more motor vehicles	Occupied private dwellings where two or more registered vehicles owned or used by the occupants of the dwelling were garaged or parked near the dwelling on Census night
Industry of employment	Employment in 11 of 19 industries is included in this publication: agriculture, forestry and fishing; mining; manufacturing; construction; retail trade; accommodation and food services; financial and insurance services; professional, scientific and technical services; public administration and safety; education and training; and health care and social assistance
Labour force	Total number of employed and unemployed people
Lone person household	A private dwelling with only one person aged 15 years or over.
Long-term health condition	Includes arthritis, asthma, cancer (including remission), dementia (including Alzheimer's), diabetes (excluding gestational diabetes), heart disease (including heart attack or angina), kidney disease, lung condition (including COPD or emphysema), mental health condition (including depression or anxiety) and stroke
Mortgage affordability	Households where mortgage repayments are more than 30% of household income
NEET	Persons aged 15 to 24 years (i.e. youth) not engaged in employment, education or training
Occupation	Five of eight occupations are included: managers; professionals; technicians and trades workers; community and personal service workers; and labourers
One parent family	All one parent families with children under 15 years of age and/or dependent students aged 15 to 24 years. This excludes one parent families with non-dependent children living at home
Other dwellings	Occupied private dwellings that are caravans, cabins or houseboats; improvised home, tent, sleepers out, and house or flat attached to a shop, office etc
Personal income (weekly)	Total income, without deductions for tax or superannuation. Includes wages and salaries; public allowances; profit or loss from business and rental properties, and other income (for example dividends)
Persons (18+) who are Australian citizens	Total number of persons aged 18 and over who are Australian citizens
Persons attending a tertiary education institution	Persons attending vocational education (including TAFE and private training providers), university or other higher education, and tertiary not further defined
Persons attending private schools	Primary and secondary school students attending Catholic or other non-government schools
Persons born overseas	Persons born in countries/territories other than Australia, Norfolk Island and Australian External Territories
Persons employed in professional occupations	Includes managers and professionals
Persons not fluent in English	Persons who uses another language and English 'not well' or 'not at all'
Persons of Christian religion	Anglican, Baptist, Brethren, Catholic, Churches of Christ, Jehovah's Witnesses, Latter-day Saints, Lutheran, Oriental Orthodox, Assyrian Apostolic, Eastern Orthodox, Presbyterian and Reformed, Salvation Army,

	Seventh-day Adventist, Uniting Church, Pentecostal, Other Protestant and Other Christian
Persons of no religion	Persons who stipulated on the census form: No religion, so described, Secular Beliefs, Agnosticism, Atheism, Humanism and Rationalism
Persons providing unpaid assistance to a person with a disability	Include persons providing unpaid assistance to a person with a disability, health condition, or due to old age
Persons who are in a same-sex couple in the same household	Persons in a same-sex couple, de-facto marriages (2016, 2021 Census) and registered marriages (2021 Census)
Persons who are in an opposite-sex couple in the same household	Persons in an opposite-sex couple, and in a registered or de-facto marriage
Persons who changed address in the last five years	Persons who were residing at a different address five years prior i.e. they lived elsewhere in Australia or they lived overseas in 2016
Persons who contributed to voluntary work	Persons who spent time doing unpaid voluntary work for an organisation or group in the twelve months prior to Census night
Persons with highest level of school completed Year 10 or below	Persons aged 15 and over whose highest year of school completed is Year 10, Year 9 or Year 8, or they did not go to school
Persons with highest level of school completed Year 12	Persons aged 15 and over whose highest year of school completed is Year 12
Persons with tertiary education qualifications	Persons aged 15 and over whose highest educational qualification is a postgraduate degree, graduate diploma, graduate certificate, bachelor degree, advanced diploma or diploma
Persons with trade qualifications	Persons aged 15 and over with certificate level qualifications
Place of enumeration	The place where a family, household or dwelling was counted on Census night
Place of usual residence	The place where a person usually lives
Population	Population in electorate
Population density	Population of electorate per square kilometres
Population growth	Percentage change between 2011 and 2021, and 2016 and 2021 in the total electorate population
Private dwellings	Separate houses semi-detached, row or terrace houses, townhouses, etc.; flats or apartments; caravans; cabins and houseboats; improvised homes, tents or sleepers-out; and houses or flats attached to a shop, office, etc.
Public housing	Occupied private dwellings rented from a state or territory housing authority
Rent affordability	Households where rent payments are more than 30% of household income
Rented dwellings	Occupied private dwellings which are rented from all sources including: real estate agents; state or territory housing authorities; community

	housing provider; persons not in the same household; other landlord type; and other landlord type not stated
Semi-detached housing	Occupied private dwellings that are semi-detached, row or terrace house, townhouse etc. with one storey, or with two or more storeys
Separate house	Occupied private dwellings that are separate houses
Total employed persons	Includes people in full-time work, part-time work and 'away from work'
Unemployed persons	Persons looking for full-time or part-time work
Unemployment rate	For all persons aged 15 and over, the number of unemployed persons expressed as a proportion of the total labour force
Youth	All persons aged 15 to 24
Youth unemployment rate	For all persons aged 15 to 24, the number of unemployed persons expressed as a proportion of the total labour force

Electorate population used in calculating percentage

Indicator	Electorate population
Population	
Total population	N/A
Population growth (2016 to 2021)	N/A
Population growth (2011 to 2021)	N/A
Population density (persons per square kilometre)	N/A
Area (square kilometres)	N/A
Number of females	Total persons
Number of males	Total persons
Persons (18+) who are Australian citizens	Persons 18+
Persons who changed address in the last five years	Persons 5+
Persons aged under 5	Total persons
Persons aged between 5 and 14	Total persons
Persons aged between 15 and 24	Total persons
Persons aged between 25 and 64	Total persons
Persons aged 65 and over	Total persons
Cultural diversity	
Persons of Aboriginal and Torres Strait Islanders ancestry	Total persons
Persons born overseas	Total persons
Persons not fluent in English	Total persons
Persons who use a non-English language at home	Total persons
Persons of Christian religion	Total persons
Persons of Catholic religion	Total persons
Persons of Anglican religion	Total persons
Persons of Islamic religion	Total persons

Indicator	Electorate population
Persons of Buddhist religion	Total persons
Persons of Hindu religion	Total persons
Persons of Jewish religion	Total persons
Persons of no religious affiliation	Total persons
Families and relationships	
Couple family with children	Total families
Couple family with no children	Total families
One parent family	Total families
Lone person households	Total households
Persons who are in an opposite-sex couple in the same household	Persons 16+
Persons who are in a same-sex couple in the same household	Persons 16+
Household income (equivalised) and housing affordability	
Households with nil income	Total households
Households with income from \$1 to \$649 p/wk	Total households
Households with income from \$650 to \$1,249 p/wk	Total households
Households with income from \$1,250 to \$1,999 p/wk	Total households
Households with income from \$2,000 to \$2,999 p/wk	Total households
Households with income from \$3,000 or more p/wk	Total households
Households where mortgage repayments are >30% of household income	Total households paying mortgages
Households where rent payments are >30% of household income	Total households paying rent
Labour force	
Total employed persons	Persons 15+
Employed persons in part-time work	Persons 15+
Unemployment rate	Labour force
Youth (15-24)unemployment rate	Youth labour force
Not engaged in employment, education or training (NEET) (15-24)	Persons 15-24
Labour force/participation rate	Persons 15+
Female labour force/participation rate	Female persons 15+
Industry and occupation	
Employees (agriculture, forestry and fishing)	Total employed persons
Employees (mining)	Total employed persons
Employees (manufacturing)	Total employed persons
Employees (construction)	Total employed persons
Employees (retail trade)	Total employed persons

Indicator	Electorate population
Employees (accommodation and food services)	Total employed persons
Employees (financial and insurance services)	Total employed persons
Employees (professional, scientific and technical services)	Total employed persons
Employees (public administration and safety)	Total employed persons
Employees (education and training)	Total employed persons
Employees (health care and social assistance)	Total employed persons
Persons employed in professional occupations	Total employed persons
Persons employed as technicians and trades workers	Total employed persons
Persons employed as community and personal service workers	Total employed persons
Persons employed as labourers	Total employed persons
Education	
Persons (15+) with tertiary education qualifications	Persons 15+
Persons (15+) with trade qualifications	Persons 15+
Persons (15+) with no post-school qualifications	Persons 15+
Persons attending infant, primary or secondary school	Total persons
Persons attending private schools	Total attending school
Persons attending a tertiary education institution	Total persons
Persons with highest level of school completed Year 12	Persons 15+
Persons with highest level of school completed Year 10 or below	Persons 15+
Health, unpaid work and care	
Persons with one long-term health condition	Total persons
Persons with two or more long-term health conditions	Total persons
Persons (0-14) with long-term health condition(s)	Persons 14 and younger
Persons requiring assistance with core activities	Total persons
Persons providing unpaid assistance to a person with a disability, health condition or old age	Persons 15+
Persons who contributed to voluntary work	Persons 15+
Occupied private dwellings and transport	
Separate house	Total occupied private dwellings
Semi-detached housing	Total occupied private dwellings
Flats or apartments	Total occupied private dwellings
Other dwellings (e.g. caravans)	Total occupied private dwellings
Rented dwellings	Total occupied private dwellings
Dwellings owned outright	Total occupied private dwellings
Dwellings owned with a mortgage	Total occupied private dwellings
Public housing dwellings	Total occupied private dwellings
Households with two or more motor vehicles	Total occupied private dwellings

Allocation of electorates to NSW regions

Region	NSW state electorates
Blacktown-Parramatta	Auburn, Blacktown, Epping, Granville, Mount Druitt, Parramatta, Prospect, Riverstone, Winston Hills
Eastern/Inner Sydney	Balmain, Coogee, Drummoyne, Heffron, Maroubra, Newtown, Strathfield, Summer Hill, Sydney, Vaucluse
Northern Sydney	Davidson, Hornsby, Lane Cove, Manly, North Shore, Pittwater, Ryde, Wahroonga, Wakehurst, Willoughby
North West Sydney	Blue Mountains, Castle Hill, Hawkesbury, Kellyville, Londonderry, Penrith
Southern Sydney	Bankstown, Canterbury, Cronulla, East Hills, Heathcote, Kogarah, Miranda, Oatley, Rockdale
South West Sydney	Badgerys Creek, Cabramatta, Camden, Campbelltown, Fairfield, Holsworthy, Leppington, Liverpool, Macquarie Fields, Wollondilly
Central Coast	Gosford, Terrigal, The Entrance, Wyong
Hunter	Cessnock, Charlestown, Lake Macquarie, Maitland, Newcastle, Port Stephens, Swansea, Upper Hunter, Wallsend
Illawarra Shoalhaven	Keira, Kiama, Shellharbour, South Coast, Wollongong
North Coast	Ballina, Clarence, Coffs Harbour, Lismore, Myall Lakes, Oxley, Port Macquarie, Tweed
North West NSW	Barwon, Bathurst, Dubbo, Northern Tablelands, Orange, Tamworth
Riverina & South East NSW	Albury, Bega, Cootamundra, Goulburn, Monaro, Murray, Wagga Wagga
